Fundamentals for the Aspiring Musician is a completely integrated textbook written for students who wish to study music professionally. It uses technology to its fullest to aid students in preparation for the study of music theory by laying a thorough and solid foundation of basic music fundamentals.

Rather than using separate textbooks, recording sets, or software programs, this textbook integrates a hard copy text with a parallel, interactive, multimedia version of the textbook, which allows students to hear the examples as they see them, hear and practice exercises to master basic skills, and easily review and reinforce terms or delve deeper into a topic with a single click of the mouse. The hard copy text has an identical layout as the multimedia version for easy reference away from the computer.

About the Authors:

Robert J. Frank is Associate Professor of Music Theory and Composition at *Southern Methodist University*. He has frequently lectured on the topic of integrating technology into the teaching and making of music nationally and internationally.

Kenneth Metz teaches Music Theory at the *University of the Incarnate Word* in San Antonio, Texas. An award winning composer, his music has been performed across the United States.
