

## How To Install Cisco IronPort Email Security (Encryption) Plugin

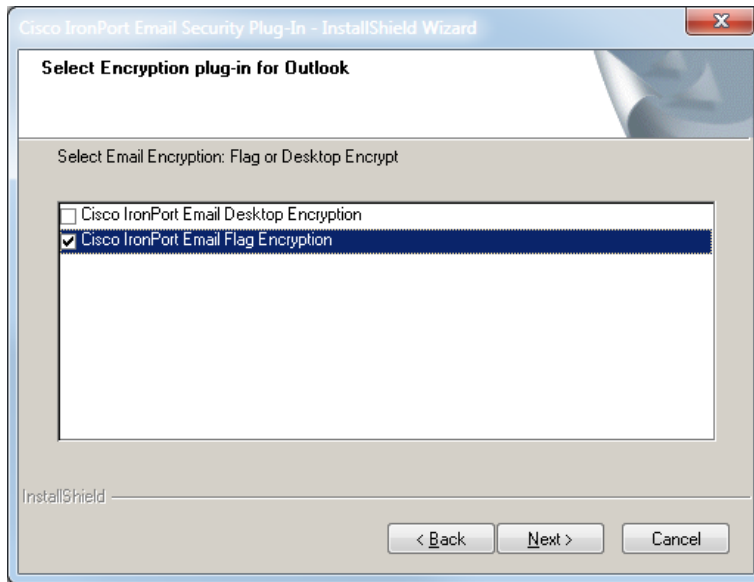

1. Download the installer from:  
<http://smu.edu/EmailSecurity>
2. Close Outlook and any open messages, appointments etc.
3. Right-click, **Run As Administrator**.
4. Click **OK**.
5. Click **Next**.
6. Accept agreement, click **Next**.
7. Select "Custom...", click **Next**.

**WARNING: Do not select "Complete", otherwise you will be required to uninstall/reinstall!**

8. Keep the default destination, click **Next**.
9. Keep default features, click **Next**.

10. Select “Flag Encryption”, click **Next**.

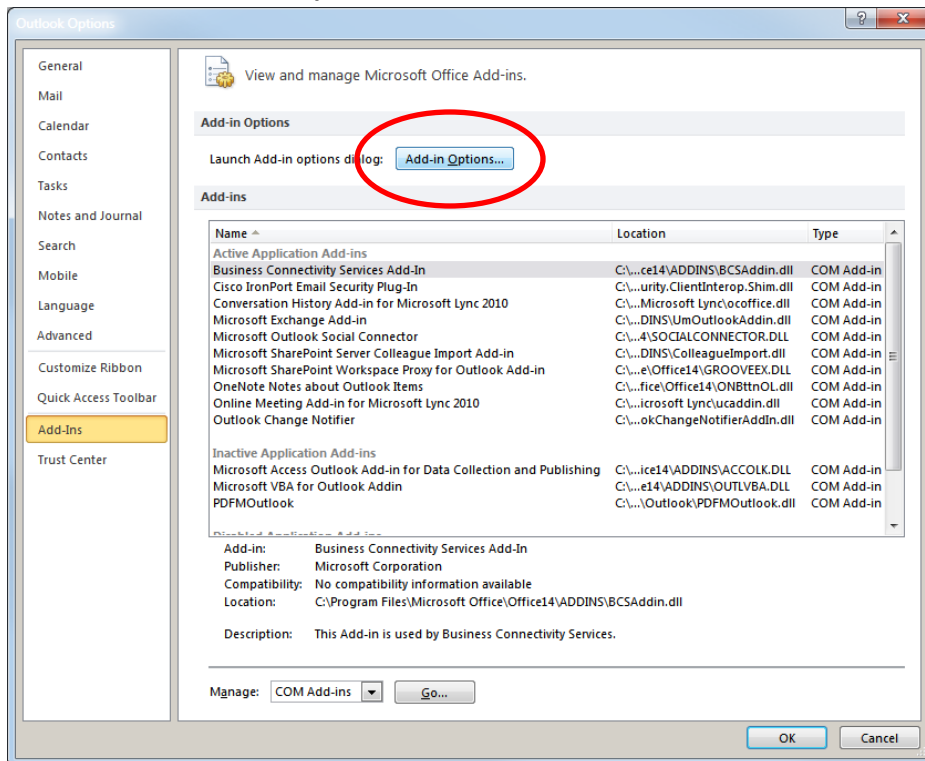

**WARNING: Selecting “Desktop Encryption” will require uninstall/reinstall!**

11. Click **Install**.

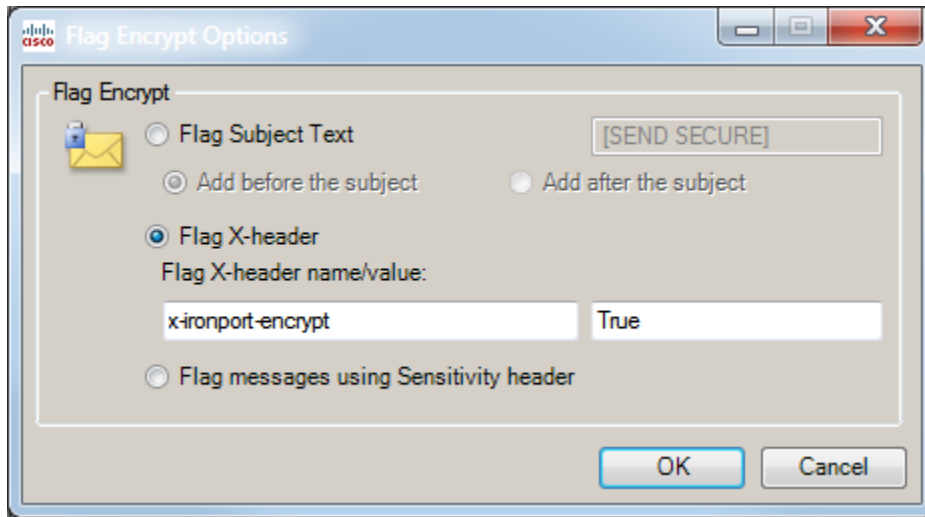

12. Click **Finish**.

13. Open Outlook, go to **File > Options (Outlook 2010)**, or go to **Tools > Options > Cisco Email Security (Outlook 2007)**.

14. Select **Add-ins > Add-in Options...**

15. Click **Flag Encrypt Options** and select **Flag X-header**.

16. Click **OK** twice.
