

SMU: DATA EMPOWERED

**This is one powerfully smart pony.**

SMU's high-speed supercomputing power gallops in the top 20 among U.S. universities. And our data science is woven into every discipline. So there's plenty of horsepower behind the brainpower.

Thanks to an \$85 million investment over the last five years, our advanced computing power and data analysis capabilities are accessible with no waiting to our faculty and students, business and community research partners. That means YOU, making this pony one powerfully strong asset to the Dallas region.
