Immigration Law Courses and Opportunities

Immigration lawyers work both for the government and those seeking lawful status, legal residency, or citizenship in the United States. Some work for companies or educational institutions, help employees with immigration matters. Others serve individual clients who need assistance with family-based immigration. Some work for non-profit groups helping people seeking asylum or other humanitarian immigration benefits. An immigration lawyer must be knowledgeable about relevant statutes and implementing regulations, as well as caselaw from both administrative and federal courts that interpret them. Additionally, an immigration lawyer must have a sophisticated understanding of the legal, social, historical, cultural, and political factors that constructed immigration law and policy in the U.S., including the tension between the right of a sovereign nation to determine whom to admit and the constitutional and human rights of noncitizens to gain admission or stay in the U.S.; issues that arise between noncitizens and citizens of the U.S. with regard to employment, security, and civil rights; and the tension between the federal and state governments in regulating immigration law.
