

Health & Society Major

Southern Methodist University

Information Sheet

The Health & Society Major at SMU is an inter-disciplinary program for students interested in the practice and study of health in global and cultural contexts. Through this plan of study, students engage in broad and diverse ways with the problems of illness and health care in human societies. With its major emphasis on inter-disciplinarity, the major fosters graduates who are well prepared to perform and collaborate in health care occupations by viewing health as part of dynamic systems with symbolic, material, ethical, and historical factors. The program will help students meet a greater variety of post-baccalaureate goals, including employment or graduate admission to schools and programs of medicine, dentistry, public health, nursing, health care administration, psychology, medical anthropology, medical sociology, law, policy and others.

In the core course work, students will develop a foundation for the interdisciplinary study of human health in social context. Next they will complete training in the theory, research methods, and case studies from one of two programmatic tracks: a physiological science track oriented to students pursuing graduate study in medicine, nursing, pharmacy, dentistry, and other clinical fields; and a behavioral and social science track, oriented to students pursuing applied work, research, and graduate study in the allied health professions including public health, health care administration, psychology, and medical anthropology or sociology. Students reunite in a senior capstone course through which they prepare a paper or project reflective of their multi-disciplinary approach to human health problems.

To apply for the H&S Major, please e-mail one copy of the following materials to Tiffany Powell, program admin (tapowell@smu.edu). Applications are accepted on a rolling basis, and reviewed every September 15 and February 15 for admission. Please also state the Track (1: Physiological or 2: Social/Cultural (BA or BS)) to which you are applying.

- Statement of Interest, not to exceed two, single-spaced pages, explaining your interest in the Program, your GPA, relevant personal experience, and your related goals both at SMU and post-baccalaureate. Also include a brief discussion of why you think an interdisciplinary perspective on health and healing is of value.
- Completed Interest Form (attached), detailing coursework in the Major already completed.
- Degree Progress Report (summary and detail pages), not more than 30 days old.
- Successful completion of your first year at SMU.

Thank you for your interest in the Health and Society Major. Please note that stating your interest in this major is not a guarantee of future admittance. The selection process is highly competitive, and your grades, experience, career goals, and statement of interest are all considered carefully by an interdisciplinary admissions committee of Health and Society Program faculty.
