

COLLEGIUM da VINCI

A SOCIETY FOR SCIENTIFIC DISCUSSION

Dedman College Presents
**Fostering Innovation
Within and Between
the Science Disciplines**

Dr. Thomas Cech

*Distinguished Professor
University of Colorado-Boulder*

*Crum Auditorium in the
Collins Executive Education Center*

*3150 Binkley Avenue
Parking available at Binkley Garage
Bring ticket to lecture for validation*

Sunday, March 21, 2010

7:30 pm

Open to the Public

FREE

Janelia Farm Research Center

Many future opportunities for biomedical discovery will depend on interdisciplinary research, where chemists, physicists, computer scientists and engineers are brought together with biologists. Academic institutions sometimes inhibit interdisciplinary research and education through their policies and their siloed culture. Recognizing these challenges, Dr. Cech will share insights from his own research career and from his decade-long stint as president of the Howard Hughes Medical Institute (HHMI), where the Janelia Farm Research Campus stands as a model for a new type of interdisciplinary research institute.
