ANTH 2301

Introductory Cultural Anthropology

Spring 2019 – MWF – 12:00-12:50pm

How do people live around the world? What are different societies like? This course explores variations in different cultures around the world with regard to cultural values, social practices, religion, rules of law, kinship, etc. We focus on understanding the forces that shape cultures and societies and how groups adapt to a rapidly changing world.

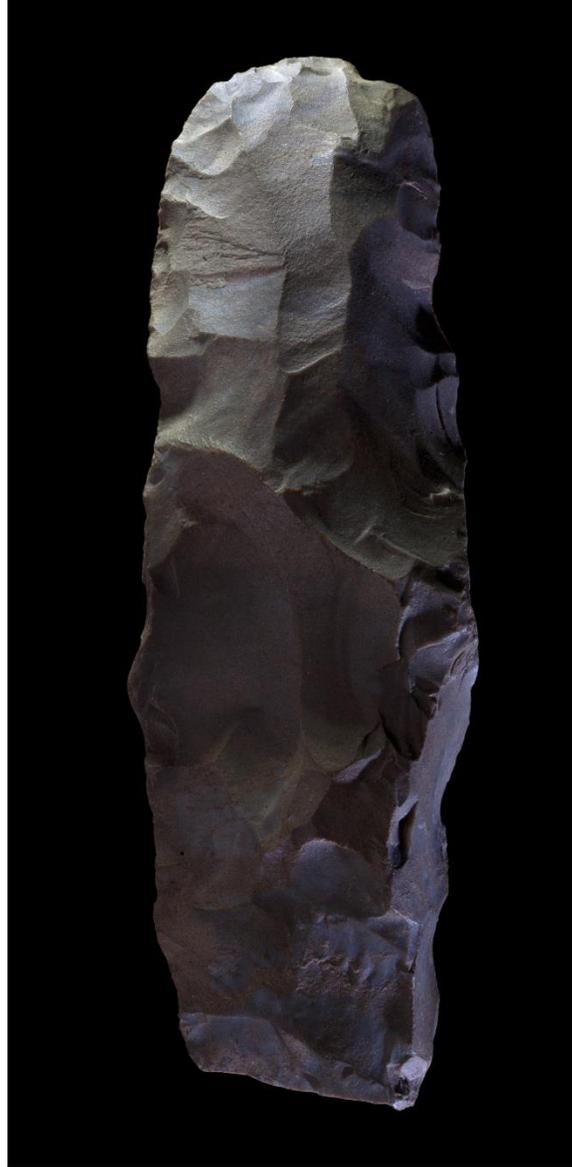

Satisfies Individuals, Institutions, and Cultures Breadth and Human Diversity Proficiency.

ANTH 2302

People of the Earth

Spring 2019 – TTh – 12:30-1:50pm

When did humans first appear on Earth? How have we changed biologically and culturally over the last 5 million years? When did people settle down, raise crops, forge metal tools, and build cities? This class examines human biological and cultural evolution, from our separation from other apes to the appearance of modern humans in Africa, the spread of people across the globe, to plant and animal domestication, and the rise of the world's great civilizations. ***Satisfies Historical Context Breadth, Human Diversity Proficiency, and Ways of Knowing.***

ANTH 2382

Human Nature

Spring 2019 – TTh – 8:00-9:20am

Is there such a thing as human nature? And if there is, how would we recognize it when we see it? Human nature takes an interdisciplinary approach to understanding why humans are the way we are. *Satisfies Natural & Applied Sciences Depth.*

ANTH 2463

The Science of Our Past: Introduction to Archaeology

Spring 2019 – TTh – 12:30-1:50pm

How do scientists study human societies and ancient civilizations? What types of evidence do they use? What do their findings indicate about how people lived in the past? This class examines how and why archaeologists study evidence of past human behavior. We will learn through lecture, videos, as well as hands-on labs that emphasize analyses and interpretations of artifacts and other archaeological materials. ***Satisfies Science and Engineering Breadth, Historical Context Breadth, and Information Literacy Proficiency.***

ANTH 3329

Contesting Development

Spring 2019 – MWF – 10:00-10:50am

Critiques and discusses the impact of ‘economic development’ within a capitalist/globalization framework on people’s lives and communities across the developing world. Examines how capitalist development poses challenges to human rights, and debates various political and economic positions on the causes, human impacts, and possible solutions to those challenges. The impacts include hunger, poverty, environmental degradation, global warming, spread of new diseases, ethnic conflict and ethnocide, terrorism, and religious fundamentalism. Also examines and debates possible alternative forms of development and modernization. ***Satisfies History, Social, and Behavioral Sciences Depth, Human Diversity Proficiency, and Global Engagement Proficiency.***

ANTH 3336

Gender & Globalization: Cultural & Ethical Issues

Spring 2019 – TTh – 8:00-9:20am

How do global forces impact the lives of men and women around the world? How does globalization lead not only to gendered patterns of displacement and migration, but also result in the exploitation and trafficking of human beings? Does it alter gender ideologies and do these result in changing gender identities? What ethical positions should we adopt in relation to these impacts? These are a few of the questions explored in this class. *Satisfies History, Social, and Behavioral Sciences Depth, Human Diversity Proficiency, and Global Engagement Proficiency.*

ANTH 3384

Paradise Lost?

Spring 2019 – MWF – 1:00-1:50pm

Have we despoiled the garden? Unprecedented human populations use more of the earth than can be replenished. Have we lost our way? Did ancient societies live in harmonious balance with their environments? In this course we explore the appropriate role for ancient lessons of human-environment successes and failures to better understand contemporary environmental challenges. ***Satisfies Ways of Knowing Foundation and the Historical Contexts Breadth requirement.***

ANTH 4350/6332

Special Topics in Anthropology: Lithics

Spring 2019 – M – 2:00-4:50pm

Stone artifacts are among the first tools made by humans, and they represent one of the most-abundant classes of archaeological remains found on prehistoric archaeological sites throughout the world. This course introduces students to the method and theory of archaeological analysis of stone artifacts, particularly chipped-stone artifacts. We review the kinds of information that may be gleaned from stone tools and from the remains generated during their production. Such information includes reconstructing technologies, understanding how these tools were used, identification of raw materials, and the ways which archaeologists think about, interpret, and explain prehistoric lithic technology.
