

Attention engineering students!

SS 2315: ENGINEERING & DESIGN FOR DEVELOPING WORLD

SS 2310: ENVIRONMENTAL FIELD OF METHODS

SS2315 and SS 2310 will cover topics related to environmentally relevant field work in the developing world. Surface water and groundwater collection will be addressed as well as the analysis of coliform bacteria, basic water quality parameters, and inorganic contaminants. Topics will also include soil collection and analysis, sanitation and water systems in the field, mapping, basic GIS, and systems planning.

Lyle field courses are taught in Taos!

Course Dates
07/28/2013- 08/22/2013
