Introduction to R Statistical Software

Research Method Workshop Series Fall 2018

Instructor: Dr. Akihito Kamata

Annette Caldwell Simmons Hall, Room 213

R Workshop Series

Want to learn a free statistical software that is becoming increasingly popular and useful? R runs on both Windows and MacOS, and it performs a wide range of statistical analyses and data visualizations. This series of workshops will provide introductions to R and RStudio. Participants will learn how to read data files and perform basic data manipulations, statistical analyses, and graphing. The workshop will also demonstrate how RStudio can generate Word, PDF, and HTML files that integrate data analyses and documentations on the analyses. Participants are strongly encouraged to bring their own laptops with R and RStudio already installed.

Please RSVP to Pamela Bailey at CORE@smu.edu.

Dates	Time	Workshop Title
October 5, 12, and 26	10:30-11:30 a.m.	R Workshop
