## Installing Paper Cut Secure Release: Mac OS X

- 1. In OS X, click on the System Preferences icon in your dock or search for it in Spotlight.
- 2. In the window that appears, click Printers and Scanners.

- 3. Click on the "+" button at the bottom of the printer list to add a printer.
- 4. If you are logged into your computer with your SMUID and password, available network printers will be listed. Select the desired printer.
