FALL 2012 Undergraduate Courses

+ANTH 1321 FRESHMAN SEMINAR – DEBUNKING MYTHS IN ARCHAEOLOGY. The popular culture that surrounds archaeology is
filled with fantastic claims. How do archaeologists weed through the outlandish to understand the human past? Using critical
thinking skills and scientific reasoning and logic, we will evaluate a variety of assertions about the human past, including pseudo-
scientific claims, hoaxes, and other spurious arguments relating to archaeology. As on on-going project, the students will explore a
scientific debate on the peopling of the Americas, ultimately producing a research paper and presentation. Meets the Human
Diversity Co-Requirement.
