# Catalog Policy and Legal Statement

## Bulletin of Southern Methodist University 2019-2020

### Vol. CIII

Southern Methodist University publishes a complete bulletin every year. The following catalogs constitute the General Bulletin of the University:

- Undergraduate Catalog\*
  - Cox School of Business
  - Dedman College of Humanities and Sciences
  - Lyle School of Engineering
  - Meadows School of the Arts
  - Simmons School of Education and Human Development
- Graduate Catalog\*
  - Cox School of Business
  - Dedman College of Humanities and Sciences
  - Dedman School of Law
  - Lyle School of Engineering
  - Meadows School of the Arts
  - Perkins School of Theology
  - Simmons School of Education and Human Development
  - SMU Guildhall

In addition, certain locations or programs provide their own schedules and information, including:

- Professional and Online Studies
- SMU Abroad
- SMU-in-Taos

Every effort has been made to include in this catalog information that, at the time of preparation for publishing, most accurately represents Southern Methodist University. The University reserves the right to change, at any time and without prior notice, any provision or requirement, including, but not limited to, policies, procedures, charges, financial aid programs, refund policies and academic programs.

\*Catalog addenda are published online. An addendum includes graduation, degree, and transfer requirements that do not appear in the online catalog but apply in that academic year. Addenda, if applicable, are found on the left-hand navigation bar.

Information also is available at [www.smu.edu](http://www.smu.edu).

## Notice of Nondiscrimination

Southern Methodist University (SMU) will not discriminate in any employment practice, education program, education activity, or admissions on the basis of race, color, religion, national origin, sex, age, disability, genetic information, or veteran status. SMU's commitment to equal opportunity includes nondiscrimination on the basis of sexual orientation and gender identity and expression. The Executive Director for Access and Equity/Title IX\* Coordinator is designated to handle inquiries regarding the nondiscrimination policies, including the prohibition of sex discrimination under Title IX. The Executive Director/Title IX Coordinator may be reached at the Perkins Administration Building, Room 204, 6425 Boaz Lane, Dallas, TX 75205, 214-768-3601, [accessequity@smu.edu](mailto:accessequity@smu.edu). Inquiries regarding the application of Title IX may also be directed to the Assistant Secretary for Civil Rights of the U.S. Department of Education.

\* Title IX of the Education Amendments of 1972, 20 U.S.C. §§ 1681-1688.

# About SMU

## The Vision of Southern Methodist University

To create and impart knowledge that will shape citizens who contribute to their communities and lead their professions in a global society.

## The Mission of Southern Methodist University

Southern Methodist University will create, expand and impart knowledge through teaching, research and service, shaping world changers who contribute to their communities and excel in their professions in a global society. Among its faculty, students and staff, the University will cultivate principled thought, develop intellectual skills and promote an environment emphasizing individual dignity and worth. SMU affirms its historical commitment to academic freedom and open inquiry, to moral and ethical values, and to its United Methodist heritage.

## Southern Methodist University

As a private, comprehensive university enriched by its United Methodist heritage and its partnership with the Dallas Metroplex, Southern Methodist University seeks to enhance the intellectual, cultural, technical, ethical and social development of a diverse student body. SMU offers undergraduate programs centered on the liberal arts; excellent graduate and continuing education programs; and abundant opportunities for access to faculty in small classes, research experience, international study, leadership development, and off-campus service and internships, with the goal of preparing students to be contributing citizens and leaders for our state, the nation and the world.

SMU comprises seven degree-granting schools: Dedman College of Humanities and Sciences, Edwin L. Cox School of Business, Dedman School of Law, Bobby B. Lyle School of Engineering, Meadows School of the Arts, Perkins School of Theology, and Annette Caldwell Simmons School of Education and Human Development.

Founded in 1911 by what is now the United Methodist Church, SMU is non-sectarian in its teaching and is committed to the values of academic freedom and open inquiry.

At its opening session in 1915, the University had two buildings, 706 students, a 35-member faculty and total assets of \$633,540.

Today, the University has more than 100 buildings, a total enrollment averaging more than 10,000 the past 10 years, a full-time faculty of 763 and assets of \$3.3 billion - including an endowment of \$1.6 billion (market value, May 31, 2018).

Offering only a handful of degree programs at its 1915 opening, the University presently awards over 100 baccalaureate degrees in more than 90 programs, with in five schools. The university also offers a variety of graduate programs in all of its seven schools.

Of the 11,649 students enrolled for the 2018 fall term, 6,479 were undergraduates and 5,170 were graduate students. The full-time equivalent enrollment was 6,360 for undergraduates and 3,786 for graduate students.

Nearly all the students in SMU's first class came from Dallas County, but now more than 50 percent of the University's undergraduate student body comes from outside Texas. In a typical school year, students come to SMU from every state; from more than 100 foreign countries; and from all races, religions and economic levels.

Undergraduate enrollment is 49 percent female. Graduate and professional enrollment is 47 percent female.

A majority of SMU undergraduates receive some form of financial aid. In 2018-2019, 81 percent of first-year students received some form of financial aid, and 22 percent of first-year students received need-based financial aid.

Management of the University is vested in a board of trustees of civic, business and religious leaders - Methodist and non-Methodist. The founders' first charge to SMU was that it become not necessarily a great *Methodist* university, but a great *university*.

## Academic Accreditation

Southern Methodist University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelor's, master's, professional and doctoral degrees. Students should contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Southern Methodist University. Note: The commission is to be contacted only if there is evidence that appears to support an institution's significant noncompliance with a requirement or standard.

Individual academic programs are accredited by appropriate national professional associations.

In Dedman College, the Department of Chemistry undergraduate program is accredited by the American Chemical Society, and the Psychology Department's Ph.D. program in clinical psychology is accredited by the American Psychological Association.

The Cox School of Business is accredited by the Association to Advance Collegiate Schools of Business.

The Dedman School of Law is accredited by the American Bar Association.

The Guildhall receives its accreditation because SMU is an accredited institutional member of the National Association of Schools of Art and Design.

The Lyle School of Engineering undergraduate programs in civil engineering, computer engineering, computer science, electrical engineering, environmental engineering and mechanical engineering are accredited by the Engineering Accreditation Commission of The Accreditation Board for Engineering and Technology.

Programs in and/or affiliated with The Meadows School of the Arts receive their accreditation because Southern Methodist University is an accredited institutional member of the National Association of Schools of Art and Design, of Music, of Dance, and of Theater. The programs recognized under this accredited institutional membership are the art and art history programs, the Dance Division, the Music Division, the music therapy program, and the theater program. (NASM/NASAD/NASD/NAST 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190-5248, Telephone: (703) 437-0700, Facsimile: (703) 437-6312, Email: [info@arts-accredit.org](mailto:info@arts-accredit.org)).

Perkins School of Theology is accredited by the Commission on Accrediting of the Association of Theological Schools in the United States and Canada to award M.Div., M.A.M., M.S.M., M.T.S., Th.M. and D.Min. degrees.

Accredited programs in the Simmons School of Education and Human Development include the teacher education undergraduate and graduate programs, which are accredited by the State Board for Educator Certification of the Texas Education Agency. The SBEC and the TEA also accredits the M.Ed. in Accelerated School Leadership and the M.Ed. Urban Leadership. The M.S. in Counseling meets the licensure standards of the Texas State Board of Examiners of Professional Counselors and the Texas State Board of Examiners of Marriage and Family Therapists and the State Board for Educator Certification (TEA) School Counselor All Levels K-12.

## Academic Calendar

### Fall Term 2019

**August 16, Friday:** Last day to withdraw from the term (drop all classes) with full refund.

### Regular Session Dates

**August 19, Monday:** Regular session begins

**October 30, Wednesday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**December 14, Saturday:** Regular session ends

### Fall Term 2019

#### Module A - Fall 2019

**August 19, Monday:** First day of class

**August 23, Friday:** Last day to enroll, add a course or drop a course without tuition billing while remaining enrolled for the term

**August 30, Friday:** Last day to drop a course without academic record (tuition charges apply). Last day to withdraw from the University without academic record (withdrawal refund schedule applies). See Bursar's website for more information.

**September 2, Monday:** University holiday - Labor Day (no classes held)

**September 17, Tuesday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**September 27, Friday:** Last day to drop module A courses with a grade of *W* (no refund)

**September 28, Saturday:** Last day of class

**September 30 - October 5, Monday - Saturday:** Final Exams

#### Module B - Fall 2019

**October 14, Monday:** First day of class

**October 18, Friday:** Last day to enroll, add a course or drop a course without tuition billing while remaining enrolled for the term

**October 25, Friday:** Last day to drop a course without academic record (tuition charges apply). Last day to withdraw from the University without academic record (withdrawal refund schedule applies). See Bursar's website for more information

**November 16, Saturday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**November 22, Friday:** Last day to withdraw from the University for the term or drop module B courses with a grade of *W* (no refund)

**November 23, Saturday:** Last day of class

**November 25-26, Monday-Tuesday:** Reading Days

**November 27-30, Wednesday - Saturday:** University holiday - Thanksgiving (no classes held)

**December 2 - 7, Monday - Saturday:** Final Exams

**December 21, Saturday:** December Commencement Convocation/Degree Conferrals  
**December 9-January 11, Monday-Saturday:** University Holiday for GCOX students

## Spring Term 2020

**January 2, Thursday:** Last day to withdraw from the term (drop all classes) with full refund

### Regular Session Dates

**January 3, Friday:** Regular session begins

**March 15, Sunday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**April 25, Saturday:** Regular session ends

### Module A - Spring 2020

**January 13, Monday:** First day of class

**January 17, Friday:** Last day to enroll, add a course or drop a course without tuition billing while remaining enrolled for the term

**January 20, Monday:** University holiday - Birthday of Martin Luther King, Jr. (no classes held)

**January 27, Monday:** Last day to drop a course without academic record (tuition charges apply). Last day to withdraw from the University without academic record (withdrawal refund schedule applies). See Bursar's website for more information.

**February 11, Tuesday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**February 21, Friday:** Last day to drop module A courses with a grade of *W* (no refund)

**February 22, Saturday:** Last day of class

**February 24 - 29, Monday - Saturday:** Final Exams

**March 2-7, Monday - Saturday:** Spring Break

### Module B - Spring 2020

**March 9, Monday:** First day of class

**March 13, Friday:** Last day to enroll, add a course or drop a course without tuition billing while remaining enrolled for the term

**March 20, Friday:** Last day to drop a course without academic record (tuition charges apply). Last day to withdraw from the University without academic record (withdrawal refund schedule applies). See Bursar's website for more information.

**April 7, Tuesday** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**April 10, Friday:** University holiday - Good Friday (no classes held)

**April 20, Saturday:** No classes held

**April 17, Friday:** Last day to withdraw from the University for the term or drop module B courses with a grade of *W* (no refund)

**April 18, Saturday:** Last day of class

**April 20 - 25, Monday - Saturday:** Final Exams

**May 16, Saturday:** May Commencement Convocation/Degree Conferral

## Summer Term 2020

**May 1, Friday:** Last day to withdraw from the term (drop all classes) with full refund

### Module A

**May 4, Monday:** First day of class

**May 6, Wednesday:** Last day to enroll, add a course or drop a course without tuition billing while remaining enrolled for the term

**May 25, Monday:** University holiday - Memorial Day (no classes held)

**June 2, Tuesday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**June 12, Friday:** Last day to drop a Module A course with a grade of *W*

**June 13, Saturday:** Last day of class

**June 15 - 20, Monday - Saturday:** Final Exams

### Module B

**June 22, Monday:** First day of class

**June 24, Wednesday:** Last day to enroll, add a course or drop a course without tuition billing while remaining enrolled for the term

**July 3, Friday:** University holiday - Independence Day (no classes held)

**July 21, Tuesday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**July 31, Friday:** Last day to drop a Module B course or withdraw from University with a grade of *W*.

**August 1, Saturday:** Last day of class

**August 3 - 8, Monday - Saturday:** Final Exams

**August 15, Saturday:** Degree Conferrals

**Note:** Absences due to observance of religious holy days are addressed by the State of Texas in 1985 legislation. Allowance is made for completion of an assignment or examination within a reasonable period of time after the absence for this reason. Notification of intended absence is the responsibility of the student and must be given in writing to the instructor of each class the student is to miss no later than the 15th day after the first day of the module. A listing of religious holidays for use in requesting excused absences is available at [www.smu.edu/registrar/academic\\_calendar.asp](http://www.smu.edu/registrar/academic_calendar.asp) or from the Office of the Chaplain. The last day for a medical withdrawal is the last day of class instruction of the term the student is requesting to withdraw from. The University does not grant retroactive medical withdrawals.

# Cox School of Business: General Information

## History

From its beginning as the Department of Commerce for Southern Methodist University, the Edwin L. Cox School of Business has been educating the country's business leaders for more than 90 years.

Named in 1978 in honor of Dallas businessman Edwin L. Cox, the Cox School has a rich heritage that began in 1920 when the SMU Board of Trustees established a Department of Commerce at the request of the Dallas business community. In 1921, the Department of Commerce was renamed the School of Commerce, and, in 1941, the Board of Trustees established the School of Commerce as a separate entity from the University. At this point, the School of Commerce became the School of Business Administration, and the new Bachelor of Business Administration degree was approved by the trustees. The graduate program at the School of Business Administration began in 1949 with the authorization of a Master of Business Administration program.

In 1965, the SMU Foundation for Business Administration was established. This group of advisers has helped guide the Cox School throughout the years, and today is known as the Executive Board. Also instrumental in supporting the Cox School are members of its two successful mentoring programs: the Associate Board for M.B.A. students and the Business Associates Program for B.B.A. students. These two boards involve more than 220 area business leaders who volunteer their time and expertise to students who want to start making business connections for the future.

Today, under the leadership of Dean Albert W. Niemi, Jr., the Cox School continues to move up in the ranks of the world's premier business schools, receiving recognition for excellence in research and teaching.

## Cox School Complex

In 1952, ground was broken for the Joseph Wylie Fincher Memorial Building for the School of Business Administration, and for years the Fincher Building housed all activities in the Cox School. In 1987, two more buildings were added to the Cox School complex - the Cary M. Maguire Building and the Trammell Crow Building. The James M. Collins Executive Education Center was added in 2005 to meet the needs of the growing Cox programs.

## Centers and Institutes

### The Business Information Center

Sandal Miller, **Director**

The Business Information Center, the Cox School's business library, is a premier facility combining the features of a university library with the immediacy of online computer resources. The business library provides access to more than 470 electronic research databases; includes individual and group study areas, more than 70 computer workstations, a presentation preparation/practice room, a multimedia studio, group study rooms and staff offices; and features the Kitt Investing and Trading Center. Special collections include the Hillcrest Foundation International Resource Library, the Edwin L. Cox Business Leadership Center Resource Collection, the Maguire Energy Institute Resource Collection, and the MBA Career Management Center Library. The mission of the business library is to provide the SMU community with personalized reference and instruction services by business librarians, support the integration of information-literacy skills into the curriculum, and enable access to authoritative business information regardless of format. It is a center for research and development for state-of-the-art information technology applications in the business education field.

### The Caruth Institute for Entrepreneurship

Simon Mak, **Director**

The Caruth Institute at Cox was established in 1970 by W.W. Caruth, Jr., to help people learn about the excitement of building their own business, the challenges of management, the uncertainties of the marketplace and the acceptance of adversity as a learning experience. The Caruth Institute focuses on both the entrepreneurial and managerial aspects of

starting and growing a business. Programs include credit courses for undergraduate and graduate students, including the Master of Science in Entrepreneurship program as well as certificate programs for the outside business community. The institute conducts the Southwest Venture Forum, which brings together investors, entrepreneurs and the professionals who serve them, and the Dallas 100™ Awards, which honors the fastest growing privately held companies in the Dallas/Fort Worth Metroplex. In addition, the institute supports community entrepreneurship activities such as the Metroplex Growth Capital Conference. It also oversees the Cox M.B.A. Business Plan competition and is responsible for the operations of the Cox M.B.A. Venture Fund.

## **The Center for Marketing Management Studies**

Raj Sethuraman, Executive **Director**

The Center for Marketing Management Studies serves as a focal point for interaction among faculty, practitioners and students who share a common interest in applied marketing management research and education. The center sponsors research and educational programs in marketing management. Since 1989, the center has sponsored the noncredit Marketing Certificate Program, designed to provide current and aspiring business professionals with the latest in marketing thought and practice. The program is held at the Dallas campus and at the SMU-In-Plano campus, one night each week throughout the school year.

## **The Robert and Margaret Folsom Institute for Real Estate**

Joseph D. Cahoon, **Director**

The Robert and Margaret Folsom Institute for Real Estate was established at the SMU Cox School of Business in 1984. The institute is engaged in a number of initiatives to support applied research and real estate academic programs at the B.B.A. and M.B.A. levels. The institute also serves as a conduit between the commercial real estate industry and SMU students to support and foster industry knowledge, training, internships, networking and community outreach.

## **The EnCap Investments & LCM Group Alternative Asset Management Center**

Bill Maxwell, **Director**

The center, established in 2009 at the Cox School of Business, places Southern Methodist University at the forefront of training in the most significant growth area in the investment field today. There are more than 200 alternative investment firms in the Dallas/Fort Worth Metroplex. The Alternative Asset Management program makes Cox a top provider of trained students for these local firms and other growing firms throughout the United States and the world.

## **Executive Education Center**

Shane Goodwin, **Associate Dean, Executive Education and Graduate Programs**

The Executive Education Center is one of the pillars of the Cox commitment to the business community. The center's seminars and certificate programs develop leadership and business acumen through its world-class faculty and facilities. The customized educational experiences for groups of current and high-potential managers improve a company's organizational performance. More information is available at [www.exed.cox.smu.edu](http://www.exed.cox.smu.edu).

## **The Don Jackson Center for Financial Studies**

Bill Maxwell, **Director**

The Don Jackson Center for Financial Studies, which honors retired Cox School Professor Donald F. Jackson ('63), provides support for student-managed finance clubs, funds for student internships and research assistantships, and travel grants for student attendance at conferences and seminars. The Don Jackson Speaker Series brings leading scholars and financial experts to campus for seminars and presentations each year.

## **JCPenney Center for Retail Excellence**

Edward J. Fox, **Executive Director**

The center was created through a generous endowment from the JCPenney Company Inc. to advance the understanding of consumer shopping behavior and promote the development of leaders for the retail industry. The center facilitates professional development through speaking engagements, networking events and internship opportunities. M.B.A. students are encouraged to participate in events and to use the center for networking opportunities.

## **The Kitt Investing and Trading Center**

Bill Maxwell, **Director**

The Kitt Investing and Trading Center is a state-of-the-art instructional and research facility and designed to integrate finance curriculum, enhance innovative faculty research and teach students practical finance and investment applications. The facility contains an LED stock ticker, three video walls, 24 high-end work stations and 12 Bloomberg Professional terminals. In addition, students have access to data feeds and financial software such as Morningstar Direct, Standard and Poors' Capital IQ, S&P NetAdvantage, Thomson One Analytics and WONDA.

## **The Maguire Energy Institute**

W. Bruce Bullock, **Director**

The Maguire Energy Institute encourages the study of policy, marketing, and management issues related to oil, natural gas and electricity. The institute conducts seminars and training programs focusing on the business, economic and managerial aspects of the energy industry; hosts conferences to facilitate the exchange of ideas and information among educators, practitioners, media and government officials; and provides material for students and teachers to foster a better understanding of the role of the energy industry in the world economy.

## **The MBA Business Leadership Center**

Paula Hill Strasser, **Director**

The MBA Business Leadership Center augments the Cox School of Business graduate curriculum with strategic leadership knowledge and practical applications essential for business success in today's global market. The BLC offers diagnostic assessments, classes, seminars, roundtables, special programs and individualized executive coaching to enhance leadership development under eight themes: customer innovation, personal development, team dynamics, productive leadership, managerial leadership, communication skills, interpersonal relations and business leaders roundtables. Programs offered through the BLC are developed and taught by industry professionals who bring highly advanced expertise from leading companies such as Accenture, Grant Thornton, Dell Services, Texas Instruments, Capital Alliance and The Walt Disney Co.

## **William J. O'Neil Center for Global Markets and Freedom**

Robert Lawson, **Director**

The center was established in 2008 by William "Bill" J. O'Neil (B.B.A., '55) and his wife, Fay C. O'Neil, to study the impact of competitive market forces on freedom and prosperity in the global economy. The O'Neils created the center to offer education and training for today's forward-looking individuals and businesses that recognize the importance of globalization in changing the paradigm in which everyone is operating. More information is available at [www.oneilcenter.org](http://www.oneilcenter.org).

## **The Albert W. Niemi Center for American Capitalism**

Maribeth Kuenzi, **Director**

The Niemi Center is named in honor of Dean Albert W. Niemi who has spent 20 years at SMU as an administrator and professor with the Edwin L. Cox School of Business. Through his visionary leadership and constant focus on the needs of students and faculty, he has helped build one of the most prominent business schools in the country. The Niemi

Center's flagship program provides undergraduate and graduate students opportunities to be involved in impactful and world-changing research on campus and at the George W. Bush Institute to drive positive change in the world. The Niemi Center also provides students the context in which they will work by providing a history and analysis of American capitalism and how dynamics are changing. Courses to SMU students and the community provide the knowledge and tools to navigate and positively change today's business landscape. The Niemi Center is developing principled leaders and influencing the way the world does business, one student at a time.

## **The Brierley Institute for Consumer Engagement**

Marcia Armstrong, **Director**

To change the business world, transform the fundamental interaction between a customer and a company. The Brierley Institute will be the first academic institute in the nation devoted to the study of customer engagement. Led by the Harold M. Brierley Endowed Professor, the Institute seeks to create a rich collaborative environment – an exchange of ideas, insights and practices – bringing together students, professors and business practitioners to advance knowledge and improve business practice, driven to understand how and why customers engage with brands and how engagement drives customer loyalty and value.

The Institute will create innovative learning experiences for SMU Cox MBA students that lead to successful careers in marketing, business analytics and consulting. These students will learn to promote business practices that build customer relationships, leverage digital and traditional media, measure financial impact, and create customer experiences, which engage customers and create loyalty and value. MBA scholarships and student research grants will be awarded.

To advance knowledge and improve business practice, the Institute will feature an annual invitation-only conference focused on bringing scholars from top academic institutions and practitioners from well-known corporations together to develop faculty research agendas, influence curricula and solve current business challenges. In addition, the Institute will offer faculty research grants.

## **National Center for Arts Research**

SMU's National Center for Arts Research, the first of its kind in the nation, acts as a catalyst for the transformation and sustainability of the national arts and cultural community. The center will analyze the largest database of arts research ever assembled and make its findings available free of charge to arts leaders, funders, policy-makers, researchers, students and the general public.

NCAR's mission is to be the leading provider of evidence-based insights that enable arts and cultural leaders to overcome challenges and increase impact. The scope of this work requires the collaboration of multiple national organizations such as the Cultural Data Project, the National Center for Charitable Statistics, the National Endowment for the Arts, the Theatre Communications Group, TRG Arts, IBM, the Nonprofit Finance Fund and the Boston Consulting Group. Additional information is available at [www.smu.edu/artsresearch](http://www.smu.edu/artsresearch).

## **Southwestern Graduate School of Banking Foundation**

S. Scott MacDonald, **President and CEO**

The SW Graduate School of Banking offers a carefully crafted and executed approach to graduate banking education that melds personal growth and professional wisdom by emphasizing intellectual as well as leadership development. The program, which is divided into three integrated two-week resident sessions, is guided by some of the industry's top management consultants and educators. More information is available at [www.swgsb.org](http://www.swgsb.org).

# Cox School of Business: Academic Programs

## International Programs

Understanding major political and economic trends outside the United States is critical to success in today's business environment. Through the Office of Global Operations, Cox provides P.M.B.A. students with the chance to study and experience these trends firsthand by attending a course and earning two credit hours over a 10-day program.

Students may participate in international programs after completing all required core courses. To apply for the international programs, students must be in good academic standing with a 3.200 or better cumulative GPA. Participants are selected on a first-come, first-served basis, with graduation date and cumulative GPA holding precedence. Courses taken by participation in an international program will count toward the degree and fulfill the P.M.B.A. international requirement but will not count toward the GPA calculation or concentration requirements. For assistance in reviewing academic plans, students should meet with the associate director for the P.M.B.A. program early in the planning process.

Students enrolled in an international P.M.B.A. course taught at a partner school cannot be concurrently enrolled in a course at Cox.

For students participating in an international program, tuition is paid to SMU, while registration fees are paid to the partner school. In addition, travel plans and other miscellaneous costs are the students' responsibility. Financial aid will be handled as though the student is studying at Cox.

The M.B.A. Global Operations Office reserves the right to decline anyone whose behavior at Cox indicates that he or she might jeopardize Cox's exchange relationship and thus prevent future Cox P.M.B.A. students from going on exchange to a particular school.

Cox's P.M.B.A. international agreements limit the number of participants; therefore, spaces are limited. Students should visit the website for more information ([www.cox.smu.edu/web/global-programs/professional-mba](http://www.cox.smu.edu/web/global-programs/professional-mba)).

## Master of Business Administration Concentrations and Minors

Every M.B.A. student begins the program with a general business concentration. In each fall and spring term, students have a designated time when the concentration and minor selections can be changed. M.B.A. students complete one concentration with the option of completing one or more minors to meet their academic goals. Concentrations and minors will print on the student's transcript record but specializations do not. Only the degree, M.B.A., appears on diplomas. A directed study course does not count toward a concentration or minor requirement. **Note:** While the Cox School encourages all students to select the concentration and minor of their choosing, it cannot ensure that all classes will be available in every term to meet the requirements.

# Accounting

**Professor Hemang Desai, Department Chair**

**Professors:** Hemang Desai, Joseph Magliolo, Stanimir Markov, Wayne Shaw

**Associate Professors:** Nilabhra Bhattacharya, J. Douglas Hanna

**Assistant Professors:** Gauri Bhat, Ruihao Ke, Sorabh Tomar, Dimitris Vrettos, Kara Elyse Wells

**Professors of Practice:** Barry Bryan, Gregory Sommers, Wendy M. Wilson

**Clinical Professor:** Susan Riffe

To find additional programs related to the Accounting department, refer to the Majors and Minors section on page 57.

## Accounting, M.S.A.

### Overview

The curriculum of the M.S.A. program is designed to provide students with an in-depth examination of critical accounting, tax and financial issues. Students will take a total of 32 to 40 credit hours depending on their prior academic background. Of the 32 minimum required hours, 22 must be in accounting courses. The fall and spring 16-week terms are divided into two eight-week modules, A and B, with each module course being two credit hours. To provide students with a broad variety of elective courses, classes are scheduled in the morning, afternoon and evening, Monday through Thursday, as well as Saturday morning.

M.S.A. program applicants must have completed six hours of introductory accounting courses. In addition, if not previously completed, four hours of intermediate accounting, and two hours of tax accounting prior to enrollment. Other configurations will be examined on an individual basis in consultation with the program director.

The Cox School of Business seeks candidates who show a strong potential for success in today's global business environment. Candidates who demonstrate analytical capabilities, leadership experience, interpersonal and communication skills, and personal commitment and motivation are invited to apply. The Admissions Committee seeks candidates who demonstrate outstanding academic achievement and potential, leadership qualities, and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: GMAT management/business graduate school admission test scores, previous academic records, recommendations that speak to a candidate's professional performance and self-evaluation essays. For complete details and an application packet, students should visit [www.coxmsa.com](http://www.coxmsa.com) or contact the Cox Admissions Office: telephone 214-768-1214 or 1-800-472-3622; fax 214-768-3956; [msainfo@cox.smu.edu](mailto:msainfo@cox.smu.edu).

## Curriculum

**M.S.A. Class 2019: Entry Fall 2018, Graduate Spring 2019**

**Total Credit Hours: 32 to 40**

### Summer Term

#### Module A

- ACCT 6282 - M.S.A. Federal Income Tax I
- ACCT 6380 - M.S.A. Intermediate Accounting I

#### Module B

- ACCT 6281 - M.S.A. Intermediate Accounting II
- ACCT 6208 - Audit Risks and Controls

**Term Total: 9 Credit Hours**

## **Term 1 – Fall**

### **Module A Courses**

- ACCT 6220 - Accounting Data Analytics
- ACCT 6248 - Advanced Corporate Taxation
- Electives: two courses (4 Credit Hours)

### **Module B Courses**

- ACCT 6214 - Mergers and Acquisitions
- ACCT 6226 - Accounting Information Systems
- Electives: two courses (4 Credit Hours)

### **Term Total: 16 Credit Hours**

## **Term 2 – Spring**

### **Module A Courses**

- ACCT 6215 - Advanced Topics in Accounting
- ACCT 6244 - Audit Research
- Electives: two courses (4 Credit Hours)

### **Module B Courses**

- ACCT 6242 - Accounting for Income Taxes
- ACCT 6246 - Noncorporate Entity Accounting
- Electives: two courses (4 Credit Hours)

### **Term Total: 16 Credit Hours**

## **Credit Hours Summary for M.S.A. Program**

0-9 credit hours of preparatory courses

16 credit hours of required accounting courses

16 credit hours of elective courses

**32-41 credit hours total for Cox M.S.A. degree**

## **Concentration Requirements**

Students are required to choose and declare one of the two concentrations listed below.

### **Assurance and Advisory Concentration**

Students take these three courses as part of their elective course selections.

- ACCT 6210 - Financial Reporting and Analysis I
- ACCT 6212 - Financial Reporting and Analysis II
- ACCT 6221 - Accounting Issues in Financial Due Diligence

### **Tax Concentration**

Students take these three courses as part of their elective course selections.

- ACCT 6239 - Tax Research
- ACCT 6240 - Advanced Partnership Taxation
- ACCT 6241 - Seminar in International Taxation

## Additional Course Requirement

In addition to taking the required accounting courses and courses for their chosen concentration, all students must meet the degree requirement of taking one course in valuation. The course options for satisfying the valuations requirement are as follows:

- ACCT 6213 - Accounting-Based Valuation
- FINA 6211 - Valuation and Analysis (*note course has prerequisite of FINA 6205 - Finance Theory and Practice*)

## Ethics Requirement

The Certified Public Accountant Exam ethics requirement for the state of Texas, if not met with undergraduate coursework, can be met by taking the following course:

- BL 6325 - Ethics and Related Legal Issues for Accountants

## CPA Requirements

As requirements for being certified as a CPA vary by state, it is the student's responsibility to ensure that the requirements are met.

## Planning Assistance

For planning assistance regarding the elective course options, students should visit the M.S.A. website [www.coxmsa.com](http://www.coxmsa.com) or contact the director of the M.S.A. program at [msainfo@cox.smu.edu](mailto:msainfo@cox.smu.edu).

# Finance

**Professor** James S. Linck, **Department Chair**

**Professors:** James S. Linck, William F. Maxwell, Darius P. Miller, Kumar Venkataraman, Michel R. Vetsuypens

**Associate Professors:** Amar Gande, Stacey Jacobson, Chotibhak Jotikasthira

**Assistant Professors:** Nickolay Gantchev, Stacey Elizabeth Jacobsen, Mattia Landoni, Mehrdad Samadi

**Professors of Practice:** Donald Shelly

**Clinical Professor:** Michael L. Davis, Mukunathan Santhanakrishnan, Art Selender, Nathan G. Walcott

To find additional programs related to the Finance department, refer to the Majors and Minors section on page 57.

## Finance, M.S.F.

The curriculum of the M.S.F. program is designed to transform students' understanding of business and the global economy, equipping them with the skills and relationships needed to succeed in the financial services marketplace. Students will take a total of 32 credit hours, of which 22 credit hours are finance courses in this one-year, predominantly lock-step program. Each 14-week term is divided into two seven-week modules, A and B, with each module course being two credit hours. To meet student needs, classes are scheduled in the morning, afternoon and evening, Monday through Thursday, as well as Saturday morning. Each class meets for approximately three and a half hours once a week. Students go through the program as a cohort group.

The Cox School of Business seeks candidates with either nonbusiness or business undergraduate degrees who wish to acquire graduate-level skills in order to enhance career prospects in the field of finance. Candidates who demonstrate analytical capabilities, leadership experience, interpersonal and communication skills, and personal commitment and motivation are invited to apply. The Admissions Committee seeks candidates who demonstrate outstanding academic achievement and potential, leadership qualities, and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: GMAT or GRE graduate school admission/entry test scores, previous academic records, recommendations that speak to a candidate's professional performance and self-evaluation essays. For complete details and an application packet, students should visit [www.coxmsf.com](http://www.coxmsf.com) or contact the Cox Admissions Office: telephone 214-768-1214 or 1-800-472-3622; fax 214-768-3956; [msfinance@mail.smu.edu](mailto:msfinance@mail.smu.edu).

## Curriculum

**M.S.F. Class 2020: Entry Fall 2019, Graduate Spring 2020**

**Total Credit Hours: 32**

### Term 1 – Fall

#### Module A Courses

- FINA 6205 - Finance Theory and Practice
- FINA 6216 - Portfolio Theory and Asset Pricing
- MAST 6201 - Managerial Statistics
- MNGT 6004 - Managing a Career

Plus one of the following\*:

- ACCT 6201 - Financial Accounting I
- ACCT 6210 - Financial Reporting and Analysis I
- ACCT 6248 - Advanced Corporate Taxation

#### Module B Courses

- FINA 6211 - Valuation and Analysis
- FINA 6219 - Derivatives

- FINA 6238 - Financial Modeling

Plus one of the following\*:

- ACCT 6202 - Financial Accounting II
- ACCT 6212 - Financial Reporting and Analysis II
- ACCT 6226 - Accounting Information Systems

**Term Total: 16 Credit Hours**

## **Term 2 – Spring**

### **Module A Courses**

- FINA 6218 - Fixed Income Securities
- FINA 6226 - Quantitative Trading Strategies

Plus one or both of the following:

- FINA 6228 - Energy Project Valuation and Finance
- FINA 6430 - Asset and Wealth Management

### **Module B Courses**

- FINA 6212 - Corporate Financial Policies
- FINA 6214 - International Financial Markets
- FINA 6222 - Financial Markets and Monetary Policy

Plus one of the following\*:

- ACCT 6211 - Financial Statement Analysis
- ACCT 6212 - Financial Reporting and Analysis II
- ACCT 6246 - Noncorporate Entity Accounting
- BUSE 6208 - Special Topics in Energy Economics
- FINA 6430 - Asset and Wealth Management (Full semester; by application)

**Term Total: 16 Credit Hours**

## **Credit Hours Summary for M.S.F. Program**

4 credit hours of required accounting courses

2 credit hours of required business administration courses

22 credit hours of required finance courses

4 credit hours of electives

**32 credit hours total for Cox M.S.F. degree**

\*Consult with director of M.S.F. Program for appropriate electives. Those without any undergraduate accounting should take ACCT 6201 and ACCT 6202, and most others with some undergraduate accounting will take ACCT 6210 and ACCT 6211, among other choices.

# General Business

## Executive Master of Business Administration, M.B.A.

### Overview

The E.M.B.A. program is designed for business professionals with a minimum of eight years of work experience and is designed to allow successful practicing managers to enrich and enhance their organizational effectiveness through theoretical founding in core business functions. Developed especially for upwardly mobile managers, the E.M.B.A. program capitalizes on existing career and life experience. The program adds career value by exposing students to cross-functional business knowledge, improved professional networks and heightened confidence that comes with a life-changing experience.

E.M.B.A. classes are scheduled all day Friday and Saturday every other week, 8–11:45 a.m. and 1:15–5 p.m. Fridays, and 8–11:45 a.m. and 12:45–4:30 p.m. Saturdays. The E.M.B.A. program takes 21 months to complete. Students must participate in one required international trip in the fourth term. Participants go through the program as an integrated group, benefiting from close working relationships and enriched by the diversity of backgrounds and experiences.

Admission procedures to the E.M.B.A. program differ from those of the full-time M.B.A. and P.M.B.A. programs. For a brochure that outlines application procedures, potential candidates should call the E.M.B.A. Admissions Office at 214-768-3154 or visit [www.coxemba.com](http://www.coxemba.com).

### Curriculum

**E.M.B.A. Class 2020: Entry Fall 2018, Graduate Spring 2020**

**Total Credit Hours: 48**

#### Term 1 – Fall

- BA 6322 - Financial Accounting
- BA 6325 - Organizational Behavior
- BA 6326 - Statistics

**Term Total: 9 Credit Hours**

#### Term 2 – Spring

- BA 6050 - Decision Modeling
- BA 6079 - Microeconomics
- BA 6323 - Business Finance
- BA 6324 - Fundamentals of Marketing

**Term Total: 9 Credit Hours**

#### Term 3 – Summer

- BA 6015 - Executive Leadership
- BA 6030 - Operations Management
- BA 6039 - Macroeconomics
- BA 6077 - Legal Environment of Business
- BA 6375 - Applied Corporate Finance

**Term Total: 9 Credit Hours**

#### Term 4 – Fall

- BA 6040 - Strategic Cost Analysis

- BA 6073 - Negotiations (or PMBA Elective)
- BA 6310 - Global Business Environments
- BA 6352 - Marketing Strategy
- Electives: Two Courses (3.0 Credit Hours)

**Term Total: 12 Credit Hours**

**Term 5 – Spring**

- BA 6005 - Strategic Management of Human Capital
- BA 6074 - Mergers and Acquisitions
- BA 6331 - Strategic Management
- BA 6336 - Entrepreneurship

**Term Total: 9 Credit Hours**

**Credit Hours Summary for E.M.B.A. Program**

40.5 credit hours of required courses

7.5 credit hours for elective course

**48 credit hours total for Cox M.B.A. degree**

**Business Administration Courses (BA)**

The E.M.B.A. curriculum has been designed to integrate both management theory and practical skills application in a series of synchronized courses during the 21-month period. The first-year coursework is focused on the acquisition of knowledge, skills and usable expertise in a number of business disciplines. The second-year coursework covers the broader, policy-level aspects of finance, organizational behavior and marketing. Elective courses vary from year to year. The E.M.B.A. program and the M.B.A. Registrar develop a list of electives from which the students select.

**Policies and Procedures**

*Note: For policies not specifically listed below, the E.M.B.A. program abides by the policies listed in this catalog for graduate programs.*

**Academic Performance Standards.** The academic performance of all E.M.B.A. students is reviewed at the end of each term. To be considered in good academic standing, a student must maintain a cumulative GPA of 3.000 or better. A student with a cumulative GPA below 3.000 (without rounding) upon completion of 48 hours may take up to eight additional credit hours in order to raise his or her GPA to the required level. The eight additional hours will include any courses that are repeated because of poor performance (below a grade of C-). The student will be responsible for paying additional tuition to take these additional eight hours. No student will be permitted to earn more than a total of 56 credit hours toward the completion of the E.M.B.A. program for GPA purposes. A student on academic probation is not permitted to enroll in a directed study course.

Students who fail to maintain a cumulative GPA of 3.000 will be placed on academic probation. The following criteria outline when students will be dismissed from the Cox School of Business.

*E.M.B.A. students will be dismissed if they achieve*

- Less than a cumulative 2.000 GPA at the end of 9 GPA hours or the first term.
- Less than a cumulative 2.250 GPA at the end of 18 GPA hours or the second term.
- Less than a cumulative 2.500 GPA at the end of 27 GPA hours or the third term.
- Less than a cumulative 2.750 GPA at the end of 36 GPA hours or the fourth term.
- Less than a cumulative 2.950 GPA at the end of 48 GPA hours or the fifth term.

*With an approved petition to take up to 8 additional hours beyond the 48 GPA hours required for the degree, E.M.B.A. students will be dismissed if they achieve*

- Less than a cumulative 2.950 GPA at the end of 48 GPA hours or the fifth term.
- Less than a cumulative 2.970 GPA at the end of 50 GPA hours (+ 2 hours).
- Less than a cumulative 2.980 GPA at the end of 52 GPA hours (+ 4 hours).
- Less than a cumulative 2.990 GPA at the end of 54 GPA hours (+ 6 hours).
- Less than a cumulative 3.000 GPA at the end of 56 GPA hours (+ 8 hours).

*E.M.B.A. students MUST have a cumulative GPA of 3.000 at the end of 56 GPA hours.*

**Enrollment.** Each fall, spring and summer term has an enrollment period during which the formal process of enrollment in the University is completed. Prior to each enrollment period, the Executive M.B.A. Office will publish enrollment instructions. Each student is personally responsible for complying with enrollment procedures and for ensuring the accuracy of his or her enrollment.

**Audit Enrollment.** Students may not audit courses in the E.M.B.A. program, as enrollment is limited to students who have been granted admission to this program.

**Course Waiver Policy.** While the Cox School is not obligated to grant any waiver credit, in certain cases, up to nine credit hours for E.M.B.A. students may be waived, at entrance only, thereby eliminating the need to take a specific required course. This does not reduce the total number of credit hours required for the degree; it allows only for another course(s) to be substituted for the required course(s) as determined in the waiver process. Requests for waived credit are reviewed and processed only after the student's enrollment deposit is received in the Admissions Office. For complete details and a Course Waiver Petition Request form, students should contact the Executive M.B.A. Office.

**Transfer of Graduate Credit.** Although the Cox School of Business is not obligated to accept any transfer credit, in certain cases coursework may be transferred, at entrance only, thereby reducing the number of credit hours required to be taken at Cox for the degree. Transferable hours, up to nine credit hours for E.M.B.A. students, will be considered only if the following criteria are met: 1) the graduate course was taken at an institution accredited by AACSB, 2) the student earned a grade better than B-, 3) the course was completed within the three years prior to matriculation at Cox and 4) the course was not credited toward a previous degree. Requests for transfer credit are reviewed and processed only after the student's enrollment deposit is received in the Admissions Office. For complete details and a Transfer Credit Petition Request form, students should contact the Executive M.B.A. Office.

## **Master of Business Administration, M.B.A. (Full-Time One-Year)**

### **Overview**

The Full-Time One-Year M.B.A. program is designed for individuals who want to advance their career rapidly. The program is a superior educational experience that provides knowledge and skills in key business disciplines so that students can become successful in their careers. The program is a rigorous 12-month program with classes offered during the day and evening hours. The core and elective courses meet once per week, Monday through Thursday, with limited offerings Saturday mornings. Students must take the required core courses as scheduled each term because of prerequisite sequencing.

Each 14-week term is divided into two seven-week modules, A and B, with each module course earning two credit hours.

The Cox School of Business seeks candidates who show a strong potential for success in today's global business environment. Candidates who demonstrate analytical capabilities, leadership experience, interpersonal and communication skills, and personal commitment and motivation are invited to apply. The Admissions Committee seeks candidates who possess outstanding academic achievement and potential, leadership qualities, and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: GMAT or GRE graduate school admission/entry test scores, previous academic records, references who can speak to the candidate's professional performance, and self-evaluation essays. For complete details and an application packet, students should visit <https://www.smu.edu/cox/Degrees-and->

Programs/One-Year-MBA or contact the Cox Admissions Office: telephone 214-768-1214 or 1-800-472-3622; fax 214-768-3956; mbainfo@cox.smu.edu.

## **Curriculum**

**Full-Time One-Year M.B.A. Class 2020: Entry Summer 2019, Graduate Spring 2020**

**Total Credit Hours: 44**

### **Term 1 – Summer Term**

#### **Module A Courses**

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis
- MNGT 6001 - Managing Your Career
- MNGT 6003 - Business Presentation Techniques

#### **Module B Courses**

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- STRA 6201 - Strategic Management

**Term Total: 12 Credit Hours**

### **Term 2 – Fall Term**

#### **Module A Courses**

- ITOM 6203 - Operations Management
- Electives: three courses (6 Credit Hours)

#### **Module B Courses**

- ACCT second required accounting course (2 Credit Hours)
- BUSE 6202 - Managerial Economics
- MNO 6201 - Organizational Behavior: Managing and Leading People
- Elective: one course (2 Credit Hours)

**Term Total: 16 Credit Hours**

#### **Notes:**

- Students select the second accounting course based on their interest and anticipated concentration: either ACCT 6202 - Financial Accounting II or ACCT 6205 - Managerial Accounting I. Students should consult the Concentrations and Minors section for specific information on which second accounting course is required for each concentration.
- MNGT 6003 - Business Presentation Techniques, a zero-credit course, is a requirement of the fast track M.B.A. program. Students earn a grade of Pass or Fail. All fast track M.B.A. students MUST complete this course.
- MNGT 6001 - Managing Your Career, a zero-credit course, is a requirement to use the extended services of the Career Management Center. Students earn a grade of Pass or Fail.

### **Term 3 – Spring Term**

#### **Module A Courses**

- Electives: four courses (8 Credit Hours)

#### **Module B Courses**

- Electives: four courses (8 Credit Hours)

## **Term Total: 16 Credit Hours**

### **Credit Hours Summary for Full-Time One-Year M.B.A. Program**

20 credit hours of required courses

24 credit hours of elective courses

**44 credit hours total for Cox M.B.A. degree**

**Note:** For the 24 credit hours of elective courses, students complete one concentration. Each concentration requires 12–16 specific credit hours. (Additional information is in the Majors and Minors section.)

## **Master of Business Administration, M.B.A. (Full-Time Two-Year)**

The Full-Time Two-Year M.B.A. program is an intensive two-year program with classes offered during the days and evenings. This program is designed for individuals who have been working and now want to focus exclusively on their graduate management education before re-entering the business world. During the first year, the emphasis of the program is on building team skills and creating a common body of knowledge. Students will leverage this knowledge to provide a solid foundation for elective courses taken during the second year.

Each 14-week term is divided into two seven-week modules, A and B, with four courses in each module earning two credit hours per course. Exceptions to the curriculum schedule must be approved in advance by the Graduate Student Services Office. Having courses offered in the module format allows students to take more courses with the goal of gaining depth of knowledge in specific areas. As a result, students can develop expertise in an academic concentration. To provide students with a greater variety of elective courses, elective classes are scheduled in the morning, afternoon and evening.

The Edwin L. Cox School of Business seeks candidates who show a strong potential for success in today's global business environment. Candidates who demonstrate analytical capabilities, leadership experience, interpersonal and communication skills, and personal commitment and motivation are invited to apply. The Admissions Committee seeks candidates who possess outstanding academic achievement and potential, leadership qualities, and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: test scores (GMAT management/ business graduate school admission test required for all applicants; TOEFL or PTE English language proficiency test also required for international applicants), previous academic records, references who can speak to the candidate's professional performance and self-evaluation essays. Personal interviews are conducted at the request of the Admissions Committee after a complete application package have been received. Merit-based scholarships are available on a competitive basis. The applications for study in the M.B.A. program are accepted only for fall admission. Complete details and an application packet are available from [www.coxmba.com](http://www.coxmba.com) or the Cox Admissions Office: [mbainfo@cox.smu.edu](mailto:mbainfo@cox.smu.edu); phone 214-768-1214 or 1-800-472-3622; fax 214-768-3956.

## **Curriculum**

**Full-Time Two-Year M.B.A. Class 2021: Entry Fall 2019, Graduate Spring 2021**

**Total Credit Hours: 67**

### **Year 1 – Fall Term**

#### **Module A Courses**

- ACCT 6201 - Financial Accounting I
- BUSE 6202 - Managerial Economics
- FINA 6201 - Managerial Finance
- MAST 6474 - Introduction to Data Analysis I
- MNGT 6101 - Managing Your Career

### **Module B Courses**

- ACCT second required accounting course (2 Credit Hours)
- ITOM 6202 - Management Decision Analysis
- MKTG 6201 - Marketing Management
- MNGT 6103 - Business Presentation Techniques
- Elective: one course (2 Credit Hours)

### **Term Total: 20 Credit Hours**

**Note:** Students select the second accounting course based on their interest and anticipated concentration: either ACCT 6202 - Financial Accounting II or ACCT 6205 - Managerial Accounting I. Students should consult the Concentrations and Minors section for specific information on which second accounting course is required for each concentration.

## **Year 1 – Spring Term**

### **Module A Courses**

- ITOM 6203 - Operations Management
- MNO 6201 - Organizational Behavior: Managing and Leading People
- MNGT 6011 - Managing Your Career, Part Two
- Electives: two courses (4 Credit Hours)

### **Module B Courses**

- BUSE 6203 - Macroeconomics  
or
- FINA 6222 - Financial Markets and Monetary Policy
  
- MNGT 6020 - First-Year Foundations
- MNGT 6210 - Global Leadership Program
- STRA 6201 - Strategic Management
- Electives: two courses (4 Credit Hours)

### **Term Total: 18 Credit Hours**

#### **Note:**

- Students concentrating in Finance should enroll in FINA 6222 - Financial Markets and Monetary Policy instead of BUSE 6203 - Macroeconomics.
- MNGT 6020 - First-Year Foundations is a requirement of the full-time M.B.A. program. The successful completion of this degree requirement earns a grade of P (pass). Students participate in various required activities to enhance professional development. These sessions will take place most Fridays during the first year of the M.B.A. program.

## **Year 1 – Summer Term: Internships are required**

- MNGT 6150 - Graduate Corporate Internship Program

### **Term Total: 1 Credit Hours**

## **Year 2 – Fall Term**

### **Modules A and B Courses**

Electives: seven courses

### **Term Total: 14 Credit Hours**

## **Year 2 – Spring Term**

### **Modules A and B Courses**

Electives: seven courses

### **Term Total: 14 Credit Hours**

### **Credit Hours Summary for Full-time M.B.A. Program**

29 credit hours of required courses

38 credit hours of elective courses

### **67 credit hours total for Cox M.B.A. degree**

**Note:** For the 38 credit hours of elective courses, students complete one concentration. Each concentration requires 12–16 specific credit hours. (Additional information is in the Majors and Minors section.)

## **International Exchange Program**

Understanding major political and economic trends outside the United States is critical to success in today's business environment. Through the International Exchange Program, the Cox School provides full-time M.B.A. students with the chance to study and experience these trends firsthand by attending an exchange partner program during the fall or spring term of the second year. J.D./M.B.A. students and M.A./M.B.A. students are permitted to participate in the International Exchange Program for full-time M.B.A. students, although these students may find it difficult to complete their degree and/or concentration requirements within the appropriate term. Joint-degree students are encouraged to contact the Graduate Student Services Office or the associate director of M.B.A. Global Programs to further discuss their situation.

To apply for the International Exchange Program, students must be in good academic standing with a minimum cumulative GPA of 3.200. In general, the courses taken on exchange earn a grade of pass (or fail) and count toward the degree but not toward the GPA calculation or concentration requirements. Exceptions to this policy are addressed on an individual basis. For assistance in reviewing academic plans, students should meet with the associate director for full-time programs early in the planning process.

Registration is held in April for the fall program and in October for the spring program. For students participating in the International Exchange Program, tuition is paid to SMU. Living expenses, course materials and other miscellaneous costs are the students' responsibility while living abroad. In addition, financial aid will be handled as though the student is studying at Cox.

The M.B.A. Office of Global Operations reserves the right to decline anyone whose behavior at Cox indicates he or she might jeopardize Cox's exchange relationship and thus prevent future Cox M.B.A. students from going on exchange to a particular school.

Cox's International Exchange Program agreements allow one to two students per location; therefore, these spots must be assigned on a competitive basis. Information is available at [www.cox.smu.edu/web/global-programs/mba-exchange-program](http://www.cox.smu.edu/web/global-programs/mba-exchange-program).

## **Business Administration Exchange**

Students in the full-time M.B.A. and P.M.B.A. programs participating in international programs at exchange partner schools will be enrolled in the appropriate BAEX courses to match the program and/or the number of credit hours being earned at the partner school. In general, the courses taken on exchange earn a grade of Pass (or Fail) and count toward the degree but not toward the GPA calculation or concentration requirements. Exceptions to this policy are addressed on an individual basis.

## **Master of Business Administration, M.B.A. (Online)**

The Online MBA, is a cohort-based, face-to-face program ideal for individuals who want to build or transition their career in the fields of Marketing, Entrepreneurship, Finance or Information Technology, among other business disciplines. The SMU Cox Online MBA will focus on three pillars of excellence: Leadership, Analytics, & Experiential Learning.

The curriculum format is 100% online, with a strong emphasis on experiential learning. The learning environment is interactive and students will get an in-person MBA, face-to-face with faculty and classmates, simply administered in a virtual classroom.

Classes are orchestrated with both synchronous and asynchronous components. Whether completing independent deliverables, or participating in live breakout sessions, students in the SMU Cox Online MBA will benefit from the best of both – the flexibility they need, without sacrificing the high level of in-person engagement they want. Designed to accommodate the needs of a working professional, the synchronous portions of class will meet for about 90 minutes each week, in the evenings.

Candidates who demonstrate analytical capabilities, leadership experience, interpersonal and communication skills and personal commitment and motivation are invited to apply. The Admissions Committee seeks candidates who possess outstanding academic achievement and potential, leadership qualities and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: test scores (GMAT management/ business graduate school admission test required for all applicants; TOEFL or PTE English language proficiency test also required for international applicants), previous academic records, references who can speak to the candidate's professional performance and self-evaluation essays. Personal interviews are conducted at the request of the Admissions Committee after a complete application package have been received. Complete details and an application packet are available from [www.coxmba.com](http://www.coxmba.com) or the Cox Admissions Office: [mbainfo@cox.smu.edu](mailto:mbainfo@cox.smu.edu); phone 214-768-1214 or 1-800-472-3622; fax 214-768-3956.

## Curriculum

Online M.B.A. Class 1: Entry Summer 2019, Graduate Summer 2021

Online M.B.A. Class 2: Entry Fall 2019, Graduate Fall 2021

Online M.B.A. Class 3: Entry Spring 2020, Graduate Spring 2022

**Total Credit Hours: 52**

## Credit Hours Summary for Online M.B.A. Program

2 credit hour courses meet for 7-weeks.

3 and 4 credit hour courses meet for 14-weeks.

Students are required to participate in two (2) immersions. Each immersion is 2 credit hours each.

**52 credit hours total for Cox M.B.A. degree**

## Professional Master of Business Administration, M.B.A. Overview

The P.M.B.A. program is designed for those individuals who want to enhance their current career progression without leaving the workforce. The program is six consecutive terms during 24 months, with evening and Saturday morning classes. During the first three terms, required core courses help develop a strong foundation in fundamental business principles. To build on this foundation, students may choose electives to gain expertise in a specific area or choose a more broad-based selection of electives. Each 14-week term is divided into two seven-week modules, A and B, with each module course earning two credit hours.

Students must remain with their entering class and cohort section for all required core courses. Students will select from the Tuesday and Thursday evening cohort or the Thursday evening and Saturday morning cohort. The elective courses meet once a week, Monday through Thursday evenings, with limited offerings Saturday mornings. Students must take the required core courses as scheduled each term because of the prerequisite sequencing. **One elective course during the P.M.B.A. program is required to be an international business course.**

The Cox School of Business seeks candidates who show a strong potential for success in today's global business environment. Candidates who demonstrate analytical capabilities, leadership experience, interpersonal and communication skills, and personal commitment and motivation are invited to apply. The Admissions Committee seeks candidates who possess outstanding academic achievement and potential, leadership qualities, and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: GMAT or GRE graduate school admission/entry test scores, previous academic records, references who can speak to the candidate's professional performance, and self-evaluation essays. For complete details and an application packet, students should visit [www.coxpmba.com](http://www.coxpmba.com) or contact the Cox Admissions Office: telephone 214-768-1214 or 1-800-472-3622; fax 214-768-3956; [mbainfo@cox.smu.edu](mailto:mbainfo@cox.smu.edu).

## Curriculum - Fall Entry

**P.M.B.A. Class 85: Entry August 2019, Graduate August 2021**

**Total Credit Hours: 48**

### Term 1

#### Module A Courses

- ACCT 6201 - Financial Accounting I
- BUSE 6202 - Managerial Economics

#### Module B Courses

- MAST 6201 - Managerial Statistics
- MNO 6201 - Organizational Behavior: Managing and Leading People

## **Term Total: 8 Credit Hours**

### **Term 2**

#### **Module A Courses**

- ACCT 6202 - Financial Accounting II  
or

### **Module A Courses**

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- ITOM 6202 - Management Decision Analysis

### **Module B Courses**

- FINA 6201 - Managerial Finance
- MKTG 6201 - Marketing Management

**Term Total: 8 Credit Hours**

### **Notes:**

- Students select the second accounting course based on their interest and anticipated concentration: either ACCT 6202 - Financial Accounting II or ACCT 6205 - Managerial Accounting I. Students should consult the Concentrations and Minors section for specific information on which second accounting course is required for each concentration.
- MNGT 6001 - Managing Your Career, a zero-credit course, is a requirement to use the extended services of the Career Management Center. Students earn a grade of Pass or Fail.

### **Term 3**

#### **Module A Courses**

- ITOM 6203 - Operations Management
- STRA 6201 - Strategic Management
- MNGT 6003 - Business Presentation Techniques

#### **Module B Courses**

- BUSE 6203 - Macroeconomics  
or
- FINA 6222 - Financial Markets and Monetary Policy
- Elective: one course (2 credit hours)

#### **Term Total: 8 Credit Hours**

##### **Note:**

- Students concentrating in Finance should enroll in FINA 6222 - Financial Markets and Monetary Policy instead of BUSE 6203 - Macroeconomics.
- MNGT 6003 - Business Presentation Techniques, a zero-credit course, is a requirement of the P.M.B.A. program. Students earn a grade of Pass or Fail. All P.M.B.A. students MUST complete this course.

### **Term 4**

#### **Modules A and B Courses**

- MNGT 6001 - Managing Your Career
- Electives: four courses (8 credit hours)

#### **Term Total: 8 Credit Hours**

### **Term 5**

#### **Modules A and B Courses**

- Electives: four courses (8 credit hours)

#### **Term Total: 8 Credit Hours**

### **Term 6**

#### **Modules A and B Courses**

- Electives: four courses (8 credit hours)

#### **Term Total: 8 Credit Hours**

### **Credit Hours Summary for P.M.B.A. Program**

22 credit hours of required courses

26 credit hours of elective courses

**48 credit hours total for Cox M.B.A. degree**

**Note:** For the 26 credit hours of elective courses, students complete one concentration. Each concentration requires 12-16 specific credit hours. (Additional information is in the Majors and Minors section.) One elective must be an international business course.

### **International Programs**

Understanding major political and economic trends outside the United States is critical to success in today's business environment. Through the Office of Global Operations, Cox provides P.M.B.A. students with the chance to study and experience these trends firsthand by attending a course and earning two credit hours over a 10-day program.

Students may participate in international programs after completing all required core courses. To apply for the international programs, students must be in good academic standing with a 3.200 or better cumulative GPA. Participants are selected on a first-come, first-served basis, with graduation date and cumulative GPA holding precedence. Courses taken by participation in an international program will count toward the degree and fulfill the P.M.B.A. international requirement but will not count toward the GPA calculation or concentration requirements. For assistance in reviewing academic plans, students should meet with the associate director for the P.M.B.A. program early in the planning process.

Students enrolled in an international P.M.B.A. course taught at a partner school cannot be concurrently enrolled in a course at Cox.

For students participating in an international program, tuition is paid to SMU, while registration fees are paid to the partner school. In addition, travel plans and other miscellaneous costs are the students' responsibility. Financial aid will be handled as though the student is studying at Cox.

The M.B.A. Global Operations Office reserves the right to decline anyone whose behavior at Cox indicates that he or she might jeopardize Cox's exchange relationship and thus prevent future Cox P.M.B.A. students from going on exchange to a particular school.

Cox's P.M.B.A. international agreements limit the number of participants; therefore, spaces are limited. Students should visit the website for more information ([www.cox.smu.edu/web/global-programs/professional-mba](http://www.cox.smu.edu/web/global-programs/professional-mba)).

## Professional Master of Business Administration International Elective Course List

The courses listed are not offered every term. These courses satisfy the P.M.B.A. program requirement to take at least one elective course with an international business focus. Students who participate in the International Program courses need to plan accordingly as they cannot be concurrently enrolled in the same module at an international partner school program and at Cox for a campus-based course. For more information on the International Program courses, students should visit [www.cox.smu.edu/web/global-programs/professional-mba](http://www.cox.smu.edu/web/global-programs/professional-mba).

### Course Number and Catalog Course Title

- ACCT 6241 - Seminar in International Taxation

- BAEX 6259 - PMBA International Program at Central European University in Budapest, Hungary

- BAEX 6260 - PMBA International Program at Charles University in Prague, Czech Republic

## **P.M.B.A. Exchange Program**

Copenhagen Business School

## **Business Administration Exchange**

Students in the full-time M.B.A. and P.M.B.A. programs participating in international programs at exchange partner schools will be enrolled in the appropriate BAEX courses to match the program and/or the number of credit hours being earned at the partner school. In general, the courses taken on exchange earn a grade of Pass (or Fail) and count toward the degree but not toward the GPA calculation or concentration requirements. Exceptions to this policy are addressed on an individual basis.

## **Arts Management/Master of Business Administration, M.A./M.B.A.**

### **Overview**

The SMU Meadows School of the Arts, in conjunction with the Cox School of Business, offers to a limited number of highly qualified candidates America's only concurrent dual-degree graduate program in business and arts management. Through the Division of Arts Management and Arts Entrepreneurship, the M.A./M.B.A. program combines development of contemporary general-management skills with in-depth study of today's professional arts world. This program is offered on a full time basis only.

The program is five successive terms, including summer. The curricula include instruction from distinguished arts and business professors, continuing seminars with nationally recognized arts administrators, and study abroad and internship components. During the first year, students take arts management seminars and the core required business curriculum, the basis on which to build for the variety of elective courses scheduled during mornings, afternoons and evenings of the second year. During the summer between the first and second year, students intern full time with a professional arts organization. In the first term of the second year, students study abroad at Bocconi University in Milan, Italy.

Seminars and practica (part-time internships) in the arts tailored to the individual student's background, experience and career goals round out the education. The division office also assists graduates in their career objectives through guidance and assistance with their placement.

The Admissions Committee seeks candidates who demonstrate outstanding academic achievement and potential, leadership qualities, and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: test scores (GMAT management/business graduate school admission test required for all applicants; TOEFL or PTE English language proficiency test also required for international applicants), previous academic records, references who can speak to the candidate's professional performance and self-evaluation essays. (If a candidate has not earned a baccalaureate degree in an arts field, a degree in another field combined with significant academic, professional or personal experience in the arts is acceptable.) Personal interviews are conducted at the request of the Admissions Committee after a complete application has been received. Merit-based scholarships are available on a limited basis.

The applications for study in the M.A./M.B.A. program are accepted only for fall admission. Students must be accepted by both the Meadows arts management program and the Cox School of Business; however, candidates submit only the Cox M.B.A. online application and select M.A./M.B.A. as the degree choice. Students who matriculate into the M.A./M.B.A. dual program are required to complete concurrently both the M.A. and the M.B.A. requirements in order to graduate. Students cannot drop either part of the dual degree program.

Students must maintain a 3.000 GPA in each school, the Cox School of Business and the Meadows School of Arts, in order to remain in good standing. Students dropping below a 3.000 GPA in either school will be placed on probation

with that school. To earn the dual degrees, students must achieve a minimum GPA of 3.000 (without rounding) in each school.

For more information from the Meadows School of the Arts, students should visit [www.smu.edu/Meadows/AreasOfStudy/ArtsManagement](http://www.smu.edu/Meadows/AreasOfStudy/ArtsManagement) or email [arad@smu.edu](mailto:arad@smu.edu). Additional information is also available from the Cox School of Business: website [www.coxmba.com](http://www.coxmba.com); email [mbainfo@cox.smu.edu](mailto:mbainfo@cox.smu.edu).

## Arts Management and Arts Entrepreneurship Courses

**Professor** Zannie Giraud Voss, **Division Chair**

**Assistant Professors:** Susan Benton Bruning, Kathleen Gallagher

The following courses for the M.A./M.B.A. program are taught in the Meadows School of the Arts: AMAE 6051, AMAE 6053, AMAE 6054, AMAE 6201, AMAE 6202, AMAE 6205, AMAE 6215, AMAE 6221, AMAE 6222, AMAE 6223, AMAE 6224, AMAE 6225, AMAE 6304, AMAE 6321, AMAE 6325, AMAE 6331, AMAE 6332, AMAE 6333, AMAE 6334. AMAE course descriptions are available through my.SMU and in the Meadows School of the Arts graduate programs catalog. The business courses are listed in this catalog under the section Departments and Courses.

## Curriculum

**M.A./M.B.A. Class 2020: Entry Fall 2018, Graduate Spring 2020**

**Total Credit Hours: 77**

**(50 Business + 27 Arts Administration)**

### Year 1 – Fall Term

#### Module A Courses

- AMAE 6223 - Fundraising in the Arts
- ACCT 6201 - Financial Accounting I
- BUSE 6202 - Managerial Economics
- FINA 6201 - Managerial Finance
- MAST 6474 - Introduction to Data Analysis I
- MNGT 6101 - Managing Your Career

#### Module B Courses

- AMAE 6224 - Advanced Fundraising Strategy
- ACCT second required accounting course (2 Credit Hours)
- ITOM 6202 - Management Decision Analysis
- MKTG 6201 - Marketing Management
- MNGT 6103 - Business Presentation Techniques

#### Term Total: 22 Credit Hours

**Note:** Students select the second accounting course based on their interest and anticipated concentration: either ACCT 6202 or ACCT 6205. Students should consult the Concentrations and Minors section for specific information on which second accounting course is required for each concentration.

### Year 1 – Spring Term

- AMAE 6051 - Practicum (10 hours per week)

#### Module A Courses

- AMAE 6205 - Nonprofit Financial Management
- ITOM 6203 - Operations Management
- MKTG 6233 - Nonprofit Marketing Strategy

- MNGT 6011 - Managing Your Career, Part Two
- MNO 6201 - Organizational Behavior: Managing and Leading People

### **Module B Courses**

- AMAE 6222 - Audience Development and Marketing in the Arts
- BUSE 6203 - Macroeconomics  
or
- FINA 6222 - Financial Markets and Monetary Policy
- MNGT 6210 - Global Leadership Program
- MNGT 6020 - First-Year Foundations
- STRA 6201 - Strategic Management

### **Modules A and B Courses**

- Business electives: one course (2 Credit Hours)

### **Term Total: 18 Credit Hours**

#### **Note:**

- Students concentrating in Finance should enroll in FINA 6222 - Financial Markets and Monetary Policy instead of BUSE 6203 - Macroeconomics.
- MNGT 6020 - First-Year Foundations is a requirement of the M.A./M.B.A. program. The successful completion of this degree requirement earns a grade of *P* (pass). Students participate in various required activities to enhance professional development. These sessions will take place most Fridays during the first year of the M.B.A. program.

### **Year 1 – Summer Term**

- AMAE 6304 - Arts Administration Internship

### **Term Total: 3 Credit Hours**

### **Year 2 – Fall Term**

#### **International Study at Bocconi University in Milan, Italy**

- Arts management electives: four courses (12 Credit Hours)
- Business electives: two courses (4 Credit Hours)

### **Term Total: 16 Credit Hours**

### **Year 2 – Spring Term**

- AMAE 6054 - Practicum (10 hours per week)

#### **Module A Course**

- AMAE 6215 - Independent Study: In-Depth Industry Exploration  
or
- AMAE 6221 - Legal Issues in the Arts (elective option)  
or
- AMAE 6225 - Economics of Arts and Culture (elective option)

#### **Module B Course**

- AMAE 6202 - Strategic Planning in the Arts

### **Modules A and B Courses**

- Business electives: seven courses (14 Credit Hours)

## Term Total: 18 Credit Hours

### Cox Credit Hours Summary for M.A./M.B.A. Program

30 credit hours of required Cox courses

20 credit hours of elective Cox courses

**50 credit hours total for Cox toward M.A./M.B.A. degree**

**Note:** For the 20 credit hours of elective courses, students complete one concentration. Each concentration requires 12–16 specific credit hours. (Additional information is in the Concentrations and Minors section.)

### Credit Hours Summary by School

<i>Year</i>	<i>Meadows Arts</i>	<i>Cox Business</i>
1	11	32
2	16	18
<b>Total</b>	<b>27</b>	<b>50</b>

## Juris Doctor/Master of Business Administration, J.D./M.B.A. Overview

The combined full-time J.D./M.B.A. program is offered jointly by the SMU Dedman School of Law and the Cox School of Business. The program is designed for students interested in either a career in law with a strong business focus or for students interested in business careers with a strong legal focus. The combined degrees may be obtained in four academic years.

This degree plan must be pursued on a full-time basis. The Cox School of Business and the Dedman School of Law have different academic calendars; therefore, students must refer to both calendars when scheduling courses for both schools in the same term. Students enrolled in the joint-degree program must complete all requirements of both programs. Cox School of Business required core courses are taken in the second year of the dual-degree program and must be taken in the same order as listed below. The remaining 14 credit hours of elective courses are taken during the third and fourth years of the dual-degree program. To provide students with a broad variety of elective courses, the classes are scheduled in the morning, afternoon and evening.

Under the structure of the dual program for students entering the Business School in the fall of 2013, the Dedman School of Law will award 12 hours of academic credit toward the J.D. degree for satisfactory completion of the academic requirements of the M.B.A. program. Similarly, the Cox School of Business will award 12 hours of academic credit toward the M.B.A. degree for satisfactory completion of the academic requirements of the J.D. program. The tuition rate of the Dedman School of Law shall apply to the courses taken at the Cox School of Business. Candidates will need to complete the regular admissions processes for both the law program and the M.B.A. program, including submission of all applicable test scores and supporting documents. For an application and additional information from the Dedman School of Law, students should see the Admissions section at [www.law.smu.edu](http://www.law.smu.edu). For Cox School of Business admissions information, students should visit [www.coxmba.com](http://www.coxmba.com). To be admitted to the joint program, applicants are encouraged to apply to both programs before entering the Dedman School of Law but no later than during their first year of law school. Applications for study in the J.D./M.B.A. program are accepted for fall admission only.

J.D. admission questions should be addressed to the Dedman School of Law: phone 214-768-2550; fax 214-768-2549; [lawadmit@smu.edu](mailto:lawadmit@smu.edu).

M.B.A. admission questions should be addressed to the Cox full-time M.B.A. program: [mbainfo@cox.smu.edu](mailto:mbainfo@cox.smu.edu); telephone 214-768-1214 or 1-800-472-3622; fax 214-768-3956.

## Curriculum

**Full-Time J.D./M.B.A. Class 2020: Entry Fall 2018 in Cox, Graduate Spring 2021**

**Total Credit Hours: 125**

**(52 Business + 75 Law)**

### Year 1 – Fall and Spring Terms at Dedman Law

Dedman Law courses (30 Credit Hours)

**Year Total: 30 Credit Hours**

### Year 2 – Fall Term at Cox Business

#### Module A Courses

- ACCT 6201 - Financial Accounting I
- BUSE 6202 - Managerial Economics
- FINA 6201 - Managerial Finance
- MAST 6474 - Introduction to Data Analysis I
- MNGT 6101 - Managing Your Career

#### Module B Courses

- ACCT second required accounting course (2 Credit Hours)
- ITOM 6202 - Management Decision Analysis
- MKTG 6201 - Marketing Management
- MNGT 6103 - Business Presentation Techniques
- Elective: one course (2 Credit Hours)

**Term Total: 20 Credit Hours**

**Note:** Students select the second accounting course based on their interest and anticipated concentration: either ACCT 6202 - Financial Accounting II or ACCT 6205 - Managerial Accounting I. Students should consult the Concentrations and Minors section for specific information on which second accounting course is required for each concentration.

### Year 2 – Spring Term at Cox Business

#### Module A Courses

- ITOM 6203 - Operations Management
- MNO 6201 - Organizational Behavior: Managing and Leading People
- MNGT 6011 - Managing Your Career, Part Two
- Electives: two courses (4 Credit Hours)

#### Module B Courses

- BUSE 6203 - Macroeconomics  
or
- FINA 6222 - Financial Markets and Monetary Policy
  
- MNGT 6020 - First-Year Foundations
- MNGT 6210 - Global Leadership Program
- STRA 6201 - Strategic Management
- Electives: one course (2 Credit Hours)

**Term Total: 16 Credit Hours**

**Note:**

- Students concentrating in Finance should enroll in FINA 6222 - Financial Markets and Monetary Policy instead of BUSE 6203 - Macroeconomics.

- MNGT 6020 - First-Year Foundations is a requirement of the full-time J.D./ M.B.A. program. The successful completion of this degree requirement earns a grade of *P* (pass). Students participate in various required activities to enhance professional development. These sessions will take place most Fridays during the first year of the M.B.A. program.

### **Year 3 – Fall and Spring Terms at Cox and Dedman Law**

Cox Business electives: four courses

**Cox Year Total: 8 Credit Hours**

Dedman Law courses

**Dedman Year Total: 23 Credit Hours**

**Year Total: 31 Credit Hours**

### **Year 4 – Fall and Spring Terms at Cox and Dedman Law**

Cox Business electives: four courses

**Cox Year Total: 8 Credit Hours**

Dedman Law courses

**Dedman Year Total: 22 Credit Hours**

**Year Total: 30 Credit Hours**

### **Cox Credit Hours Summary for Full-Time J.D./M.B.A. Program**

28 credit hours of required Cox courses

24 credit hours of elective Cox courses

**52 credit hours total for Cox toward J.D./M.B.A. degree**

**Note:** For the 24 credit hours of elective courses, students complete one concentration. Each concentration requires 12–16 specific credit hours. (Additional information is in the Concentrations and Minors section.)

## **Juris Doctor/Master of Business Administration, J.D./M.B.A., (Full-Time One-Year)**

### **Overview**

The combined Fast Track J.D./Full-Time One-Year M.B.A. program is offered jointly by the SMU Dedman School of Law and the SMU Cox School of Business. The programs are designed for highly motivated students interested in a career in law with a strong business focus. The combined degrees may be obtained in three academic years. The Cox School of Business and the Dedman School of Law have different academic calendars; therefore, students must refer to both calendars when scheduling courses for both schools in the same term. Students enrolled in the joint-program must complete all requirements, including all noncredit-bearing requirements, for both programs.

This combined degree program is aimed at the very motivated and able student who starts with a solid grounding in business concepts, and seeks advanced training in business and a professional legal education in a time-and-cost

effective manner. We expect students in the Fast Track J.D./Full-Time One-Year M.B.A. program to pursue careers in the legal field, broadly understood.

The 107 credit hour, three-year program is comprised of 75 credit hours of Dedman Law classes and 48 credit hours of Cox Business classes, with 16 of these credit hours being satisfied by choosing any combination of the pre-approved business-related law school courses.

To be admitted to the J.D./M.B.A. program, law students must apply before beginning their law studies or during their first year of law school. Admission applications should be made to both schools, with the selection that they are for the combined J.D./M.B.A. program. Students who wish to pursue the joint program after starting their first year of law school for the J.D./M.B.A. must obtain permission from the Dedman School of Law's assistant dean for student affairs and then should consult with the M.B.A. Admissions Office. Law School applications should be submitted using the LSAC Application Service. M.B.A. applications should be submitted through the Cox School of Business Admission's website.

## **Curriculum**

### **Fast Track J.D./Full-Time One-Year M.B.A. Class 2021: Entry Summer 2019, Graduate Summer 2021**

**Total Credit Hours: 107**  
**(32 Business + 75 Law)**

#### **Year 1 - Fall and Spring Terms at Dedman Law**

- Dedman Law courses

#### **Year 1 - Summer Term**

##### **Module A**

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis
- MNGT 6003 - Business Presentation Techniques

##### **Module B**

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- MNGT 6001 - Managing Your Career
- STRA 6201 - Strategic Management

**Term Total: 12 Credit Hours**

#### **Year 2 - Fall Term**

##### **Module A**

- ITOM 6203 - Operations Management
- Electives: three courses

##### **Module B**

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- BUSE 6202 - Managerial Economics
- MNO 6201 - Organizational Behavior: Managing and Leading People
- Elective: one course

## Term Total: 16 Credit Hours

### Notes:

- Students select the second accounting course based on their interest and anticipated concentration: either ACCT 6202 - Financial Accounting II or ACCT 6205 - Managerial Accounting I. Students should consult the Concentrations and Minors section for specific information on which second accounting course is required for each concentration.
- MNGT 6003 - Business Presentation Techniques, a zero-credit course, is a requirement of the fast track M.B.A. program. Students earn a grade of Pass or Fail. All fast track M.B.A. students MUST complete this course.
- MNGT 6001 - Managing Your Career, a zero-credit course, is a requirement to use the extended services of the Career Management Center. Students earn a grade of Pass or Fail.

## Year 2 - Spring Term

- Cox Business Electives: two courses (4 credit hours)
- Dedman Law courses (15 credit hours)

## Term Total: 19 Credit Hours

## Year 3 - Fall and Spring Terms

# Master of Science in Engineering/Master of Business Administration, M.S./M.B.A.

## Overview

The Bobby B. Lyle School of Engineering and the Edwin L. Cox School of Business offer a two-year, dual degree in Master of Science in Engineering (with one of the specific degrees listed below) and Master of Business Administration, with as few as 68 credit hours. The program is intended for full-time graduate students with Bachelor degrees in engineering or science. The program is offered on-campus, although some of the engineering courses may be taken by means of the Lyle School's distance learning facilities. This program is geared toward recent graduates as well as early-career professionals employed in the engineering and technology sector who desire to broaden and deepen their skills to further their career opportunities and become leaders in technology with the appropriate business and management acumen.

This program takes advantage of the 44-credit hour Full-Time One-Year M.B.A. degree offered by Cox School and double-counts up to 6 credit hours of M.B.A. courses as electives in the 30-credit hour M.S. in Engineering degree programs making it possible to obtain two degrees with a total of 68 semester credit hours (24 credit hours of engineering and 44 credit hours in M.B.A. program). Students first complete the 24 credit hour of required courses for the specific M.S. in Engineering degree sought during the fall and spring semesters of the first year. Students then start the year-long One-Year M.B.A. (starting with the summer term and continuing in the fall and spring terms) completing both degrees at the end of the second academic year. At the conclusion of the dual degree program, students obtain an M.S. in the specific engineering degree and the M.B.A.

The overall educational objective of the dual M.S. in Engineering/M.B.A. program is to impart the necessary breadth and depth in business and in technology for those individuals preparing for leadership roles in technology firms. The program provides a reduction of 6 credit hours from the total credits that would be required for a student earning the two degrees separately (one of the M.S. in Engineering degrees listed below and the One-Year MBA) and reduces the time to complete both degrees to two years, including a summer semester.

The tuition rate of the Lyle School of Engineering shall apply to the courses taken at the Cox School of Business. Candidates will need to complete the regular admissions processes for both the Lyle School of Engineering and the Cox School of Business, including submission of all applicable test scores and supporting documents. For an application and additional information from the Lyle School of Engineering, students should see the Admissions section at [www.smu.edu/lyle](http://www.smu.edu/lyle). For Cox School of Business admissions information, students should visit [www.smu.edu/cox/fasttrackmba](http://www.smu.edu/cox/fasttrackmba) or contact the Cox Admissions Office: telephone 214-768-1214 or 1-800-472-3622; fax 214-768-3956; [mbainfo@cox.smu.edu](mailto:mbainfo@cox.smu.edu).

The M.S. in Engineering degrees offered in this dual partnership are as follows:

- M.S. in Civil Engineering
- M.S. in Computer Engineering
- M.S. in Environmental Engineering
- M.S. in Mechanical Engineering
- M.S. in Computer Science
- M.S. in Software Engineering
- M.S. in Telecommunications & Network Engineering

## Curriculum

**M.S.E./M.B.A. Class 2020: Entry Summer 2019, Graduate Spring 2021**

# Information Technology and Operations Management

Professor Amit Basu, Department Chair

**Professors:** Amit Basu, Bezalel Gavish, John H. Semple

**Associate Professors:** Sreekumar R. Bhaskaran, R. Canan Savaskan-Ebert, Ulrike Schultze, Fangyun T. Tan

**Assistant Professors:** Vishal Ahuja, Karthik Nattamai Kannan, Rajiv Mukherjee

**Clinical Professors:** Angelika Leskovskaya, Timothy McDonough, Amy V. Puelz

**Professor of Practice:** Robert A. Gwinn

**Senior Lecturer:** James C. Collins, Jr.

**Executive-in-Residence:** Hettie Tabor

To find additional programs related to the Information Technology and Operations Management department, refer to the Majors and Minors section on page 57.

## Business Analytics, M.S.B.A.

The M.S.B.A. program is an educational experience that provides knowledge and skills in key business analytics disciplines so that students can become successful in their careers. Students will take a total of 33 credit hours, of which 21 credit hours are core (or required) courses and 12 credit hours are electives in this one-year, lock-step program. Each 16-week term is divided into two eight-week modules, A and B, with each module course being two credit hours. To meet student needs, classes are scheduled in the morning, afternoon and evening, Monday through Thursday, as well as Saturday morning. Each class meets for approximately three hours once a week. Students remain with their entering class cohort during the program.

The Cox School of Business seeks candidates who show a strong potential for success in today's global business environment. Candidates who demonstrate analytical capabilities, leadership experience, interpersonal and communication skills, and personal commitment and motivation are invited to apply. The Admissions Committee seeks candidates who demonstrate outstanding academic achievement and potential, leadership qualities, and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: GMAT management/business graduate school admission test scores, previous academic records, recommendations that speak to a candidate's professional performance and self-evaluation essays. For complete details and an application packet, students should visit [www.coxmsba.com](http://www.coxmsba.com) or contact the Cox Admissions Office: telephone 214-768-1214 or 1-800-472-3622; fax 214-768-3956; [coxmsba@cox.smu.edu](mailto:coxmsba@cox.smu.edu).

## Curriculum

**M.S.B.A. Class 2019: Entry Fall 2018, Graduate Spring 2019**

**Total Credit Hours: 33**

### Fall Term

#### Module A Courses

- ITOM 6212 - Data Visualization and Communication
- ITOM 6252 - Decision Models
- ITOM 6268 - Business Analytics Consulting
- MAST 6201 - Managerial Statistics
- MKTG 6258 - Business Metrics
- MNGT 6001 - Managing Your Career

#### Module B Courses

- ITOM 6253 - Programming for Analytics
- ITOM 6264 - Advanced Management Decision Analysis
- ITOM 6265 - Database Design for Business Applications
- MAST 6251 - Applied Predictive Analytics I

- MNGT 6001 - Managing Your Career
- Elective: one course (2 credit hours)

**Term Total: 20 Credit Hours**

**Spring Term**

**Module A Courses**

- ITOM 6267 - Data Mining
- MAST 6252 - Applied Predictive Analytics II
- MNGT 6001 - Managing Your Career
- Elective: one course

**Module B Courses**

- ITOM 6269 - Web and Social Media Analytics
- MNGT 6101 - Managing Your Career
- Electives: two courses (4 credit hours)

**Term Total: 13 Credit Hours**

**Credit Hours Summary for M.S.B.A. Program**

25 credit hours of required courses

8 credit hours of elective courses

**33 credit hours total for Cox M.S.B.A. degree**

**Specialization Option**

Students will have the option of two program specializations, or tracks, one focusing more attention on database concepts and applications (business process analytics) and the other focusing more attention on marketing research practices and consumer-centric analytics (customer analytics). All specialization electives are two credit hours.

Students may choose from the following specialization electives:

**Business Process Analytics Specialization**

- ITOM 6220 - Pricing and Revenue Optimization
- ITOM 6222 - Business Forecasting
- ITOM 6224 - Managing Service Operations
- ITOM 6225 - Project Management
- ITOM 6226 - Operations Analytics
- ITOM 6256 - Business Intelligence
- ITOM 6258 - Big Data Platforms
- ITOM 6410 - Business Analytics Practicum

**Customer Analytics Specialization**

- MKTG 6204 - Consumer Behavior
- MKTG 6205 - Customer Insights and Market Intelligence
- MKTG 6223 - Understanding What Customers Value
- MKTG 6224 - Research for Marketing Decisions
- MKTG 6230 - Customer Engagement and Loyalty Management
- MKTG 6279 - Multivariate Analysis for Marketing
- MKTG 6284 - Retailing Analytics

# Management and Organizations

Professor Miguel A. Quiñones, **Department Chair**

**Professors:** Steven C. Currall, Albert W. Niemi, Robin L. Pinkley, Miguel A. Quiñones, Linda B. Stearns

**Associate Professors:** Marcus Butts, Maribeth Kuenzi, Ellen F. Jackofsky, Don VandeWalle

**Assistant Professor:** Robert W. Rasberry, McKenzie Rees

**Professor of Practice:** Sal Mistry

**Visiting Professor of Practice:** Jay Carson

To find additional programs related to the Management and Organizations department, refer to the Majors and Minors section on page 57.

## Health Promotion Management, M.S.H.P.M.

### Overview

The Master of Science in Health Promotion Management (M.S.H.P.M.) degree is offered jointly by the Simmons School of Education and Human Development and the Cox School of Business. The M.S.H.P.M. program will provide a highly focused theoretical and pragmatic education in understanding the health management industry as well as provide students with a biological, behavioral, social, and epidemiological understanding of total population health along with the business and technological acumen required of these professionals.

The program is led by Simmons School professionals with extensive research and teaching experience in applied physiology and health management and leverages the reputation and prestige of the Cox School of Business and the outstanding and burgeoning health management marketplace opportunities. The two-year, 37 credit hour program is comprised of 27 credit hours of coursework in the Simmons School plus 10 credit hours of coursework in the Cox School.

Students are admitted to the program during the fall term only. The admissions process is highly selective and follows the admissions standards of the Cox M.B.A. program. Candidates apply to the Simmons School; application submissions include cover letter, résumé, essays, official Graduate Records Examination (GRE) or Graduate Management Admissions Test (GMAT) test scores, transcripts and a minimum of two references. Complete details and link to the application are available here. Questions should be addressed to the Applied Physiology and Health Management Office: telephone 214-768-2776; email [apsm@smu.edu](mailto:apsm@smu.edu).

### Curriculum

**M.S.H.P.M. Class 2020: Entry Fall 2018, Graduate Spring 2020**

2	16	2
<b>Total</b>	<b>28</b>	<b>10</b>

**Management, M.S.M.**

The curriculum of the M.S.M. program is designed to provide students with a fundamental understanding of business along with the budgeting, management, marketing, financial and strategic planning tools needed to assume leadership positions. Students will take a total of 30 credit hours in this one-year lock-step program. Each 16-week term is divided into two eight-week modules, A and B, with each module course being two credit hours. To meet student needs, classes are scheduled in the morning, afternoon and evening Monday through Thursday, as well as Saturday morning. Each class meets for approximately three hours once a week. Students remain with their entering class and cohort section for the core required courses during the program.

The Cox School of Business seeks candidates who show a strong potential for success in today's global business environment. Candidates who demonstrate analytical capabilities, leadership potential, and personal commitment and motivation are invited to apply. The Admissions Committee seeks candidates who possess outstanding academic achievement, leadership potential and a desire to gain management skills. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: previous academic records, references who can speak to the candidate's professional performance and self-evaluation essays. Submission of GMAT or GRE graduate school admission/entry test scores may be required of candidates at the discretion of the M.S.M. Admissions Committee. For complete details and an application packet, students should visit [www.coxmsm.com](http://www.coxmsm.com) or contact the Cox Admissions Office: phone 214-768-1214 or 1-800-472-3622; fax 214-768-3956; [mbainfo@cox.smu.edu](mailto:mbainfo@cox.smu.edu).

## Curriculum

**M.S.M. Class 2019: Entry Fall 2018, Graduate Spring 2019**

**Total Credit Hours: 30**

### Term 1 – Fall

#### Module A Courses

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management

#### Module B Courses

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- BUSE 6202 - Managerial Economics
- ITOM 6202 - Management Decision Analysis
- MNO 6201 - Organizational Behavior: Managing and Leading People
- MNGT 6005 - Managing a Career

### Term Total: 16 Credit Hours

**Note:** Students select the second accounting course based on their interest and anticipated future elective courses: either ACCT 6202 - Financial Accounting II or ACCT 6205 - Managerial Accounting I.

### Term 2 – Spring

#### Module A Courses

- ITOM 6203 - Operations Management
- STRA 6201 - Strategic Management

Two courses from the following:

- Any course from ACCT, BL, CISB, ITOM, MKTG, MNO, STRA
- BUSE 6206 - Uncertainty and Strategic Decision-Making
- FINA 6205 - Finance Theory and Practice
- FINA 6216 - Portfolio Theory and Asset Pricing

Three elective courses from the following:

- Any course from ACCT, BL, CISB, ITOM, MKTG, MNO, STRA
- BUSE 6206 - Uncertainty and Strategic Decision-Making
- FINA 6205 - Finance Theory and Practice
- FINA 6216 - Portfolio Theory and Asset Pricing

### Term Total: 14 Credit Hours

### Credit Hours Summary for M.S.M. Program

20 credit hours of core academic required courses

10 credit hours of free elective courses as noted above

**30 credit hours total for Cox M.S.M. degree**

## **Sport Management, M.S.S.M.**

The M.S.S.M. degree is offered jointly by the Annette Caldwell Simmons School of Education and Human Development and the Cox School of Business. The program is designed for students who have a passion for the business of sport and who aspire to hold senior-management positions in the multibillion dollar sports industry. The M.S.S.M. degree is a full-time, 12-month program. The program is led by sport management professionals with decades of executive experience in a wide range of segments, including professional leagues and teams, media and broadcasting, marketing and sponsorship, facilities and sports equipment, and apparel. Students will learn important business skills from Cox faculty. Each 16-week term is divided into two eight-week modules, with courses being offered in the evenings and on Saturdays.

Students are admitted to the program during the fall term only. The admissions process is highly selective and follows the admissions standards of the Cox M.B.A. program. Candidates apply to the Simmons School; application submissions include cover letter, résumé, essays, official GMAT management/business graduate school admission test scores, transcripts and a minimum of two references. Complete details and link to the application are available at [www.smu.edu/sportmanagement](http://www.smu.edu/sportmanagement). Questions should be addressed to the Sport Management Graduate Program Office: telephone 214-768-2776; email [SMUSportManagement@smu.edu](mailto:SMUSportManagement@smu.edu).

# Strategy, Entrepreneurship and Business Economics

Professor Gordon Walker, Department Chair

**Professor:** Gordon Walker

**Associate Professor:** David T. Lei

**Assistant Professor:** Julian Kolev, Daniel Jinyong Zyung

**Professors of Practice:** Robert A. Lawson, Simon S. Mak, Gary T. Moskowitz, Harvey Rosenblum

**Clinical Professor:** Michael L. Davis

**Visiting Assistant Professor:** Yunko Cho

**Executive-in-Residence:** W. Michael Cox

**Writer-in-Residence:** Richard G. Alm

**Research Associate Professors:** Dean B. Stansel, Derek Yonai

**Research Professor of Practice:** Ryan Harrison Murphy

To find additional programs related to the Strategy, Entrepreneurship and Business Economics department, refer to the Majors and Minors section on page 57.

## Engineering Entrepreneurship, M.S.

### Overview

The master of science in engineering entrepreneurship is a two-semester (31 credit hour) cohort based program in the EMIS Department of the Lyle School of Engineering offered in concert with Lyle (19 credit hours) and the Cox School of Business (12 credit hours). Incoming students should have an engineering undergraduate degree (or equivalent).

A graduate of the SMU M.S. in engineering entrepreneurship will be an engineer who looks at the role of new technology in society with a business perspective. That graduate will have the ability to apply that knowledge to bring new technology to the marketplace. The program fills the growing regional and national need for exceptionally trained engineering managers and entrepreneurs to start and to lead new technology ventures.

Rigorous, formal, successful courses with proven impact will be offered by the Cox School in entrepreneurship knowledge and practice. Management in an engineering context will be taught in well-established courses in Lyle's EMIS department. A third anchor for the M.S. in engineering entrepreneurship will be a new course offering that will be unique to SMU. The two-semester Technology Commercialization Studio will:

- Focus on the management of products with high technology content;
- Encourage the incubation of novel technology from students, and from SMU's research laboratories;
- Include C-level mentors from successful small and medium sized engineering firms and venture capital firms; and,
- Feature lectures from experts in intellectual property, legal aspects of businesses, ethics, financing, fundraising, sales and other subject matter vital to the practice of engineering entrepreneurship.

Students in the program will also have the ability to add to their engineering expertise, particularly in topics relevant to their entrepreneurial aspirations.

### Admission Requirements

The admissions process is highly selective and requires applicants to have earned a B.S. in engineering or another technical discipline. Candidates apply to the Lyle School of Engineering; application submissions include cover letter, résumé, essays, official Graduate Records Examination (GRE) or Graduate Management Admissions Test (GMAT) test scores, transcripts and a minimum of two references. Questions should be addressed to the Lyle School of Engineering: [dmacfarlane@smu.edu](mailto:dmacfarlane@smu.edu).

## Curriculum

### M.S. in Engineering Entrepreneurship Class 2019: Entry Fall 2018, Graduate Spring 2019

#### Total Credit Hours: 31

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following additional requirements:

#### Core Courses

- CISB 6222 - Starting a Business (Cox - Offered Fall Module A)
- CISB 6226 - Evaluating Entrepreneurial Opportunity (Cox - Offered Fall Module A)
- EMIS 7501 - Technology Commercialization Studio I (Lyle)
- EMIS 7503 - Technology Commercialization Studio II (Lyle)
- STRA 6224 - Entrepreneurial Strategy (Cox - Offered Fall Module A)

#### Three from the following:

- BAEX 6237 - Global Explorations in Entrepreneurship (Cox - Offered Fall Module B)
- CISB 6210 - Essential Law for the Entrepreneur (Cox - Offered Fall Module A)
- CISB 6211 - Enhancing Operational Performance for Entrepreneurial Companies (Cox - Offered Fall Module B)
- CISB 6212 - International Entrepreneurship (Cox - Offered Fall Module B)
- CISB 6214 - Law of Financial Transactions for Entrepreneurs (Cox - Offered Fall Module A)
- CISB 6218 - Managing the Family-Owned and Closely Held Business (Cox - Offered Fall Module A)
- CISB 6220 - Social Media for Entrepreneurs (Cox - Offered Fall Module B)
- CISB 6224 - Venture Financing (Cox - Offered Fall Module A)
- CISB 6225 - Entrepreneurial Exit Strategies: LPO, Sale, IPO, Recapitalization, and Liquidation (Cox - Offered Fall Module B)
- CISB 6228 - Corporate Entrepreneurship: Intrapreneuring (Cox - Offered Fall Module A)

#### Two from the following:

- CEE 7306 - Sustainable Urban Development and Design
- EMIS 7351 - Enterprise Fundamentals
- EMIS 7365 - Program and Project Management
- EMIS 7366 - Marketing Engineering
- EMIS 8358 - Technical Entrepreneurship
- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8364 - Engineering Management

#### Additional Course

- Satisfactory completion of one three hour course from any Lyle graduate program, approved by the adviser

# Majors and Minors

Every M.B.A. student begins the program with a general business major. In each fall and spring term, students have a designated time when the major and minor selections can be changed. M.B.A. students complete one major with the option of completing one or more minors to meet their academic goals. Majors and minors will print on the student's transcript record but specializations do not. Only the degree, M.B.A., appears on diplomas. A directed study course does not count toward a major or minor requirement.

**Note:** While the Cox School encourages all students to select the major and minor of their choosing, it cannot ensure that all classes will be available in every term to meet the requirements.

## Accounting Major

### Major Requirements

#### Core Courses

Core courses not included in the 14-hour total:

- ACCT 6201 - Financial Accounting I
- ACCT 6202 - Financial Accounting II

#### Required Courses

Plus 6 hours of required courses:

- ACCT 6205 - Managerial Accounting I
- ACCT 6210 - Financial Reporting and Analysis I
- ACCT 6212 - Financial Reporting and Analysis II

#### Additional Courses

Plus any 8 hours of courses from the following list, which includes M.S.A. program courses available for M.B.A. students meeting the course prerequisites:

- ACCT 6206 - Managerial Accounting II
- ACCT 6208 - Audit Risks and Controls
- ACCT 6211 - Financial Statement Analysis
- ACCT 6213 - Accounting-Based Valuation
- ACCT 6214 - Mergers and Acquisitions
- ACCT 6215 - Advanced Topics in Accounting
- ACCT 6216 - Emerging Issues in Financial Accounting
- ACCT 6218 - Forensic Accounting and Financial-Statement Fraud
- ACCT 6238 - Taxation of Mergers and Acquisitions
- ACCT 6239 - Tax Research
- ACCT 6240 - Advanced Partnership Taxation
- ACCT 6241 - Seminar in International Taxation
- ACCT 6242 - Accounting for Income Taxes
- ACCT 6243 - Assurance Methodology
- ACCT 6244 - Audit Research
- ACCT 6246 - Noncorporate Entity Accounting
- ACCT 6248 - Advanced Corporate Taxation
- ACCT 6249 - Entity Taxation

**Total: 14 Credit Hours**

# **Business Analytics Major**

## **Major Requirements**

### **Core Courses**

Core courses not included in the 12-hour total:

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- ITOM 6202 - Management Decision Analysis
- ITOM 6203 - Operations Management

### **Additional Courses**

Plus 12 hours, with a minimum of 4 hours from the foundation list:

### **Foundation Courses**

Minimum of 4 hours:

- ITOM 6214 - Advanced Management Decision Analysis
- ITOM 6217 - Data Mining and Machine Learning
- ITOM 6222 - Business Forecasting

### **Elective Courses**

- ITOM 6206 - Business Intelligence
- ITOM 6208 - Managing Big Data
- ITOM 6212 - Data Visualization and Communication
- ITOM 6215 - Database Design for Business Applications
- ITOM 6218 - Business Analytics Consulting
- ITOM 6219 - Web and Social Media Analytics
- ITOM 6220 - Pricing and Revenue Optimization
- ITOM 6225 - Project Management
- ITOM 6226 - Operations Analytics
- BUSE 6206 - Uncertainty and Strategic Decision-Making
  
- MKTG 6223 - Understanding What Customers Value  
or
- MKTG 6230 - Customer Engagement and Loyalty Management

**Total: 12 Credit Hours**

## **Finance Honors Track**

### **Requirements (65 credit hours)**

The finance honors track within the finance major is designed to allow students interested in finance careers to take many of their finance electives earlier in the program. To be accepted into the Finance Honors Track, students need to demonstrate strong performance in FINA 6201, ACCT 6201, MAST 6201, and FINA 6205. Students who apply will be reviewed and considered at the conclusion of module B in the fall term. Those accepted will begin alternate coursework in the spring term, as outlined below. Students in the track that are interested in money management and related fields are encouraged to pursue the chartered financial analyst (CFA) designation concurrent with the coursework during the first year of the M.B.A. program. The CFA designation is offered by the CFA Institute and is a globally recognized credential in finance, and is necessary in such fields as money management.

## **Year 1 – Fall Term**

### **Module A Courses**

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- MAST 6474 - Introduction to Data Analysis I
- MKTG 6201 - Marketing Management
- MNGT 6101 - Managing Your Career

### **Module B Courses**

- ACCT 6202 - Financial Accounting II
- BUSE 6202 - Managerial Economics
- FINA 6205 - Finance Theory and Practice
- ITOM 6202 - Management Decision Analysis
- MNGT 6103 - Business Presentation Techniques

**Term Total: 20 Credit Hours**

## **Year 1 – Spring Term**

### **Module A Courses**

- ACCT 6210 - Financial Reporting and Analysis I
- FINA 6211 - Valuation and Analysis
- FINA 6216 - Portfolio Theory and Asset Pricing
- ITOM 6203 - Operations Management
- MNGT 6011 - Managing Your Career, Part Two

### **Module B Courses**

- FINA 6214 - International Financial Markets
- FINA 6219 - Derivatives
- FINA 6222 - Financial Markets and Monetary Policy
- FINA Elective (2 credit hours)
- MNGT 6020 - First-Year Foundations
- MNGT 6210 - Global Leadership Program

**Term Total: 18 Credit Hours**

#### **Note:**

- Students in the Finance Honors Track will complete FINA 6222 - Financial Markets and Monetary Policy instead of BUSE 6203 - Macroeconomics.
- Students interested in the CFA designation are encouraged to enroll in the CFA preparatory course, which will meet weekly in the spring term. There may be an additional cost associated with the preparatory course. These students are also encouraged to sit for the Level I, II, or III CFA Examination in June.

## **Year 1 – Summer Term**

- MNGT 6150 - Graduate Corporate Internship Program

**Term Total: 1 Credit Hours**

## **Year 2 – Fall Term**

### **Module A Course**

- STRA 6201 - Strategic Management

### **Modules A and B Courses**

Electives: six courses

**Term Total: 14 Credit Hours**

## **Year 2 – Spring Term**

### **Module A Courses**

- MNO 6201 - Organizational Behavior: Managing and Leading People
- Electives: three courses

### **Module B Courses**

Electives: three courses

### **Term Total: 14 Credit Hours**

### **Credit Hour Summary for Finance Honors Track**

41 credit hours of required courses

24 credit hours of elective courses

### **65 credit hours total**

**Note:** Of these elective courses, students complete one major. Each major requires 12–16 specific credit hours. (Additional Information is in the Majors and Minors section.)

## **Finance Major**

### **Major Requirements**

#### **Core Courses**

Core courses not included in the 16-hour total:

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- FINA 6201 - Managerial Finance

#### **Required Courses**

Plus 10 hours of required courses:

- FINA 6205 - Finance Theory and Practice (MUST be taken before all other FINA electives except FINA 6216)
  
- FINA 6211 - Valuation and Analysis  
or
- FINA 6223 - Global Mergers and Acquisitions
  
- FINA 6214 - International Financial Markets
- FINA 6216 - Portfolio Theory and Asset Pricing
- FINA 6219 - Derivatives

#### **Elective Courses**

Plus any 6 hours of elective courses from the following list:

- FINA 6212 - Corporate Financial Policies
- FINA 6218 - Fixed Income Securities
- FINA 6222 - Financial Markets and Monetary Policy
- FINA 6226 - Quantitative Trading Strategies
- FINA 6228 - Energy Project Valuation and Finance
- FINA 6238 - Financial Modeling
- FINA 6430 - Asset and Wealth Management (4 credits, full semester)

Total: 16 Credit Hours

## **Finance Major - Corporate Finance Specialization**

### **Specializations Within the Finance Major**

The specializations listed are not printed on a student's transcript. They are merely guidelines to assist a student planning to gain additional knowledge in a specific area within the finance major. The finance major supports further specialization in the following three areas: 1) investments, 2) corporate finance or 3) energy finance.

### **Requirements (16 credit hours)**

#### **Core Courses**

- CISB 6216 - Managing the Entrepreneurial Business I
- CISB 6217 - Managing the Entrepreneurial Business II
- CISB 6218 - Managing the Family-Owned and Closely Held Business
- CISB 6220 - Social Media for Entrepreneurs
- CISB 6222 - Starting a Business
- CISB 6223 - Early-Stage Valuation and Fund
- CISB 6224 - Venture Financing
- CISB 6225 - Entrepreneurial Exit Strategies: LPO, Sale, IPO, Recapitalization, and Liquidation
- CISB 6226 - Evaluating Entrepreneurial Opportunity
- CISB 6228 - Corporate Entrepreneurship: Intrapreneuring
- CISB 6230 - Teaming with Venture Investors

### Group Two

Maximum of 4 hours:

- ACCT 6210 - Financial Reporting and Analysis I
- ACCT 6211 - Financial Statement Analysis
- ACCT 6214 - Mergers and Acquisitions
- BL 6224 - Managerial Perspectives on Law and the Workplace
- BUSE 6206 - Uncertainty and Strategic Decision-Making
- BUSE 6223 - Game Theory for Business Managers
- ITOM 6205 - Digital Strategy
- ITOM 6226 - Operations Analytics
- MKTG 6222 - New Product Development
- MKTG 6223 - Understanding What Customers Value
- MKTG 6226 - Advanced Marketing Strategy

- MNO 6214 - Strategic Management of Human Capital
- MNO 6215 - Master Negotiation
- MNO 6230 - The Evolution of American Capitalism and the Global Challenges Ahead

#### CISB Courses

One or two courses (maximum of 4 credit hours) from the following list:

- CISB 6210 - Essential Law for the Entrepreneur
- CISB 6211 - Enhancing Operational Performance for Entrepreneurial Companies
- CISB 6212 - International Entrepreneurship
- CISB 6214 - Law of Financial Transactions for Entrepreneurs
- CISB 6216 - Managing the Entrepreneurial Business I
- CISB 6217 - Managing the Entrepreneurial Business II
- CISB 6218 - Managing the Family-Owned and Closely Held Business
- CISB 6220 - Social Media for Entrepreneurs
- CISB 6222 - Starting a Business
- CISB 6223 - Early-Stage Valuation and Fund
- CISB 6224 - Venture Financing
- CISB 6225 - Entrepreneurial Exit Strategies: LPO, Sale, IPO, Recapitalization, and Liquidation
- CISB 6226 - Evaluating Entrepreneurial Opportunity
- CISB 6228 - Corporate Entrepreneurship: Intrapreneuring
- CISB 6230 - Teaming with Venture Investors

Total: 14 Credit Hours

## Accounting Minor

### Minor Requirements

#### Core Courses

Core courses not included in the 10-hour total:

- ACCT 6201 - Financial Accounting I
- ACCT 6202 - Financial Accounting II

#### Required Courses

Plus 6 hours of required courses:

- ACCT 6205 - Managerial Accounting I
- ACCT 6210 - Financial Reporting and Analysis I
- ACCT 6212 - Financial Reporting and Analysis II

#### Additional Courses

Plus any 4 hours of courses from the following list, which includes M.S.A. program courses available for M.B.A. students meeting the course prerequisites:

- ACCT 6206 - Managerial Accounting II
- ACCT 6208 - Audit Risks and Controls
- ACCT 6211 - Financial Statement Analysis
- ACCT 6213 - Accounting-Based Valuation
- ACCT 6214 - Mergers and Acquisitions
- ACCT 6215 - Advanced Topics in Accounting
- ACCT 6216 - Emerging Issues in Financial Accounting
- ACCT 6218 - Forensic Accounting and Financial-Statement Fraud

- ACCT 6238 - Taxation of Mergers and Acquisitions
- ACCT 6239 - Tax Research
- ACCT 6240 - Advanced Partnership Taxation
- ACCT 6241 - Seminar in International Taxation
- ACCT 6242 - Accounting for Income Taxes
- ACCT 6243 - Assurance Methodology
- ACCT 6244 - Audit Research
- ACCT 6246 - Noncorporate Entity Accounting
- ACCT 6248 - Advanced Corporate Taxation
- ACCT 6249 - Entity Taxation

Total: 10 Credit Hours

## **Business Analytics Minor**

### Minor Requirements

#### Core Courses

Core courses not included in the 8-hour total:

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
- ITOM 6202 - Management Decision Analysis
- ITOM 6203 - Operations Management

#### Additional Courses

Plus 8 hours, with a minimum of 4 hours from the foundation list:

#### Foundation Courses

Minimum of 4 hours:

- ITOM 6214 - Advanced Management Decision Analysis
- ITOM 6217 - Data Mining and Machine Learning
- ITOM 6222 - Business Forecasting

#### Elective Courses

- ITOM 6206 - Business Intelligence
- ITOM 6208 - Managing Big Data
- ITOM 6212 - Data Visualization and Communication
- ITOM 6215 - Database Design for Business Applications
- ITOM 6218 - Business Analytics Consulting
- ITOM 6219 - Web and Social Media Analytics
- ITOM 6220 - Pricing and Revenue Optimization
- ITOM 6225 - Project Management
- ITOM 6226 - Operations Analytics
- BUSE 6206 - Uncertainty and Strategic Decision-Making
- MKTG 6223 - Understanding What Customers Value  
or
- MKTG 6230 - Customer Engagement and Loyalty Management

Total: 8 Credit Hours

## **Finance Minor**

### **Minor Requirements**

#### **Core Courses**

Core courses not included in the 10-hour total:

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- FINA 6201 - Managerial Finance

#### **Required Courses**

Plus 10 hours of required courses:

- FINA 6205 - Finance Theory and Practice (MUST be taken before all other FINA electives except FINA 6216)
  
- FINA 6211 - Valuation and Analysis  
or
- FINA 6223 - Global Mergers and Acquisitions
  
- FINA 6214 - International Financial Markets
- FINA 6216 - Portfolio Theory and Asset Pricing
- FINA 6219 - Derivatives

Total: 10 Credit Hours

## **Information and Operations Minor**

### **Minor Requirements**

#### **Core Courses**

Core courses not included in the 8-hour total:

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- ITOM 6202 - Management Decision Analysis
- ITOM 6203 - Operations Management

#### **Additional Courses**

Plus 8 hours, with a minimum of 4 hours from the foundation list:

#### **Foundation Courses**

Minimum of 4 hours:

- ITOM 6207 - Supply Chain Management
- ITOM 6215 - Database Design for Business Applications
- ITOM 6225 - Project Management

## Elective Courses

- ITOM 6205 - Digital Strategy
- ITOM 6206 - Business Intelligence
- ITOM 6208 - Managing Big Data
- ITOM 6212 - Data Visualization and Communication
- ITOM 6214 - Advanced Management Decision Analysis
- ITOM 6217 - Data Mining and Machine Learning
- ITOM 6218 - Business Analytics Consulting
- ITOM 6219 - Web and Social Media Analytics
- ITOM 6220 - Pricing and Revenue Optimization
- ITOM 6222 - Business Forecasting
- ITOM 6224 - Managing Service Operations
- ITOM 6226 - Operations Analytics

Total: 8 Credit Hours

## Management Minor

### Minor Requirements

#### Core Courses

Core courses not included in the 10-hour total:

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- MNO 6201 - Organizational Behavior: Managing and Leading People

#### Required Course

Plus 2 hours of the required course:

- MNO 6202 - Leading Teams and Organizations

#### Additional Courses

Plus 8 hours, with a minimum of 4 hours from Group One and the remaining 4 hours from either Group One or Group Two:

#### Group One

Minimum of 4 hours:

- MNO 6214 - Strategic Management of Human Capital
- MNO 6218 - Leadership in a Complex World
- MNO 6220 - Corporate Governance
- MNO 6222 - Leading Organizational Change
- MNO 6232 - Ethical Leadership and Corporate Social Responsibility

#### Group Two

- MNO 6210 - Leader as Coach
- MNO 6212 - Introduction to Consulting
- MNO 6215 - Master Negotiation
- MNO 6219 - People and Organizational Analytics
- MNO 6230 - The Evolution of American Capitalism and the Global Challenges Ahead
- BL 6224 - Managerial Perspectives on Law and the Workplace

- ITOM 6207 - Supply Chain Management
- ITOM 6218 - Business Analytics Consulting
- ITOM 6225 - Project Management
- STRA 6202 - Advanced Strategic Management

Total: 10 Credit Hours

## Marketing Minor

### Minor Requirements

#### Core Courses

Core courses not included in the 10-hour total:

- ACCT 6205 - Managerial Accounting I
- MKTG 6201 - Marketing Management

#### Foundation Courses

Required any 4 hours:

- MKTG 6204 - Consumer Behavior
- MKTG 6205 - Customer Insights and Market Intelligence
- MKTG 6206 - Marketing Mix Implementation

#### Elective Courses: Functions and Topics

Required any 6 hours:

- MKTG 6212 - Advanced Marketing Communications Management
- MKTG 6214 - Advanced Pricing Management
- MKTG 6215 - Advanced Product and Brand Management
- MKTG 6218 - Multichannel Marketing Management
- MKTG 6222 - New Product Development
- MKTG 6223 - Understanding What Customers Value
- MKTG 6224 - Research for Marketing Decisions
- MKTG 6225 - Retailer Behavior and Sales Promotion
- MKTG 6226 - Advanced Marketing Strategy
- MKTG 6227 - Global Marketing Management
- MKTG 6230 - Customer Engagement and Loyalty Management
- MKTG 6232 - Digital and Social Media Marketing
- MKTG 6233 - Nonprofit Marketing Strategy

Total: 10 Credit Hours

## Real Estate Minor

### Minor Requirements

#### Core Courses

Core courses not included in the 8-hour total:

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
- FINA 6201 - Managerial Finance

## Required Courses

Plus 8 hours of required courses:

- RE 6211 - Real Estate Investment
- RE 6212 - Real Estate Analysis and Strategy
- RE 6213 - Real Estate Finance
- RE 6215 - Real Estate Development

Total: 8 Credit Hours

## Strategy and Entrepreneurship Minor Minor Requirements

### Core Courses

Core courses not included in the 10-hour total:

- ACCT 6202 - Financial Accounting II  
or
- ACCT 6205 - Managerial Accounting I
  
- STRA 6201 - Strategic Management

### Required Course

Plus 2 hours of the required course:

- STRA 6202 - Advanced Strategic Management

### Additional Courses

Plus any combination of 8 hours from the following list, with a maximum 4 hours of CISB courses:

- STRA 6219 - Private Equity and Venture Capital
- STRA 6220 - Strategic Mergers and Acquisitions
- STRA 6222 - International Corporate Strategy
- STRA 6224 - Entrepreneurial Strategy
- STRA 6225 - Strategic Alliances
- STRA 6226 - Competitive Advantage
- STRA 6228 - Global Strategy
- STRA 6236 - The Practice of International Business
- STRA 6410 - Venture Capital Practicum

### CISB Courses

- CISB 6210 - Essential Law for the Entrepreneur
- CISB 6211 - Enhancing Operational Performance for Entrepreneurial Companies
- CISB 6212 - International Entrepreneurship
- CISB 6214 - Law of Financial Transactions for Entrepreneurs
- CISB 6216 - Managing the Entrepreneurial Business I
- CISB 6217 - Managing the Entrepreneurial Business II
- CISB 6218 - Managing the Family-Owned and Closely Held Business
- CISB 6220 - Social Media for Entrepreneurs
- CISB 6222 - Starting a Business
- CISB 6223 - Early-Stage Valuation and Fund
- CISB 6224 - Venture Financing
- CISB 6225 - Entrepreneurial Exit Strategies: LPO, Sale, IPO, Recapitalization, and Liquidation

- CISB 6226 - Evaluating Entrepreneurial Opportunity
- CISB 6228 - Corporate Entrepreneurship: Intrapreneuring
- CISB 6230 - Teaming with Venture Investors

Total: 10 Credit Hours

# Cox School of Business: Course Descriptions

The following business courses have been approved by the Cox School of Business faculty for the full-time M.B.A. and P.M.B.A. programs and the Master of Science in Accounting, Entrepreneurship, Finance or Management programs. It should be noted that not all courses described in this catalog are necessarily offered in any given academic year. Students should check the published course schedules to see the courses offered for a specific term. All core required courses must be completed prior to taking an elective course within an academic discipline.

**Academic Areas of Instruction.** Courses are listed under the following academic areas:

- Accounting (ACCT)
- Business Administration
- Managerial Statistics (MAST)
- Finance (FINA)
- Information Technology and Operations Management (ITOM)
- Management (MNGT)
- Management and Organizations (MNO)
- Marketing (MKTG)
- Real Estate, Risk Management and Business Law
- Real Estate (RE)
- Business Law (BL)
- Strategy, Entrepreneurship and Business Economics
- Strategy (STRA)
- Entrepreneurship (CISB)
- Business Economics (BUSE)

## International Programs

Understanding major political and economic trends outside the United States is critical to success in today's business environment. Through the Office of Global Operations, Cox provides P.M.B.A. students with the chance to study and experience these trends firsthand by attending a course and earning two credit hours over a 10-day program.

Students may participate in international programs after completing all required core courses. To apply for the international programs, students must be in good academic standing with a 3.200 or better cumulative GPA. Participants are selected on a first-come, first-served basis, with graduation date and cumulative GPA holding precedence. Courses taken by participation in an international program will count toward the degree and fulfill the P.M.B.A. international requirement but will not count toward the GPA calculation or concentration requirements. For assistance in reviewing academic plans, students should meet with the associate director for the P.M.B.A. program early in the planning process.

Students enrolled in an international P.M.B.A. course taught at a partner school cannot be concurrently enrolled in a course at Cox.

For students participating in an international program, tuition is paid to SMU, while registration fees are paid to the partner school. In addition, travel plans and other miscellaneous costs are the students' responsibility. Financial aid will be handled as though the student is studying at Cox.

The M.B.A. Global Operations Office reserves the right to decline anyone whose behavior at Cox indicates that he or she might jeopardize Cox's exchange relationship and thus prevent future Cox P.M.B.A. students from going on exchange to a particular school.

Cox's P.M.B.A. international agreements limit the number of participants; therefore, spaces are limited. Students should visit the website for more information ([www.cox.smu.edu/web/global-programs/professional-mba](http://www.cox.smu.edu/web/global-programs/professional-mba)).

## **Accounting**

All M.B.A. students take ACCT 6201 as part of the core curriculum. For the second required accounting course, students choose either ACCT 6202 or ACCT 6205 depending upon their concentration and degree plan. The appropriate prerequisite courses must be successfully completed to enroll in elective ACCT courses. More details on course selection and prerequisites are found in the Accounting section and in the course descriptions below.

### **ACCT 6201 - Financial Accounting I**

*Credits: 2*

This course introduces students to the fundamentals of preparing and understanding financial statements targeted to external users.

### **ACCT 6202 - Financial Accounting II**

*Credits: 2*

Builds on ACCT 6201 and provides more in-depth coverage of how individual asset, liability, and equity accounts are measured and recognized in the financial statements. Prerequisite: ACCT 6201.

### **ACCT 6205 - Managerial Accounting I**

*Credits: 2*

Demonstrates techniques for maximizing shareholder value by correctly assessing the financial outcomes of commonly recurring types of operating decisions. Techniques for identifying alternatives, assessing relevant costs, and choosing a course of action are illustrated with case studies involving decisions on pricing (including special order and private label pricing), production alternatives (including make or buy), and allocation of care resources. Topics include cost behavior, cost-volume-profit relations, cost system design and interpretation (including the use of actual costs and standard costs), and identifying the costs and revenues relevant to decisions. The course will probably have a case orientation. Prerequisite: ACCT 6201.

### **ACCT 6206 - Managerial Accounting II**

*Credits: 2*

Continues the study begun in ACCT 6205. Explores the use of cost data in planning and controlling operations. Describes techniques of cost measurement (variable costing, activity-based costing, and relevant costing) and their implications for cost management. Introduces management control (strategy implementation) in the decentralized organization, including variable costing, activity-based costing, activity-based management, strategic cost analysis, divisional profit center evaluation, and transfer pricing. Prerequisite: ACCT 6205.

### **ACCT 6208 - Audit Risks and Controls**

*Credits: 2*

The fundamental concepts and applications of internal control over financial reporting risk as they relate to systems development and design, and to the integrated audit of internal controls over financial reporting in accordance with PCAOB Audit Standard 5. Also, fundamental auditing theory, practice, and procedures as they are applied to financial statement audits. Prerequisite: ACCT 6202 or enrollment in the M.S.A. program.

### **ACCT 6210 - Financial Reporting and Analysis I**

*Credits: 2*

Designed for those whose careers will require a more in-depth knowledge of financial statements than that provided by the required core financial accounting courses (ACCT 6201, ACCT 6202). Focuses on issues relevant to M.B.A. students whose careers depend on their ability to analyze financial statements. Topics include deferred taxes, leases, discontinued operations, accounting write-offs, and restructuring charges, and analysis of the statement of cash flows. Recommended: ACCT 6211, ACCT 6212. Prerequisite: ACCT 6202 or enrollment in the M.S.A. program.

## **ACCT 6211 - Financial Statement Analysis**

*Credits: 2*

Students develop a framework for analyzing financial statements and apply it to a series of real-world situations via cases (one a week). Financial statement analysis assesses a firm along multiple dimensions, including the firm's success (or lack thereof) in executing its strategy (business model); the firm's competitive position within its industry; the firm's financial policies and their effect on firm risk, performance, and quality of earnings; and a range of other activities undertaken by the firm. Prerequisite: ACCT 6202 or enrollment in the M.S.A. program.

## **ACCT 6212 - Financial Reporting and Analysis II**

*Credits: 2*

Similar to ACCT 6210, this course is designed for students whose careers will require a more in-depth knowledge of financial statements than that provided by the required core financial accounting courses (ACCT 6201, ACCT 6202). Topics include off-balance-sheet financing, accounting for pensions and postretirement benefits, accounting for stock options, and earnings per share. Prerequisite: ACCT 6202 or currently enrolled in M.S.A. program.

## **ACCT 6213 - Accounting-Based Valuation**

*Credits: 2*

Covers the analysis of financial information (particularly firms' financial statements) for making decisions to invest in businesses. Methods to determine stock value using fundamental analysis are examined in detail and applied in situations involving listed companies. Particular emphasis is given to the accounting-based valuation models. The appeal of these models is that valuation is based on accounting data; these data are not only available ex post but they are also commonly available ex ante as forecasts. Topics include a comparison of accounting, dividend, and cash flow-based approaches to valuation; methods of financial statement analysis, including ratio analysis; and the analysis of risk. Also, dealing with accounting issues and forecasting firms' future performance. Prerequisite: ACCT 6202 or enrollment in the M.S.A. program.

## **ACCT 6214 - Mergers and Acquisitions**

*Credits: 2*

Detailed examination of the controversial nature of mergers, acquisitions, and consolidations accounting, with a focus on the differential impact of alternative methods of accounting for economically similar transactions and the implications of the same for managerial behavior, valuation, and investors. Reviews the revised merger accounting standards (SFAS 141/142), which require that all mergers be accounted for using one method, while GAAP still affords significant discretion to managers in implementing these standards. Insights generated from discussions of the M&A setting are applied to various other scenarios where managers can influence or dictate accounting choice. Explores the important differences in U.S. GAAP and IFRS and their implications, given the FASB's harmonization project with IASB. Includes discussion of accounting issues associated with other corporate restructuring transactions such as LBOs, spin-offs, and carve-outs. Prerequisite: ACCT 6202 or enrollment in the M.S.A. program.

## **ACCT 6215 - Advanced Topics in Accounting**

*Credits: 2*

Covers a series of advanced topics in financial accounting, including futures, options, and swaps and how they are accounted for; foreign currency transactions and how to account for hedging instruments related to those transactions; how to translate foreign currency statements for purposes of consolidation; SEC reporting requirements; and how to account for bankruptcy. Prerequisite or corequisite: ACCT 6202 or enrollment in the M.S.A. program.

## **ACCT 6216 - Emerging Issues in Financial Accounting**

*Credits: 2*

This course examines several significant financial accounting issues being raised by the SEC as to the appropriateness of application in practice. After completing this course, students should 1) have a better understanding of the issues related to the application of the section of the codification, 2) understand practice concerns, and 3) understand the disclosures required to report the issues. Prerequisite: ACCT 6202 or enrolled in the M.S.A. program.

## **ACCT 6218 - Forensic Accounting and Financial-Statement Fraud**

*Credits: 2*

Imparts a detailed understanding of forensic accounting and the practical applications of forensics within the accounting profession. Fast-paced course that immerses students in the forensic accounting field, with a focus on litigation consulting, fraud investigation, damage quantification, and expert testimony. Provides real-world exposure and requires each student to observe a civil legal proceeding in a state or federal court (for at least 1 hour, outside of class). Through individual and group activities, students study cases to gain an understanding of forensic accounting processes, roles, and responsibilities. Upon completion of the course, students are able to work effectively as a member of a forensic accounting engagement team. Prerequisite: ACCT 6202 or enrollment in the M.S.A. program.

## **ACCT 6219 - Leadership Skills for the Accounting Professional**

*Credits: 2*

This course examines key elements of business leadership for those entering the accounting profession. It involves the analysis of technical accounting principles, market trends, and historical business events in the context of business decision-making. It provides students with an opportunity to actively engage in group discussions on the following topics: leading others, making ethical decisions, leading organizational change, connecting financial analysis with business strategy, and leading through innovation. Students develop their personal skills in team building, effective business presentations, and business writing. Students also learn other skills that enhance their leadership effectiveness, including the use of emotional intelligence and navigating organizational governance and power structures.

Prerequisite: Currently enrolled in the M.S.A. program.

## **ACCT 6220 - Accounting Data Analytics**

*Credits: 2*

Introduces issues that arise in asking the right questions when employing data analytics in an accounting context. Students gain a strong foundation in what is possible today with data analytics. Topics include understanding the question(s) or issues being investigated, determining what data is available, common issues that arise in gathering data, practical experience with data analysis tools, and presentation of information to others. Prerequisite: Enrollment in the M.S.A. program or by permission.

## **ACCT 6221 - Accounting Issues in Financial Due Diligence**

*Credits: 2*

Deals with the analysis of accounting information, particularly financial statements, to determine historical and pro forma performance by ascertaining and analyzing normalized EBITDA, working capital, and key value drivers of the business. The primary focus is on understanding the investment cycle of a mergers and acquisitions deal, understanding financial statements, and learning how to properly analyze a company's normalized level of operations with consideration given to both historical performance and anticipated changes going forward. Methods to determine EBITDA, working capital, and other key financial metrics using historical analysis and forecasting, will be examined in detail and applied in situations involving a variety of real world examples. Prerequisite: ACCT 6202 or enrollment in the M.S.A. program.

## **ACCT 6226 - Accounting Information Systems**

*Credits: 2*

Enhances students' auditing, SOX 404 consulting, and enterprise risk mitigation skills. Focuses on business processes, internal controls, and information technology as well as the tools for documenting these, namely, flowcharts, control matrices, and policy and procedure manuals. Covers topics assessed in the information technology portion of the CPA exam. Prerequisite: Enrollment in the M.S.A. program.

## **ACCT 6238 - Taxation of Mergers and Acquisitions**

*Credits: 2*

This course explores advanced corporate tax issues primarily surrounding the federal income taxation of mergers and acquisitions. In this course, students learn the requirements necessary to affect various forms of tax-free reorganizations and the ancillary tax issues to consider when advising clients on business combinations. As time allows, students also

cover the general requirements of forming real estate investment trusts and certain international considerations relevant in the mergers and acquisitions context. Prerequisite: Currently enrolled in M.S.A. program or by permission.

### **ACCT 6239 - Tax Research**

*Credits: 2*

This course is designed to provide a foundation from which students can effectively identify, research, and resolve tax issues. Students will learn how to assess the appropriateness of authoritative sources and communicate the results of tax research clearly and concisely to the intended audiences of their tax memorandums. Prerequisite: Currently enrolled in M.S.A. program or by permission.

### **ACCT 6240 - Advanced Partnership Taxation**

*Credits: 2*

Builds on ACCT 6248 and provides additional in-depth coverage of tax issues related to the formation, operation, and dissolution of corporations and partnerships. Prerequisite: ACCT 6248.

### **ACCT 6241 - Seminar in International Taxation**

*Credits: 2*

Surveys basic issues in international, state, and local income taxation. Topics on international taxation issues include taxation on foreign operations of U.S. individuals and corporations, U.S. taxation of foreign individuals and corporations, foreign tax credits, U.S. possessions taxation, foreign tax credits, sourcing of income, and Section 482 reallocation of income adjustments. Topics on state and local income taxation issues include an analysis of nexus issues, unitary versus nonunitary tax regimes, and the allocation and apportionment of income and expenses. Prerequisite: Enrollment in the M.S.A. program or by permission.

### **ACCT 6242 - Accounting for Income Taxes**

*Credits: 2*

Provides a systematic analysis of the provisions of FAS 109, "Accounting for Income Taxes," and FIN 48, "Accounting for Tax Uncertainties." Includes the calculation of the current and deferred provision for income taxes, the effect of changes in the tax rate, the impact of net operating losses, the need for and calculation of a tax valuation account, and the calculation of and disclosures needed for tax uncertainty positions. Prerequisite: Enrollment in the M.S.A. program or by permission.

### **ACCT 6243 - Assurance Methodology**

*Credits: 2*

Presents audit theory and procedures applied to the integrated audit of internal controls over financial reporting. Consideration is given to understanding relationships with clients, substantive testing, and audit documentation. In addition, client, industry, and technical research are applied to high-risk audit areas. Prerequisite: ACCT 6208 or enrollment in the M.S.A. program.

### **ACCT 6244 - Audit Research**

*Credits: 2*

Presents audit theory and procedures applied to the integrated audit of internal controls over financial reporting. Consideration is given to audit wrap-up procedures and to writing reports, reviews, and compilations. In addition, client, industry, and technical research are applied to high-risk audit areas. Prerequisites: ACCT 6243, enrollment in M.S.A Program.

### **ACCT 6246 - Noncorporate Entity Accounting**

*Credits: 2*

Focuses on financial reporting by government entities and nonprofit organizations. Covers accounting for partnerships, including the formation and termination of partnerships. Required course for M.S.A. students and recommended for anyone interested in bank lending. Prerequisite: ACCT 6202 or enrollment in the M.S.A. program.

## **ACCT 6248 - Advanced Corporate Taxation**

*Credits: 2*

This course examines basic issues in the tax treatment of corporations and their shareholders, including corporate formations, a variety of corporate distributions to shareholders (both liquidating and nonliquidating distributions), and tax considerations in the sale of corporate businesses. Grades are given for this course and ACCT 6249 at the end of the second course - the same grade for each course. To receive a passing grade in either course, the student must complete both. Prerequisite: Currently enrolled in M.S.A. program or by permission.

## **ACCT 6249 - Entity Taxation**

*Credits: 2*

Surveys issues related to partnership and S-corporation taxation, multijurisdictional taxation, international and multistate taxation, and estate tax planning. Grades are given for this course and ACCT 6248 at the end of the second course - the same grade for each course. To receive a grade in either course, the student must complete both. Prerequisite: ACCT 6248.

## **ACCT 6280 - M.S.A. Intermediate Accounting I**

*Credits: 2*

Theory and techniques for construction of corporate financial reports for use by stockholders, creditors, and other analysts. Prerequisite: Permission of department chair. Restricted to Cox M.S.A. students.

## **ACCT 6281 - M.S.A. Intermediate Accounting II**

*Credits: 2*

Continuation of ACCT 6280. Prerequisite: Permission of department chair. Restricted to Cox M.S.A. students.

## **ACCT 6282 - M.S.A. Federal Income Tax I**

*Credits: 2*

A conceptual basis and structure for the determination of income taxes. Tax research methods are used in preparing tax returns, solving problems, and planning business decisions. Prerequisite: Permission of department chair. Restricted to Cox M.S.A. students.

## **ACCT 6295 - Directed Studies in Accounting**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

## **ACCT 6374 - Financial Accounting**

*Credits: 3*

Introduces students to the fundamentals of preparing and understanding financial statements targeted to external users. Provides an in-depth coverage of how individual asset, liability, and equity accounts are measured and recognized in the financial statements. Prerequisite: Enrollment in the Online M.B.A. program.

## **ACCT 6380 - M.S.A. Intermediate Accounting I**

*Credits: 3*

Theory and techniques for construction of corporate financial reports for use by stockholders, creditors, and other analysts. Prerequisite: Permission of department chair. Restricted to Cox M.S.A. students.

## **ACCT 6495 - Directed Studies in Accounting**

*Credits: 4*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

## **Business Administration**

The E.M.B.A. curriculum has been designed to integrate both management theory and practical skills application in a series of synchronized courses during the 21-month period. The first-year coursework is focused on the acquisition of knowledge, skills and usable expertise in a number of business disciplines. The second-year coursework covers the broader, policy-level aspects of finance, organizational behavior and marketing. Elective courses vary from year to year. The assistant dean of the E.M.B.A. program develops a list of electives from which the students select.

The following required courses are approved by the Cox School of Business faculty for the E.M.B.A. program. The courses are taken in the specified order listed in the curriculum above.

### **BA 6000 - Global Business Environments**

*Credits: 0*

Focuses on developing team based complex problem solving skills in anticipation of participation in consulting projects for BA 6310 trip to global host country.

### **BA 6003 - Presentation Techniques**

*Credits: 0*

Today's dynamic business environment requires managers to demonstrate a high degree of skill as communicators. This interactive class provides students with instruction and hands-on practice in oral communication with an emphasis on structure, visual aids, body language, and vocal elements. At the conclusion of the class, students achieve proficiency in preparation, construction, and delivery of informative, persuasive business presentations, which contribute to future academic and career success.

### **BA 6005 - Strategic Management of Human Capital**

*Credits: 1.5*

The techniques, policies, processes, strategies, and practices used by companies and managers to effectively and efficiently utilize human resources. Students learn how the various core areas of human resource management are aligned to accomplish business objectives and gain a greater appreciation for the importance of human capital for achieving an organization's goals. Examines how the business strategy, legal environment, and design of work affect human resource management. Additionally, because human resource management is becoming less of a functional responsibility and more of a manager's responsibility, the theories and techniques taught in the course are applicable for many positions in a wide variety of organizations.

### **BA 6015 - Executive Leadership**

*Credits: 1.5*

A study of leadership that promotes an academic and practical understanding of the subject. Discusses the similarities and differences between effective management and leadership. Students explore and work on improving basic interpersonal skills related to leadership effectiveness. Investigates thoroughly leadership effectiveness from at least three angles: personal leadership, interpersonal leadership, and organizational leadership. Provides detailed feedback into how others view the student's leadership skills. Promotes the insight required to effectively write a meaningful personal leadership development plan and help develop a personal leadership point of view.

### **BA 6030 - Operations Management**

*Credits: 1.5*

The fields of operations management and information technology and the fundamental concepts and techniques necessary for obtaining world-class performance in these areas. Reviews operations management topics and introduces the way information technology is being used to re-engineer and dramatically improve business processes. Also, analyzes the strategic use of information technology, reviewing such related topics as electronic commerce and knowledge.

### **BA 6039 - Macroeconomics**

*Credits: 1.5*

Contemporary issues in macroeconomics, with special emphasis on monetary policy and financial-side macro issues. Provides students with an understanding of the intersection among the Federal Reserve, the macro-economy, and financial markets and institutions as revealed through contemporary case studies. Emphasizes recent financial innovations and the challenges such innovations pose to the economy, to monetary and regulatory policy, and to private-sector business strategy.

### **BA 6040 - Strategic Cost Analysis**

*Credits: 1.5*

Introduces the strengths and limitations of an organization's accounting system, helping students be more intelligent users of these systems. Emphasis on modern cost management and performance measurement techniques for use within the firm. Discusses the challenges to a manager of selecting and, in some cases, creating the information relevant to his or her day-to-day operating decisions. Uses case analysis as a means of learning to deal with ambiguity often experienced in the workplace.

### **BA 6042 - Digital Strategy**

*Credits: 1.5*

Digital strategy entails specifying an organization's vision, goals, opportunities and initiatives in a way that leverages the increasing digitalization of people, places and things for competitive advantage. A key objective of this course is to provide students with both a practical understanding of Internet technologies, as well as conceptual tools so that they can analyze and critically assess the viability of digital strategies and business models. This is a discussion-rich course in which case studies are paired with readings that provide conceptual frameworks. Topics include blockchain, artificial intelligence (e.g., machine learning, chatbots), the sharing economy, social media, and the Internet of Things. Two or three guest speakers are typically invited to talk about these and other topical issues.

### **BA 6050 - Decision Modeling**

*Credits: 1.5*

An introduction to some of the decision-modeling techniques available for analyzing business problems. Discusses various modeling techniques, including nonlinear programming (optimization), linear programming, integer programming, and simulation. Involves building models for some of the following: monitoring mutual fund managers, managing portfolios, benchmarking organizations, redesigning distribution networks, scoring credit, purchasing subassemblies, stocking retail inventory, and processing checks.

### **BA 6053 - Building and Leading An Innovative Enterprise**

*Credits: 1.5*

Explores the organizational and management requirements that determine the viability of new growth opportunities, with a focus on management of processes that drive innovation and greatly improve the probability of achieving profitable results and a sustainable competitive advantage. Covers new product creation, development, and management topics. Includes lectures, group discussions, case studies, and group projects.

### **BA 6060 - Strategic Financial Statement Analysis**

*Credits: 1.5*

Discusses how to develop a framework for strategically analyzing a firm's financial statements. In this case-based, highly interactive course, students develop this framework via a series of real world cases. The skills developed in this course are useful for a variety of job functions. Corporate managers use FSA to evaluate the success of their strategic decisions and how well they have fared relative to their peers; consultants use FSA to assess a firm's competitive position; analysts rely on financials to make their stock recommendations; banks and other creditors conduct FSA to make credit granting decisions; and investment banks rely on financials for valuation purposes.

## **BA 6065 - Omnichannel Marketing Management**

*Credits: 1.5*

Provides insight and practical guidance on key organizational factors essential to a successful omnichannel business, including executive management support and collaboration with critical functional partners. Supports development of the analytic and application skills needed to successfully market in an omnichannel environment. The course is taught using lectures, cases and exercises to reinforce the information presented. The ultimate goal is to ensure the student is prepared to contribute to a business-building customer experience in a meaningful way.

## **BA 6067 - Customer Engagement Strategy**

*Credits: 1.5*

Explores the importance of Customer Engagement(CE)through a series of senior level corporate speakers who introduce the latest strategic thinking and best practices from their companies. Students will conduct a hands-on Customer Engagement Review of their own companies (or another they choose). Components of the CE Review include customer experience, digital and social marketing, rewards/loyalty programs, metrics/financial analysis, personalization, and listening to customers. The CE Review culminates in recommendations for improving how customers engage with students' companies and their brands, creating customer relationships that profitably drive desired customer behavior and create powerful and lucrative emotional connections.

## **BA 6070 - Global Challenges to America's Future**

*Credits: 1.5*

Provides an overview of the profound challenges facing America in the competitive global marketplace. Major topics include the steep decline of the United States as an industrial power, the changing face of the American workforce, the erosion of America's education advantage over the rest of the world, the disappearance of the middle class, the widening gap between rich and poor, the explosion in the growth of the government, the drift toward socialism, the intense competition among states for jobs, the miracle of Texas, and the economic outlook for the future.

## **BA 6072 - AI and Machine Learning in Business**

*Credits: 1.5*

Artificial intelligence and machine learning are gaining traction in almost all areas of business, from internal operations to the market interface. In the process, firms are having to rethink how they function, how they are structured, their resource planning and their strategies. This course examines all these issues, and provides a framework for reasoning about AI/ML applications in business.

## **BA 6073 - Negotiations**

*Credits: 1.5*

Helps each student develop into a better negotiator. Uses highly interactive classroom dialogue, simulated and real-world negotiations, reading, and reporting on a self-selected negotiation book. Covers how to identify and prepare for various styles of negotiations, along with strategies, tactics, and counter tactics used to accomplish negotiation objectives. Analyzes international, cultural, and gender differences on negotiations, as well the differences in individual and multimember negotiations. Includes opportunities for students to experience these differences. Also, discusses ethical issues arising during negotiations and the use of representatives and mediation to achieve desired negotiation results.

## **BA 6074 - Mergers and Acquisitions**

*Credits: 1.5*

Examines the full cycle of acquisition transactions, from the economic rationale of the proposed deal to valuation, structuring, price negotiation, and pre- and post-transaction integration. Students determine how appropriate acquisition strategies and structure can create value for buying and selling shareholders. The case-based course gives students a greater understanding of the M&A process between companies so they will be in a position to contribute as part of a buy or sell side team, integration team, or advisory group.

## **BA 6077 - Legal Environment of Business**

*Credits: 1.5*

Introduces a number of legal issues common to all businesses and explains of how to mitigate the risk of such disputes, or at least prepare for them. Also, helps students hone their analytical and critical-thinking skills. Does not delve into specialized areas such as securities regulations and environmental laws that may not be relevant to all industries.

## **BA 6079 - Microeconomics**

*Credits: 1.5*

Economics of the firm, demand and supply factors of production, introduction to welfare economics, game theory for decision-making, and applied agency theory in organizations. Also, focuses on how to manipulate formal models, using graphs and other simple mathematical tools.

## **BA 6310 - Global Business Environments**

*Credits: 3*

Focuses on a field experience abroad and gives students the opportunity to meet with local business and government leaders; to visit manufacturing facilities; and to understand the dynamics of global business, including the impact of cultural social customs. Helps students gain a perspective on the opportunities and challenges of conducting business in the global economy.

## **BA 6322 - Financial Accounting**

*Credits: 3*

A focus on American accounting in the private, for-profit sector. Considers as a key issue how American practice impacts the global corporation. Contrasts American practice with international standards and those in Europe and in Japan.

## **BA 6323 - Business Finance**

*Credits: 3*

An examination of topics in finance and investments. Focuses on corporate investment and financing decisions. Examines corporate investment criteria and cash flow estimation, cost of capital and project risk, and capital structure decisions.

## **BA 6324 - Fundamentals of Marketing**

*Credits: 3*

Develops skills that students need to competently implement marketing research projects in the real world. Identifies research as the formal process of gathering information needed by managers to make decisions with respect to marketing opportunities and problems. Analyzes a comprehensive list of marketing issues faced by actual businesspersons, including customer service, pricing, introduction of new products, and other marketing fundamentals.

## **BA 6325 - Organizational Behavior**

*Credits: 3*

An overview of the various perspectives from which individual, group, and organizational behavior can be studied. Emphasizes the development of concepts, insights, and skills needed to effectively manage diverse individuals through a variety of situations in organizations. Includes readings, cases, and simulation to illustrate the conceptual and applied aspects of individual, group, and organizational behavior.

## **BA 6326 - Statistics**

*Credits: 3*

An overview of statistical methodologies, including descriptive statistics, regression analysis, sampling and quality control, forecasting for long- and short-run periods, decision-making under uncertainty, and the use of linear programming. Uses lectures, cases, and statistical computer packages.

### **BA 6331 - Strategic Management**

*Credits: 3*

Covers problems of strategic management in the modern corporation, with a focus on cases of success and failure in developing and executing single- and multibusiness strategies. Uses related readings to underline common dimensions of the cases and to highlight current theoretical concepts, methods, and frameworks.

### **BA 6336 - Entrepreneurship**

*Credits: 3*

The skills required to prepare and present a professional business plan for an entrepreneurial venture and the analytical skills needed to identify and properly evaluate a new business opportunity. Includes exploration of financing options for the entrepreneurial company and development of a financing plan, overview of the venture capital process, interviews with and lectures from practicing entrepreneurs who have sought venture capital, and preparation and presentation of a professional business plan.

### **BA 6352 - Marketing Strategy**

*Credits: 3*

A dynamic view of competitive brand strategy, with a focus on understanding, developing, and evaluating brand strategies during the life of a product market. Includes strategies for pioneering brands, later entrants, strategies for growth, and mature and declining markets. Also, recent topics such as hypercompetition and co-competition. Presents analytical techniques useful for evaluating and implementing strategy, including conjoint analysis, analysis of competitive reaction functions, and diffusion models. Uses a mix of cases and lectures.

### **BA 6375 - Applied Corporate Finance**

*Credits: 3*

Examines the practical application of concepts and tools introduced in earlier finance and accounting courses. Develops the financial knowledge and capabilities that leaders require to successfully guide their organizations through investment, financing, and operational decisions. The primary learning framework is based on case studies of real and simulated business situations. Students become very familiar with spreadsheet analysis, cash flow projections, valuation tools and techniques, capital structuring alternatives, and available sources of capital employed in growing a successful business.

### **BA 6395 - Directed Study**

*Credits: 3*

Student works directly with a professor on a specific project or projects. Credit is based upon evaluation by the professor.

## **Business Administration Exchange**

### **BAEX 6225 - International Exchange Program Concentration Course**

*Credits: 2*

The student attends a school that is part of the M.B.A. exchange consortium. Course hours and grade count toward the student's declared concentration and his/her degree. Restricted to M.B.A. students approved by the Cox Global Programs Office and to M.B.A. students enrolled in the arts management term abroad.

### **BAEX 6226 - International Exchange Program Concentration Course**

*Credits: 2*

The student attends a school that is part of the M.B.A. exchange consortium. Course hours and grade count toward the student's declared concentration and his/her degree. Restricted to M.B.A. students approved by the Cox Global Programs Office and to M.B.A. students enrolled in the arts management term abroad.

### **BAEX 6227 - International Exchange Program at Bocconi University**

*Credits: 2*

Students attend Bocconi University as part of the arts administration curriculum. The course counts as an M.B.A. general elective. Restricted to M.A./M.B.A. students.

### **BAEX 6228 - International Exchange Program at Bocconi University**

*Credits: 2*

Students attend Bocconi University as part of the arts administration curriculum. The course counts as an M.B.A. general elective. Restricted to M.A./M.B.A. students.

### **BAEX 6229 - International Exchange Program**

*Credits: 2*

Students attend a school that is part of the exchange consortium. Restricted to M.B.A. students approved by M.B.A. Global Programs Office.

### **BAEX 6230 - International Exchange Program**

*Credits: 2*

Students attend a school that is part of the exchange consortium. Restricted to M.B.A. students approved by the M.B.A. Global Programs Office.

### **BAEX 6231 - International Exchange Program**

*Credits: 2*

Students attend a school that is part of the exchange consortium. Restricted to M.B.A. students approved by the M.B.A. Global Programs Office.

### **BAEX 6232 - International Exchange Program**

*Credits: 2*

Students attend a school that is part of the exchange consortium. Restricted to M.B.A. students approved by the M.B.A. Global Programs Office.

### **BAEX 6233 - International Exchange Program**

*Credits: 2*

Students attend a school that is part of the exchange consortium. Restricted to M.B.A. students approved by the M.B.A. Global Programs Office.

### **BAEX 6234 - International Exchange Program**

*Credits: 2*

Students attend a school that is part of the exchange consortium. Restricted to M.B.A. students approved by M.B.A. Global Programs Office.

### **BAEX 6235 - International Exchange Program**

*Credits: 2*

Students attend a school that is part of the exchange consortium. Restricted to M.B.A. students approved by M.B.A. Global Programs Office.

### **BAEX 6237 - Global Explorations in Entrepreneurship**

*Credits: 2*

Economies that encourage and embrace entrepreneurship are able to create wealth, economic growth, and stability for their citizens; however, an entrepreneurial ecosystem must be present. Students research and compare and contrast ecosystem trends and dependencies in different global economies, including access to capital, startup assistance, and

education programs. At the conclusion of the course, students propose a new business venture for - and travel to - a host country. Includes exploration of local entrepreneurship hero stories and the entrepreneurship ecosystem within economies around the globe. Prerequisite: Completion of core required courses.

### **BAEX 6238 - Doing Business in Latin America**

*Credits: 2*

Intensive seminar that provides a broad survey on the largest Latin American markets, with a focus on the challenges and opportunities associated with doing business in the most important emerging markets of the region. First, the course examines the social, political, economic, cultural, and financial conditions that pose special challenges for businesses seeking to export to or invest in this region, and then it examines specific concerns with these four countries. The course consists of class sessions on the Dallas campus plus a trip at the end of the course. Prerequisite: Completion of core required courses.

### **BAEX 6239 - Doing Business in the European Union**

*Credits: 2*

This course is an intensive seminar providing a broad survey on the largest European markets. It focuses on the challenges and opportunities associated with doing business in some of the most important markets of the region: London and Paris. The course consists of class sessions on the Dallas campus plus a trip at the end of the course. Prerequisite: Completion of core required courses.

### **BAEX 6240 - Emerging Markets**

*Credits: 2*

Designed for students interested in emerging markets in the global economy. Focuses on countries such as the BRIC countries of Brazil, Russia, India, and China; other countries in South America and Asia; the Persian Gulf states; and South Africa and other emerging African countries, especially Nigeria. During the past 20 years, these nations have increased their participation, qualitatively and quantitatively, in the global capitalist system. Covers economic and institutional perspectives on emerging markets and uses cases to explore specific business problems. Following the sessions in the classroom, students take a weeklong trip to Dubai and Abu Dhabi to visit companies and policymakers. Prerequisite: Completion of core required courses.

### **BAEX 6241 - Doing Business in China**

*Credits: 2*

Introduces the world's largest economy, China, through a series of lectures, readings, and presentations on the history, culture, economics, and business climate of China, followed by a week of meetings and presentations by government officials and business leaders in Hong Kong and Shenzhen. Prerequisite: Completion of core required courses.

### **BAEX 6251 - PMBA International Program at WHU in Koblenz, Germany**

*Credits: 2*

Students enroll in courses at WHU Otto Beisheim Graduate School of Management in Vallendar, Germany, which is a member of the exchange consortium. The program topic is the changing environment for international business in Europe.

### **BAEX 6252 - PMBA International Program at Chinese University of Hong Kong**

*Credits: 2*

Students enroll in courses at the Chinese University of Hong Kong, which is a member of the exchange consortium. The program topic is management in Chinese contexts.

### **BAEX 6255 - PMBA International Program at Tongji University in Shanghai, China**

*Credits: 2*

Students enroll in courses at Tongji University in Shanghai, China, which is member of the exchange consortium. The program topic is doing business in China.

### **BAEX 6256 - PMBA International Program at Indian School of Business, Hyderabad, India**

*Credits: 2*

Students enroll in courses at the Indian School of Business in Hyderabad, India, which is a member of the exchange consortium. The program topic is the business environment in India.

### **BAEX 6257 - PMBA International Program at Bocconi University in Milan, Italy**

*Credits: 2*

Students enroll in courses at Bocconi University in Milan, Italy, which is a member of the exchange consortium. The program topic is doing business in Italy.

### **BAEX 6258 - PMBA International Program at Universidad De Chile in Santiago, Chile**

*Credits: 2*

Students enroll in courses at the Universidad De Chile in Santiago, Chile, which is a member of the exchange consortium. The program topic is the Latin American business environment.

### **BAEX 6259 - PMBA International Program at Central European University in Budapest, Hungary**

*Credits: 2*

Students enroll in courses at Central European University in Budapest, Hungary, which is a member of the exchange consortium. The program topic is doing business in Central Europe.

### **BAEX 6260 - PMBA International Program at Charles University in Prague, Czech Republic**

*Credits: 2*

Students enroll in courses at Charles University in Prague, Czech Republic, which is a member of the exchange consortium. The program topic is doing business in Central and Eastern Europe.

### **BAEX 6431 - International Exchange Program**

*Credits: 4*

Students attend a school that is part of the exchange consortium. Restricted to M.B.A. students approved by the M.B.A. Global Programs Office.

## **Business Law**

More details on course selection and prerequisites are found in the Real Estate, Risk Management and Business Law section and in the course descriptions below.

### **BL 6224 - Managerial Perspectives on Law and the Workplace**

*Credits: 2*

Hones students' ability to recognize, critically assess, and manage many of the significant and recurring legal issues that arise in the employment context. Takes a practical approach in equipping managers to effectively handle workplace issues and mitigate the risk of litigation while simultaneously protecting the business' legal position in the event litigation does ensue. Includes topics such as protecting intellectual property in a competitive environment; strategic principles for designing, drafting, negotiating and administering employment contracts, including noncompete and confidentiality agreements; recent developments in discrimination and sexual harassment law; and the competing interests of the employee's right to privacy and the employer's right to know, such as the content of employees' email messages or what Internet sites they visit. Also discusses the inherent risks in terminating an employee and the use of a release of liability as a risk mitigation device. The format of the class is a combination of lecture, informal class discussion, and case studies.

## **BL 6225 - Legal and Ethical Environment of Business for Accountants**

*Credits: 2*

Provides an in-depth study of the Texas State Board of Public Accounting's Rules of Professional Conduct and the Code of Professional Conduct promulgated by the American Institute of Public Accountants. A concrete understanding of these rules of ethics is necessary for both the practice of public accounting and, prior to that, success on the CPA exam. Also discusses related legal issues, including accounting malpractice and liability to third parties such as the creditors or investors of the accounting client.

## **BL 6274 - Legal Environment of Business**

*Credits: 2*

Provides a managerially relevant platform that (1) embeds legal considerations into mainstream managerial and entrepreneurial strategic development and decision making, (2) identifies a variety of legal tools entrepreneurs and managers can use to manage the firm more effectively during different phases of business development and the business lifecycle, and (3) provides opportunities for students to develop the ability to exercise informed judgement when managing the legal aspects of business. Prerequisite: Enrollment in the Online M.B.A. program.

## **BL 6325 - Ethics and Related Legal Issues for Accountants**

*Credits: 3*

Students learn the ethical and legal requirements of the accounting profession, and the legal risks associated with ethics violations. Covers the provisions of the AICPA Code of Professional Conduct, the Texas State Board of Public Accountancy's Rules of Professional Conduct, and related law. Students hone their analytical reasoning and critical-thinking skills regarding ethics dilemmas and decisions. Prerequisite: Enrollment in the M.S.A. program.

## **Business Economics**

All M.B.A. students take BUSE 6202 as part of the core curriculum. The appropriate prerequisite courses must be successfully completed to enroll in elective BUSE courses. More details on course selection and prerequisites are found in the Strategy, Entrepreneurship and Business Economics section and in the course descriptions below.

### **BUSE 6202 - Managerial Economics**

*Credits: 2*

Examines the basic principles behind the operating and pricing decisions of firms in a market economy. Methods of marginal analysis and optimization are applied as a guide to the business decision-making process. Topics include supply, demand, and market equilibrium. Also, competition, industrial concentration, government regulation, optimal pricing strategies, and economic efficiency.

### **BUSE 6203 - Macroeconomics**

*Credits: 2*

Macroeconomics is the study of aggregate performance, focusing on things such as real output, inflation rates, employment, and interest rates. The course helps students better understand the macroeconomic environment influencing business. Students learn how to interpret macroeconomic indices and explore models that attempt to formulate a unified framework for understanding the macroeconomy. Special attention is given to international economics and current macroeconomic events. Prerequisite or corequisite: BUSE 6202.

### **BUSE 6206 - Uncertainty and Strategic Decision-Making**

*Credits: 2*

Reviews the principles of decision-making under uncertainty and application of those principles to enhance managerial performance. Includes the basic tools of modern game theory, the economics of information, risk aversion, and decision theory. Illustrations and problems are drawn from diverse areas of business practice, including price competition, contract negotiations, auctions and competitive bidding, capacity expansion, and market entry. Prerequisite: BUSE 6202.

## **BUSE 6208 - Special Topics in Energy Economics**

*Credits: 2*

Designed to provide the energy MBA student with an overview of the foundations of economic and financial analysis of the sectors of the energy value chain to prepare them for more advanced energy finance courses covering valuation, risk management, and real options. By exploring the financial and operational metrics, students gain a better knowledge of the different sectors of the oil and gas industry, their unique business cycles, and operational challenges.

Prerequisite: FINA 6201.

## **BUSE 6209 - Energy Private Equity Practicum**

*Credits: 2*

Students work with a professor(s) and a local company, private equity firm, or other investment vehicle in evaluating an energy opportunity or investment. Student may work on valuation, due diligence, risk management, market survey, or other analysis as required by the client. Credit hours may be adjusted to reflect the depth and scope of the assignment. Prerequisites: By invitation and interview only. MSF or MBA students.

## **BUSE 6223 - Game Theory for Business Managers**

*Credits: 2*

Applies and extends the tools of modern game theory introduced in BUSE 6206. Provides a framework for recognizing the basic types of strategic situations that confront management and a systematic approach for identifying effective competitive strategies. Examines the principles of cooperative versus noncooperative behavior, pure versus mixed strategies, reputation building, repeated interaction, first-mover advantage, coordination, and alternative equilibrium outcomes. Prerequisites: BUSE 6202, BUSE 6206.

## **BUSE 6374 - Microeconomics/Macroeconomics**

*Credits: 3*

The first half of the course examines the basic principles behind the operating and pricing decisions of firms in a market economy. Methods of marginal analysis and optimization are applied as a guide to the business decision-making process. Topics include supply, demand, and market equilibrium; competition; industrial concentration; government regulation; optimal pricing strategies; and economic efficiency. The second half of the course focuses on things such as real output, inflation rates, employment, and interest rates and helps students better understand the macroeconomic environment influencing business. Students learn how to interpret macroeconomic indices and explore models that attempt to formulate a unified framework for understanding the macroeconomy. Special attention is given to international economics and current macroeconomic events. Prerequisite: Enrollment in Online M.B.A. program.

## **Business Leadership Institute**

### **BLI 6202 - Business Communications and Development**

*Credits: 2*

Promotes students' professional success as effective communicators and leaders. Covers interpersonal skills and the vital role that ethics, integrity, and trust play in leading a successful business. Develops communication skills necessary for effective career management, business presentations, business writing, and teamwork while increasing their understanding of contemporary business topics. Prerequisite: Enrollment in the M.S.A. program.

## **Entrepreneurship**

More details on course selection and prerequisites are found in the Strategy, Entrepreneurship and Business Economics section and in the course descriptions below. The general expectation, with the exception of the Entrepreneurship, M.S.Ent. program, is that students have completed the core set of required courses prior to enrolling in CISB courses.

## **CISB 6210 - Essential Law for the Entrepreneur**

*Credits: 2*

Provides a broad awareness of and skill in coping with critical legal issues encountered by the entrepreneur building a growth-oriented business, from venture initiation through the expansion stage. Students also develop skills in minimizing exposure to liability and litigation and in working effectively with attorneys and regulators. Topics include contract law, legal entities, governance, intellectual property, e-law and e-litigation, securities law, dispute resolution and litigation management, employment law, and protection of intellectual assets.

## **CISB 6211 - Enhancing Operational Performance for Entrepreneurial Companies**

*Credits: 2*

By successfully managing and directing the operations of his or her fledgling company, an entrepreneur can build a firm capable of withstanding the challenges of an ever-changing marketplace. The course uses lectures and cases to emphasize practical, real-world approaches to operations. Topics include industry and competitor analysis, assessing financial strength, the business model, building the management team, measuring costs, the legal foundation of the business, marketing issues, preparing for the challenges of growth, and growth by acquisition.

## **CISB 6212 - International Entrepreneurship**

*Credits: 2*

Explores complex issues entrepreneurs face in doing business in a global environment and ways to successfully cope with that environment. Uses an international perspective to examine entrepreneurial opportunity identification and evaluation; market analysis and intelligence; joint ventures and partnerships; agents, VAR's and representatives; regulations, laws, and customs; regional and cultural issues; financing foreign ventures; and choice of domestic and international legal entities.

## **CISB 6214 - Law of Financial Transactions for Entrepreneurs**

*Credits: 2*

Explores the issues that determine the proper entity for a business (corporation, partnership, or LLC); the legal and practical issues in funding a business in the startup phase; and the tax, legal, and business issues that determine the proper structure for mergers and acquisitions. Also, how VC funding works and how to negotiate with VCs; the mechanics of stock option plans and how to design them; how to read definitive documents and what to look for; and how the IPO process works.

## **CISB 6216 - Managing the Entrepreneurial Business I**

*Credits: 2*

Focuses on entrepreneurial management and leadership issues in a rapidly changing micro and macro environment. Topics include management of adversity and/or rapid growth, entrepreneurial leadership, and contemporary management theories applied to the entrepreneurial setting.

## **CISB 6217 - Managing the Entrepreneurial Business II**

*Credits: 2*

Addresses legal and financial issues encountered by entrepreneurs trying to professionalize and grow the existing enterprise. Topics include developing visionary skills, protecting intellectual property, and managing rapid change. Also, turnaround strategies and approaches. Prerequisite or corequisite: CISB 6216.

## **CISB 6218 - Managing the Family-Owned and Closely Held Business**

*Credits: 2*

Explores the unique challenges and opportunities involved in owning, building, and managing family-owned and closely held enterprises. Examines key business, personal, and interpersonal issues relevant to the continuity and management of these firms, with a focus on family business systems and family dynamics.

## **CISB 6220 - Social Media for Entrepreneurs**

*Credits: 2*

Equips students with the social media concepts and tools required to make informed decisions and set the direction for their company. Focuses on helping entrepreneurs build and sustain the successful, integrated, digital-media programs required to compete in the connected economy. Topics include leveraging social media, picking the right channel/platform, building a social plan, determining metrics, tracking strategies, creating a strategic differentiator matrix, and understanding social media law. Students learn how to develop buyer persona for a prototype product and how to develop an online go-to-market strategy for a new product launch.

## **CISB 6222 - Starting a Business**

*Credits: 2*

Identifies, qualifies, quantifies, and validates an entrepreneurial opportunity, with the objective of deriving a repeatable, scalable, and profitable business model. Students learn how to take a validated opportunity and create a marketing plan, a financial projection, and an elevator pitch. Uses business modeling tools to develop and refine the business plan.

## **CISB 6223 - Early-Stage Valuation and Fund**

*Credits: 2*

Focuses on securing funding in the early stage of a venture and on using the venture capital method for determining the valuation of the deal. Students learn how to prepare an executive summary, a financial forecast, and an investor pitch to early-stage investors, and to determine the exit valuation. Students gain an understanding of investors' screening methodology, deal metrics, and equity architecture.

## **CISB 6224 - Venture Financing**

*Credits: 2*

Explores evaluating the opportunity, developing the business concept, and assessing and acquiring financial resources. Examines the most important financing concepts for the entrepreneur, including startup, expansion, leveraged buyouts, mergers, and acquisitions. Also, situations where proper venture financing can mean the difference between success and failure.

## **CISB 6225 - Entrepreneurial Exit Strategies: LPO, Sale, IPO, Recapitalization, and Liquidation**

*Credits: 2*

Examines one of the key strategies required of any entrepreneurial venture: how the founders and investors realize the appreciated value of their contributions to the business. Includes in-depth coverage of the strategies and methodologies for each of the major types of exit transactions: leveraged buyouts, the sale of the business, the use of an initial public offering, recapitalization of the firm, and liquidation of the business.

## **CISB 6226 - Evaluating Entrepreneurial Opportunity**

*Credits: 2*

Provides students with the knowledge and skills needed to select viable opportunities and evolve them into high-potential concepts and business models. Topics include identifying and evaluating opportunity, evaluating markets, developing a powerful value proposition, creating a sustainable competitive advantage, developing powerful and successful business models, and evolving an insightful sales forecast.

## **CISB 6228 - Corporate Entrepreneurship: Intrapreneuring**

*Credits: 2*

Detailed examination of the challenges and trade-offs a corporation faces when trying to implement and manage for corporate entrepreneurship. Develops and analyzes key elements for intrapreneurship, success drivers, and business frameworks and models. Topics include the definition of intrapreneurship and comparing and contrasting it with traditional entrepreneurship; the impact of corporate culture, processes, and structures on the rate of innovation and new venture development; international impacts on intrapreneurship; and models for sustaining and adapting corporate

entrepreneurship. An M.B.A. graduate who can innovate and grow new ventures within a corporation can add significant value to the company for which he/she works.

### **CISB 6229 - Blockchain Entrepreneurship**

*Credits: 2*

Introduces students to the basics of blockchain, including the founding history, the ecosystem, the technology model, crypto currencies (such as Bitcoin), new business models, and the ICO (initial coin offering). Students explore current blockchain business models in established corporations as well as in startups. The term project is to write a white paper for a blockchain startup using an ICO to raise capital.

### **CISB 6230 - Teaming with Venture Investors**

*Credits: 2*

Examines business practices and applications that are unique to the venture-funded, early-stage company. Building a fast-growth, venture-backed company is different from building a company using the entrepreneur's own funds or those of friends or relatives. The entrepreneur must be effective working with "smart money." Students learn management techniques, organizational processes, and collaboration models that contribute to success as an entrepreneurial executive in a venture-backed enterprise. Covers what the venture investor looks for; evolution of the entrepreneur's role as the CEO; and board responsibilities, leadership, and behavior. Also, recognizing the key challenges and typical mistakes that lead to failure in the early-stage, venture-backed company and how to prevent them.

### **CISB 6295 - Directed Study in Cisb/Entrepreneurship**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed study credit.

### **CISB 6485 - Directed Study in Cisb/Entrepreneurship**

*Credits: 4*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed study credit.

## **Finance Courses**

All M.B.A. students take FINA 6201 as part of the core curriculum. The appropriate prerequisite courses must be successfully completed to enroll in elective FINA courses. More details on course selection and prerequisites are found in the Finance section and in the course descriptions below.

### **FINA 6201 - Managerial Finance**

*Credits: 2*

An analysis of the basic problems in corporate financial management. The course is organized around the theme of asset valuation. Topics covered include stock and bond valuation, capital budgeting, cost of capital, market efficiency, and company valuation.

### **FINA 6205 - Finance Theory and Practice**

*Credits: 2*

This course examines the tools and concepts that form the core of modern finance theory, with an emphasis on practical applications. Topics include risk measurement and the investor's portfolio optimization problem, asset pricing models, risk-adjusted discount rates, investment under uncertainty, capital structure theory, firm valuation, and an introduction to options pricing. This course must be taken before all other finance electives. Prerequisite: FINA 6201 or currently enrolled in M.S.F. program.

## **FINA 6211 - Valuation and Analysis**

*Credits: 2*

Practical, applied overview of corporate finance that builds upon and reinforces the theoretical and institutional framework covered in introductory business and finance courses. Uses the case approach to apply concepts to real or simulated business situations. Focuses on the valuation of the enterprise. May include financial analysis and financial planning, corporate strategy, capital expenditure analysis, capital structure, or cost of capital determination.

Recommended: FINA 6212 as a sequel course. Prerequisite: FINA 6205.

## **FINA 6212 - Corporate Financial Policies**

*Credits: 2*

Addresses topics in corporate financial management that are more advanced, primarily using the case method of analysis but may be supplemented by mini-lectures. May include corporate restructuring, mergers and acquisitions, capital raising, risk management, project finance, dividend policy, financial distress, real options, or recent advances in theoretical and empirical finance literature. Recommended: FINA 6211. Prerequisite: FINA 6205.

## **FINA 6214 - International Financial Markets**

*Credits: 2*

Provides an overview of the financial environment that globally operating companies and investors operate in. Topics include exchange rate determination and forecasting, international fixed income and equity markets, barriers to international investing and the securities that overcome these barriers, international portfolio home bias, and law and finance. Prerequisite: FINA 6205.

## **FINA 6216 - Portfolio Theory and Asset Pricing**

*Credits: 2*

Covers the theory and applications of risk and return in capital markets. Topics include the measurement of risk, diversification, portfolio theory, asset allocation, CAPM and APT models of asset pricing, and various measures of portfolio performance evaluation that arise from these models. Applications stress the use of portfolio theory and asset pricing models in contemporary investment decisions. Students examine the empirical evidence as it pertains to these theories and practices. Prerequisite: FINA 6201 or enrollment in the M.S.F. program.

## **FINA 6218 - Fixed Income Securities**

*Credits: 2*

Provides an analysis of fixed income securities and interest rate derivatives. Topics include an overview of key bond markets, bond mathematics, theories and models of the term structure of interest rates, evaluation of credit risk, determination of duration, bond portfolio management, and interest rate derivatives. Prerequisite: FINA 6205.

## **FINA 6219 - Derivatives**

*Credits: 2*

Provides an in-depth analysis of forwards, futures, options, and swaps, with a focus on forward futures-option and swap pricing and the use of these instruments to hedge risks and formulate trading strategies. Includes applications to assess and manage risks associated with the energy business. Requires some proficiency in mathematics and statistics.

Prerequisite: FINA 6205.

## **FINA 6222 - Financial Markets and Monetary Policy**

*Credits: 2*

Uses cases dealing with contemporary issues to address the role of the Federal Reserve System in stabilizing the U.S. and international economies. Covers the transmission mechanisms of monetary policy as it influences the cost and availability of credit in financial markets and its impact through financial institutions. Analyzes the changing linkages that stress the equity and fixed income markets rather than the banking system. May include the Fed's role in international crisis management; the complexities of globalization and linked capital markets; the growing international emphasis on price stability as the primary goal of central banks; and the difficulties of dealing with an economy that is

evolving toward a new, high-productivity paradigm characterized by government surpluses and private sector savings shortfalls. Prerequisite: FINA 6205.

### **FINA 6223 - Global Mergers and Acquisitions**

*Credits: 2*

An application-oriented course that draws heavily upon real world change of control case studies. Seeks to apply finance principles and analytical techniques to actual problems likely to be encountered by senior management of major corporations or those who are the advisers to such management in the context of an M&A transaction. Students gain an appreciation for the role that M&A plays in today's corporate landscape and form an opinion as to whether or not an M&A transaction "makes sense" for the firm. At the conclusion of this course, students should expect to gain a level of competency in M&A commensurate with an entry-level investment banking associate in M&A. Whether or not students "practice" M&A, the course affords them an insider's look into what is an undeniable major force on today's corporate landscape. Accordingly, students who are interested in investment banking, consulting, equity research, corporate development, corporate lending, strategic planning, private equity, leveraged finance, or proprietary trading many wish to consider this course. Prerequisite: FINA 6205.

### **FINA 6226 - Quantitative Trading Strategies**

*Credits: 2*

Focuses on designing and implementing trading strategies with controlled levels of risk exposure. Students are exposed to quantitative investing using big-data analysis; arbitrage strategies using statistical techniques; risk management using simulation techniques; and strategy implementation based on market structure and high frequency trading. Mathematical and statistical techniques, with emphasis on financial applications, are covered. Prerequisite: FINA 6205.

### **FINA 6228 - Energy Project Valuation and Finance**

*Credits: 2*

This course focuses on the principal energy sectors, their characteristic investment risks, and common financial strategies. It examines fundamental principles of project valuation, including adjustments for risk and project optionality. The course also explores the methods and implications of nonrecourse financing (project financing) versus corporate financing, and it surveys the major institutions and international organizations that are relevant to energy investment and finance. Prerequisite: FINA 6205 or currently enrolled in the M.S.F. program.

### **FINA 6230 - Practicum in Portfolio Management I**

*Credits: 2*

First of a two-course practicum. Provides real-time money management experience with the Nancy Chambers Underwood portfolio (approximately \$4 million). Tasks involve sector analysis, evaluation of existing securities, analysis and due diligence underlying security transactions into and out of the portfolio, and performance assessment. Students meet 1.5 hours per week during fall term, and they are expected to take FINA 6231 in spring. Admission is by application in the spring term prior to the fall term enrollment, and an application does not guarantee admission.

### **FINA 6231 - Practicum in Portfolio Management II**

*Credits: 2*

Second of a two-course practicum. Provides real-time money-management experience with the Nancy Chambers Underwood portfolio (approximately \$4 million). Tasks involve sector analysis, evaluation of existing securities, analysis and due diligence underlying security transactions into and out of the portfolio, and performance assessment. Students meet 1.5 hours per week during spring term. Admission is by application in the spring term prior to the fall term enrollment for the first course, FINA 6230, and an application does not guarantee admission.

### **FINA 6238 - Financial Modeling**

*Credits: 2*

Presents practical examples and real-world templates and tools used by investment bankers and private equity professionals in 1) financial statement spreading and analysis, 2) valuation (using comparables, precedent transactions, and discounted cash flow analyses) of public and private companies in both minority interest and controlling interest

situations, 3) construction and sensitivity of integrated cash flow models (financial statement projections), 4) analysis and construction of leveraged buyout models, and 5) analysis and construction of merger and acquisition (accretion/dilution) models. Classroom discussions are a blend of lecture and case studies, with case studies involving a hands-on modeling approach by all students. Homework/projects provide additional real-world context and practice for in-class discussions and case studies. Prerequisites: FINA 6205 or currently enrolled in M.S.F. program.

### **FINA 6280 - Directed Studies in Finance**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

### **FINA 6281 - Directed Studies in Finance**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

### **FINA 6430 - Asset and Wealth Management**

*Credits: 4*

Combines hands-on money management of equity and fixed income investments and the survey and application of the asset allocation and portfolio management process. Includes active investment management; student investment presentations; case studies; discussions of current investment topics; the study and applied analysis of different asset classes; and the management of multi-asset portfolios. Admission is by application in the spring term prior to the fall term enrollment; an application does not guarantee admission.

### **FINA 6495 - Directed Studies in Finance**

*Credits: 4*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

## **Information Technology and Operations Management Courses**

All M.B.A. students take ITOM 6202 and 6203 as part of the core curriculum. The appropriate prerequisite courses must be successfully completed to enroll in elective ITOM courses. More details on course selection and prerequisites are found in the Information Technology and Operations Management section and in the course descriptions below.

### **ITOM 6202 - Management Decision Analysis**

*Credits: 2*

Explores how complex business problems can be analyzed, modeled, and solved in an optimal manner. Reviews decision-making under risk and uncertainty; the use and application of decision trees, including the incorporation of utility theory; the use and application of mathematical optimization models, including linear programming, network models, and integer programming; and simulation. Students develop spreadsheet models for making complex business decisions and interpret the results of such models.

### **ITOM 6203 - Operations Management**

*Credits: 2*

Examines the fundamental concepts and techniques necessary for attaining a world-class performance in service and manufacturing operations, using a process management viewpoint to address a variety of strategic and operational issues. Consists of two interlinked modules: 1) process analysis, design, and improvement with exercises and cases to illustrate concepts such as capacity, cycle time, bottlenecks, and theory constraints and 2) improving medium- to long-term operational processes, with topics such as inventory management, supply chain management, and operations strategy. Introduces ways information technology is being used to reengineer and dramatically improve business processes.

## **ITOM 6205 - Digital Strategy**

*Credits: 2*

Specifying an organization's vision, goals, opportunities, and initiatives in order to leverage the increasing digitalization of people, places, and things for competitive advantage entails key objectives of a digital strategy that include building deeper interactions with customers, offering more customized and personalized products and services, making more data-driven decisions, and implementing organizational models and processes that are more flexible and dynamically adjustable to changes in an organization's environment. Provides students with both conceptual tools and an understanding of digital technology so that they can analyze and critically assess the viability of digital strategies intended to create value and competitive differentiation. Prerequisite: ITOM 6202.

## **ITOM 6206 - Business Intelligence**

*Credits: 2*

Covers the design and use of enterprise data management systems for management decision support, such as data warehouses and data marts, multidimensional databases, and OLAP. Students gain hands-on experience with data warehouses and related peripheral systems, as well as data management skills that are essential for successful business analytics in large and medium-size traditional enterprises. Prerequisite: ITOM 6202.

## **ITOM 6207 - Supply Chain Management**

*Credits: 2*

Covers the supply chain from the perspective of a general manager. Students learn how supply chain design and planning decisions impact the performance of the firm as well as the entire supply chain. Each class session is a blend of theory presentation and case discussion, during which some spreadsheet modeling and analysis may be required. Prerequisite: ITOM 6203.

## **ITOM 6208 - Managing Big Data**

*Credits: 2*

Covers data warehouse and big data technologies at the heart of modern enterprise analytics programs. Heavy emphasis is placed on the development of skills required to enable students to be successful in their roles as effective managers of or consumers of business analytics. Topics include grid systems, federated and distributed database systems, and technologies such as Hadoop and MapReduce. Awareness of relational database technologies is important for success in this class. Prerequisite: ITOM 6215 or instructor permission.

## **ITOM 6212 - Data Visualization and Communication**

*Credits: 2*

Students learn how to effectively develop visualization, gather insights, and communicate the results of the business analytics they perform. The course objective is to enable students to learn what data visualization is, the best methods of communicating with data, how to blend data using Alteryx, how to visualize data using Tableau, and how to build insights and communicate these insights through stories. Prerequisite: ITOM 6202.

## **ITOM 6214 - Advanced Management Decision Analysis**

*Credits: 2*

Students gain experience using spreadsheets to model and analyze quantitative business problems. Augments data analysis skills for business analytics in operations, finance, marketing, and strategy. Covers various modeling techniques (e.g., linear programming, nonlinear programming, integer programming, and simulation) and how these techniques can be employed in spreadsheets to improve risk assessment and decision-making in business. Presents spreadsheet design and the use of spreadsheet tools for model analysis (e.g., Visual Basic for Applications). Prerequisites: ITOM 6202.

## **ITOM 6215 - Database Design for Business Applications**

*Credits: 2*

Covers fundamental issues in database creation and design. Starts with mapping data collection in organizations onto a

relational database with the objective of storing data consistently over time. Covers methods for information extraction from databases and generating reports to answer business questions related to the database. Homework assignments and an implementation project reinforce both the design issues and the practical skills covered in the course. Prerequisite: ITOM 6202.

### **ITOM 6217 - Data Mining and Machine Learning**

*Credits: 2*

Examines how companies can leverage machine learning and data mining to gain insights for operational and competitive intelligence. Reviews the use of artificial intelligence (AI) and machine learning (ML) for business applications. Discusses several data mining technologies such as CART, neural networks, clustering, and association-based reasoning, and examines relevant considerations that managers must make in applying these technologies to different types of decision and planning problems. Includes lectures, cases, and hands-on exercises using appropriate software. Prerequisite: ITOM 6202. Prerequisite: ITOM 6202.

### **ITOM 6218 - Business Analytics Consulting**

*Credits: 2*

Organizations are faced with an ever-increasing velocity and volume of data, as well as more and more powerful technologies and sophisticated techniques for analyzing these data. Under these circumstances, a key challenge is to design and develop analytics solutions that provide insights that are perceived as reliable and useful by decision makers. The focus of this class is to identify concepts, methods and conceptual tools that will increase the likelihood of an analytics solution's success with respect to improving organizational performance. Prerequisite: ITOM 6202.

### **ITOM 6219 - Web and Social Media Analytics**

*Credits: 2*

Focuses on social network analysis, including how and why networks form, how network structure impacts platform and product strategies, and how innovation diffuses in such networks. Explores text and data mining, including how to interpret structured, semi-structured, and unstructured user generated content. Discusses web analytics, including what metric to use while measuring a platform's performance in web and social media and how to address challenges such as the attribution problem. Covers the use of analytic tools such as NodeXL, SAS (Text Miner, Sentiment Analyzer), R, Python, and Google Analytics to model, visualize, and understand such network data. Prerequisite: ITOM 6202.

### **ITOM 6220 - Pricing and Revenue Optimization**

*Credits: 2*

Investigates methods and models for increasing revenue by actively managing prices and capacities for the firm (airline, hotel, railroad, rental car, retail sectors, etc.). Covers a broad range of topics, including price optimization (with and without capacity constraints), Littlewood's two-class model (and extensions), the n-class single resource revenue management problem, nested capacity controls, bid price controls, heuristic approaches, network capacity control (multiresource problems), overbooking models, markdown optimization, and assortment optimization. Students learn how to implement all models in spreadsheets. Prerequisites: MAST 6201 and ITOM 6202 or enrollment in the M.S.B.A. program.

### **ITOM 6222 - Business Forecasting**

*Credits: 2*

From forecasting aggregate-level sales to predicting whether a customer will choose a particular product, analytic techniques are used by businesses to make rigorous, data-driven predictions. Students learn to distinguish between trend and seasonality and to utilize both for making forecasts in such areas as sales and operational planning. Explores analytic models such as deterministic time-trend, exponential smoothing, Holt-Winters, autoregressive exogenous, and Box-Jenkins. Covers how to use industry and government metrics and how to present results to management. Prerequisites: ITOM 6202 and MAST 6201, or current enrollment in the M.S.B.A. program.

## **ITOM 6224 - Managing Service Operations**

*Credits: 2*

The service sector represents the largest part of most industrial economies. Industries such as financial services, health care, transportation, hospitality, and communications all face ever-more intense competition and increasing customer expectations based on their operational performance. Students explore the major managerial problems and issues in service sector companies and in the service functions of manufacturing firms, and they use analytical techniques (e.g., process analysis, forecasting, optimization, simulation, and yield management) to explore questions about the strategic service vision, design and delivery of services, capacity and demand management, service quality and productivity, customer service management, technology in service operations, and globalization of services. Provides the language, concepts, insights, and tools to deal with these issues and to gain a competitive advantage. Prerequisites: ITOM 6202, ITOM 6203 or current enrollment in the M.S.B.A. program.

## **ITOM 6225 - Project Management**

*Credits: 2*

Managing projects in a cost-effective and timely manner is one of the most challenging tasks in any organization. Competent project leadership requires understanding how to allocate financial, material, and time-based resources and how to motivate and maintain the project team's focus. Students learn relevant project management skills by examining project decisions. Includes structuring and managing the task and leading the project team in an individual project. Also, aggregate linkages across a portfolio of projects and management of programs, and alliances across firms, project contracting, and open innovation management. Introduces tools and concepts that enable project managers to evaluate, manage, and execute critical functions of any project while ensuring speed, efficiency, and market impact. Prerequisite: ITOM 6203 or enrollment in the M.S.B.A. program.

## **ITOM 6226 - Operations Analytics**

*Credits: 2*

Organizations invest the bulk of their human and financial resources in their operations functions. Operations that are more efficient typically result in better performance. Students study analytical models and techniques to understand the role that analytics and analytical models can play in improving an organization's operational processes. Decision-making under uncertainty is addressed using static stochastic optimization, two-stage optimization with recourse, and sequential decision-making. Uses optimization models to tackle problems in inventory management, revenue management, supply chain management, project management, and new product development. Also, how strategic decisions can be aided by data-driven, analytical models. Covers some core aspects of business strategy, including external analysis, competitor analysis, and opportunity analysis. Prerequisites: ITOM 6202, ITOM 6203 or enrollment in the M.S.B.A. program.

## **ITOM 6231 - Special Topics in Information Technology and Operations Management**

*Credits: 2*

Surveys contemporary issues and trends in the management of information technology, and its use in both operations and competitive markets. Recent topics include IT-enabled organizational change and business process outsourcing and offshoring. Prerequisites: ITOM 6202, ITOM 6203.

## **ITOM 6252 - Decision Models**

*Credits: 2*

Explores how complex business problems can be analyzed, modeled, and solved in an optimal manner. Reviews decision-making under risk and uncertainty; the use and application of decision trees; the use and application of mathematical optimization models, including linear programming, network models, and integer programming; and simulation. Students develop spreadsheet models for making complex business decisions and interpret the results of such models. Prerequisite: Enrollment in the M.S.B.A. program.

## **ITOM 6253 - Programming for Analytics**

*Credits: 2*

This course is an introduction to practical analysis with emphasis on the use of programs and computer packages. The

student will learn the essentials of and demonstrate proficiency in data management including acquisition, storage and access to real world data; Exploratory Data Analysis (EDA); Analytic programming: structured programming in R and Python; introduction to Data Mining. Prerequisite: Enrollment in M.S.B.A. Program.

### **ITOM 6256 - Business Intelligence**

*Credits: 2*

Covers the design and use of enterprise data management systems for management decision support, such as data warehouses and data marts, multidimensional databases, and OLAP. Students gain hands-on experience with data warehouses and related peripheral systems, as well as data management skills that are essential for successful business analytics in large and medium-size traditional enterprises. Prerequisite: Enrollment in the M.S.B.A. program.

### **ITOM 6258 - Big Data Platforms**

*Credits: 2*

Covers Hadoop and Spark, the platforms at the heart of most big data analytics initiatives. Heavy emphasis is on the development of skills required for students to be successful as analysts. Students attempt a professional certification as a demonstration of their newly developed skills. Prerequisites: Enrollment in the M.S.B.A. program and knowledge of SQL and Python.

### **ITOM 6264 - Advanced Management Decision Analysis**

*Credits: 2*

Students gain experience using spreadsheets to model and analyze quantitative business problems. Augments data analysis skills for business analytics in operations, finance, marketing, and strategy. Covers various modeling techniques (e.g., linear programming, nonlinear programming, integer programming and simulation) and how these techniques can be employed in spreadsheets to improve risk assessment and decision-making in business. Presents spreadsheet design and the use of spreadsheet tools for model analysis (e.g., Visual Basic for Applications). Prerequisites: Enrollment in the M.S.B.A. program and ITOM 6252.

### **ITOM 6265 - Database Design for Business Applications**

*Credits: 2*

Covers fundamental issues in database creation and design. Begins with mapping data collection in organizations onto a relational database with the objective of storing data consistently over time. Covers methods for information extraction from databases and generating reports to answer business questions related to the database. Homework assignments and an implementation project reinforce both the design issues and the practical skills covered in the course. Prerequisite: Enrollment in the M.S.B.A. program.

### **ITOM 6267 - Data Mining**

*Credits: 2*

Examines how companies can build models to gain knowledge and insights for operational and competitive intelligence from their data resources. Surveys several data mining technologies such as machine learning, neural networks, clustering, and association-based reasoning and examines relevant considerations that managers must make in applying these technologies to different types of decision and planning problems. Includes lectures, cases, and hands-on exercises using appropriate software. Prerequisites: Enrollment in the M.S.B.A. program and ITOM 6252.

### **ITOM 6268 - Business Analytics Consulting**

*Credits: 2*

Focuses on identifying concepts, methods, and conceptual tools that will increase the likelihood of an analytics solution's success with respect to improving organizational performance. Prerequisite: Enrollment in the M.S.B.A. program.

### **ITOM 6269 - Web and Social Media Analytics**

*Credits: 2*

Focuses on social network analysis, including how and why networks form, how network structure impacts platform and product strategies, and how innovation diffuses in such networks. Explores text and data mining, including how to interpret structured, semi-structured, and unstructured user generated content. Discusses web analytics, including what metric to use while measuring a platform's performance in web and social media and how to address challenges such as the attribution problem. Covers the use of analytic tools such as NodeXL, SAS (Text Miner, Sentiment Analyzer), R, Python, and Google Analytics to model, visualize, and understand such network data. Prerequisite: Enrollment in the M.S.B.A. program.

### **ITOM 6285 - Directed Studies in Information and Operations**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

### **ITOM 6295 - Directed Studies in Business Analytics**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. The student must submit a proposal to a professor for directed study credit.

### **ITOM 6410 - Business Analytics Practicum**

*Credits: 4*

A semester-long course that enables students to understand the complexities of a complete analytics project and the major components of the system development life cycle (SDLC) and agile analytics development. Students work with real companies to understand their business analytics challenge and, using real data, apply the academic concepts, including the analysis of the business needs which they have learned in the classroom, to build an analytic system for the company. Prerequisite: Enrollment in the M.S.B.A. program.

### **ITOM 6485 - Directed Studies in Information and Operations**

*Credits: 4*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

### **ITOM 6495 - Directed Studies in Business Analytics**

*Credits: 4*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. The student must submit a proposal to a professor for directed study credit.

## **Managerial Statistics Courses**

All M.B.A. students take the managerial statistics course MAST 6201 as part of the core curriculum.

### **MAST 6201 - Managerial Statistics**

*Credits: 2*

This course provides an overview of statistical methodologies and applications. It includes probability applications, hypothesis testing, simple and multiple regression analysis, sampling, quality control, and forecasting. The course is taught using lectures, cases, and Excel programs and spreadsheets.

### **MAST 6251 - Applied Predictive Analytics I**

*Credits: 2*

From forecasting aggregate-level sales to predicting whether a customer will choose a particular product, analytic

techniques are used by businesses to make rigorous, data-driven predictions. This course explores analytic methods such as logistic regression, instrumental variable regression, and simultaneous equation models. Students learn to distinguish between trend and seasonality and to utilize both for making forecasts in such areas as sales and operational planning. Prerequisite: Enrollment in the M.S.B.A. program.

### **MAST 6252 - Applied Predictive Analytics II**

*Credits: 2*

Applies fundamental concepts of probability to data analysis and forecasting. The methodological focus is on both maximum likelihood and Bayesian approaches to statistical inference. Particular attention is placed on count, choice, and timing models, with heterogeneous latent variables. Applications are drawn from a wide range of business settings such as new product forecasting, customer retention and lifetime value modeling, and market segmentation.

Prerequisite: Enrollment in the M.S.B.A. program.

### **MAST 6258 - Business Metrics**

*Credits: 2*

Introduces different metrics used across all business activities (e.g., marketing operations, finance), including financial statements, profit/loss analysis, and key business and economic concepts for the firm. Prerequisite: Enrollment in the M.S.B.A. program.

### **MAST 6275 - Introduction to Data Analysis I Experiential Learning Project**

*Credits: 2*

Develops a fundamental understanding of data and its applications to business. Focuses on solving problems, including recognizing which statistical methodology to use and applying the methodology. Students become comfortable with statistical methods for analyzing data and learn how to use statistics to help make better business decisions. These goals are achieved by discussing/solving problems in class and by working similar problems for homework. Many of the courses students take during the MBA program use and build on the statistical techniques covered in this class.

Prerequisite: Enrollment in Online MBA Program. Corequisite:MAST 6474.

### **MAST 6474 - Introduction to Data Analysis I**

*Credits: 4*

Develops a fundamental understanding of data and its applications to business. Focuses on solving problems, including recognizing which statistical methodology to use and applying the methodology. Students become comfortable with statistical methods for analyzing data and learn how to use statistics to help make better business decisions. These goals are achieved by discussing/solving problems in class and by working similar problems for homework. Many of the courses students take during the MBA program use and build on the statistical techniques covered in this class.

Prerequisite: Enrollment in Online MBA Program.

### **MAST 6478 - Data Analytics**

*Credits: 4*

Develops a fundamental understanding of data and its applications to business. Focuses on solving problems, including recognizing which statistical methodology to use and applying the methodology. Students become comfortable with statistical methods for analyzing data and learn how to use statistics to help make better business decisions. These goals are achieved by discussing/solving problems in class and by working similar problems for homework. Many of the courses students take during the MBA program use and build on the statistical techniques covered in this class.

## **Marketing Courses**

All M.B.A. students take MKTG 6201 as part of the core curriculum. The appropriate prerequisite courses must be successfully completed to enroll in elective MKTG courses. More details on course selection and prerequisites are found in the Marketing section and in the course descriptions below.

## **MKTG 6201 - Marketing Management**

*Credits: 2*

Introduces common marketing problems encountered by marketing managers and general managers. Emphasizes the analysis and development of the organization's marketing policy, strategy, and tactics, with a global perspective of business. Students develop a disciplined process for addressing marketing issues and challenges.

## **MKTG 6204 - Consumer Behavior**

*Credits: 2*

Students study why people buy what they buy. Includes in-depth examination of consumer decision-making processes and factors that influence those processes. Also, how people make product-related decisions and the information used to make those decisions. Uses a consumer-psychology perspective and shows how that perspective can be applied to business. Prerequisite: MKTG 6201 or enrollment in the M.S.B.A. program.

## **MKTG 6205 - Customer Insights and Market Intelligence**

*Credits: 2*

Demonstrates how firms can gain insights about a product market and its customers and competitors by using primary data from surveys and qualitative research as well as secondary data from syndicated sources and scanner data. Such insights form the basis for making sound marketing decisions related to product, price, place, and promotions. Emphasis is placed on quantitative and qualitative analytical approaches to inferring insights. Topics include the dashboard and drilldown approach, marketing metrics, and market dynamics analysis. Also, insights from attitudinal, behavioral, and online data. Includes lectures, data analysis exercises, and projects. Prerequisite: MKTG 6201 or enrollment in the M.S.B.A. program.

## **MKTG 6206 - Marketing Mix Implementation**

*Credits: 2*

This course integrates customer, consumer, collaborator, and company analysis; segmentation, targeting, and positioning choices; and marketing mix decisions using a computer simulation format that spans several years. Students are assigned to groups, with each group representing a firm. Each firm competes with other firms in the market over several rounds (years) and makes marketing decisions to achieve the company's objectives. This dynamic game prepares students to make, modify, and implement marketing decisions over time. Prerequisite: MKTG 6201.

## **MKTG 6212 - Advanced Marketing Communications Management**

*Credits: 2*

This course reviews and integrates basic promotional tools, including advertising and sales promotion. Class lectures provide the background necessary for understanding marketing communications and developing an advertising campaign. Students then work and compete in teams developing and presenting their campaign ideas for marketing a brand. Prerequisite: MKTG 6204.

## **MKTG 6214 - Advanced Pricing Management**

*Credits: 2*

This course deepens students' understanding of the pricing component of the marketing mix. Emphasis is placed on analysis, development, and implementation of pricing as a key component of the organization's marketing strategy and tactics. The goal of this course is to develop a disciplined process for addressing pricing issues, problems, and opportunities in a variety of settings, and to integrate knowledge acquired in marketing and other business courses. Prerequisite: MKTG 6201.

## **MKTG 6215 - Advanced Product and Brand Management**

*Credits: 2*

Focuses on strategic issues and decisions germane to the management of consumer products and brands. Includes product market structure, category management, product life cycle and product line strategy, brand equity, brand

growth strategies, and financial valuation of brands. Integrates lecture, discussion, and case analysis, with a focus on student case presentations. Prerequisite: MKTG 6201.

### **MKTG 6218 - Multichannel Marketing Management**

*Credits: 2*

The evolution of social media, tablets, and smartphone technologies equips today's consumer with access to information across multiple platforms and to their friends and associates who can provide instant feedback along the purchase process. Marketers must create touchpoints with their loyal and prospective consumers so they are available, on call, to respond to the needs of those consumers. This ability involves the integration of bricks and mortar, social media, the Internet, and all manner of personal communication devices. The course surveys these myriad touchpoints in conjunction with all the distribution systems used to get products and services to consumers in the U.S. and around the world. Includes lectures, cases, and exercises to reinforce the information presented in the course. Prerequisite: MKTG 6201.

### **MKTG 6222 - New Product Development**

*Credits: 2*

Provides students with a better understanding of the new product development process, highlighting the inherent risks and different strategies for overcoming them as more than 40 percent of the new products that are launched each year eventually fail in the marketplace. The course emphasizes understanding the interplay between creativity and analytical marketing research throughout the development process, focusing special attention on issues related to the "fuzzy front end." It examines the process of designing and testing new products by using a combination of lectures, cases, and a project. Prerequisite: MKTG 6201.

### **MKTG 6223 - Understanding What Customers Value**

*Credits: 2*

Determining what is valued by customers is perhaps the most important issue facing marketing managers. Recently, conjoint and choice models have become popular techniques to help marketing managers understand what customers value in terms of the importance placed on specific product features and services. The course includes a variety of preference models used by brand managers and marketing analysts to give students hands-on experience with conjoint and choice modeling techniques, and examines these marketing decisions using a combination of lectures, cases, and exercises. Prerequisite: MKTG 6201 or enrollment in the M.S.B.A. program.

### **MKTG 6224 - Research for Marketing Decisions**

*Credits: 2*

Marketing research is the formal process of gathering information needed by managers to make decisions with respect to marketing opportunities and problems. This course develops skills in the following areas so students can competently implement decision-oriented marketing research projects in the real world: 1) translate a business decision into a research problem, 2) choose an appropriate research design, 3) collect secondary data using the Internet and other sources, 4) conduct exploratory research using focus groups, etc., 5) construct an effective data collection instrument (questionnaire design), 6) select a cost-effective sampling plan, 7) collect and analyze data using spreadsheets or statistical packages, and 8) recommend decisions based on the analysis. Prerequisite: MKTG 6201.

### **MKTG 6225 - Retailer Behavior and Sales Promotion**

*Credits: 2*

The vast majority of consumer expenditures, which represent more than \$5 trillion and 68 percent of the U.S. gross domestic product, are made through retailers. Moreover, the average consumer product company spends as much on trade promotions (such as promoting its products to retailers) as it does on media advertising and consumer promotions combined. These facts highlight the importance of retailer behavior and sales promotions in consumer marketing. This course takes the retailer's point of view, exploring strategic and tactical decision-making by assessing the impact of these decisions on both consumer shopping behavior and the retailer's own operating costs. Students explore issues in sales promotion, pricing, product mix, and store location to gain an understanding of consumer response in these areas.

The course is useful to students who plan to work in retailing, consumer marketing, brand or product management, or sales and distribution. Prerequisite: MKTG 6201.

### **MKTG 6226 - Advanced Marketing Strategy**

*Credits: 2*

The course focuses on the strategic marketing choices made by top management that have a significant influence on an organization's performance and competitive success. These choices include selecting markets in which to compete, defining and choosing which customer needs to address, developing meaningfully distinct offerings and programs, deciding on how to access a market, and addressing issues of timing and pace of strategy execution. The pedagogy for this course consists of class discussion on key strategic issues, as well as case analysis that describes classic marketing situations faced by top management in a variety of industries. Prerequisite: MKTG 6201.

### **MKTG 6227 - Global Marketing Management**

*Credits: 2*

This course examines the major marketing issues and opportunities facing companies that sell products outside their domestic markets. Students learn the theories and strategies that guide marketing in foreign environments as well as the analytical tools required in practicing global marketing. The emphasis of the course is on decisions companies make about product, price, place, and promotion in foreign markets. In the process, students learn about economic, political, cultural, and legal differences among nations as they affect marketing opportunities and operations. Prerequisite: MKTG 6201.

### **MKTG 6230 - Customer Engagement and Loyalty Management**

*Credits: 2*

Explores the key principles, metrics, tactics, and strategies of engaging customers in order to drive customer loyalty and value. Balancing creative thinking skills with analytical competence, students identify opportunities to make existing customer relationships dramatically more profitable with the goal of engineering customer behavior change. Built on a model of customer engagement (CE), students learn to evaluate the effectiveness of CE programs across industries and promote business practices that build relationships, create the right incentives to drive desired behavior change, and employ the best tactics and strategies to drive incremental profit from your customer base. Includes case analysis, lectures, corporate speakers, and hands-on interactive exercises. Prerequisite: MKTG 6201.

### **MKTG 6232 - Digital and Social Media Marketing**

*Credits: 2*

Digital and social media (Facebook, Twitter, Foursquare, etc.) present managers and marketers with new tools for connecting and building relationships with consumers. Developments of the last decade have changed the practice of marketing more than at any time since the advent of television. This course examines how corporations are using these platforms to build digital marketing and Web branding strategies in business and identifies techniques and frameworks to generalize from these practices. The course covers strategies for building consumer relationships through social media that lead to strong financial performance while also building trust with the brand. The course also examines how digital and social media are used as promotion tools and how these strategies are integrated with key elements of the marketing mix - product, price, and placement. The course features real-life business scenarios and case study analysis from marketing leaders and big-name brands. Prerequisite: MKTG 6201.

### **MKTG 6233 - Nonprofit Marketing Strategy**

*Credits: 2*

Introduces strategic management and marketing of the nonprofit or nongovernmental organization with a global perspective. Explores how NPO management and marketing strategy are critical to the survival and stabilization of humanity and the environment. Using case studies of NPOs worldwide, students examine strategic orientation, stakeholder theory, identity management, funding management, segmentation, strategic alliances, financial management, and entrepreneurship. Includes a comprehensive look at how NPOs are organized, how they manage their various stakeholder relationships for maximum impact, and how they can lead social change. Prerequisite: MKTG 6201.

## **MKTG 6234 - Managerial Decision Making**

*Credits: 2*

Focuses on managerial decision making. Discusses concepts, theories, and findings from behavioral science (e.g., social and cognitive psychology, behavioral economics, consumer research, behavioral finance) that provide insights into how actual decision making differs from the traditional rational-decision-maker model. Examines how these behavioral findings can be leveraged to improve one's decision making abilities as a manager across a wide range of contexts. Prerequisite: MKTG 6201.

## **MKTG 6236 - Practicum in Customer Engagement and Loyalty**

*Credits: 2*

Provides hands-on customer engagement experience through a consulting project for one or more corporations, applying concepts, metrics, strategies, and tactics of customer engagement to drive loyalty and profit. Through the consulting project, students analyze real-time customer data using regression and summary statistics, calculate customer lifetime value for individual customers, then segment customers based on CLVs. In a final group presentation to corporate sponsors of the project, students draw customer insights from their analyses and propose strategic and tactical recommendations for profitable growth. Prerequisite or corequisite: MKTG 6230.

## **MKTG 6238 - Advanced Customer Engagement Practicum**

*Credits: 2*

In this capstone course, Customer Engagement (CE) students work directly with a company to either evaluate and redesign an existing CE program or to design and implement a new CE program. Students consider CE opportunities from both the company's and the customer's perspective, articulate goals for desired customer behavior change, identify customer segments offering the greatest profit potential, evaluate the competitive landscape, develop a strawman CE program design, conduct qualitative and quantitative research to measure customer receptivity, quantify the financial impact, and build a business case (including a communications plan featuring digital/social/traditional media) for implementing the proposed CE program. This course is a requirement to earn the specialization in Customer Engagement for those concentrating in Marketing. Prerequisite: MKTG 6230. MKTG 6224 and/or MKTG 6236 are recommended.

## **MKTG 6255 - Directed Studies in Marketing**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

## **MKTG 6258 - Business Metrics**

*Credits: 2*

Introduces different metrics used across all businesses activities (e.g., marketing operations and finance), financial statement and profit/loss analysis, and key business and economic concepts for the firm. Prerequisite: Enrollment in the M.S.B.A. program.

## **MKTG 6273 - Customer Value and Pricing Analytics**

*Credits: 2*

Delivering customer value is an important objective for long-run market success. To deliver value, however, requires that the firm understands the extent to which the quality it delivers is aligned with the price it charges. This course focuses on methodologies that will allow firms to better understand the importance consumers place on product and service features and the role of price in driving customer value. In this hands-on course, students become comfortable in using a variety of trade-off protocols and in designing conjoint and choice model experiments, and they gain a firm understanding of how to design, implement, and analyze conjoint and choice studies and how to use simulators that provide a platform for analyzing current and future product and pricing decisions. Students also become familiar with the primary commercially available software for implementing these modeling techniques. Prerequisite: Enrollment in the M.S.B.A. program.

## **MKTG 6274 - Business Research Methods**

*Credits: 2*

Students develop skills in business research (the formal process of gathering information needed by managers to make decisions) so they can competently implement decision-oriented business research projects in the real world. Skills include translating a business decision into a research problem, choosing an appropriate research design, collecting data from secondary and primary data sources (e.g., survey research, experimental design, and focus groups), analyzing data using spreadsheets or statistical packages, and recommending decisions based on the analysis. Prerequisite: MKTG 6201 or enrollment in the M.S.B.A. program.

## **MKTG 6279 - Multivariate Analysis for Marketing**

*Credits: 2*

Covers multivariate statistical techniques, including cluster and discriminant analysis, factor and principal component analysis, multidimensional scaling, perceptual mapping, experimental design, and variance techniques analysis used to understand customers and competitors, to select target markets, to provide specialized offerings, and to choose the various elements of a marketing mix. Emphasis is on application of these techniques to real-world marketing problems. Prerequisite: Enrollment in the M.S.B.A. program.

## **MKTG 6284 - Retailing Analytics**

*Credits: 2*

Consumer expenditures, which comprise nearly 70 percent of the U.S. gross domestic product, are made primarily through retailers. The sheer size of the retail sector highlights the importance of measuring and understanding the impact of retailers' decisions. Students analyze retail decisions in terms of their impact on consumer demand and retailer performance, with a focus on retail pricing, promotion and inventory management, and retail competition. The overriding objective is to use point-of-sale data, in various forms, to improve retail decision-making. Prerequisites: MAST 6201 and MKTG 6201, or enrollment in the M.S.B.A. program.

## **MKTG 6455 - Directed Studies in Marketing**

*Credits: 4*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed studies credit.

## **Management Courses**

<i>Program</i>	<i>Required Courses</i>
Full-time M.B.A.	MNGT 6011, 6020, 6101, 6103, 6150, 6210
Fast Track M.B.A.	MNGT 6001, 6003
P.M.B.A.	MNGT 6003 (MNGT 6001, an optional course, <i>must</i> be completed prior to using on-campus recruiting options)
M.S.B.A.	MNGT 6003, 6101
M.S.F.	MNGT 6004
M.S.M.	MNGT 6005
M.S.S.M.	MNGT 6103

## **MNGT 6001 - Managing Your Career**

*Credits: 0*

Professional M.B.A. students gain the knowledge and tools to effectively manage their own careers. Topics include finding a career focus, exploring career options, building and leveraging a professional network, and developing a personal marketing plan. Students who complete the course use the services of the Career Management Center.

### **MNGT 6003 - Business Presentation Techniques**

*Credits: 0*

Today's competitive marketplace demands that managers be successful on both a technical and an individual level, exhibiting a high degree of leadership skills. Professional M.B.A. students gain proficiency in the oral presentation techniques needed to enhance academic and career success. This required course is graded on a pass/fail basis.

### **MNGT 6004 - Managing a Career**

*Credits: 0*

Students gain the knowledge and tools needed to effectively manage their own careers. Topics include finding a career focus, exploring career options, building and leveraging a professional network, and developing a personal marketing plan. Reserved for M.S. in finance majors.

### **MNGT 6005 - Managing a Career**

*Credits: 0*

Students gain the knowledge and tools needed to effectively manage their own careers. Topics include finding a career focus, exploring career options, building and leveraging a professional network, and developing a personal marketing plan. Reserved for M.S. in management majors.

### **MNGT 6011 - Managing Your Career, Part Two**

*Credits: 0*

Builds on the knowledge and tools developed in MNGT 6101 to assist students in obtaining the required graduate corporate internship for the summer term. Required course in the full-time M.B.A. program; graded pass/fail. Prerequisite: MNGT 6101.

### **MNGT 6020 - First-Year Foundations**

*Credits: 0*

Students participate in various required activities to enhance their professional development. The sessions will take place most Fridays during the first year of the M.B.A. program. Required course in the full-time M.B.A. program; graded pass/fail.

### **MNGT 6050 - M.B.A. Internship**

*Credits: 0*

Optional course for students in the full-time or professional M.B.A. program who are not attending as an international student on an F1 visa. Provides compensated or noncompensated career experience related to a student's degree goals. Graded pass/fail. Does not meet SMU's International Student and Scholar Services curricular practical training standards. Prerequisite: Completion of core required courses.

### **MNGT 6101 - Managing Your Career**

*Credits: 1*

Full-time M.B.A. students gain the knowledge and tools to effectively manage their own careers. Topics include finding a career focus, exploring career options, building and leveraging a professional network, and developing a personal marketing plan.

### **MNGT 6103 - Business Presentation Techniques**

*Credits: 1*

Today's competitive marketplace demands that managers be successful on both a technical and an individual level, exhibiting a high degree of leadership skills. Full-time M.B.A. students gain proficiency in the oral presentation techniques needed to enhance academic and career success. Graded pass/fail.

### **MNGT 6150 - Graduate Corporate Internship Program**

*Credits: 1*

Required course for students in the full-time M.B.A. program during the third (summer) term in the program. Provides compensated or noncompensated career experience related to a student's degree goals. Graded pass/fail. Meets SMU's International Student and Scholar Services curricular practical training standards.

### **MNGT 6161 - Graduate Corporate Internship Program**

*Credits: 1*

A one-credit hour, pass/fail, one semester long optional course for students enrolled full time in one of our M.B.A. programs. Provides compensated or non-compensated M.B.A. career experience related to the students' degree goals. Students may work between 10 hours (minimum) and 20 hours (maximum) per week while school is in session. This internship meets the Curricular Practical Training standards set forth by the University's International Student Office. Prerequisites: Completion of all core required courses, minimum GPA of 3.2. May be taken twice.

### **MNGT 6162 - Graduate Corporate Internship Program**

*Credits: 1*

A one-credit hour, pass/fail, one semester long optional course for students enrolled full time in one of our M.B.A. programs. Provides compensated or non-compensated M.B.A. career experience related to the students' degree goals. Students may work between 10 hours (minimum) and 20 hours (maximum) per week while school is in session. This internship meets the Curricular Practical Training standards set forth by the University's International Student Office. Prerequisites: Completion of all core required courses, minimum GPA of 3.2. May be taken twice.

### **MNGT 6210 - Global Leadership Program**

*Credits: 2*

An experience abroad in which students meet with local business and government leaders; visit manufacturing facilities; and come to understand the dynamics of global business, including the impact of cultural and social customs. Provides students with a perspective on the opportunities and challenges of conducting business in the global economy.

### **MNGT 6275 - Global Immersion**

*Credits: 2*

Explores organizations and the methods they use to accommodate, and even exploit, ambiguity in their business and social environment to enhance opportunities and to find and take advantage of competitors' weaknesses. Prerequisite: Enrollment in the Online MBA Program.

### **MNGT 6277 - Domestic Immersion**

*Credits: 2*

Explores organizations and the methods they use to tie data to real strategy, providing opportunities to discern new opportunities and even create opportunities where other competitors would be experiencing constraint. Prerequisite: Enrollment in the Online MBA Program.

## **Management and Organizations Courses**

All M.B.A. students take MNO 6201 as part of the core curriculum. The appropriate prerequisite courses must be successfully completed to enroll in elective MNO courses. More details on course selection and prerequisites are found in the Management and Organizations section and in the course descriptions below.

### **MNO 6201 - Organizational Behavior: Managing and Leading People**

*Credits: 2*

Strengthens the skills students need to become effective leaders. Topics include transitioning successfully from individual contributor to effective leader, motivating others for peak performance, identifying traps that prevent effective decision-making, acquiring skills to manage conflict, identifying strategies for becoming a person of influence, and navigating through dilemmas associated with performance management.

## **MNO 6202 - Leading Teams and Organizations**

*Credits: 2*

Provides students the analytical and behavioral tools necessary to effectively develop and utilize groups of people to accomplish organizational strategies and goals. Describes critical theories, concepts, and contemporary practices to successfully identify the threats and opportunities teams face and take action to improve organizational culture and structure. Provides insight into the key factors that separate successful teams from the many that fail. Explains how to harness the power of teams, relational dynamics, and organizational systems to drive firm performance and innovation. Required for the management concentration. Prerequisite: MNO 6201.

## **MNO 6210 - Leader as Coach**

*Credits: 2*

Students learn coaching skills in the context of being a leader. Research indicates the more coach-like the leaders, the more successful the organizations they lead. A leader as coach develops and enables a team by using specific coaching skills to promote development and results. This highly experiential course teaches coaching skills, provides a lab environment for practice, and explores research on the most successful leadership styles. A significant portion of the course grade is class participation; therefore, attendance is critical for successful completion of the course. Because each class session builds on the previous class meetings, students should schedule this course when they are confident they can be present for all class sessions. Prerequisite: MNO 6201.

## **MNO 6212 - Introduction to Consulting**

*Credits: 2*

This practical and applied course in consulting covers topics such as defining an effective consultant, understanding client needs, and implementing change. Also, strategic approaches to marketing, data gathering techniques, and tactics for ending an engagement. Requires students to develop an action plan. Prerequisite or corequisite: MNO 6201.

## **MNO 6214 - Strategic Management of Human Capital**

*Credits: 2*

The success or failure of most organizations depends on their ability to utilize two types of capital effectively: financial and human. While organizations must have a core value proposition at the heart of the enterprise, be it a service or a product that it provides to its customers, they depend upon the effective leadership, management, and execution by individuals and teams to deliver that value proposition in a profitable way. Provides insights into the link between people and business results and into the ways companies manage talent to improve performance. Students gain an understanding of how to lead teams, how to start and build a company, and how to support their own careers. The ability to manage people effectively to achieve superior business results is a leadership differentiator. In an increasingly competitive and global business environment, hiring, developing, engaging, and retaining strategically relevant talent is a critical competitive advantage. Students consider how to apply a range of best practices to their own organization's business needs. Prerequisite: MNO 6201.

## **MNO 6215 - Master Negotiation**

*Credits: 2*

Provides the conceptual foundation and basic tools needed to negotiate like a master negotiator - the elite class of negotiators who are most capable of obtaining substantial value through negotiation. Master negotiators use a flexible set of strategies that allow them to be proactive and reactive, to partner with the other party by increasing their value and decreasing their costs and options for going elsewhere, and to make the process a pleasant one. Prerequisite or corequisite: MNO 6201.

## **MNO 6218 - Leadership in a Complex World**

*Credits: 2*

Addresses the challenges of leading in today's complex environments. Students learn how changing business contexts are placing new demands on leaders for innovation, adaptability, learning, and growth. Specific focus will be on how today's societal, technological, and global forces require different ways of conceptualizing and practicing leadership as well as the role of integrity, ethics, and inclusion. Prerequisite: MNO 6201.

## **MNO 6219 - People and Organizational Analytics**

*Credits: 2*

Equips students with analytical skills for employing data, scientific methods, and sophisticated analyses to address people-related issues, such as selection, job design, talent development, performance evaluation, engagement, and retention. Examines how and when to use and collect hard data to inform people issues and help achieve organizational goals. Explains techniques for linking people-oriented metrics to business strategies and organizational performance to maximally leverage a firm's human capital to sustain competitive advantage. Prerequisite: MAST 6201.

## **MNO 6220 - Corporate Governance**

*Credits: 2*

Students learn how to make informed decisions about corporate governance issues. Highlights critical governance issues, including ethical behaviors and communications. Topics include evaluating board roles, understanding the attributes of effective boards, and evaluating and rewarding board effectiveness. CEOs from the community participate in the course. Prerequisite: MNO 6201 or enrollment in the M.S.A. program.

## **MNO 6222 - Leading Organizational Change**

*Credits: 2*

Successful leaders understand when change is needed and are able to guide the people they lead through the change process. This course focuses on important change models and change tactics that leaders can use to make their organizations more effective and enable them to flourish. Students develop critical insights into when particular approaches are likely to be effective as well as how to recognize and address potential barriers to implementing various change leadership tactics. Prerequisite: MNO 6201.

## **MNO 6230 - The Evolution of American Capitalism and the Global Challenges Ahead**

*Credits: 2*

Provides an analysis of America's decline as an industrial power and the explosion of manufacturing in developing and emerging markets, expansions and contractions in the U.S. economy since the Great Depression and the economic outlook for the future, the changing face of the American workforce and its dwindling education advantage in the global marketplace, growing inequality in the U.S. economy and the widening gap between rich and poor, winners and losers in the American marketplace as a result of competitive global pressures, the impact of growth in government spending and rising taxation on global job creation, and the explosion in population and consumption in developing and emerging markets and the impact on the U.S. economy.

## **MNO 6232 - Ethical Leadership and Corporate Social Responsibility**

*Credits: 2*

Examines contemporary challenges in ethics and corporate social responsibility (CSR). Explores questions such as: How does one make consistent ethical decisions? How should a person who wants to act ethically conduct business? Does ethics even have a place in business activity? Should companies engage in corporate social responsibility? Students will gain enhanced awareness of their own ethics and develop a personal ethical plan that aligns with their core values to help guide their decision making in the future. Prerequisite: MNO 6201.

## **MNO 6275 - Managing and Leading People Experiential Learning Project**

*Credits: 2*

By deriving principles and frameworks based on scientific evidence from the field of organizational behavior, this course exposes students to contemporary management thinking with an emphasis on driving results. Rather than learning about human behavior from the sidelines, students are expected to actively engage throughout the course utilizing exercises, cases, and discussions to share their personal experiences while appropriately challenging their current level of understanding as well as those of their cohort members. Prerequisite: Enrollment in Online MBA Program. Corequisite: MNO 6474.

## **MNO 6285 - Directed Study in Management and Organizations**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed study credit.

## **MNO 6474 - Managing and Leading People**

*Credits: 4*

Designed to prepare students for a variety of leadership experiences within organizations. Students learn more about themselves and others to improve leadership competencies in any career, specialty area, or industry. Students who are or have been managers quantify what they already do well and target specific areas for improvement to be a more effective manager. Students who want to become managers learn and practice competencies that are needed to become effective managers. Finally, students who do not want to become managers learn to understand and navigate organizations successfully, become better team members, and learn to manage a boss more effectively. Prerequisite: Enrollment in Online MBA Program.

## **MNO 6485 - Directed Study in Management and Organizations**

*Credits: 4*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed study credit.

## **Real Estate, Risk Management and Business Law Courses**

The appropriate prerequisite courses must be successfully completed to enroll in elective RE courses. More details on course selection and prerequisites are found in the Real Estate, Risk Management and Business Law section and in the course descriptions below.

### **RE 6211 - Real Estate Investment**

*Credits: 2*

A survey of commercial real estate investments. Includes the underlying determinants of supply and demand for various property types, leases, pro forma statements of cash flows, measurement of rates of return, and approaches to valuation. This is the prerequisite for all the other real estate courses. Prerequisite: FINA 6201 or enrollment in the M.S.F. program.

### **RE 6212 - Real Estate Analysis and Strategy**

*Credits: 2*

Examines the physical and financial aspects of real estate development and acquisitions from the perspective of the equity investor. Focuses on land use concepts critical to the physical development of various real estate property types. Students become conversant in relevant investment return metrics and applied valuation methodology through case study analysis of real estate transactions. Prerequisite: RE 6211.

### **RE 6213 - Real Estate Finance**

*Credits: 2*

Includes case studies dealing with property selection, acquisition, leasing strategy, financing, sources of debt, and equity capital. Prerequisites: RE 6211, RE 6212, and RE 6215.

### **RE 6215 - Real Estate Development**

*Credits: 2*

Surveys topics relating to due diligence in real property acquisition, zoning and land use law, contracts and agency, leases, and development. Topics are addressed from a legal perspective. Prerequisites: RE 6211 and RE 6212.

## **RE 6220 - Real Estate Practicum**

*Credits: 2*

Students work in groups on applied real estate projects furnished by participating firms. Projects may include research topics, deal analysis, and opportunity assessments. Provides benefits such as preparation for a career in real estate and hands-on, real-world experience in a consultative setting. Students also attend a series of on-campus meetings, facilitated by various industry experts, to review their progress and get advice on project components and areas of focus. Culminates in deliverables for the clients and a team presentation to the class and invited industry guests.

Prerequisites: RE 6211 and RE 6212.

## **RE 6295 - Directed Study in Real Estate**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed study credit.

## **RE 6470 - Real Estate Investment**

*Credits: 4*

A survey of commercial real estate investments. Includes the underlying determinants of supply and demand for various property types, leases, pro forma statements of cash flows, measurement of rates of return, and approaches to valuation. This is the prerequisite for all the other real estate courses. Prerequisite: FINA 6201 or enrollment in the M.S.F. program.

## **Risk Management and Insurance Courses**

### **RMI 6230 - Insurance and Corporate Risk Management**

*Credits: 2*

Students explore the evolution of business risk management from traditional risk management to enterprise risk management. What is good risk management practice today? How should a company's risks be handled? Why do some companies buy insurance and others do not? Students learn a risk management paradigm that includes operational, strategic, financial, and hazard risks, then, for specific applications, make decisions about how to map the risks into a framework for good management decisions. Most class days involve an introductory lecture, then hands-on collaborative work on the day's topic. By the end of the course students should be able to evidence understanding of each of the following: 1) why hazard risks should matter to owners of firms, 2) how the tax system and managerial compensation is important to how a risk is handled, 3) identify and assess risks and show how they can impact firm value, 4) evaluate risk-handling tools and show how they can impact firm value, and 5) demonstrate an understanding of enterprise risk management and how it can enhance managerial decision-making. Prerequisite: FINA 6201.

## **Strategy Courses**

All M.B.A. students take STRA 6201 as part of the core curriculum. The appropriate prerequisite courses must be successfully completed to enroll in elective STRA courses. More details on course selection and prerequisites are found in the Strategy, Entrepreneurship and Business Economics section and in the course descriptions below.

### **STRA 6201 - Strategic Management**

*Credits: 2*

This course examines the fundamental concepts of strategy of the firm as they are applied in domestic and global markets. Topics include business strategy, industry analysis, vertical integration, strategy execution, and diversification. It is taught using cases, text, and readings.

### **STRA 6202 - Advanced Strategic Management**

*Credits: 2*

Builds on the core course STRA 6201, which focuses on issues of strategy at the business unit level. Topics include global strategy, technology strategy, management of the multibusiness firm, and strategic alliances and networks.

Additional topics may be introduced at the instructor's discretion. Required course for the strategy and entrepreneurship concentration. Prerequisite or corequisite: STRA 6201.

### **STRA 6219 - Private Equity and Venture Capital**

*Credits: 2*

Complements entrepreneurship courses by examining issues associated with venture capital from the viewpoint of the venture capitalist. Focuses on strategic and organizational issues associated with the firms that provide private equity to entrepreneurial firms. Examines the process by which private equity firms raise money from their investors as well as the associated agency problems. Explores the private equity firm's decision to invest in a new venture, how to evaluate the strategy of the new venture, and its likelihood for success or failure. Also, the process by which the private equity firm exits from its investments and how nonfinancial corporations can use a private equity model to finance new business ventures. Prerequisite or corequisite: STRA 6201.

### **STRA 6220 - Strategic Mergers and Acquisitions**

*Credits: 2*

Focuses on the strategic and organizational issues associated with mergers and acquisitions. Students examine the factors that lead to successful and unsuccessful mergers and acquisitions. Topics include mergers within an industry, international acquisitions, diversification, vertical integration, organizational design concepts, and the management of organizational behavior issues associated with mergers. Uses a case study approach to classroom learning. Prerequisite: STRA 6202.

### **STRA 6222 - International Corporate Strategy**

*Credits: 2*

Explores a range of issues faced by global multibusiness firms from the perspective of a senior executive (group level) in a multinational firm, with a focus on the effects of decisions on mid- and lower-level managers. Possible topics include 1) product diversification and the rollout of new products across regions; 2) entry and exit strategies for emerging and developed markets; 3) the development of global infrastructure (HR, IT, legal, and administrative structure) to support the operating value chain; 4) the use and misuse of conflicts among regional, product, and functional interests within the firm; and 5) tools for evaluating business unit performance across diverse regions and the stages of industry and product life cycles. Additional possible topics include the engagement of management consultants, strategy implementation, and the nuances of management development in a global firm. Prerequisite: STRA 6201.

### **STRA 6224 - Entrepreneurial Strategy**

*Credits: 2*

Integrates a number of approaches while addressing strategic issues facing new and small businesses, including enduring factors that influence entrepreneurial and small business management. Topics include business strategy, strategies particular to entrepreneurship, and market and industry analysis. Also, organizing to implement innovative ideas. Assumes the perspective of the entrepreneur. Uses a blend of cases and other readings. Prerequisite or corequisite: STRA 6201.

### **STRA 6225 - Strategic Alliances**

*Credits: 2*

Focuses on the planning and execution of strategic alliances, especially in high-technology industries. Addresses issues of partner selection, performance evaluation, and adaptation of the partnership over time. Also, alliances between large and small firms. Prerequisite or corequisite: STRA 6201.

### **STRA 6226 - Competitive Advantage**

*Credits: 2*

Focuses on decision-making by top managers at the strategic business unit level. Students utilize all skills learned thus far in the program and apply them to a broad array of business policy problems (e.g., acting as the decision-maker and setting corporate strategy in specific situations). Cases are drawn from a variety of industries and situations and involve

all facets of corporate strategy, including marketing, operations, finance, information technology, and organizational structure. Emphasis is placed on understanding the competitive dynamics of the current environment and on recommending strategy that considers the resources at the organization's disposal. The course is entirely discussion-based, case method with occasional supplemental readings. Prerequisite or corequisite: STRA 6201.

### **STRA 6228 - Global Strategy**

*Credits: 2*

Focuses on issues related to competing in global industries for both single- and multibusiness firms. Key topics addressed include sources and dynamics of comparative advantages; modes of entry into foreign markets, such as joint venture, acquisition, and greenfield investment; global sourcing for operations and information technology; and the structure of multinational firms. Uses cases and readings. Prerequisite or corequisite: STRA 6201.

### **STRA 6236 - The Practice of International Business**

*Credits: 2*

Provides a case-based, pragmatic understanding of international business in today's flat world. The nation's international trade and investments, already substantially above the gross domestic product figure, will climb in the next decade to several times GDP. International business skills will therefore become increasingly important for all managers. Examines how the international business environment (culture, history, governments, politics, law, war, and demographics) affects the strategy and operations of the global firm. Includes a number of international business executives as guest speakers, presentations of team projects, and the creation of scenarios for the future. Prerequisite: STRA 6201.

### **STRA 6295 - Directed Study in Strategy**

*Credits: 2*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed study credit.

### **STRA 6410 - Venture Capital Practicum**

*Credits: 4*

Provides hands-on-venture capital experience applying the skills developed in finance, strategy, and entrepreneurship courses. Students partner with local venture capital firms and meet weekly outside of class to identify, qualify, analyze, and present recommendations regarding prospective investments for the Cox M.B.A. Venture Fund. Topics include filtering and qualifying opportunities presented by entrepreneurs in business plans, evaluating funding presentations, applying basic due diligence, and managing a portfolio company. Acceptance to the course is competitive and based on submitted applications. It is preferred that applicants have taken STRA 6219. An application does not guarantee admission.

### **STRA 6495 - Directed Study in Strategy**

*Credits: 4*

The student works directly with a professor on a specific project or projects. Credit is given based upon evaluation by the professor. Students are responsible for submitting a proposal to a professor for directed study credit.

# Cox School of Business: Tuition, Fees and Financial Aid

## Tuition, Fees and Living Expenses

The *Financial Information Bulletin* is issued each academic year. It provides the general authority and reference for SMU financial regulations and obligations, as well as detailed information concerning tuition, fees and living expenses.

Continuing students registering must ensure that payment for the full amount of charges is posted to their account by the payment due date showing on their bill. The due dates are also published on the Bursar website.

Billing notifications are sent to the student's SMU email address and to the designated authorized payer(s) email address when a bill is generated. The billing notification will provide instructions on how to view the bill online through SMU<sup>pay</sup>. If notification is not received two weeks prior to the due date, the student and/or designated authorized payer(s) should contact the Office of the University Bursar.

Payments made in person or mailed must be received by the Office of the University Bursar, located on the first floor of the Laura Lee Blanton Student Services Building, no later than 4 p.m. Central Time on the payment due date. Payments made online via electronic check or credit card must be posted no later than 11:59 p.m. Central Time on the payment due date. Students and/or those paying on behalf of students who pay online automatically receive an electronic confirmation of payment; students and/or designated authorized payer(s) paying through other methods can also verify receipt of payment online.

Students enrolling after the payment due date must pay at the time of enrollment. Students whose accounts are not cleared by the payment due date or at the time of enrollment are subject to a late payment fee of \$50 for balances between \$250 and \$999.99, and \$150 for balances between \$1,000 and \$5,000. Balances more than \$5,000 are charged 3 percent of the outstanding balance, not to exceed \$750. Also, after the monthly payment due date has passed, a 1.5 percent past due fee will be assessed on the unpaid student and/or miscellaneous account each month until the balance is paid. The enrollment of students whose accounts remain unpaid after the payment due date may be canceled at the discretion of the University. Students are individually responsible for their financial obligations to the University.

All refunds except federal Parent PLUS loans, prepayment accounts, the SMU Monthly TuitionPay Payment Plan and international wires will be made payable to the student. A credit card payment will only be refunded to the student if federal student loans have been applied to their account. International wires will be refunded by wire to the originating wire account less a \$35 wire-processing fee. The Parent PLUS loan borrower can request the refund to be processed to the student by submitting a Parent PLUS Release form, located on the Bursar website. If the refund is issued by check, the student may request, in writing, that the refund be sent to another party.

Any outstanding debts to the University will be deducted from the credit balance prior to issuing a refund. Any outstanding debts to the University that include Title IV funds must have an Authorization to Credit Account form and/or an Authorization to Credit Account Parent form on file in order to transfer funds to cover current award year debts. Students need to sign the ACA form and the federal parent PLUS loan borrower needs to sign the ACAP form.

Any outstanding debts to the University that do not include Title IV funds will be deducted from the credit balance prior to issuing a refund. All other debts should be paid directly by the student.

A student whose University account is overdue or who in any other manner has an unpaid financial obligation to the University will be denied the recording and certification services of the Office of the Registrar, including the issuance of a transcript or diploma, and may be denied readmission until all obligations are fulfilled. The Division of Enrollment Services may stop the registration, or may cancel the completed registration, of a student who has a delinquent account or debt, and may assess all attorney's fees and other reasonable collection costs (up to 50 percent) and charges necessary for the collection of any amount not paid when due. Matriculation in the University constitutes an agreement by the student to comply with all University rules, regulations and policies.

Applications for financial assistance should be submitted well in advance of registration in accordance with recommended filing dates set forth by the Division of Enrollment Services, Office of Financial Aid. Applications

received after the recommended deadline can expect a delay in application processing time due to the increased volume. This will ultimately delay disbursement of financial aid to the student account. Students and families are expected to clear all billed charges by the published billing due dates regardless of the status of their financial aid application. Any funds that disburse to the student account after the payment due date has passed, will be applied to any outstanding charges first. Remaining financial aid funds will be refunded to the student.

During the registration process, students will be prompted to read and agree to the Student Rights and Responsibilities, which provides information regarding financial rights and obligations, SMU's Honor Code, the Code of Conduct, and the student appeals and complaints process.

Students who elect to register for courses outside of their school of record will pay the tuition rate of their school of record.

## **Tuition Refunds for Withdrawal from the University**

No refunds of tuition or fees will be considered without an official withdrawal. Policies for official withdrawal, including medical and mandatory administrative withdrawal, are found under Withdrawal From the University in the Academic Records and General and Enrollment Standards section of this catalog.

Reduction of tuition and fees is determined by the effective date of the withdrawal and is based on the schedule listed in the *Financial Information Bulletin* and the SMU Bursar website.

## **Financial aid implications of withdrawing from the University**

Federal regulations require schools to adjust financial aid when a student officially withdraws from the University before completing 60% of the term. Financial aid is reduced to a pro-rated amount based on the amount of time the student was enrolled in classes in that specific term, thus "earning" financial aid proportionate to the amount of time enrolled. The "unearned" portion of aid will be returned to the funding source. Students completing 60% or more of a term are considered to have earned 100% of their financial aid for that term. This federally mandated calculation is completely independent of university's refund policies for withdrawals and may require a reduction in financial aid even if there is no reduction in tuition charges. The end result could create a substantial student account balance after the withdrawal is processed. For this reason, students are strongly encouraged to contact their financial aid adviser, before initiating a withdrawal, to discuss the financial implications of withdrawing. For additional information on the University's tuition refund policies, see the SMU *Financial Information Bulletin* or the University Bursar's website. Information on the implications of withdrawing on your financial aid can be found on the Office of Financial Aid website.

Medical withdrawals and mandatory administrative withdrawals allow a prorated refund of tuition and fees and must be initiated through the academic adviser or academic Dean's office.

## **Payment Plan Options**

### **SMU Monthly Payment Plan**

SMU offers several payment plan options to assist students and families. Refer to the Bursar's website for detailed payment plan information: [www.smu.edu/paymentplans](http://www.smu.edu/paymentplans).

Annual payment plans are available in 12-month and 10-month formats. Term payment plans are available in 6-month and 5-month formats. The summer payment plan is three months. Payment plan options are not available for short terms including JanTerm, MayTerm, August Term and Winter Term.

## **Merit-based Scholarships and Financial Aid**

Information about merit-based scholarships and financial aid at the Cox School is found under Cox Graduate Programs Policies and Procedures in the Academic Records, General and Enrollment Standards section of this catalog.

# Cox School of Business: Enrollment and Academic Records

The standards herein are applicable to all students at the University and constitute the basic authority and reference for matters pertaining to University academic regulations and records management. Enrollment in the University is a declaration of acceptance of all University rules and regulations. A complete *University Policy Manual* is available at [www.smu.edu/policy](http://www.smu.edu/policy). Additional information regarding rules and regulations of the University can be found in this catalog. Undergraduate students must follow the University-wide requirements that are in effect for the academic year of matriculation to SMU. The applicable requirements of majors and minors are those in effect during the academic year of matriculation to SMU or those of a subsequent academic year. Students may not follow a catalog for an academic year in effect prior to their matriculation term. Students who are not enrolled for three or more years will return to SMU under the current catalog.

## General Policies

### Confidentiality of Education Records

The Family Educational Rights and Privacy Act of 1974 is a federal law that grants students the right to inspect, obtain copies of, challenge, and, to a degree, control the release of information contained in their education records. The act and regulations are very lengthy, and for that reason, SMU has issued its own FERPA-based guidelines that are available at the University Registrar's Office FERPA website [www.smu.edu/FERPA](http://www.smu.edu/FERPA). Policy 1.10 of the *University Policy Manual* also discusses this law.

In general, no personally identifiable information from a student's education record will be disclosed to any third party without written consent from the student. Several exceptions exist, including these selected examples: 1) information defined by SMU as directory information may be released unless the student requests through my.SMU Student Homepage that it be withheld, 2) information authorized by the student through my.SMU Student Homepage may be released to those individuals designated by the student and 3) information may be released to a parent or guardian if the student is declared financially dependent upon the parent or guardian as set forth in the Internal Revenue Code. Additional information is available at [www.smu.edu/LegalDisclosures/FERPA](http://www.smu.edu/LegalDisclosures/FERPA).

### Student File Number

The University assigns each student an eight-digit SMU identification number, which is used to verify each student's identity and is provided without additional charges. The student should furnish the SMU ID number on all forms when requested, as this number is the primary means the University has to verify the identity for each student's academic records and transactions related to the records.

### Name Change

A student who has a change in name must provide to the University Registrar's Office his or her Social Security card or the form issued by the Social Security Administration. A valid passport may also be used to complete a name change. Enrollment or records services for the student under a name different from the last enrollment cannot be accomplished without one of the above documents. All transcripts and diplomas are issued only under a person's legal name as recorded by the University Registrar's Office.

### Preferred Name

Students who wish to use a name other than their legal name can add a preferred name to their file in addition to their primary/legal name, or update a preferred name already on file, using the self service functions in the my.SMU Student Homepage. The University will make efforts to use the preferred name in communications and in the course of university business. However, there are situations that due to business practices, legal requirements or system limitations the use of a primary/legal name will be used.

SMU has many offices that keep records with student names and many data systems used for specific applications. In addition to updating their preferred name in my.SMU, students may need to notify some offices regarding their use of a preferred name.

A preferred name is a first, middle and/or last name that may be chosen to be used instead of legal first, middle and last name. There is no documentation required to create or change a preferred name. Students are advised that if they choose to use a preferred name, they should use it consistently and resist changing it frequently. Students also are advised that the use of a preferred last name can lead to confusion with employers and organizations in attempting to match official educational records with applications and it is recommended that students provide both their preferred and legal names on applications.

Here is a partial list of standard name usage:

Display name – my.SMU Student Homepage	Preferred name, if provided
Instructor Class Roster	Preferred name, if provided
Instructor Grade Roster	Preferred name, if provided
Canvas	Preferred name, if provided
Global Directory of email addresses	Preferred name, if provided
SMU online directory	Preferred name, if provided
SMU ID Card	Primary (legal) name -- under review
Financial Aid related forms and documents	Primary (legal) name
Official Academic Transcript	Primary (legal) name
Diploma	Primary (legal) name or derivative
Degree Verifications	Primary (legal) name
Housing / Residence Life	Preferred first name, Primary last name
SEVIS Reporting (international students)	Primary (legal) name

## **Email and Mailing Addresses, Telephone, and Emergency Contact**

Each student must provide the University Registrar's Office with both a home and local (mailing) address, both a home and local telephone number and contact information of a designated emergency contact using the self-service functions in the my.SMU Student Homepage. Students enrolling at SMU authorize the University to notify their emergency contacts in the event of a situation affecting their health, safety, or physical or mental well-being, and to provide these contacts with information related to the situation.

Students who enroll in an arranged section course will be asked to provide the University Registrar's Office with an off-campus study address. This is the physical location the student is living while enrolled in this course.

When a student applies for graduation and becomes a candidate they can provide a diploma address (address to which they would like their diploma mailed) to the University Registrar's Office.

International students are required to provide a residence address (physical street address where they are currently living) as their mailing (local) address. International students will be prevented from enrolling if a U.S. address is not provided.

Students are expected to keep current all their addresses and telephone numbers, including emergency contact details, through my.SMU, the University's Web-based self-service system. Students may be prevented from enrolling if their information is insufficient or outdated. Changes to parent information should be reported by contacting records@smu.edu, and the email should include the student's full name and SMU student ID number.

The University issues all students an email address. Students may have other email addresses, but the University-assigned email address is the official address for University electronic correspondence, including related communications with faculty members and academic units.

Official University correspondence may be sent to students' mailing addresses or SMU email addresses on file. It is the responsibility of students to keep all their addresses current and to regularly check communications sent to them since they are responsible for complying with requests, deadlines and other requirements sent to any of their mailing addresses on file or to their SMU email.

## Cell Phones

The University requests that students provide mobile/cell telephone numbers, as they are one means of communicating with students during an emergency. Mobile/cell telephone numbers may also be used by University officials conducting routine business. Students who do not have a mobile/cell telephone or do not wish to report the numbers should provide this information to the University through my.SMU Student Homepage. Students may be prevented from enrolling if their mobile/cell telephone numbers are not on file or if they have not declared, "no cell" or "prefer not to report", in my.SMU.

## Ethnicity

SMU requires that a valid ethnic group category be on file for all students. SMU's policies and the Family Educational Rights and Privacy Act of 1974 protect the confidentiality and privacy of this information. A student's ethnic group category can be viewed in my.SMU Student Homepage.

**U.S. Citizens or Permanent Residents.** Ethnicity is self-determined. Students of multiple ethnic backgrounds may select multiple ethnic group categories. If the ethnic group value is incorrect, the student should go to the University Registrar's Office in the Laura Lee Blanton Student Services Building and complete an Ethnic/Racial Category Update Form.

**International Students Living in the U.S. While Attending School.** Selecting an ethnic group category is not required unless the student becomes a U.S. citizen or permanent resident.

## Transcript Service

A transcript is an official document of the permanent academic record maintained by the University Registrar's Office. The permanent academic record includes all SMU courses attempted, all grades assigned, degrees received and a summary of transfer hours accepted. Official transcripts and certifications of student academic records are issued by the University Registrar's Office for all students. Copies of high school records and transfer transcripts from other schools must be requested from the institutions where the coursework was taken.

Transcripts are \$12.25 per copy. Additional copies in the same request mailed to the same address are \$3.50. Additional copies mailed to different addresses are \$12.25 a copy. PDF transcripts are \$16.00 per email address and are available only for students who attended after summer 1996.

**Note:** No incomplete or partial transcripts, including only certain courses or grades, are issued.

Transcripts cannot be released unless the student has satisfied all financial and other obligations to the University. Instructions for requesting a transcript to be mailed or picked up on campus are available at [www.smu.edu/registrar](http://www.smu.edu/registrar) ("Transcript Requests" link). A student may request his or her official transcript through the online my.SMU Student Homepage. Requests are processed through the National Student Clearinghouse. Telephone and email requests are not accepted. Students or their specified third party can pick up their transcripts at the University Registrar's Office, 101 Blanton Student Services Building.

Transcripts may be released to a third party as specified by the student on the Student's Consent for SMU to Release Information to Student's Specified Third Party form accessible at [www.smu.edu/LegalDisclosures/FERPA/Forms](http://www.smu.edu/LegalDisclosures/FERPA/Forms).

**Note:** Chapter 675, S.B. 302. Acts of the 61st Texas Legislature, 1969 Regular Session, provides as follows: *Section I.* No person may buy, sell, create, duplicate, alter, give or obtain; or attempt to buy, sell, create, duplicate, alter, give or obtain a diploma, certificate, academic record, certificate of enrollment or other instrument which purports to signify merit or achievement conferred by an institution of education in this state with the intent to use fraudulently such

document or to allow the fraudulent use of such document. *Section II.* A person who violates this act or who aids another in violating this act is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than \$1,000 and/or confinement in the county jail for a period not to exceed one year.

## **Veterans**

The University Registrar's Office certifies veterans each term for their benefits under federal programs, including the Yellow Ribbon Program. Most academic programs at SMU qualify for U.S. Department of Veterans Affairs benefits, making an SMU education accessible and affordable. Veterans are required to provide specific documents before they can be certified with the VA's Veterans Benefits Administration. Specific information regarding the certification process is available from the University Registrar's Office at [www.smu.edu/EnrollmentServices/Veterans](http://www.smu.edu/EnrollmentServices/Veterans).

The University complies with Title 38 United States Code Section 3679(e) which states that any individual who is entitled to educational assistance under chapter 31 (Vocational Rehabilitation and Employment) or chapter 33 (Post 9/11 GI Bill®) benefits will be permitted to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement (or "Statement of Benefits" obtained from the Department of Veterans Affairs' website – eBenefits, or a VAF 28-1905 form for chapter 31 authorization purposes) for said entitlement and ending on the earlier of the following dates: a) the date on which payment from VA is made to the institution; or b) 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility. SMU will not impose any penalties, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or require that a covered individual borrow additional funds to meet his/her financial obligation due to delayed disbursement funding from VA under chapter 31 or 33. However, if the anticipated funding from VA will not cover all tuition and fees, then the student is responsible for paying the difference immediately. Failure to do so may result in late or past due fees. Students who wish to be certified under chapter 31 or 33 must request in writing each semester that they wish to be certified and provide an updated statement of benefits. Additional documents are required to be submitted to the University upon initial request to be certified. See our website at [www.smu.edu/enrollmentservices/veterans](http://www.smu.edu/enrollmentservices/veterans).

## **Final Examinations**

Final course examinations shall be given in all courses where they are appropriate, must be administered as specified on the official examination schedule and shall not be administered during the last week of classes. Exceptions to the examination schedule may be made only upon written recommendation of the chair of the department sponsoring the course and with the concurrence of the senior associate dean, who will allow exceptions only in accordance with guidelines from the Office of the Provost. The Graduate Cox examination schedule is published at the start of each term; note that an exam may be held on a day and/or at a time different from the regular class time.

## **Complaint Procedures for Students With Disabilities**

The complaint procedures for students with disabilities are available in the Disability Accommodations and Success Strategies office, Loyd Center, Suite 202, and online at [www.smu.edu/Provost/ALEC/DASS](http://www.smu.edu/Provost/ALEC/DASS).

## **Credit Hour Loads**

The unit of measure for the valuation of courses is the credit hour. Based upon the federal definition of a credit hour, each credit hour requires one hour of direct faculty instruction and a minimum of two hours per week of preparation on the part of students, for approximately 15 weeks a term. Most courses are valued for three credit hours, i.e., three contact hours per week and at least six hours of preparation. For three-credit-hour courses deployed via different course types, modes of delivery, or calendars, total number of direct contact hours should be equal to or greater than 45 hours, with the total out-of-class work equal to or greater than 90 hours. Courses that deviate from this standard must provide documentation illustrating how the number of contact hours and/or work outside the course equate to this standard within the term in which the course is offered.

Nine credit hours is full-time in the fall and spring terms. Six hours is full-time in the summer term (all sessions in the summer term combined).

Cox graduate programs have two seven-week modules in each term, and two credit hours are earned in each seven-week module. Each class session generally requires a minimum of nine hours of advance preparation time on the part of the student.

Due to the structure of the Cox graduate programs, students must follow the appropriate degree curriculum as outlined in the Academic Programs section of this catalog. These programs do not include thesis, dissertation, performance recitals, co-op programs or fellowships that other SMU graduate programs might utilize for a full-time status equivalent. There is a one-hour summer internship required of all students in the Full-Time M.B.A. Program, which is included in the curriculum.

**Cautionary Note:** Federal financial aid agencies and some other agencies require a minimum number of hours of enrollment for full-time status and do not make exceptions for summer, internship, co-op or student-teaching enrollments. Students on financial aid should consult an adviser in the Financial Aid Office regarding minimum enrollment requirements for their situation.

Likewise, international students on an F-1 or J-1 visa should consult an adviser in the International Student & Scholar Services office regarding minimum enrollment requirements for their situation.

**Minimum and Maximum Course Loads.** Minimum and maximum course loads allowed are based on the school of record.

## **Stop Enrollment/Administrative Withdrawal**

Insufficient or improper information given by the student on any admission or enrollment form – or academic deficiencies, disciplinary actions and financial obligations to the University – can constitute cause for the student to be determined ineligible to enroll or to be administratively withdrawn.

## **Transfer Courses From Other Institutions**

Policies for transfer credit are found under Transfer Courses From Other Institutions in the Cox Graduate Programs Policies and Procedures section of this catalog.

## **Enrollment Policies**

### **Course Scheduling and Enrollment Cycles**

Students should consult with Cox graduate student services staff for course scheduling, schedule changes, petitions, degree requirements and other such academic concerns. The academic dean's office or the records office monitors academic progress and maintains official degree plans for all students in a school.

Each fall, spring and summer term has an enrollment period during which the formal process of enrollment in the University is completed. Prior to each enrollment period, the Cox graduate student services staff will publish enrollment instructions. Additional information about enrollment cycles is found under Course Enrollment in the Cox Graduate Programs Policies and Procedures section of this catalog.

Each student is personally responsible for complying with enrollment procedures and for ensuring the accuracy of his or her enrollment. Students are expected to confirm the accuracy of their enrollment each term. Students who discover a discrepancy in their enrollment records after the close of enrollment for the term should immediately complete a Petition for Enrollment Policy Exception. Petitions are to be submitted to the appropriate records office within six months of the term in which the discrepancy appeared; contact information for submitting a Petition for Enrollment Policy Exception can be viewed on the University Registrar's Office website at [www.smu.edu/EnrollmentServices/Registrar/Enrollment/EnrollmentPolicyException](http://www.smu.edu/EnrollmentServices/Registrar/Enrollment/EnrollmentPolicyException). Petitions submitted later than six months after the discrepancy may not be considered.

## Undergraduates Enrolling for Graduate Courses

### Accelerated Pathway Programs

The Accelerated Pathway Programs policy applies to undergraduate students who enroll in one of SMU's Accelerated Pathway Programs. Institutional aid may be eligible for covering tuition costs associated with graduate courses as described below.

Students may not enroll for any graduate level course work to be applied toward their master's degree, prior to the accumulation of 90 credit hours toward their baccalaureate degree. Students must apply and be admitted as a graduate student at least one fall or spring term prior to receiving their master's degree having had their baccalaureate degree conferred prior to that term. Students must enroll and be in good standing as a full-time status graduate student for at least one fall or spring term prior to receiving their master's degree.

Graduate hours earned as an undergraduate are included in the determination of full-time status for the term. Graduate hours and grades earned as an undergraduate that count towards their baccalaureate degree are included in the undergraduate scholastic totals and the graduate scholastic totals. Graduate hours and grades earned as an undergraduate that do not count towards that baccalaureate degree are excluded from the undergraduate scholastic totals but are included in the graduate scholastic totals. The maximum number of graduate hours (up to 30 hours) that may be taken in the final year of the baccalaureate degree is mandated by SMU's accrediting agency. The number of graduate hours which may be counted toward the baccalaureate degree is determined by the school to which the master's degree belongs. An undergraduate is limited to earning a maximum of 30 graduate hours as an undergraduate student after the completion of 90 credit hours towards their baccalaureate degree. A student must earn a minimum 150 combined hours to be conferred both a baccalaureate and master's degree.

Students considering an Accelerated Pathway Program should consult with the Office of Financial Aid about its effect on federal, state and institutional aid.

### Other Graduate Course Enrollment by Undergraduate Students

In addition to the Accelerated Pathway Programs, with the written permission of their academic dean and permission of the dean of the graduate courses, an excelling undergraduate student may enroll for graduate level coursework that will be part of their undergraduate record, count towards the undergraduate degree and be included in the undergraduate scholastic totals. The undergraduate student must have accumulated 90 credit hours toward their baccalaureate degree. Graduate hours enrolled as an undergraduate are included in the determination of full-time status for the term. An undergraduate is limited to earning a maximum of 30 graduate hours as part of their undergraduate record.

### Schedule Changes

The deadline for adding courses, dropping courses without grade record and changing sections for each enrollment period is listed in the Cox Graduate Programs Academic Calendar. Students are encouraged to seek assistance from Cox graduate student services staff when considering whether to add or drop a course. A student may drop a course with a grade of *W* (Withdraw) by using the my.SMU Student Homepage by the specific deadline listed in the Cox Graduate Programs Academic Calendar.

After the deadline date on the Cox Graduate Programs Academic Calendar, the student may not drop a class. All schedule changes must be processed by the deadline date specified on the Cox Graduate Programs Academic Calendar.

**Note:** Schedule changes are not complete for official University record purposes unless finalized in the University Registrar's Office. Additional information about schedule changes is found under Course Enrollment in the Cox Graduate Programs Policies and Procedures section of this catalog.

**Student-Athletes.** Students must consult with the Athletic Compliance Office prior to dropping a course. In the consultation, the student will review the effects the drop might have on his or her athletic participation and financial aid. After the consultation, the Athletic Compliance Office will update my.SMU to allow the student to process the drop, if necessary. The consultation is advisory; students are responsible for their enrollment. For assistance regarding scholarships or other aspects of being a student-athlete, students should contact the Office of the Assistant Athletic Director for Student-Athlete Development.

**International Students.** Students must consult with the International Student & Scholar Services office prior to dropping a course. (Contact [iss@smu.edu](mailto:iss@smu.edu) for consultation.) If dropping a course will cause the student to be enrolled in fewer than the required number of hours to remain a full-time student in fewer than the required number of hours to remain a full-time student, the student's immigration status could be affected. After the consultation, the International Student & Scholar Services office will update my.SMU to allow the student to process the drop, if necessary. The consultation is advisory; students are responsible for their enrollment.

**Students on Merit or Need-based Financial Aid.** Students should consult with their financial aid adviser prior to dropping a course. (See [www.smu.edu/EnrollmentServices/FinancialAid](http://www.smu.edu/EnrollmentServices/FinancialAid) for information regarding your financial aid counselor.) If dropping a course will cause the student to be enrolled in fewer than the required number of hours to remain in status, the student's financial aid status may be affected. After the consultation, the student may drop a course through my.SMU Student Homepage. The consultation is advisory; students are responsible for their enrollment. Questions regarding this procedure or financial aid should be directed to the Office of Financial Aid.

## Withdrawal From the University

Policies on refunds for withdrawal from the University are found in the Financial Information section of this catalog and in the *Financial Information Bulletin*. No refunds are made without an official withdrawal.

Students should be aware of the difference between a *drop* and a *withdrawal* and remember that they have different deadlines and separate financial policies. The deadlines for each are posted each term on the Cox Graduate Programs Academic Calendar. A *drop* occurs when a student removes one or more courses from his or her schedule and remains enrolled in at least one credit hour for the term. A *withdrawal* occurs when removing the course or courses will result in the student being enrolled in **zero** hours for the term.

If a student removes all courses from his or her schedule **prior to the first day of the term**, the transaction is considered a *cancellation* and does not result in financial penalty or impact the student's transcript.

The Cox modules within the term can be negatively affected by the withdrawal process; therefore, students should always contact Cox graduate student services staff prior to initiating this transaction.

A student who wishes to withdraw (resign) from the University before the end of a term or session must initiate a Student Petition for Withdrawal form and secure approval from his/her school's records office. The records office will then submit the form to the Office of the University Registrar. The effective date of the withdrawal is the date on which the Student Petition for Withdrawal is processed in the University Registrar's Office. Discontinuance of class attendance or notification to the instructors of intention to withdraw does not constitute an official withdrawal.

The enrollment of students who withdraw on or before the tenth class day of the fall or spring semester as listed on the Cox Graduate Programs Academic Calendar will be canceled. Courses and grades are not recorded for canceled enrollments; however, the student will owe a portion of his/her tuition and fees. Additional information is available in the *Financial Information Bulletin*. A student who withdraws after the tenth class day of the fall or spring semester will receive the grade of W in each course in which he or she enrolled.

Medical withdrawals allow a prorated refund of tuition and fees and have conditions that must be met prior to re-enrollment at SMU. Medical withdrawals can only be authorized by professionals in the Dr. Bob Smith Health Center, Dean of Student Life, or Vice President for Student Affairs. The last day for a medical withdrawal is the last day of class instruction for the term from which the student is withdrawing. Retroactive medical withdrawals cannot be granted.

Mandatory administrative withdrawals occur when a student is not suspended but current and/or future enrollments are canceled or withdrawn. A student's academic record is annotated with "mandatory administrative withdrawal" and the effective dates for this withdrawal. Mandatory administrative withdrawals allow a prorated refund of tuition and fees and have conditions that must be met prior to re-enrollment at SMU. Mandatory administrative withdrawals can be

authorized only by the Provost and Vice President for Academic Affairs, Vice President for Student Affairs or Dean of Student Life.

Withdrawing students living in SMU housing must check out of the residence halls with the Department of Residence Life and Student Housing per established procedures.

## **Audit Enrollment (Course Visitor)**

Cox School of Business students currently enrolled in one of the graduate programs who want to audit a course (take a course without credit) must complete and submit a Class Auditor Form for Current Cox Students to obtain permission through the Cox Graduate Programs registrar, who coordinates with the instructor the availability of the course for auditing. Audit enrollment will be permitted only on a space-available basis. Audit enrollment starts on the first class day of the term, and there is no tuition charge for a currently enrolled student.

Individuals not currently matriculated graduate students in a Cox School of Business program who desire to audit a course are required to submit a Class Auditor Form for Non-Cox Students to obtain permission through the Cox Graduate Programs registrar, who coordinates with the instructor the availability of the course for auditing. Audit enrollment starts on the first class day of the term and will be permitted on a space-available basis. If the course is approved for audit, the individual must pay the current published audit fee to the Cox School of Business. The following regulations are applicable:

1. Classroom recitation and participation are restricted; availability of course handouts, tests and other materials is restricted; no grade is assigned and no credit is recorded; no laboratory privileges are included.
2. The individual's name does not appear on class rosters or grade rosters.
3. Regular admission and enrollment procedures are not conducted for auditors.
4. The audit fee is nonrefundable.
5. If credit is desired, the course must be enrolled for and repeated, as a regular course, and the regular tuition must be paid.
6. Some courses are not available for auditing.

## **Class Attendance**

Regular class attendance is required. At the beginning of the course, the instructor announces policies regarding the effect of class attendance and tardiness on the student's standing in the course via the course syllabus. These policies may include dropping a student from the course for nonattendance or tardiness as described below.

All reasons for absence or tardiness should be submitted at once to the instructor.

The satisfactory explanation of absence may release a student from disciplinary action but does not relieve a student from responsibility for the work of the course during his or her absence. A student who misses an announced test, examination or laboratory period in a regular course of study and has the permission of the instructor may be given an opportunity to make up the work at the instructor's convenience. The instructor determines in all instances the extent to which absences and tardiness affect each student's grade.

Students who miss two successive class meetings during the official add-drop period at the beginning of each term are subject to being dropped from the course. To avoid this possibility, students should contact the instructor or the department immediately following such a series of absences.

Students may be dropped by a course instructor or academic dean for nonattendance or tardiness with a grade of *W* until the Cox deadline to drop. Department chair approval is required. After the deadline, students must remain enrolled in the course.

Students may also be dropped by a course instructor for extreme inappropriate classroom behavior. The instructor must submit the Administrative Drop Request to drop a student from the course by the Cox deadline to drop. Department Chair approval is required. After the deadline, the student must remain enrolled in the class and receive a final grade of *F*.

A student who has a passing grade in a course at the time of the final examination, but who misses the examination due to an unavoidable situation, should immediately contact the instructor and the assistant dean of Cox graduate student services to determine what accommodations may be available.

## **Excused Absences for University Extracurricular Activities and Religious Holidays**

Students who participate in officially sanctioned, scheduled University extracurricular activities or observe a religious holiday should be given an opportunity to make up class examinations or other graded assignments missed as a result of this participation or related travel. The manner in which examinations or other assignments missed because of these activities are to be made up is left to the discretion of each individual faculty member. However, students should not be penalized in any way for these excused absences and should be informed by the instructor at the beginning of the term, preferably in writing, of the instructor's makeup policy. It is the responsibility of the student to make arrangements with the instructor prior to any missed scheduled examination or other missed assignment for making up this work, and to obtain any class notes or other course material missed due to absence prior to taking any subsequent examinations or submitting any subsequent graded assignments.

This statement of University policy applies for all students. To minimize the difficulties caused for both student-athletes and their instructors by excused absences due to University-sanctioned athletic activities or related travel, the Athletic Department shall 1) make available to all student-athletes and their academic advisers prior to registration a copy of the student's activity and travel schedule for the upcoming term, so as to facilitate the student's enrollment in class sections that will minimize activity and travel conflicts; and 2) require all student-athletes to provide a copy of that term's activity and travel schedule, and a copy of this Statement of University Policy, to each of their instructors at the first class meeting of the term.

Other University colleges and departments whose students will miss classes because of their participation in officially sanctioned, scheduled University extracurricular activities, related travel, or observing of religious holidays are encouraged to adopt similar procedures to minimize the difficulties caused by such absences.

A list of religious holidays for use in requesting excused absences is available on the Official University Calendar. Students must notify the class instructor in writing by the 12th day of the term of any such absences that will occur during that term. Accommodations are to be made without penalty. More information can be found in the *University Policy Manual*, available at [www.smu.edu/policy](http://www.smu.edu/policy).

## **Absence Due to Illness**

The Dr. Bob Smith Health Center does not provide documentation for granting excused absences from class. If students are absent for illness, they should talk to their professors about how they might catch up with the material missed. If students are seriously ill and require hospitalization or an extended absence, students should talk to their professors and the assistant dean of Cox graduate student services to decide how to deal with the interruption in their studies. To facilitate communication with their professors about their absence, students may submit the Absence from Class Form available at [www.smu.edu/healthcenter](http://www.smu.edu/healthcenter).

## **Interpretation of Course Numbers**

Each SMU course has a four-digit course number. The first number indicates the general level of the course.

1000–1999	First-year
2000–2999	Sophomore
3000–3999	Junior
4000–4999	Senior
5000–5999	Senior or Graduate
6000–9999	Graduate

The second digit specifies the number of credit hours; exceptions are noted below.

<i>Digit</i>	<i>Credit Hours</i>
0	0, .5 or 10–15
1	1 or 1.5

The third and fourth digits are used to make the course number unique within the department.

## Grade Policies

A student's grades are available to him or her through my.SMU Student Homepage.

## Grade Scale

The grade of a student in any course is determined by the instructor of the course. The following grades are authorized for recording on the student's official graduate academic record maintained by the University Registrar's Office.

<i>Grades</i>	<i>Description</i>	<i>Grade Points per Term Hour</i>
<i>A</i>	Excellent Scholarship	4.000
<i>A-</i>	Excellent Scholarship	3.700
<i>B+</i>	Good Scholarship	3.300
<i>B</i>	Good Scholarship	3.000
<i>B-</i>	Good Scholarship	2.700
<i>C+</i>	Fair Scholarship	2.300
<i>C</i>	Fair Scholarship	2.000
<i>C-</i>	Fair Scholarship	1.700
<i>D+</i>	Poor Scholarship	1.300
<i>D</i>	Poor Scholarship	1.000
<i>D-</i>	Poor Scholarship	0.700
<i>F</i>	Fail	0.000
<i>P, CR, S</i>	Pass, Credit, Satisfactory	*
<i>I</i>	Incomplete	*
<i>NC, U</i>	No Credit Received, Unsatisfactory	*
<i>X</i>	No Grade Received in Registrar's Office	*
<i>W</i>	Withdraw	*

**Note:** Asterisks denote grades not included in a student's GPA.

All graduate courses in the Cox School of Business, except those noted in this paragraph, are assigned a letter grade with grade point value and cannot be taken as pass/fail. The courses specifically established with the pass/fail grading basis are all BAEX courses, and MNGT 6001, MNGT 6003, MNGT 6004, MNGT 6005, MNGT 6011, MNGT 6020, MNGT 6101, MNGT 6103, MNGT 6150, MNGT 6161, MNGT 6162.

## Grade of F, D, W, X and Missing/Blank

Failing is graded *F*. If the student's work is incomplete, poor quality and not acceptable, a grade of *F* will be given. After such a grade, credit may be obtained only by repeating the course.

When the Cox School of Business assigns the grade of *D*, *D-* or *D+* for poor scholarship, it is not a passing grade. For more details, students should see Course Grades Not Meeting Degree Requirement in the Cox Graduate Program Policies and Procedures section of this catalog.

The grade of *W* cannot be recorded unless completion of the official drop or withdrawal process has occurred by the applicable deadline during the module of enrollment. Only the grade of *W* may be recorded if the student has officially

dropped courses from the schedule or withdrawn (resigned) from the University for the term. The grade of *W* may not be revoked or changed to another grade because the act of officially dropping/withdrawing is irrevocable.

The grade of *X* is a temporary administrative grade used when an official grade has not been received from the instructor. The grade of *X* will be changed to *F* if a grade is not received within 60 days of the end of the term. Graduation candidates must clear all *X*'s prior to the deadline on the Official University Calendar, which may allow less time than 60 days. Failure to do so can result in removal from the degree candidacy list and/or conversion of the grade of *X* to the grade of *F*.

A missing or blank grade also indicates an official grade has not been received from the instructor. Graduation candidates must receive a grade for all course enrollments prior to the deadline on the Official University Calendar. Failure to do so can result in removal from the degree candidacy list and/or the assignment of a grade of *F*.

## Grade of Incomplete

A student may temporarily receive a grade of Incomplete (*I*) if the majority (90 percent) of the course requirements have been completed with passing grades, but for some justifiable reason acceptable to the instructor, the student has been unable to complete the full requirements of the course.

The grade of *I* is normally changed to a final grade within one year but no later than the time of graduation.

At the time a grade of *I* is given, the instructor must stipulate in my.SMU the requirements and completion date that are to be met and the final grade that will be given if the requirements are not met by the completion date.

The instructor and the student sign the Incomplete Grade Agreement form, with a copy of the form given to the student and to Cox graduate student services staff and with the instructor retaining the original form.

If the Incomplete grade is not cleared by the date set by the instructor or by the end of the next term, the grade of *I* will be changed to the grade provided by the instructor at the time the Incomplete was assigned or to a grade of *F* if no alternate grade was provided.

The grade of *I* is not given in lieu of a grade of *F* or *W*, or other grade, each of which is prescribed for other specific circumstances.

The grade of *I* in a course does not authorize a student to attend or enroll in the course during a later term. Graduation candidates must clear all Incompletes prior to the deadline on the Cox Graduate Programs Academic Calendar. Failure to do so can result in removal from the degree candidacy list and/or conversion of the grade of *I* to the grade indicated by the instructor at the time the grade of *I* was given.

## Grade Point Average

A student's grade point average (cumulative GPA) is computed by multiplying the credit hours of each course attempted by the grade points earned in the particular course and then dividing the total number of grade points by the total number of hours attempted, excluding those hours for which grades are shown with an asterisk on the grade chart. The GPA is truncated, not rounded, at three decimal places.

For assistance estimating your GPA see the GPA calculator on the SMU website.

## Grade Changes

Changes of grades, including change of the grade of *I*, are initiated by the course instructor and filed with Cox graduate student services staff for processing under the authorization of the dean of the Cox School. If a student requests a grade change, the instructor may ask the student to provide the request as a written petition, which may become an official part of any further process at the instructor's discretion. Changes of grades may be made only for the following authorized reasons: to clear a grade of *I*, to correct a processing error or to reflect a re-evaluation of the student's

original work. A change of grade will not be based on additional work options beyond those originally made available to the entire class.

Changes of grades of *I* should be processed within a calendar year of the original grade assignment. Other changes of grades must be processed by the end of the next regular term. No grade will be changed after 12 months or after a student's graduation, except in cases where a grade is successfully appealed – provided that written notice of appeal is given within six months following graduation – and in extenuating circumstances authorized by the academic dean and approved by the University Registrar's Office.

## **Grade Appeals**

A student who feels that an assigned grade is other than the grade earned must first discuss the matter with the course instructor to determine if the discrepancy is caused by error or misunderstanding. At the time of the initial discussion, the student may be asked to provide a written petition requesting the change of grade. Written grade appeals must be initiated by the student within fourteen calendar days of the initial grade being posted. Exceptions to deadlines set forth herein for students in unusual circumstances (e.g., Spring Break, Christmas Break, studying abroad) may be granted in writing by the associate dean of graduate programs.

Within seven calendar days of receiving a decision on the grade appeal from the faculty member, a student who is not satisfied by the instructor's decision on a request for a grade change, and who maintains that the original grade was capriciously or unfairly determined, may appeal to the chair of the department in which the course was offered (or, in the case of a nondepartmental course, to a faculty agent designated by the dean of the school offering the course). After discussing the matter with the student, and bearing in mind that the final authority in matters of academic judgment in the determination of a grade rests with the course instructor, the chair (or faculty agent) will consult with the course instructor, who will subsequently report in writing to the student the disposition of the appeal.

Within seven calendar days of receiving a decision on the grade appeal which was submitted to the department chair (or faculty agent), a student who is not satisfied by the disposition of the appeal may appeal the decision to the associate dean of graduate programs. The associate dean will take action as he or she deems appropriate, but the action taken must respect the principle that the determination of a grade rests with the course instructor. The course instructor will report in writing to the student the disposition of the appeal.

These provisions are the sole rules that govern the Cox School of Business course grade appeals at Southern Methodist University.

## **Satisfactory Progress Policies**

### **Leave of Absence**

A leave of absence is a temporary leave from the University – a kind of "timeout" – that may be necessary during an academic career. Students may elect to take leaves of absence for a variety of reasons, including 1) medical reasons due to accident or illness, 2) family crises or other personal situation that requires an extended absence from school, 3) financial issues that may take time to resolve, and 4) academic difficulties that may best be handled by taking time to refocus on college work.

The process to return to SMU after a leave-of-absence period can be an easy one, especially if the student has gone through the steps to file for a leave of absence and planned ahead for the return. Following Cox's leave-of-absence guidelines helps 1) assure that the degree requirements per the catalog of record when the student initially matriculated at SMU still apply upon return, 2) assist with financial aid processing, and 3) provide the support needed to return to Cox and successfully finish the degree. The first step to effect a leave of absence is for the student to arrange an appointment to meet with Cox graduate student services staff, who will assist the student with the process.

Students in good standing may take a leave of absence for up to 12 months by sending a written notice to Cox graduate student services staff. To be in good standing, a student must have a cumulative GPA of 3.000 or higher, must have earned eight or more hours, and must have a clear student financial record. Students seeking to re-enroll after a leave of absence must notify graduate student services staff in writing. A leave of absence does not affect the statute of

limitations established by the initial enrollment. Any former student with less than the criteria outlined herein for good standing must reapply to the program. Students who have not enrolled for more than 12 months must follow the guidelines for readmission.

## **Academic Progress**

Failure to meet established minimum acceptable standards of academic or disciplinary performance can result in probation or dismissal. Information regarding disciplinary action can be found under the Cox Graduate Honor Code and Charter of Community Conduct on the Cox School of Business website.

Graduate students must maintain a cumulative GPA of 3.000. If in any term the student falls below this cumulative GPA, the student will be placed on probation.

To graduate from a Cox School of Business graduate program, students must earn a cumulative GPA of 3.000 or higher (without rounding) with no grade less than a C- (1.700) applying toward the degree. The academic performance of all graduate students is reviewed at the end of each term. All calculations for academic performance evaluations are based on grades earned in Cox programs. Grades earned in accepted transfer courses are not counted in Cox School of Business cumulative GPA calculations.

A student in a graduate Cox program with a cumulative GPA below 3.000 upon completion of the credit hours required for the degree may petition the Cox Graduate Policy Committee to take additional credit hours at Cox to raise his or her cumulative GPA to 3.000, the required level. Students who receive approval to take additional hours will not be permitted to earn more than the maximum hours allowed toward their degree for GPA purposes. A chart of maximum hours allowed is found under Course Grades Not Meeting Degree Requirement in the Cox Graduate Programs Policies and Procedures section of this catalog.

## **Academic Probation, Scholarships and Academic Dismissal**

Academic probation is a serious warning that the student is not making satisfactory academic progress. A student on academic probation is still eligible to enroll and is considered in good standing for enrolling in classes and for certification purposes. Academic probation is not noted on the permanent academic record; however, a student on academic probation may be subject to certain conditions.

In addition, any student with a scholarship who goes on academic probation will have one term to raise the cumulative GPA above 3.000 to retain the scholarship. If the student does not raise the cumulative GPA above 3.000 and remains on academic probation at the end of the term, the scholarship will not be allocated for the following term. However, the student may regain the scholarship in a subsequent term if the cumulative GPA later increases to 3.000 or higher before the start of that term.

Cox graduate students on academic probation are not permitted to serve in any student leadership position of any organization representing either Cox or SMU. A student on academic probation is not permitted to enroll in a directed study. **Note:** Full-time M.B.A. students are still required to enroll in the internship course as part of the full-time M.B.A. curriculum in the summer term between the first and second year of the program. Additional information about probation policies is found in the Cox Graduate Programs Policies and Procedures section of this catalog.

Academic dismissal is final, with no possibility of reinstatement or readmission to the University. Academic dismissal is recorded on the student's permanent academic record. Additional information is found under Academic Dismissal From the Cox School of Business in the Cox Graduate Programs Policies and Procedures section of this catalog.

## **Academic Petitions and Waivers**

Petitions and/or waiver requests concerning academic issues should be submitted to graduate student services staff.

## Transfer Coursework

Policies for transfer credit are found in this catalog under Transfer Courses From Other Institutions in the Cox Graduate Programs Policies and Procedures section.

## Graduation Policies

### Apply to Graduate

Students must file an Application for Candidacy to Graduate with their school's records office no later than the last day of the first week of the term in which they will complete all degree requirements. Applications are filed through my.SMU Student Homepage by the deadline on the Official University Calendar.

Students who file an application after the published deadline may be required to pay a nonrefundable late fee. Late applications may be denied after the start of the next term, and the Application for Candidacy to Graduate applied to the next conferral date. Students taking coursework at another institution and transferring the course(s) back to SMU are responsible for ensuring that the University Registrar's Office receives their official transcript in order for their degree to be conferred for the anticipated graduation term.

SMU has three degree conferral periods for most programs: fall (December), spring (May) and summer (August).

Prior to approving a graduate business student for degree conferral, Cox faculty and administration will consider any documented judicial or disciplinary complaints on record and audit the student's academic standing, including satisfactory completion of the required but noncredit-bearing aspects of the Cox program.

### Commencement Participation

The Cox School of Business holds a diploma ceremony each year in May following the University-wide commencement program. Students in good academic standing, within eight credit hours of graduating and enrolled to complete all degree requirements during the following summer term may also participate in the May ceremonies, although their degrees will not be conferred until August. To participate in a ceremony, a student must apply online and file with their school's records office an Application for Candidacy to Graduate or Intent to Participate Form.

### Statute of Limitations for Degree Plans

The maximum length of time for degree completion in any and all graduate business degree programs is six calendar years. All course and degree requirements must be completed in this time period, which begins at the time of initial enrollment, with no absence greater than three consecutive calendar years.

## Cox Graduate Programs Policies and Procedures

### Honor Code of Cox School of Business

By becoming members of the Cox School of Business, students are bound to hold intellectual integrity to the highest standard and commit to uphold the Cox School of Business Honor Code. Any actions committed by a member of the student body in violation of the Honor Code degrades the principles underlying the mission of the University and profoundly affects the integrity and reputation of the degrees to be earned, as well as the reputation of the institution. **At the core of the Cox School Honor Code is the student who will not lie, cheat or steal, or tolerate those who do. Not reporting an honor violation is an honor violation.** New graduate students receive a copy of the entire Honor Code at orientation and review all standards and policies. For more information, students can access the Honor Code or contact the assistant dean of graduate student services.

### Admissions Information

The Cox School of Business seeks candidates who show a strong potential for success in today's global business environment. Candidates who demonstrate analytical capabilities, leadership experience, interpersonal and communication skills, and personal commitment and motivation are invited to apply. The Admissions Committee seeks

candidates who possess outstanding academic achievement and potential, leadership qualities, and management potential. To assess these characteristics, the committee will look to the following elements to help identify a candidate's potential to succeed in the program: test scores, previous academic records, references who can speak to the candidate's professional performance and self-evaluation essays. Complete details and an application packet are available from Cox graduate admissions: [www.coxgrad.com](http://www.coxgrad.com), telephone 214-768-1214 or 1-800-472-3622, fax 214-768-3956, [M.B.A.info@cox.smu.edu](mailto:M.B.A.info@cox.smu.edu).

## Deferral of Admission

An accepted graduate business applicant must enter the program for the specific term of acceptance. If extenuating circumstances prevent the student from matriculating for the specific term, he or she may petition the graduate Admissions Committee for deferral prior to the first day of instruction of that term. This petition should state the reason for requesting a deferral to the next entering term. If the applicant fails to matriculate for the deferred term, the deposit is forfeited and the applicant must reapply for acceptance to the Cox School of Business.

## Course Enrollment

Students process their own enrollment transactions, including add, drop and swap, on the Web-based my.SMU ([my.smu.edu](http://my.smu.edu)). Prior to each term, there is a period during which the formal process of course enrollment is completed. Graduate student services staff distribute enrollment information and dates for that term's enrollment transactions by email.

In October, enrollment information is distributed for spring term registration, which starts in November with a week of priority registration. In March, information is distributed for summer term and fall term registration, which starts in April with a week of priority registration. In November and April, after the week of priority registration, open enrollment starts and continues until the first week of classes. P.M.B.A. and M.S. students enroll for the summer term prior to the fall enrollment in April.

Cox graduate students have priority for course enrollment until the week prior to the start of classes. Options for enrolling in courses for credit are available for other students as follows: 1) an M.B.A. graduate of an AACSB-accredited school, 2) visiting students in the P.M.B.A. program and 3) *approved* non-Cox SMU graduate students taking graduate Cox courses. Other individuals interested in taking a Cox graduate course may be able to do so as an auditor. Policies for these student classifications are included in this catalog.

Changes can be made to enrollments without penalty through the first week of class. In addition, an elective course may be dropped with no refund given and assigned a grade of W (Withdraw) through the deadline listed in the Cox Graduate Programs Academic Calendar. After the deadline date, students may not drop a class. Note that students cannot drop required core courses without the specific written permission of graduate student services staff.

After the deadline date in the Cox Graduate Programs Academic Calendar, a student may not drop a class. All schedule changes must be processed by the deadline date specified in this calendar.

Additional information is found in the Enrollment Policies section of this catalog.

## Course Loads and Scheduling

Students need to be aware that examinations, special class meetings and other informal and formal events may be scheduled for alternate times than stated in the course schedule.

**Full-Time Two-Year M.B.A. Program.** Students complete 36 credit hours in the first year (18 credit hours in the first term and 18 credit hours in the second term), one credit hour internship in the summer (third term) and 28 credit hours in the second year (14 credit hours per term) plus one noncredit-bearing requirement (First-Year Foundations) for a total of 65 credit hours for the two-year program. The maximum hours of course enrollment allowed during the program is 73 credit hours. The required core courses and some elective courses are scheduled for weekdays, with additional elective courses offered in the evenings and Saturday mornings.

**Professional M.B.A. Program.** Students complete six terms of eight credit hours each term, including summer terms, for a total of 48 credit hours for the part-time program. The maximum hours of course enrollment allowed during the program is 56 credit hours. The usual schedule for the required core curriculum is Thursday evening and/or Saturday morning. Elective courses are offered Monday through Thursday evenings with limited offerings Saturday mornings.

**Full-Time One-Year M.B.A. Program.** Students complete 44 credit hours for this one-year program (12 credit hours in the first term, 16 credit hours in the second term and 16 credit hours in the third term). The maximum hours of course enrollment allowed during the program is 52 credit hours. Required core courses and elective courses are scheduled during the day, in the evening and Saturday mornings.

**Online M.B.A. Program.** Students complete 52 credit hours for this cohort-based seven term program. The maximum hours of course enrollment allowed during the program is 60 credit hours. All courses are delivered in an interactive learning environment so students will get an in-person MBA, face-to-face with faculty and classmates, simply administered in a virtual classroom.

**Master of Science in Accounting.** M.S.A. students complete 16 credit hours each term for a total of 32 credit hours for the full-time, one-year program. The maximum hours of course enrollment allowed during the program is 36 credit hours. The courses for this program are generally offered Monday through Thursday during the day and evening.

**Master of Science in Business Analytics.** M.S.B.A. students complete 17 credit hours in fall and 16 credit hours in spring for a total of 33 credit hours for the full-time, one-year program. The maximum hours of course enrollment allowed during the program is 37 credit hours. The courses for this program are generally offered Monday through Thursday during the evening and Saturday mornings.

**Master of Science in Finance.** M.S. F. students complete 16 credit hours and 14 credit hours in two consecutive terms for a total of 30 credit hours for the full-time, one-year program. The maximum hours of course enrollment allowed during the program is 34 credit hours. The courses for this program are generally offered Monday through Thursday during the day and evening.

**Master of Science in Management.** M.S.M. students complete 16 credit hours and 14 credit hours in two consecutive terms for a total of 30 credit hours for the full-time, one-year program. The maximum hours of course enrollment allowed during the program is 34 credit hours. The courses for this program are generally offered Monday through Thursday (day and evening) and Saturday mornings.

**Master of Science in Sport Management.** M.S.S.M. students complete 16 credit hours in the fall, 17 credit hours in the spring and a four credit hour internship in the summer for a total of 37 credit hours for the full-time, one-year program. The maximum hours of course enrollment allowed during the program is 41 credit hours. The courses for this program are generally offered Monday through Thursday during the evening and Saturday mornings.

## Course Overloading

**Full-Time Two-Year M.B.A. Program.** After successfully completing the first term of the full-time M.B.A. program, students with a cumulative GPA of 3.500 or higher may elect to take more than the normal load of 14–16 credit hours, with a maximum of 20 credit hours in one future term. The total number of overload hours can be no more than eight hours during the two-year program. Full-time M.B.A. students may overload at no additional cost as they are charged a flat-rate tuition per term regardless of the number of hours in which the student is enrolled. Students should contact graduate student services staff for assistance.

**Full-Time One-Year M.B.A. Program.** After successfully completing the required core courses with a cumulative GPA of 3.500 or higher, students in the One-Year M.B.A. program may elect to take more than the normal load of 14–16 credit hours, with a maximum of 20 credit hours in one future term. One-Year M.B.A. students may overload at no additional cost as they are charged a flat-rate tuition per term, regardless of the number of hours in which the student is enrolled. Students should contact graduate student services staff for assistance.

**Professional M.B.A. Program.** After successfully completing all 20 credit hours of required core courses with a cumulative GPA of 3.200 or higher, students in the P.M.B.A. program may elect to take up to three courses or six

credit hours in a module, a total of 12 credit hours in a term. Students need to contact graduate student services staff for override permission when taking 12 credit hours. P.M.B.A. students are not permitted to transfer into the full-time M.B.A. program; however, with approval from graduate student services staff, an unemployed student may be given permission to carry a full-time academic course load of up to 16 credit hours per term. P.M.B.A. students who take additional credit hours (maximum is 56 allowed in the program) will continue to pay the published hourly tuition rates.

**Online M.B.A. Program.** The online M.B.A. program is a lock-step program and students will be enrolling in a specific number of hours each term.

**Executive M.B.A. Program.** After successfully completing the first year of the E.M.B.A. program, students with a cumulative GPA of 3.500 or higher, may elect to take more than the normal load of 9 – 12 credit hours, with a maximum of 14 credit hours in one future term. Executive M.B.A. students may overload at no additional cost as they are charged a flat-rate tuition per term, regardless of the number of hours in which the student is enrolled. Students should contact the Executive M.B.A. student services staff for assistance.

**Master of Science in Accounting, Business Analytics, Finance, Management or Sport Management.** After successfully completing the first term of the M.S.A., M.S.B.A., M.S.F., M.S.M. or M.S.S.M. programs, students with a cumulative GPA of 3.500 or higher may elect to take more than the normal load of 14–17 credit hours, with a maximum of 20 credit hours in one future term. The total number of overload hours can be no more than four credit hours or two courses during the program. Students may overload at no additional cost if they are enrolled in 12–18 credit hours, including their overload credit hours, as they are charged a flat-rate tuition. If 18 credit hours per term are exceeded, students will pay the hourly tuition rate for the hours in excess of 18 credit hours. Students should contact graduate student services staff for assistance.

## Acceleration

Acceleration of the M.B.A. degree is defined as a P.M.B.A. student with enough additional credit hours to advance his or her expected graduation date by at least one term. P.M.B.A. students are not permitted to transfer into the Full-Time Two-Year M.B.A. program. However, with approval from graduate student services staff, an unemployed student may be granted permission to carry a full-time academic course load of up to 16 credit hours per term, paying the published hourly tuition rates. Additional information is available at [smu.edu/EnrollmentServices/Bursar/CostofAttendance](http://smu.edu/EnrollmentServices/Bursar/CostofAttendance).

## Readmission

Students in good standing who have not enrolled in more than 12 months must complete a Readmission Request form. To be in good standing, a student must have a cumulative GPA of 3.000 or higher, must have earned eight or more hours, and must have a clear student financial record. After receiving the Readmission Request form, the graduate programs registrar will review the student's request and academic record to determine the student's eligibility to be readmitted to the same program. If approval to return to the Cox graduate program is granted, the student will receive information detailing her or his new degree plan, including any updates to the curriculum that must be followed. Readmitted students are charged a re-matriculation fee of \$75. Readmission does not affect the statute of limitations established by the initial enrollment.

Any former student with less than the criteria outlined for good standing must reapply to the program. Note: For coursework to count toward a degree, it must be completed within six years of matriculation with no absence greater than three consecutive calendar years. Coursework completed more than three years prior to re-admittance to a graduate program may need to be repeated or replaced with current coursework, at the discretion of the associate dean for graduate programs.

Students seeking readmission to the same Cox program within 12 months of the last term of attendance should follow the guidelines for leave of absence.

## Student in Good Standing Criteria

To be in good standing, a student must have a cumulative GPA of 3.000 or higher, must have earned eight or more credit hours, and must have a clear student financial record.

## Second Master's Degree

### **Graduates of Cox M.S. Programs Applying to the Cox Full-Time One-Year M.B.A. or P.M.B.A. Programs.**

Students who are graduates of a Cox M.S. program and who want to pursue a Cox M.B.A. degree may apply to the Full-Time One-Year M.B.A. or P.M.B.A. programs. Students must complete the application and satisfy all application criteria to be considered for admission. The Full-Time One-Year M.B.A. or M.B.A. and the E.M.B.A. programs are excluded from this option.

When a graduate of one of the M.S. programs is accepted into the Full-Time One-Year M.B.A. or P.M.B.A. programs, the student will be required to complete a minimum of 34 additional credit hours, 17 courses, in order to earn the M.B.A. degree. These hours will consist of M.B.A. core academic courses not taken as part of the M.S. degree plus elective courses not previously taken. All degree requirements of the M.B.A. program must be met for successful completion of the M.B.A. program.

Students will not need to retake successfully completed core required courses if the M.S. and the M.B.A. degrees are completed within six years from the original matriculation date of the M.S. program with no absence greater than three consecutive calendar years. Coursework completed more than three years prior to admittance into the M.B.A. program may need to be repeated or replaced with current courses, at the discretion of the associate dean for graduate programs.

The M.S. graduate admitted to the P.M.B.A. will pay the current P.M.B.A. tuition rate at the time of matriculation. The M.S. graduate admitted to the Full-Time One-Year M.B.A. will pay the current One-Year M.B.A. tuition rate at the time of matriculation.

### **Graduates of the Master of Science in Sport Management Program Applying to the Full-Time One-Year M.B.A. or P.M.B.A. Programs.**

Students who are graduates of SMU's M.S.S.M. program and who want to pursue a Cox M.B.A. degree may apply to the Full-Time One-Year M.B.A. or P.M.B.A. programs. Students must complete the application and satisfy all application criteria to be considered for admission. The Full-Time Two-Year M.B.A. and the E.M.B.A. programs are excluded from this option.

When a graduate of the M.S.S.M. program is accepted into the Full-Time One-Year M.B.A. or P.M.B.A. program, the student will be required to complete 36 additional credit hours, 18 courses, in order to earn the M.B.A. degree. All degree requirements of the M.B.A. program must be met for successful completion of the M.B.A. degree program.

Students will not need to retake successfully completed core required courses if the M.S.S.M. and the M.B.A. degrees are completed within six years from the original matriculation date of the M.S.S.M. program with no absence greater than three consecutive calendar years. Coursework completed more than three years prior to admittance into the M.B.A. program may need to be repeated or replaced with current courses, at the discretion of the associate dean for graduate programs.

The M.S.S.M. graduate admitted to the P.M.B.A. will pay the current P.M.B.A. tuition rate at the time of matriculation. The M.S. graduate admitted to the Full-Time One-Year M.B.A. will pay the current One-Year M.B.A. tuition rate at the time of matriculation.

### **Graduates of Cox M.S. Programs Applying to Another Cox M.S. Program.**

Students who are graduates of a Cox M.S. program and who want to pursue another Cox M.S. degree may apply to the specific M.S. program. Students must complete the application and satisfy all application criteria to be considered for admission. When a graduate of one of the M.S. programs is accepted into another M.S. program, the student will be required to complete a minimum of 26 additional credit hours, a minimum of 13 courses, in order to earn another M.S. degree. These hours will consist of courses not previously taken as part of the initial M.S. degree. All degree requirements of the subsequent M.S. program must be met for successful completion of the M.S. degree program.

Students will not need to retake successfully completed core required courses if the two M.S. degrees are completed within six years from the original matriculation date of the initial M.S. program with no absence greater than three consecutive calendar years. Coursework completed more than three years prior to admittance into the subsequent M.S. program may need to be repeated or replaced with current courses, at the discretion of the associate dean for graduate programs.

The student admitted to a subsequent M.S. degree program will pay the current M.S. program tuition rate at the time of matriculation.

**Graduates of Cox M.B.A. Programs Applying to Cox M.S. Programs.** Students who are graduates of a Cox M.B.A. program and who want to pursue a Cox M.S. degree may apply to the specific M.S. program. Students must complete the application and satisfy all application criteria to be considered for admission.

When a graduate of one of the M.B.A. programs is accepted into an M.S. program, the student will be required to complete 18–26 additional credit hours, nine to 13 courses, in order to earn the M.S. degree. These hours will consist of courses not previously taken as part of the M.B.A. degree. All degree requirements of the specific M.S. program must be met for successful completion of the M.S. degree program.

Students will not need to retake successfully completed core required courses if the M.S. and the M.B.A. degrees are completed within six years from the original matriculation date of the M.B.A. program with no absence greater than three consecutive calendar years. Coursework completed more than three years prior to admittance into the M.S. program may need to be repeated or replaced with current courses, at the discretion of the associate dean for master's programs.

There are constraints on what M.S. degrees an M.B.A. graduate will be able to complete based on coursework taken during the M.B.A. program. If a student took most of the entrepreneurial courses, a Master of Science in Entrepreneurship would not be possible. Likewise, if a student took most of the finance courses, a Master of Science in Finance would not be possible. Students who apply to an M.S. degree program with a potential conflict can request an evaluation of their academic record. The Master of Science in Management is not an option for M.B.A. graduates.

The M.B.A. graduate admitted to an M.S. degree program will pay the current M.S. program tuition rate at the time of matriculation.

## **Course Waiver for Required Core Courses**

While the Cox School is not obligated to grant any waiver credit, in certain cases, up to eight credit hours for full-time and P.M.B.A. students and up to four credit hours for M.S. students of required core courses may be waived, at entrance only, thereby eliminating the need to take a specific required course. This does not reduce the total number of credit hours required for the degree; it allows only for another course(s) to be substituted for the required course(s) as determined in the waiver process. Requests for waived credit are reviewed and processed only after the student's enrollment deposit is received in the Admissions Office. For complete details and a Course Waiver Petition Request form, students should contact the graduate programs registrar at [gradcox@cox.smu.edu](mailto:gradcox@cox.smu.edu).

## **Transfer Courses From Other Institutions**

Although the Cox School of Business is not obligated to accept any transfer credit, in certain cases coursework may be transferred, at entrance only, thereby reducing the number of credit hours required to be taken at Cox for the degree. Transferable hours, up to eight credit hours for full-time and P.M.B.A. students and up to four credit hours for M.S. students, will be considered only if the following criteria are met: 1) the graduate course was taken at an institution accredited by AACSB, 2) the student earned a grade better than *B-*, 3) the course was completed within the three years prior to matriculation at Cox and 4) the course was not credited toward a previous degree. Requests for transfer credit are reviewed and processed only after the student's enrollment deposit is received in the Admissions Office. For complete details and a Transfer Credit Petition Request form, students should contact graduate student services staff at [gradcox@cox.smu.edu](mailto:gradcox@cox.smu.edu).

## **Southwestern Graduate School of Banking Credit**

For candidates admitted to the full-time M.B.A. or P.M.B.A. programs, the Cox School of Business will grant six graduate credit hours (equivalent to three graduate elective module courses) to graduates of the Southwestern Graduate School of Banking who completed the SWGSB program no more than two years prior to admission to the full-time M.B.A. or P.M.B.A. programs. The credits will be treated as general graduate elective credits and will not be counted toward any specific area of concentration. The credit may not be applied to the E.M.B.A. program.

## **Students Taking Courses in Other SMU Graduate Programs**

M.B.A. students may petition to take one course offered in another SMU graduate or professional program that is specifically relevant to the student's academic business goals. Each petition will be reviewed on an individual basis. Additional information is available from the graduate programs registrar ([gradcox@cox.smu.edu](mailto:gradcox@cox.smu.edu)).

## **Directed Studies**

Although faculty members generally discourage the use of directed studies to replace regularly scheduled elective courses, some students may benefit from a highly focused, specialized research-based project designed in conjunction with a full-time faculty member in a specific academic department of the Cox School of Business. These nonpaying academic projects may involve further study of a specific topic from a previous course or may deal with an area of business or management research not covered in regularly scheduled business courses. No more than four credit hours may be earned through directed study. In general, directed studies do not count toward a concentration; any exception to the policy must be approved by the respective department chair. Students must be in good standing academically and must have completed the required core course sequence prior to enrolling for a directed study. The Directed Study Request form is available from graduate student services staff. The student must meet with the instructor to establish the course criteria, and the instructor must sign the Directed Study Request form acknowledging approval of the request. The documented and signed Directed Studies Request form is returned to graduate student services staff for final approval.

## **Courses for Credit After Graduation**

Cox M.B.A. graduates, and graduates of other AACSB accredited M.B.A. programs, can apply to take graduate courses for credit by submitting the application and providing an official transcript listing the graduation date and program and documenting a final cumulative GPA of 3.000 or higher. Criteria for course enrollment include meeting the course prerequisites and earning grades of *B* and above in each postgraduate course taken. For Cox E.M.B.A. program graduates and non-Cox graduates, the academic department chair or designee will review prior coursework for meeting the course prerequisites. Enrollment is on a space-available basis one week prior to the start of the course.

For Cox M.B.A. graduates, an additional concentration may be earned and posted to their academic record with the successful completion of the credit hours and specific courses required for the concentration. (Additional details are found in the Concentrations and Minors section of this catalog.)

Enrollment charges include a one-time application fee, the published per credit hour tuition and general student fees at the P.M.B.A. program rate. Students should contact the graduate programs registrar at [gradcox@cox.smu.edu](mailto:gradcox@cox.smu.edu) for additional information.

## **Visiting Students**

Students currently matriculated at an AACSB-accredited school not located in the greater metropolitan area of Dallas-Fort Worth may apply to take a limited number of courses at the Cox School of Business to transfer back to the student's home school. For details on this limited program, students should contact the graduate programs registrar at [gradcox@cox.smu.edu](mailto:gradcox@cox.smu.edu).

## **Non-Cox SMU Graduate Students Taking Graduate Cox Courses**

Matriculated graduate students in other SMU programs may request permission to enroll in elective courses on the first day of class for the term or module based on the Cox Graduate Programs Academic Calendar. Enrollment is on a space-available basis. For more information, students should contact graduate student services staff at [gradcox@cox.smu.edu](mailto:gradcox@cox.smu.edu).

## **Course Grades Not Meeting Degree Requirement**

All required core courses must be successfully completed with an earned grade of *C-* or above. Required core courses completed with grades of *D+*, *D*, *D-* or *F* have not been successfully completed and must be retaken the next time the course is taught. Additional information can be found in the policy section Grade Forgiveness Opportunity.

An elective course completed with a grade of *D+*, *D*, *D-* or *F* has not been successfully completed. The student has the option of taking either the same course or a different one, but must earn a grade of *C-* or above for a course to count toward the degree; therefore, a student must take an additional course and successfully complete it to earn the credit hours to count toward the degree.

In both situations of required and elective courses not successfully completed, these courses and grades are listed on the student's transcript. While the grades are included in the student's cumulative GPA, the credit hours of the unsuccessful attempt are not counted toward the degree. Students are permitted to take no more than the maximum hours allowed (listed below) toward their degree for GPA purposes.

## Maximum Hours Allowed

<i>Program</i>	<i>Cox Hours Needed to Complete Degree</i>	<i>Maximum Hours Allowed</i>
Full-Time Two-Year M.B.A.	65 credit hours	73 credit hours
Full-time J.D./M.B.A.	50 credit hours	58 credit hours
M.A./M.B.A.	48 credit hours	56 credit hours
Full-Time One-Year M.B.A.	44 credit hours	52 credit hours
Professional M.B.A.	48 credit hours	56 credit hours
Online M.B.A.	52 credit hours	60 credit hours
Part-time J.D./P.M.B.A.	48 credit hours	56 credit hours
3-year J.D./P.M.B.A.	32 credit hours	40 credit hours
Executive M.B.A.	48 credit hours	56 credit hours
Master of Science in Accounting	32 credit hours	36 credit hours
Master of Science in Business Analytics	33 credit hours	37 credit hours
Master of Science in Engineering Entrepreneurship	12 credit hours	16 credit hours
Master of Science in Finance	30 credit hours	34 credit hours
Master of Science in Health Promotion Management	10 credit hours	14 credit hours
Master of Science in Management	30 credit hours	34 credit hours
Master of Science in Sport Management	15 credit hours	19 credit hours

**Note:** Cox hours needed could include transfer credit of up to eight hours for full-time and P.M.B.A. programs, and up to four hours for M.S. programs if approved by the Cox Graduate Policy Committee prior to enrollment in a Cox program.

## Grade Forgiveness Opportunity for Required Core Courses

Students in the M.B.A. programs may repeat up to two different required core courses for which grades of *D+* or lower were received, provided the first enrollment of the course was completed during a student's first three terms of enrollment, or for the E.M.B.A. during the student's first four terms of enrollment.

Students in the M.S. programs may repeat one course for which a grade of *D+* or lower was received for any course completed during a student's first two terms of enrollment.

The student who repeats a course with the grade forgiveness option remains on academic probation until the course is successfully completed, even if the cumulative GPA is raised to 3.000 or higher. Note that the grade from the second time the course is taken, even if lower than the first attempt, will be the grade used to calculate the student's GPA.

A specific course may be repeated only once for grade forgiveness, and it must be repeated within the next two terms following the term in which the course was initially taken. Exceptions to the two-term restriction may be requested from the program registrar if the course is not taught again within that period. The student must declare which course(s)

he or she will repeat under this policy with the program registrar by the seventh day of classes in the module or term of the repeated course enrollment.

Under this policy, the course hours and grade from the second time the course is taken count toward the degree. However, the initial course and grade also are listed on the student's permanent academic record with an explanatory note. All completed attempts of the courses are included in the count of "Maximum Hours Allowed" listed under the Course Grades Not Meeting Degree Requirement Policy.

## Academic Dismissal From the Cox School of Business

Failure to meet established minimum acceptable standards of academic or disciplinary performance will result in dismissal from the Cox School of Business. Dismissal is a permanent and involuntary separation of the student from the school. The student is not eligible for readmission to the Cox School and is not in good standing in the school. "Academic Dismissal" is permanently recorded on the student's transcript. The following criteria, also used for financial aid satisfactory progress, outline when graduate students will be dismissed from the Cox School of Business but does not limit dismissal to these criteria:

**Full-Time Two-Year M.B.A. Program.** Full-Time Two-Year M.B.A. students MUST have a cumulative 3.000 GPA at the end of 70 GPA hours. Full-Time Two-Year M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.250 GPA at the end of 14 GPA hours or the first term.
- Less than a cumulative 2.500 GPA at the end of 30 GPA hours or the second term.
- Less than a cumulative 2.750 GPA at the end of 44 GPA hours or the third term.
- Less than a cumulative 2.950 GPA at the end of 62 GPA hours or the fourth term.

With an approved petition to take up to eight additional hours beyond the 62 GPA hours required for the degree, Full-Time Two-Year M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.950 GPA at the end of 62 GPA hours or the fourth term.
- Less than a cumulative 2.970 GPA at the end of 64 GPA hours (+ 2 hours).
- Less than a cumulative 2.980 GPA at the end of 66 GPA hours (+ 4 hours).
- Less than a cumulative 2.990 GPA at the end of 68 GPA hours (+ 6 hours).
- Less than a cumulative 3.000 GPA at the end of 70 GPA hours (+ 8 hours).

**Full-Time One-Year M.B.A. Program.** Full-Time One-Year M.B.A. students MUST have a cumulative 3.000 GPA at the end of 52 GPA hours. Full-Time One-Year M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.250 GPA at the end of 12 GPA hours or first term.
- Less than a cumulative 2.750 GPA at the end of 28 GPA hours or second term.
- Less than a cumulative 2.818 GPA at the end of 44 GPA hours or third term.

With an approved petition to take up to eight additional hours beyond the 44 GPA hours required for the degree, Full-Time One-Year M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.818 GPA at the end of 44 GPA hours or third term
- Less than a cumulative 2.869 GPA at the end of 46 GPA hours (+ 2 hours).
- Less than a cumulative 2.916 GPA at the end of 48 GPA hours (+ 4 hours).
- Less than a cumulative 2.960 GPA at the end of 50 GPA hours (+ 6 hours).
- Less than a cumulative 3.000 GPA at the end of 52 GPA hours (+ 8 hours).

**Master of Arts /Master of Business Administration and Juris Doctor/Master of Business Administration Programs.** M.A./M.B.A. and J.D./M.B.A. students MUST have a cumulative 3.000 GPA at the end of 54 GPA hours. M.A./M.B.A. and J.D./M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.250 GPA at the end of 14 GPA Cox hours or the first term.
- Less than a cumulative 2.500 GPA at the end of 24 GPA Cox hours or the second term.
- Less than a cumulative 2.750 GPA at the end of 34 GPA Cox hours or the third term.
- Less than a cumulative 2.950 GPA at the end of 46 GPA Cox hours or the fourth term.

With an approved petition to take up to eight additional hours beyond the 46 GPA hours required for the degree, M.A./M.B.A. and J.D./M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.950 GPA at the end of 46 GPA Cox hours or the fourth term.

- Less than a cumulative 2.970 GPA at the end of 48 GPA Cox hours (+ 2 hours).
- Less than a cumulative 2.980 GPA at the end of 50 GPA Cox hours (+ 4 hours).
- Less than a cumulative 2.990 GPA at the end of 52 GPA Cox hours (+ 6 hours).
- Less than a cumulative 3.000 GPA at the end of 54 GPA Cox hours (+ 8 hours).

**Professional M.B.A. Program.** P.M.B.A. students MUST have a cumulative 3.000 GPA at the end of 56 GPA hours. P.M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.000 GPA at the end of 8 GPA hours or first term.
- Less than a cumulative 2.250 GPA at the end of 16 GPA hours or second term.
- Less than a cumulative 2.500 GPA at the end of 24 GPA hours or third term.
- Less than a cumulative 2.750 GPA at the end of 32 GPA hours or fourth term.
- Less than a cumulative 2.900 GPA at the end of 40 GPA hours or fifth term.
- Less than a cumulative 2.950 GPA at the end of 48 GPA hours or sixth term.

With an approved petition to take up to eight additional hours beyond the 48 GPA hours required for the degree, P.M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.950 GPA at the end of 48 GPA hours or sixth term.
- Less than a cumulative 2.970 GPA at the end of 50 GPA hours (+ 2 hours).
- Less than a cumulative 2.980 GPA at the end of 52 GPA hours (+ 4 hours).
- Less than a cumulative 2.990 GPA at the end of 54 GPA hours (+ 6 hours).
- Less than a cumulative 3.000 GPA at the end of 56 GPA hours (+ 8 hours).

**Online M.B.A. Program.** O.M.B.A. students MUST have a cumulative 3.000 GPA at the end of 60 GPA hours. O.M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.000 GPA at the end of 8 GPA hours or first term.
- Less than a cumulative 2.250 GPA at the end of 16 GPA hours or second term.
- Less than a cumulative 2.500 GPA at the end of 24 GPA hours or third term.
- Less than a cumulative 2.750 GPA at the end of 32 GPA hours or fourth term.
- Less than a cumulative 2.800 GPA at the end of 40 GPA hours or fifth term.
- Less than a cumulative 2.900 GPA at the end of 48 GPA hours or sixth term.
- Less than a cumulative 2.950 GPA at the end of 52 GPA hours or seventh term.

With an approved petition to take up to eight additional hours beyond the 52 GPA hours required for the degree, O.M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.950 GPA at the end of 52 GPA hours or sixth term.
- Less than a cumulative 2.970 GPA at the end of 54 GPA hours (+ 2 hours).
- Less than a cumulative 2.980 GPA at the end of 56 GPA hours (+ 4 hours).
- Less than a cumulative 2.990 GPA at the end of 58 GPA hours (+ 6 hours).
- Less than a cumulative 3.000 GPA at the end of 60 GPA hours (+ 8 hours).

**Part-Time Juris Doctor and Professional Master of Business Administration Program.** Part-time J.D./P.M.B.A. students MUST have a cumulative 3.000 GPA at the end of 56 GPA hours. Part-time J.D./P.M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.000 GPA at the end of 8 GPA hours or first term.
- Less than a cumulative 2.250 GPA at the end of 16 GPA hours or second term.
- Less than a cumulative 2.500 GPA at the end of 24 GPA hours or third term.
- Less than a cumulative 2.750 GPA at the end of 32 GPA hours or fourth term.
- Less than a cumulative 2.900 GPA at the end of 40 GPA hours or fifth term.
- Less than a cumulative 2.950 GPA at the end of 48 GPA hours or sixth term.

With an approved petition to take up to eight additional hours beyond the 48 GPA hours required for the degree, part-time J.D./P.M.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.950 GPA at the end of 48 GPA hours or sixth term.
- Less than a cumulative 2.970 GPA at the end of 50 GPA hours (+ 2 hours).
- Less than a cumulative 2.980 GPA at the end of 52 GPA hours (+ 4 hours).

- Less than a cumulative 2.990 GPA at the end of 54 GPA hours (+ 6 hours).
- Less than a cumulative 3.000 GPA at the end of 56 GPA hours (+ 8 hours).

**Master of Science in Accounting.** M.S.A. students MUST have a cumulative 3.000 GPA at the end of 36 GPA hours. M.S.A. students will be dismissed if they achieve

- Less than a cumulative 2.500 GPA at the end of 16 GPA hours or first term.
- Less than a cumulative 2.950 GPA at the end of 32 GPA hours or second term.

With an approved petition to take up to four additional hours beyond the 32 GPA hours required for the degree, M.S.A. students will be dismissed if they achieve

- Less than a cumulative 2.950 GPA at the end of 32 GPA hours or second term.
- Less than a cumulative 2.980 GPA at the end of 34 GPA hours (+ 2 hours).
- Less than a cumulative 3.000 GPA at the end of 36 GPA hours (+ 4 hours).

**Master of Science in Business Analytics.** M.S.B.A. students MUST have a cumulative 3.000 GPA at the end of 37 GPA hours. M.S.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.500 GPA at the end of 17 GPA hours or first term.
- Less than a cumulative 2.870 GPA at the end of 33 GPA hours or second term.

With an approved petition to take up to four additional hours beyond the 33 GPA hours required for the degree, M.S.B.A. students will be dismissed if they achieve

- Less than a cumulative 2.870 GPA at the end of 33 GPA hours or second term.
- Less than a cumulative 2.940 GPA at the end of 35 GPA hours (+ 2 hours).
- Less than a cumulative 3.000 GPA at the end of 37 GPA hours (+ 4 hours).

**Master of Science in Finance.** M.S.F. students MUST have a cumulative 3.000 GPA at the end of 34 GPA hours. M.S.F. students will be dismissed if they achieve

- Less than a cumulative 2.500 GPA at the end of 16 GPA hours or first term.
- Less than a cumulative 2.900 GPA at the end of 30 GPA hours or second term.

With an approved petition to take up to four additional hours beyond the 30 GPA hours required for the degree, M.S.F. students will be dismissed if they achieve

- Less than a cumulative 2.900 GPA at the end of 30 GPA hours or second term.
- Less than a cumulative 2.950 GPA at the end of 32 GPA hours (+ 2 hours).
- Less than a cumulative 3.000 GPA at the end of 34 GPA hours (+ 4 hours).

**Master of Science in Management.** M.S.M. students MUST have a cumulative 3.000 GPA at the end of 34 GPA hours. M.S.M. students will be dismissed if they achieve

- Less than a cumulative 2.500 GPA at the end of 16 GPA hours or first term.
- Less than a cumulative 2.950 GPA at the end of 30 GPA hours or second term.

With an approved petition to take up to four additional credit hours beyond the 30 GPA hours required for the degree, M.S.M. students will be dismissed if they achieve

- Less than a cumulative 2.950 GPA at the end of 30 GPA hours or second term.
- Less than a cumulative 2.980 GPA at the end of 32 GPA hours (+ 2 hours).
- Less than a cumulative 3.000 GPA at the end of 34 GPA hours (+ 4 hours).

**Master of Science in Sport Management.** M.S.S.M. students MUST have a cumulative 3.000 GPA at the end of 19 Cox GPA hours. M.S.S.M students will be dismissed if they achieve

- Less than a cumulative 2.500 GPA at the end of 8 Cox GPA hours or first term.
- Less than a cumulative 2.950 GPA at the end of 15 Cox GPA hours or second term.

With an approved petition to take up to four additional hours beyond the 15 Cox GPA hours required for the degree, M.S.S.M. students will be dismissed if they achieve

- Less than a cumulative 2.950 GPA at the end of 15 Cox GPA hours or second term.
- Less than a cumulative 2.980 GPA at the end of 17 Cox GPA hours (+ 2 hours).
- Less than a cumulative 3.000 GPA at the end of 19 Cox GPA hours (+ 4 hours).

**Master of Science in Health Promotion Management.** M.S.H.P.M. students MUST have a cumulative 3.000 GPA at the end of 14 Cox GPA hours. M.S.H.P.M. students will be dismissed if they achieve

- Less than a cumulative 2.500 GPA at the end of 6 Cox GPA hours or first year.

- Less than a cumulative 2.900 GPA at the end of 10 Cox GPA hours or second year.

With an approved petition to take up to four additional hours beyond the 10 Cox GPA hours required for the degree, M.S.P.H.M. students will be dismissed if they achieve

- Less than a cumulative 2.900 GPA at the end of 10 Cox GPA hours or second year.
- Less than a cumulative 2.980 GPA at the end of 12 Cox GPA hours (+ 2 hours).
- Less than a cumulative 3.000 GPA at the end of 14 Cox GPA hours (+ 4 hours).

**Master of Science in Engineering Entrepreneurship.** M.S.E.E. students MUST have a cumulative 3.000 GPA at the end of 16 Cox GPA hours. M.S.E.E. students will be dismissed if they achieve

- Less than a cumulative 2.500 GPA at the end of 8 Cox GPA hours or first term.
- Less than a cumulative 2.800 GPA at the end of 12 Cox GPA hours or second term.

With an approved petition to take up to four additional hours beyond the 15 Cox GPA hours required for the degree, M.S.E.E. students will be dismissed if they achieve

- Less than a cumulative 2.800 GPA at the end of 12 Cox GPA hours or second term.
- Less than a cumulative 2.950 GPA at the end of 14 Cox GPA hours (+ 2 hours).
- Less than a cumulative 3.000 GPA at the end of 16 Cox GPA hours (+ 4 hours).

## Guidelines for In-class Use of Laptops, PDAs and Mobile Communication Equipment

All graduate students are expected to have access to a laptop computer for use in the classroom. The instructor has the right and responsibility to set the policy for the specific class, which should be included the course syllabus. Students are bound by the class policy regardless of what other instructors or courses may accept and/or require. This policy may include (but is not restricted to) the following alternatives:

- The use of laptop computers is limited to one of the following levels:
  - Laptop use is restricted to course-related (and possibly session-related) content and applications only.
  - If there is no course-related content that students can reasonably be expected to need during class sessions, laptop use can be restricted to note-taking use only.
  - If in-class tests are provided in electronic form, students may be allowed to take the exam on their laptops.
  - If none of the above uses is desired, the use of laptops can be prohibited during class sessions.
- The use of text messaging services during class sessions is prohibited.
- The use of mobile devices during class sessions is prohibited unless there are course-related mobile devices apps. Mobile phones are required to be shut off or set to silent mode during class sessions, and answering phone calls and text messages during class is prohibited.
- The use of cameras and video cameras on mobile phones and laptops during class sessions may be prohibited or allowed. For example, students may be allowed to take photos of the whiteboard and/or projected materials in the session.
- Students should seek permission of the course instructor before recording any class session.

The Cox School does not prescribe any specific brand or configuration of laptop hardware for student laptops. Rather, it is expected that student laptops will be able to reasonably execute all application programs that are site licensed by SMU for student use in business-related programs. Information about relevant application programs as well as suggested minimum functionality for laptop systems will be made available to incoming students prior to the beginning of their program and can be obtained from the Cox Computer Support staff at [support@cox.smu.edu](mailto:support@cox.smu.edu).

## Awards

Students who excel during the course of their graduate work in the Cox School may be honored with awards available through the various subject areas. At graduation, students who reach high academic achievement are recognized through an invitation to join Beta Gamma Sigma, the business honor fraternity.

## **Merit-based Scholarships**

Scholarships are awarded by the Cox School to students entering the full-time M.B.A., P.M.B.A., Master of Science in Accounting and Master of Science in Finance programs on the basis of demonstrated academic achievement and capability as well as significant career experience and leadership achievement at the time of acceptance into the Cox program. Scholarships must be used in the term awarded.

Any student with a scholarship who goes on academic probation will immediately go on scholarship probation for the following term. If his or her cumulative GPA is not raised to 3.000 or higher by the end of that term, the student will lose the scholarship.

## **Financial Aid**

In addition to the merit-based scholarships described above, grants, private and federal loans, and employment programs may be available to Cox students. The Cox School of Business encourages all graduate students to complete the Free Application for Federal Student Aid form, which may be completed at [www.fafsa.ed.gov](http://www.fafsa.ed.gov). Students can obtain a personal identification number which may be used to electronically sign the application. SMU's code number is 003613. Students should see [www.smu.edu/bursar](http://www.smu.edu/bursar) for more information.

## **Tuition Information**

The Student Financials Office (Bursar's Office) provides information on tuition rates, general student fees, payment due dates and contact references as well as other relevant information to assist students with their financial planning on its website [smu.edu/EnrollmentServices/Bursar/CostofAttendance](http://smu.edu/EnrollmentServices/Bursar/CostofAttendance).

## **Accommodations for Students With Disabilities**

Cox students who have disabilities and need special accommodations, such as extended time to take exams or other reasonable academic accommodations, should contact the Disability Accommodations and Success Strategies Office immediately after accepting admission to a Cox program or as soon as possible after arriving at Cox. Since Cox graduate courses are taught in eight-week modules, students may have projects due by the second class meeting or midterm exams three or four weeks after classes begin. It is necessary that students requesting reasonable accommodations do so as early as possible as the eligibility process must be completed prior to the arrangements being made.

In addition, because of the short duration of Cox modules and once-per-week class sessions, faculty must have a full week (seven calendar days) to arrange reasonable accommodations once students have been certified as eligible for reasonable accommodations and have notified their instructor.

More information about DASS is available at [www.smu.edu/Provost/ALEC/DASS](http://www.smu.edu/Provost/ALEC/DASS) and in the University Life and Services section of this catalog.

# Cox School of Business: Student Life and Housing

## The Division of Student Affairs

The Division of Student Affairs ([www.smu.edu/studentaffairs](http://www.smu.edu/studentaffairs)) creates and supports a robust student experience and forges strategic partnerships to best serve the entire SMU community. As educators and scholar-practitioners, we create purposeful learning and leadership opportunities for students to clarify and develop their knowledge, values, skills, and identities – challenging each to become a world changer. The Division of Student Affairs is comprised of five different organizational units that each provide unique educational and supportive resources for students during their time at SMU: Student Wellbeing and Support, Student Engagement and Success, Residence Life and Student Housing, Religious Life, and the Hegi Family Career Development Center.

## Student Wellbeing and Support

### Health Services

[www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)

The Dr. Bob Smith Health Center provides SMU students with campus access to quality, comprehensive and student-centered medical care, mental health services, and outreach programs designed to promote their health and wellbeing. The new 33,000 square foot state-of-the-art clinic facility is centrally located on campus at 6211 Bishop Boulevard. The Health Center is certified by the Accreditation Association for Ambulatory Health Care (AAAHC) for meeting rigorous nationally recognized standards and committing to delivering the highest quality of care.

**Medical Services.** The Dr. Bob Smith Health Center provides a wide range of health services allowing students to receive primary care on campus. Services available include the treatment of acute illnesses, care of injuries, minor medical procedures, physical exams, STD testing, vaccinations, allergy injections, and limited specialty services. Additional ancillary services include a clinical laboratory, an on-site pharmacy, X-ray imaging and diagnostic services, and a part-time sports medicine clinic. For appointments and health information, students may call 214-768-2141 or visit [www.smu.edu/healthcenter](http://www.smu.edu/healthcenter).

**Acute/After Hours Care.** Students should call 911 for immediate response to life-threatening injuries or illnesses. For other urgent concerns after clinic hours, students should seek a local hospital or urgent care center. A listing of several hospital emergency rooms and after-hours urgent care facilities is provided for general reference on the Health Center website ([www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)).

**Costs.** The Health Services Fee, which is included in general student fees, covers routine medical visits and counseling appointments at the Health Center. Charges are assessed separately for lab services, x-rays, immunizations, medical supplies, pharmacy and specialty care. Claims are filed for students participating in the SMU Student Health Insurance Plan. Students with other insurance plans may request an itemized receipt in order to submit a claim for insurance reimbursement. The Pharmacy files claims for most insurance plans.

**Mandatory Health Insurance Policy.** SMU students are required to maintain insurance coverage as a condition of their enrollment. The University offers the SMU Student Health Insurance Plan (SHIP), which is administered by the Health Center's Student Insurance Office. The plan provides coverage at a reasonable cost for most on- and off-campus health care. Information is available at [www.smu.edu/healthinsurance](http://www.smu.edu/healthinsurance).

Domestic students taking nine or more credit hours and international students taking one credit hour or more are automatically enrolled in the Student Health Insurance Plan (SHIP) each semester unless they expressly waive coverage in their my.SMU account. Information about the waiver deadline is available online at [smu.edu/healthinsurance](http://smu.edu/healthinsurance). Domestic students taking between one and eight credit hours are eligible to enroll in the Student Health Insurance Plan on a voluntary basis.

**Pharmacy.** A full service pharmacy is conveniently located in the Dr. Bob Smith Health Center to meet students' prescription needs from 8:30 a.m. to 5:00 p.m., Monday through Friday. The pharmacy is in network with most insurance plans. Prescriptions and refills may be transmitted directly to the pharmacy from the student's physician.

**Immunizations.** All students (undergraduate, graduate, part-time and full-time, to include international and IEP/ESL students) are required to have an SMU medical history form on file in the Dr. Bob Smith Health Center before registration. (Health history forms are available on the Health Center's website at [www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)). All students must also submit - to the Health Center - immunization records that provide proof of two doses of the vaccine against measles, mumps and rubella. These MMR immunizations must be documented by a physician, public health record, military health record or school health record. Students will not be allowed to register without immunization compliance.

Texas state law requires all new students entering an institution of higher education under the age of 22 to provide proof of immunization for bacterial meningitis. The meningitis vaccine or a booster dose must have been received during the five-year period prior to enrollment and not less than ten days before the start of classes. Students seeking exemption from this requirement due to health risk or conscience, including religious belief, should see the second page of the SMU medical history health form. More information is found under Final Matriculation to the University in the Admission to the University section of this catalog.

All required immunizations may be obtained at the Health Center.

**Class Absence Due to Illness.** The Health Center does not issue excuses from classes for illness. Please refer to the Health Center website ([www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)) for the Class Excuse Policy.

**Confidentiality and Privacy.** Confidentiality and privacy of student health information is of paramount importance at the Dr. Bob Smith Health Center. The Health Center follows all applicable state and federal laws related to the disclosure of medical and mental health information, and applies to the highest professional standards of care and privacy. All student-patient health service records are confidential. No information about a student can be released to any third party without the student's written permission.

**Release of Medical Information.** Patient health information and medical records are released only with a written release by the student. Students may sign a release allowing the Health Center to provide specific medical information with their parents, significant others or health care representatives.

**Health Education and Promotion.** The Health Center's Office for Community Health and Promotion serves as a resource to enhance the well-being of SMU students in support of their learning and success. Health information is presented through engaging programs and services to help students make informed and healthy choices. The Health Center works with students to promote activities that create a healthy environment for the SMU community.

**Counseling Services.** The Health Center provides crisis intervention, individual and group therapy, psychiatric evaluation and counseling referrals for SMU students. Use of all services is voluntary and strictly confidential. There is no charge to students who have paid the University health fee. Students can seek confidential help for concerns such as anxiety, depression, relationships, career/life planning, sexual identity, eating/body image and sexual assault/sexual harassment. Alcohol and drug prevention is a free and confidential source of help and information to the SMU community, covering issues related to substance abuse and addiction. Any laboratory tests or pharmaceuticals ordered will be charged to the student. For more information regarding scheduling appointments, students should call 214-768-2277 or visit [www.smu.edu/counseling](http://www.smu.edu/counseling).

**Testing Services.** Testing Services offers fee-based testing to the Dallas-area community. These services include on-campus administration of national testing programs such as the LSAT, MPRE, GRE and others. Other testing offered includes credit by exam (CLEP), and correspondence examinations for local distance learners enrolled in other universities. For additional information, students should visit [www.smu.edu/testingprogram](http://www.smu.edu/testingprogram) or call the center at 214-768-2269.

## **Dedman Center for Lifetime Sports**

[www.smu.edu/recsports](http://www.smu.edu/recsports)

The Dedman Center for Lifetime Sports provides aerobic studios, an indoor running track, basketball courts, volleyball courts (indoor and outdoor), racquetball courts, a climbing wall, a bouldering wall, a 25-yard recreational pool with

five lanes, 15,000 square feet of fitness and weight equipment and a Starbucks in the lobby area. These facilities are open to SMU students, faculty, staff and paying members.

**Facilities/Operations.** The center is a 170,000 square foot facility designed for recreational sports, wellness, programs and the traditions and spirit of SMU.

**Aquatics.** SMU Aquatics features a five-lane, indoor recreational pool and an out-door, zero-depth entry fountain pool known as "The Falls." Students have opportunities to participate year-round in recreational swimming, sunbathing and water sports such as water basketball, volleyball and polo. Classes offered include water fitness, adult and child swimming lessons, children's group lessons, and American Red Cross lifeguard training.

**Programs.** A variety of services and programs are available, including club sports, fitness classes, intramural sports and the Outdoor Adventure program.

**Club Sports.** Club sports offer an opportunity for students interested in concentrated training and participation in a sport. These recognized student organizations offer competition with other university/college club teams in baseball, cycling, ice hockey, men's and women's lacrosse, polo, rugby, men's and women's soccer, triathlon, ultimate Frisbee, volleyball, wakeboarding and water polo.

**Fitness.** SMU Fitness offers group exercise classes and personal training sessions. Group X exercise classes are offered throughout the day to accommodate a variety of schedules. Different types of cardio, strength and flexibility classes are available. Experienced and knowledgeable personal trainers offer sessions to train members of the University community, either one-on-one or in groups, to meet their personal fitness goals. All SMU Fitness programs have a fee for participation.

**Intramural Sports.** Many opportunities for team and individual competition are available through intramural sports such as golf, racquetball, tennis, and dodgeball. The five major sports are flag football, volleyball, basketball, soccer and softball. Leagues provide year-round opportunities to participate in a wide variety of sports and activities. Additional leadership opportunities are available for those interested in officiating or supervising various activities.

**Outdoor Adventure.** SMU Outdoor Adventures is the campus source for outdoor recreation and adventure, offering fun and challenging recreational adventure activities, community-building programs, and student leadership and personal growth opportunities. Students can sign up for SMU OA trips offering traditional and non-traditional outdoor adventure pursuits such as backpacking, rock climbing, caving and canoeing. SMU OA also manages the SMU Climbing Center, the indoor climbing and bouldering facility and the Portable Challenge and Team Development course.

**Spirit/Traditions.** The Recreational Sports Department houses the spirit and traditions of SMU including the Cheer Squad, Mustang Band, Peruna, Pom Squad and the Rotunda Yearbook.

**Mustang Band.** Founded in 1917, the Mustang Band was named the "Best College Marching Band" in Texas in Kirk Dooley's Book of Texas Bests. Long known as "the hub of SMU spirit," the band represents the University at football and basketball games, produces the Pigskin Revue during Homecoming and performs at special University- and community-related events. Membership is open to all SMU students by audition, regardless of major and scholarships based on need and ability are available.

**Rotunda Yearbook.** For over 100 years, the Rotunda Yearbook has chronicled the history of Southern Methodist University. Named in December 1915 after the architecture of Dallas Hall, the Executive Council of the Student Association voted for the annual's name after seven different students suggested it. From its beautiful art to captivating themes, the Rotunda has evolved with the times, earning national awards and recognition from the Associated Collegiate Press (ACP) and Columbia Scholastic Press Association (CSPA).

**Spirit Squads.** Members are full-time students who dedicate their time, energy and athleticism to support Mustang Athletics.

The Cheerleading Squad is a highly competitive team consisting of 20 to 30 young men and women. Twenty of the team's members compete at NCA College Nationals held in Daytona Beach, Florida where the squad placed first in 2016, 2017 and once again in 2018.

The Pom Squad is well known for their energetic performances and their ability to entertain a crowd. The dancing style of the team includes jazz, pom and hip-hop.

Peruna IX (2011-PRESENT) is the beloved mascot of the university and is accompanied by Peruna handlers that lead him across the field during football games. The Human Peruna Mascot is the costumed hero that represents SMU, and is a traditional accessory to Peruna IX.

## **Academic Integrity and Code of Conduct**

### **The Honor Code of Southern Methodist University**

Intellectual integrity and academic honesty are fundamental to the processes of learning and of evaluating academic performance, and maintaining them is the responsibility of all members of an educational institution. The inculcation of personal standards of honesty and integrity is a goal of education in all the disciplines of the University.

The faculty has the responsibility of encouraging and maintaining an atmosphere of academic honesty by being certain that students are aware of the value of it, understand the regulations defining it and know the penalties for departing from it. The faculty should, as far as is reasonably possible, assist students in avoiding the temptation to cheat. Faculty members must be aware that permitting dishonesty is not open to personal choice. A professor or instructor who is unwilling to act upon offenses is an accessory with the student offender in deteriorating the integrity of the University.

Students must share the responsibility for creating and maintaining an atmosphere of honesty and integrity. Students should be aware that personal experience in completing assigned work is essential to learning. Permitting others to prepare their work, using published or unpublished summaries as a substitute for studying required material, or giving or receiving unauthorized assistance in the preparation of work to be submitted are directly contrary to the honest process of learning. Students who are aware that others in a course are cheating or otherwise acting dishonestly have the responsibility to inform the professor and/or bring an accusation to the Honor Council.

Students and faculty members must share the knowledge that any dishonest practices permitted will make it more difficult for the honest students to be evaluated and graded fairly and will damage the integrity of the whole University. Students should recognize that their own interests and their integrity as individuals would suffer if they condone dishonesty in others.

### **Code of Conduct**

The following are University procedures and standards with which every student must become familiar. The University considers matriculation at SMU an implicit covenant and a declaration of acceptance on the part of the student of all University regulations. The Student Conduct & Community Standards Office, website [www.smu.edu/studentconduct](http://www.smu.edu/studentconduct), promotes community, scholarship and civility by holding students accountable to the Student Code of Conduct and the Honor Code.

Standards of conduct are established through faculty, student and administrative efforts and are under continuous evaluation by the entire University community in order to assure reasonable and fair limits. At SMU, the student is assumed to have a high degree of loyalty and responsibility to the University and its well-being, as well as to himself or herself in personal, social and intellectual pursuits; the student's behavior both on and off campus is evidence of this.

Students at SMU will discover that they are encouraged to exercise a great amount of personal freedom as well as accompanying responsibilities. Through their personal capacities for intelligent thought and action, mature students understand that there are situations in which certain behavior must be modified for the benefit of others. The University stands firm in its commitments to the rights and freedoms of students, expecting in return the same respect and concern.

Due respect for the entire University community, faculty, staff and one's fellow students is always expected. The University expects all students to be responsible citizens and to abide by all federal, state and local laws. The

University Code of Conduct applies to students both on and off campus. It is the University's expectation that students will avoid behaviors such as, but not limited to, the misuse of drugs and alcohol, dishonesty, gambling, hazing, or behavior that endangers or threatens to endanger the health and safety of any person.

Students are required to identify themselves when asked by a properly identified faculty or staff member, or by another student serving as a University staff member. Persons who are not members of the University community and without business on campus may be asked to leave.

## **Conduct Review Process**

Clear disciplinary procedures are an important part of the mission of SMU as an educational institution. The intent of the system of due process at SMU is to be educational and not merely punitive for students. The goal continues to be to produce quality citizens. The purpose of the conduct review process is to encourage personal responsibility.

Depending on the degree of misconduct, a student may be subject to sanctions ranging from an informal warning to expulsion from the University. In addition, a student may be assigned educational sanctions designed to promote personal growth and development. Should a student be asked to leave the University, he or she should do so in an expeditious and peaceful manner. The student should remain off campus until he or she receives written permission from the Office of Student Conduct & Community Standards to return to campus. In the event of such separation, a student is still responsible for University financial obligations.

To ensure fairness and due process for all students in the conduct process, the student is granted an impartial hearing and the right to appeal to the University Conduct Council. A student who is appealing a sanction may remain in school until the decision and penalty are reviewed, unless otherwise determined by the Dean of Students, the Vice President for Student Affairs, or their designee. All actions related to the conduct review process are subject to presidential review.

Having voluntarily enrolled as students at Southern Methodist University and assumed a place in the University community, all students are presumed to be knowledgeable of, and have agreed to abide by the rules and regulations set forth in the Student Code of Conduct as outlined in the SMU Student Handbook, which is available online at [www.smu.edu/StudentAffairs/StudentLife/StudentHandbook](http://www.smu.edu/StudentAffairs/StudentLife/StudentHandbook).

## **Student Engagement and Success**

### **Department of Student Development**

#### **Office of the Student Experience**

The Office of the Student Experience designs a comprehensive student experience supporting students and their families from orientation to graduation. Using a leadership framework, all students are guided through collegiate transitions. With recognition of the unique needs of veterans, graduate, transfer, and international students, the office advocates for and provides support to these special populations.

#### **Leadership**

The leadership programs available to students include the Emerging Leaders First-Year Leadership Development Program, the Crain Leadership Summit, and the Lonestar LeaderShape Institute. The Office of the Student Experience also supports student leadership development through the Caswell Leadership Program, for a group of selected students to develop projects focused on organizational leadership, faith-based leadership, community-based leadership, environmental leadership, fraternity and sorority leadership or culturally competent leadership.

#### **Parent and Family Programs**

Parents and families are supported through the Office of the Student Experience with a focus on assisting families to assist their students. Our office supports the SMU Mothers' and Dads' clubs, welcomes and supports new students and families during orientation, and supports family weekend.

#### **Special Population Support**

The Office of the Student Experience is committed to supporting all SMU students in their transitions into and through

SMU. Additional support is coordinated for special student populations who may have unique factors that impact their transitions including Veteran, Transfer, International, and Graduate students.

### **Women & LGBT Center**

[www.smu.edu/womenandlgbtcenter](http://www.smu.edu/womenandlgbtcenter)

The Women & LGBT Center works to increase awareness and understanding of gender, sexuality, and women's issues on campus through social, cultural and academic programming and outreach. We provide empowering spaces for students to develop as leaders through purposeful learning, educational, and advocacy opportunities. We also advise, support, and develop student organizations focused on gender, sexuality, and women's issues. Some of the organizations we advise include the Feminist Equality Movement, Women in Science and Engineering, and Spectrum: the lesbian, gay, bisexual, transgender and ally organization. Also housed in the center is the SMU Women's Symposium ([www.smu.edu/womsym](http://www.smu.edu/womsym)), which is part of the Education of Women for Social and Political Leadership series, established in 1966.

### **Office of Social Change and Intercultural Engagement**

The Office of Social Change and Intercultural Engagement exists to connect students with opportunities to engage with and learn from the SMU campus, Dallas community, and beyond. The office prioritizes advocacy and awareness through immersive community engagement experiences and social justice education. There are two major functional areas of the office: community engagement and intercultural engagement.

The community engagement side of the office has signature service programs including The Big Event, Mustang Heroes, and Alternative Breaks—which provide students the opportunity to participate in immersive service experiences in Dallas and throughout the United States. The office also provides consulting services to individuals, classes, and offices to help connect them to meaningful and educational community engagement opportunities.

In addition, the office sponsors intercultural engagement and social justice education programs to provide opportunities for the exchange of ideas and experiences that enhance student perspectives, and offers various leadership opportunities through culturally based student organizations, student coordinator positions, and the CONNECT Mentoring Program.

For more information about our programs, please visit [www.smu.edu/socialchange](http://www.smu.edu/socialchange).

### **Department of Student Involvement**

[connect.smu.edu](http://connect.smu.edu)

The mission of Student Involvement is to foster experiences and create spaces encouraging students to discover their interests and find a sense of belonging through involvement. Research shows that students who get involved, regardless of the type of activity, tend to be more successful during their college experience. Student Involvement supports more than 200 opportunities for SMU students through academic and professional associations, campus programming boards, community service coalitions, fraternities and sororities, governing boards, honor societies, multicultural organizations, political clubs, club sports, religious organizations, and special interest groups. Professional staff are available to answer student's questions about getting involved and student organization operations.

The Student Involvement Office is located on the third floor of the Hughes-Trigg Student Center, Suite 314. Campus activities and organizations are an integral part of the developmental experience for students and a long-standing SMU tradition. Participation can help students develop leadership skills and provide inter-personal, social and cultural experiences.

Additional information is available online, including organization interests or type, membership requirements, contact information and event calendars. Student Involvement can also assist students in forming a new organization. To learn more visit [connect.smu.edu](http://connect.smu.edu).

**Eligibility Requirements.** Students who hold office in a student organization or represent the University as a member of a sponsored campus group (Mustang Band, Alternative Breaks, etc.) must be matriculated in a University degree-granting program, maintain a minimum 2.0 GPA, and may not be on academic probation.

## Student Government

Through SMU's system of representative governance, students participate with faculty and administration in the University's decision-making process. The primary voice of students in this process is the student-elected Student Senate comprised of senators, committee chairs, general members, and student body officers.

## Hughes-Trigg Student Center

[www.smu.edu/htrigg](http://www.smu.edu/htrigg)

The Hughes-Trigg Student Center supports the University's mission by serving as the hub of student life and activities. The Student Center enhances the student experience by providing services, conveniences, amenities, and resources to facilitate programming. The Student Involvement staff strives to provide a safe and community-focused environment to meet the diverse needs of all individuals. Our space offerings include a 6,400 square-foot ballroom, a tiered, amphitheater-style forum classroom, a 470-person capacity auditorium, a convenience store, a food court with a multifunction dining space, a post office, office and meeting space for student organizations, several lounging and quiet areas for studying, and six meeting rooms.

## Residence Life and Student Housing

[www.smu.edu/housing](http://www.smu.edu/housing)

The Department of Residence Life and Student Housing supports the goals of the University by creating residential communities that empower residents to value learning, citizenship and leadership in comfortable, well-maintained facilities. The department is responsible for the campus residential community, including all Residential Commons, Upper Division Housing, SMU-owned apartments, and SMU-owned Greek chapter houses.

## Hegi Family Career Development Center

[www.smu.edu/career](http://www.smu.edu/career)

The Hegi Family Career Development Center at SMU is dedicated to serving the needs of SMU students and alumni and assisting employers in reaching qualified candidates from SMU. The Career Development Center staff guides and encourages students and alumni in the development of skills necessary for lifelong career management and offers opportunities for employers to recruit students through campus events and online resources. At Hegi, the staff cares about helping students develop into well-rounded individuals, and is dedicated to values of consistency, authenticity and commitment to excellence.

**Career Express Drop-in Hours.** The Career Center offers 15-minute drop-in sessions on a first-come, first-served, basis. In these sessions, students can discuss career options or get help editing a resume. Additional information is available on our website at [www.smu.edu/career](http://www.smu.edu/career).

**Counseling Appointments.** The Career Center also provides opportunities for counseling appointments with a staff member. These longer sessions can help students navigate more complex issues, including major exploration, career exploration, professional skill building, and more.

**Peer Mentors.** Peer Mentors are highly trained student leaders who help fellow students navigate the career development process, including assisting with drop-ins, editing cover letters and resumes, and representing Hegi at campus events.

**Career Development Ambassadors.** CDA is a student organization designed to provide career development opportunities on the SMU Campus. CDAs organize events for the SMU community, which inspire engagement in the career development process, develop students' career tools, and provide networking opportunities.

**Experiential Learning.** Want to learn more about an industry, company or specific job? Experiential learning is the best way to do so. Below are some easy ways to get connected:

- **Coffee Chats/Lunch 'n Learns:** Meet an employer in an informal setting to learn about their career journey.

- **Mentors:** Connect and develop a relationship with an industry professional that is in a career you are interested in.
- **Employer Site Visits/Externships:** Shadow professionals and SMU alumni for the day and learn about their career path and what they do on a daily basis. Mustang and SMU Connection programs partner with top regional employers and alumni providing student exposure to today's competitive and ever-changing job market.
- **Informational Interviews:** Have a conversation with an alum and/or employer to build your network and learn about their education and career path.

**Employer Events.** Our Office cultivates meaningful relationships with organizations and employers who are invested in networking with dynamic, talented and skilled students across SMU's liberal and communication arts communities. Throughout the year, the Career Center hosts 2-4 Career and Internship Fairs, along with a host of Employer Industry Panels, Company Information Sessions and Industry Training and Development Workshops. These events offer students an opportunity to work with employers and alumni and to learn the skills necessary to be successful in the workplace.

## Office of the Chaplain and Religious Life

[www.smu.edu/chaplain](http://www.smu.edu/chaplain)

The Office of the Chaplain and Religious Life offers resources of pastoral care and theological reflection that nurture spiritual and vocational development as well as the moral and ethical vision and character of students, faculty and staff. Dr. Stephen W. Rankin is the chaplain and minister to the University community. Chaplain Rankin leads and preaches at weekly chapel service, an ecumenically Christian, all-University service of worship, each Wednesday during the term. Students, faculty and staff are invited to participate in this service through music, scripture readings or other expressions of worship. Other services, including the University Service of Memory, Ash Wednesday Service and memorial services as needed, are also planned and implemented by the Office of the Chaplain.

Presently, there are more than 28 religious life organizations. Alongside the Christian groups aligned with denominations, local Dallas-area congregations or national parachurch ministries, SMU also has an active Hillel chapter for Jewish students, a bustling Muslim Student Association and other faith groups of various traditions. A large number of undergraduate, graduate and professional students, as well as many of SMU's faculty, staff and administrators, participate in these religious communities.

Additionally, the Office of the Chaplain partners with faculty members across campus to direct the Faith and Learning Scholars, a cohort of students who want the experience of integrating their faith with their academic pursuits. Participants can qualify for the community engagement proficiency. Similarly, the Civil Rights Pilgrimage, founded in 2004, is an eight-day spring break journey through the South whereby students encounter shrines of freedom and meet heroes of the civil rights movement. This collaboration with Dedman College offers students a transformative opportunity while earning academic credit.

Chaplains are available for personal counseling and spiritual direction with students, faculty and staff during office hours. The Office of the Chaplain is located in the Hughes-Trigg Student Center, Suite 316. Nearby are two rooms for prayer, one designated for Muslim community members and the other for all others.

## Residence Accommodations

The University prides itself on offering a full living and learning experience for its resident students. The mission of the Department of Residence Life and Student Housing is to advance the goals and objectives of the University by creating residential communities that empower residents to value learning, citizenship and leadership. To this end, RLSH seeks opportunities to promote an intellectual culture in SMU's residential communities that complements an already flourishing campus social culture. RLSH is responsible for residence halls, 11 Residential Commons and 10 SMU-owned Greek chapter houses. This responsibility includes making sure that facilities are well maintained and that students have opportunities to grow personally and excel academically.

## **Housing Policy for All Students**

All incoming first-year undergraduate students are required to live on campus during their first two years at SMU. Exceptions may be granted on the basis of a financial, medical or personal hardship at the discretion of the dean of RLSH to those students from Dallas/Fort Worth who live with a parent or legal guardian in the primary residence of the parent or guardian. For housing purposes, the *two years* means the first two years of college. Incoming transfer students who are over the age of 16 and under the age of 20 are required to live on-campus for their first year at SMU. For 2018–2019, upperclass and graduate students are not required to live on campus but may apply on a space-available basis.

## **Applications for Residence**

New graduate students should submit the completed application and housing license agreement to RLSH with a check or money order for \$100 made payable to Southern Methodist University for the nonrefundable housing deposit. Notification of assignment will be made by RLSH.

The housing license agreement is for the full academic year (fall and spring terms). Room charges for the fall term will be billed and are payable in advance of the term for students who register before August 1, and room charges for the spring term will be billed and are payable in advance of that term for students who register before December 1. Students who register after these dates must pay at the time of registration. Room charges for the full academic year will be due and payable should a student move out at any time during the school year. Accommodations for shorter periods are available only by special arrangement with RLSH before acceptance of the housing license agreement. It is important that applicants become familiar with the license agreement, as it is a legally binding document.

## **Graduate Residence Accommodations**

The Department of Residence Life and Student Housing operates one apartment residence hall designated for graduate students. Martin Hall, a single occupancy, efficiency apartment facility, houses single graduate students and senior undergraduates.

## **Special Housing Needs**

Students having special housing needs because of a disability should contact the SMU Office of Disability Accommodations and Success Strategies in order to establish eligibility for accommodations. When applying for housing, students should also submit information to RLSH regarding a request for accommodations. DASS and RLSH will work together with the student on their specific situation to make necessary accommodations.

## **General Housing Information**

Each apartment is furnished with a Murphy bed, desk, dresser, kitchen dining table and chairs. All university residences have wired and wireless Ethernet connections to the University's computer system. All residence halls are air-conditioned and some have individually climate-controlled rooms. Washing machines and dryers are located in all residence halls. Meal plans are not required in the graduate hall. For more information, students should visit [www.smu.edu/housing](http://www.smu.edu/housing) or contact the Department of Residence Life and Student Housing, Southern Methodist University, PO Box 750215, Dallas TX 75275-0215; phone 214-768-2407; fax 214-768-4005; [housing@smu.edu](mailto:housing@smu.edu).

# Cox School of Business: Faculty and Staff

## Offices of the Academic Dean

Matthew B. Myers, *Dean, Tolleson Chair in Business Leadership*

William R. Dillon, *Senior Associate Dean for Academic Affairs*

# Dedman College of Humanities and Sciences

## Academic Calendar

### Academic Year 2019-2020

[www.smu.edu/registrar/academic\\_calendar.asp](http://www.smu.edu/registrar/academic_calendar.asp)

This calendar includes an addendum listing religious holidays for use in requesting excused absences according to University Policy, Excused Absences for University Extracurricular Activities and Religious Holidays. For religious holidays not listed, contact the Office of the Chaplain.

Graduate programs in the Cox School of Business, Perkins School of Theology, Dedman School of Law, and Research and Graduate Studies have different calendars.

A comprehensive schedule of holiday dates that the offices of the University will be closed will be announced at a later date.

### Fall Term 2019

*(August 26 - December 21, 2019)*

**April 8–26, Monday–Friday:** Enrollment for fall 2019 continuing students for all undergraduates and for graduates in Dedman College, Lyle and Meadows.

**May, July, August (TBA):** Academic Advising, Enrollment and Orientation conferences for new first-year and transfer undergraduate students. Conference dates to be announced. More information about AARO is available from the Office of the Student Experience, Student Affairs, 214-768-4560, [www.smu.edu/studentaffairs/newstudent](http://www.smu.edu/studentaffairs/newstudent).

**August 24, Saturday:** Residence halls officially open at 9:00 a.m.

**August 25, Sunday:** Opening Convocation, McFarlin Auditorium.

**August 26, Monday:** First day of classes.

**August 30, Friday:** Last day to enroll, add a course, or drop a course without tuition billing while remaining enrolled for the term. Last day to file for graduation in December.

**September 2, Monday:** Labor Day. University offices closed.

**September 9, Monday:** Last day to drop a course without academic record (**tuition charges apply**). Last day to withdraw from the university without academic record (**withdrawal refund schedule applies**). See Bursar's website for more information.

**September 11, Wednesday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**October 1, Tuesday:** Early intervention grades due for first-year undergraduate students.

**October 4-5, Friday-Saturday:** Family Weekend

**October 14-15, Monday-Tuesday:** Fall Break.

**October 16, Wednesday:** Last day for continuing undergraduate students to change their majors before November enrollment.

**October 27, Sunday:** Midterm grades due for first-year and sophomore students.

**November 4, Monday:** 60 percent point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**November 4-22, Monday–Friday:** Enrollment for spring 2020 continuing students for all undergraduates and graduates in Dedman College, Lyle, Meadows and Simmons.

**November 8, Friday:** Last day to drop a course (grade of W).

**November 8-9, Friday-Saturday:** Homecoming Weekend.

**November 14, Thursday:** Last day for December graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**November 18, Monday:** Students should file for May graduation. The last day to file is January 24, 2020.

**November 26, Tuesday:** Last day to withdraw from the University.

**November 27, Wednesday:** No classes.

**November 28–29, Thursday–Friday:** Thanksgiving holiday. University offices closed.

**December 4-9, Wednesday–Monday:** No final examinations or unscheduled tests and papers.

**December 5, Thursday:** Last day for oral/written examinations for December graduate degree candidates.

**December 9, Monday:** Last day of classes.

**December 10-11, Tuesday-Wednesday:** Reading days.

**December 12-18, Thursday–Wednesday:** Examinations. (No examinations scheduled for Sunday).

**December 19, Thursday:** Residence halls close at 10:00 a.m. for winter break. (December graduates should contact the Department of Residence Life and Student Housing).

**December 20, Friday:** December Rotunda Recessional.

**December 21, Saturday:** December Commencement Convocation. Official close of term and conferral of degrees.

**December 23 - January 1, Monday - Wednesday:** University closed.

**December 25, Wednesday:** Christmas Day.

## January Term 2020

*(December 19, 2019 – January 16, 2020)*

The January Term consists of two primary sessions: Dallas January Session and SMU-in-Taos January Session. Each primary session has different deadline dates. Some areas of instruction may offer a limited number of selected courses during the January Term, December 19, 2019 – January 16, 2020 with unique start, end, deadline dates and class meeting times to accommodate the particular needs of the course.

**January 1, Wednesday:** New Year's Day. University offices closed.

## Dallas January Session 2020

**Note:** *Classes meet six hours per day, Monday through Friday. See Intersessions website for specific class information.*

**January 5, Sunday:** Last day to enroll, add a course, or drop a course without academic record. Last day to file for graduation in January Term.

**January 6, Monday:** First day of classes.

**January 7, Tuesday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**January 9, Thursday:** Last day for January Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term

**January 15, Wednesday:** Last day to drop a course or withdraw from the University (grade of W).

**January 16, Thursday:** Last day of classes, including examinations. Official close of the term and conferral of degrees.

## SMU-in-Taos January Session 2020

**Note:** *Permission of SMU-in-Taos required for all enrollments.*

**January 2, Thursday:** Last day to enroll, add a course, or drop a course without academic record.

**January 2, Thursday:** Student travel/arrival.

**January 3, Friday:** First day of classes.

**January 6, Monday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**January 9, Thursday:** Last day for January Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**January 14, Tuesday:** Last day to drop a course or withdraw from the University (grade of W).

**January 15, Wednesday:** Last day of classes, including examinations. Travel Day.

**January 16, Thursday:** Unofficial Taos Travel.

## Spring Term 2020

*(January 17 - May 16, 2020)*

**November 4-January 24, Monday–Friday:** Enrollment for spring 2020 continuing students for all undergraduates and graduates in Dedman College, Lyle, Meadows and Simmons.

**January (TBA):** Residence halls officially open at 9:00 a.m.

**January (TBA):** Academic Advising, Enrollment and Orientation conferences for new first-year and transfer undergraduate students. Conference dates to be announced. More information about AARO is available from the Office of the Student Experience, Student Affairs, 214-768-4560, [www.smu.edu/studentaffairs/newstudent](http://www.smu.edu/studentaffairs/newstudent).

**January 1, Wednesday:** New Year's Day. University offices closed.

**January 15, Wednesday:** Spring Rotunda Passage (*Tentative; subject to change*)

**January 17, Friday:** First day of classes.

**January 20, Monday:** Martin Luther King, Jr. Day. University offices closed.

**January 24, Friday:** Last day to enroll, add a course, or drop a course without tuition billing while remaining enrolled for the term. Last day to file for graduation in May.

**January 31, Friday:** Last day to drop a course without academic record (**tuition charges apply**). Last day to withdraw from the university without academic record ([withdrawal refund schedule applies](#)). See Bursar's website for more information.

**February 4, Tuesday:** Last day to declare pass/fail or no credit grading options. Also, last day to request an excused absence for the observance of a religious holiday.

**February 24, Monday:** Early intervention grades due for first-year undergraduate students.

**March 6, Friday:** Last day for continuing undergraduate students to change their majors before April enrollment.

**March 16-22, Monday-Sunday:** Spring Break.

**March 24, Tuesday:** Midterm grades due for first-year and sophomore students.

**March 31, Tuesday:** 60 percent point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**April 6-24, Monday–Friday:** Enrollment for summer 2020 and fall 2020 continuing students for all undergraduates and graduates in Dedman College, Lyle, Meadows and Simmons.

**April 7, Tuesday:** Last day to drop a course (grade of W).

**April 10, Friday:** Good Friday. University offices closed.

**April 12, Sunday:** Easter Sunday.

**April 13, Monday:** Last Day for May graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**April 13, Monday:** Honors Convocation, 5:30 p.m.

**April 22, Wednesday:** Students should file for August or December graduation. Last day to file for August graduation is June 4. Last day to file for December graduation is the last day to enroll for fall 2020.

**April 24, Friday:** Last day to withdraw from the University.

**April 29-May 4, Wednesday–Monday:** No final examinations or unscheduled tests and papers.

**April 30, Thursday:** Last day for oral/written examinations for graduate students who are May degree candidates.

**May 4, Monday:** Last day of classes.

**May 5, Tuesday:** Reading Day.

**May 6-12, Wednesday–Tuesday:** Examinations (No examinations scheduled for Sunday).

**May 13, Wednesday:** Residence halls officially close for non-graduating students.

**May 15, Friday:** Baccalaureate.

**May 16, Saturday:** May Commencement Convocation. Official close of term and conferral of degrees.

**May 17, Sunday:** Residence halls officially close for graduating seniors.

## May Term 2020

*(May 14 - 29, 2020)*

The May Term consists of two primary sessions: Dallas May Session and SMU-in-Taos May Session. Each primary session has different deadline dates. Some areas of instruction may offer a limited number of selected courses during the May Term, May 14 - 29, 2020 with unique start, end, deadline dates, and class meeting times to accommodate the particular needs of the course.

## Dallas May Session 2020

*Note: Classes meet four hours per day, Monday through Friday.*

**May 14, Thursday:** First day of classes.

**May 14, Thursday:** Last day to enroll, add a course, or drop a course without academic record (tuition charges apply). See Bursar's website for more information. Last day to declare pass/fail or no credit grading options. Last day to file for graduation in May Term. Last day to request an excused absence for the observance of a religious holiday.

**May 22, Friday:** Last day for May Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**May 25, Monday:** Memorial Day. University offices closed.

**May 26, Tuesday:** Last day to drop a course or withdraw from the University (grade of W).

**May 29, Friday:** Last day of classes, including examinations. Official close of term and conferral of degrees.

## SMU-in-Taos May Session 2020

*Note: Permission of SMU-in-Taos required for all enrollments.*

**May 13, Wednesday:** Travel day and arrival of students, 2–6 p.m.

**May 14, Thursday:** First day of classes.

**May 14, Thursday:** Last day to enroll, add a course, or drop a course without academic record (tuition charges apply). See Bursar's website for more information. Last day to declare pass/fail or no credit grading options. Last day to file for graduation in May Term. Last day to request an excused absence for the observance of a religious holiday.

**May 22, Friday:** Last day for May Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**May 26, Tuesday:** Last day to drop a course or withdraw from the University (grade of W).

**May 29, Friday:** Last day of classes, including examinations.

**May 30, Saturday:** Travel Day.

## Summer Term 2020

*(June 1 – August 4, 2020)*

The summer term consists of four primary sessions: Dallas Full Session, Dallas First Session (June), SMU-in-Taos First Session, and Dallas Second Session (July). Each primary session has different deadline dates. There are also four shorter sessions within the first and second sessions. Some areas of instruction may offer a limited number of selected courses during the Summer Term, June 1 – August 4, with unique start, end, deadline dates and class meeting times to accommodate the particular needs of the course.

### Dallas Full Session

**Note:** *Classes meet 2 hours, 15 minutes twice a week or 1 hour, 30 minutes three times a week.*

**May 25, Monday:** Memorial Day. University offices closed.

**June 1, Monday:** First day of classes.

**June 4, Thursday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information. Last day to file for August graduation.

**June 10, Wednesday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**July 3, Friday:** Independence Day observed. University offices closed.

**July 16, Thursday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**July 23, Thursday:** Last day to drop a course (grade of W).

**July 29, Wednesday:** Last day to withdraw from the University.

**August 4, Tuesday:** Last day of classes, including examinations. Official close of term and conferral of degrees.

### Dallas First Session (June)

**Note:** *Classes meet 2 hours a day, Monday–Friday*

**May 25, Monday:** Memorial Day. University offices closed.

**June 1, Monday:** First day of classes.

**June 2, Tuesday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information.

**June 4, Thursday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday. Last day to file for August graduation.

**June 16, Tuesday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**June 23, Tuesday:** Last day to drop a course (grade of W).

**June 24, Wednesday:** Last day to withdraw from the University.

**June 30, Tuesday:** Last day of classes, including examinations.

**August 4, Tuesday:** Official close of term and conferral of degrees.

## June A (11-day June Session)

*Classes meet four hours per day, Monday through Friday.*

**June 1, Monday:** First day of classes.

**June 1, Monday:** Last day to add/enroll and to declare pass/fail or no credit grading options.

**June 10, Wednesday:** Last day to drop/withdraw from the University (grade of W).

**June 15, Monday:** Last day of classes, including examinations.

## June B (11-day June Session)

*Classes meet four hours per day, Monday through Friday.*

**June 16, Tuesday:** First day of classes.

**June 16, Tuesday:** Last day to add/enroll and to declare pass/fail or no credit grading options.

**June 25, Thursday:** Last day to drop/withdraw from the University (grade of W).

**June 30, Tuesday:** Last day of classes, including examinations.

## SMU-in-Taos First Session

*Note: Permission of SMU-in-Taos required for all enrollments.*

*(Regular Session)*

**June 2, Tuesday:** Travel day and arrival of students, 2-6 p.m.

**June 3, Wednesday:** First day of classes.

**June 3, Wednesday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information.

**June 4, Thursday:** Last day to file for August graduation.

**June 8, Monday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**June 11, Thursday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**June 16, Tuesday:** Last day to drop a course or withdraw from the University (grade of W).

**June 18, Thursday:** Last day of classes, including examinations.

**June 19, Friday:** Departure of students.

**August 4, Tuesday:** Official close of term and conferral of degrees.

*(Field Session)*

**June 2, Tuesday:** Travel day and arrival of students, 2-6 p.m.

**June 3, Wednesday:** First day of classes.

**June 3, Wednesday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information.

**June 4, Thursday:** Last day to file for August graduation.

**June 8, Monday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**June 16, Tuesday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**June 25, Thursday:** Last day to drop a course or withdraw from the University (grade of W).

**June 30, Tuesday:** Last day of classes, including examinations.

**July 1, Wednesday:** Departure of students.

**August 4, Tuesday:** Official close of term and conferral of degrees.

## Dallas Second Session (July)

*Note: Classes meet 2 hours a day, Monday–Friday.*

**June 4, Thursday:** Last day to file for August graduation.

**July 3, Friday:** Independence Day observed. University offices closed.

**July 6, Monday:** First day of classes.

**July 7, Tuesday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information.

**July 9, Thursday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**July 14, Tuesday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**July 27, Monday:** Last day to drop a course (grade of W).

**July 29, Wednesday:** Last day to withdraw from the University.

**August 4, Tuesday:** Last day of classes, including examinations. Official close of term and conferral of degrees.

## July A (11-day July Session)

*Classes meet four hours per day, Monday through Friday.*

**July 6, Monday:** First day of classes.

**July 6, Monday:** Last day to add/enroll and to declare pass/fail or no credit grading options.

**July 15, Wednesday:** Last day to drop/withdraw from the University (grade of W).

**July 20, Monday:** Last day of classes, including examinations.

## July B (11-day July Session)

*Classes meet four hours per day, Monday through Friday.*

**July 21, Tuesday:** First day of classes.

**July 21, Tuesday:** Last day to add/enroll and to declare pass/fail or no credit grading options.

**July 30, Thursday:** Last day to drop/withdraw from the University (grade of W).

**August 4, Tuesday:** Last day of classes, including examinations.

## August Term 2020

*(August 6 – 21, 2020)*

The August Term consists of one primary session: SMU-in-Taos August Session. Some areas of instruction may offer a limited number of selected courses during the August Term, August 6 – 21, 2020 with unique start, end, and deadline dates to accommodate the particular needs of the course.

## SMU-in-Taos August Session

*Note: Permission of SMU-in-Taos required for all enrollments.*

**August 5, Wednesday:** Travel day and arrival of students, 2-6 p.m.

**August 6, Thursday:** First day of classes.

**August 7, Friday:** Last day to enroll, add a course, or drop a course without academic record (tuition charges apply). See Bursar's website for more information. Last day to declare pass/fail or no credit grading options. Last day to file for graduation in August Term. Last day to request an excused absence for the observance of a religious holiday.

**August 14, Friday:** Last day for August Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**August 20, Thursday:** Last day to drop a course or withdraw from the University (grade of W).

**August 21, Friday:** Last day of classes, including examinations. Official close of term and conferral of degrees.

**August 22, Saturday:** Travel Day.

## Major Religious Holidays

*(August 2019-August 2020)*

Listing of religious holidays for use in requesting excused absences according to University Policy, Excused Absences for University Extracurricular Activities and Religious Holidays. For religious holidays not listed, the instructor or supervisor may contact the Office of the Chaplain.

### Christian

**Christmas:** December 25, 2019

**Good Friday:** April 10, 2020

**Easter Sunday:** April 12, 2020

**Easter Sunday (Orthodox):** April 19, 2020

### Hindu

**Janmashtami:** August 23, 2019

**Dasera:** October 7, 2019

**Diwali:** October 27, 2019

### Jewish\*

**Rosh Hashanah:** September 30, 2019

**Yom Kippur:** October 9, 2019

**Sukkot/Simchat Torah:** October 14-15, 2019

**Hanukkah:** December 23, 2019

**Purim:** March 10, 2020

**Pesach (Passover):** April 9-10, 2020

### Muslim

**Eid al-Adha:** August 12, 2019

**Islamic New Year:** August 31, 2019

**Ashura:** September 10, 2019

**Mawlid an-Nabi:** November 10, 2019

**Ramadan:** April 24, 2020

**Eid al-Fitr:** May 24, 2020

\* All holidays begin at sundown before the first day noted and conclude at sundown on the day(s) noted.

# Dedman College of Humanities and Sciences: General Information

## History

Dedman College of Humanities and Sciences has been the intellectual heart of the University since SMU was founded in 1911. The college, one of the nation's premier liberal arts institutions, has earned a reputation for the breadth and depth of its graduate programs and the quality of its learning and research resources. Graduate work at the master's level has been offered at SMU since the University first opened its doors in 1915 and doctoral work began in 1959.

## Degrees Offered

The degrees available through the graduate faculty of Dedman College are the M.A., M.S. and Ph.D.

- Anthropology, M.A., Ph.D.
- Medical Anthropology, M.A.
- Molecular and Cellular Biology, M.A., M.S., Ph.D.
- Chemistry, M.S.
- Chemistry, Ph.D., Materials/Polymer Track
- Chemistry, Ph.D., Organic/Medicinal/Bioorganic Track
- Theoretical and Computational Chemistry, Ph.D.
- Data Science, M.S.D.S.
- Geology, M.S., Ph.D.
- Geophysics, M.S., Ph.D.
- Applied Geophysics, M.S.
- Economics, M.A., Ph.D.
- Applied Economics, Graduate Certificate
- Applied Economics, M.A., Applied Economics Track
- Applied Economics, M.A., International Economics and Policy Track
- Applied Economics, M.A., Law and Economics Track
- Applied Economics and Predictive Analytics, M.S.
- English, M.A., Ph.D.
- History, M.A., Ph.D.
- Computational and Applied Mathematics, M.S., Ph.D.
- Medieval Studies, M.A.
- Physics, M.S., Ph.D.
- Psychology, M.A., Ph.D.
- Organizational Psychology, M.S.
- Religious Studies, M.A., Ph.D.
- Statistical Science, M.S., Ph.D.
- Applied Statistics and Data Analytics, M.S.
- Biostatistics, Ph.D.
- Women's and Gender Studies, Graduate Certificate

## Admission

Admission may be of two types:

1. **Full**, without restriction.
2. **Nondegree**, when the student needs background courses or desires transferable graduate credit for certification or some other purpose but is not undertaking a degree program. Nondegree admission is

selective. Not more than six credit hours of graduate credit earned under nondegree status may be applied toward an advanced degree in Dedman College.

No student is allowed to enroll unless notified of admission by the Graduate Office.

## Admission Requirements

Applicants holding the bachelor's degree from an institution of standard collegiate rank, recognized by the accrediting agencies in whose jurisdiction the college is located, may apply for admission to graduate studies. Graduates of colleges not fully recognized will be treated as special cases and required to produce evidence attesting to the quality of their programs. Any student whose bachelor's degree is not equivalent to the comparable baccalaureate degree from Southern Methodist University may be required to take sufficient additional work to make up the deficiency. All applicants must have adequate subject preparation in the chosen major field, normally an overall grade point average of 3.000 (on a 4.000 scale) and a satisfactory score on the GRE graduate school admission test.

## International Students

Applicants must meet the University's admissions requirements for English language proficiency. Applicants who do not speak English as their native language are required to supply scores on the TOEFL English language proficiency test or the IELTS English competency test. Unless specified otherwise by a program or department, applicants should consult the Office of Admission for more information on the minimum test scores required for admission: [www.smu.edu/Admission/Apply/FirstYearInternational/AdmissionRequirements](http://www.smu.edu/Admission/Apply/FirstYearInternational/AdmissionRequirements). This requirement is waived for students who have received undergraduate degrees from an English-language institution located in the United States, Canada, United Kingdom, Ireland, Australia, New Zealand, or South Africa. The Test of Spoken English or equivalent is required for teaching assistants.

Applicants who have completed studies at and received diplomas or professional titles from institutions outside the United States should ordinarily have completed 16 years of study: 12 years at the elementary and secondary school level and four years at the university level. Eligibility is judged by grades (marks), class obtained or rank achieved in class. Evidence of class placement therefore should be specifically set forth in the official records submitted.

Applicants holding bachelor's degrees from foreign universities should not assume that these degrees will be automatically accepted in U.S. universities. Applicants who have achieved first or high second class from universities that confer classes based on grades (marks) will be preferred. Applicants holding bachelor's degrees with honors or master's degrees have a better chance of being accepted in U.S. universities. Also, decisions will be based on the academic standing of the institutions from which the applicant has graduated. Professional diplomas and higher certificates from technical or vocational schools are normally not considered as equivalent to a bachelor's degree. Departments have the option of making authentication of transcripts part of the process of offering assistantships to international students.

## Application Procedure

The online application for Dedman college graduate degrees can be accessed at [gradadmission.smu.edu/apply/](http://gradadmission.smu.edu/apply/).

For more information, students should contact [smugrad@smu.edu](mailto:smugrad@smu.edu). A complete application should include the following:

1. The online application.
2. An official transcript for all schoolwork after high school.
3. The application fee of \$75 collected online.
4. Three letters of recommendation submitted online.
5. GRE graduate school admission test scores submitted electronically.
6. TOEFL English language proficiency test scores for international applicants.
7. Writing samples required for English, history and religious studies programs.

## Application Deadlines

<b>Fall</b>	<b>December 1:</b>	History, Psychology
	<b>December 15:</b>	Statistics Ph.D., Biostatistics
	<b>January 5:</b>	Religious Studies
	<b>January 15:</b>	Anthropology, Biology, Chemistry, Earth Sciences, Economics, English, Math, Physics
	<b>January 31:</b>	Theoretical and Computational Chemistry
	<b>February 1:</b>	Statistics (MASDA)
	<b>May 1:</b>	Final deadline (non-priority)
<b>Spring</b>	<b>November 30:</b>	Final deadline

Due to the extra time necessary for visa processing, international applicants are advised to have their online application completed at least two months before the final deadlines. Students who apply for departmental assistantships should submit their applications by the priority deadline as noted.

The online application for the Master of Science in the Data Science program can be accessed at [apply.datascience.smu.edu](http://apply.datascience.smu.edu). Application deadlines are available at [datascience.smu.edu](http://datascience.smu.edu).

## McNair Scholars Program

SMU encourages McNair Scholars to apply for graduate studies in Dedman College of Humanities and Sciences by waiving their application fee. In addition, 10 tuition fee waivers (five through Dedman College and five through the Lyle School of Engineering) are designated for admitted McNair Scholars applicants. SMU supports the aims of this program – to identify and mentor undergraduates as they prepare for graduate school – and would like to participate in helping students realize their goals. McNair Scholars should identify themselves as such on their application. Questions can be directed to [smugrad@smu.edu](mailto:smugrad@smu.edu).

## Institute for Recruitment of Teachers Applicants

SMU provides an application fee waiver for IRT applicants and invites applications to Dedman College's graduate programs. Departments award assistantships based on the merits of the applicant and the limits of the budget.

# Dedman College of Humanities and Sciences: Degree Requirements

General requirements of graduate degree programs are described on the following pages. Additional requirements for specific programs are contained in the corresponding departmental section.

## Master's Degrees

### Distribution of Courses

Each master's degree program includes a minimum of 30 credit hours of courses. At least 18 credit hours of the courses included in each student's program for a master's degree shall be those numbered 6000 or above. No courses below the 5000 level are allowed.

At least 18 credit hours must be earned in the major departmental field. (In order to obtain graduate credit for these courses, however, the student must have taken at least 12 credit hours of advanced credit in the major field, or else six credit hours in that and six in a closely related field approved by the chair of the major department and the graduate dean.) The remaining hours may also be taken in the major field, or else in one or more minor fields approved as closely related to the major subject.

### Credits

The great majority of courses offered meet three hours a week and have a value of three credit hours. See the Credit Hours Policy in the Enrollment and Academic Records section. The second digit of each course number indicates the value in credit hours of that course. All courses attempted for credit on a student's graduate program must average *B* (3.000) or better, with no grade less than *C* (2.000) applying toward the degree.

### Transfer of Credits

Not more than six credit hours of work from another institution shall apply toward a candidate's master's program. All credit for work transferred must show grades of *A* or *B* and is subject to the approval of the major department. An official record of such work must be on file in the Office of Research and Graduate Studies at Southern Methodist University at least 30 days before the student expects to receive the degree.

Official college transcripts are required for all college-level work attempted, regardless of transferability. Military transcripts are also required for students receiving VA benefits; more information is available from the University Registrar's Office at [www.smu.edu/EnrollmentServices/Veterans](http://www.smu.edu/EnrollmentServices/Veterans). Students are responsible for making sure a transcript of all transfer work attempted is sent to the University Registrar's Office immediately following completion of the work.

### Time Limit

No credit will be allowed toward the master's degree for courses taken more than six years before the date on which the degree is to be conferred. An exception to this policy can be made only by faculty members of the department in which the student is doing his or her major work, following a written examination of the subject matter petitioned.

### Thesis

The thesis, if required, must be written under the guidance of a thesis director who is a member of the faculty. The director will be appointed by the departmental faculty after consultation with the candidate.

In submitting a thesis, the student thereby grants permission to the dean of Central University Libraries to make copies at the director's discretion, upon the request of individuals or institutions.

## **Examinations**

Candidates may be required to pass an oral and/or written examination, which will include a defense of the thesis if applicable and will test the candidate's knowledge of the major and minor fields. This examination must be taken before or on the date set by the University calendar.

With approval of the departmental faculty, the departmental chair or the departmental director of graduate studies, as appropriate, shall appoint a committee of the graduate faculty to review the thesis (if applicable) and to conduct the examination. The departmental chair or director will notify members of the committee of their appointments and report the committee membership to the dean of the Office of Research and Graduate Studies.

The committee for master's level shall consist of at least three members, two of whom must be the major adviser or a designate, who will serve as chair, and a tenured/tenure-track member of the candidate's major department. The third member (or additional members) of the committee may be an additional member of the candidate's major department or an external reviewer, appointed with the approval of the department chair.

The examination will be conducted by the committee and by any other members of the faculty who wish to attend as nonvoting members. The chair of the examining committee will set a date, hour and place for the examination that is agreeable to the committee members and the candidate. A unanimous vote of the committee is necessary for approval of the examination. Students who fail the examination may be given a second examination, at a time to be determined by the committee, but not later than one year after the initial examination. Those who fail the examination the second time are thereby disqualified for a degree.

## **The Degree of Doctor of Philosophy**

The degree of Doctor of Philosophy is awarded in recognition of high attainment in a special field of knowledge, as evidenced by examination and by a dissertation presenting the results of significant and original research. General requirements are listed below. In many programs, however, there are additional requirements, and students should carefully check the policy in their particular program.

### **Qualifying Examination**

The purpose of the qualifying examination is to test the student's knowledge of the field of specialization, to assess familiarity with the published research in the field, and to determine whether the student possesses critical and analytical skill necessary for completion of degree. The examination may be written and/or oral and normally is administered two or three years after matriculation in the program.

When a faculty committee is responsible for this examination, the members should be drawn from the field of specialization so as to be able to assess the student's ability in breadth as well as depth. If a minor field also is involved, a faculty member in the minor area should participate in administering the qualifying examination. Even though it is not necessary for the qualifying examination committee to be the same as the dissertation committee, a significant overlap between the two committees is desirable for continuity.

A student who fails the qualifying examinations may apply for the privilege of a second examination. Failure on the second examination will render a student ineligible to continue in the Ph.D. program.

### **Admission to Candidacy**

Admission to a graduate program does not imply admission to candidacy for the doctoral degree. To be admitted to candidacy, the student must satisfy the language requirements, if any, in the program and must pass the qualifying examination in the program of study. Upon completion of these requirements, the department will recommend to the graduate dean that the student be admitted to candidacy. The recommendation will be made within five months of the qualifying examination or satisfying the language requirement, whichever comes later.

### **Residency and Coursework**

The Ph.D. degree normally requires at least 48 credit hours of graduate work, of which a maximum of 12 credit hours can be in dissertation research. Normally, a transfer student may be granted up to 24 hours of credit. Additional transfer

credit may be granted only with the approval of the graduate dean. The 48 credit hours may include research, reading and dissertation courses. Some departments may require additional hours. (See department requirements for details.)

Continuous enrollment is required of Ph.D. students, unless they are on research leave. Students undertaking full-time research off campus may petition the department for a research leave of a maximum of two years. Students who do not enroll for two consecutive terms without formal research leave must reapply for admission to the program. Students who do not enroll for one term without formal research leave may petition the graduate dean for reinstatement of their student status. After a student has completed the required minimum credit hours toward the Ph.D. program, enrollment for research is possible for four additional terms.

The minimum residence requirement is a total of 18 credit hours completed within three terms of residence at SMU. International students may need to satisfy additional residence requirements to comply with U.S. Citizenship and Immigration Services regulations.

## **Time Limits**

Ordinarily a student enrolled for full-time study should pass the qualifying examination by the end of the third year. An extension of one year may be granted by the dean upon submission of a petition by the student and the endorsement of the student's department. Except under unusual circumstances, extensions beyond the fourth year will not be granted.

The doctoral dissertation should be submitted and accepted within five years after the student has been admitted to candidacy. An extension of one year can be granted by the graduate dean. After this time, the students will be dropped from candidacy and can be readmitted only by passing a second qualifying examination, except under special circumstances. In such cases, new time limits will be set by the student's committee with the approval of the dean.

Time spent on research leaves will not be counted as part of the time limit. If a student must take an unavoidable leave of absence for medical or family reasons, leaves may be granted without affecting time limits. The decision to grant such a leave of absence will be made by the department and approved by the graduate dean. In the case of part-time students, time limit requirements will be interpreted appropriately to allow for their part-time status.

Ordinarily, credit is not allowed for graduate courses (including transfers) that are more than six years old at the time of the qualifying examination. Should the time limits be exceeded, a department may petition the dean to re-validate the credits. Approval is granted only in cases of exceptional merit.

## **Dissertation**

A candidate for the doctoral degree must present an acceptable dissertation within the major field of study. It must demonstrate that the candidate has technical competence in the field and has done research of an independent character. It must add to and modify what was previously known or present a significant interpretation of the subject based on original investigation.

Prior to admission to candidacy, the candidate may be required by the department to present a prospectus for the dissertation to a faculty committee.

## **Dissertation Defense**

The defense is an examination administered by the student's Dissertation Committee. The Dissertation Committee shall consist of 1) the major adviser, who will serve as chair; 2) at least two other full-time members of the candidate's major department; and 3) at least one external reviewer who is either a faculty member outside the candidate's department or, with the approval of the department chair and the graduate dean, a scholar not associated with the University.

For all candidates, the major adviser (or designate) must be a full-time member of the department. Faculty members with joint appointments (excluding courtesy appointments) are considered internal members of the departments only, and they may not serve as outside members of the committee. The Dissertation Committee is appointed by the department chair or the director of graduate studies with the approval of the dean after the presentation of the prospectus, given well before the dissertation defense.

The examination will be conducted by the committee and by any other members of the faculty who wish to attend as nonvoting members. The chair of the examining committee will set a date, hour and place for the examination that is agreeable to the committee members and the candidate, with notification at least a week in advance.

Notice of the dissertation defense should be distributed to all department faculty, the dean of the college and the graduate dean. A unanimous vote of the committee is necessary for approval of the examination. Students who fail the examination may be given a second examination, at a time to be determined by the committee, but not later than one year after the initial examination. Those who fail the examination the second time are thereby disqualified for a degree.

## **Preparing the Dissertation for Submission**

The basic requirements for preparing the dissertation are outlined in the *Dissertation and Thesis Guide* located online at [www.smu.edu/graduate/CurrentStudents/Graduation/](http://www.smu.edu/graduate/CurrentStudents/Graduation/).

The dissertation must be completed to the satisfaction of the student's dissertation adviser and Dissertation Committee, and the Office of Research and Graduate Studies. Deadlines for the submission of dissertations are outlined at the beginning of each term. Upon successful completion of the dissertation defense, the Signature Page must be signed by the Dissertation Committee. Students are responsible for all fees, including those for electronic publishing.

In submitting a dissertation, the student grants permission to the dean of Central University Libraries to make copies at the dean's discretion, upon the request of individuals or institutions.

# Dedman College of Humanities and Sciences: Academic Programs

## Anthropology

[www.smu.edu/anthro](http://www.smu.edu/anthro)

**Professor** Caroline Brettell, **Department Chair**

**Professors:** Eric G. Bing, Caroline Brettell, Karen Lupo, David Meltzer

**Associate Professors:** Michael Adler, Sunday Eiselt, Mark McCoy, Neely Myers, Nia Parson, Christopher Roos, Carolyn Smith-Morris

**Assistant Professors:** Maryann Cairns, Kacy Hollenback, Ann Horsburgh, Nicolas Sternsdorff-Cisterna

**Lecturer:** Matthew Boulanger

## Anthropology, Ph.D.

The Ph.D. program in anthropology offers graduate studies in archaeology and in cultural anthropology (with concentrations in medical anthropology or globalization and international development).

### Degree Requirements

The Ph.D. degree in anthropology carries the following requirements:

1. Students must complete a minimum of 54 credit hours of approved graduate coursework at SMU, including six credit hours of dissertation coursework. Up to 24 credit hours may be waived for advanced courses taken elsewhere. In addition, students may test out of advanced courses based on prior graduate-level experiences. Please check the Department of Anthropology's website to confirm current course listings.
2. The M.A. degree en route to the Ph.D. will be awarded to students who are accepted into the graduate program and who receive a "low pass" or higher on the general M.A. examination in their subfield given at the end of two years' coursework (36 credit hours). However, only students who achieve a "pass" or higher on this examination may advance into the Ph.D. program.
3. Students must satisfy all curricular requirements as specified by the department faculty. For additional details, students should see the department *Redbook* (also available on the department's website at [www.smu.edu/anthro](http://www.smu.edu/anthro)).
4. Students must demonstrate an ability to function proficiently in one or more languages selected from among the following: French, German, Russian, Spanish or substitute languages approved by the department.
5. Students must demonstrate a satisfactory knowledge of analytical methods (quantitative or qualitative, as appropriate).
6. Students must pass a Ph.D. qualifying examination, including an oral defense of a dissertation proposal in their subfield.
7. Students must write and make a successful defense of a dissertation. Degree candidates may concentrate in any subfield except biological anthropology.

### Cultural Anthropology (21 Credit Hours)

The following courses are required for students focusing on cultural anthropology:

- ANTH 5334 - History of Anthropology, Part One
- ANTH 5335 - History of Anthropology, Part Two
- ANTH 5344 - Research Methods in Ethnology
- ANTH 6320 - Regional Ethnography
- ANTH 7333 - Advanced Research Methods
- ANTH 7342 - Seminar in Social Organization

- ANTH 7351 - Research Strategies in Ethnology

### Additional Requirements (33 Credit Hours)

Additional credit hours may pertain to concentrations in medical anthropology or globalization and international development.

### Archaeology (24 Credit Hours)

The following courses are required for students focusing on archaeology:

- ANTH 5334 - History of Anthropology, Part One
- ANTH 5335 - History of Anthropology, Part Two
- ANTH 6300 - World Archaeology
- ANTH 6301 - Principles of Archaeology
- ANTH 6342 - Archaeological Sciences
- ANTH 6387 - Advances in the Practice of Archaeology
- ANTH 7313 - Archaeological Theory
- ANTH 7317 - Archaeological Research Strategies

### Additional Requirements (30 Credit Hours)

Students must take at least one course from each of the three groups listed below (Groups B, C, and D) and a second course from one of the first two groups (Group B or C), for a total of 12 credit hours. Students can select up to 18 credit hours of electives from the elective listing of archaeology courses, six credit hours of which can be field school.

#### Group B

Group B courses include:

- ANTH 6302 - Statistics in Anthropology
- ANTH 6332 - Special Problems in Anthropology (archaeological topic)
- ANTH 6351 - Research in Anthropology
- ANTH 6352 - Research in Anthropology
- ANTH 6353 - Research in Anthropology
- ANTH 6354 - Research in Anthropology
- ANTH 6355 - Research in Anthropology
- ANTH 6156 - Research in Anthropology
- ANTH 6256 - Research in Anthropology
- ANTH 6383 - Geoarchaeology

#### Group C

Group C courses include:

- ANTH 5310 - Human Osteology: Biology of the Human Skeleton
- ANTH 6325 - Introduction to Osteology I: Human-Animal Interactions
- ANTH 6333 - Laboratory Methods in Archaeology
- ANTH 6388 - Geospatial Archaeology
- ANTH 7321 - Ceramic Analysis for Archaeologists

## Group D

Group D courses include:

- ANTH 6310 - The Prehistory of the American Southwest
- ANTH 6368 - North American Archaeology
- ANTH 6385 - Pacific Island Archaeology
- ANTH 7318 - Late Pleistocene Prehistory of North America

## Anthropology, M.A.

The M.A. in anthropology degree is only available to students enrolled in the Ph.D. program in anthropology at SMU. See the Ph.D. program information for further details on earning the M.A. degree.

## Medical Anthropology, M.A.

The M.A. in medical anthropology program is a training program in applied anthropology for students seeking involvement in health care agencies, hospitals, clinics and other health delivery organizations.

## Degree Requirements

Candidates must complete 36 credit hours of academic work, distributed as follows:

### Required Courses (12 Credit Hours)

- ANTH 5336 - Health in Cross-Cultural Perspective
- ANTH 5344 - Research Methods in Ethnology
- ANTH 6343 - Biomedicine, Culture, and Power
- ANTH 6353 - Research in Anthropology

### Recommended Course:

- ANTH 7333 - Advanced Research Methods (strongly recommended)

### Elective Courses (24 Credit Hours)

Twenty-four elective hours of graduate coursework must be completed, distributed as follows. For courses outside the anthropology department, students must obtain the approval of their adviser prior to enrollment.

- **Health/Medical Topics:**  
At least two courses must be on health/medical topics; one course should be taken outside of the department.
- **Medical Anthropology/Globalization:**  
The remainder of the elective courses must be either in medical anthropology or globalization. Students should meet with their adviser each semester to ensure appropriate selection of courses is made.

Total: 36 Credit Hours

## Anthropology Courses

### ANTH 5310 - Human Osteology: Biology of the Human Skeleton

*Credits: 3*

Analysis of the human musculoskeletal system in both forensic and ancient contexts. In this laboratory course, students will learn the measurement and assessment of sex, age, race and stature.

### **ANTH 5334 - History of Anthropology, Part One**

*Credits: 3*

Analytical history of anthropology from the Classical period to the 20th century. Explains the content and development of theory, method, and interpretation.

### **ANTH 5335 - History of Anthropology, Part Two**

*Credits: 3*

Traces the theoretical developments in ethnology and archaeology from 1960 to the present, with intense readings and a focus on the potential utility of theoretical coherence in the discipline.

### **ANTH 5336 - Health in Cross-Cultural Perspective**

*Credits: 3*

Cross-cultural study of the cultural construction and social organization of medical systems in preindustrial and industrialized societies, including the political economy of health, ethnomedicine, international health, ethnopharmacology, and bioethics. Prerequisites: ANTH 3301, ANTH 3306 or approval of instructor.

### **ANTH 5344 - Research Methods in Ethnology**

*Credits: 3*

Examination of methodologies and techniques appropriate for different types of ethnological research.

### **ANTH 5381 - Field Methods in Archaeology**

*Credits: 3*

Methods of excavation, survey, site analysis, and interpretation used in archaeological research. Participants also engage in discussions and written responses regarding the ethics and responsibilities of working with indigenous communities.

### **ANTH 5382 - Field Methods in Archaeology**

*Credits: 3*

Methods of excavation, recording, and interpretation used in archaeological research. Students may petition to have this course fulfill the lab science requirement. (Fort Burgwin Research Center)

### **ANTH 5681 - Field Methods in Archaeology**

*Credits: 6*

Participants are engaged in all aspects of archaeological field and laboratory research, including excavation, recording of finds, survey mapping of sites, laboratory analyses of archaeological materials, and interpretation of intact archaeological contexts. (Fort Burgwin Research Center)

### **ANTH 5981 - Field Methods in Archaeology**

*Credits: 9*

Participants are engaged in all aspects of archaeological field and laboratory research, including excavation, recording of finds, survey mapping of sites, laboratory analyses of archaeological materials, and interpretation of intact archaeological contexts. (Fort Burgwin Research Center)

### **ANTH 6049 - Graduate Full-Time Status**

*Credits: 0*

For students not yet advanced to candidacy.

### **ANTH 6156 - Research in Anthropology**

*Credits: 1*

Independent study and research.

### **ANTH 6256 - Research in Anthropology**

*Credits: 2*

Independent study and research.

### **ANTH 6300 - World Archaeology**

*Credits: 3*

An archaeological overview of the human trajectory, beginning with the origins of modern humans, and then looking at human interactions with specific environments, and sociocultural development over time.

### **ANTH 6301 - Principles of Archaeology**

*Credits: 3*

An advanced seminar course dealing with the fundamentals of modern archaeology.

### **ANTH 6302 - Statistics in Anthropology**

*Credits: 3*

This is an introductory graduate-level course describing the specific use of quantitative and statistical methods in the subdisciplines of archaeology and cultural anthropology.

### **ANTH 6303 - Political Economy of Health**

*Credits: 3*

Explores topics in health and healing from a political economy perspective. Addresses social and economic factors influencing culture change and health and healing practices within a society. Examines health inequities around the globe.

### **ANTH 6304 - Migration, Ethnicity, and Nationalism**

*Credits: 3*

Examines three interrelated topics: migration, ethnicity, and nationalism. Focuses on major theoretical positions and on specific ethnographic cases.

### **ANTH 6305 - Applied Anthropology**

*Credits: 3*

The application of anthropological theories and methods to problems in contemporary societies, including global business, community development, health care issues, agricultural and/or environmental programs, urban planning, tourism projects, and educational policy.

### **ANTH 6307 - Global and Public Health**

*Credits: 3*

Provides an overview of issues in international health, with a focus on contributions of anthropology and anthropologists to international health issues.

### **ANTH 6309 - Human Rights, Indigenous Peoples, and Nation States**

*Credits: 3*

An examination of human rights issues among contemporary indigenous peoples, especially the impact on their cultures and societies from governmental and nongovernmental organizations, large-scale development programs, and global tourism.

### **ANTH 6310 - The Prehistory of the American Southwest**

*Credits: 3*

Covers current theoretical and research topics in the Native American Southwest, including origins of sedentism, community organization, regional abandonments, and the sociopolitics of indigenous archaeology.

**ANTH 6316 - Advanced Seminar in Ethnology I**

*Credits: 3*

Varying topics.

**ANTH 6317 - Advanced Seminar in Ethnology II**

*Credits: 3*

Varying topics.

**ANTH 6320 - Regional Ethnography**

*Credits: 3*

Worldwide exploration of ethnography, exploring similarities and differences across time and space. Prepares students to write their own regional papers in preparation for their qualifying exams. Prerequisites: Second- or third-year graduate status or permission of instructor.

**ANTH 6323 - Linguistic Analysis**

*Credits: 3*

The techniques needed for linguistic fieldwork: phonological, morphological, and syntactic analysis. Prepares students to work with unwritten languages and in urban speech communities.

**ANTH 6325 - Introduction to Osteology I: Human-Animal Interactions**

*Credits: 3*

Explores the evolution of human and animal interactions through a comparative study and analysis of their skeletons. Examines variations in nature's grand design, including the origins of different skeletal features, the evolution of these features over time, and the ways humans influenced the development of many of these features through processes such as targeted hunting and selective breeding. Introduces the science of taphonomy in hands-on learning labs. Students learn how isotopic and biomolecular analyses of animal skeletal remains helps in understanding human-animal interactions.

**ANTH 6332 - Special Problems in Anthropology**

*Credits: 3*

Varying topics.

**ANTH 6333 - Laboratory Methods in Archaeology**

*Credits: 3*

Detailed examination of Old World and New World techniques of artifact classification, with an emphasis on lithic typology.

**ANTH 6342 - Archaeological Sciences**

*Credits: 3*

Uses of biological and physical sciences in archaeology: site discovery, dating, prehistoric ecology, diet, and technology.

**ANTH 6343 - Biomedicine, Culture, and Power**

*Credits: 3*

Examines the epistemology and history of biomedicine, medical bureaucracy, professionalism, medical education, alternative and popular medicine, economics, and health care.

**ANTH 6345 - Creating Global and Public Health Impact**

*Credits: 3*

Interdisciplinary approach to creating sustainable impact in global, public, and population health. Taught by engaging discussions, case studies, and helping local health organizations solve difficult institutional and community challenges.

**ANTH 6346 - Environmental Anthropology and Development**

*Credits: 3*

Analyzes the processes of globalization from the perspective of environmental anthropology and development.

**ANTH 6347 - Seminar in Mesoamerican Ethnology**

*Credits: 3*

Provides an understanding of contemporary Mesoamerica by examining the literature and field data from anthropological and interdisciplinary viewpoints.

**ANTH 6348 - Toxic Topics: Anthropology, Environment, and Health**

*Credits: 3*

Engages students in the anthropological study of the relationships between environment, health, and society. Designed around environmental issues, including climate change, water, food, energy, and other topics.

**ANTH 6351 - Research in Anthropology**

*Credits: 3*

**ANTH 6352 - Research in Anthropology**

*Credits: 3*

**ANTH 6353 - Research in Anthropology**

*Credits: 3*

**ANTH 6354 - Research in Anthropology**

*Credits: 3*

**ANTH 6355 - Research in Anthropology**

*Credits: 3*

**ANTH 6368 - North American Archaeology**

*Credits: 3*

Prehistory from the peopling of the New World through initial contacts with European civilization; regional sequences and ecological changes.

**ANTH 6372 - The Essentials in Biological Anthropology for Graduate Students**

*Credits: 3*

Designed for anthropology graduate students of all sub-disciplines and intended to provide comprehensive grounding in the breadth of research, method and theory in biological anthropology. Focuses on the recent literature but frames the discussion with some of the foundational research.

**ANTH 6383 - Geoarchaeology**

*Credits: 3*

An advanced survey of Earth science methods and techniques applied to archaeological research problems.

**ANTH 6384 - Global Issues and Development: An Overview**

*Credits: 3*

An introduction to the major forces driving globalization and economic development today, analyzing how these forces impact the lives, cultures, and identities of peoples around the world, with an emphasis on the developing world.

**ANTH 6385 - Pacific Island Archaeology**

*Credits: 3*

Seminar on the use of coastlines, oceans, rivers, marshes, lakes, and islands throughout human history.

**ANTH 6387 - Advances in the Practice of Archaeology**

*Credits: 3*

Introduces students to applied and cultural resource management archaeology, including the laws, ethics, procedures, and expectations for the public and private spheres of archaeological practice.

**ANTH 6388 - Geospatial Archaeology**

*Credits: 3*

Methods-focused course that covers how archaeologists apply spatial technology in research.

**ANTH 6390 - Current Issues in Anthropology**

*Credits: 3*

Seminar on selected topics.

**ANTH 6398 - Thesis**

*Credits: 3*

**ANTH 6399 - Thesis**

*Credits: 3*

**ANTH 7000 - Research**

*Credits: 0*

**ANTH 7313 - Archaeological Theory**

*Credits: 3*

Logical and rational structure of discourse in archaeology. Evaluation of the quality of arguments, propositions, and constructs based on archaeological information.

**ANTH 7317 - Archaeological Research Strategies**

*Credits: 3*

An examination of the logistics and strategies used in project development and fieldwork, through project completion. Emphasis is upon individual student problems.

**ANTH 7318 - Late Pleistocene Prehistory of North America**

*Credits: 3*

Seminar on the late Pleistocene human occupation of North America from the time of initial colonization, with an emphasis on paleoclimates, paleoenvironments, and human adaptations.

**ANTH 7321 - Ceramic Analysis for Archaeologists**

*Credits: 3*

Examination of procedures for analyzing ceramic artifacts, with special attention to problems of style, typology, dating, and provenience.

**ANTH 7333 - Advanced Research Methods**

*Credits: 3*

Students explore various methods of data analysis using their own data sets or those of a member of the faculty. Combines lecture and discussion with hands-on applications. Prerequisites: ANTH 5344 and ANTH 6302 (or STAT equivalent) or permission of instructor.

**ANTH 7341 - Anthropological Writing**

*Credits: 3*

Explains forms of writing at various stages of anthropological knowledge production. Addresses ethical issues of representation and knowledge production for various audiences. Provides practical experience in anthropological writing, from fieldwork to publication.

**ANTH 7342 - Seminar in Social Organization**

*Credits: 3*

Intensive investigation of the statics and dynamics of both social organization and social structure in various populations across the globe.

**ANTH 7351 - Research Strategies in Ethnology**

*Credits: 3*

Consideration of the theoretical and practical aspects of fieldwork: preparation for research, conduct in the field, and data analysis.

**ANTH 8049 - Graduate Full-Time Status**

*Credits: 0*

For students who have passed doctoral qualifying examinations.

**ANTH 8100 - Dissertation Research**

*Credits: 1*

Dissertation research, Ph.D. candidates.

**ANTH 8105 - Research**

*Credits: 1*

**ANTH 8200 - Dissertation Research**

*Credits: 2*

Dissertation research, Ph.D. candidates.

**ANTH 8398 - Dissertation Research**

*Credits: 3*

Dissertation research, Ph.D. candidates.

**ANTH 8399 - Dissertation Research**

*Credits: 3*

Dissertation research, Ph.D. candidates.

**ANTH 8698 - Dissertation Research**

*Credits: 6*

Dissertation research, Ph.D. candidates.

**ANTH 8699 - Dissertation Research**

*Credits: 6*

Dissertation research, Ph.D. candidates.

# Biological Sciences

www.smu.edu/biology

**Professor** William Orr, **Department Chair**

**Professors:** Santosh R. D'Mello, Richard Jones, Paul Ludden, William Orr, Steven Vik, Pia Vogel

**Associate Professors:** Albert Edward Glasscock, Robert Harrod, John Wise

**Assistant Professor:** Adam Norris, Zhihao Wu

**Lecturers:** Bianca Batista, Alejandro d'Brot

**Senior Lecturers:** Carolyn Harrod, Eva Oberdörster, Teresa Strecker

**Research Associate Professor:** Svetlana Radyuk

## Admission Requirements

In addition to meeting the minimum requirements described under Dedman College: Admission in the General Information section of this catalog, an applicant's preparation should include six credit hours of calculus or statistics, 16 credit hours of chemistry (including eight credit hours of organic chemistry) and at least four advanced courses in biology. Applicants are required to take the GRE graduate school admission test. Three letters of recommendation from individuals who know the candidate well and can speak to the candidate's ability for graduate study should be submitted before the candidate is admitted to the program.

## Good Standing

A student must maintain a *B* average (3.000 on a 4.000 scale) and receive no more than two grades at or below the grade of *C*. Failure to meet these requirements will result in either probationary status or in dismissal from graduate study. Enrollment in graduate seminar is required of students each term during their first two years in residence. Courses in biochemistry and molecular biology are also required of most beginning students.

Requirements with respect to proficiency in a second language, computer programming and statistical methodology or in other cognate fields will be determined for each candidate by a departmental advisory committee.

## Molecular and Cellular Biology, Ph.D.

### Admission to Candidacy

Admission to graduate study leading to the degree of Doctor of Philosophy does not constitute formal admission to candidacy for the degree. To become a candidate for the Ph.D. degree, a student must:

1. Complete successfully all coursework recommended by the departmental advisory committee.
2. Complete successfully a qualifying examination that includes both written and oral sections.
3. Defend before an appropriate faculty committee a monograph detailing the area of proposed research or a research proposal patterned after a grant proposal.

### Degree Requirements

To obtain the Ph.D. degree in molecular and cellular biology, the candidate must:

1. Meet the requirements set forth in the Degree Requirements section of this catalog.
2. Enroll for the courses necessary to bring the total number of credit hours of graduate coursework to 60 (as many as 24 credit hours may be waived for students with previous graduate work in the life sciences).
3. Carry out a research program under supervision of the faculty, prepare a dissertation and successfully defend it before an audience that includes the dissertation committee of the faculty.
4. Meet a residence requirement of two years as a full-time student at SMU.

## Molecular and Cellular Biology, M.A.

The M.A. in molecular and cellular biology program is designed for students who seek additional training in the biological sciences as a prerequisite to further study in professional schools or for individuals seeking additional training for secondary education.

## **Degree Requirements**

To obtain the M.A. degree, candidates must complete 30 credit hours in biological science with at least 12 credit hours from 6000-level courses. A three-term-hour research project is required of all students. At least one year must be spent as a full-time student at SMU.

## **Molecular and Cellular Biology, M.S.**

The M.S. in molecular and cellular biology program is designed primarily for students who are research oriented and who wish to prepare for advanced work at the doctoral level.

## **Degree Requirements**

To become candidates for the M.S. degree, students must prepare, present and successfully defend a written research proposal.

In addition, candidates must complete 30 credit hours, including 18 credit hours at the 6000 level and BIOL 6398 - Thesis, BIOL 6399 - Thesis, and conduct a research project, the results of which must be presented orally and defended before an appropriate examining committee of the faculty. At least one year must be spent as a full-time student at SMU.

## **Molecular and Cellular Biology, B.S./M.S.**

This degree program is designed for undergraduate students with a strong interest in a research career. It is an accelerated plan that results in both B.S. and M.S. degrees. Admission into the program is by petition and occurs during the spring term of the student's second year at SMU. Students may take graduate courses in the final year of their baccalaureate degree. Students should refer to the B.S./M.S. program information found on the Dedman College Undergraduate Catalog or contact the department directly for a complete description of the program.

## **Biological Sciences Courses**

### **BIOL 5102 - Structural Biology Seminar**

*Credits: 1*

Readings and discussions of the period 1933-1963 when structural molecular biology emerged. Readings include original research articles and historical reviews. Prerequisite: BIOL 5310/CHEM 5310 or consent of instructor.

### **BIOL 5110 - Biological Chemistry Laboratory**

*Credits: 1*

Two 3-hour labs each week for half a term. Prerequisites: BIOL 1301/BIOL 1101 (or BIOL 1401), BIOL 1302/BIOL 1102 (or BIOL 1402). Prerequisite or corequisite: BIOL 5310/CHEM 5310. If CHEM 5110 is counted toward a chemistry major or minor, it cannot be counted toward a biological sciences major or minor.

### **BIOL 5166 - Vertebrate Anatomy Laboratory**

*Credits: 1*

A laboratory course to accompany BIOL 5366/GEOL 5366. Exercises include basic anatomy, dissections, and examinations of fossil skeletons. Corequisite: BIOL 5366/GEOL 5366.

### **BIOL 5304 - Molecular Biology: Control and Expression of Genetic Information**

*Credits: 3*

DNA structure and replication, control of transcription and translation, and techniques in molecular genetics and recombinant DNA technology. Prerequisites: CHEM 3372 and C- or better in BIOL 3304.

### **BIOL 5305 - Genomics and Bioinformatics**

*Credits: 3*

Impact of completely sequenced genomes on current experimental and computational approaches to biomedical

research. Introduction to the technology, biology, and software exploited by molecular biology, genealogy, and medical diagnostic labs. Prerequisites: C- or better in BIOL 3304 and junior standing.

### **BIOL 5310 - Biological Chemistry: Macromolecular Structure and Function**

*Credits: 3*

Introduces the structure and function of macromolecules of biological importance, with a focus on nucleic acid and protein structure, enzyme kinetics, and carbohydrate and lipid chemistry. Includes 3 hours of lecture each week. The accompanying laboratory (BIOL 5110) is strongly recommended for biology majors. If CHEM 5310 is counted towards a chemistry major or minor, it cannot be counted towards a biological sciences major or minor. Prerequisites: C- or better in CHEM 3371, CHEM 3372 and junior standing.

### **BIOL 5311 - Biological Chemistry: Metabolism**

*Credits: 3*

Introduction to the pathways and regulatory events in the metabolism of carbohydrates, lipids, amino acids, and nucleotides. Includes 3 hours of lecture each week. Prerequisites: BIOL 1301/BIOL 1101 (or BIOL 1401), BIOL 1301/BIOL 102 (or BIOL 1402); CHEM 3371, CHEM 3372. If CHEM 5311 is counted toward a chemistry major or minor, it cannot be counted toward a biological sciences major or minor.

### **BIOL 5325 - General and Molecular Virology**

*Credits: 3*

Emphasis on the molecular aspects of viral replication and pathogenesis, including the roles of viruses in emerging human infectious diseases, cancer, and bioterrorism. Prerequisites: C- or better in BIOL 3304 and junior standing.

### **BIOL 5340 - Molecular Basis of Brain Development and Degeneration**

*Credits: 3*

Covers the molecular biology of brain development and degeneration. Interactive course that includes lectures and student presentations of publications describing important research findings related to neurodevelopment and neurodegeneration. Recommended: BIOL 3323. Prerequisites: BIOL 1302/BIOL 1102 (or BIOL 1402), BIOL 3304, BIOL 3350.

### **BIOL 5344 - Physical Chemistry of Proteins**

*Credits: 3*

Graduate-level course on the fundamental aspects of techniques used to interrogate the thermodynamics and kinetics of protein conformational changes, with emphasis on atomic resolution structural techniques. Prerequisites: BIOL 5310/CHEM 5310, CHEM 5383 and CHEM 5384, and instructor approval.

### **BIOL 5358 - Ecology of Parasitism**

*Credits: 3*

The biotic and abiotic factors influencing parasite communities. Emphasis on the free-living stages of parasites. Includes 2 hours of lecture and one 3-hour laboratory each week. Prerequisite: BIOL 3354.

### **BIOL 5359 - Host-Parasite Relationships**

*Credits: 3*

Analysis of host-parasite relations from an evolutionary and ecological viewpoint. Lectures and laboratories conducted at Fort Burgwin in New Mexico. Prerequisite: BIOL 3354. (SMU-in-Taos)

### **BIOL 5364 - Endocrine Physiology**

*Credits: 3*

Explores the role of hormones in maintaining physiological balance. Describes cellular actions of hormones in relation to subsequent effects in the whole organism. Prerequisites: C- or better in BIOL 3304 and BIOL 3350.

### **BIOL 5366 - Vertebrate Anatomy and Origins**

*Credits: 3*

An introduction to vertebrate anatomy with emphasis on structure and function. Examines processes that have affected

the diversity of vertebrate organisms, including origination, biogeography, and adaptation. The accompanying laboratory is a corequisite for biology majors and strongly recommended for all students. Prerequisites: BIOL 1301/BIOL 1101 (or BIOL 1401), BIOL 1302/BIOL 1102 (or BIOL 1402). Corequisite: BIOL 5166.

### **BIOL 6049 - Graduate Full-Time Status**

*Credits: 0*

### **BIOL 6111 - Literature of the Biological Sciences**

*Credits: 1*

### **BIOL 6114 - Concepts in the Biological Sciences**

*Credits: 1*

Discussion of current literature and new concepts in varied areas of the biological sciences.

### **BIOL 6120 - Graduate Seminar**

*Credits: 1*

### **BIOL 6128 - Graduate Seminar**

*Credits: 1*

### **BIOL 6170 - Graduate Research**

*Credits: 1*

Research in the biological sciences.

### **BIOL 6211 - Literature of the Biological Sciences**

*Credits: 2*

### **BIOL 6214 - Concepts in the Biological Sciences**

*Credits: 2*

Discussion of current literature and new concepts in varied areas of the biological sciences.

### **BIOL 6222 - Concepts in Molecular Genetic Investigation**

*Credits: 2*

This course instructs students in molecular genetic techniques: DNA isolation, restriction digestion/electrophoresis, PCR, bacterial transformation, plasmid purification, in vitro mutagenesis, genetic testing, and in silico analysis of DNA sequences.

### **BIOL 6270 - Graduate Research**

*Credits: 2*

Research in the biological sciences.

### **BIOL 6301 - Biochemistry and Structural Biology**

*Credits: 3*

Introduction to the structure and function of biological macromolecules, with specific emphasis on proteins, enzymes, catalytic mechanisms, and reaction kinetics.

### **BIOL 6303 - Concepts of Evolution**

*Credits: 3*

A study of the principles of biological evolution. Includes natural selection, adaptation, molecular adaptation, the formation of new species, the fossil record, biogeography, and the principles of classification.

### **BIOL 6304 - Concepts in Genetic Analysis**

*Credits: 3*

An introduction to the structure, function, and transmission of the genetic material.

### **BIOL 6306 - Human Physiology**

*Credits: 3*

Homeostatic control mechanisms in vertebrates, focusing on humans. Includes 3 hours of lecture each week.

Prerequisite: Graduate standing.

### **BIOL 6307 - Cell Regulatory Mechanisms**

*Credits: 3*

Mechanisms of cell regulation and control. Includes 3 hours of lecture and discussion each week.

### **BIOL 6310 - Advanced Cell Biology**

*Credits: 3*

Ultrastructure, molecular architecture, and physiologic function of cells and their organelles. Includes 3 hours of lecture and discussion each week.

### **BIOL 6311 - Literature of the Biological Sciences**

*Credits: 3*

### **BIOL 6312 - Proteins: Structure and Function**

*Credits: 3*

Protein structure determination, predictions of secondary and tertiary structure, enzyme mechanisms and design, and current topics in protein research.

### **BIOL 6314 - Concepts in the Biological Sciences**

*Credits: 3*

Discussion of current literature and new concepts in varied areas of the biological sciences.

### **BIOL 6315 - Selected Topics I**

*Credits: 3*

### **BIOL 6316 - Selected Topics II**

*Credits: 3*

### **BIOL 6318 - Advanced Topics in Biochemistry**

*Credits: 3*

Includes topics in protein and nucleic acid structure, enzyme kinetics and inhibition, binding of ligands and allostery, metabolic pathways, and methods of molecular analysis.

### **BIOL 6319 - Concepts in Immunology**

*Credits: 3*

A comprehensive introduction to the immune system in all its aspects, with emphasis on the latest advances, findings, and discoveries in the field of immunology. Designed for students interested in research.

### **BIOL 6321 - Molecular Biology of Prokaryotes**

*Credits: 3*

Molecular biology and biochemistry of prokaryotic cells, with emphasis on molecular genetics and regulatory mechanisms. Includes 3 hours of lecture and discussion each week.

### **BIOL 6322 - Molecular Biology of Eukaryotes**

*Credits: 3*

Structure and function of eukaryotic chromosomes as mediators of gene expression during growth, differentiation, and oncogenesis. Includes 3 hours of lecture and discussion each week.

### **BIOL 6325 - Cellular Aging**

*Credits: 3*

Nature of age-associated cellular changes in animals. Includes 3 hours of lecture and discussion each week.

Prerequisite: Permission of instructor.

### **BIOL 6331 - Concepts in Developmental Biology**

*Credits: 3*

The molecular genetic mechanisms and pathways that regulate pattern formation in invertebrates and vertebrates. Also, the application of this information in fields such as reproductive medicine, cancer research, human dysmorphology, and immunology.

### **BIOL 6350 - Advanced Topics in Developmental Genetics**

*Credits: 3*

Genetic aspects of cellular and organismal development. Includes 3 hours of lecture and discussion each week.

Prerequisites: BIOL 3304 and permission of instructor.

### **BIOL 6351 - Concepts in Cell Biology**

*Credits: 3*

The structure and function of eukaryotic cells, with an emphasis on research methods in this field.

### **BIOL 6360 - Environmental and Human Toxicology**

*Credits: 3*

Introduction to environmental toxicology, with a focus on fate, biotransformation, and biochemical and physiological impacts of pollutants on humans and wildlife. Includes 3 hours of lecture per week.

### **BIOL 6365 - Cancer Biology**

*Credits: 3*

Emphasis on the molecular features of oncogenesis and human cancers, including carcinogenesis, metastasis, and roles of genetic mutations and chromosomal aberrations during neoplasia.

### **BIOL 6370 - Research in Biology**

*Credits: 3*

Research in the biological sciences.

### **BIOL 6371 - Research in Biology**

*Credits: 3*

Research in the biological sciences.

### **BIOL 6372 - Research in Biology**

*Credits: 3*

Research in the biological sciences.

### **BIOL 6373 - Research in Biology**

*Credits: 3*

Research in the biological sciences.

**BIOL 6375 - Scientific Analysis and Writing: Biological Sciences**

*Credits: 3*

Development of skills necessary for the preparation of grant applications and scientific manuscripts for publication. Includes 3 hours of lecture, discussion, and reading each week.

**BIOL 6377 - Concepts in Bio/Nanotechnology**

*Credits: 3*

Introduces state-of-the-art approaches developed to improve the production of food, pharmaceuticals, and vaccines by using microbial, plant, and animal sources. Students research and discuss the implications of bio/nanotechnology in medicine.

**BIOL 6380 - Introduction to Research**

*Credits: 3*

**BIOL 6381 - Introduction to Research**

*Credits: 3*

**BIOL 6398 - Thesis**

*Credits: 3*

Thesis in the biological sciences.

**BIOL 6399 - Thesis**

*Credits: 3*

Thesis in the biological sciences.

**BIOL 6403 - Concepts in Microbiology**

*Credits: 4*

The biology of microorganisms, with an emphasis on diversity, disease, and the environment. Includes 3 hours of lecture and one 3-hour laboratory each week.

**BIOL 6460 - Environmental and Human Toxicology with Lab**

*Credits: 4*

Introduction to environmental toxicology, with a focus on fate, biotransformation, and biochemical and physiological impacts of pollutants on humans and wildlife. Includes 3 hours of lecture and one 3-hour laboratory each week.

**BIOL 7000 - Research in Biology**

*Credits: 0*

Research in the biological sciences.

**BIOL 7315 - Selected Topics**

*Credits: 3*

Selected topics in the biological sciences.

**BIOL 7316 - Selected Topics**

*Credits: 3*

Selected topics in the biological sciences.

**BIOL 8049 - Graduate Full-Time Status**

*Credits: 0*

**BIOL 8398 - Dissertation**

*Credits: 3*

Dissertation for the Ph.D. in the biological sciences.

**BIOL 8399 - Dissertation**

*Credits: 3*

Dissertation for the Ph.D. in the biological sciences.

**BIOL 8698 - Dissertation**

*Credits: 6*

Dissertation for the Ph.D. in the biological sciences.

**BIOL 8699 - Dissertation**

*Credits: 6*

Dissertation for the Ph.D. in the biological sciences.

**BIOL 8998 - Dissertation**

*Credits: 9*

Dissertation for the Ph.D. in the biological sciences.

**BIOL 8999 - Dissertation**

*Credits: 9*

Dissertation for the Ph.D. in the biological sciences.

# Chemistry

**Professor Elfi Kraka, Department Chair**

**Professors:** John Buynak, Werner Horsthemke, Elfi Kraka, Michael Lattman, Mark Schell, David Son

**Associate Professors:** Alexander Lippert, Peng Tao, Nicolay Tsarevsky, Brian Zoltowski

**Assistant Professors:** Doran Bennett, Isaac Garcia-Bosch, Devin Matthews, Tomce Runceveski

**Professor of Practice:** Jennifer O'Brien

**Senior Lecturers:** Andrea Adams, Helen Babbili

**Research Professor:** Rajan Vempati

**Professor Emeritus:** Ed Biehl, Patty Wisian-Neilson

## Admission Requirements

In addition to meeting the requirements described under Dedman College: Admission in the General Information section of this catalog, an applicant must hold a bachelor's degree with a major in chemistry. Applicants are required to take the GRE general graduate school admission test. If English is not the applicant's native language, he or she must also take the TOEFL English language proficiency test and achieve a minimum score of 80 on the Internet-based test. Three letters of recommendation from individuals who have worked with the applicant must be submitted with the application.

## Good Standing

A student must maintain a *B* average (3.000 on a 4.000 scale) and receive no more than two grades below the grade of *B-*. Failure to meet these requirements will result in either probation and/or dismissal from the graduate program.

## Chemistry, Ph.D., Materials/Polymer Track

### Degree Requirements

#### Primary Core Courses

The student must complete the primary core courses. The student must then complete secondary core courses, for the materials/polymer track. Additional courses will be selected based on the student's interest and research program and in consultation with the student's adviser and faculty committee. A core course may be substituted with another course with approval of the Department of Chemistry graduate adviser, in consultation with the student's research adviser.

- CHEM 6110 - Chemical Communications: Literature, Writing, and Presentations
- CHEM 6111 - Practical Laboratory Methods
- CHEM 6115 - Theory of the Chemical Bonds
- CHEM 6116 - Introduction to Bioorganic and Medicinal Chemistry
- CHEM 6118 - Overview of Materials Chemistry
- CHEM 6220 - Modern Aspects of Chemistry

#### Secondary Core Courses

- CHEM 5333 - Introduction to Polymer Chemistry
- CHEM 6113 - Practical Aspects of Spectroscopy
- CHEM 6114 - Chemical Kinetics

#### Teaching Practicum

The student will complete at least two terms of the teaching practicum to enhance communication skills.

- CHEM 7111 - Teaching Practicum I
- CHEM 7112 - Teaching Practicum II

## Current Topics in Research

All students must register for research topics courses for at least the first four terms in the program.

- CHEM 6120 - Current Topics in Research
- CHEM 6121 - Current Topics in Research

## Cumulative Exams

The student will take up to 12 cumulative exams until the required total score is obtained.

## Research Paper

At the end of the second year, the student will write a paper and orally describe the progress of his or her research, including a plan for the future research program to be completed for the dissertation. This will be presented to the department and graded by a faculty committee that includes the student's adviser.

- CHEM 7233 - Research Synopsis and Objectives

## Research Proposal

At the beginning of the student's third year, the student will write an original research proposal unrelated to the student's research program and will present this to the department and successfully defend this proposal before the faculty committee.

- CHEM 7334 - Proposal Methodology

## Candidacy

Upon successful completion of the above items, the student will be admitted to candidacy. The candidate must then:

## Graduate Courses

Enroll in a sufficient number of graduate courses to complete at least 48 credit hours.

## Presentation

Make a presentation at a professional meeting appropriate to the field of research.

- CHEM 7122 - Professional Meeting Oral Presentation

## Research Program

Complete his or her research program under the supervision of the faculty.

## Dissertation

Successfully write and orally defend before a faculty committee a dissertation on his or her individual research program.

- CHEM 8698 - Dissertation
- CHEM 8699 – Dissertation

# Chemistry, Ph.D., Organic/Medicinal/Bioorganic Track

## Degree Requirements

### Primary Core Courses

The student must complete the primary core courses. The student must then complete secondary core courses, for the organic/medicinal/bioorganic track. Additional courses will be selected based on the student's interest and research program and in consultation with the student's adviser and faculty committee. A secondary core course may be substituted with another course with approval of the Department of Chemistry graduate adviser, in consultation with the student's research adviser.

- CHEM 6110 - Chemical Communications: Literature, Writing, and Presentations
- CHEM 6111 - Practical Laboratory Methods
- CHEM 6115 - Theory of the Chemical Bonds
- CHEM 6116 - Introduction to Bioorganic and Medicinal Chemistry
- CHEM 6118 - Overview of Materials Chemistry
- CHEM 6220 - Modern Aspects of Chemistry

### Secondary Core Courses

- CHEM 5393 - Advanced Organic Chemistry
- CHEM 6113 - Practical Aspects of Spectroscopy
- CHEM 6119 - Synthetic Strategies

### Teaching Practicum

The student will complete at least two terms of the teaching practicum to enhance communication skills.

- CHEM 7111 - Teaching Practicum I
- CHEM 7112 - Teaching Practicum II

### Current Topics in Research

All students must register for research topics courses for at least the first four terms in the program.

- CHEM 6120 - Current Topics in Research
- CHEM 6121 - Current Topics in Research

### Cumulative Exams

The student will take up to 12 cumulative exams until the required total score is obtained.

### Research Paper

At the end of the second year, the student will write a paper and orally describe the progress of his or her research, including a plan for the future research program to be completed for the dissertation. This will be presented to the department and graded by a faculty committee that includes the student's adviser.

- CHEM 7233 - Research Synopsis and Objectives

### Research Proposal

At the beginning of the student's third year, the student will write an original research proposal unrelated to the student's research program and will present this to the department and successfully defend this proposal before the faculty committee.

- CHEM 7334 - Proposal Methodology

## Candidacy

Upon successful completion of the above items, the student will be admitted to candidacy. The candidate must then:

## Graduate Courses

Enroll in a sufficient number of graduate courses to complete at least 48 credit hours.

## Presentation

Make a presentation at a professional meeting appropriate to the field of research.

- CHEM 7122 - Professional Meeting Oral Presentation

## Research Program

Complete his or her research program under the supervision of the faculty.

## Dissertation

Successfully write and orally defend before a faculty committee a dissertation on his or her individual research program.

- CHEM 8698 - Dissertation
- CHEM 8699 - Dissertation

## Theoretical and Computational Chemistry, Ph.D.

SMU is the first university to offer a dedicated direct bachelors-to-Ph.D. degree program in theoretical and computational chemistry based on a four-year (66 credit hour) curriculum.

Theoretical Chemistry comprises several disciplines such as quantum chemistry, reaction dynamics, molecular mechanics and molecular dynamics, molecular modeling, statistical mechanics and quantum statistics, synergetics (nonlinear thermodynamics), etc. Among these disciplines, quantum chemistry is by far the strongest field as it is documented by hundreds of investigations and research projects carried out every year.

Although very often the terms theoretical chemistry and computational chemistry are synonymously used, both fields are not identical. In general, a discipline of theoretical chemistry such as synergetics is not necessarily considered a part of computational chemistry, whereas on the other hand, fields such as chemometrics, neural networks or computer-assisted synthesis clearly belong to computational chemistry rather than theoretical chemistry.

Research of the Computational and Theoretical Chemistry Group (CATCO) used to focus on quantum chemistry and Reaction Dynamics. However, in recent years, molecular modeling of larger molecules has become also important. Research at CATCO has moved from the small-molecule world into the large-molecule world, concentrating now more on biomolecules, engaging in drug design, and introducing computational nanotechnology. For additional details on CATCO research, see [smu.edu/CATCO](http://smu.edu/CATCO).

## Admission Requirements

In addition to meeting the general requirements described under Dedman College: Admission in the General Information section of this catalog, applicants are required to take the GRE general graduate school admission test. Applicants who do not speak English as their native language are required to supply scores on the TOEFL English language proficiency test or the IELTS English competency test. Three letters of recommendation are required.

Financial aid is available in the form of teaching/research assistantships, which include the waiver of tuition and fees.

## Degree Requirements

### Core Courses (19 Credit Hours)

- CHEM 6115 - Theory of the Chemical Bonds
- CHEM 6125 - Symmetry and Group Theory in Chemistry
- CHEM 6225 - Chemical Communications in Computational Chemistry
- CHEM 6325 - Introduction to Ab Initio Calculations: Hartree-Fock Theory
- CHEM 6326 - Density Functional Theory - Methodology and Application
- CHEM 6341 - Advanced Models and Concepts in Chemistry
- CHEM 6343 - Advanced Computational Chemistry
- CHEM 6344 - Computer-Assisted Drug Design: Fundamentals and Applications

### Elective or Special Topics Courses (6 Credit Hours)

Two courses chosen with the consent of adviser:

- CHEM 6345 - Going Beyond Hartree-Fock: Electron Correlation Methods
- CHEM 6346 - Calculation of Molecular Properties
- CHEM 6348 - Statistical Molecular Thermodynamics
- CS 7333 - Quantifying the World
- CS 7345 - Advanced Application Programming

### Instructional Training - Mandatory Teaching Assistantship (2 Credit Hours)

The student will complete two terms of the teaching practicum to enhance communication skills.

- CHEM 7111 - Teaching Practicum I
- CHEM 7112 - Teaching Practicum II

### Current Topics in Research (6 Credit Hours)

- CHEM 6120 - Current Topics in Research (three terms, for a total of 3 credit hours, taken pass/fail)
- CHEM 6121 - Current Topics in Research (three terms, for a total of 3 credit hours, taken pass/fail)

### Presentation (1 Credit Hour)

The student will make a presentation at a professional meeting appropriate to the field of research.

- CHEM 7122 - Professional Meeting Oral Presentation

### Research Courses (18 Credit Hours)

- CHEM 7151 - Research (one term, for a total of 1 credit hour)
- CHEM 7251 - Research (four terms, for a total of 8 credit hours)
- CHEM 7351 - Research (three terms, for a total of 9 credit hours)

### Candidacy (2 Credit Hours)

For admission to candidacy for the Ph.D. degree, the student must pass the following additional qualifying requirements:

- CHEM 7233 - Research Synopsis and Objectives
- Written summary of already published paper(s) or a summary of research results to be published and evaluated by a faculty committee

- Oral presentation of the summary and discussion of the future plans of the dissertation research program in front of a faculty committee
- Attendance at the CATCO group meetings including oral presentations of research progress in new topics in the field
- Attendance at the annual CATCO workshop (second week in December)
- Training in the use of modern computational chemistry packages and successful completion of all workshop exercises and a workshop exam
- Poster presentation at SMU's annual Research Day

## Defense of Thesis (12 Credit Hours)

Each student must complete a significant body of research, write a dissertation summarizing the published work (at least five peer-refereed articles are recommended), orally present this work before the department, and defend this work in front of a faculty committee.

**Note:** CATCO seniors (i.e. research professors and postdoctoral research fellows within CATCO) meet at the end of each fall and spring semester to evaluate each student's progress. Students will be informed of their progress in writing.

- CHEM 8698 - Dissertation
- CHEM 8699 - Dissertation

Total: 66 Credit Hours

## Chemistry, M.S.

Candidates for the M.S. degree in chemistry must complete 30 credit hours of graduate work acceptable to the department, complete and defend a thesis before a committee of faculty and a general audience from the department, and satisfy all general requirements of the graduate faculty.

## Chemistry Courses

### **CHEM 5110 - Biological Chemistry Laboratory**

*Credits: 1*

One 3-hour laboratory period each week. Corequisite: CHEM 5310. If CHEM 5110 is counted toward a chemistry major or minor, it cannot be counted toward a biological sciences major or minor.

### **CHEM 5185 - Laboratory Methods in Physical Chemistry**

*Credits: 1*

Laboratory experiments with emphasis on thermodynamics, chemical kinetics, and physical biochemistry. Includes a half-hour of lecture and 5 hour laboratory period each week for 5 weeks. Prerequisite: CHEM 5383.

### **CHEM 5188 - Advanced Physical Chemistry Laboratory**

*Credits: 1*

Laboratory experiments with emphasis on chemical kinetics and molecular spectroscopy. Includes a half-hour of lecture and 5 hour laboratory period each week for 5 weeks. Prerequisite: CHEM 5185. Corequisite: CHEM 5384 or permission of instructor.

### **CHEM 5192 - Inorganic Synthesis Laboratory**

*Credits: 1*

Introduces advanced techniques and methods used in the synthesis of inorganic compounds. Prerequisite or corequisite: CHEM 5392.

### **CHEM 5306 - Introduction to Computational Chemistry**

*Credits: 3*

Besides the normal lab experiments, modern chemists and biochemists perform "experiments" on the computer by

calculating the outcome of chemical and/or biochemical reactions. Introduces this new field in a hands-on fashion, and uses major quantum chemical packages. Prerequisites: CHEM 1303, CHEM 1304 or permission of instructor. Note: Class assignments and projects are completed in the computer lab outside of the regularly scheduled class times.

### **CHEM 5308 - Special Topics in Chemistry**

*Credits: 3*

Presentation of advanced special topics in chemistry that are at the forefront of current chemical interest. Content varies from term to term.

### **CHEM 5310 - Biological Chemistry: Macromolecular Structure and Function**

*Credits: 3*

Introduces the structure and function of macromolecules of biological importance, with a focus on nucleic acid and protein structure, enzyme kinetics, and carbohydrate and lipid chemistry. Includes 3 hours of lecture each week. The accompanying laboratory (CHEM 5110) is strongly recommended for chemistry majors. If CHEM 5310 is counted toward a chemistry major or minor, it cannot be counted toward a biological sciences major or minor. Prerequisites: C- or better in CHEM 3371, CHEM 3372 and junior standing.

### **CHEM 5311 - Biological Chemistry: Metabolism**

*Credits: 3*

Introduction to the pathways and regulatory events in the metabolism of carbohydrates, lipids, amino acids, and nucleotides. Includes 3 hours of lecture per week. Prerequisites: CHEM 3371, CHEM 3372.

### **CHEM 5317 - Introduction to Molecular Modeling and Computer-Assisted Drug Design**

*Credits: 3*

Presents a thorough and in-depth overview of methods and techniques in computer-assisted drug design. Topics include drug discovery and drug design, molecular recognition and docking, ligand-receptor interactions, pharmacophore searching, virtual screening, de novo design, molecular graphics, and chemometrics. Prerequisites: CHEM 1303, CHEM 1304 or permission of instructor. Note: Class assignments and projects are completed in the computer lab outside of the regularly scheduled class times.

### **CHEM 5321 - Understanding Chemistry**

*Credits: 3*

Focuses on a general understanding of chemistry in terms of models and concepts that describe structure, stability, reactivity, and other properties of molecules in a simple, yet very effective way. Prerequisites: CHEM 1303, CHEM 1304 or permission of instructor.

### **CHEM 5322 - Introduction to Nanotechnology**

*Credits: 3*

Introduces nanotechnology, which is expected to change lives and society more than computer technology and electricity have done together. Discusses nanomaterials and their applications. Prerequisites: CHEM 1303, CHEM 1304 or permission of instructor.

### **CHEM 5333 - Introduction to Polymer Chemistry**

*Credits: 3*

This course provides basic information on the synthesis, physical properties, and solution properties of high molecular weight molecules. Plastics, manufacturing, and fabrication of polymers are discussed. Prerequisites: CHEM 3371 and CHEM 3372.

### **CHEM 5344 - Physical Chemistry of Proteins**

*Credits: 3*

Graduate-level course on the fundamental aspects of techniques used to interrogate the thermodynamics and kinetics of protein conformational changes, with emphasis on atomic resolution structural techniques. Prerequisites: CHEM 5383 and CHEM 5384, knowledge of basic biochemistry, and instructor approval.

### **CHEM 5383 - Physical Chemistry I**

*Credits: 3*

Gas laws; kinetic molecular theory; introduction to thermodynamics, with applications to phase transitions and chemical equilibrium; chemical kinetics. Prerequisites: CHEM 1114 and CHEM 1304 with a grade of C or better, PHYS 1105 and PHYS 1304 or PHYS 1308, and MATH 1337, or permission of instructor.

### **CHEM 5384 - Physical Chemistry II**

*Credits: 3*

Elements of quantum mechanics and its description of many-electron atoms, bonding, and spectroscopy; intermolecular forces; structure of solids; and transport properties of fluids. Prerequisite: CHEM 5383.

### **CHEM 5392 - Advanced Inorganic Chemistry**

*Credits: 3*

Survey of the bonding, structure, and reactivity of inorganic compounds. Also, coordination, organometallic, and main group element chemistry. Includes 3 hours of lecture each week. Recommended: CHEM 5384.

### **CHEM 5393 - Advanced Organic Chemistry**

*Credits: 3*

Includes 3 hours of lecture each week. Prerequisite: CHEM 3372.

### **CHEM 5396 - Advanced Physical Chemistry**

*Credits: 3*

Includes 3 hours of lecture each week. Prerequisite: Permission of instructor.

### **CHEM 5398 - Medicinal Chemistry**

*Credits: 3*

Highlights the close relationships of organic chemistry and biochemistry with the field of medicine. Relies on the departmental computational laboratory to permit three-dimensional visualization of molecular interactions. Includes 3 hours of lecture each week. Prerequisites: CHEM 3371, CHEM 3372.

### **CHEM 5486 - Instrumental Analysis**

*Credits: 4*

The theory, operation, and application of instrumentation used in the modern chemical laboratory. Includes 2 hours of lecture and two 3-hour laboratory periods each week. Prerequisite: CHEM 3351 or permission of instructor; C- or higher in CHEM 1303, CHEM 1304, CHEM 1113, CHEM 1114.

### **CHEM 6000 - Research**

*Credits: 0*

For students who hold fellowships but who are not enrolled in any credit hour courses. No tuition.

### **CHEM 6049 - Graduate Full-Time Status**

*Credits: 0*

Allows graduate students who have finished the required number of hours for the M.S. or Ph.D. degree to have access to library and computer facilities on campus. The student is expected to be writing his/her research dissertation.

### **CHEM 6110 - Chemical Communications: Literature, Writing, and Presentations**

*Credits: 1*

Fundamentals of literature searching, scientific writing, oral and poster presentations, and research notebooks.

### **CHEM 6111 - Practical Laboratory Methods**

*Credits: 1*

Describes the theory behind and practice of laboratory techniques necessary to perform advanced synthetic chemical research.

### **CHEM 6112 - Advanced Stereochemistry**

*Credits: 1*

Advanced study in molecular geometry and relationships in space between atoms and groups in a molecule.

### **CHEM 6113 - Practical Aspects of Spectroscopy**

*Credits: 1*

Basic theory and practical applications of spectroscopy for chemists.

### **CHEM 6114 - Chemical Kinetics**

*Credits: 1*

Kinetics of gas-phase, surface, condensed-phase, polymer, photochemical, and enzyme reactions.

### **CHEM 6115 - Theory of the Chemical Bonds**

*Credits: 1*

Covers different descriptions of covalent bonding, including the ability to predict bonding structures in molecules and methods to test these predictions.

### **CHEM 6116 - Introduction to Bioorganic and Medicinal Chemistry**

*Credits: 1*

Protein structures, enzymes and receptors as drug targets, enzyme inhibitors, design of agonists, and design of antagonists.

### **CHEM 6117 - Chemical Periodicity: Reactivity and Structural Trends in Inorganic and Organometallic Compounds**

*Credits: 1*

Explores periodic or recurring trends of the chemical elements in terms of their properties and chemical behavior.

### **CHEM 6118 - Overview of Materials Chemistry**

*Credits: 1*

Surveys the synthesis, characterization, and applications of ceramics and glasses, polymers, metals, nanomaterials, semiconductors and conductors, and biomaterials.

### **CHEM 6119 - Synthetic Strategies**

*Credits: 1*

Formation of the carbon skeleton, organometallic reagents and coupling reactions, protecting groups and chemical compatibility, and convergent synthesis.

### **CHEM 6120 - Current Topics in Research**

*Credits: 1*

Review of current research as presented by visiting lecturers.

### **CHEM 6121 - Current Topics in Research**

*Credits: 1*

Review of current research as presented by visiting lecturers.

### **CHEM 6125 - Symmetry and Group Theory in Chemistry**

*Credits: 1*

Discusses symmetry: from how it is found in the macroscopic world to the specific application of symmetry and group theory in the microscopic world, including its fundamental role in the description of molecules via spectroscopic measurements and in quantum chemical calculations.

### **CHEM 6130 - Mechanisms in Organic, Organometallic, and Bioorganic Chemistry**

*Credits: 1*

Fundamental mechanistic concepts in bioorganic, materials, medicinal, organic, and organometallic chemistry; emphasizes mechanistic similarities of seemingly different types of reactions. Prerequisite: Passing grade on entrance exam covering CHEM 3371 and 3372 or equivalent.

### **CHEM 6220 - Modern Aspects of Chemistry**

*Credits: 2*

Overview of current important topics in chemistry and the relationship to research programs in the department. Prerequisite: Official admission to graduate program.

### **CHEM 6225 - Chemical Communications in Computational Chemistry**

*Credits: 2*

Research in computational and theoretical chemistry including SciFinder searches, literature studies, professional data management, visualization of data, writing manuscripts using LaTeX, the design of computational chemistry posters and talks, and the preparation of professional resumes. Research ethics will be discussed.

### **CHEM 6308 - Special Topics**

*Credits: 3*

Presentation of advanced special topics in chemistry that are at the forefront of current chemical interest. Content varies from term to term.

### **CHEM 6312 - Theory of Organic Chemistry**

*Credits: 3*

Advanced topics in organic chemistry, with a focus on physical organic concepts, mechanisms, and modern synthetic methodologies. Prerequisites: CHEM 3371, CHEM 3372.

### **CHEM 6313 - Modern Physical Organic Chemistry**

*Credits: 3*

Covers advanced topics in organic chemistry including molecular orbital theory, organometallic mechanisms, and photochemistry. Emphasis is placed on using mechanistic understanding to predict chemical reactivity.

### **CHEM 6325 - Introduction to Ab Initio Calculations: Hartree-Fock Theory**

*Credits: 3*

Quantum chemical investigations of the ab initio type normally start with a Hartree-Fock calculation. Students interested in quantum or computational chemistry have to acquire basic knowledge in Hartree-Fock theory before starting with the more advanced electron correlation theories. This course provides an introduction into Hartree-Fock theory.

### **CHEM 6326 - Density Functional Theory - Methodology and Application**

*Credits: 3*

Comprehensive overview of modern Density Functional Theory, including its advantages and pitfalls, combined with in-depth training about how to apply DFT calculations to pending chemical/biochemical problems. Prerequisite: CHEM 6343 or equivalent, or permission of the instructor.

### **CHEM 6331 - Theory of Analytical Chemistry**

*Credits: 3*

The theory, operations, and applications of instrumentation used in the modern chemical laboratory. Includes 2 hours of lecture and 4 hours of laboratory per week.

### **CHEM 6333 - Fundamental Aspects and Applications of Polymerization Techniques**

*Credits: 3*

Provides detailed information about the fundamental aspects (kinetics, mechanism) and application of all important

polymerization techniques used to prepare well-defined macromolecules, with special emphasis on controlled/living polymerizations.

### **CHEM 6341 - Advanced Models and Concepts in Chemistry**

*Credits: 3*

Advanced models and concepts will be presented to understand the structure, stability, and reactivity of molecules in organic, inorganic, and polymer chemistry.

### **CHEM 6342 - Nanotechnology: Fundamentals and Applications**

*Credits: 3*

Covers the fundamentals of nanotechnology, which is an interdisciplinary field that includes - among other nanosciences - nanoengineering and nanomedicine. Presents the applications of nanotechnology in a variety of disciplines.

### **CHEM 6343 - Advanced Computational Chemistry**

*Credits: 3*

Provides in-depth training on how to use the computer as an efficient tool to solve chemical problems. Uses major quantum chemical packages. Designed as an interdisciplinary course for all graduate students from chemistry, biochemistry, medicinal chemistry, biology, and engineering who want a thorough overview of methods and techniques applied in computational chemistry. Prerequisite: Permission of instructor.

### **CHEM 6344 - Computer-Assisted Drug Design: Fundamentals and Applications**

*Credits: 3*

Covers the fundamentals of CADD, recent and important developments in CADD methodologies, and their applications, including drug discovery, virtual screening, de novo design, and neural networks.

### **CHEM 6345 - Going Beyond Hartree-Fock: Electron Correlation Methods**

*Credits: 3*

The broad spectrum of current high-level electron correlation methods will be discussed and applied to challenging problems using a variety of quantum chemical packages installed on SMU's high performance computers. Prerequisites: CHEM 6343 and CHEM 6325 or equivalent, or permission of the instructor.

### **CHEM 6346 - Calculation of Molecular Properties**

*Credits: 3*

Provides the expert knowledge necessary to choose the best method available for the calculation of a certain molecular property. Prerequisite: CHEM 6343 or equivalent, or permission of the instructor.

### **CHEM 6348 - Statistical Molecular Thermodynamics**

*Credits: 3*

Introduces fundamental theories and applications of statistical mechanics and thermodynamics at the molecular level, needed to perform cutting-edge research in modern Theoretical and Computational Chemistry and Biology. Prerequisite: CHEM 5384 or permission from the instructor.

### **CHEM 6351 - Methods and Techniques of Research**

*Credits: 3*

The student is introduced to experimental methods that are sufficiently advanced that they can be employed at the research level in a variety of chemical fields. In learning these methods the students will be required to master the operation of sophisticated equipment. This equipment is associated with refined experimental techniques that include infrared spectroscopy, nuclear magnetic resonance, and atomic spectroscopy.

### **CHEM 6352 - Methods and Techniques of Research**

*Credits: 3*

The student is introduced to experimental methods that are sufficiently advanced that they can be employed at the research level in a variety of chemical fields. In learning these methods the students will be required to master the

operation of sophisticated equipment. This equipment is associated with refined experimental techniques that include infrared spectroscopy, nuclear magnetic resonance, and atomic spectroscopy.

### **CHEM 6397 - Biotransformation and Biocatalysis**

*Credits: 3*

Covers the history, application, and current trends of biotransformations and biocatalysis, with a focus on how biocatalysts are developed and used in pharmaceutical research.

### **CHEM 6398 - Thesis**

*Credits: 3*

The student is introduced to experimental methods that are sufficiently advanced that they can be employed at the research level in a variety of chemical fields. In learning these methods the students will be required to master the operation of sophisticated equipment. This equipment is associated with refined experimental techniques that include infrared spectroscopy, nuclear magnetic resonance, and atomic spectroscopy.

### **CHEM 6399 - Thesis**

*Credits: 3*

The student is introduced to experimental methods that are sufficiently advanced that they can be employed at the research level in a variety of chemical fields. In learning these methods the students will be required to master the operation of sophisticated equipment. This equipment is associated with refined experimental techniques that include infrared spectroscopy, nuclear magnetic resonance, and atomic spectroscopy.

### **CHEM 7101 - Independent Study**

*Credits: 1*

Readings in the chemical literature on current research topics related to the student's area of research.

### **CHEM 7108 - Special Topics**

*Credits: 1*

Presentation of contemporary topics in chemistry. Content varies from term to term.

### **CHEM 7111 - Teaching Practicum I**

*Credits: 1*

The student will develop communication skills and will gain experience in laboratory and classroom teaching as well as one-on-one instruction.

### **CHEM 7112 - Teaching Practicum II**

*Credits: 1*

The student develops communication skills and gains experience in laboratory and classroom teaching as well as one-on-one instruction. Prerequisite: CHEM 7111.

### **CHEM 7121 - Departmental Presentation**

*Credits: 1*

The student will present a departmental seminar (50 to 60 minutes) on a topic, generally in bioorganic or material chemistry, that is not related to his/her research.

### **CHEM 7122 - Professional Meeting Oral Presentation**

*Credits: 1*

The student develops communication and presentation skills to include giving an oral presentation on his/her research project at an appropriate professional meeting. Prerequisites: CHEM 6110, CHEM 7121.

### **CHEM 7151 - Research**

*Credits: 1*

Laboratory research.

**CHEM 7201 - Advanced Independent Study**

*Credits: 2*

Readings in the chemical literature on current research topics related to the student's research.

**CHEM 7208 - Special Topics**

*Credits: 2*

Presentation of contemporary topics in chemistry. Content varies from term to term.

**CHEM 7233 - Research Synopsis and Objectives**

*Credits: 2*

Students present research results and outline a plan for the dissertation research with a clear understanding of prior work and literature precedence for the proposed work. Prerequisites: CHEM 6110, CHEM 6111, CHEM 6112, CHEM 6113, CHEM 6114, CHEM 6115, CHEM 6116, CHEM 6117, CHEM 6118, CHEM 6119, and CHEM 7121 or higher.

**CHEM 7251 - Research**

*Credits: 2*

Laboratory research.

**CHEM 7301 - Advanced Independent Study**

*Credits: 3*

Readings in the chemical literature on current research topics related to the student's research.

**CHEM 7308 - Special Topics**

*Credits: 3*

Presentation of contemporary topics on chemistry. Content varies from term to term.

**CHEM 7334 - Proposal Methodology**

*Credits: 3*

The student conceives and fully develops an original research idea and writes a proposal on this work. The proposal topic must be unrelated to the student's dissertation research topic. The proposal is presented to and defended before a committee of faculty. The student is judged on the novelty of the idea and the development of a sound and feasible method. Prerequisites: CHEM 6110, CHEM 6112, CHEM 6113, CHEM 6114, CHEM 6115, CHEM 6116, CHEM 6117, CHEM 6118, CHEM 6119, CHEM 7121, CHEM 7233.

**CHEM 7351 - Research**

*Credits: 3*

Laboratory research.

**CHEM 8049 - Graduate Full-Time Status**

*Credits: 0*

Graduate full-time status at the Ph.D. level.

**CHEM 8698 - Dissertation**

*Credits: 6*

**CHEM 8699 - Dissertation**

*Credits: 6*

# Data Science

Dedman College is affiliated with two graduate programs in data science: the M.S. in applied statistics and data analytics (offered on campus) and the M.S. in data science (offered online).

## Applied Statistics and Data Analytics, M.S.

[www.smu.edu/statistics](http://www.smu.edu/statistics)

SMU's Department of Statistical Science offers a master's degree in applied statistics and data analytics (also known as "MASDA"), in which students apply advanced mathematical techniques in the areas of statistics, data analytics, machine learning, and data science.

This 12-course on-campus program requires each student to successfully complete eight core classes and four elective classes. These classes include theoretical and statistical methodology classes as well as training in a variety of software, including SAS, R, and Python. Students may select electives in biostatistics or other specialized areas. A consulting course develops skills in writing and communication, as students gain experience working with a real client or a large scale collaborative project. The program is designed to provide the necessary statistical training for graduates to have successful careers as analysts in a variety of fields.

Refer to the MASDA section of the catalog (p. 291) for admission requirements, courses, degree requirements and academic regulations.

## Data Science, M.S.

[www.datascience.smu.edu](http://www.datascience.smu.edu)

The M.S.D.S. degree is an interdisciplinary program that combines courses taught by professors from SMU's Dedman College, Lyle School of Engineering and Meadows School of the Arts. The program is delivered online to provide access to working professionals and students located around the world.

The program gives students who are prospective data scientists an enriched background in computer science, statistics, strategic behavior and data visualization. Course instruction includes oral and written communication skills and the basics of database structure, including building, maintaining and securing databases. Graduates will be able to form relevant questions, collect and analyze appropriate data, and make informed decisions regarding the question of interest.

Refer to the Data Science section of the catalog (p. 1252) for admission requirements, courses, degree requirements, academic regulations and the calendar.

## Data Science Courses

### DS 6110 - Immersion

*Credits: 1.5*

A three (plus) day immersion experience on SMU's Dallas campus. Students collaborate on group projects, attend information and networking sessions, and meet program faculty and leadership. Required for M.S. in data science students. \*International students, military personnel on deployment, and those with disabilities who cannot attend may have other arrangements made for the on-campus requirement of this course. Permission for non-attendance in-person MUST be approved prior to enrollment.

### DS 6120 - Capstone A

*Credits: 1*

Students spend the first of two consecutive full terms working on a collaborative group project. During the first of the two terms, students begin their work on the project and are expected to complete at least half the project by the end of

the term. Students develop and work on their projects under faculty supervision. Prerequisites: DS 7331 and department consent.

### **DS 6130 - Capstone B**

*Credits: 1*

Students spend the second of two consecutive full terms working on their collaborative group project from Capstone A. Students are then required to present their completed projects during the on-campus immersion, typically held near week 11 of the term. Prerequisite: DS 6120. \*International students, military personnel on deployment, and those with disabilities who cannot attend may have other arrangements made for the on-campus requirement of this course. Permission for non-attendance in-person MUST be approved prior to enrollment.

### **DS 6306 - Doing Data Science**

*Credits: 3*

An introduction to methods, concepts, and current practice in the growing field of data science, including statistical inference, algorithms, financial modeling, data visualization, social networks, and data engineering.

### **DS 6370 - Statistical Sampling**

*Credits: 3*

Covers principles of planning and conducting surveys: simple random sampling; stratified and systematic subsampling; means, variances, and confidence limits; finite population correction; sampling from binomial populations; and margin of error and sample-size determination. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6372.

### **DS 6371 - Statistical Foundations for Data Science**

*Credits: 3*

Noncalculus development of fundamental statistical techniques, including hypothesis testing for population means and proportions, analysis of variance, factorial designs, and linear regression. Covers obtaining sample sizes during the planning stages of research studies and emphasizes interpretation of results from analysis with SAS statistical software. Reserved for students in the M.S.D.S. program.

### **DS 6372 - Applied Statistics: Inference and Modeling**

*Credits: 3*

Extension of techniques taught in DS 6371 to multivariate data, including multiple linear regression, multivariate analysis of variance, canonical regression, and principal components analysis. Emphasizes interpretation of results from analysis with SAS. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6371.

### **DS 6373 - Time Series**

*Credits: 3*

Explores serially correlated observations recorded over time and the theory and methods to appropriately model such data using several parametric and non-parametric models to both estimate population parameters and forecast future values. Students learn how to apply autoregressive, moving average, ARMA, and ARIMA models through lectures, light-board sessions, coding in R, real life data sets, and interviews with currently practicing industry professionals. Students practice working with the statistical package R in estimating and visualizing these models through the use of numerous real-world datasets. Stationary and non-stationary time series with many covariates are addressed. Students also estimate the spectral density to estimate frequencies in the data. Concludes with a look at a neural network application to time series data and compares the performance of these models with the parametric models mentioned above. Prerequisite: DS 6372.

### **DS 6390 - Visualization of Information**

*Credits: 3*

Introduces data visualization and creative coding utilizing the Processing programming language. Explores visual and information design principles, primarily through hands-on programming exercises. Includes assignments and exams that

incorporate 2-D and 3-D computer graphics, interactivity, and data input. Covers procedural and object-oriented programming approaches to data visualization and provides an overview of leading-edge data visualization libraries and application program interfaces, including Web-based approaches. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6306.

### **DS 6391 - Visualization of Information and Creative Coding II**

*Credits: 3*

Extends the study of creative coding and visualization across numerous languages, specialized libraries/API's, and distribution platforms. Students build data-driven visualizations in Java, C++, and JavaScript, including the P5.js, three.js, and d3.js libraries. Prerequisite: DS 6390.

### **DS 7330 - File Organization and Database Management**

*Credits: 3*

A survey of current database approaches and systems, and the principles of design and use of these systems. Covers query language design and implementation constraints, and applications of large databases. Includes a survey of file structures and access techniques. Also, the use of a relational database management system to implement a database design project. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6306.

### **DS 7331 - Machine Learning I**

*Credits: 3*

Introduces data mining topics, with an emphasis on understanding concepts through an applied, hands-on approach. Includes other related topics such as data warehousing and dimensional modeling. All material covered is reinforced through hands-on implementation exercises. Prerequisites: DS 6110, DS 6372, and DS 7330; or instructor permission.

### **DS 7333 - Quantifying the World**

*Credits: 3*

In the global information age, data can be leveraged to rapidly answer previously unanswerable questions. Students explore how to make sense of the large amounts of data frequently available, from hypothesis formation and data collection to methods of analysis and visualization. Includes ways to set up Internet-level measurements and formulate testable hypotheses; ways to automatically gather, store, and query large datasets; and ways to apply statistical methods (descriptive and predictive) and information visualization to collected datasets. Students learn to use Python and R programming languages to carry out data collection, analysis, and visualization. Culminates in a final project using real data of the students' choosing. Reserved for students in the M.S.D.S. program. Prerequisite: DS 7331.

### **DS 7335 - Machine Learning II**

*Credits: 3*

An elective, theoretical course in Machine Learning providing an overview of multivariate nonlinear nonparametric regression, supervised classification, unsupervised classification, and deep learning. Begins with a portfolio of case studies to give an overview of the type of things that can be done with machine learning. Each area of machine learning is introduced with a description of how to test its performance. This is followed by hands on exercises. Learning through doing is the key goal of this class. Prerequisite: DS 7331.

### **DS 7337 - Natural Language Processing**

*Credits: 3*

Introduces natural language processing (NLP) as applied to data mining, text mining, and machine learning tasks with unstructured Big Data. Students receive a broad survey of the major tasks in natural language understanding with some coverage of natural language generation. Topics include document clustering and classification, automated tagging and highlighting, semantic search, and text normalization to support machine learning applications. Focuses on best practices for choosing the right tool and method for an application, illustrated with real-world case studies. Students gain experience building solutions from real-world data sets, utilizing WordNet and the data of some leading websites. Learn text classification, clustering, tagging, and synopsis; taxonomy alignment; corpus analytics; and semantic query analysis. Apply WordNet, Python, R, SVM, and LSA. Prerequisite: DS 7331.

## **DS 7346 - Cloud Computing**

*Credits: 3*

Introduces students to exponentially growing Cloud Computing technologies with an emphasis on the fundamental Cloud topics such as Virtualization, IaaS, PaaS, and DevOps. Includes a high-level overview of NoSQL. Covers big data topics such as Hadoop, MapReduce, Pig, Hive, and Spark. Intended to be hands-on with students working with current technologies that make Cloud possible. Prerequisite: DS 6306 and DS 7331, or department permission.

## **DS 7349 - Data and Network Security**

*Credits: 3*

Covers conventional and state-of-the-art methods for achieving data and network security. Private key and public key encryption approaches are discussed in detail, with coverage of popular algorithms such as DES, Blowfish, and RSA. In the network security area, the course covers authentication protocols, IP security, Web security, and system-level security. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6306.

## **DS 7374 - Business Analytics**

*Credits: 3*

Through a combination of lectures and case analyses, students learn how to practically implement and apply a proven, best practice methodology which illustrates how best to integrate analytics into corporate strategy. In addition, students gain experience in enabling businesses to solve real-world problems, some of which were previously intractable, using the models, methods, and techniques they have studied previously. Moreover, students extend their data science capabilities to handle challenges requiring prescriptive analytics through a brief yet thorough two-week introduction to optimization. Students gain the experience and expertise described above through a balanced combination of lectures and interviews with several practicing and senior level data scientists from a variety of industries. Prerequisite: DS 6372.

# Earth Sciences

www.smu.edu/earthsciences

**Professor** Robert T. Gregory, **Department Chair**

**Professors:** Robert T. Gregory, Matthew Hornbach, Bonnie Jacobs, Zhong Lu, Maria Beatrice Magnani, Jim Quick, Brian Stump, Neil Tabor, Crayton Yapp

**Associate Professors:** Stephen Arrowsmith, Heather DeShon,

**Assistant Professor:** Rita Economos

**Research Professors:** Anthony Fiorillo, Peter Malin, Mihan McKenna, Matthew Siegler, H. Troy Stuckey, Alisa J. Winkler, Dale A. Winkler, Pierre Zippi

## Geology or Geophysics Admission Requirements

The minimum requirements for admission to graduate study in the Earth sciences are those in effect for admission to the graduate programs of SMU. The candidate is required to submit scores on a recent GRE graduate school admission test. International students applying from countries where English is not the native language are required to submit scores on the TOEFL English language proficiency examination.

## Geology, Ph.D. Degree Requirements

To obtain the Ph.D. degree in geology, the student must have:

1. Successfully passed a general qualifying examination.
2. Completed a minimum of three years of graduate academic work (48 credit hours minimum), with at least two years of full-time residence on the SMU campus or at a research facility approved by the departmental faculty and the dean of graduate studies.
3. Written and made a successful public defense of a dissertation. Additional general requirements for the Ph.D. degree are outlined in the Degree Requirements section of this catalog.
4. Satisfied all curricular requirements as specified by the departmental faculty, including:

### Graduate Core Courses

- GEOL 5320 - Dynamic Earth I
- GEOL 6107 - Departmental Seminar (repeated each semester until candidacy is achieved)
- GEOL 6321 - Dynamic Earth II

### Dissertation Courses

The following courses are available to students throughout the dissertation process:

- GEOL 8398 - Dissertation Research
- GEOL 8399 - Dissertation Research
- GEOL 8698 - Dissertation Research
- GEOL 8699 - Dissertation Research
- GEOL 8998 - Dissertation Research
- GEOL 8999 - Dissertation Research

## Geophysics, Ph.D. Degree Requirements

To obtain the Ph.D. degree in geophysics, the student must have:

1. Successfully passed a general qualifying examination.

2. Completed a minimum of three years of graduate academic work (48 credit hours minimum), with at least two years of full-time residence on the SMU campus or at a research facility approved by the departmental faculty and the dean of graduate studies.
3. Written and made a successful public defense of a dissertation. Additional general requirements for the Ph.D. degree are outlined in the Degree Requirements section of this catalog.
4. Satisfied all curricular requirements as specified by the departmental faculty, including:

### Graduate Core Courses

- GEOL 5320 - Dynamic Earth I
- GEOL 6107 - Departmental Seminar (repeated each semester until candidacy is achieved)
- GEOL 6321 - Dynamic Earth II

### Dissertation Courses

The following courses are available to students throughout the dissertation process:

- GEOL 8398 - Dissertation Research
- GEOL 8399 - Dissertation Research
- GEOL 8698 - Dissertation Research
- GEOL 8699 - Dissertation Research
- GEOL 8998 - Dissertation Research
- GEOL 8999 - Dissertation Research

## Applied Geophysics, M.S. Degree Requirements

This degree plan is specifically developed for students interested in a career in exploration in the petroleum industry. To obtain the M.S. degree in applied geophysics, the student must have:

1. Successfully completed a minimum of 33 credit hours of graduate study as specified in the curriculum or acceptable to the departmental faculty.
2. Passed a general qualifying examination.
3. Completed and successfully defended a project related to some facet of applied geophysics.

## Geology, M.S. Degree Requirements

To obtain the M.S. degree in geology, the student must have:

1. Passed a general qualifying examination.
2. Written and successfully defended a thesis.
3. Successfully completed a minimum of 30 credit hours of graduate study acceptable to the departmental faculty, including:

### Graduate Core Courses

- GEOL 5320 - Dynamic Earth I
- GEOL 6107 - Departmental Seminar (repeated each semester until candidacy is achieved)
- GEOL 6321 - Dynamic Earth II

### Thesis Courses

- GEOL 6398 - Thesis
- GEOL 6399 - Thesis

# Geophysics, M.S.

## Degree Requirements

To obtain the M.S. degree in geophysics, the student must have:

1. Passed a general qualifying examination.
2. Written and successfully defended a thesis.
3. Successfully completed a minimum of 30 credit hours of graduate study acceptable to the departmental faculty, including:

### Graduate Core Courses

- GEOL 5320 - Dynamic Earth I
- GEOL 6107 - Departmental Seminar (repeated each semester until candidacy is achieved)
- GEOL 6321 - Dynamic Earth II

### Thesis Courses

- GEOL 6398 - Thesis
- GEOL 6399 - Thesis

## Earth Sciences Courses

### GEOL 5110 - Independent Study in Geoscience

*Credits: 1*

Independent study of a selected topic in geoscience. Individual study under direction of a faculty member allowed for GEOL 5110 or GEOL 5210; group projects allowed for GEOL 5310.

### GEOL 5166 - Vertebrate Anatomy Laboratory

*Credits: 1*

A laboratory course to accompany BIOL 5366/GEOL 5366. Exercises include basic anatomy, dissections, and examinations of fossil skeletons. Corequisite: BIOL 5366/GEOL 5366

### GEOL 5199 - Special Topics in Earth Sciences

*Credits: 1*

Topics of special interest not covered by the regular curriculum, taught by visiting scientists and those with temporary appointments at SMU. Can be cotaught together with faculty of the department. Prerequisite: GEOL 3340 or permission of instructor.

### GEOL 5210 - Independent Study in Geoscience

*Credits: 2*

Independent study of a selected topic in geoscience. Individual study under direction of a faculty member allowed for GEOL 5110 or 5210; group projects allowed for GEOL 5310.

### GEOL 5299 - Special Topics in Earth Sciences

*Credits: 2*

Topics of special interest not covered by the regular curriculum, taught by visiting scientists and those with temporary appointments at SMU. Can be cotaught together with faculty of the department. Prerequisite: GEOL 3340 or permission of instructor.

### GEOL 5310 - Independent Study in Geoscience

*Credits: 3*

Independent study of a selected topic in geoscience. Individual study under direction of a faculty member allowed for GEOL 5110 or GEOL 5210; group projects allowed for GEOL 5310.

### **GEOL 5320 - Dynamic Earth I**

*Credits: 3*

Covers the physical and chemical structure of the Earth and its evolution through geologic time; dynamic processes in the mantle and crust; the development of the theory of plate tectonics as a unifying mechanism for large-scale geologic processes; and the implications of plate tectonics and contemporary applications to geological and geophysical problems. Prerequisite: Permission of instructor.

### **GEOL 5356 - Principles and Application of Remote Sensing**

*Credits: 3*

Covers the principals of remote sensing, remote sensing collection systems, basic remote sensing image analysis and processing techniques, and the applications of remote sensing to geologic studies. Prerequisites: PHYS 1304 and MATH 1338, or permission of instructor.

### **GEOL 5360 - Electron Microprobe Analysis**

*Credits: 3*

Design and operation of the instrument. Correction procedures and computer automation. Analytical techniques and mineral chemistry.

### **GEOL 5366 - Vertebrate Anatomy and Origins**

*Credits: 3*

Introduces vertebrate anatomy, with emphasis on structure and function. Examines processes that have affected the diversity of vertebrate organisms, including origination, biogeography, and adaptation. Prerequisites: BIOL 1301/BIOL 1101 (or BIOL 1401), BIOL 1302/BIOL 1102 (or BIOL 1402), or permission of instructor. The accompanying laboratory, BIOL 5166, is strongly recommended.

### **GEOL 5368 - Paleoecology**

*Credits: 3*

Interactions between the living world and the Earth's changing environments through geologic time. Prerequisite: GEOL 3369 or permission of instructor.

### **GEOL 5369 - Introduction to Palynology**

*Credits: 3*

Provides an overview of palynology. Taphonomic processes and applications in paleoecology, paleoclimatology, archeology, plant taxonomy, and plant evolution are considered. No prerequisites. One field trip.

### **GEOL 5372 - Principles of Sedimentation**

*Credits: 3*

Study of the origin and evolution of sedimentary rocks in terms of interpretation of marine and non-marine sedimentary record.

### **GEOL 5374 - Petroleum Geology**

*Credits: 3*

Application of geologic principles to the location and recovery of hydrocarbon resources in the crust of the earth. Prerequisite: Permission of the instructor.

### **GEOL 5380 - Principles of Stratigraphy**

*Credits: 3*

Evolution and application of modern stratigraphic concepts, and the development of stratigraphic nomenclature. Emphasis on the integration of physical, biological and chemical parameters in interpretation of the rock record. Prerequisites: GEOL 3340 and CHEM 1304, or permission of instructor.

### **GEOL 5384 - Hydrogeology**

*Credits: 3*

Introduces the chemical and physical behavior of natural waters and the role of fluids in geologic processes. Includes the application of thermodynamics, kinetics, and fluid mechanics to understand such geologic processes as ore formation, sediment diagenesis, isograd formation, acid rain, global warming, and groundwater contamination.

Prerequisites: MATH 1338 and CHEM 1304, or permission of instructor.

### **GEOL 5386 - Geochemistry**

*Credits: 3*

A survey of geochemical processes within the Earth and at its surface, emphasizing mineral-water interactions and application of the principles of chemical equilibrium to the solution of geochemical problems. Prerequisite: GEOL 3452 or permission of instructor.

### **GEOL 5389 - Theory of Digital Data Processing in Geophysics**

*Credits: 3*

Covers linear transform theory, convolution, correlation, linear systems, Shannon sampling theorem, discrete Fourier transform, fast Fourier transform, Z-transform, inverse filtering, recursive filtering, optimum filtering, deconvolution, and power spectrum analysis. Prerequisite: MATH 3313 or permission of instructor.

### **GEOL 5391 - Potential Field Methods in Geophysical Exploration**

*Credits: 3*

Introduction to potential theory in geophysics. The emphasis is on gravity and magnetic techniques with a brief introduction to heat flow and electrical methods. Basic concepts and their application to hard and soft rock exploration are covered.

### **GEOL 5392 - Introduction to Seismology**

*Credits: 3*

Basic principles of seismology. Prerequisites: MATH 3313 and permission of instructor.

### **GEOL 5394 - Geophysical Problem-Solving**

*Credits: 3*

Covers approaches to problem-solving in geophysics, back-of-the-envelope approximations and dimensional analysis, analytical solutions and numerical techniques on the computer, inverse theory and error propagation, and use of models in the real world. Students complete a term project. Prerequisites: MATH 3313, MATH 3304, and knowledge of a programming language.

### **GEOL 5399 - Special Topics in Earth Sciences**

*Credits: 3*

Topics of special interest not covered by the regular curriculum, taught by visiting scientists and those with temporary appointments at SMU. Can be cotaught together with faculty of the department. Prerequisite: GEOL 3340 or permission of instructor.

### **GEOL 5459 - Soils and Paleosols**

*Credits: 4*

A lecture, lab, and field-based course about modern and ancient (paleosol) soil description, classification, and genesis. Emphasizes environmental controls on soil formation and distribution across Earth's landscapes. Recommended: CHEM 1303, CHEM 1304, CHEM 1113, CHEM 1114, CHEM 3351. Prerequisites: One 1300-level GEOL course and GEOL 3343, GEOL 3451, GEOL 3452, GEOL 3472.

### **GEOL 6049 - Graduate Full-Time Status**

*Credits: 0*

Full-time status for graduate students pursuing the master's degree.

### **GEOL 6107 - Departmental Seminar**

*Credits: 1*

Students attend and critically evaluate departmental lectures given by visiting scientists, visiting engineers, faculty, and fellow students. Required of all graduate students who have not yet passed their degree qualifying exam.

### **GEOL 6110 - Independent Study in Geoscience**

*Credits: 1*

Independent study of a selected topic in geoscience. Individual study under direction of a faculty member allowed for GEOL 6110 or GEOL 6210; group projects allowed for GEOL 6310. Prerequisite: Permission of instructor.

### **GEOL 6209 - Special Topics in Geological Sciences**

*Credits: 2*

Study of a narrowly defined topic in geological sciences.

### **GEOL 6210 - Independent Study in Geoscience**

*Credits: 2*

Independent study of a selected topic in geoscience. Individual study under direction of a faculty member allowed for GEOL 6110 or 6210; group projects allowed for GEOL 6310. Prerequisite: Permission of instructor.

### **GEOL 6302 - Sedimentology: Clastic Environments**

*Credits: 3*

Description and classification of terrigenous clastic sediments and sedimentary structures. Principal emphasis on analysis of modern and ancient siliciclastic depositional systems.

### **GEOL 6309 - Special Topics in Geological Sciences**

*Credits: 3*

Study of a narrowly defined topic in geological sciences.

### **GEOL 6310 - Independent Study in Geoscience**

*Credits: 3*

Independent study of a selected topic in geoscience. Individual study under direction of a faculty member allowed for GEOL 6110 or GEOL 6210; group projects allowed for GEOL 6310. Prerequisite: Permission of instructor.

### **GEOL 6321 - Dynamic Earth II**

*Credits: 3*

Description of modern methods of measuring geologic time and the establishment of isotopic, biostratigraphic, paleomagnetic, and geochemical stratigraphies. Examination of sedimentary, biological, and geochemical cycles (such as sea-level fluctuations, climatic variations, evolutionary patterns, atmospheric-oceanic compositions, and continental positions) and their influence on the Earth's sedimentary record. A list of required prerequisite readings is available from the departmental office.

### **GEOL 6338 - Thermodynamics of Geological Processes**

*Credits: 3*

Introduction to theoretical aspects of thermodynamics as they are applied in the Earth sciences to igneous, metamorphic, and sedimentary processes. Emphasis on fundamental relationships in thermodynamics and mineral equilibria in aqueous solutions, solid rocks, silicate melts, and isotopic systems.

### **GEOL 6340 - Structural Interpretation of Seismic Reflection Profiles**

*Credits: 3*

The practical application of reflection seismic method to tectonic analysis of deformed belts and sedimentary basins. Includes case studies from around the world, with emphasis on integration of seismic reflection data with surface and subsurface geological and/or geophysical information. Also, the use of restorable structural sections. Introduces the

basics of seismic processing in the framework of interpretation problems. Designed for geology and geophysics students. Prerequisite: GEOL 5320 or permission of instructor.

### **GEOL 6341 - Basin Analysis**

*Credits: 3*

Description of modes of origin of sedimentary basins, their thermal and subsidence history, and their patterns of sediment infill. Broad examination of modern concepts of thermal modelling, stratigraphy, sedimentology, and hydrocarbon generation. Offered only upon request.

### **GEOL 6363 - Environmental Geology Seminar**

*Credits: 3*

Timely geoscience-based environmental problems and scientific, environmental, political, economic, legal, and social aspects of potential solutions. Includes selected readings, seminars, guest speakers, and research projects.

### **GEOL 6371 - Isotope Geochemistry and Geochronology**

*Credits: 3*

Geochemistry of radiogenic and stable isotopes; evolution of Pb, Sr, and Nd isotope systems; application to problems in magma genesis, geothermal studies, tectonophysics, and geochronology; and application of isotopes as natural tracers.

### **GEOL 6375 - Theory of Heat Flow and Diffusion**

*Credits: 3*

Heat transfer theory applied to the study of the thermal field of the Earth and terrestrial planets. Convection and conduction in geologic systems. Geochemistry of the heat-producing elements uranium, thorium, and potassium and their interrelationship with terrestrial heat flow.

### **GEOL 6376 - Application of Geophysical Techniques of Geothermal Exploration**

*Credits: 3*

A detailed study of geophysical techniques with applications to geothermal exploration. Prerequisite: GEOL 6375 or permission of instructor.

### **GEOL 6380 - Geophysical Inverse Theory**

*Credits: 3*

Theoretical development and application of inversion theory to problems in geophysics. Prerequisite: Permission of instructor.

### **GEOL 6388 - Geodynamics**

*Credits: 3*

Advanced course that explores physics-based exposition of solid-Earth geophysical processes, including elasticity, flexure, heat transfer, gravity, fluid mechanics, rock rheology, faulting, and flows in porous media, using statistical methods. Prerequisite: Permission of the instructor.

### **GEOL 6390 - Principles and Application of Radar Interferometry**

*Credits: 3*

An advanced radar remote sensing course covering the principles of radar interferometry, InSAR processing and interpretation, advanced InSAR concepts, and InSAR applications to natural hazards. Prerequisite: Permission of instructor.

### **GEOL 6394 - Theoretical Seismology I**

*Credits: 3*

Continuum mechanics including viscoelastic materials, reciprocity, representation theorem, moment tensors, kinematic and dynamic source models, Green's functions, and matrix methods, including Haskell-Thompson. Prerequisite: GEOL 5392 or permission of instructor.

## **GEOL 6395 - Mathematical Methods of Geophysics and Theoretical Seismology II**

*Credits: 3*

Synthetic seismograms for layered materials, transform methods in the solution of the wave equation, Cagniard-de Hoop and the generalized ray solution, first-motion approximation, WKBJ approximation, reflectivity, and full wave theory. Prerequisite: GEOL 6394 or permission of instructor.

## **GEOL 6396 - Exploration Seismology**

*Credits: 3*

Covers the theoretical tools necessary for processing and interpreting seismic reflection and refraction surveys, and develops exploration sources and receivers. Includes processing techniques such as sampling theory, demultiplexing, normal move-out corrections, stacking, deconvolution, and migration. Also, the practical application of techniques to observational data. Prerequisites: GEOL 5389, GEOL 5392.

## **GEOL 6398 - Thesis**

*Credits: 3*

Research and writing of the thesis with guidance from the student's thesis director.

## **GEOL 6399 - Thesis**

*Credits: 3*

Research and writing of the thesis with guidance from the student's thesis director.

## **GEOL 7000 - Research**

*Credits: 0*

Intensive research on a narrowly defined topic in geology.

## **GEOL 7100 - Research**

*Credits: 1*

Intensive research on a narrowly defined topic in geology.

## **GEOL 7155 - Seminar in Geophysics**

*Credits: 1*

Seminar on selected topics in geophysics; subject matter varies term to term.

## **GEOL 7158 - Seminar in Sedimentology**

*Credits: 1*

Seminar on selected topics in sedimentology; subject matter varies term to term.

## **GEOL 7201 - Research in Sedimentology**

*Credits: 2*

Research project in a selected area of sedimentology.

## **GEOL 7203 - Research in Stratigraphy**

*Credits: 2*

Research project in a selected area of stratigraphy.

## **GEOL 7205 - Research in Paleontology**

*Credits: 2*

Research project in a selected area of paleontology.

## **GEOL 7209 - Research in Mineralogy and Petrology**

*Credits: 2*

Research project in a selected area of mineralogy and petrology.

**GEOL 7213 - Research in Geophysics**

*Credits: 2*

Research project in a selected area of geophysics.

**GEOL 7215 - Research in Geochemistry**

*Credits: 2*

Research project in a selected area of geochemistry.

**GEOL 7250 - Seminar in Paleontology**

*Credits: 2*

Seminar on selected topics in paleontology; subject matter varies term to term.

**GEOL 7251 - Seminar in Stratigraphy**

*Credits: 2*

Seminar on selected topics in stratigraphy; subject matter varies term to term.

**GEOL 7252 - Seminar in Sedimentology**

*Credits: 2*

Seminar on selected topics in sedimentology; subject matter varies term to term.

**GEOL 7253 - Seminar in Petrology**

*Credits: 2*

Seminar on selected topics in petrology; subject matter varies term to term.

**GEOL 7254 - Seminar in Geochemistry**

*Credits: 2*

Seminar on selected topics in geochemistry; subject matter varies term to term.

**GEOL 7255 - Seminar in Geophysics**

*Credits: 2*

Seminar on selected topics in geophysics; subject matter varies term to term.

**GEOL 7257 - Seminar in Structural Geology**

*Credits: 2*

Seminar on selected topics in structural geology; subject matter varies by term.

**GEOL 7300 - Research**

*Credits: 3*

Intensive research on a narrowly defined topic in geology.

**GEOL 7301 - Research in Sedimentology**

*Credits: 3*

Research project in a selected area of sedimentology.

**GEOL 7303 - Research in Stratigraphy**

*Credits: 3*

Research project in a selected area of stratigraphy.

**GEOL 7305 - Research in Paleontology**

*Credits: 3*

Research project in a selected area of paleontology.

**GEOL 7309 - Research in Mineralogy and Petrology**

*Credits: 3*

Research project in a selected area of mineralogy and petrology.

**GEOL 7313 - Research in Geophysics**

*Credits: 3*

Research project in a selected area of geophysics.

**GEOL 7315 - Research in Geochemistry**

*Credits: 3*

Research project in a selected area of geochemistry.

**GEOL 7317 - Research in Geomorphology**

*Credits: 3*

Research project in a selected area of geomorphology.

**GEOL 7350 - Seminar in Paleontology**

*Credits: 3*

Seminar on selected topics in paleontology; subject matter varies term to term.

**GEOL 7351 - Seminar in Stratigraphy**

*Credits: 3*

Seminar on selected topics in stratigraphy; subject matter varies term to term.

**GEOL 7352 - Seminar in Sedimentology**

*Credits: 3*

Seminar on selected topics in sedimentology; subject matter varies term to term.

**GEOL 7353 - Seminar in Petrology**

*Credits: 3*

Seminar on selected topics in petrology; subject matter varies term to term.

**GEOL 7354 - Seminar in Geochemistry**

*Credits: 3*

Seminar on selected topics in geochemistry; subject matter varies term to term.

**GEOL 7355 - Seminar in Geophysics**

*Credits: 3*

Seminar on selected topics in geophysics; subject matter varies term to term.

**GEOL 7357 - Seminar in Structural Geology**

*Credits: 3*

Seminar on selected topics in structural geology; subject matter varies by term.

**GEOL 7380 - Research Project in Applied Geophysics**

*Credits: 3*

Graduate-level research in applied geophysics, including interaction with ongoing programs in the industrial community.

**GEOL 8049 - Graduate Full-Time Status**

*Credits: 0*

Graduate full-time status, Ph.D. level.

**GEOL 8100 - Research**

*Credits: 1*

Research and study of selected geological topics; subject matter varies term to term.

**GEOL 8398 - Dissertation Research**

*Credits: 3*

Research and writing of the dissertation with guidance from the student's dissertation director.

**GEOL 8399 - Dissertation Research**

*Credits: 3*

Research and writing of the dissertation with guidance from the student's dissertation director.

**GEOL 8698 - Dissertation Research**

*Credits: 6*

Research and writing of the dissertation with guidance from the student's dissertation director.

**GEOL 8699 - Dissertation Research**

*Credits: 6*

Research and writing of the dissertation with guidance from the student's dissertation director.

**GEOL 8998 - Dissertation Research**

*Credits: 9*

Research and writing of the dissertation with guidance from the student's dissertation director.

**GEOL 8999 - Dissertation Research**

*Credits: 9*

Research and writing of the dissertation with guidance from the student's dissertation director.

# Economics

www.smu.edu/economics

**Professor** Santanu Roy, **Department Chair**

**Professors:** Nathan Balke, Raveendra Batra, Rajat Deb, Klaus Desmet, Tom Fomby, Kathy Hayes, Daniel Millimet, Santanu Roy, Tim Salmon

**Associate Professors:** Bo Chen, James Lake, Thomas Osang, Omer Ozak, Saltuk Ozerturk

**Assistant Professors:** Hao Dong, Rocio Madera, Nathaniel Pattison, Michael Sposi

**Senior Lecturers:** Helen Reynolds, Elizabeth Wheaton

**Lecturer:** J. H. Cullum Clark, Marcela Giraldo

## Economics, Ph.D.

### Admission Requirements

The minimum requirements for admission to the Ph.D. in economics are as follows:

1. Cumulative GPA of at least 3.000 (on a 4.000 scale) or equivalent in prior undergraduate and graduate coursework.
2. Excellent scores on the aptitude parts (verbal and quantitative) of the GRE graduate school admission test.
3. A bachelor's degree in economics, mathematics, statistics, engineering or fields with a similar level of technical background is required. Applicants with degrees in fields other than economics must have taken at least 12 credit hours of economics courses, including two intermediate theory courses, one in microeconomics and one in macroeconomics.
4. Mathematical proficiency equivalent to courses in multivariate calculus (i.e., three terms of university-level calculus), probability and statistics (two terms), and linear algebra.
5. TOEFL English language proficiency test scores, if required. TOEFL scores are required of all international students who are not native English speakers and who do not hold an undergraduate degree from an English language institution located in the United States, Canada, the United Kingdom, Ireland, Australia, New Zealand or South Africa.

### Degree Requirements

#### Comprehensive Examinations

Every student must pass written comprehensive (qualifying) examinations in microeconomic theory and macroeconomic theory. Only students who maintain a GPA of 3.000 in the first-year required courses are allowed to take the comprehensive exam. Students will normally take these exams following the end of the second term in the program and will have two opportunities to pass the exams.

#### Field Requirements

Two fields are required, chosen from the following:

- Development Economics
- Econometrics
- Experimental Economics
- Industrial Organization
- International Economics
- Labor Economics
- Mathematical Economics
- Monetary Economics
- Public Finance

Each field involves at least six credit hours of 7000-level coursework, and each must be completed with at least a grade of *B* in order for it to count towards a field requirement. Students should check with the director of doctoral studies to

verify that their course plan will satisfy requirements. ECO 6375 - Econometrics III can be used, with the prior approval of the director of doctoral studies, to count toward three credit hours of one six-hour field requirement.

### Third-Year Requirement

By the end of their third year, all students must submit a completed Faculty Adviser Form to the director of doctoral studies. By the end of their third year, all students must also complete an original research paper and present it to the faculty for approval. Students are formally admitted to candidacy for the Ph.D. program after this third-year paper requirement is satisfied.

### Dissertation

Completion of the Ph.D. program requires successful completion of a dissertation. The dissertation represents a substantial product of original research which, in the view of the student's dissertation committee, makes a significant contribution to the relevant field. The student must pass qualifying examinations and complete the field requirements before beginning work on the dissertation. Students should form a dissertation committee during their third year and submit the form with the committee structure by the end of that year. After the dissertation is completed, the student must defend the dissertation at a final oral examination.

### Course and Credit Hour Requirements and Time Limitations

Every Ph.D. student must earn a minimum of 48 credit hours in an approved program of study. Any course taken as an elective must be at the 5000 level and above and must be approved by the director of doctoral studies. Up to 24 credit hours of graduate coursework may be transferred from another institution upon approval by the department and the graduate dean. If a student wishes to request transfer credit, this request should be made prior to the beginning of their first year in the program. The field requirements must be completed within four years from the date the student enters the graduate program. The dissertation must be completed within five years of entering candidacy.

### Good Standing

Students pursuing a Ph.D. degree are required to maintain good standing by being enrolled in at least one credit course per term. ECO 8100, which carries one credit hour, may be used for this purpose at the thesis stage. In some cases, ECO 8000 may be used for this purpose if approved by the chair. To remain in good standing, graduate students must maintain a cumulative GPA of 3.000. If in any term the student falls below this GPA, the student will be placed on probation for one term. Students will also be evaluated by their adviser or the director of doctoral studies on their academic progress, research performance, and professional behavior. Failure to achieve satisfactory performance in any of these categories for two semesters can lead to a student being dismissed from the program.

## **Applied Economics and Predictive Analytics, M.S.A.E.P.A.**

The M.S. in applied economics and predictive analytics degree is designed to help meet the burgeoning demand for analytics training on the part of business, government and nonprofits. This degree focuses on economic analysis and decision-making along with strong quantitative training, and brings additional skills not typically provided in analytics programs found in statistics, engineering or business programs. "Predictive analytics" refers to the process of building models that predict consumer behaviors under different circumstances and help customize product offerings that better suit the tastes and preferences of consumers; "predictive analytics" also refers to building models to predict time series variables of importance to businesses and governments (e.g., product sales and tax revenues) and to evaluate competing government programs and business strategies. The M.S. is a 30 credit hour degree.

### Admission Requirements

The minimum admission requirements for the M.S. in applied economics and predictive analytics are as follows:

1. Undergraduate cumulative GPA of at least 3.000 (on a 4.000 scale).
2. Twelve credit hours of undergraduate economics, including two intermediate theory courses, one in microeconomics and one in macroeconomics.
3. An introductory course in statistics.

4. One term of calculus.
5. Satisfactory GRE graduate school admission test scores if the undergraduate GPA is lower than 3.000.

## Degree Requirements

The M.S. in applied economics and predictive analysis is a 30 credit hour degree.

### Required Core Courses (9 Credit Hours)

- ECO 5350 - Introductory Econometrics
- ECO 6381 - Economic Analysis I (microeconomics)
- ECO 6382 - Economic Analysis II (macroeconomics)

### Required Advanced Analytics Courses (6 Credit Hours)

- ECO 5375 - Economic and Business Forecasting
- ECO 6380 - Predictive Analytics for Economists

### Required Business Intelligence Courses (6 Credit Hours)

- ECO 5341 - Strategic Behavior
- ECO 6383 - New Approaches to Managerial Economics

### Required Global Perspective Courses (3 Credit Hours)

One course from the following:

- ECO 6320 - Applied Monetary Theory and Policy
- ECO 6330 - International Economic and Financial Environment
- ECO 6331 - International Trade
- ECO 6333 - Trade Policy and the World Trading System

### Elective Courses (6 Credit Hours)

Two courses from the following:

Any economics courses listed below not already taken to fulfill the business intelligence and global perspective requirements.

- ECO 5340 - Decision-Making Under Uncertainty
- ECO 5341 - Strategic Behavior
- ECO 5380 - Computing For Economics
- ECO 6352 - Applied Econometric Analysis
- ECO 6383 - New Approaches to Managerial Economics
- ECO 6330 - International Economic and Financial Environment
- ECO 6331 - International Trade
- ECO 6333 - Trade Policy and the World Trading System
- STAT 6307 - Introduction to Statistical Computing
- STAT 6301 - Experimental Statistics I
- STAT 6308 - SAS II and Databases

**Total: 30 Credit Hours**

## Applied Economics, M.A., Applied Economics Track

This track emphasizes the application of economic theory with quantitative skills and computer literacy as required by corporations and financial institutions in their economic decision-making processes. A rigorous theoretical economic framework is established for the study of government policy and the growing openness of the U.S. economy to international competition and economic events. At the same time, mathematical rigor is not compromised. The necessary concepts are developed from the basics but at a more deliberate pace than in a Ph.D. program.

### Admission Requirements

The minimum admission requirements for the M.A. in applied economics are as follows:

1. Undergraduate cumulative GPA of at least 3.000 (on a 4.000 scale).
2. Twelve credit hours of undergraduate economics, including two intermediate theory courses, one in microeconomics and one in macroeconomics.
3. An introductory course in statistics.
4. One term of calculus.
5. Satisfactory GRE graduate school admission test scores if the undergraduate GPA is lower than 3.000.

### Degree Requirements

Every student must earn at least 30 credit hours in an approved program of study, with at least half of the coursework being at the 6000 level. This plan does not require a master's thesis or master's papers. A comprehensive final exam is required.

All courses must be completed with a grade of *C* (2.000) or better and a *B* (3.000) average in all the courses taken in the program.

Students take three required core courses in economics that form the building blocks for further study and analysis in economics. Another three required courses provide applied training in econometrics and microeconomic analysis. Four additional elective courses are needed to complete the degree, two of which must be 6000-level courses. Some courses are offered in sequence, which means they are not offered every term.

### Required Core Courses (9 Credit Hours)

- ECO 5350 - Introductory Econometrics
- ECO 6381 - Economic Analysis I (microeconomics)
- ECO 6382 - Economic Analysis II (microeconomics)

### Required Applied Economics Courses (9 Credit Hours)

Three courses out of four:

- ECO 5375 - Economic and Business Forecasting
- ECO 6352 - Applied Econometric Analysis
- ECO 6380 - Predictive Analytics for Economists
- ECO 6383 - New Approaches to Managerial Economics

### Elective Courses (12 Credit Hours)

Four courses from the following, two of which must be at the 6000 level:

- ECO 5340 - Decision-Making Under Uncertainty
- ECO 5341 - Strategic Behavior
- ECO 5353 - Law and Economics
- ECO 5360 - Economic Development: Macroeconomic Perspectives
- ECO 5362 - Economic Growth
- ECO 5365 - Federal Government Expenditures

- ECO 5380 - Computing For Economics
- ECO 6320 - Applied Monetary Theory and Policy
- ECO 6330 - International Economic and Financial Environment
- ECO 6331 - International Trade
- ECO 6333 - Trade Policy and the World Trading System
- ECO 6391 - Financial Econometrics: Theory and Applications

Total: 30 Credit Hours

## Applied Economics, M.A., International Economics and Policy Track

This track is designed for students who wish to deepen their understanding of the changing global economic environment. Equal emphasis is placed on theory and practice in international economics. Students take three core courses in economic and quantitative analysis, which serve as the building blocks for further study and analysis in economics. The three required international courses provide students with the necessary background in theory and practice of international trade, finance and policy. Students can pursue special interests in international economics through elective courses.

### Admission Requirements

The minimum admission requirements for the M.A. in applied economics are as follows:

1. Undergraduate cumulative GPA of at least 3.000 (on a 4.000 scale).
2. Twelve credit hours of undergraduate economics, including two intermediate theory courses, one in microeconomics and one in macroeconomics.
3. An introductory course in statistics.
4. One term of calculus.
5. Satisfactory GRE graduate school admission test scores if the undergraduate GPA is lower than 3.000.

### Degree Requirements

Every student must earn at least 30 credit hours in an approved program of study, with at least half of the coursework being at the 6000 level. This plan does not require a master's thesis or master's papers. A comprehensive final exam is required.

All courses must be completed with a grade of *C* (2.000) or better and a *B* (3.000) average in the courses taken in the program.

Students take three required core courses in economics and another three required international economics courses. Four additional elective courses are needed to complete the degree. Students must have a total of five courses at the 6000 level.

### Required Core Courses (9 Credit Hours)

- ECO 5350 - Introductory Econometrics
- ECO 6381 - Economic Analysis I (microeconomics)
- ECO 6382 - Economic Analysis II (microeconomics)

### International Economics Courses (9 Credit Hours)

- ECO 6331 - International Trade
- ECO 6330 - International Economic and Financial Environment
- ECO 6333 - Trade Policy and the World Trading System

## Economics Courses (6 Credit Hours)

Two courses from the following:

- ECO 5360 - Economic Development: Macroeconomic Perspectives
- ECO 5375 - Economic and Business Forecasting
- ECO 5380 - Computing For Economics
- ECO 6352 - Applied Econometric Analysis
- ECO 6380 - Predictive Analytics for Economists

## Elective Courses (6 Credit Hours)

Two courses from the following:

- ECO 5340 - Decision-Making Under Uncertainty
- ECO 5341 - Strategic Behavior
- ECO 5353 - Law and Economics
- ECO 5360 - Economic Development: Macroeconomic Perspectives
- ECO 5362 - Economic Growth
- ECO 5365 - Federal Government Expenditures
- ECO 6320 - Applied Monetary Theory and Policy
- ECO 6330 - International Economic and Financial Environment
- ECO 6331 - International Trade
- ECO 6333 - Trade Policy and the World Trading System

**Total: 30 Credit Hours**

## Applied Economics, M.A., Law and Economics Track

The curriculum is customized to suit the need of lawyers for more knowledge of economics, particularly applied microeconomic analysis of problems commonly encountered by lawyers and judges, and includes econometric analysis often encountered by the courts from expert witnesses on both sides of a case. Because many candidates for this degree plan prefer to pursue a degree while actively engaged in the practice of law, most courses in the degree plan are scheduled for evening hours.

## Admission Requirements

The minimum admission requirements for the M.A. in applied economics are as follows:

- Undergraduate cumulative GPA of at least 3.000 (on a 4.000 scale).
- Twelve credit hours of undergraduate economics, including two intermediate theory courses, one in microeconomics and one in macroeconomics.
- An introductory course in statistics.
- One term of calculus.
- Satisfactory GRE graduate school admission test scores if the undergraduate GPA is lower than 3.000.

Applicants for the M.A. in applied economics enrolling in the law and economics track must be enrolled in the Dedman School of Law.

## Degree Requirements

Every student must earn at least 30 credit hours in an approved program of study, with at least half of the coursework being at the 6000 level. This plan does not require a master's thesis or master's papers. A comprehensive final exam is required.

All courses must be completed with a grade of *C* (2.000) or better and an overall *B* (3.000) average for all courses taken in the degree program.

Dedman law school students working toward the M.A. in applied economics will follow this 30 credit hour non-thesis plan, but will be permitted to substitute nine credit hours of approved law school coursework as electives. All students are required to take at least five courses at the 6000 level.

### Required Core Courses (15 Credit Hours)

- ECO 5341 - Strategic Behavior
- ECO 5350 - Introductory Econometrics
- ECO 5353 - Law and Economics
- ECO 6381 - Economic Analysis I
- ECO 6383 - New Approaches to Managerial Economics

### Elective Courses (6 Credit Hours)

Two courses from the following:

- ECO 5340 - Decision-Making Under Uncertainty
- ECO 5360 - Economic Development: Macroeconomic Perspectives
- ECO 5362 - Economic Growth
- ECO 5365 - Federal Government Expenditures
- ECO 5375 - Economic and Business Forecasting
- ECO 5380 - Computing For Economics
- ECO 6320 - Applied Monetary Theory and Policy
- ECO 6330 - International Economic and Financial Environment
- ECO 6380 - Predictive Analytics for Economists
- ECO 6382 - Economic Analysis II
- ECO 6391 - Financial Econometrics: Theory and Applications

### Other Elective Courses (9 Credit Hours)

Three courses of approved law school coursework may be substituted as electives.

**Total: 30 Credit Hours**

## **Economics, B.A. or B.S. (Accelerated Pathway to Applied Economics, M.A.)**

This accelerated M.A. in applied economics is a pathway for selected SMU undergraduates to earn a bachelor's and a master's degree in significantly less time than earning the two degrees separately. While working on their undergraduate degrees, current students have the opportunity to take an accelerated path toward obtaining the M.A. in applied economics. Once accepted, the accelerated pathway will allow for such students to receive both a B.A./B.S. in economics and an M.A. in applied economics in potentially five years of entering the university. Up to nine credit hours of suitably chosen graduate courses taken during the undergraduate years can be counted toward the M.A. degree in applied economics. All students will be required to complete a minimum total of 120 credits of coursework to earn the bachelor's degree and a minimum total of 30 credits of coursework to earn the master's degree.

### Admission Requirements

SMU undergraduates majoring in economics who want to pursue the accelerated M.A. in applied economics program should consult with the director of undergraduate studies for approval before the end of the spring semester of their sophomore year or after completing 60 credit hours including transfer coursework and test credits. Approved candidates should work closely with the director of undergraduate studies throughout their remaining undergraduate

studies to plan the appropriate undergraduate curriculum. To become a candidate for the accelerated master's program, the student must:

- Be enrolled in the economics B.A. or B.S undergraduate program at SMU
- Officially apply to the accelerated M.A. in applied economics program no later than one year prior to the time when the student would graduate with a bachelor's degree
- Have at least two recommendation letters from faculty members at SMU

In addition, by the time of admittance into the M.A. in applied economics program, the student must have the following:

1. An undergraduate cumulative GPA of at least 3.000 (on a 4.000 scale) throughout the student's undergraduate career.
2. Twelve hours of undergraduate economics courses, including two intermediate theory courses, one in price theory (microeconomics), and one in macroeconomics, with a grade of *B* or above in each of these courses.
3. An introductory course in statistics, with a grade of *B* or above.
4. One term of calculus, with a grade of *B* or above.

Candidates for the accelerated master's program must maintain good academic standing and satisfy the above criteria to be officially admitted to the M.A. program in applied economics.

## Degree Requirements

To receive an M.A. degree in applied economics under the accelerated pathway, the student must:

- Have a cumulative GPA of at least 3.000 (on a 4.000 scale) in the M.A. degree coursework (including the graduate coursework applied toward the bachelor's degree requirements)
- Complete a minimum total of 30 credit hours of graduate coursework at SMU (including the credit hours transferred from the bachelor's degree)
- Have been awarded an undergraduate degree at SMU and fulfilled other requirements for the M.A. degree in applied economics

## Courses

Students should refer to the Economics section of the Undergraduate Catalog for the B.A./B.S. degree requirements:

- Economics, B.A.
- Economics, B.S.
- Economics with Finance Applications, B.S.

Students should refer to the Economics section of the Graduate Catalog for the M.A. degree requirements:

- Applied Economics, M.A., Applied Economics Track
- Applied Economics, M.A., International Economics and Policy Track
- Applied Economics, M.A., Law and Economics Track

## Economics, M.A.

The M.A. in economics degree is only available to students currently in the Ph.D. program in economics at SMU.

## Degree Requirements

Students pursuing the Ph.D. program are qualified to receive the M.A. degree after fulfilling the following requirements: 1) passing the written comprehensive (qualifying) examinations in microeconomic theory and macroeconomic theory, and 2) completing 30 credit hours of courses in their program. These include the following required seven core courses and three elective courses:

### Required Core Courses (21 Credit Hours)

- ECO 6371 - Introduction to Quantitative Economics
- ECO 6372 - Econometrics I
- ECO 6384 - Microeconomic Theory I

- ECO 6394 - Macroeconomic Theory I
- ECO 6374 - Econometrics II
- ECO 6385 - Microeconomic Theory II
- ECO 6395 - Macroeconomic Theory II

## Elective Courses (9 Credit Hours)

Three courses from the following:

- ECO 7301 - Readings in Economics
- ECO 7302 - Topics in Economic Theory
- ECO 7305 - Mathematical Economics
- ECO 7306 - Advanced Economic Theory
- ECO 7321 - Labor Economics
- ECO 7322 - Development of Human Capital
- ECO 7332 - International Macroeconomic Theory and Policy
- ECO 7333 - International Trade
- ECO 7334 - Development Economics
- ECO 7341 - Market Structure
- ECO 7342 - Imperfect Markets
- ECO 7361 - Monetary Economics
- ECO 7362 - Monetary Theory and Policy
- ECO 7376 - Macroeconometrics
- ECO 7377 - Microeconometrics
- ECO 7378 - Topics in Econometrics
- ECO 8398 - Dissertation Research

**Total: 30 Credit Hours**

## Applied Economics Graduate Certificate

The certificate program in applied economics is focused on improving the use of statistical and data analysis tools and applying economic models in the economic decision making process of firms.

For non-SMU undergraduate students (domestic and international), the certificate can be especially attractive since the courses taken can be credited toward the M.A. in applied economics. Additionally, international students may obtain accreditation of the courses in their respective undergraduate or graduate programs.

## Admission Requirements

The minimum admission requirements for the graduate certificate in applied economics are as follows:

1. Undergraduate cumulative GPA of at least 3.000 (on a 4.000 scale).
2. Twelve credit hours of undergraduate economics, including two intermediate theory courses, one in price theory, and one in macroeconomics.
3. An introductory course in statistics.
4. One term of calculus.
5. Applicants whose undergraduate GPA is lower than 3.000 are required to submit GRE scores. The applicant's combined score on the verbal and quantitative sections must be at least 300.

## Academic Requirements

To earn the certificate in applied economics, students must complete four of the following courses offered during the Summer I and II sessions:

- ECO 5341 - Strategic Behavior
- ECO 5350 - Introductory Econometrics
- ECO 5353 - Law and Economics
- ECO 5365 - Federal Government Expenditures
- ECO 5375 - Economic and Business Forecasting
- ECO 6352 - Applied Econometric Analysis
- ECO 6380 - Predictive Analytics for Economists
- ECO 6383 - New Approaches to Managerial Economics
- ECO 6391 - Financial Econometrics: Theory and Applications

Total: 12 Credit Hours

## Economics Courses

### **ECO 5320 - Health Economics**

*Credits: 3*

An introduction to the economics of health and health care policies and how they have affected the structure, function, and cost-effectiveness of the health care industry, principally in the United States. Prerequisite: C- or better in ECO 3301.

### **ECO 5340 - Decision-Making Under Uncertainty**

*Credits: 3*

Provides a basis for the modeling of decision-making under conditions of incomplete information. Prerequisites: C- or better in the following: ECO 3301, ECO 3302 and STAT 2301, STAT 2331, or STAT 4340.

### **ECO 5341 - Strategic Behavior**

*Credits: 3*

Introduces the basic concepts and tools of game theory, with applications to various areas of economics. The various topics are unified by the techniques employed for determining the outcome in particular situations. Prerequisites: Graduate standing or C- or better in the following: ECO 3301 and STAT 2301, STAT 2331, or STAT 4340.

### **ECO 5342 - Experimental and Behavioral Economics**

*Credits: 3*

Students study the field of behavioral economics in which the underlying assumptions of economics models are tested using experimental techniques. Guided by behavioral regularities, new models of behavior are introduced. Prerequisite: C- or better in ECO 3301. Recommended: ECO 5341, ECO 5350.

### **ECO 5350 - Introductory Econometrics**

*Credits: 3*

The basic concepts of econometrics and, in particular, regression analysis, with topics geared to first-time regression users. Prerequisites: Graduate standing or C- or better in the following: MATH 1309 or MATH 1337; ECO 3301; and ITOM 2305 or STAT 2301, STAT 2331, or STAT 4340.

### **ECO 5353 - Law and Economics**

*Credits: 3*

Examines economic theories that explain the development of common law and constitutional law and the economic implications of contracts, antitrust laws, and liability rules. Prerequisites: Graduate standing or C- or better in the following: ECO 3301 and STAT 2301, STAT 2331, or STAT 4340.

### **ECO 5360 - Economic Development: Macroeconomic Perspectives**

*Credits: 3*

A macroeconomic examination of the economic issues faced by developing countries. Topics include population growth, national savings, capital accumulation, human capital formation, government institutions, and international

integration. Prerequisites: Graduate standing or C- or better in the following: ECO 3302 and STAT 2301, STAT 2331, or STAT 4340.

### **ECO 5362 - Economic Growth**

*Credits: 3*

Examines the facts and theories of economic growth, the economics of technological changes, and the role of governments and markets in promoting or impeding economic development. Prerequisites: Graduate standing or C- or better in the following: ECO 3301, ECO 3302 and STAT 2301, STAT 2331, or STAT 4340.

### **ECO 5365 - Federal Government Expenditures**

*Credits: 3*

Focuses on theoretical principles useful for analyzing the role of government intervention. Topics may vary from year to year. Prerequisites: C- or better in ECO 3301, MATH 1309 or MATH 1337, and one of the following: STAT 2301, STAT 2331, or STAT 4340.

### **ECO 5366 - Federal Government Taxation**

*Credits: 3*

Develops principles to be used when evaluating a specific tax and uses them to investigate specific federal revenue sources such as taxes on personal and corporate income. Prerequisites: C- or better in ECO 3301, MATH 1309 or MATH 1337, and one of the following: STAT 2301, STAT 2331, or STAT 4340. Recommended: ECO 3302.

### **ECO 5375 - Economic and Business Forecasting**

*Credits: 3*

Presentation of methods used by economists to forecast economic and business trends and ways of evaluating the usefulness of these methods. Students may not receive credit for this course and STAT 4375. Prerequisites: C- or better in the following: STAT 2301, STAT 2331, STAT 4340 or ITOM 2305; and ECO 5350.

### **ECO 5380 - Computing For Economics**

*Credits: 3*

Emphasis on learning computer programs commonly used in economics with the objective of teaching programming skills used in data discovery and summarization, graphics, file manipulation, iterative procedures, and simulations. Programs could include SAS, R, PYTHON, STATA, SPSS, MATLAB, and SQL. Prerequisites: For undergraduate students: C- or better in ECO 3301, ECO 3302, and ECO 5350; MATH 1309 or MATH 1337; and STAT 2331, STAT 4340, or ITOM 2305. For graduate students: C- or better in ECO 5350 or permission of instructor.

### **ECO 6049 - Graduate Full-Time Status**

*Credits: 0*

Full-time status for M.A. students.

### **ECO 6101 - Internship for M.A. Students**

*Credits: 1*

Students analyze economics problems appropriate to the interning firm or organization. Can be taken only twice. Prerequisites: 3.000 GPA in economics courses and approval of faculty sponsor and director of graduate studies.

### **ECO 6301 - Internship for Master's Students**

*Credits: 3*

Students analyze economic problems appropriate to the interning firm or organization and write a short report about their experiences. Can be taken only twice. Prerequisites: 3.000 GPA in economics courses and approval of faculty sponsor and director of graduate studies.

### **ECO 6320 - Applied Monetary Theory and Policy**

*Credits: 3*

Covers operation of the banking sector, demand for money and control of its supply, and economic policymaking by the Federal Reserve and its importance for business decision-making at senior levels.

## **ECO 6330 - International Economic and Financial Environment**

*Credits: 3*

Topics include foreign exchange markets operations, balance of payments adjustments, the international equilibrium system, and international aspects of economic policymaking. Employs mathematical modeling as appropriate and requires some research using methods of quantitative analysis. A student cannot receive credit for both ECO 6330 and ECO 7332.

## **ECO 6331 - International Trade**

*Credits: 3*

Surveys the major theories of world trade; analyzes the empirical evidence regarding these theories; and develops a framework for the analysis of trade policy instruments such as tariffs, quotas, and voluntary export restraints.

## **ECO 6333 - Trade Policy and the World Trading System**

*Credits: 3*

Surveys the major institutions of world trade. Analyzes the political economy of trade policy in major trading countries in conjunction with the rules of world trade as defined by the agreements of the WTO and the agenda of the World Bank and the IMF.

## **ECO 6352 - Applied Econometric Analysis**

*Credits: 3*

Deals with statistical techniques that go beyond multiple regression analysis such as multinomial choice models, duration models, count models, spatial regression and panel models, logit and probit models, and count data. Emphasizes extensive computer analysis or current economic topics using advanced econometric techniques. Prerequisites: C- or better in ECO 5350 and graduate standing, or permission of instructor.

## **ECO 6371 - Introduction to Quantitative Economics**

*Credits: 3*

Prepares first-year Ph.D. students for the study of economic theory and econometrics. Covers topics in mathematics and probability that are widely applied in economic theory and econometrics.

## **ECO 6372 - Econometrics I**

*Credits: 3*

Theory and applications of statistical inference. Topics include probability and sampling, distribution theory, estimation, hypothesis testing, and simple regression analysis. Prerequisite: ECO 6371 or equivalent.

## **ECO 6374 - Econometrics II**

*Credits: 3*

Econometric theory and methods with emphasis on regression analysis, maximum likelihood, quasi-maximum likelihood, GMM and instrumental variables, and specification testing. Prerequisite: ECO 6372.

## **ECO 6375 - Econometrics III**

*Credits: 3*

Introduces advanced econometric techniques. Topics include limited dependent variables, panel data models, time series models, and resampling methods. Prerequisite: ECO 6374.

## **ECO 6380 - Predictive Analytics for Economists**

*Credits: 3*

A study of data-mining techniques used by economists in the fields of applied economics, marketing, finance, and statistics. These techniques include classification methods, affinity analysis, and data reduction and exploration methods. Students may not receive credit for this course and STAT 6316. Prerequisites: Graduate standing or C or better in the following: ECO 5350, and ITOM 2305 or STAT 2301, 2331, or 4340.

### **ECO 6381 - Economic Analysis I**

*Credits: 3*

Analysis of basic models of the firm under purely competitive markets and monopolistic competition and simple consumer behavior models. The exposition employs basic mathematical tools such as calculus.

### **ECO 6382 - Economic Analysis II**

*Credits: 3*

Analysis of basic national income models and various modifications of these models.

### **ECO 6383 - New Approaches to Managerial Economics**

*Credits: 3*

Presents recent developments in information theory, multiproduct analysis, and principal-agent theory in order to show how these developments can be usefully applied in management decision-making.

### **ECO 6384 - Microeconomic Theory I**

*Credits: 3*

Basic theories of the firm under competitive and monopolistic conditions, and basic theory of consumer behavior.

### **ECO 6385 - Microeconomic Theory II**

*Credits: 3*

Extensions of topics covered in ECO 6384, including monopolistic competition, intertemporal optimization, behavior under uncertainty, and welfare economics. Prerequisite: ECO 6384.

### **ECO 6391 - Financial Econometrics: Theory and Applications**

*Credits: 3*

A study of selected topics in financial econometrics, including capital asset pricing models, arbitrage pricing theory, analysis of volatility in financial markets, value at risk, options and their valuation, event studies, cointegration of integrated markets, put-call parity, the term structure of interest rates, and credit default analysis. Prerequisites: C- or better in ECO 5350, ECO 4378 or FINA 4326, and ECO 4368 or FINA 4325, and one of the following: STAT 2301, STAT 2331, or STAT 4340.

### **ECO 6394 - Macroeconomic Theory I**

*Credits: 3*

Basic theories concerning the determination of national income, employment, consumption, investment, and the general price level.

### **ECO 6395 - Macroeconomic Theory II**

*Credits: 3*

The course provides theoretical and empirical underpinnings for macroeconomic models of the economy, with an emphasis on economic policy. Prerequisite: ECO 6394.

### **ECO 6398 - Research and/or Thesis**

*Credits: 3*

By arrangement with the director of graduate studies. Eligible students undertake a research paper under the supervision of the faculty sponsor and give an oral presentation of the paper. Note: Can be taken only once.

### **ECO 7004 - Workshop for Preprospectus**

*Credits: 0*

Analyzes research strategies of seminar speakers, faculty members, and students. Each student must present a paper directly related to his or her own prospectus.

**ECO 7301 - Readings in Economics**

*Credits: 3*

Selected topics to complement the material in the Ph.D. program.

**ECO 7302 - Topics in Economic Theory**

*Credits: 3*

Selected topics to complement the material in the micro and macro sequence.

**ECO 7305 - Mathematical Economics**

*Credits: 3*

Applications of mathematical tools to various economic problems.

**ECO 7306 - Advanced Economic Theory**

*Credits: 3*

A variety of advanced topics in theory not covered in the core theory sequence.

**ECO 7321 - Labor Economics**

*Credits: 3*

Theories and empirical testing of hypotheses concerning the behavior of labor markets.

**ECO 7322 - Development of Human Capital**

*Credits: 3*

Theories concerned with the investment in human capital and its impact on economic growth.

**ECO 7332 - International Macroeconomic Theory and Policy**

*Credits: 3*

Concepts of balance of payments equilibrium; responses to disequilibrium; national economic policies affecting international payments; and past, present, and proposed international financial institutions.

**ECO 7333 - International Trade**

*Credits: 3*

Determinants of regional specialization, gains from trade, theoretical analysis of factor movements, and of policies affecting the interspatial movement of goods and persons.

**ECO 7334 - Development Economics**

*Credits: 3*

Application of economic theory to developing economies, including population and household economics, agriculture, industry, international trade and factor movements, and investment project evaluation.

**ECO 7341 - Market Structure**

*Credits: 3*

The study of the relationships between various market structures and their impacts on economic performance.

**ECO 7342 - Imperfect Markets**

*Credits: 3*

The study of models of imperfect markets, antitrust laws and other trade regulations, and their effects on economic performance.

**ECO 7361 - Monetary Economics**

*Credits: 3*

Various theories on the role of money in economic systems, and the impact of the money market on economic aggregates and the price level.

**ECO 7362 - Monetary Theory and Policy**

*Credits: 3*

Monetary institutions and the impact of monetary policies on the different segments of the economy.

**ECO 7376 - Macroeconometrics**

*Credits: 3*

Advanced topics in time series econometrics and finance.

**ECO 7377 - Microeconometrics**

*Credits: 3*

Advanced topics in cross-section and panel data econometrics.

**ECO 7378 - Topics in Econometrics**

*Credits: 3*

Further current topics in theoretical and applied econometrics and finance. Topics will vary and reflect current student and faculty demand and instructors' interests.

**ECO 7381 - Methods of Experimental Economics**

*Credits: 3*

Provides students the foundation for understanding and using experimental methods in economic research. Offers training in fundamental methods and applies those methods to several fields of economic research. Focuses on how to clearly specify and set up research questions as well as how to bring appropriate methods to bear in answering those questions.

**ECO 8000 - Research**

*Credits: 0*

By arrangement with the director of graduate studies. Prerequisite: Department consent required.

**ECO 8049 - Graduate Full-Time Status**

*Credits: 0*

Full-time status for Ph.D. students.

**ECO 8100 - Research**

*Credits: 1*

By arrangement with the director of graduate studies. Prerequisite: Department consent required.

**ECO 8101 - Internship for Ph.D. Students**

*Credits: 1*

Students analyze economic problems appropriate to the interning firm or organization. Can be taken only twice. Prerequisites: 3.000 GPA in economics courses, 3rd-year or above Ph.D. student (earned 48 credit hours in the program), and approval of faculty sponsor and director of graduate studies.

**ECO 8105 - Research**

*Credits: 1*

By arrangement with the director of graduate studies. Prerequisite: Department consent required.

**ECO 8398 - Dissertation Research**

*Credits: 3*

Ph.D. candidates.

# English

www.smu.edu/english

**Professor** Darryl Dickson-Carr, **Department Chair**

**Professors:** Darryl Dickson-Carr, Thomas DiPiero, Dennis Foster, Ezra Greenspan, Jasper Neel, Timothy Rosendale, Rajani Sudan, Steven Weisenburger

**Associate Professors:** Richard Bozorth, Greg Brownderville, Timothy Cassedy, Michael Holahan, Daniel Moss, Beth Newman, Jayson Gonzales Sae-Saue, Bonnie Wheeler

**Assistant Professors:** Jacob Rubin, Martha Satz, Emma Wilson

**Professor of Practice:** Carol Dickson-Carr

**Senior Lecturers:** Stephanie Amsel, Vanessa Hopper, Bruce Levy, Pauline Newton, Ona Seaney

**Lecturers:** Joan Arbery, Marta Krogh, Russ McConnell, Mary Catherine Mueller, Patricia Pisano, Kristen Polster, Emily Sharma, Sam Ross Sloan, Lori Ann Stephens, Richard Treat, Angela Wood

## English, Ph.D.

### Admission Requirements

Applicants to the Ph.D. program in English must have either an undergraduate major in English or a related field or intensive study in the liberal arts with a solid background in literature in English, normally with a GPA of at least 3.500 (out of a 4.000 scale). They must also submit scores for the GRE general graduate school admission test. In addition, a statement of purpose for graduate study and three letters of recommendation are required, along with a writing sample in which an argument on a literary topic is sustained for about 15 pages. Proficiency in a second language is strongly recommended prior to matriculation in the program.

### Degree Requirements

The Ph.D. in English requires 60 credit hours, coming from courses, directed readings and dissertation hours.

### Core Courses

Core courses required of all students are as follows:

- ENGL 6310 - Advanced Literary Studies
- ENGL 6311 - Survey of Literary Criticism
- ENGL 6312 - Teaching Practicum

### Teaching Workshops

Students will also be required to complete workshops in teaching before the fall of their second year, in preparation for teaching undergraduate courses during that year and subsequent years of graduate study.

### Advanced Seminars

In addition, students must take a minimum of six 7000-level seminars and will be expected to include in their program of study courses covering a wide range of fields. With permission, students may develop interdisciplinary approaches by taking up to two courses outside the English department.

### Second Language Proficiency

Proficiency in a second language relevant to the student's course of study is required and should be demonstrated prior to the term in which written exams are scheduled. For certain dissertation topics, additional languages may be required.

## Qualifying Examinations and Dissertation

Further requirements include written exams in the fall of the fourth year of study and a dissertation prospectus and oral defense of that prospectus during the spring term of the fourth year. The M.A. degree will be awarded after completion of the written exams. Note: For students entering with the M.A. degree, 12 credit hours (one year of coursework) may, with permission, be waived and the schedule above adjusted accordingly.

## Good Standing

Students who remain in good standing are eligible to receive fellowship support for up to six years. They must maintain a GPA of at least 3.500, demonstrate the ability to do work of appropriate quality in seminars, make continuous progress in the program and receive the recommendation of an advisory committee. They will teach two courses a year for four years beginning in the second year of study, with either their fifth or sixth year serving as a dissertation fellowship year with no course requirements or teaching responsibilities. Exceptional students may be offered a one-year postdoctoral fellowship in the English Department after fulfilling all requirements for the Ph.D.

Students who wish to leave the Ph.D. program, or students who do not pass their Ph.D. Qualifying Exam, may earn the M.A. degree if they have satisfied the following requirements: successful completion of 30 credit hours of coursework; demonstrate proficiency in a second language; pass a Masters Comprehensive Exam. This option does not apply to students who have an M.A. degree from another institution.

## English, M.A.

The M.A. in English degree is only available to students enrolled in the Ph.D. program in English at SMU. See the Ph.D. program information for further details on earning the M.A. degree.

## English Courses

### **ENGL 6049 - Graduate Full-Time Status**

*Credits: 0*

Independent course for students continuing work on an M.A. thesis.

### **ENGL 6301 - Directed Studies**

*Credits: 3*

Directed readings in an area of the student's choice, to be approved by the director of graduate studies and the instructor.

### **ENGL 6302 - Directed Studies**

*Credits: 3*

Directed readings in an area of the student's choice, to be approved by the director of graduate studies and the instructor.

### **ENGL 6310 - Advanced Literary Studies**

*Credits: 3*

Readings and practice in research methods and materials, bibliography and textual editing, and the history and practices of the profession. Required of all doctoral candidates.

### **ENGL 6311 - Survey of Literary Criticism**

*Credits: 3*

Readings in criticism and theory from Aristotle through contemporary approaches. Required of all doctoral candidates. Advanced literary studies.

**ENGL 6312 - Teaching Practicum**

*Credits: 3*

Course in pedagogy for English teachers at the university level. Prerequisites: Graduate standing and appointment to a graduate fellowship in the English Department.

**ENGL 6313 - Rhetorical Theory**

*Credits: 3*

Selected major figures and movements from 1920 to the present in the context of the history of rhetoric, recent philosophy, and literary theory.

**ENGL 6320 - Medieval Literature**

*Credits: 3*

Studies in medieval writers and literary-cultural history through 1500.

**ENGL 6321 - Readings: Medieval Literature**

*Credits: 3*

Prerequisites: Approval of instructor and director of graduate studies.

**ENGL 6322 - Readings: Medieval Literature**

*Credits: 3*

Prerequisites: Approval of instructor and director of graduate studies.

**ENGL 6330 - Early Modern British Literature**

*Credits: 3*

Studies in major British writers and literary-cultural history from 1500 to 1775.

**ENGL 6335 - Early Modern American Literature**

*Credits: 3*

Studies in major American writers and literary-cultural history from the discovery to 1750.

**ENGL 6340 - British Literature in the Age of Revolutions**

*Credits: 3*

Studies in major British writers and literary-cultural history from 1775 to 1900.

**ENGL 6345 - American Literature in the Age of Revolutions**

*Credits: 3*

Studies in major American writers and literary-cultural history from 1750 to 1900.

**ENGL 6350 - Modern and Contemporary British Literature**

*Credits: 3*

Studies in major British writers and literary-cultural history after 1900.

**ENGL 6360 - Modern and Contemporary American Literature**

*Credits: 3*

Studies in major American writers and literary-cultural history after 1900.

**ENGL 6370 - African-American Literature**

*Credits: 3*

Studies in African-American literary-cultural history, from Colonial to contemporary.

**ENGL 6373 - Hispanic-American Literature**

*Credits: 3*

Studies in Hispanic-American literary-cultural history, from Colonial to contemporary.

**ENGL 6375 - Sex, Gender, and Literature**

*Credits: 3*

Studies of the constructions of sexuality and gender in literature and culture, informed by historical study and current theoretical work in such fields as feminism, gender studies, and queer theory.

**ENGL 6380 - History of Print Culture**

*Credits: 3*

A literary historical survey of major developments, issues, formations, and institutions in British and/or American print culture.

**ENGL 6391 - Poetry Writing Workshop**

*Credits: 3*

Graduate-level writing and critiquing of student poetry, along with the study of poetic conventions, techniques, and theory.

**ENGL 6392 - Fiction Writing Workshop**

*Credits: 3*

Graduate-level writing and critiquing of student fiction writing along with the study of the conventions, techniques, and theories of fiction.

**ENGL 6394 - Graduate Independent Study in Poetry Writing**

*Credits: 3*

Intensive, one-on-one tutorial in the writing and revising of poetry.

**ENGL 6395 - Graduate Independent Study in Poetry Writing**

*Credits: 3*

Intensive, one-on-one tutorial in the writing and revising of poetry.

**ENGL 6396 - Graduate Independent Study in Fiction Writing**

*Credits: 3*

Intensive, one-on-one tutorial in the writing and revising of fiction.

**ENGL 6397 - Graduate Independent Study in Fiction Writing**

*Credits: 3*

Intensive, one-on-one tutorial in the writing and revising of fiction.

**ENGL 6398 - Thesis**

*Credits: 3*

Research and writing of the M.A. thesis with guidance from the student's thesis director.

**ENGL 6399 - Thesis**

*Credits: 3*

Research and writing of the M.A. thesis with guidance from the student's thesis director.

**ENGL 7311 - Seminar in Literary Theory**

*Credits: 3*

Advanced study of a topic in literary theory.

**ENGL 7340 - Seminar in British Literature**

*Credits: 3*

Advanced study of a topic in British literature.

**ENGL 7350 - Seminar in American Literature**

*Credits: 3*

Advanced study of a topic in American literature.

**ENGL 7370 - Seminar in Minority Literature**

*Credits: 3*

Advanced study of a topic in minority literature.

**ENGL 7372 - Seminar in Transatlantic Literature**

*Credits: 3*

Advanced study of a topic in transatlantic literature.

**ENGL 7374 - Problems in Literary History**

*Credits: 3*

Advanced study of problems in literary history.

**ENGL 7376 - Seminar: Special Topics**

*Credits: 3*

Advanced study of a literary topic that crosses traditional national boundaries.

**ENGL 7398 - Directed Readings**

*Credits: 3*

Directed readings in an area of the student's choice, to be approved by the director of graduate studies and the instructor.

**ENGL 7399 - Directed Readings**

*Credits: 3*

Directed readings in an area of the student's choice, to be approved by the director of graduate studies and the instructor.

**ENGL 8049 - Graduate Full-Time Status**

*Credits: 0*

Graduate full-time status at the Ph.D. level.

**ENGL 8105 - Research**

*Credits: 1*

**ENGL 8398 - Dissertation**

*Credits: 3*

Research and writing of the dissertation.

**ENGL 8399 - Dissertation**

*Credits: 3*

Research and writing of the dissertation.

# History

www.smu.edu/history

**Professor** Thomas Knock, **Department Chair**

**Professors:** Kenneth Andrien, John Chávez, Edward Countryman, Jeffrey Engel, Neil Foley, Andrew Graybill, Kenneth Hamilton, Thomas Knock, Alexis McCrossen, Daniel Orlovsky, Kathleen Wellman

**Associate Professors:** Sabri Ates, Crista DeLuzio, Melissa Dowling, Kate Carté, Jo Guldi, Erin R. Hochman, Jill E. Kelly

**Assistant Professors:** Macabe Keliher, Bianca Lopez, Ariel Ron

**Adjunct Assistant Professor:** David Doyle

**Senior Lecturer:** Laurence H. Winnie

## History, Ph.D.

The History Department will award fellowships to all students accepted into the Ph.D. program. Funding is guaranteed for a period of five years for those whose work remains excellent. Fellowships include tuition, fees, health insurance and a \$20,000 stipend for the academic year. In addition, the Clements Department of History has resources available for travel to professional conferences and to research archives.

## Admission Requirements

All applicants for the Doctor of Philosophy in history must have a bachelor's degree from an accredited college or university (students from abroad must hold the equivalent degree), with a minimum grade point average of 3.000, and have completed at least 12 advanced credit hours in history. Applicants must submit test scores for the GRE graduate school admission exam. If English is not the applicant's native language, he or she must also take the TOEFL English language proficiency test and score 80 or higher. Students must submit a statement of purpose, an example of their written work and official transcripts. Three letters of recommendation are also required. In addition, applicants should possess a foundation in a language for research, usually Spanish, sufficient to enable them to pass an examination in translation to English in September of the first year of study. Prospective students must submit their applications and all supporting documents by December 15.

## Degree Requirements

### Historiography (3 Credit Hours)

In the first term, students will take HIST 6300, a historiography course that introduces them to the professional study of history. Readings vary from year to year, but cover a broad range of methodologies, perspectives and topics. The course also addresses historical writing, research techniques and historical sources.

### American History (24 Credit Hours)

The major field in American history offers broad preparation. During the first two years, students take a sequence of four colloquia (12 credit hours) in which they read intensively in American history from the era of Indian-European contact to the present. The intention is that they should master the historiography of the field. These colloquia emphasize new problems, interpretations and debates vital to the study of American history.

### Regional, Ethnic, or Other Specialization (18 Credit Hours)

While the department maintains strong specializations in the Southwest, the West, Mexico, Borderlands, Mexican Americans, and Native Americans, students may instead opt to develop an individualized specialization of 18 credit hours in a coherent field of study in American history approved by the Graduate Committee. Students may also wish to enrich their historical understandings by taking courses in other disciplines, such as anthropology, literature or religious studies. The courses should be chosen in consultation with the adviser.

The program offers unusual opportunities for students to broaden and deepen their knowledge. Resources include the Clements Center for Southwest Studies, with its symposia, research fellows and distinguished visitors; SMU's DeGolyer Library, a repository for a remarkable collection of books and manuscripts on Mexico and the Southwest; and the Meadows Museum of Art, which houses perhaps the world's finest collections of early modern Spanish art outside of Spain. For students with more interdisciplinary interests, the Bridwell Library provides a wealth of primary sources for the study of religious history; the Underwood Law Library supports the study of legal history, including that of international law; and the Center for Presidential History allows for research in the domestic and foreign affairs of the United States.

### **Global and Comparative History (12 Credit Hours)**

The third field, in global and comparative history (12 credit hours), places the American experience in larger contexts by introducing students to the theoretical and conceptual frameworks that have guided advanced research in world history in recent decades. The field also provides broad interdisciplinary views of particular topics of global significance. Students begin this field of study by taking a colloquium (three credit hours) that explores influential methodologies and theoretical perspectives in global and comparative history. After this colloquium students take three courses (nine credit hours) that treat, in comparative contexts, such themes and topics as urbanization, migration, industrialization, revolution, colonialism, postcolonialism, slavery, and gender roles.

The courses taken in the specialized and global fields may vary in both content and method; these may be graduate courses, graduate/undergraduate senior level reading seminars, and also individual directed readings. If individual interests and requirements justify doing so, a limited number of these courses may be taken in another department.

### **Ph.D. Research Paper Requirement**

Students will write two substantial research papers during the first two years of study. The goal is to produce significant work based on primary sources and of a quality comparable to an article in a scholarly journal.

### **Qualifying Examination**

An oral examination on three fields of concentration will be taken in the spring term of the third year of study.

### **Teaching Practicum**

(noncredit)

In HIST 7000, a study of methods and content in the teaching of history is coupled with classroom teaching experience.

### **Dissertation (3 Credit Hours)**

Upon completion of the dissertation, a formal defense is conducted before an examination committee of four faculty members.

### **Teacher Preparation**

Learning to be an effective instructor is a vital part of the Ph.D. program. The centerpiece of teacher preparation, to occur in the fourth year, is a mentoring program tailored to the interests and needs of each student. In HIST 7000, students will work closely with a professor in the planning and teaching of an individual course. They will also meet with the professor to discuss topics related to teaching and participate in the teaching assistant seminar offered by SMU's Center for Teaching Excellence. Finally, students themselves will teach a course at SMU or a cooperating institution.

## **History, M.A.**

### **Admission Requirements**

Candidates must have a minimum of 12 credit hours of advanced-level undergraduate work in history and make acceptable scores on the general sections of the GRE general graduate school admission test. If English is not the applicant's native language, he or she must also take the TOEFL English language proficiency test and score 80 or

higher. Students must submit a statement of purpose, an example of their written work and official transcripts. Three letters of recommendation are also required. Prospective students must submit their applications and all supporting documents by December 15. Students may begin the program only in the fall term.

The History Department normally requires a minimum 3.000 GPA overall and a 3.000 average in history for admittance to the M.A. program.

Candidates must present evidence of competence in a language other than English, normally through two years of undergraduate study.

## Degree Requirements

The master's degree is offered on two tracks: U.S. history and global history. Students in the U.S. history track will inaugurate their study in the context of global/comparative history and historiography, and they will develop their knowledge of the U.S. in graduate coursework and develop their specific interests in either two research papers or a thesis. Students in the global history track will begin their studies with an introduction to historiography and global and comparative history, followed by graduate coursework on the histories of various areas of the world, with specific topics developed in either two research papers or a thesis. Students may develop their interests by working with faculty knowledgeable in classical history, medieval history, early modern and modern Europe, Russia, the Islamic world, sub-Saharan Africa, the Atlantic world, Latin America, East Asia and South Asia, as well as the various regions, periods and themes of the United States.

## Major Adviser

Each student will be assigned a major adviser. The major adviser and the History Department's director of graduate studies will work with each student to plan a specific course of study, which may include up to six credit hours in fields or departments outside the major field of study.

## Required Credit Hours

Students are required to earn 30 credit hours at the 5000 or 6000 level. The required 30 credit hours are distributed below:

- HIST 6300 - Historiography (three credit hours)
  
- HIST 6315 - Global/Comparative History (three credit hours)  
or
- Another departmental graduate course (three credit hours) specifically including comparative methods and theories.
  
- Six courses (18 credit hours) at the 5000 or 6000 level in the History Department. Up to two courses in other departments, programs or schools (such as the Meadows School of the Arts or the Simmons School of Education and Human Development) may substitute as approved by the adviser and director of graduate studies. With approval, students following the U.S. history or global history tracks must take one course (but no more than two courses) in the alternate track.
  
- HIST 6398 - Thesis (three credit hours)
- HIST 6399 - Thesis (three credit hours)  
or
- Two additional graduate courses (six credit hours) can substitute for HIST 6398/HIST 6399 for those students in the **nonthesis** option.

## Thesis Option

This option requires research and writing (i.e., students following this option have appropriate language skills, and they usually are en route to a Ph.D.). The student's adviser and two other professors form the three-person thesis and oral defense committee. A unanimous positive vote of the committee is necessary for the student to pass the oral examination. The thesis will demonstrate ability to define and analyze a historical problem, mastery of the pertinent historiography, and understanding of the methodological issues posed by the problem. It must also make significant use of primary source material.

## Nonthesis Option

Two additional graduate courses (six credit hours) can substitute for HIST 6398/HIST 6399 for those students in the nonthesis option, and two research papers written in any course at the 5000 or 6000 level in the History Department can substitute for the thesis. Toward the end of their coursework, nonthesis students also take an oral examination over coursework, texts and other materials chosen for thematic coherence by their adviser and two other professors.

## History Courses

### **HIST 5305 - Seminar in Hispanic-American Borderlands**

*Credits: 3*

Study of the historiography of the social interactions among varied peoples along the native, colonial, and national borders of Hispanic America, particularly those borders shaping the United States.

### **HIST 5309 - Seminar in North American Borderlands**

*Credits: 3*

Study of the historiography of the social interactions among varied peoples along the native, imperial, and national borders of the North American continent, particularly those shaping the United States.

### **HIST 5310 - Seminar on the American West**

*Credits: 3*

Introduction to the historiography of the American West and its contested meanings.

### **HIST 5312 - Seminar on Native American History**

*Credits: 3*

Introduction to the historiography of Native Americans in United States history.

### **HIST 5330 - Seminar in Mexican-American History**

*Credits: 3*

An examination of the growing historiography on Mexican Americans that focuses on the relationship between their ethnic identity and the Southwest. (Also listed under Latin American history.)

### **HIST 5331 - Seminar in Mexican-American History**

*Credits: 3*

An examination of the growing historiography on Mexican Americans that focuses on the relationship between their ethnic identity and the Southwest. (Also listed under Latin American history.)

### **HIST 5338 - 20th-Century England**

*Credits: 3*

A study of the decline and fall of 20th-century England.

**HIST 5340 - Seminar in American History**

*Credits: 3*

Intensive examination of major topics in American history.

**HIST 5341 - Seminar in American History**

*Credits: 3*

Intensive examination of major topics in American history.

**HIST 5344 - American Cultural History**

*Credits: 3*

Considers the histories of cultural institutions, objects, ideas, and practices. Explores an array of representative cultural conflicts and obsessions that have marked American history.

**HIST 5345 - The Birth of Modern America, 1877-1919**

*Credits: 3*

An investigation of life in America in the Gilded Age and the Progressive Era, including industrialization, urbanization, and social conflict.

**HIST 5370 - Seminar in French History**

*Credits: 3*

An examination of key historians and of the several modes of historiographical writing that shape the vision of premodern France.

**HIST 5371 - The French Revolution and Napoleon, 1789-1815**

*Credits: 3*

The nature and causes of revolution, the French Revolution, and the career of Napoleon Bonaparte.

**HIST 5374 - Recent European History: 1918 to the Present**

*Credits: 3*

Considers two attempts to revive Europe from the effects of disastrous world wars, as well as the sources of new vigor it has found in the past 30 years.

**HIST 5375 - Europe in the Age of Louis XIV**

*Credits: 3*

The scientific revolution, the culture of the Baroque era, and development of the European state system under the impact of the Thirty Years' War and the wars of Louis XIV.

**HIST 5376 - Europe Age of Enlightenment, 1715-1789**

*Credits: 3*

A study of society and culture in 18th-century Europe, Enlightenment philosophies, rococo art, the classical age of music, enlightened despotism, and the coming of the French Revolution.

**HIST 5377 - The United States and the Cold War**

*Credits: 3*

History of the U.S. and the Cold War.

**HIST 5380 - Augustus and the Roman Empire**

*Credits: 3*

After 100 years of civil war, the first Roman emperor, Augustus, inaugurated the 250-year Roman Peace that transformed government, society, art, and culture across the Roman Empire.

**HIST 5382 - Seminar in Latin American History**

*Credits: 3*

Intensive examination of major topics in Latin American history.

**HIST 5387 - Seminar in African History**

*Credits: 3*

Intensive examination of special topics in African history.

**HIST 5390 - Seminar in Russian History**

*Credits: 3*

This advanced seminar covers selected topics in late Imperial Russian and Soviet history.

**HIST 5391 - Athenian Democracy**

*Credits: 3*

This seminar will examine the development of democratic government in Athens and study the functioning of that government in peace and in war.

**HIST 5392 - Seminar in European History**

*Credits: 3*

Intensive examination of major topics in European history.

**HIST 5395 - A History of Iran**

*Credits: 3*

This seminar aims to introduce students to the history, cultures, and peoples of Iran and familiarize them with this complex and increasingly important country.

**HIST 5397 - Seminar in Asian History**

*Credits: 3*

Intensive examination of major topics in Asian history.

**HIST 6000 - Research**

*Credits: 0*

Investigation in primary historical sources.

**HIST 6049 - Graduate Full-Time Status**

*Credits: 0*

After the student has completed all coursework toward a degree, this course may be taken for full-time status while doing research and preparation of a master's thesis. Prerequisite: Approval of graduate director.

**HIST 6300 - Historiography**

*Credits: 3*

Required of all candidates, this course is designed to familiarize graduate students with the tools of historical research, the discipline's methodology, and the problems of historical writing.

**HIST 6301 - Colloquium: Early American History**

*Credits: 3*

A reading course covering the major problems in American history between 1500 and 1812.

**HIST 6302 - Colloquium: American History, 1812-1877**

*Credits: 3*

A reading course covering the major problems in American history from 1812 to 1877.

**HIST 6303 - Colloquium: Late 19th-Century to Early 20th-Century America**

*Credits: 3*

A reading course covering the major problems in American history between 1877 and 1932.

**HIST 6304 - Modern America, 1929-Present**

*Credits: 3*

A reading course that covers major issues in modern American history from the onset of the Great Depression roughly to the present day.

**HIST 6305 - Colloquium: The Hispanic Southwest**

*Credits: 3*

This readings seminar introduces graduate students to ways that scholars have interpreted the Southwest's Hispanic past under Spain and Mexico, and the ongoing Hispanic presence in the region after 1848.

**HIST 6306 - Introduction to Digital Humanities**

*Credits: 3*

Provides a theoretical and practical introduction to the digital humanities for graduate students, covering research methods with digital texts, GIS, visualizations, and online archiving and presentation.

**HIST 6308 - Seminar in American History**

*Credits: 3*

An examination of major topics in American history.

**HIST 6309 - Seminar in North American Borderlands**

*Credits: 3*

Study of the historiography of the social interactions among varied peoples along the native, imperial, and national borders of the North American continent, particularly those shaping the United States.

**HIST 6310 - Seminar on the American West**

*Credits: 3*

Introduction to the historiography of the American West and its contested meanings.

**HIST 6312 - Seminar on Native American History**

*Credits: 3*

Introduction to the historiography of Native Americans in United States history.

**HIST 6315 - Global/Comparative History**

*Credits: 3*

A colloquium exploring various techniques of research and analysis used by contemporary scholars to investigate major historical problems from a global or comparative perspective.

**HIST 6316 - Comparisons of World-Historical Borderlands**

*Credits: 3*

A comparative study of borderlands in distinct regions.

### **HIST 6317 - Frontiers of Spanish History, 218 B.C.-A.D. 1492**

*Credits: 3*

Multicultural interaction across several kinds of frontier in premodern Spanish history, from the Second Punic War to the unifying reign of the Catholic kings.

### **HIST 6318 - Seminar in Temporal History**

*Credits: 3*

Interdisciplinary seminar that covers three interrelated themes: the mental and somatic experience time, the measurement and regulation of time, and the influence of temporal ideologies and habits of mind.

### **HIST 6319 - Histories and Theories of Nationalism**

*Credits: 3*

Explores histories and theories about nationalism in order to understand how and why it became such a potent force in the modern era.

### **HIST 6321 - Seminar: Global/Comparative History**

*Credits: 3*

An examination of major topics in global/comparative history.

### **HIST 6322 - Readings in History**

*Credits: 3*

Directed readings on specific problems or themes formulated by the student with faculty guidance.

### **HIST 6323 - Readings in History**

*Credits: 3*

Directed readings on specific problems or themes formulated by the student with faculty guidance.

### **HIST 6325 - Readings: New Spain and Mexico**

*Credits: 3*

A readings seminar designed to address main themes and historiographical issues in the history of Mexico since the 16th century. Prerequisite: Reading knowledge of Spanish.

### **HIST 6326 - Mexican-American Historiography of the Southwest**

*Credits: 3*

An examination of the historiography of Mexican Americans, focusing on the relationship between their ethnic identity and the Southwest.

### **HIST 6327 - Research on the Southwest as a Region**

*Credits: 3*

### **HIST 6332 - Problems in U.S. Foreign Relations**

*Credits: 3*

Major problems in American foreign relations from the revolutionary era to the present.

### **HIST 6338 - Problems in United States History**

*Credits: 3*

Major problems in American history.

**HIST 6343 - Problems in Modern German History**

*Credits: 3*

Selected issues in the history of the German-speaking peoples from the Reformation to World War II.

**HIST 6344 - Problems in Modern German History**

*Credits: 3*

Selected issues in the history of the German-speaking peoples from the Reformation to World War II.

**HIST 6347 - Problems in European History**

*Credits: 3*

Directed readings.

**HIST 6348 - Problems in European History**

*Credits: 3*

Directed readings.

**HIST 6349 - Problems in Medieval History**

*Credits: 3*

Directed readings and analyses of selected medieval documents and secondary bibliography.

**HIST 6350 - Problems in Medieval History**

*Credits: 3*

Directed readings and analyses of selected medieval documents and secondary bibliography.

**HIST 6352 - Problems Medieval Spanish History**

*Credits: 3*

Directed readings and analyses of selected medieval Spanish documents and secondary bibliography.

**HIST 6353 - Problems in the History of Spain and Portugal**

*Credits: 3*

Social, cultural, and political themes characteristic of the Iberian Peninsula from Roman times to the present.

**HIST 6354 - Problems in the History of Spain and Portugal**

*Credits: 3*

Social, cultural, and political themes characteristic of the Iberian Peninsula from Roman times to the present.

**HIST 6355 - Problems in Latin American History**

*Credits: 3*

Selected topics in Latin American history from the age of exploration and discovery to the mid-20th century.

**HIST 6356 - Problems Latin American History**

*Credits: 3*

Selected topics in Latin American history from the age of exploration and discovery to the mid-20th century.

**HIST 6357 - Problems in Mexican History**

*Credits: 3*

Major themes in the evolution of Mexican society and the place of Mexico in the history of the Americas.

**HIST 6363 - The American Civil War and Reconstruction**

*Credits: 3*

The nature, causes, and impact of the American Civil War, with emphasis upon current historiographical issues.

**HIST 6370 - Colloquium: European History**

*Credits: 3*

A reading course covering the major problems in European history.

**HIST 6371 - Colloquium: European History**

*Credits: 3*

A reading course covering the major problems in European history.

**HIST 6372 - The Apotheosis of Caesar and the Fall of the Roman Republic**

*Credits: 3*

This research seminar investigates the fall of the Roman Republic and the rise of the Roman Empire as a direct consequence of the life and death of Julius Caesar.

**HIST 6385 - Problems in British History**

*Credits: 3*

**HIST 6386 - Problems in British History**

*Credits: 3*

**HIST 6387 - Topics in African History**

*Credits: 3*

Extensive examination of special topics in African history.

**HIST 6391 - Topics in South Asian History**

*Credits: 3*

Intensive examination of special topics in South Asian history.

**HIST 6392 - Topics in Chinese History**

*Credits: 3*

Intensive examination of special topics in Chinese history.

**HIST 6393 - Topics in Middle Eastern History**

*Credits: 3*

Intensive examination of special topics in Middle Eastern history.

**HIST 6398 - Thesis**

*Credits: 3*

Research and writing of the M.A. thesis with guidance from the student's thesis director.

**HIST 6399 - Thesis**

*Credits: 3*

Research and writing of the M.A. thesis with guidance from the student's thesis director.

**HIST 7000 - Teacher Preparation**

*Credits: 0*

Teaching component of the doctoral program in which the student works closely with a professor in the planning and teaching of an individual course.

**HIST 7101 - Practicum Seminar in History**

*Credits: 1*

Students develop practical historical skills in the digital humanities, public history, affiliated library practices, or other related historical fields, under faculty supervision.

**HIST 7398 - Research**

*Credits: 3*

**HIST 7399 - Research**

*Credits: 3*

**HIST 8049 - Graduate Full-Time Status, Ph.D. Level**

*Credits: 0*

Graduate full-time status at the Ph.D. level.

**HIST 8398 - Dissertation: Ph.D. Candidates**

*Credits: 3*

Dissertation for the Ph.D. in history.

**HIST 8399 - Dissertation: Ph.D. Candidates**

*Credits: 3*

Dissertation for the Ph.D. in history.

# Mathematics

www.smu.edu/math

**Professor** Alejandro Aceves, **Department Chair**

**Professors:** Alejandro Aceves, Vladimir Ajaev, Wei Cai, Thomas Hagstrom, Amnon Meir, Peter Moore, Douglas Reinelt, Johannes Tausch

**Associate Professors:** Andrea Barreiro, Thomas Carr, Weihua Geng, Barry Lee, Scott Norris, Daniel Reynolds, Benno Rumpf, Brandilyn Stigler, Sheng Xu, Yunkai Zhou

**Assistant Professors:** Kathryn Hedrick, **Minh Binh Tran**

**Visiting Assistant Professor:** Robert Viator

**Senior Lecturers:** Adriana Aceves, Judy Newell, Carol Seets

## Admission Requirements

Minimum requirements for admission to the graduate programs in mathematics are 18 credit hours in college-level mathematics courses beyond first- and second-year calculus (including differential equations, linear algebra and statistics). Undergraduate courses in numerical methods, partial differential equations, physics and computer science are particularly helpful, as would be familiarity with programming, specifically MATLAB. There is no second language requirement.

Both the M.S. and Ph.D. degree programs require GRE graduate school admission test scores (general exam only). Three letters of recommendation are required.

## Computational and Applied Mathematics, Ph.D.

The Ph.D. program in computational and applied mathematics focuses on applied mathematics, numerical analysis, and scientific computation. The program is designed to prepare future researchers and scientists for positions in industry and national laboratories, as well as in academia.

Financial aid is available for Ph.D. students in the form of teaching assistantships, which include the waiver of tuition and fees.

## Degree Requirements

Course requirements for the Ph.D. include 33 credit hours as required for the M.S. in computational and applied mathematics plus an additional 18 credit hours (totaling 51 credit hours of approved graduate coursework), as well as 6 hours of dissertation credit. One year in full-time residence on the SMU campus or at a research facility approved by the departmental faculty and the dean of graduate studies is also required.

Students will be awarded the M.S. degree en route to the Ph.D. after having completed all requirements for the M.S. in computational and applied mathematics. Students advance to candidacy upon successfully completing all coursework and the Ph.D. qualifying examination—a written examination and oral presentation of a paper based on individualized concentration courses in computational and applied mathematics. Students must prepare a dissertation proposal, to be approved by a faculty committee, prior to beginning work on the dissertation. Successful oral defense of the dissertation before a faculty committee is required for completion of the Ph.D.

## Computational and Applied Mathematics, M.S.

The M.S. in computational and applied mathematics is designed to provide its graduates with knowledge and expertise in mathematics and its application to the sciences, and to provide a strong preparation for those wishing to pursue a Ph.D. in computational or applied mathematics. Program emphases include applied mathematics, numerical analysis, and scientific computation.

## Degree Requirements

A total of 33 credit hours of graduate course credit beyond the bachelor's degree (usually 11 graduate courses) are required for the master's degree. At least nine courses must be at the 6000 level. Candidates must complete:

### Core Courses (12 Credit Hours)

#### Computational Mathematics (6 Credit Hours)

- MATH 6316 - Numerical Methods I (*formerly MATH 6315 prior to Fall 2019*)
- MATH 6317 - Numerical Methods II (*formerly MATH 6316 prior to Fall 2019*)

#### Differential Equations and Their Applications (6 Credit Hours)

- MATH 6324 - Introduction to Dynamical Systems
- MATH 6332 - Partial Differential Equations (*formerly MATH 5334 prior to Fall 2019*)

### Elective Courses (21 Credit Hours)

Seven courses chosen in consultation with the graduate adviser. A maximum of two approved courses can be taken from outside the mathematics department; these courses must have a strong mathematical component.

### Oral Examination

An oral examination is required for graduation.

**Total: 33 Credit Hours**

## Mathematics Courses

### **MATH 6049 - Graduate FT Status**

*Credits: 0*

Graduate full time status.

### **MATH 6110 - Mathematics Research**

*Credits: 1*

Independent research project in the fields of computational and applied mathematics, under the direction of a faculty member.

### **MATH 6210 - Mathematics Research**

*Credits: 2*

Independent research project in the fields of computational and applied mathematics, under the direction of a faculty member.

### **MATH 6310 - Mathematics Research**

*Credits: 3*

Independent research project in the fields of computational and applied mathematics, under the direction of a faculty member.

### **MATH 6311 - Perturbation Methods**

*Credits: 3*

Solving differential equations with a small parameter by asymptotic techniques: weakly nonlinear oscillators, perturbed eigenvalue problems, boundary layers, method of multiple scales, and the WKBJ method. Prerequisite: MATH 2343. Recommended: MATH 6332.

### **MATH 6312 - Advanced Asymptotic and Perturbation Methods**

*Credits: 3*

Topics include strongly nonlinear and slowly varying oscillators, multiple scales and matched asymptotic expansions

applied to partial differential equations, asymptotic evaluation of integrals and transforms, stationary phase, steepest descents, and applications. Prerequisites: MATH 6332, MATH 6311.

### **MATH 6316 - Numerical Methods I**

*Credits: 3*

Covers floating point arithmetic, backward stability analysis, numerical solution of dense and sparse linear systems of equations using direct and basic iterative methods, least-squares problems and eigenvalue problems, elementary and orthogonal matrix transformations, and nonlinear systems of equations.

### **MATH 6317 - Numerical Methods II**

*Credits: 3*

Covers interpolation and approximation of functions, numerical differentiation and integration, basic methods for initial value problems in ordinary differential equations, and basic approximation methods for one-dimensional initial-boundary value problems. Topics focus on algorithm development and the theory underlying each method. Prerequisites: MATH 3313, MATH 6316.

### **MATH 6318 - Numerical Partial Differential Equations**

*Credits: 3*

Covers finite difference methods for elliptic, parabolic, and hyperbolic problems in partial differential equations. Also, stability, consistency, and convergence results. Attention is given to computer implementations. Prerequisites: MATH 5315 or CS 7365, and MATH 6332.

### **MATH 6319 - Finite Element Analysis**

*Credits: 3*

Finite element method for elliptic problems, theory, practice, and applications. Finite element spaces, curved elements and numerical integration, minimization algorithms, and iterative methods. Prerequisites: MATH 5315 or CS 7365, and MATH 6317.

### **MATH 6320 - Iterative Methods**

*Credits: 3*

Matrix and vector norms, conditioning, iterative methods for the solution of larger linear systems and eigenvalue problems. Krylov subspace methods. Other topics to be chosen by the instructor. Prerequisites: MATH 5316 and some programming experience.

### **MATH 6321 - Numerical Solution of Ordinary Differential Equations**

*Credits: 3*

Numerical methods for initial value problems and boundary value problems for ordinary differential equations. Emphasizes practical solution of problems using MATLAB. Prerequisites: MATH 2343, MATH 5315 .

### **MATH 6324 - Introduction to Dynamical Systems**

*Credits: 3*

Nonlinear ordinary differential equations: equilibrium, stability, phase-plane methods, limit-cycles, and oscillations. Linear systems and diagonalization. Periodic coefficients (Floquet theory) and Poincaré map. Difference equations (maps), period doubling, bifurcations, and chaos. Prerequisites: MATH 2343, MATH 3353.

### **MATH 6325 - Dynamical Systems and Chaos**

*Credits: 3*

Nonlinear differential equations. Stability and bifurcation theory of ODEs and maps. Forced oscillators. Subharmonic resonances. Melnikov criterion for chaos. Lorenz system. Center manifolds and normal forms. Silnikov's example. Prerequisite: MATH 6324.

### **MATH 6332 - Partial Differential Equations**

*Credits: 3*

Partial differential equations of applied mathematics in more than one spatial dimension. Solution by separation of variables and eigenfunction expansion, and Green's function methods. Prerequisite: C- or higher in MATH 4337, or permission of instructor.

### **MATH 6332 - Partial Differential Equations**

*Credits: 3*

Partial differential equations of applied mathematics in more than one spatial dimension. Fundamental solutions, separation of variables, eigenfunction expansions, and Green's function methods. Prerequisites: Graduate standing, or C- or higher in MATH 4337.

### **MATH 6333 - Advanced Partial Differential Equations**

*Credits: 3*

Method of eigenfunction expansion for nonhomogeneous problems. Green's functions for the heat, wave, and Laplace equations. Dirac delta functions, Fourier and Laplace transform methods, and method of characteristics. Prerequisite: MATH 6332.

### **MATH 6336 - Fluid Dynamics**

*Credits: 3*

Preliminaries, concepts from vector calculus. The transport theorem, the Navier-Stokes and other governing equations. Dynamical similarity and Reynolds number. Vorticity theorems. Ideal and potential flow. The influence of viscosity and the boundary layer approximation. Prerequisite: MATH 3337.

### **MATH 6337 - Real and Functional Analysis**

*Credits: 3*

Topics include continuous functions, metric and normed spaces, Banach spaces, Hilbert spaces, distributions and the Fourier transform, measure theory and function spaces, differential calculus, and variational methods. Prerequisite: MATH 4338 or approval of instructor.

### **MATH 6341 - Linear and Nonlinear Waves**

*Credits: 3*

The mathematical theory of linear and nonlinear waves. Applications from water waves, traffic flow, gas dynamics, and various other fields. Topics include nonlinear hyperbolic waves (characteristics, breaking waves, shock fitting, Burger's equation) and linear dispersive waves (method of stationary phase, group velocity, wave patterns). Prerequisite: MATH 6332.

### **MATH 6343 - Photonics Modeling and Simulations**

*Credits: 3*

Propagation of light in photonic structures. Using asymptotic techniques and simulations, students derive and then analyze models based on ordinary and partial linear and nonlinear differential equations. Prerequisites: MATH 6332, MATH 6324.

### **MATH 6346 - Advanced Fluid Dynamics**

*Credits: 3*

Topics include surface waves in shallow and deep water, sound waves, Stokes flow equations and lubrication-type models, spreading of droplets, and coating flows. Other topics are chosen from dynamics of bubbles, film drainage, electroosmotic flow, electrowetting on dielectric, turbulence, and fluid mechanics of swimming and flying. Prerequisite: MATH 6336/ME 5336/ME 7336.

### **MATH 6350 - Mathematical Models in Biology**

*Credits: 3*

The mathematical analysis and modeling of biological systems, including biomedicine, epidemiology, and ecology. Prerequisite: Consent of instructor.

### **MATH 6352 - Epidemiology and Immunology**

*Credits: 3*

Modeling and analysis of diseases from epidemiology and immunology. Considers disease dynamics modeled with delay, integral, partial, and stochastic differential equations based on susceptible-infectious-removed ODEs.

Prerequisites: MATH 6332, MATH 6324.

### **MATH 6360 - Computational Electromagnetics**

*Credits: 3*

Numerical methods for electromagnetics, with emphasis on practical applications. Numerical discretizations covered include the method of moments, finite differences, finite elements, boundary elements, and fast multipole methods.

Prerequisites: ECE 7330 or MATH 6332 and proficiency in one computer language (e.g., Fortran) or permission of instructor.

### **MATH 6370 - Parallel Scientific Computing**

*Credits: 3*

An introduction to parallel computing in the context of scientific computation. Prerequisites: MATH 6316 and MATH 6317, or permission of instructor.

### **MATH 6391 - Topics in Applied Mathematics**

*Credits: 3*

Selected topics in the application of mathematical analysis to such fields as differential, integral, and functional equations; mechanics; hydrodynamics; mathematical biology; and economics. Prerequisite: Permission of instructor.

### **MATH 6395 - Topics in Computational Mathematics**

*Credits: 3*

Selected topics of current interest, such as numerical bifurcation theory, iterative methods for linear systems, domain decomposition and multigrid methods, numerical multidimensional integration, and numerical methods for multibody problems. Prerequisite: Permission of instructor.

### **MATH 8049 - Graduate FT Status**

*Credits: 0*

Graduate full-time status at the Ph.D level.

### **MATH 8105 - Research**

*Credits: 1*

### **MATH 8198 - Dissertation**

*Credits: 1*

Dissertation.

### **MATH 8398 - Dissertation**

*Credits: 3*

Dissertation.

# Medieval Studies

www.smu.edu/medievalstudies

**Associate Professor Bonnie Wheeler, Director**

## General Information

The M.A. in medieval studies is an interdisciplinary cultural studies degree program based in Dedman College and designed to encourage students to acquire not only strong disciplinary training but also broadly-based sensitivity to medieval cultures, contexts and intellectual currents. The program draws upon courses in the Western Middle Ages as well as upon Byzantine and Islamic subjects offered by other departments in Dedman College of Humanities and Sciences, the Meadows School of the Arts and the Perkins School of Theology. It is also intended to serve students interested in pursuing a Ph.D. degree in a medieval field, since it will enable such students to gain a broad interdisciplinary acquaintance with the Middle Ages before narrowing their work to a specialized field at the doctoral level.

## Medieval Studies, M.A.

### Degree Requirements

To earn the M.A. in medieval studies, students must complete 30 credit hours, with the following requirements:

1. Twenty-four credit hours to be taken in graduate-level courses and seminars, to be distributed in at least three broad subject areas in medieval studies: a) history, b) literature, and c) music and visual arts. No more than 12 credit hours and no less than three credit hours may be applied in each area. Students are encouraged to take courses in philosophy, religious studies and church history when available.
2. Three credit hours in nonmedieval courses may be taken in the student's major disciplinary area of concentration with approval of the director of medieval studies.
3. Competence, demonstrated by examination, in intermediate Latin and one other world or medieval language.
4. A thesis carrying six credit hours of credit linking materials and methods of more than one discipline, to be guided by a committee of the director of medieval studies and professors from the two major subject areas covered by the thesis.

### Curriculum

Competence in intermediate Latin and one other world or medieval language must be demonstrated by examination. The Dallas Medieval Consortium makes it possible for SMU students to enroll in regularly offered advanced Latin courses at the University of Dallas.

### Historical Discourse

A model program for a student interested particularly in historical discourse might include:

- HIST 5370 - Seminar in French History
- HIST 6385 - Problems in British History

### Additional Course

In addition, the student might take:

- HX 8321 - The History of Christian Doctrine I

### Literary Discourse

A student primarily interested in literary discourse might take:

- ENGL 6320 - Medieval Literature
- ENGL 6321 - Readings: Medieval Literature
- ENGL 6322 - Readings: Medieval Literature

- HIST 6352 - Problems Medieval Spanish History
- ARHS 6322 - Art and the Italian Commune
- ARHS 6324 - Art and Cultures of Medieval Spain
- HX 8321 - The History of Christian Doctrine I

## Visual Arts

A student primarily interested in the visual arts might put together a very coherent program using:

- ARHS 6322 - Art and the Italian Commune
- ARHS 6324 - Art and Cultures of Medieval Spain
- ARHS 6325 - The Gothic Cathedral and Its World
- ARHS 6320 - Medieval Art
- HIST 6350 - Problems in Medieval History
- ENGL 6320 - Medieval Literature
- HX 8308 - Varieties of Medieval Theology

## Regularly Offered Courses

Regularly offered courses include the following:

### Dedman College Courses

- ENGL 6320 - Medieval Literature (Medieval Literary-Cultural History through 1500)
- ENGL 6321 - Readings: Medieval Literature
- ENGL 6322 - Readings: Medieval Literature
- FREN 5370 - Seminar in French Literature (when applicable)
- HIST 6349 - Problems in Medieval History
- HIST 6350 - Problems in Medieval History
- HIST 6352 - Problems Medieval Spanish History
- HIST 6385 - Problems in British History (when applicable)
- MDVL 5301 - Independent Study
- MDVL 5302 - Independent Study
- MDVL 5398 - Independent Study
- MDVL 5399 - Independent Study
- MDVL 6398 - Thesis
- MDVL 6399 - Thesis
- SPAN 5310 - Spanish Literature Before 1700
- HIST 5370 - Seminar in French History

### Meadows School of the Arts Courses

- ARHS 5320 - Seminar on Medieval Art
- ARHS 5322 - Seminar on Convivencia: Jewish, Islamic, and Christian Art in Medieval Spain
- ARHS 6320 - Medieval Art
- ARHS 6322 - Art and the Italian Commune
- ARHS 6324 - Art and Cultures of Medieval Spain
- ARHS 6325 - The Gothic Cathedral and Its World
- ARHS 6399 - The Medieval Jewish-Christian Dialogue in Art and Text
- MUHI 6392 - Directed Studies in Music History

## Perkins School of Theology Courses

- HX 8308 - Varieties of Medieval Theology
- HX 8321 - The History of Christian Doctrine I

## Medieval Studies Courses

### MDVL 5301 - Independent Study

*Credits: 3*

Research and writing in medieval fields on special topics at the forefront of current intellectual interest.

### MDVL 5302 - Independent Study

*Credits: 3*

Research and writing in medieval fields on special topics at the forefront of current intellectual interest.

### MDVL 5398 - Independent Study

*Credits: 3*

Research and writing in medieval fields on special topics at the forefront of current intellectual interest.

### MDVL 5399 - Independent Study

*Credits: 3*

Research and writing in medieval fields on special topics at the forefront of current intellectual interest.

### MDVL 6049 - Graduate Full-Time Status

*Credits: 0*

Independent course for students continuing work on an M.A. thesis.

### MDVL 6308 - Towns, Trade, and Revolution in the Medieval West

*Credits: 3*

Investigates the medieval city from its origins through 1500. Within a chronological framework, students explore urban populations and institutions, commerce, universities, guilds, and the Black Death.

### MDVL 6318 - Byzantine History, 285-1453

*Credits: 3*

Traces the outlines of Byzantine history from 285 to 1453. Topics include the changing structure of the family, gender roles, ruler and ruled, and town and country.

### MDVL 6398 - Thesis

*Credits: 3*

Research and writing the M.A. thesis with guidance from the student's thesis director.

### MDVL 6399 - Thesis

*Credits: 3*

Research and writing the M.A. thesis with guidance from the student's thesis director.

# Physics

www.smu.edu/physics

**Professor** Ryszard Stroynowski, **Department Chair**

**Professors:** Thomas Coan, Robert Kehoe, Fred Olness, Ryszard Stroynowski, Jingbo Ye

**Associate Professors:** Jodi Cooley-Sekula, Pavel Nadolsky, Stephen Sekula, Roberto Vega

**Assistant Professors:** Allison McCarn Deiana, Joel Meyers

**Senior Lecturers:** Simon Dalley, Randall Scalise

**Lecturer:** Durdana Balakishiyeva

**Research Professors:** Datao Gong, Tiankuan Liu

**Research Assistant Professors:** Katharine Leney, Chonghan Liu

## Physics, Ph.D.

### Degree Requirements

Candidates for the Ph.D. degree must satisfactorily complete eight core courses, four elective graduate courses in physics or astrophysics, and at least 48 credit hours of graduate courses in total. Students typically take the core sequence of courses during their first two years, and may take electives during their second and later years, according to their interests and in consultation with their research adviser.

### Core Courses (24 Credit Hours)

Candidates choose eight core courses from the following list:

- PHYS 5395 - Introduction to Elementary Particles
- PHYS 6321 - Classical Mechanics
- PHYS 6335 - Quantum Mechanics I
- PHYS 6336 - Quantum Mechanics II
- PHYS 6351 - Statistical Mechanics
- PHYS 7311 - Electromagnetic Theory I
- PHYS 7312 - Electromagnetic Theory II
- PHYS 7314 - Quantum Field Theory I
- PHYS 7315 - Quantum Field Theory II
- PHYS 7363 - Experimental Particle Detection and Detectors I

### Elective Courses (12 Credit Hours)

Four elective graduate courses chosen upon the recommendation of the Ph.D. adviser from a list found in the Physics Department Graduate Student Handbook.

### Research Courses

After completing core courses and electives, students typically sign up for 8000-level research courses under their adviser until reaching the required 48 credit hours.

### Comprehensive Qualifying Exam

In order to advance to Ph.D. candidacy, students must pass a comprehensive qualifying exam in the form of a four-part written exam on the topics of Mechanics, Quantum Mechanics, Electrodynamics, and Statistical Mechanics. Exams are given annually, usually just prior to the start of the spring semester. Students are allowed two attempts to pass all four sections and must do so before the beginning of their fourth semester.

# Physics, M.S.

## Degree Requirements

The M.S. degree in physics is only available to students enrolled in the Ph.D. program in physics at SMU. To earn the M.S. en route to the Ph.D, students must complete either 33 credit hours of approved graduate coursework or 30 credit hours of courses, including a research thesis. Every student's degree plan must contain at least 18 credit hours of graduate-level work in physics, including a prescribed sequence of three courses. Students also must pass a comprehensive exam, or, if applicable, defend their thesis.

## Physics Courses

### **PHYS 5337 - Introduction to Solid State Physics**

*Credits: 3*

Crystal lattices and the reciprocal lattice, the free-electron model of metals, crystal binding, lattice vibrations phonons, thermal properties of solids, and energy bands in solids. Prerequisites: PHYS 3305, PHYS 3344.

### **PHYS 5380 - Concepts of Experimental Particle Physics**

*Credits: 3*

Principles of elementary particle physics. Review of particles properties, theory, acceleration techniques and detector technologies. Discussion of the particles effects in astrophysics and cosmology. Prerequisite: PHYS 3305 or equivalent. PHYS 5382 is recommended.

### **PHYS 5382 - Introduction to Quantum Mechanics**

*Credits: 3*

An introduction to the principles of quantum mechanics, the Schrodinger equation and solutions for one-dimensional problems, the Dirac formalism, angular momentum and quantum mechanics in three dimensions, the central potential, spin, and additions of spins. Prerequisites: PHYS 3305, and PHYS 4321 or MATH 3304 (formerly MATH 3353 prior to Fall 2017).

### **PHYS 5383 - Advanced Quantum Mechanics**

*Credits: 3*

Applications and approximation methods in quantum mechanics. Also, applications to laser physics, solid-state physics, molecular physics, and scattering. Prerequisite: PHYS 5382.

### **PHYS 5384 - Quantum Physics II**

*Credits: 3*

Quantum statistics; band theory of solids; superconductivity, magnetism, and critical phenomena; nuclear physics; and physics of elementary particles. Prerequisite: PHYS 5383 or permission of instructor

### **PHYS 5393 - Electromagnetic Waves and Optics**

*Credits: 3*

Theory and applications of electromagnetic wave radiation, propagation, and scattering. Also, geometrical and physical optics, guided waves, lasers, coherent optics, and interferometry and holography. Prerequisite: PHYS 4392, equivalent, or consent of instructor.

### **PHYS 5395 - Introduction to Elementary Particles**

*Credits: 3*

Modern theories of elementary particles, including relativistic kinematics, Feynman diagrams, quantum electrodynamics, quarks, weak interactions, and gauge theories. Prerequisite: PHYS 5383.

### **PHYS 5398 - Applications of Quantum Mechanics**

*Credits: 3*

The principles of quantum theory are used in a study of radiative transition in atoms and molecules, quantum statistics, band theory of solids, semiconductor theory, and laser physics. Prerequisite: PHYS 5382 or equivalent.

### **PHYS 6049 - Graduate Full-Time Status**

*Credits: 0*

### **PHYS 6160 - Introductory Physics Instruction: A Practicum**

*Credits: 1*

Introduces graduate students to the foundational skills and approaches in the modern introductory physics education environment. Prepares students for instruction in introductory physics courses. Recommended prerequisites before enrolling in this course: PHYS 3305 or its equivalent.

### **PHYS 6321 - Classical Mechanics**

*Credits: 3*

Topics in classical mechanics, including the mechanics of a system of particles, the two-body central-force problem, Lagrange's and Hamilton's formulations, the special theory of relativity, Hamilton-Jacobi theory, and continuous systems and fields.

### **PHYS 6335 - Quantum Mechanics I**

*Credits: 3*

Fundamental principles of quantum theory with applications to one-dimensional problems, the free particle, and the hydrogen atom; the spinning electron. Perturbation theory with applications to atomic spectra; systems of identical particles; scattering theory; Dirac theory of the electron. Prerequisites: PHYS 5382 or equivalent, MATH 3313.

### **PHYS 6336 - Quantum Mechanics II**

*Credits: 3*

Fundamental principles of quantum theory with applications to one-dimensional problems, the free particle, and the hydrogen atom; the spinning electron. Perturbation theory with applications to atomic spectra; systems of identical particles; scattering theory; Dirac theory of the electron. Prerequisites: PHYS 5382 or equivalent, MATH 3313.

### **PHYS 6338 - Condensed Matter Physics**

*Credits: 3*

Plasmons, polaritons, and polarons. Optical properties of solids. Superconductivity. Atomic and collective magnetism. Atomic and collective electrical phenomena. Prerequisite: PHYS 5337 or permission of instructor.

### **PHYS 6341 - Nuclear Physics**

*Credits: 3*

General properties of the nucleus; the two-nucleon problem; radioactivity; beta decay; interaction of charged particles and radiation with matter; detection methods; nuclear models; nuclear reactions; neutron physics. Prerequisite: PHYS 6335 or permission of instructor.

### **PHYS 6351 - Statistical Mechanics**

*Credits: 3*

Derivation of classical and quantum statistical distribution functions; partition functions; the laws of thermodynamics; ensemble theory; applications to gases and solids. Prerequisite: PHYS 3374 or permission of instructor.

### **PHYS 6361 - Selected Topics**

*Credits: 3*

Content varies term to term.

### **PHYS 6368 - Foundations of Modern Cosmology**

*Credits: 3*

Principles and concepts of modern cosmology including the geometry of the universe, cosmological models, nucleosynthesis, inflation, dark energy, dark matter, the cosmic microwave background and baryonic acoustic oscillations. Prerequisites: MATH 2339 and MATH 2343 or equivalent.

### **PHYS 6371 - Stellar Structure and Evolution**

*Credits: 3*

An introduction to the basic physics of stars, including energy generation and transport, equilibrium and instability. Includes observational sources, nuclear processes and star formation, evolution and death. Prerequisite: Permission of the instructor.

### **PHYS 6398 - Thesis**

*Credits: 3*

Research and writing of the thesis with guidance from the student's thesis director.

### **PHYS 6399 - Thesis**

*Credits: 3*

Research and writing of the thesis with guidance from the student's thesis director.

### **PHYS 7170 - Current Topics in Physics**

*Credits: 1*

Seminar course on current topics in physics.

### **PHYS 7305 - Methods of Theoretical Physics**

*Credits: 3*

Mathematical methods; theory of analytic functions, evaluation of integrals, linear vector spaces, special functions, integral equations, tensor analysis, calculus of variations, group theory. Prerequisites: Working knowledge of complex variable, Fourier transforms, and partial differential equations.

### **PHYS 7311 - Electromagnetic Theory I**

*Credits: 3*

Boundary-value problems in electrostatics; dielectrics; magnetic media; Maxwell's equations; electromagnetic waves; refraction and reflection; wave guides and cavities. Electromagnetic radiation; diffraction and interference; plasma physics; special relativity; dynamics of charged particles; multipole expansion. Prerequisite: PHYS 5393 or permission of instructor.

### **PHYS 7312 - Electromagnetic Theory II**

*Credits: 3*

Boundary-value problems in electrostatics; dielectrics; magnetic media; Maxwell's equations; electromagnetic waves; refraction and reflection; wave guides and cavities. Electromagnetic radiation; diffraction and interference; plasma physics; special relativity; dynamics of charged particles; multipole expansion. Prerequisite: PHYS 5393 or permission of instructor.

### **PHYS 7314 - Quantum Field Theory I**

*Credits: 3*

Classical fields; symmetry transformations and conservation laws; the quantum theory of radiation; relativistic quantum mechanics of spin-1/2 particles, second quantization and the theory of interaction fields. Covariant perturbation theory; collision phenomena in quantum electrodynamics; renormalization. Prerequisite: PHYS 6336.

### **PHYS 7315 - Quantum Field Theory II**

*Credits: 3*

Path integral formulation; renormalization group; symmetry structure; formal aspects; nonabelian gauge theories. Prerequisite: PHYS 7314 or permission of instructor.

### **PHYS 7321 - Atomic Physics**

*Credits: 3*

The central-field model of atomic structure, the Hartree methods; angular momentum and the vector model of the atom;

antisymmetry and the determinantal method: theory of multiplets; magnetic properties of atoms. Prerequisites: PHYS 6336 or working knowledge of quantum mechanics and permission of instructor.

### **PHYS 7330 - Physics of Quantum Electronics**

*Credits: 3*

Interactions of electromagnetic radiation with atomic systems; absorption and dispersion, line-broadening mechanisms, amplification. Quantum theory of light scattering: Rayleigh, Raman, and Brillouin scattering. Theory of lasers. Coherent pulse propagation. Nonlinear optical processes. Prerequisites: PHYS 6336, or working knowledge of quantum mechanics, and permission of instructor.

### **PHYS 7341 - Theoretical Nuclear Physics**

*Credits: 3*

Properties of nuclear forces; many-body theory of nuclear models; analysis of scattering experiments. Interaction between nucleons and radiation; pion physics; weak interactions. Prerequisites: PHYS 6336 and PHYS 6341.

### **PHYS 7350 - General Relativity**

*Credits: 3*

Einstein's theory, black holes, gravitational waves, and cosmology. Prerequisite: PHYS 6321 or permission of instructor.

### **PHYS 7360 - Elementary Particles I**

*Credits: 3*

Physics of the standard model; quarks and leptons; internal symmetries, grand unified theories. Prerequisite: Permission of instructor.

### **PHYS 7361 - Elementary Particles II**

*Credits: 3*

Continues PHYS 7360 with emphasis on current topics. Prerequisite: PHYS 7360 or permission of instructor.

### **PHYS 7363 - Experimental Particle Detection and Detectors I**

*Credits: 3*

Discusses particle detection and detectors. Designed for experimental particle physicists or for those who want to understand the basic physics and techniques in particle detection. Prerequisite: PHYS 5380. Corequisites: Mastery of one modern computing language such as C++, Python, or Java; the ability to work in a Linux OS environment. If the primary language is not C++, students should be able to learn enough C++ after a brief introduction at the beginning of the course. (*Spring 2020*)

### **PHYS 8049 - Graduate Full-Time Status**

*Credits: 0*

### **PHYS 8100 - Research**

*Credits: 1*

Research and study of selected physics topics; content varies term to term.

### **PHYS 8200 - Research**

*Credits: 2*

Research and study of selected physics topics; content varies term to term.

### **PHYS 8300 - Research**

*Credits: 3*

Research and study of selected physics topics; content varies term to term.

**PHYS 8361 - Special Topics in Physics**

*Credits: 3*

Content varies term to term.

**PHYS 8362 - Special Topics in Physics**

*Credits: 3*

Content varies term to term.

**PHYS 8398 - Dissertation**

*Credits: 3*

Research and writing of the dissertation.

**PHYS 8399 - Dissertation**

*Credits: 3*

Research and writing of the dissertation.

**PHYS 8400 - Research**

*Credits: 4*

Research and study of selected physics topics; content varies term to term.

**PHYS 8500 - Research**

*Credits: 5*

Research and study of selected physics topics; content varies term to term.

**PHYS 8600 - Research**

*Credits: 6*

Research and study of selected physics topics; content varies term to term.

**PHYS 8700 - Research**

*Credits: 7*

Research and study of selected physics topics; content varies term to term.

**PHYS 8800 - Research**

*Credits: 8*

Research and study of selected physics topics; content varies term to term.

**PHYS 8900 - Research**

*Credits: 9*

Research and study of selected physics topics; content varies term to term.

# Psychology

www.smu.edu/psychology

**Professor** George Holden, **Department Chair**

**Professors:** George Holden, Ernest Jouriles, Akihito Kamata, Renee McDonald, Alicia Meuret, Thomas Ritz

**Associate Professors:** Austin Baldwin, Michael Chmielewski, Robert Hampson, Chrystyna Kouros, David Rosenfield

**Assistant Professors:** Holly Bowen, Nathan Hudson, Priscilla Lui, Benjamin Tabak, Stephanie Wilson

**Senior Lecturers:** James Calvert, Susan Hornstein, Chris Logan

**Clinical Assistant Professor:** Naomi Tabak

## Psychology, Ph.D.

The Ph.D. program in clinical psychology is a 70-credit hour program designed to prepare a student for a professional career in research, teaching and/or the clinical applications of empirically supported psychological methods. The four major requirements for the Ph.D. degree consist of departmental research requirements, coursework, practica and a formal clinical internship.

## Degree Requirements

### Research Requirements and Qualifications for Candidacy

Students are expected to conduct research throughout their enrollment in the clinical psychology doctoral program. To facilitate their involvement and training in research, the program will include several research benchmarks that students must complete prior to graduation. Research benchmarks must be completed in accordance with the Dedman College graduate catalog. A brief description of the research benchmarks follows. For specific details, students are referred to in the Psychology Department's *Graduate Student Handbook*.

### First-Year Research

First-year students work on research projects with their faculty adviser. This research experience is intended to provide students with exposure to a research area and help shape the skills necessary to develop hypotheses, analyze data and communicate the results.

### Thesis

#### First Research Benchmark

Students are expected to complete a student-directed empirical research project that will constitute their thesis. Students present an oral defense of their thesis proposal (prior to initiating thesis research) to a committee consisting of three faculty members. The thesis proposal is expected to occur prior to July 31 of the second year. An M.A. degree will be awarded en route for doctoral candidates who successfully complete their thesis requirement.

### Presentation of Research at a Professional Conference and Publication of Research in a Professional Journal

#### Second Research Benchmark

All graduate students are required to publish at least two manuscripts in peer-reviewed outlets, at any level of authorship, prior to graduation. Although two publications are required to meet this benchmark, graduate students should be active in presentation of research throughout their graduate career (e.g., at least one conference presentation or publication per year after the first year).

### Review Article

#### Third Research Benchmark

To demonstrate in-depth knowledge of their research area and to demonstrate their capability to interpret and synthesize theories and data in this area, students write a review article on a topic related to their area of research. This benchmark should be completed by the middle of the third year (February 1st).

## Dissertation

### Fourth Research Benchmark

The dissertation is an original empirical research project with the potential to contribute to the knowledge base in a specific area of clinical psychology. Before a student can begin the dissertation, the student must be advanced to candidacy (described below). Students must formally propose the project to the dissertation committee. Successful completion of the dissertation will be determined by an oral defense in front of the student's dissertation committee consisting of four faculty members (one from outside the department).

It is expected that students will propose their dissertation by September 30 of the year they intend to apply for internship.

## Candidacy Requirements

Candidacy requirements consist of completion of the first three research benchmarks and the core clinical courses (there is no additional written test); candidacy is typically completed by the end of their third year in the program. Advancement to candidacy is necessary for students to initiate dissertation research and to apply for an internship. Students are required to propose their dissertation by September 30 of the year they apply for internship (typically in the fall of the fifth year of study).

## Required Courses (42 Credit Hours)

The following courses are required:

- PSYC 6305 - Quantitative Methods I
- PSYC 6307 - Quantitative Methods II
- PSYC 6314 - Seminar in Adult Psychopathology
- PSYC 6317 - Biological and Neuroscientific Bases of Behavior
- PSYC 6324 - Research Methods
- PSYC 6334 - Seminar in Developmental Psychopathology
- PSYC 6345 - Cultural and Individual Diversity: Principles and Best Practices in Research and Applications
- PSYC 6351 - Theories and Methods of Psychotherapy
- PSYC 6353 - Psychometrics, Test Construction, and Assessment
- PSYC 6355 - Applied Clinical Skills (includes Interviewing)
- PSYC 6359 - Affective and Social Neuroscience
- PSYC 6364 - Foundations in Psychology: Social and Cognitive Psychology, and the History and Systems of Psychology (Cognitive, Social, History)
- PSYC 6366 - Supervision and Consultation in Psychology
- PSYC 6380 - History and Ethics in Psychology

## Research Credits (9 Credit Hours)

- PSYC 6398 - Thesis
- PSYC 8396 - Dissertation
- PSYC 8397 - Dissertation

## Clinical Practica (0 Credit Hours)

Students will participate in practicum training beginning in their second year. Purposes of clinical practica are to:

- Provide students training, supervision, and experience in the use of empirically supported methods of assessment and intervention.
- Offer students training, supervision, and experiences in working with a diverse sample of clients.
- Expose students to nonacademic sites in which psychological research is conducted.

The following practica are required:

- PSYC 6091 - Practicum Seminar
- PSYC 6092 - Practicum Seminar
- PSYC 6093 - Practicum Seminar
- PSYC 6094 - Practicum Seminar
- PSYC 6095 - Practicum Seminar
- PSYC 6096 - Practicum Seminar
- PSYC 6097 - Practicum Seminar
- PSYC 6098 - Practicum Seminar
- PSYC 7091 - Practicum in Psychology
- PSYC 7092 - Practicum in Psychology
- PSYC 7093 - Practicum in Psychology
- PSYC 7094 - Practicum in Psychology
- PSYC 7095 - Practicum in Psychology
- PSYC 7096 - Practicum in Psychology
- PSYC 7097 - Practicum in Psychology
- PSYC 7098 - Practicum in Psychology

### Psychology Clinic (3-12 Credit Hours)

The following course is required:

- PSYC 6354 - Assessment Practicum

In addition, students may enroll in:

- PSYC 6331 - Psychotherapy Practicum I
- PSYC 6332 - Psychotherapy Practicum II
- PSYC 6361 - Assessment Practicum II

### Internship (0 Credit Hours)

Students participate in the following two required internships:

- PSYC 8091 - Clinical Internship I
- PSYC 8092 - Clinical Internship II

### Elective Coursework

Elective courses (up to 12 credit hours) can be taken from Psychology Department courses at the 6000-level and above. Elective courses are offered less frequently, and are optional. Courses from other departments or schools can also be taken with approval of the director of graduate studies.

The following is a list of available elective courses offered by the Psychology Department:

- PSYC 6309 - Seminar in Health Psychology
- PSYC 6330 - Seminar in Psychopharmacology
- PSYC 6367 - Forensic Psychology
- PSYC 6371 - Research on Psychology
- PSYC 6372 - Research in Psychology

## Quantitative Methods Minor (12 Credit Hours)

12 credit hours in additional coursework in advanced statistical methods are available as an elective minor, with courses in SEM, HSLM, IRT, and other advanced methods within and outside the department.

Four courses from the following:

- EDU 7320 - Advanced Assessment Methods II
- EDU 7321 - Quantitative Research Methods II
- ECO 6352 - Applied Econometric Analysis
- ECO 6380 - Predictive Analytics for Economists
- PSYC 6322 - Longitudinal Data Analysis Using Multilevel Methods
- PSYC 6323 - Structural Equation Modeling
- STAT 6308 - SAS II and Databases
- STAT 6360 - Statistical Methods in Epidemiology
- Other courses may be approved by the department on a case-by-case basis.

## Grade Point Average

To be in good standing in the Ph.D. program, students are expected to obtain a grade of *B* or better in each course. A course with a grade of *C* must be retaken. Two or more courses with a grade of *C* may result in dismissal.

## Periodic Performance Reviews

Student performance will be reviewed twice in the first year and annually thereafter, assessing performance in research, clinical skills, and assigned duties.

## Psychology, M.A.

The M.A. in psychology degree is only available to students enrolled in the Ph.D. program in clinical psychology at SMU. See the Ph.D. program information for further details on earning the M.A. degree.

## Psychology Courses

### **PSYC 6091 - Practicum Seminar**

*Credits: 0*

Seminar for all students enrolled in PSYC 7091. Students participate in an off-campus practicum and also meet biweekly with faculty to review cases, learn supervision techniques, and review procedures for assessment and treatment. Instructor consent and Ph.D. practicum enrollment required.

### **PSYC 6092 - Practicum Seminar**

*Credits: 0*

Students participate in an off-campus practicum but also meet biweekly with faculty to review cases, learn supervision techniques, and review procedures for assessment and treatment. Instructor consent and Ph.D. practicum enrollment required.

### **PSYC 6093 - Practicum Seminar**

*Credits: 0*

Students participate in an off-campus practicum but also meet biweekly with faculty to review cases, learn supervision techniques, and review procedures for assessment and treatment. Instructor consent and Ph.D. practicum enrollment required.

### **PSYC 6094 - Practicum Seminar**

*Credits: 0*

Students participate in an off-campus practicum but also meet biweekly with faculty to review cases, learn supervision techniques, and review procedures for assessment and treatment. Instructor consent and Ph.D. practicum enrollment required.

### **PSYC 6095 - Practicum Seminar**

*Credits: 0*

Students participate in an off-campus practicum but also meet biweekly with faculty to review cases, learn supervision techniques, and review procedures for assessment and treatment. Instructor consent and Ph.D. practicum enrollment required.

### **PSYC 6096 - Practicum Seminar**

*Credits: 0*

Students in an off-campus practicum but also meet biweekly with faculty to review cases, learn supervision techniques, and review procedures for assessment and treatment. Instructor consent and Ph.D. practicum enrollment required.

### **PSYC 6097 - Practicum Seminar**

*Credits: 0*

Students participate in an off-campus practicum but also meet biweekly with faculty to review cases, learn supervision techniques, and review procedures for assessment and treatment. Instructor consent and Ph.D. practicum enrollment required.

### **PSYC 6098 - Practicum Seminar**

*Credits: 0*

Students in an off-campus practicum but also meet biweekly with faculty to review cases, learn supervision techniques, and review procedures for assessment and treatment. Instructor consent and Ph.D. practicum enrollment required.

### **PSYC 6305 - Quantitative Methods I**

*Credits: 3*

Theoretical bases of quantitative methods used in experimental research designs. Topics will include rules of probability, random variables and their distributions, statistical inference, tests of hypotheses and confidence intervals for population means, and analysis of variance. Prerequisite: Permission of instructor.

### **PSYC 6307 - Quantitative Methods II**

*Credits: 3*

Theoretical bases of quantitative methods used in quasi- and nonexperimental research designs. Topics include correlation, regression, multiple regression, partial and multiple correlation, and nonparametric approaches. Prerequisite: Permission of instructor.

### **PSYC 6309 - Seminar in Health Psychology**

*Credits: 3*

Current theories and research in health psychology.

### **PSYC 6311 - Seminar in Social Psychology**

*Credits: 3*

Current theories and research on the social influences of behavior.

### **PSYC 6312 - Seminar in Developmental Psychology**

*Credits: 3*

Current theories and research in developmental psychology.

### **PSYC 6314 - Seminar in Adult Psychopathology**

*Credits: 3*

The presentation and discussion of selected topics involving research in psychopathology.

### **PSYC 6316 - Seminar in Cognitive Psychology I**

*Credits: 3*

An in-depth examination of selected topics in the general areas of human learning, memory, thinking, and related experiences.

### **PSYC 6317 - Biological and Neuroscientific Bases of Behavior**

*Credits: 3*

Provides comprehensive exposure to a selected area or problem in physiological psychology. Areas receiving such treatment might include limbic system-behavior relationships, biological bases of motivation, and biological bases of learning and memory.

### **PSYC 6318 - Seminar in Sensation and Perception**

*Credits: 3*

Study physical stimuli, physiological receptors, and psychological processes involved in extracting information from the physical world.

### **PSYC 6322 - Longitudinal Data Analysis Using Multilevel Methods**

*Credits: 3*

Discusses how to apply advanced statistical techniques to analyze longitudinal social science data sets. Emphasizes the application and interpretation of the results of the statistical tests and the limitations inherent in each test. Prerequisites: PSYC 6305 and PSYC 6307, or permission of instructor.

### **PSYC 6323 - Structural Equation Modeling**

*Credits: 3*

Introduces the basic theory of structural equation modeling, which is a system of regression models with observed and unobserved variables. Focuses on SEM behavioral and social science applications.

### **PSYC 6324 - Research Methods**

*Credits: 3*

Seminar addressing issues of research design and implementations in clinical psychology. Topics include validity and reliability of clinical assessment, experimental and quasi-experimental designs, causal inference, interpretation of data, and research ethics.

### **PSYC 6330 - Seminar in Psychopharmacology**

*Credits: 3*

Introduces psychotropic drugs and their uses, with a focus on the relationship between psychology and psychiatry in practice.

### **PSYC 6331 - Psychotherapy Practicum I**

*Credits: 3*

Combined didactic/lecture and laboratory experience for second-year graduate students. Emphasis is on individuals seeking or participating in psychological evaluation and/or clinical services.

### **PSYC 6332 - Psychotherapy Practicum II**

*Credits: 3*

Continuation into the second term of a combined didactic/lecture and laboratory practicum experience for second-year graduate students. Emphasis is placed on assessment of and brief psychotherapy for medical patients in the Baylor Hospital Trauma Unit.

### **PSYC 6334 - Seminar in Developmental Psychopathology**

*Credits: 3*

Advanced seminar examining theories and data on psychopathology in childhood and adolescence.

### **PSYC 6340 - Psychobiology of Emotion**

*Credits: 3*

Provides an empirically based foundation in the psychobiology processes involved in human emotion (e.g., anger, fear, anxiety, and depression) that underlie interventions for clinically elevated levels of these emotions.

### **PSYC 6345 - Cultural and Individual Diversity: Principles and Best Practices in Research and Applications**

*Credits: 3*

Introduces students to the roles of cultural and individual diversity in psychological phenomena, particularly as they set foundations for the science and practice of professional psychology.

### **PSYC 6351 - Theories and Methods of Psychotherapy**

*Credits: 3*

Discussion of research concerning the efficacy and effectiveness of individual psychotherapy; discussion about and training in the major theoretical methods of individual psychotherapy; ethics of individual psychotherapy. Open to psychology graduate students only.

### **PSYC 6353 - Psychometrics, Test Construction, and Assessment**

*Credits: 3*

Application of psychological methods to the study of the individual; rationale of test construction and interpretation; problems in the prediction of human behavior; and theory and practice in psychological assessment techniques to measure personality, intelligence, and behavior. The focus throughout is on the integration of diverse sources of data to better inform psychodiagnostic decision-making. Open to psychology graduate students only.

### **PSYC 6354 - Assessment Practicum**

*Credits: 3*

On-campus practicum for Ph.D. students to learn to administer and interpret cognitive, achievement, personality, and behavioral psychological tests; to conduct feedback sessions; and to generate appropriate reports. Instructor consent and Ph.D. student status required.

### **PSYC 6355 - Applied Clinical Skills**

*Credits: 3*

Emphasizes fundamental clinical skills of interviewing and diagnostic assessment.

### **PSYC 6356 - Theories and Methods of Couple and Family Therapy**

*Credits: 3*

Introduction to theories of marriage, family, and divorce counseling. Also, research on these approaches, with a focus on the types of interaction between spouses and between family members.

### **PSYC 6357 - Seminar in Interviewing Skills**

*Credits: 3*

For Ph.D. and M.A. students in psychology. Students are taught interviewing techniques, basic supportive counseling skills, and effective communication and planning of clinical therapy sessions. Employs didactic and experiential methods of instruction.

### **PSYC 6359 - Affective and Social Neuroscience**

*Credits: 3*

Examines research and clinical findings in the field of affective and social neuroscience using neuroscientific methods, e.g., neuroimaging. Prerequisites: Psychology Ph.D. student or instructor approval.

### **PSYC 6360 - Ethics in Psychology**

*Credits: 3*

Reviews the current ethical code of conduct followed by professional psychologists. Ethical principles will be discussed in terms of their legal, social, and philosophical relevance.

### **PSYC 6361 - Assessment Practicum II**

*Credits: 3*

Second term of an on-campus practicum course for Ph.D. students to learn to administer and interpret a variety of psychological tests, to conduct feedback sessions, and to generate reports based upon these assessments.

### **PSYC 6362 - Advanced Special Topics**

*Credits: 3*

An advanced seminar on selected topics in various sub-areas of psychological research.

### **PSYC 6363 - Professional Issues in Psychology: Ethics and Diversity**

*Credits: 3*

Introduces two key domains in professional psychology: ethics and diversity. Students learn the ethical code of conduct followed by psychologists and discuss research and theory covering individual differences and diversity in psychology. Prerequisite: Instructor approval.

### **PSYC 6364 - Foundations in Psychology: Social and Cognitive Psychology, and the History and Systems of Psychology**

*Credits: 3*

Three 4-week miniseminars that provide a foundational knowledge in social and cognitive psychology and in the history and systems of psychology. Prerequisite: Instructor approval.

### **PSYC 6366 - Supervision and Consultation in Psychology**

*Credits: 3*

An in-depth examination of current methods, procedures, and efficacy of models of clinical supervision and both inter-mural and intra-mural psychological consultation. Prerequisite: Admission to Psychology Ph.D. Program or permission of the instructor.

### **PSYC 6367 - Forensic Psychology**

*Credits: 3*

Examines how clinical psychology and related fields of psychology contribute to a better understanding of forensic and legal issues, including eyewitness testimony, criminal profiling, assessment of competency, risk assessment, assessment of psychopathy, interrogation of witnesses, police psychology, family law issues, mock trials, witness training, psychological theory of case litigation, jury selection, problem solving courts, and sentencing.

### **PSYC 6371 - Research on Psychology**

*Credits: 3*

Supervised individual empirical research on selected problems. A research proposal must be submitted to and approved by the instructor before admission.

### **PSYC 6372 - Research in Psychology**

*Credits: 3*

Supervised individual empirical research on selected problems. A research proposal must be submitted to and approved by the instructor before admission.

### **PSYC 6380 - History and Ethics in Psychology**

*Credits: 3*

Reviews the current ethical code of conduct followed by professional psychologists. Discusses ethical principles in terms of their legal, social, and philosophical relevance. Covers major theoretical developments in the field of psychology in the history of psychology module.

### **PSYC 6381 - Advanced Applied Social Psychology**

*Credits: 3*

Delves deeply into issues of attitudes and persuasion, small group behavior and teamwork, social influence, motivation, interpersonal and intrapersonal conflict, and work related well-being. Students gain an advanced understanding of social psychology research and theory, which will be embedded in the context of work and organizations. Prerequisite: Students accepted into the Accelerated Pathway in the Organizational Psychology M.S. program or by instructor approval.

### **PSYC 6382 - Organizational Theory and Development**

*Credits: 3*

Introduces students to graduate level work in organizational psychology with an emphasis on organizational theory, structure, development, culture, leadership, decision making, and change within organizations. Prerequisite: Students accepted into the Accelerated Pathway in the Organizational Psychology M.S. program or by instructor approval.

### **PSYC 6383 - Ethical, Legal, and Diversity Issues at Work**

*Credits: 3*

Covers ethical, legal, and diversity issues of employment and consulting. Special emphasis on workplace diversity and intercultural competence. Prerequisite: Students accepted into the Accelerated Pathway in the Organizational Psychology M.S. program or by instructor approval.

### **PSYC 6384 - Applied Research Methods and Analysis in Organizational Psychology**

*Credits: 3*

Covers research design issues. Topics include: the scientific method, measurement/assessment (e.g., reliability and construct validity), and advanced understanding of the strengths and limitations of correlational and experimental research designs. Students apply their knowledge to evaluate the quality of lab and field studies. Prerequisite: Students accepted into the Accelerated Pathway in the Organizational Psychology M.S. program or by instructor approval.

### **PSYC 6385 - Assessment: Individual Differences**

*Credits: 3*

Covers the assessment of individual differences. Provides an overview of psychometrics, measure evaluation, scale creation, classical test theory, generalizability theory, factor analysis, and item-response theory. Prerequisite: Students accepted into the Accelerated Pathway in the Organizational Psychology M.S. program or by instructor approval.

### **PSYC 6386 - Assessment: Programs**

*Credits: 3*

Focuses on research and analysis methods applied to organizational needs. Students develop skills in researching organizational needs, designing and delivering training, buy-in, and program evaluation. Prerequisite: Students accepted into the Accelerated Pathway in the Organizational Psychology M.S. program or by instructor approval.

### **PSYC 6391 - Internship**

*Credits: 3*

Supervised participation in work settings. Hands-on experience with organizational work assignments are performed and evaluated. Prerequisite: Students accepted into the Accelerated Pathway in the Organizational Psychology M.S. program or by instructor approval.

### **PSYC 6398 - Thesis**

*Credits: 3*

Academic credit for design, data collection, analysis, and writing of student master's thesis.

### **PSYC 7091 - Practicum in Psychology**

*Credits: 0*

Students conduct psychological assessments and interventions in a field placement under the direct supervision of an approved supervisor.

### **PSYC 7092 - Practicum in Psychology**

*Credits: 0*

Students conduct psychological assessments and interventions in a field placement under the direct supervision of an approved supervisor.

### **PSYC 7093 - Practicum in Psychology**

*Credits: 0*

Students conduct psychological assessments and interventions in a field placement under the direct supervision of an approved supervisor.

### **PSYC 7094 - Practicum in Psychology**

*Credits: 0*

Students conduct psychological assessments and interventions in a field placement under the direct supervision of an approved supervisor.

### **PSYC 7095 - Practicum in Psychology**

*Credits: 0*

Students conduct psychological assessments and interventions in a field placement under the direct supervision of an approved supervisor.

### **PSYC 7096 - Practicum in Psychology**

*Credits: 0*

Students conduct psychological assessments and interventions in a field placement under the direct supervision of an approved supervisor.

### **PSYC 7097 - Practicum in Psychology**

*Credits: 0*

Students conduct psychological assessments and interventions in a field placement under the direct supervision of an approved supervisor.

**PSYC 7098 - Practicum in Psychology**

*Credits: 0*

Students conduct psychological assessments and interventions in a field placement under the direct supervision of an approved supervisor.

**PSYC 7171 - Research**

*Credits: 1*

Academic credit for data collection, analysis, and writing of student research project.

**PSYC 7172 - Research**

*Credits: 1*

Academic credit for data collection, analysis, and writing of student research project.

**PSYC 7271 - Research**

*Credits: 2*

Academic credit for data collection, analysis, and writing of student research project.

**PSYC 7272 - Research**

*Credits: 2*

Academic credit for data collection, analysis, and writing of student research project.

**PSYC 7361 - Advanced Special Topics**

*Credits: 3*

**PSYC 7362 - Advanced Special Topics**

*Credits: 3*

An advanced seminar on selected topics in various sub-areas of psychological research.

**PSYC 7371 - Research**

*Credits: 3*

Academic credit for data collection, analysis, and writing of student research project.

**PSYC 7372 - Research**

*Credits: 3*

Academic credit for data collection, analysis, and writing of student research project.

**PSYC 8049 - Graduate Full-Time Status**

*Credits: 0*

Continuing graduate students who are finished with coursework but completing their thesis/dissertation research.

**PSYC 8091 - Clinical Internship I**

*Credits: 0*

The first term that the student has been matched with a formal internship training site. This is a full-time, supervised clinical position.

**PSYC 8092 - Clinical Internship II**

*Credits: 0*

The second term that the student continues at a formal internship training site. This is a full-time, supervised clinical position.

**PSYC 8096 - Dissertation**

*Credits: 0*

Design, data collection, analysis, and writing of student doctoral dissertation.

**PSYC 8105 - Research**

*Credits: 1*

**PSYC 8391 - Directed Studies**

*Credits: 3*

Advanced study on selected topics in various sub-areas of psychological research.

**PSYC 8392 - Directed Studies**

*Credits: 3*

Advanced study on selected topics in various sub-areas of psychological research.

**PSYC 8396 - Dissertation**

*Credits: 3*

Academic credit for design, data collection, analysis, and writing of student doctoral dissertation.

**PSYC 8397 - Dissertation**

*Credits: 3*

Academic credit for design, data collection, analysis, and writing of student doctoral dissertation.

# Religious Studies

[www.smu.edu/Dedman/Academics/Departments/ReligiousStudies/Graduate](http://www.smu.edu/Dedman/Academics/Departments/ReligiousStudies/Graduate)

**Professor** Johan Elverskog, **Director**

The Graduate Program in Religious Studies (GRPS) is composed of faculty from the Dedman Religious Studies department and the Perkins School of Theology, as well as the two University Ethics Professors.

## Dedman Religious Studies Faculty

**Professor** Johan Elverskog, **Department Chair**

**Professors:** William Barnard, Mark Chancey, Johan Elverskog, Serge Frolov

**Associate Professors:** Richard Cogley, Jill DeTemple, John Lamoreaux, Steven Lindquist

**Senior Lecturer:** Shira Lander

Perkins School of Theology Faculty and University Ethics Professors

## General Information

The Graduate Program in Religious Studies comprises programs of study leading to the M.A. and Ph.D. degrees. The primary goal of both degree programs is to prepare persons for academic leadership in the field and hence for professional careers as teacher-scholars in colleges, universities and schools of theology. The M.A. degree program also aims to accommodate the qualified nonprofessional student interested in advanced work in religious studies within the context of the liberal arts and sciences. Students specialize in one of the following six fields of study:

Hebrew Bible/Old Testament

Systematic Theology

New Testament

Religious Ethics (Christian ethics)

The Christian Tradition

Religion and Culture

## Language Requirement

All students are expected to demonstrate a reading competence in at least one approved language other than English upon matriculation, by passing an examination in that language in the August examination period preceding the first term of study. Ph.D. students will be expected to pass an examination in a second approved language by the beginning of the second year. (For students in the fields of Hebrew Bible or New Testament, the examination in the second language must be taken no later than May of the first year.)

The approved languages for examinations in both the M.A. and Ph.D degree programs are French, Spanish, German, Greek, Hebrew and Latin. Another pertinent language may be substituted with the approval of the GPRS Steering Committee. It is strongly recommended that Ph.D. students enter the program with a solid reading knowledge of the two (or more) languages in which they expect to be examined, since there is little time or opportunity for basic language acquisition during graduate study.

## Religious Studies, Ph.D.

### Admission Requirements

The deadline for completed applications is January 5. The requirements for admission to the Ph.D. degree program in religious studies are as follows:

1. The B.A. degree or its equivalent from an accredited institution.
2. A cumulative grade point average of 3.000 or above on a 4.000 scale.
3. A satisfactory score on the GRE general graduate school admission test, ordinarily including a combined score of 310 or greater on the verbal and quantitative sections.

4. Sufficient previous study in religion or related areas to be able to satisfy the requirements of the degree program.
5. When English is not the applicant's native language, a satisfactory TOEFL English language proficiency test score also is required. Internet-based version: 79-80 or better (preferably 100 or above); or paper-based version: 550 or better (preferably 600 or above).

## Degree Requirements

### Required Courses

Satisfactory completion of 48 credit hours of approved graduate coursework, including the four courses of the core seminar in religious studies, each of which is taught during one of the four terms of the student's two years of coursework:

- RELI 6301 - The Philosophical Study of Religion
- RELI 6302 - Approaches to Asian Religions
- RELI 6303 - History, Theory, and Method in Religious Studies
- RELI 6304 - Contemporary Approaches

### Reading Competence

Demonstrating, by examination, a reading competence in two approved languages, other than English, relevant to the student's field of study. (For students in the fields of Hebrew Bible and New Testament, four languages are required. Examinations must be passed in both Hebrew and Greek as well as in two additional languages.)

### Comprehensive Field Examinations

Passing four comprehensive field examinations on the subjects designated for examination in the student's field, each consisting of a six-hour written examination based on the bibliography agreed upon with the examiner.

### Dissertation Proposal

Securing the GPRS Steering Committee's approval of a dissertation proposal endorsed by the student's dissertation adviser, two other members of the SMU faculty and one reader from outside the University.

### Practice Teaching Requirement

Satisfactorily meeting the practice teaching requirement.

### Doctoral Dissertation

Satisfactorily completing the doctoral dissertation.

### Oral Examination

Satisfactorily passing an oral examination covering the student's entire course of study as well as the dissertation.

## **Religious Studies, M.A.**

### Admission Requirements

The deadline for completed applications is January 5. The requirements for admission to the M.A. degree program in religious studies are as follows:

1. The B.A. degree or its equivalent from an accredited institution.
2. A cumulative grade point average of 3.000 or above on a 4.000 scale.
3. A satisfactory score on the GRE general graduate school admission test, ordinarily including a combined score of 310 or greater on the verbal and quantitative sections.

4. Sufficient previous study in religion or related areas to be able to satisfy the requirements of the degree program.
5. When English is not the applicant's native language, a satisfactory TOEFL English language proficiency test score also is required. Internet-based version: 79-80 or better (preferably 100 or above); or paper-based version: 550 or better (preferably 600 or above).

## Degree Requirements

### Required Courses

Satisfactory completion of 30 credit hours of approved graduate coursework, including the four courses of the core seminar in religious studies, each of which is taught during the four terms of the student's two years of coursework:

- RELI 6301 - The Philosophical Study of Religion
- RELI 6302 - Approaches to Asian Religions
- RELI 6303 - History, Theory, and Method in Religious Studies
- RELI 6304 - Contemporary Approaches

### Reading Competence

Demonstrating, by examination, a reading competence in an approved language other than English, relevant to the field of study.

### Master's Thesis

Satisfactory completion of a master's thesis.

### Concentration

The student is encouraged to develop an area of concentration in his or her 18 credit hours of undesignated coursework. A maximum of six credit hours may be taken in independent study courses. Concentrations in areas of scholarship represented primarily in the Department of Religious Studies in Dedman College are especially welcome. Students whose main interests are in areas represented in the typical theological curriculum are advised to consider the Master of Theological Studies degree in Perkins School of Theology as an alternative to the M.A. degree in the Graduate Program in Religious Studies.

## Religious Studies Courses

### **RELI 6049 - Graduate Full-Time Status**

*Credits: 0*

### **RELI 6301 - The Philosophical Study of Religion**

*Credits: 3*

The work of this seminar will focus on aims, methods, and problems in the philosophical study of religion.

### **RELI 6302 - Approaches to Asian Religions**

*Credits: 3*

This seminar is a historical and theoretical inquiry into Asian religions. These traditions will be investigated through three broadly defined methods of theoretical approaches: textual studies, anthropology, and social/intellectual history.

### **RELI 6303 - History, Theory, and Method in Religious Studies**

*Credits: 3*

This course will introduce several of the principal approaches to the study of religion in the post-Enlightenment West, focusing on canonical thinkers from various disciplines, especially anthropology, sociology, and psychology.

**RELI 6304 - Contemporary Approaches**

*Credits: 3*

This seminar provides an orientation to the critical study of religion in its contemporary context, with specific attention to emerging issues and modes of inquiry.

**RELI 6398 - Thesis**

*Credits: 3*

Thesis research.

**RELI 6399 - Thesis**

*Credits: 3*

Thesis research.

**RELI 7300 - Philosophy of Religion I**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7301 - Philosophy of Religion II**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7302 - Philosophy of Religion III**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7303 - Philosophy of Religion IV**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7304 - Philosophy of Religion V**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7305 - Philosophy of Religion VI**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7306 - Philosophy of Religion VII**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7307 - Philosophy of Religion VIII**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7308 - Philosophy of Religion IX**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7309 - Philosophy of Religion X**

*Credits: 3*

Special topics in philosophy of religion.

**RELI 7310 - Philosophical Theology I**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7311 - Philosophical Theology II**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7312 - Philosophical Theology III**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7313 - Philosophical Theology IV**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7314 - Philosophical Theology V**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7315 - Philosophical Theology VI**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7316 - Philosophical Theology VII**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7317 - Philosophical Theology VIII**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7318 - Philosophical Theology IX**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7319 - Philosophical Theology X**

*Credits: 3*

Special topics in philosophical theology.

**RELI 7320 - Religion and Culture I**

*Credits: 3*

Special topics in religion and culture.

**RELI 7321 - Religion and Culture II**

*Credits: 3*

Special topics in religion and culture.

**RELI 7322 - Religion and Culture III**

*Credits: 3*

Special topics in religion and culture.

**RELI 7323 - Religion and Culture IV**

*Credits: 3*

Special topics in religion and culture.

**RELI 7324 - Religion and Culture V**

*Credits: 3*

Special topics in religion and culture.

**RELI 7325 - Religion and Culture VI**

*Credits: 3*

Special topics in religion and culture.

**RELI 7326 - Religion and Culture VII**

*Credits: 3*

Special topics in religion and culture.

**RELI 7327 - Religion and Culture VIII**

*Credits: 3*

Special topics in religion and culture.

**RELI 7328 - Religion and Culture IX**

*Credits: 3*

Special topics in religion and culture.

**RELI 7329 - Religion and Culture X**

*Credits: 3*

Special topics in religion and culture.

**RELI 7330 - Religion and Culture XI**

*Credits: 3*

Special topics in religion and culture.

**RELI 7331 - Religion and Culture XII**

*Credits: 3*

Special topics in religion and culture.

**RELI 7332 - Religion and Culture XIII**

*Credits: 3*

Special topics in religion and culture.

**RELI 7333 - Religion and Culture XIV**

*Credits: 3*

Special topics in religion and culture.

**RELI 7334 - Religion and Culture XV**

*Credits: 3*

Special topics in religion and culture.

**RELI 7335 - History of Christianity I**

*Credits: 3*

Special topics in the history of Christianity.

*Credits: 3*

Special topics on the New Testament.

**RELI 7398 - New Testament IX**

*Credits: 3*

Special topics on the New Testament.

**RELI 7399 - New Testament X**

*Credits: 3*

Special topics on the New Testament.

**RELI 8049 - Graduate Full-Time Status**

*Credits: 0*

Indicates the student has full-time status.

**RELI 8100 - Research**

*Credits: 1*

Dissertation research.

**RELI 8105 - Research**

*Credits: 1*

**RELI 8300 - Studies on the History of Doctrine**

*Credits: 3*

A cumulative examination of the basic doctrines and theologies that have shaped the Christian tradition. During fall term, the course surveys the formation of the patristic, Byzantine, and medieval Western theological traditions. During spring term, it covers the late medieval and Reformation periods as well as selected developments of the Enlightenment era through Schleiermacher.

**RELI 8301 - Studies on the History of Doctrine**

*Credits: 3*

A cumulative examination of the basic doctrines and theologies that have shaped the Christian tradition. During fall term, the course surveys the formation of the patristic, Byzantine, and medieval Western theological traditions. During spring term, it covers the late medieval and Reformation periods as well as selected developments of the Enlightenment era through Schleiermacher.

**RELI 8342 - The Prophets**

*Credits: 3*

Intensive study of selected texts and issues in the prophetic literature of the Old Testament. The specific texts or topics will be chosen in consultation with the students enrolled. A knowledge of biblical Hebrew is presupposed.

**RELI 8350 - Seminar on the New Testament**

*Credits: 3*

A topical study of one or more literary, historical, or theological issues pertinent to the interpretation of the New Testament. A knowledge of Hellenistic Greek is presupposed. The specific topic(s) will be determined in consultation with the students enrolled.

**RELI 8351 - Seminar on the New Testament**

*Credits: 3*

A topical study of one or more literary, historical, or theological issues pertinent to the interpretation of the New Testament. A knowledge of Hellenistic Greek is presupposed. The specific topic(s) will be determined in consultation with the students enrolled.

**RELI 8352 - New Testament Gospels**

*Credits: 3*

Intensive study of selected texts and issues in the New Testament Gospels. The specific texts or topics will be chosen in consultation with the students enrolled. A knowledge of New Testament Greek is presupposed.

**RELI 8353 - New Testament Gospels**

*Credits: 3*

Intensive study of selected texts and issues in the New Testament Gospels. The specific texts or topics will be chosen in consultation with the students enrolled. A knowledge of New Testament Greek is presupposed.

**RELI 8354 - Pauline Epistles**

*Credits: 3*

Intensive study of selected texts and issues in the Pauline Epistles. The specific texts or topics will be chosen in consultation with the students enrolled. A knowledge of New Testament Greek is presupposed.

**RELI 8355 - Pauline Epistles**

*Credits: 3*

Intensive study of selected texts and issues in the Pauline Epistles. The specific texts or topics will be chosen in consultation with the students enrolled. A knowledge of New Testament Greek is presupposed.

**RELI 8356 - Advanced Study of New Testament Writings**

*Credits: 3*

Intensive study of selected texts and issues in such writings as the Catholic Epistles, Hebrews, and the Apocalypse. The specific texts or topics will be chosen in consultation with the students enrolled. A knowledge of New Testament Greek is presupposed.

**RELI 8357 - Advanced Study of New Testament Writings**

*Credits: 3*

Intensive study of selected texts and issues in such writings as the Catholic Epistles, Hebrews, and the Apocalypse. The specific texts or topics will be chosen in consultation with the students enrolled. A knowledge of New Testament Greek is presupposed.

# Statistical Science

www.smu.edu/statistics

**Professor Daniel Heitjan, Department Chair**

**Professors:** Ronald Butler, Daniel Heitjan, Hon Keung Ng, Lynne Stokes, Sherry Wang

**Associate Professors:** Jing Cao, Ian Harris, Monnie McGee

**Assistant Professors:** Chul Moon, Raanju Sundararajan

**Professor of Practice:** Charles South

**Senior Lecturer:** Stephen Robertson

**Lecturers:** Mahesh Fernando

## General Information

The Department of Statistical Science offers the following graduate degree programs: the Ph.D. in statistical science, the Ph.D. in biostatistics and the M.S. in applied statistics and data analytics.

The courses in the Ph.D. curriculum provide students with strong theoretical foundation in mathematical statistics, statistical computing, and probability, as well as foundations in areas that may be applied in statistical practice. The Ph.D. in biostatistics is conferred by the Department of Statistical Science at SMU in partnership with faculty in the Department of Clinical Sciences at the University of Texas Southwestern Medical Center at Dallas. Students attain a strong mathematical and statistical foundation such as that provided in the Ph.D. in statistical science curriculum, but they will also take courses and become involved in research projects that prepare them for a research career in biostatistics.

The M.S. in applied statistics and data analytics degree program is designed to provide students with a theoretically based understanding and proficiency in statistical methods, as well as training in statistical computing, database management, predictive methods, and other data science techniques.

**Note:** In both Ph.D. programs, a student will advance to candidacy after he or she passes comprehensive and qualifying exams, prepares a written prospectus, gives an oral presentation in a research area on which the dissertation will be based, and receives approval of the prospectus from his or her dissertation committee.

## Biostatistics, Ph.D.

### Admission Requirements

The requirements for admission to the Ph.D. program in biostatistics are the same as those for the Ph.D. in statistical science. Some background in biology or medicine is preferred but is not a requirement for admission.

### Degree Requirements

The degree requirements and required curriculum for the Ph.D. in biostatistics are similar to those for statistical science, except that biostatistics students are not required to take STAT 6371 (Probability Theory), but are required to take the following additional courses:

- STAT 6358 - Topics in Biostatistics (Statistical Methods for Genomic/Genetic Data Analysis); or another similar course selected in consultation with the graduate adviser
- STAT 6360 - Statistical Methods in Epidemiology
- STAT 6397 - Statistical Methods in Clinical Trials
- STAT 7331 - Modeling Longitudinal and Incomplete Data

## Additional Requirements

Students complete their coursework in two to three years (four courses per term in the first year, three or four courses per term in the second year, and the final two years consisting primarily of research). In addition, as with the Ph.D. in statistical science, the student must:

### Comprehensive Exams

Pass the Comprehensive (Basic) Exams, typically at the end of the first year.

### Ph.D. Qualifying Exam

Pass the Ph.D. Qualifying Exam, typically taken at the end of the second year, which assesses the student's readiness for research.

### Dissertation

Write and make a successful defense of the dissertation.

## Statistical Science, Ph.D.

### Admission Requirements

Applicants to the Ph.D. program in statistical science must hold a bachelor's degree and must have taken mathematics courses through advanced calculus and linear algebra. Applicants must have taken the GRE graduate school admission test and have excellent English communication skills. International students applying from countries where English is not the native language are required to provide scores on the TOEFL English language proficiency test.

### Degree Requirements

To qualify for the Ph.D. degree in statistical science, the student must:

### Curricular Requirements

Satisfy all curricular requirements as specified by the University (at least 48 credit hours, no more than 12 of which can be in dissertation research) and by the departmental faculty.

### Required Courses (27 Credit Hours)

Complete the following courses:

- STAT 6324 - Computational Statistics
- STAT 6327 - Mathematical Statistics
- STAT 6328 - Mathematical Statistics
- STAT 6336 - Statistical Analysis
- STAT 6337 - Statistical Analysis
- STAT 6345 - Linear Regression
- STAT 6366 - Statistical Consulting
- STAT 6371 - Probability Theory
- STAT 7327 - Advanced Statistical Inference

### Elective Courses

Several elective courses are offered each semester. Students will complete the remaining required credit hours from among those courses, or from approved courses offered in other departments at the University. Examples of frequently offered electives include courses under the following topics:

### Time Series:

- STAT 6363 - Time Series Analysis
- STAT 7363 - Time Series Analysis II

### Categorical Data Analysis:

- STAT 6377 - Multivariate Categorical Data

### Sampling:

- STAT 6380 - Mathematical Theory of Sampling

### Bayesian Statistics:

- STAT 6390 - Bayesian Statistics
- STAT 6391 - Bayesian Hierarchical Modeling

### Stochastic Processes:

- STAT 6370 - Stochastic Models
- STAT 6376 - Stochastic Process

### Nonparametric Statistics:

- STAT 6385 - Survey of Nonparametric Statistics

### Epidemiology and Clinical Trials:

- STAT 6360 - Statistical Methods in Epidemiology
- STAT 6397 - Statistical Methods in Clinical Trials

## Comprehensive Exams

Pass the Comprehensive (Basic) Exams, typically at the end of the first year.

## Ph.D. Qualifying Exam

Pass the Ph.D. qualifying exam, which assesses the student's readiness for research. The format of the exam is a research paper.

## Graduate Academic Work

Complete a minimum of three years of graduate academic work, at least one of which is in full-time residence on the campus of SMU or at a research facility approved by the departmental faculty and the dean of research and graduate studies.

## Dissertation

Write and make a successful defense of the dissertation.

# Applied Statistics and Data Analytics, M.S.

## Admission Requirements

Applicants to the M.S. in applied statistics and data analytics degree program (also known as "MASDA") must hold a bachelor's degree, must have taken a course in statistics and must have taken calculus courses through multivariate calculus. Applicants must have taken the GRE graduate school admission test and have excellent English

communication skills. International students applying from countries where English is not the native language are required to provide scores on the TOEFL English language proficiency test.

## Degree Requirements

To qualify for the M.S. in applied statistics and data analytics, the student must successfully complete at least 36 credit hours acceptable to the departmental faculty, distributed as follows. At least 18 credit hours must be at the 6000-level or above.

### Required Courses (21 Credit Hours)

- STAT 6301 - Experimental Statistics I
- STAT 6302 - Experimental Statistics II
- STAT 6307 - Introduction to Statistical Computing
- STAT 6308 - SAS II and Databases
- STAT 6311 - Introduction to Mathematical Statistics
- STAT 6312 - Mathematical Statistics II
- STAT 6324 - Computational Statistics

### Elective Courses (12 Credit Hours)

Four courses from the following, chosen in consultation with the graduate adviser:

- STAT 6306 - Introduction to Data Science
- STAT 6315 - Survey Sampling
- STAT 6316 - Data Mining Techniques for Economists
- STAT 6350 - Analysis of Lifetime Data
- STAT 6360 - Statistical Methods in Epidemiology
- STAT 6363 - Time Series Analysis
- STAT 6367 - Statistical Consulting
- STAT 6385 - Survey of Nonparametric Statistics
- STAT 6395 - Selected Topics in Statistics
- CS 7320 - Artificial Intelligence
- CS 7324 - Machine Learning in Python
- CS 7331 - Data Mining
- ECO 6352 - Applied Econometric Analysis
- ECO 6380 - Predictive Analytics for Economists
- ECO 6391 - Financial Econometrics: Theory and Applications
- EDU 6382 - Everyday Mathematics: Probability and Data Analysis
- ECE 8364 - Statistical Pattern Recognition
- EMIS 7331 - Data Mining

### Major Consulting Project (3 Credit Hours)

The student must complete one or more major consulting projects under the supervision of departmental faculty members. For at least one of these projects, written and oral presentations of the findings are required.

- STAT 6366 - Statistical Consulting

**Total: 36 Credit Hours**

## Statistical Science, M.S.

The M.S. degree in statistical science is only available to students enrolled in the Ph.D. program in statistical science at SMU. Note that this is different from the M.S. in applied statistics and data analytics.

### Degree Requirements

To obtain the M.S. in statistical science en route to the Ph.D., the student must successfully complete at least 36 credit hours of graduate coursework acceptable to the departmental faculty, including:

- STAT 6324 - Computational Statistics
- STAT 6327 - Mathematical Statistics
- STAT 6328 - Mathematical Statistics
- STAT 6336 - Statistical Analysis
- STAT 6337 - Statistical Analysis
- STAT 6345 - Linear Regression

### Additional Requirements

Students must pass the Comprehensive (Basic) Exams at an appropriate level.

## Statistical Science Courses

### STAT 5110 - Independent Study in Statistical Science

*Credits: 1*

Independent study of a selected topic in statistical science. Individual study under direction of a faculty member allowed for STAT 5110; group projects allowed for STAT 5310.

### STAT 5310 - Independent Study in Statistical Science

*Credits: 3*

Independent study of a selected topic in statistical science. Individual study under direction of a faculty member allowed for STAT 5110; group projects allowed for STAT 5310.

### STAT 6049 - Graduate Full-Time Status

*Credits: 0*

Enrollment in this course certifies that the student is a full-time graduate student in good academic standing.

### STAT 6301 - Experimental Statistics I

*Credits: 3*

Noncalculus development of fundamental statistical techniques, including hypothesis testing for population means and proportions, analysis of variance, factorial designs, and linear regression. Covers obtaining sample sizes during the planning stages of research studies and emphasizes interpretation of results from analysis with SAS statistical software. Corequisite: STAT 6307. Senior UG and MASDA students only.

### STAT 6302 - Experimental Statistics II

*Credits: 3*

Extension of techniques in STAT 6301 to multivariate data. Multiple linear regression, multivariate analysis of variance, canonical regression, and principal components analysis. Emphasizes interpretation of results from analysis with SAS. Prerequisites: STAT 6301, STAT 6307. Senior UG and MASDA students only.

### STAT 6306 - Introduction to Data Science

*Credits: 3*

An introduction to methods, concepts, and current practice in the growing field of data science, including statistical

inference, algorithms, financial modeling, data visualization, social networks, and data engineering. Prerequisite: Enrollment in the applied statistics and data analytics program or the data science program, or permission of instructor.

### **STAT 6307 - Introduction to Statistical Computing**

*Credits: 3*

Introduces statistical computing, with an emphasis on SAS programming. Students learn how to read, write, and import data; prepare data for analysis; use SAS procedures; and create graphs. Prerequisites: STAT 2331. Senior UG and MASDA students only.

### **STAT 6308 - SAS II and Databases**

*Credits: 3*

Covers topics in data management and statistical analysis techniques, including data cleaning and verification; reading, writing, and manipulating data using DDE and SQL techniques; programming macros; combining, interleaving, stacking, and transposing data sets; customizing output using ODS; and advanced data analysis techniques. Prerequisite: STAT 5304 or permission of instructor.

### **STAT 6311 - Introduction to Mathematical Statistics**

*Credits: 3*

Topics include: probability; probability distributions; mathematical expectation; discrete and continuous random variables and their distributions; sampling distributions; moment generating function; functions of random variables; confidence intervals. Prerequisite: MATH 3302.

### **STAT 6312 - Mathematical Statistics II**

*Credits: 3*

Second course in mathematical statistics. Topics include order statistics, limiting distributions, central limit theorem, point estimation, testing statistical hypotheses, Bayesian procedures, and nonparametric methods. Prerequisites: STAT 6311, MASDA students and undergraduate seniors only.

### **STAT 6315 - Survey Sampling**

*Credits: 3*

Covers principles of planning and conducting surveys: simple random sampling; stratified and systematic subsampling; means, variances, and confidence limits; finite population correction; sampling from binomial populations; and margin of error and sample-size determination. Prerequisite: Graduate standing or permission of department.

### **STAT 6316 - Data Mining Techniques for Economists**

*Credits: 3*

A study of data mining techniques used by economists in the fields of applied economics, marketing, finance, and statistics. These techniques include classification methods (logistic models, classification trees, neural networks), affinity analysis (association rules), and data reduction and exploration methods (principal components and k-means clustering). Prerequisites: ECO 5350, ITOM 2305, and one of the following: STAT 2331 or STAT 4340; or permission of the department.

### **STAT 6324 - Computational Statistics**

*Credits: 3*

Introduces computational methods in statistics with emphasis on the use of statistical software packages, statistical simulation, numerical methods, and related topics. Topics include introduction to R and other statistical software for statistical analysis and graphics; generating random deviates from various distributions; and the use of Monte Carlo methods for solving optimization problems. Prerequisite: STAT 5373 or STAT 6327 or concurrent enrollment in these courses. STAT MASDA or STAT Ph.D. students only.

### **STAT 6327 - Mathematical Statistics**

*Credits: 3*

Theory of probability distributions. Random variables and functions of random variables. Multivariate and conditional distributions. Sampling distributions; order statistics. Expected value, transformations, and approximations.

Prerequisite: Advanced calculus or permission of instructor.

### **STAT 6328 - Mathematical Statistics**

*Credits: 3*

Sufficiency and completeness. Unbiased, maximum likelihood and Bayes point estimators, minimizing risk.

Confidence sets. Most powerful, uniformly MP and likelihood ratio tests. Large-sample approximations; contingency table analysis. Prerequisite: STAT 6327.

### **STAT 6336 - Statistical Analysis**

*Credits: 3*

Emphasis on application of statistical principles in the design of experiments. Complete and fractional factorials, blocking, nesting, replication, randomization. Analysis of data from one and two samples assuming normal distributions and independent errors. Discussion of paired sample analyses and of nonparametric location tests.

### **STAT 6337 - Statistical Analysis**

*Credits: 3*

Analysis of data from classical multifactor experimental designs with fixed and random effects. Multiple comparisons and contrasts of main effects and interactions. Introduction to regression analysis. Prerequisite: STAT 6336.

### **STAT 6345 - Linear Regression**

*Credits: 3*

The classical tools of linear regression based upon least squares estimation and inference through the assumption of normally distributed errors. Topics in model formulation, data transformations, variable selection, and regression diagnostics for influential observations. Collinear predictors and biased estimation. Survey of alternatives to least squares. Prerequisite: STAT 6337.

### **STAT 6346 - Advanced Regression Analysis**

*Credits: 3*

Alternatives to least squares estimation. Theory and applications of generalized linear models. Estimation, asymptotic distribution theory, and tests for model parameters. Techniques for detecting influential observations, collinearities, measurement error modeling. Prerequisite: STAT 6345 or permission of instructor.

### **STAT 6347 - Spline Approximation in Statistics**

*Credits: 3*

### **STAT 6350 - Analysis of Lifetime Data**

*Credits: 3*

Statistical theory and methodology for the analysis of lifetime data from complete and censored samples. Statistical lifetime distributions, types of censoring, graphical techniques, nonparametric and parametric estimation, and lifetime regression models. Prerequisites: STAT 6324, STAT 6327, STAT 6328, STAT 6336, STAT 6337, or equivalent.

### **STAT 6355 - Applied Multivariate Analysis**

*Credits: 3*

Statistical methods of analysis of multivariate data, tests, and estimation of multivariate normal parameters; Hotelling's  $T^2$ , discriminant analysis, canonical correlation, principal components, and factor analysis. Emphasizes applications.

Prerequisite: STAT 6337.

### **STAT 6358 - Topics in Biostatistics**

*Credits: 3*

Introduction to various statistical methods that are widely used in the biosciences, especially biomedical research. Subject matter includes survival analysis, contingency tables, logistic regression, analysis of longitudinal data, design of clinical experiments, epidemiology, and statistical genetics; topics may vary with instructor. Prerequisite: STAT 6328 or permission of instructor.

### **STAT 6360 - Statistical Methods in Epidemiology**

*Credits: 3*

Introduces epidemiologic principles and statistical methods used in biomedical research. Topics involve the design, analysis, and interpretation of biomedical study results. Prerequisites: STAT 5371, STAT 5372, STAT 5373, STAT 5374, and STAT 5304 (or equivalent) or consent of instructor.

### **STAT 6363 - Time Series Analysis**

*Credits: 3*

Statistical methods of analyzing time series. Autocorrelation function and spectrum. Autoregressive and moving average processes. More general models, forecasting, stochastic model building. Prerequisite: Permission of instructor.

### **STAT 6366 - Statistical Consulting**

*Credits: 3*

Instruction in nonstatistical issues arising in a consulting experience, including interpersonal interaction, session management, scheduling, data management, and oral and written communication. Examines technical methods useful for common consulting questions and provides consulting experience with a client from the community.

### **STAT 6367 - Statistical Consulting**

*Credits: 3*

The practice and art of statistical consulting in a collaborative environment.

### **STAT 6370 - Stochastic Models**

*Credits: 3*

Model building with stochastic processes in applied sciences. Phenomena with uncertain outcomes are formulated as stochastic models and their properties are analyzed. Some specific problems discussed come from areas such as population growth, queueing, reliability, time series, and social and behavioral processes. Statistical properties of the models are emphasized. Prerequisites: STAT 4340 or STAT 4341, and graduate standing.

### **STAT 6371 - Probability Theory**

*Credits: 3*

An introduction to measure theoretic probability. Random variables, expectation, conditional expectation, characteristic functions. Prerequisite: STAT 6327 or permission of instructor.

### **STAT 6372 - Queueing Theory**

*Credits: 3*

Queueing theory provides the theoretical basis for the analysis of stochastic service systems. The underlying stochastic processes are point processes of which Markov and renewal processes are two major examples. The course emphasizes the formulation of queueing models and their behavioral and statistical analyses using Markov and renewal techniques. Prerequisite: An introductory course in stochastic processes (e.g., STAT 6370/CS 6370, STAT 6376, STAT 6379, ECE 5306).

### **STAT 6376 - Stochastic Process**

*Credits: 3*

Random walk, Markov processes, Poisson processes, waiting times, spectral density functions, applications to random noise problems. Prerequisite: STAT 6327.

### **STAT 6377 - Multivariate Categorical Data**

*Credits: 3*

Structural models for counting data. Introduces the general log-linear model for contingency tables, likelihood-ratio tests, hierarchical models, and partitioning of likelihood-ratio statistics. Prerequisites: STAT 6328, STAT 6337 or permission of instructor.

### **STAT 6380 - Mathematical Theory of Sampling**

*Credits: 3*

Theoretical basis for estimation from simple random stratified, cluster, and two-stage designs. Also, ratio and regression estimators and nonsampling errors, including nonresponse. Prerequisite: STAT 6328.

### **STAT 6385 - Survey of Nonparametric Statistics**

*Credits: 3*

Topics include robust and distribution-free techniques; order statistics, EDF statistics, quantiles, asymptotic distributions and tolerance intervals; linear rank statistics for one-, two-, and several-sample problems involving location and scale; runs; multiple comparison; rank correlation; and asymptotic relative efficiency. Prerequisite: STAT 6328.

### **STAT 6390 - Bayesian Statistics**

*Credits: 3*

The decision theory and Bayesian approaches to statistics. Includes decision rules, admissibility, complete classes, Bayes and minimax rule, likelihood principle, empirical Bayes rules, and personal probability. Prerequisite: STAT 6328.

### **STAT 6391 - Bayesian Hierarchical Modeling**

*Credits: 3*

This course focuses on how to account for spatial, temporal, and other complex correlation structures and on how to incorporate prior information into a statistical analysis using modern computer software packages (i.e., WinBUGS and R). Prerequisite: STAT 6390.

### **STAT 6395 - Selected Topics in Statistics**

*Credits: 3*

Discussion of statistical theory and methodology on specialized topics of interest.

### **STAT 6397 - Statistical Methods in Clinical Trials**

*Credits: 3*

An introduction to clinical trials for the biostatistician. Covers issues in the design, analysis, and operation of clinical trials, emphasizing the underlying statistical basis of modeling and inference. Topics include both practical and theoretical considerations in trial design and analysis. Prerequisites: STAT 6327 and STAT 6328.

### **STAT 6398 - Thesis**

*Credits: 3*

Research on statistical theory and methodology.

**STAT 6399 - Thesis**

*Credits: 3*

Research on statistical theory and methodology.

**STAT 7011 - Supervised Internship**

*Credits: 0*

Supervised experience in statistical consulting carried out as an internship in approved work settings outside the SMU Statistical Consulting Center.

**STAT 7012 - Supervised Internship**

*Credits: 0*

Supervised experience in statistical consulting carried out as an internship in approved work settings outside the Center for Statistical Consulting.

**STAT 7013 - Supervised Internship**

*Credits: 0*

Supervised experience in statistical consulting carried out as an internship in approved work settings outside the SMU Statistical Consulting Center.

**STAT 7100 - Seminar**

*Credits: 1*

Oral presentations of statistical literature.

**STAT 7110 - Supervised Internship**

*Credits: 1*

Supervised experience in statistical consulting carried out as an internship in approved work settings outside the SMU Statistical Consulting Center. Reports from the internship are required for completion of the course.

**STAT 7111 - Seminar in Statistical Literature**

*Credits: 1*

Reports from papers in statistical journals, bibliographical problems, etc.

**STAT 7112 - Seminar in Statistical Literature**

*Credits: 1*

Reports from papers in statistical journals, bibliographical problems, etc.

**STAT 7300 - Seminar**

*Credits: 3*

Oral presentations of statistical literature.

**STAT 7327 - Advanced Statistical Inference**

*Credits: 3*

General statistical inference; estimation (point and interval estimates, Bayes and minimax, etc.); tests of hypotheses (invariant, unbiased, most stringent, etc.). Prerequisite: STAT 6371.

**STAT 7328 - Advanced Statistical Inference**

*Credits: 3*

Additional topics in statistical inference. Prerequisite: STAT 7327.

### **STAT 7331 - Modeling Longitudinal and Incomplete Data**

*Credits: 3*

An introduction to Statistical Modeling of longitudinal data and incomplete data, emphasizing statistical theory, methods, applications, and computation. Prerequisites: STAT 6327 and STAT 6328 or equivalent, and STAT 6336 and STAT 6337 or equivalent.

### **STAT 7362 - Topics in Statistics**

*Credits: 3*

Lectures and readings on state-of-the-art statistical issues using emerging statistical theory and methods.

### **STAT 7363 - Time Series Analysis II**

*Credits: 3*

For advanced graduate students who intend to do research in spectral analysis or who have a major interest in time series. Prerequisites: STAT 6363, STAT 6376, or permission of instructor.

### **STAT 8049 - Graduate Full-Time Status**

*Credits: 0*

Enrollment in this course certifies that the student is a full-time graduate student in good academic standing.

### **STAT 8105 - Research**

*Credits: 1*

### **STAT 8196 - Dissertation**

*Credits: 1*

Doctoral research on statistical theory and methodology.

### **STAT 8197 - Dissertation**

*Credits: 1*

Doctoral research on statistical theory and methodology.

### **STAT 8198 - Dissertation**

*Credits: 1*

Doctoral research on statistical theory and methodology.

### **STAT 8199 - Dissertation**

*Credits: 1*

Doctoral research on statistical theory and methodology.

### **STAT 8313 - Research in Statistical Inference**

*Credits: 3*

Research on statistical theory and methodology.

### **STAT 8396 - Dissertation**

*Credits: 3*

Doctoral research on statistical theory and methodology.

### **STAT 8397 - Dissertation**

*Credits: 3*

Doctoral research on statistical theory and methodology.

**STAT 8398 - Dissertation**

*Credits: 3*

Doctoral research on statistical theory and methodology.

**STAT 8399 - Dissertation**

*Credits: 3*

Doctoral research on statistical theory and methodology.

**STAT 8697 - Dissertation**

*Credits: 6*

Doctoral research on statistical theory and methodology.

**STAT 8698 - Dissertation**

*Credits: 6*

Doctoral research on statistical theory and methodology.

**STAT 8699 - Dissertation**

*Credits: 6*

Dissertation in the statistical sciences.

# Women's and Gender Studies

www.smu.edu/womgenstudies

Josephine Caldwell-Ryan, **Director**

## General Information

The graduate certificate offered by the Women's and Gender Studies Program is designed to integrate knowledge about women, gender and sexuality into the chosen field of study of SMU graduate students. Offered through the Women's and Gender Studies Program and jointly based in the Dedman College Graduate Program, the Perkins School of Theology and the Dedman School of Law, the certificate provides an additional credential for interested students who are seeking employment in fields where familiarity with scholarship on women, gender and/or sexuality may be an asset, or who are looking to enhance their graduate studies. The courses represent several disciplines, including anthropology, art history, history, literary studies, media studies, theology and law.

## Admission Requirements

The student must be pursuing an advanced degree in an SMU graduate program, and must enroll for the program through Dedman College (for Dedman and Meadows students), the Perkins School of Theology (for theology students) or the Dedman School of Law (for law students). An additional application fee is not required. Formal enrollment must include a proposed program plan for completion of the certificate developed with the director of Women's and Gender Studies Program or the appropriate adviser in Perkins School of Theology or Dedman School of Law.

## Women's and Gender Studies Graduate Certificate

### Academic Requirements

The graduate certificate in women's and gender studies requires 15 credit hours (five courses), distributed as follows:

#### Advanced Feminist Theory (3 Credit Hours)

**The advanced feminist theory course.** The course includes "classic" literature from feminist, womanist and *mujerista* perspectives and addresses current theoretical issues across several disciplines. Offered in the fall term of every even-numbered year, it is team-taught by faculty associated with Dedman College, the Perkins School of Theology and the Dedman School of Law.

- WGST 6300 - Advanced Feminist Theory  
or
- TC 8375 - Advanced Feminist Theory

#### Four Additional Courses (12 Credit Hours)

**Four additional courses relevant to the intent of the certificate.** Students typically take four courses in their area of graduate studies with content appropriate to the certificate as documented by the syllabus and subject to the director's approval. Examples of eligible courses include:

- ARHS 6358 - Gender and Sexuality in the Visual Arts
- CE 8338 - Emancipatory Educational Ministry with Adolescent Girls
- ENGL 6375 - Sex, Gender, and Literature
- FREN 4395 - French Women Writers and Society (*formerly FREN 5339 prior to Fall 2019*)
- HX 8328 - Women in the History of Christianity
- PC 8333 - Pastoral Care and Counseling of Women
- PC 8335 - Sexual and Domestic Violence: Theological and Pastoral Concerns
- SPAN 5336 - Spanish-American Novel (topic must be approved by director)
- ST 8375 - Feminist, Womanist, and Mujerista Theologies

- WO 8308 - Women and Worship
- XS 8345 - Issues in Faith, Feminism, and Public Policy

**Note:**

In the interest of the interdisciplinary foundation of women's studies, students may also take up to six credit hours (two courses) of upper-level (3000-level and above) Dedman College or Meadows undergraduate women's and gender studies courses from those pre-approved for such credit by the Women's and Gender Studies program. They may pursue that option under the following circumstances:

- The students arrange a separate syllabus and assignments in conjunction with the professor of record.
- The syllabus and assignments must be approved by the Graduate Certificate Committee of the Women's and Gender Studies Program.
- The students register for such courses using the appropriate graduate-level number (WGST 5310 for 3000-level courses and WGST 6310 for 4000-level courses). WGST 5310 can be taken only once.

**Additional Requirements**

Students must also complete a major research project or a supervised internship in a setting that addresses issues relevant to the intent of the program. This project should be included in the program plan (see the Admission Requirements section).

For Ph.D. students, the project normally involves an article-length research paper written for coursework; however, if relevant it could include a performance, internship, exhibit or other project approved by the appropriate adviser. Supervised internship settings for Perkins Master of Divinity students will require a learning goal for women's studies, and it shall be done in consultation with the Perkins Internship Office.

**Notes:**

- Students in Dedman School of Law and Perkins School of Theology are encouraged to petition the director of the Women's and Gender Studies Program for credit in their own departments for graduate courses, including independent studies courses, in which they engage in study appropriate to the intent of the certificate. Appropriate courses taken during matriculation at SMU, but prior to enrollment in the certificate program, may count toward program hours. Students in Dedman School of Law should consult the Law School's adviser for the program about appropriate courses.
- Courses at the 4000 level or below must be taken with the numbers WGST 5310 and WGST 6310, in accordance with the academic requirements stated above.

**Total: 15 Credit Hours**

**Women's and Gender Studies**

**WGST 5310 - Special Topics in Women's and Gender Studies I**

*Credits: 3*

Study of a theme, issue, or topic relevant to the study of women, gender, and/or sexuality. The syllabus and assignments must be approved by a committee consisting of the professor of record, the WGST director, and a faculty member who teaches courses in the WGST program. Prerequisite: Enrollment in the WGST Certificate Program.

**WGST 6109 - Independent Studies**

*Credits: 1*

Directed readings with instruction-based faculty guidance. Approval of director is required.

**WGST 6209 - Independent Studies**

*Credits: 2*

Directed readings with discussion-based faculty guidance. Approval of director is required.

**WGST 6300 - Advanced Feminist Theory**

*Credits: 3*

Explores feminist theories that seek to explain women's subordination historically and cross-culturally; examines gender as a principle of social organization; and addresses the linkages among gender, ethnicity, and class from the vantage of multiple disciplines.

**WGST 6309 - Independent Studies**

*Credits: 3*

Directed readings with discussion-based faculty guidance. Approval of director is required.

**WGST 6310 - Special Topics in Women's and Gender Studies II**

*Credits: 3*

Theme, issue, or topic relevant to the study of women, gender, and/or sexuality. The syllabus and assignments must be approved by a committee consisting of the professor of record, the WGST director, and one additional member of the WGST-affiliated faculty (that is, a faculty member who teaches courses in the WGST program). Prerequisite: Enrollment in the WGST certificate program.

# Dedman College of Humanities and Sciences: Tuition, Fees and Financial Aid

## Tuition, Fees and Living Expenses

The *Financial Information Bulletin* is issued each academic year. It provides the general authority and reference for SMU financial regulations and obligations, as well as detailed information concerning tuition, fees and living expenses.

Continuing students registering must ensure that payment for the full amount of charges is posted to their account by the payment due date showing on their bill. The due dates are also published on the Bursar website.

Billing notifications are sent to the student's SMU email address and to the designated authorized payer(s) email address when a bill is generated. The billing notification will provide instructions on how to view the bill online through SMU<sup>pay</sup>. If notification is not received two weeks prior to the due date, the student and/or designated authorized payer(s) should contact the Office of the University Bursar.

Payments made in person or mailed must be received by the Office of the University Bursar, located on the first floor of the Laura Lee Blanton Student Services Building, no later than 4 p.m. Central Time on the payment due date. Payments made online via electronic check or credit card must be posted no later than 11:59 p.m. Central Time on the payment due date. Students and/or those paying on behalf of students who pay online automatically receive an electronic confirmation of payment; students and/or designated authorized payer(s) paying through other methods can also verify receipt of payment online.

Students enrolling after the payment due date must pay at the time of enrollment. Students whose accounts are not cleared by the payment due date or at the time of enrollment are subject to a late payment fee of \$50 for balances between \$250 and \$999.99, and \$150 for balances between \$1,000 and \$5,000. Balances more than \$5,000 are charged 3 percent of the outstanding balance, not to exceed \$750. Also, after the monthly payment due date has passed, a 1.5 percent past due fee will be assessed on the unpaid student and/or miscellaneous account each month until the balance is paid. The enrollment of students whose accounts remain unpaid after the payment due date may be canceled at the discretion of the University. Students are individually responsible for their financial obligations to the University.

All refunds except federal Parent PLUS loans, prepayment accounts, the SMU Monthly TuitionPay Payment Plan and international wires will be made payable to the student. A credit card payment will only be refunded to the student if federal student loans have been applied to their account. International wires will be refunded by wire to the originating wire account less a \$35 wire-processing fee. The Parent PLUS loan borrower can request the refund to be processed to the student by submitting a Parent PLUS Release form, located on the Bursar website. If the refund is issued by check, the student may request, in writing, that the refund be sent to another party.

Any outstanding debts to the University will be deducted from the credit balance prior to issuing a refund. Any outstanding debts to the University that include Title IV funds must have an Authorization to Credit Account form and/or an Authorization to Credit Account Parent form on file in order to transfer funds to cover current award year debts. Students need to sign the ACA form and the federal parent PLUS loan borrower needs to sign the ACAP form.

Any outstanding debts to the University that do not include Title IV funds will be deducted from the credit balance prior to issuing a refund. All other debts should be paid directly by the student.

A student whose University account is overdue or who in any other manner has an unpaid financial obligation to the University will be denied the recording and certification services of the Office of the Registrar, including the issuance of a transcript or diploma, and may be denied readmission until all obligations are fulfilled. The Division of Enrollment Services may stop the registration, or may cancel the completed registration, of a student who has a delinquent account or debt, and may assess all attorney's fees and other reasonable collection costs (up to 50 percent) and charges necessary for the collection of any amount not paid when due. Matriculation in the University constitutes an agreement by the student to comply with all University rules, regulations and policies.

Applications for financial assistance should be submitted well in advance of registration in accordance with recommended filing dates set forth by the Division of Enrollment Services, Office of Financial Aid. Applications received after the recommended deadline can expect a delay in application processing time due to the increased volume. This will ultimately delay disbursement of financial aid to the student account. Students and families are expected to clear all billed charges by the published billing due dates regardless of the status of their financial aid application. Any funds that disburse to the student account after the payment due date has passed, will be applied to any outstanding charges first. Remaining financial aid funds will be refunded to the student.

During the registration process, students will be prompted to read and agree to the Student Rights and Responsibilities, which provides information regarding financial rights and obligations, SMU's Honor Code, the Code of Conduct, and the student appeals and complaints process.

Students who elect to register for courses outside of their school of record will pay the tuition rate of their school of record.

## **Tuition Refunds for Withdrawal from the University**

No refunds of tuition or fees will be considered without an official withdrawal. Policies for official withdrawal, including medical and mandatory administrative withdrawal, are found under Withdrawal From the University in the Academic Records and General and Enrollment Standards section of this catalog.

Reduction of tuition and fees is determined by the effective date of the withdrawal and is based on the schedule listed in the *Financial Information Bulletin* and the SMU Bursar website.

## **Financial aid implications of withdrawing from the University**

Federal regulations require schools to adjust financial aid when a student officially withdraws from the University before completing 60% of the term. Financial aid is reduced to a pro-rated amount based on the amount of time the student was enrolled in classes in that specific term, thus "earning" financial aid proportionate to the amount of time enrolled. The "unearned" portion of aid will be returned to the funding source. Students completing 60% or more of a term are considered to have earned 100% of their financial aid for that term. This federally mandated calculation is completely independent of university's refund policies for withdrawals and may require a reduction in financial aid even if there is no reduction in tuition charges. The end result could create a substantial student account balance after the withdrawal is processed. For this reason, students are strongly encouraged to contact their financial aid adviser, before initiating a withdrawal, to discuss the financial implications of withdrawing. For additional information on the University's tuition refund policies, see the SMU *Financial Information Bulletin* or the University Bursar's website.

Information on the implications of withdrawing on your financial aid can be found on the Office of Financial Aid website.

Medical withdrawals and mandatory administrative withdrawals allow a prorated refund of tuition and fees and must be initiated through the academic adviser or academic Dean's office.

## **Payment Plan Options**

### **SMU Monthly Payment Plan**

SMU offers several payment plan options to assist students and families. Refer to the Bursar's website for detailed payment plan information: [www.smu.edu/paymentplans](http://www.smu.edu/paymentplans).

Annual payment plans are available in 12-month and 10-month formats. Term payment plans are available in 6-month and 5-month formats. The summer payment plan is three months. Payment plan options are not available for short terms including JanTerm, MayTerm, August Term and Winter Term.

## **Graduate and Professional Student Aid**

University grants, scholarships, fellowships and assistantships are awarded in the school or department in which the graduate student will enroll. Schools and departments that offer master's or Ph.D. degrees offer a significant number of

tuition scholarships and teaching or research assistantships each year. For more information, students should contact the appropriate school or department.

Grants and loans for Texas residents, private and federal loans, and employment programs may be available by filing the Free Application for Federal Student Aid. The FAFSA may be completed online at [www.fafsa.gov](http://www.fafsa.gov). The SMU Title IV school code number is 003613.

More information is available online at [www.smu.edu/financialaid](http://www.smu.edu/financialaid).

# **Dedman College of Humanities and Sciences: Enrollment and Academic Records**

The standards herein are applicable to all students at the University and constitute the basic authority and reference for matters pertaining to University academic regulations and records management. Enrollment in the University is a declaration of acceptance of all University rules and regulations. A complete *University Policy Manual* is available at [www.smu.edu/policy](http://www.smu.edu/policy). Additional information regarding rules and regulations of the University can be found in this catalog. Undergraduate students must follow the University-wide requirements that are in effect for the academic year of matriculation to SMU. The applicable requirements of majors and minors are those in effect during the academic year of matriculation to SMU or those of a subsequent academic year. Students may not follow a catalog for an academic year in effect prior to their matriculation term. Students who are not enrolled for three or more years will return to SMU under the current catalog.

## **General Policies**

### **Confidentiality of Education Records**

The Family Educational Rights and Privacy Act of 1974 is a federal law that grants students the right to inspect, obtain copies of, challenge, and, to a degree, control the release of information contained in their education records. The act and regulations are very lengthy, and for that reason, SMU has issued its own FERPA-based guidelines that are available at the University Registrar's Office FERPA website [www.smu.edu/FERPA](http://www.smu.edu/FERPA). Policy 1.10 of the *University Policy Manual* also discusses this law.

In general, no personally identifiable information from a student's education record will be disclosed to any third party without written consent from the student. Several exceptions exist, including these selected examples: 1) information defined by SMU as directory information may be released unless the student requests through my.SMU Student Homepage that it be withheld, 2) information authorized by the student through my.SMU Student Homepage may be released to those individuals designated by the student and 3) information may be released to a parent or guardian if the student is declared financially dependent upon the parent or guardian as set forth in the Internal Revenue Code. Additional information is available at [www.smu.edu/FERPA](http://www.smu.edu/FERPA).

### **Student File Number**

The University assigns each student an eight-digit SMU identification number, which is used to verify each student's identity and is provided without additional charges. The student should furnish the SMU ID number on all forms when requested, as this number is the primary means the University has to verify the identity for each student's academic records and transactions related to the records.

### **Name Change**

A student who has a change in name must provide to the University Registrar's Office his or her Social Security card or the form issued by the Social Security Administration. A valid passport may also be used to complete a name change. Enrollment or records services for the student under a name different from the last enrollment cannot be accomplished without one of the above documents. All transcripts and diplomas are issued only under a person's legal name as recorded by the University Registrar's Office.

### **Preferred Name**

Students who wish to use a name other than their legal name can add a preferred name to their file in addition to their primary/legal name, or update a preferred name already on file, using the self service functions in the my.SMU Student Homepage. The University will make efforts to use the preferred name in communications and in the course of university business. However, there are situations that due to business practices, legal requirements or system limitations the use of a primary/legal name will be used.

SMU has many offices that keep records with student names and many data systems used for specific applications. In addition to updating their preferred name in my.SMU, students may need to notify some offices regarding their use of a preferred name.

A preferred name is a first, middle and/or last name that may be chosen to be used instead of legal first, middle and last name. There is no documentation required to create or change a preferred name. Students are advised that if they choose to use a preferred name, they should use it consistently and resist changing it frequently. Students also are advised that the use of a preferred last name can lead to confusion with employers and organizations in attempting to match official educational records with applications and it is recommended that students provide both their preferred and legal names on applications.

Here is a partial list of standard name usage:

Display name – my.SMU Student Homepage	Preferred name, if provided
Instructor Class Roster	Preferred name, if provided
Instructor Grade Roster	Preferred name, if provided
Canvas	Preferred name, if provided
Global Directory of email addresses	Preferred name, if provided
SMU online directory	Preferred name, if provided
SMU ID Card	Primary (legal) name -- under review
Financial Aid related forms and documents	Primary (legal) name
Official Academic Transcript	Primary (legal) name
Diploma	Primary (legal) name or derivative
Degree Verifications	Primary (legal) name
Housing / Residence Life	Preferred first name, Primary last name
SEVIS Reporting (international students)	Primary (legal) name

## **Email and Mailing Addresses, Telephone, and Emergency Contact**

Each student must provide the University Registrar's Office with both a home and local (mailing) address, both a home and local telephone number and contact information of a designated emergency contact using the self-service functions in the my.SMU Student Homepage. Students enrolling at SMU authorize the University to notify their emergency contacts in the event of a situation affecting their health, safety, or physical or mental well-being, and to provide these contacts with information related to the situation.

Students who enroll in an arranged section course will be asked to provide the University Registrar's Office with an off-campus study address. This is the physical location the student is living while enrolled in this course.

When a student applies for graduation and becomes a candidate they can provide a diploma address (address to which they would like their diploma mailed) to the University Registrar's Office.

International students are required to provide a residence address (physical street address where they are currently living) as their mailing (local) address. International students will be prevented from enrolling if a U.S. address is not provided.

Students are expected to keep current all their addresses and telephone numbers, including emergency contact details, through my.SMU, the University's Web-based self-service system. Students may be prevented from enrolling if their information is insufficient or outdated. Changes to parent information should be reported by contacting records@smu.edu, and the email should include the student's full name and SMU student ID number.

The University issues all students an email address. Students may have other email addresses, but the University-assigned email address is the official address for University electronic correspondence, including related communications with faculty members and academic units.

Official University correspondence may be sent to students' mailing addresses or SMU email addresses on file. It is the responsibility of students to keep all their addresses current and to regularly check communications sent to them since they are responsible for complying with requests, deadlines and other requirements sent to any of their mailing addresses on file or to their SMU email.

## Cell Phones

The University requests that students provide mobile/cell telephone numbers, as they are one means of communicating with students during an emergency. Mobile/cell telephone numbers may also be used by University officials conducting routine business. Students who do not have a mobile/cell telephone or do not wish to report the numbers should provide this information to the University through my.SMU Student Homepage. Students may be prevented from enrolling if their mobile/cell telephone numbers are not on file or if they have not declared "no cell" or "prefer not to report" in my.SMU.

## Ethnicity

SMU requires that a valid ethnic group category be on file for all students. SMU's policies and the Family Educational Rights and Privacy Act of 1974 protect the confidentiality and privacy of this information. A student's ethnic group category can be viewed in my.SMU, Student Homepage.

**U.S. Citizens or Permanent Residents.** Ethnicity is self-determined. Students of multiple ethnic backgrounds may select multiple ethnic group categories. If the ethnic group value is incorrect, the student should go to the University Registrar's Office in the Laura Lee Blanton Student Services Building and complete an Ethnic/Racial Category Update Form.

**International Students Living in the U.S. While Attending School.** Selecting an ethnic group category is not required unless the student becomes a U.S. citizen or permanent resident.

## Transcript Service

A transcript is an official document of the permanent academic record maintained by the University Registrar's Office. The permanent academic record includes all SMU courses attempted, all grades assigned, degrees received and a summary of transfer hours accepted. Official transcripts and certifications of student academic records are issued by the University Registrar's Office for all students. Copies of high school records and transfer transcripts from other schools must be requested from the institutions where the coursework was taken.

Transcripts are \$12.25 per copy. Additional copies in the same request mailed to the same address are \$3.50. Additional copies mailed to different addresses are \$12.25 a copy. PDF transcripts are \$16.00 per email address and are available only for students who attended after summer 1996.

**Note:** No incomplete or partial transcripts, including only certain courses or grades, are issued.

Transcripts cannot be released unless the student has satisfied all financial and other obligations to the University. Instructions for requesting a transcript to be mailed or picked up on campus are available at [www.smu.edu/registrar](http://www.smu.edu/registrar) ("Transcript Requests" link). A student may request his or her official transcript through the online my.SMU Student Homepage. Requests are processed through the National Student Clearinghouse. Telephone and email requests are not accepted. Students or their specified third party can pick up their transcripts at the University Registrar's Office, 101 Blanton Student Services Building.

Transcripts may be released to a third party as specified by the student on the Student's Consent for SMU to Release Information to Student's Specified Third Party form accessible at [www.smu.edu/LegalDisclosures/FERPA/Forms](http://www.smu.edu/LegalDisclosures/FERPA/Forms).

**Note:** Chapter 675, S.B. 302. Acts of the 61st Texas Legislature, 1969 Regular Session, provides as follows: *Section I.* No person may buy, sell, create, duplicate, alter, give or obtain; or attempt to buy, sell, create, duplicate, alter, give or obtain a diploma, certificate, academic record, certificate of enrollment or other instrument which purports to signify merit or achievement conferred by an institution of education in this state with the intent to use fraudulently such document or to allow the fraudulent use of such document. *Section II.* A person who violates this act or who aids

another in violating this act is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than \$1,000 and/or confinement in the county jail for a period not to exceed one year.

## **Veterans**

The University Registrar's Office certifies veterans each term for their benefits under federal programs, including the Yellow Ribbon Program. Most academic programs at SMU qualify for U.S. Department of Veterans Affairs benefits, making an SMU education accessible and affordable. Veterans are required to provide specific documents before they can be certified with the VA's Veterans Benefits Administration. Specific information regarding the certification process is available from the University Registrar's Office at [www.smu.edu/EnrollmentServices/Veterans](http://www.smu.edu/EnrollmentServices/Veterans).

The University complies with Title 38 United States Code Section 3679(e) which states that any individual who is entitled to educational assistance under chapter 31 (Vocational Rehabilitation and Employment) or chapter 33 (Post 9/11 GI Bill®) benefits will be permitted to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement (or "Statement of Benefits" obtained from the Department of Veterans Affairs' website – eBenefits, or a VAF 28-1905 form for chapter 31 authorization purposes) for said entitlement and ending on the earlier of the following dates: a) the date on which payment from VA is made to the institution; or b) 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility. SMU will not impose any penalties, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or require that a covered individual borrow additional funds to meet his/her financial obligation due to delayed disbursement funding from VA under chapter 31 or 33. However, if the anticipated funding from VA will not cover all tuition and fees, then the student is responsible for paying the difference immediately. Failure to do so may result in late or past due fees. Students who wish to be certified under chapter 31 or 33 must request in writing each semester that they wish to be certified and provide an updated statement of benefits. Additional documents are required to be submitted to the University upon initial request to be certified. See our website at [www.smu.edu/enrollmentservices/veterans](http://www.smu.edu/enrollmentservices/veterans).

## **Final Examinations**

Final course examinations shall be given in all courses where they are appropriate, must be administered as specified on the official examination schedule and shall not be administered during the last week of classes. Exceptions to the examination schedule may be made only upon written recommendation of the chair of the department sponsoring the course and with the concurrence of the dean of that school, who will allow exceptions only in accordance with guidelines from the Office of the Provost.

## **Complaint Procedures for Students With Disabilities**

The complaint procedures for students with disabilities are available in the Disability Accommodations and Success Strategies office, Loyd Center, Suite 202, and online at [www.smu.edu/Provost/ALEC/DASS](http://www.smu.edu/Provost/ALEC/DASS).

## **Credit Hour Loads**

The unit of measure for the valuation of courses is the credit hour. Based upon the federal definition of a credit hour, each credit hour requires one hour of direct faculty instruction and a minimum of two hours per week of preparation on the part of students for approximately 15 weeks a term. Most courses are valued for three credit hours, i.e., three contact hours per week and at least six hours of preparation. For three-credit-hour courses deployed via different course types, modes of delivery, or calendars, total number of direct contact hours should be equal to or greater than 45 hours with the total of out of class work total equal to or greater than 90 hours. Courses that deviate from this standard must provide documentation illustrating how the number of contact hours and/or work outside the course equate to this standard within the term in which the course is offered.

A full-time load in the fall and spring terms is 9 credit hours for a graduate student. For the summer term (all sessions in the summer term combined) a full-time load is 6 credit hours for a graduate student. On request a graduate student can be certified as full-time for the first or second session of the summer term at 3 credit hours. Individuals who enroll for fewer than these minimum hours are designated as part-time students.

A graduate student

- working on the completion of a thesis, dissertation or performance recital requirement on a full-time or part-time basis;
- enrolled in an internship or co-op program;
- enrolled as a third-year theatre major working on the completion of required production projects;
- or having an instructor appointment as part of a teaching fellowship, but not enrolled for the required number of hours;

may be certified as a full-time or part-time student if the student

- is enrolled officially for at least one course and
- is recognized by his or her director or academic dean or the dean of graduate studies as working on the completion of the thesis, dissertation or internship requirement on a full-time or part-time basis.

In other special situations, a student not enrolled for the required number of hours may be certified as a full-time or part-time student if the student is officially enrolled for at least one course and is recognized by the academic dean or director as a full-time or part-time student, and if such recognition is approved by the provost.

**Cautionary Note:** Federal financial aid agencies and some other agencies require a minimum number of hours of enrollment for full-time status and do not make exceptions for summer, internship, co-op or student-teaching enrollments. Students on financial aid should consult an adviser in the Financial Aid Office regarding minimum enrollment requirements for their situation.

Likewise, international students on an F-1 or J-1 visa should consult an adviser in the International Student & Scholar Services office regarding minimum enrollment requirements for their situation.

**Minimum and Maximum Course Loads.** Minimum and maximum course loads allowed are based on the school of record.

## Stop Enrollment/Administrative Withdrawal

Insufficient or improper information given by the student on any admission or enrollment form – or academic deficiencies, disciplinary actions and financial obligations to the University – can constitute cause for the student to be determined ineligible to enroll or to be administratively withdrawn.

## Transfer Courses From Other Institutions

Policies for transfer credit are found under Transfer of Credits in the Degree Requirements section of this catalog.

## Enrollment Policies

### Course Scheduling and Enrollment Cycles

When students enter their school of record and into a specific degree program, they are assigned an academic adviser. Students should consult with the adviser for course scheduling, schedule changes, petitions, degree requirements and other such academic concerns. The Office of Research and Graduate Studies, located in Perkins Administration Building, Suite 101, monitors progress for all graduate students in Dedman College. Upon admission to the school and prior to their final term, students should check the Graduate Catalog and the Graduate Studies website ([www.smu.edu/graduate](http://www.smu.edu/graduate)), as well as schedule conferences with their academic advisers, to ensure that they are meeting all University and graduation requirements.

Each fall, spring and summer term has an enrollment period during which the formal process of enrollment in the University is completed. Prior to each enrollment period, the University Registrar's Office will publish enrollment instructions.

Each student is personally responsible for complying with enrollment procedures and for ensuring the accuracy of his or her enrollment. Students are expected to confirm the accuracy of their enrollment each term. Students who discover a discrepancy in their enrollment records after the close of enrollment for the term should immediately complete a Petition for Enrollment Policy Exception. Petitions are to be submitted to the Office of Research and Graduate Studies

(Perkins Administration Building, Suite 101) within six months of the term in which the discrepancy appeared; contact information for submitting a Petition for Enrollment Policy Exception can be viewed on the University Registrar's Office website at [www.smu.edu/EnrollmentServices/Registrar/Enrollment/EnrollmentPolicyException](http://www.smu.edu/EnrollmentServices/Registrar/Enrollment/EnrollmentPolicyException). Petitions submitted later than six months after the discrepancy may not be considered.

## **Undergraduates Enrolling for Graduate Courses**

### **Accelerated Pathway Programs**

The Accelerated Pathway Programs policy applies to undergraduate students who enroll in one of SMU's Accelerated Pathway Programs. Institutional aid may be eligible for covering tuition costs associated with graduate courses as described below.

Students may not enroll for any graduate level course work to be applied toward their master's degree, prior to the accumulation of 90 credit hours toward their baccalaureate degree. Students must apply and be admitted as a graduate student at least one fall or spring term prior to receiving their master's degree having had their baccalaureate degree conferred prior to that term. Students must enroll and be in good standing as a full-time status graduate student for at least one fall or spring term prior to receiving their master's degree.

Graduate hours earned as an undergraduate are included in the determination of full-time status for the term. Graduate hours and grades earned as an undergraduate that count towards their baccalaureate degree are included in the undergraduate scholastic totals and the graduate scholastic totals. Graduate hours and grades earned as an undergraduate that do not count towards that baccalaureate degree are excluded from the undergraduate scholastic totals but are included in the graduate scholastic totals. The maximum number of graduate hours (up to 30 hours) that may be taken in the final year of the baccalaureate degree is mandated by SMU's accrediting agency. The number of graduate hours which may be counted toward the baccalaureate degree is determined by the school to which the master's degree belongs. An undergraduate is limited to earning a maximum of 30 graduate hours as an undergraduate student after the completion of 90 credit hours towards their baccalaureate degree. A student must earn a minimum 150 combined hours to be conferred both a baccalaureate and master's degree.

Students considering an Accelerated Pathway Program should consult with the Office of Financial Aid about its effect on federal, state and institutional aid.

### **Other Graduate Course Enrollment by Undergraduate Students**

In addition to the Accelerated Pathway Programs, with the written permission of their academic dean and permission of the dean of the graduate courses, an excelling undergraduate student may enroll for graduate level coursework that will be part of their undergraduate record, count towards the undergraduate degree and be included in the undergraduate scholastic totals. The undergraduate student must have accumulated 90 credit hours toward their baccalaureate degree. Graduate hours enrolled as an undergraduate are included in the determination of full-time status for the term. An undergraduate is limited to earning a maximum of 30 graduate hours as part of their undergraduate record.

## **Schedule Changes**

The deadline for adding courses, dropping courses without grade record and changing sections for each enrollment period is listed on the Official University Calendar ([www.smu.edu/registrar](http://www.smu.edu/registrar)). Students are encouraged to seek assistance from their advisers when considering whether to add or drop a course. A student may drop a course with a grade of W (Withdraw) through approximately midterm by using the my.SMU Student Homepage. The specific deadline is listed on the Official University Calendar.

After the deadline date on the Official University Calendar, the student may not drop a class. All schedule changes must be processed by the deadline date specified on the Official University Calendar. **Note:** Schedule changes are not complete for official University record purposes unless finalized in the University Registrar's Office.

**Student-Athletes.** Students must consult with the Athletic Compliance Office prior to dropping a course. In the consultation, the student will review the effects the drop might have on his or her athletic participation and financial aid. After the consultation, the Athletic Compliance Office will update my.SMU to allow the student to process the drop, if necessary. The consultation is advisory; students are responsible for their enrollment. For assistance regarding

scholarships or other aspects of being a student-athlete, students should contact the Office of the Assistant Athletic Director for Student-Athlete Development.

**International Students.** Students must consult with the International Student & Scholar Services Office prior to dropping a course. (Contact [iss@smu.edu](mailto:iss@smu.edu) for consultation.) If dropping a course will cause the student to be enrolled in fewer than the required number of hours to remain a full-time student, the student's immigration status could be affected. After the consultation, the International Student & Scholar Services Office will update my.SMU to allow the student to process the drop, if necessary. The consultation is advisory; students are responsible for their enrollment.

**Students on Merit or Need-based Financial Aid.** Students should consult with their financial aid adviser prior to dropping a course. (See [www.smu.edu/EnrollmentServices/FinancialAid](http://www.smu.edu/EnrollmentServices/FinancialAid) for information regarding your financial aid counselor.) If dropping a course will cause the student to be enrolled in fewer than the required number of hours to remain a full-time student, the student's financial aid status may be affected. After the consultation, the student may drop a course through my.SMU Student Homepage. The consultation is advisory; students are responsible for their enrollment. Questions regarding this procedure or financial aid should be directed to the Office of Financial Aid.

## Withdrawal From the University

Policies on refunds for withdrawal from the University are found in the Financial Information section and in the *Financial Information Bulletin*. No refunds are made without an official withdrawal.

Students should be aware of the difference between a *drop* and a *withdrawal* and remember that they have different deadlines and separate financial policies. The deadlines for each are posted each term on the Official University Calendar at [www.smu.edu/registrar](http://www.smu.edu/registrar). A *drop* occurs when a student removes one or more courses from his or her schedule and remains enrolled in at least one credit hour for the term. A *withdrawal* occurs when removing the course or courses will result in the student being enrolled in **zero** hours for the term.

If a student removes all courses from his or her schedule **prior to the first day of the term**, the transaction is considered a *cancellation* and does not result in financial penalty or impact the student's transcript.

A student who wishes to withdraw (resign) from the University before the end of a term or session must initiate a Student Petition for Withdrawal form and secure approval from his/her school's records office. The records office will then submit the form to the Office of the University Registrar. The effective date of the withdrawal is the date on which the Student Petition for Withdrawal is processed in the University Registrar's Office. Discontinuance of class attendance or notification to the instructors of intention to withdraw does not constitute an official withdrawal.

The enrollment of students who withdraw on or before the tenth class day of the fall or spring semester as listed on the Official University Calendar will be canceled. Courses and grades are not recorded for canceled enrollments; however, the student will owe a portion of his/her tuition and fees. Additional information is available in the Financial Information Bulletin. A student who withdraws after the tenth class day of the fall or spring semester will receive the grade of *W* in each course in which he or she enrolled.

Medical withdrawals allow a prorated refund of tuition and fees and have conditions that must be met prior to re-enrollment at SMU. Medical withdrawals can only be authorized by professionals in the Dr. Bob Smith Health Center, Dean of Student Life, or Vice President for Student Affairs. The last day for a medical withdrawal is the last day of class instruction for the term from which the student is withdrawing. Retroactive medical withdrawals cannot be granted.

Mandatory administrative withdrawals occur when a student is not suspended but current and/or future enrollments are canceled or withdrawn. A student's academic record is annotated with "mandatory administrative withdrawal" and the effective dates for this withdrawal. Mandatory administrative withdrawals allow a prorated refund of tuition and fees and have conditions that must be met prior to re-enrollment at SMU. Mandatory administrative withdrawals can be authorized only by the Provost and Vice President for Academic Affairs, Vice President for Student Affairs or Dean of Student Life.

Withdrawing students living in SMU housing must check out of the residence halls with the Department of Residence Life and Student Housing per established procedures.

## **Audit Enrollment (Course Visitor)**

Individuals desiring to audit (visit) a class, including those concurrently enrolled for regular coursework, are required to process an Audit Permit form. Audit Permit forms must be completed, approved and received in the University Registrar's Office no later than the last day to enroll for the term. Forms are available at [www.smu.edu/EnrollmentServices/Registrar/FormsLibrary](http://www.smu.edu/EnrollmentServices/Registrar/FormsLibrary). Space must be available in the class. The following regulations are applicable:

1. Classroom recitation and participation are restricted; availability of course handouts, tests and other materials is restricted; no grade is assigned and no credit is recorded; no laboratory privileges are included.
2. The individual's name does not appear on class rosters or grade rosters.
3. Regular admission and enrollment procedures are not conducted for auditors.
4. The audit fee is nonrefundable.
5. If credit is desired, the course must be enrolled for and repeated as a regular course, and the regular tuition must be paid.

## **No-Credit Enrollment**

Enrollment for no credit is accomplished in the conventional manner of enrollment, with regular admission and enrollment procedures being required. The student pays the regular tuition and fees, participates in class activities, and receives the grade of NC upon completion of the coursework. The student must indicate in writing no later than the 12th day of classes (the fourth day of classes in summer sessions; the second day of classes in intersession terms) that he or she wishes to take a course for no credit. Permission of the instructor or department is required for this type of enrollment, and the student is listed on class rolls. This enrollment is different from audit enrollments, for which no enrollment or grade is recorded.

## **Class Attendance**

Regular class attendance is required. At the beginning of the course, the instructor announces policies regarding the effect of class attendance and tardiness on the student's standing in the course via the course syllabus. These policies may include dropping a student from the course for nonattendance or tardiness as described below.

All reasons for absence or tardiness should be submitted at once to the instructor.

The satisfactory explanation of absence may release a student from disciplinary action but does not relieve a student from responsibility for the work of the course during his or her absence. A student who misses an announced test, examination or laboratory period in a regular course of study and has the permission of the instructor may be given an opportunity to make up the work at the instructor's convenience. The instructor determines in all instances the extent to which absences and tardiness affect each student's grade.

Students who miss two successive class meetings during the official add-drop period at the beginning of each term are subject to being dropped from the course. To avoid this possibility, students should contact the instructor or the department immediately following such a series of absences.

Students may be dropped by a course instructor or academic dean for nonattendance or tardiness with a grade of *W* until the University deadline to drop. Department chair approval is required. After the deadline, students must remain enrolled in the course.

Students may also be dropped by a course instructor for extreme inappropriate classroom behavior. The instructor must submit the Administrative Drop Request to drop a student from the course by the University deadline to drop a course indicated in the official Academic Calendar. Department Chair approval is required. After the deadline, the student must remain enrolled in the course and receive a final grade of *F*.

Students are charged an administrative fee for instructor initiative drops for attendance, tardiness and disruptive behavior.

## Excused Absences for University Extracurricular Activities and Religious Holidays

Students who participate in officially sanctioned, scheduled University extracurricular activities or observe a religious holiday should be given an opportunity to make up class examinations or other graded assignments missed as a result of this participation or related travel. The manner in which examinations or other assignments missed because of these activities are to be made up is left to the discretion of each individual faculty member. However, students should not be penalized in any way for these excused absences and should be informed by the instructor at the beginning of the term, preferably in writing, of the instructor's makeup policy. It is the responsibility of the student to make arrangements with the instructor prior to any missed scheduled examination or other missed assignment for making up this work, and to obtain any class notes or other course material missed due to absence prior to taking any subsequent examinations or submitting any subsequent graded assignments.

This statement of University policy applies for all students. To minimize the difficulties caused for both student-athletes and their instructors by excused absences due to University-sanctioned athletic activities or related travel, the Athletic Department shall 1) make available to all student-athletes and their academic advisers prior to registration a copy of the student's activity and travel schedule for the upcoming term, so as to facilitate the student's enrollment in class sections that will minimize activity and travel conflicts; and 2) require all student-athletes to provide a copy of that term's activity and travel schedule, and a copy of this Statement of University Policy, to each of their instructors at the first class meeting of the term.

Other University colleges and departments whose students will miss classes because of their participation in officially sanctioned, scheduled University extracurricular activities, related travel, or observing of religious holidays are encouraged to adopt similar procedures to minimize the difficulties caused by such absences.

A list of religious holidays for use in requesting excused absences is available on the Official University Calendar. Students must notify the class instructor in writing by the 12th day of the term of any such absences that will occur during that term. Accommodations are to be made without penalty. More information can be found in the *University Policy Manual*, available at [www.smu.edu/policy](http://www.smu.edu/policy).

## Absence Due to Illness

The Dr. Bob Smith Health Center does not provide documentation for granting excused absences from class. If students are absent for illness, they should talk to their professors about how they might catch up with the material missed. If students are seriously ill and require hospitalization or an extended absence, students should talk to their professors and the Office of Student Life to decide how to deal with the interruption in their studies.

## Interpretation of Course Numbers

Each SMU course has a four-digit course number. The first number indicates the general level of the course.

1000–1999	First-year
2000–2999	Sophomore
3000–3999	Junior
4000–4999	Senior
5000–5999	Senior or Graduate
6000–9999	Graduate

The second digit specifies the number of credit hours; exceptions are noted below.

<i>Digit</i>	<i>Credit Hours</i>
0	0, .5 or 10-15
1	1 or 1.5

The third and fourth digits are used to make the course number unique within the department.

## Grade Policies

A student's grades are available to him or her through my.SMU Student Homepage.

### Grade Scale

The grade of a student in any course is determined by the instructor of the course. The following grades are authorized for recording on the student's official graduate academic record maintained by the University Registrar's Office.

<i>Grades</i>	<i>Description</i>	<i>Grade Points per Term Hour</i>
<i>A</i>	Excellent Scholarship	4.000
<i>A-</i>	Excellent Scholarship	3.700
<i>B+</i>	Good Scholarship	3.300
<i>B</i>	Good Scholarship	3.000
<i>B-</i>	Good Scholarship	2.700
<i>C+</i>	Fair Scholarship	2.300
<i>C</i>	Fair Scholarship	2.000
<i>C-</i>	Fair Scholarship	1.700
<i>D+</i>	Poor Scholarship	1.300
<i>D</i>	Poor Scholarship	1.000
<i>D-</i>	Poor Scholarship	0.700
<i>F</i>	Fail	0.000
<i>P, CR, S</i>	Pass, Credit, Satisfactory	*
<i>I</i>	Incomplete	*
<i>NC, U</i>	No Credit Received, Unsatisfactory	*
<i>X</i>	No Grade Received in Registrar's Office	*
<i>W</i>	Withdrew	*

**Note:** Asterisks denote grades not included in a student's GPA.

### Grade of F, D, W, X and Missing/Blank

Failing is graded *F*. If the student's work is incomplete, poor quality and not acceptable, a grade of *F* will be given. After such a grade, credit may be obtained only by repeating the course.

The grade of *D* represents performance below average expectations. Students receiving a *D* in a course that is a prerequisite to another course should consult with their advisers about repeating the course so that they will be adequately prepared for work in the following course. Courses passed with a grade of *D*, *D-* or *D+* will generally not count toward major or minor requirements.

The grade of *W* cannot be recorded unless completion of the official drop or withdrawal process has occurred by the applicable deadline during the term of enrollment. Only the grade of *W* may be recorded if the student has officially dropped courses from the schedule or withdrawn (resigned) from the University for the term. The grade of *W* may not be revoked or changed to another grade because the act of officially dropping/withdrawing is irrevocable.

The grade of *X* is a temporary administrative grade used when an official grade has not been received from the instructor. The grade of *X* will be changed to *F* if a grade is not received within 60 days of the end of the term. Graduation candidates must clear all *X*'s prior to the deadline on the Official University Calendar, which may allow less time than 60 days. Failure to do so can result in removal from the degree candidacy list and/or conversion of the grade of *X* to the grade of *F*.

A final official grade must be recorded for each enrollment. An *F* will be assigned for a missing or blank grade also indicates an official grade has not been received from the instructor. Graduation candidates must receive a grade for all course enrollments prior to the deadline on the Official University Calendar. Failure to do so can result in removal from the degree candidacy list and/or the assignment of a grade of *F*.

## **Grade of Incomplete**

A student may temporarily receive a grade of Incomplete (*I*) if a substantial portion of the course requirements have been completed with passing grades, but for some justifiable reason acceptable to the instructor, the student has been unable to complete the full requirements of the course.

The grade of *I* is normally changed to a final grade within one year but no later than the time of graduation.

At the time a grade of *I* is given, the instructor must stipulate the requirements and completion date that are to be met and the final grade that will be given if the requirements are not met by the completion date.

The grade of *I* is not given in lieu of a grade of *F* or *W*, or other grade, each of which is prescribed for other specific circumstances.

The grade of *I* in a course does not authorize a student to attend or enroll in the course during a later term. Graduation candidates must clear all Incompletes prior to the deadline on the Official University Calendar. Failure to do so can result in removal from the degree candidacy list and/or conversion of the grade of *I* to the grade indicated by the instructor at the time the grade of *I* was given.

## **Grade Point Average**

A student's grade point average (cumulative GPA) is computed by multiplying the credit hours of each course attempted by the grade points earned in the particular course and then dividing the total number of grade points by the total number of hours attempted, excluding those hours for which grades are shown with an asterisk on the grade chart. The GPA is truncated, not rounded, at three decimal places.

For assistance estimating your GPA see the GPA calculator on the SMU website.

## **Grade Changes**

Changes of grades, including change of the grade of *I*, are initiated by the course instructor and authorized by the academic chair and by the academic dean of the school in which the course was offered. If a student requests a grade change, the instructor may ask the student to provide the request as a written petition, which may become an official part of any further process at the instructor's discretion. Changes of grades may be made only for the following authorized reasons: to clear a grade of *I*, to correct a processing error or to reflect a re-evaluation of the student's original work. A change of grade will not be based on additional work options beyond those originally made available to the entire class.

Changes of grades of *I* should be processed within a calendar year of the original grade assignment unless the grade is for thesis work. Other changes of grades must be processed by the end of the next regular term. No grade will be changed after 12 months or after a student's graduation, except in cases where a grade is successfully appealed – provided that written notice of appeal is given within six months following graduation – and in extenuating circumstances authorized by the academic dean and approved by the University Registrar's Office.

## **Grades for Repeated Courses**

Students will be allowed to repeat courses according to the following rules: Both the initial and the second grades will be recorded on the student's permanent academic record (transcript). Both grades will be included in the calculation of the student's cumulative GPA and in the determination of academic probation, suspension, dismissal, honors and graduation. Only the repeated course and not the initial credit hours count toward the number of hours needed for graduation.

## **Pass/Fail Option**

Students should consult with their advisers before declaring the pass/fail option for any course, as some courses may not be taken pass/fail.

## **Grade Appeals**

A student who feels that an assigned grade is other than the grade earned must first discuss the matter with the course instructor to determine if the discrepancy is caused by error or misunderstanding. At the time of the initial discussion, the student may be asked to provide a written petition requesting the change of grade.

A student who is not satisfied by the instructor's decision on a request for a grade change, and who maintains that the original grade was capriciously or unfairly determined, may appeal to the chair of the department in which the course was offered (or, in the case of a nondepartmental course, to a faculty agent designated by the dean of the school offering the course). After discussing the matter with the student, and bearing in mind that the final authority in matters of academic judgment in the determination of a grade rests with the course instructor, the chair (or faculty agent) will consult with the course instructor, who will subsequently report to the student the disposition of the appeal.

A student who is not satisfied by the disposition of the appeal may appeal the decision to the dean of the school offering the course. The dean will take action as he or she deems appropriate. A student may appeal the dean's decision to the provost. In their actions, the dean and the provost must respect the principle that the determination of a grade rests with the course instructor.

## **Academic Advising and Satisfactory Progress Policies**

### **Academic Advising**

For an effective advising relationship, the student must be prepared when meeting with the adviser. The student must initiate the advising appointment. The adviser will give assistance to the student, but the student has the final responsibility for the accuracy of the enrollment, the applicability of courses toward the degree requirements, and his or her academic performance.

Students are assigned an academic adviser by their academic dean's office, records office or major department. A student who enrolls without first meeting with his or her assigned academic adviser may be subject to sanctions including, but not limited to, cancellation of the term enrollment and restriction from the self-service enrollment functions.

### **Leave of Absence**

A leave of absence is a temporary leave from the University – a kind of "timeout" – that may be necessary during an academic career. Students may elect to take leaves of absence for a variety of reasons, including 1) medical reasons due to accident or illness, 2) family crises or other personal situations that require an extended absence from school, 3) financial issues that may take time to resolve, and 4) academic difficulties that may best be handled by taking time to refocus on college work.

Typically, a leave of absence is for one term or one academic year. A student may extend a leave of absence by contacting his or her academic department representative. The process to return to SMU after a leave-of-absence period can be an easy one, especially if the student has gone through the steps to file for a leave of absence and planned ahead for the return. Following SMU's leave-of-absence guidelines helps 1) assure that the degree requirements per the catalog of record when the student initially matriculated at SMU still apply upon return, 2) assist with financial aid processing, and 3) provide the support needed to return to SMU and successfully finish the degree.

The SMU Leave of Absence Policy provides students with a formal process to "stop out" of SMU for either voluntary or involuntary reasons. Typically, a leave of absence is for a temporary departure from the institution; however, intended permanent withdrawals from SMU will also be processed under the Leave of Absence Policy.

The first step to effect a leave of absence is for the student to arrange an appointment to meet with his or her academic adviser, who will then assist the student with the process.

## Academic Progress

Failure to meet established minimum acceptable standards of academic or disciplinary performance can result in probation, suspension or dismissal. Information regarding disciplinary action can be found under Code of Conduct in the Student Affairs section of this catalog.

Graduate students must maintain a cumulative GPA of 3.000. If in any term the student falls below this cumulative GPA, the student will be placed on probation for one regular term. If at the end of the term of probation the cumulative GPA is not up to 3.000, the student may be removed from the program at the discretion of the dean's office.

## Definitions: Academic Probation, Academic Suspension, Academic Reinstatement and Academic Dismissal

**Academic Probation.** Academic probation is a serious warning that the student is not making satisfactory academic progress. A student on academic probation is still eligible to enroll and is considered in good standing for enrolling in classes and for certification purposes. Academic probation is not noted on the permanent academic record; however, a student on academic probation may be subject to certain conditions during the period of probation and will be subject to academic suspension if he or she does not clear academic probation.

**Academic Suspension.** Academic suspension is an involuntary separation of the student from SMU. Academic suspension is for at least one regular term. The term of suspension might be for a longer period depending on the policy of the school of record or the terms of the individual student's suspension. Students suspended from one school are suspended from the University.

The status of academic suspension is recorded on a student's permanent academic record. While on academic suspension, a student is not in good academic standing for certification purposes and is not eligible to enroll at SMU. Students who have served their suspension and who are eligible to return may not enroll for any intersession terms without permission from their school of record.

Credits earned at another college or university during a term of suspension may not be applied toward an SMU degree. A grade point deficiency must be made up through enrollment at SMU.

**Academic Reinstatement.** A student who has been on academic suspension once may apply for reinstatement to SMU. If reinstated, the student may enroll in classes, and he or she is considered in good academic standing for purposes of certification. A student who is reinstated remains on academic probation until the conditions of academic probation are satisfied.

**Academic Dismissal.** A second suspension results in an academic dismissal from the University. Academic dismissal is final, with no possibility of reinstatement or readmission to the University. Academic dismissal is recorded on the student's permanent academic record.

## Academic Petitions and Waivers

Petitions and/or requests for waivers concerning University requirements, graduation requirements and the evaluation of transfer work should be submitted to the Office of Research and Graduate Studies, located in Perkins Administration Building, Suite 101. The Graduate Studies Office will then submit the form to the Office of the University Registrar.

## Transfer Coursework

Policies for transfer credit are found under Transfer of Credits in the Degree Requirements section of this catalog.

## Graduation Policies

### Apply to Graduate

Students must file an Application for Candidacy to Graduate no later than the last day of the first week of the term in which they will complete all degree requirements. Applications are filed through my.SMU Student Homepage by the deadline date on the Official University Calendar.

Students who file an application after the published deadline may be required to pay a nonrefundable late fee. Late applications may be denied after the start of the next term, and the Application for Candidacy to Graduate applied to the next conferral date. Students taking coursework at another institution and transferring the course(s) back to SMU are responsible for ensuring that the University Registrar's Office receives their official transcript in order for their degree to be conferred for the anticipated graduation term.

SMU has three degree conferral periods for most programs: fall (December), spring (May) and summer (August).

## **Commencement Participation**

An All-University Commencement Convocation is held in May for students enrolled and on schedule to complete degree requirements during the spring term. Psychology Ph.D. students enrolled and on schedule to complete all degree requirements during the following summer session may also participate in the University Commencement Convocation, although their degrees will not be conferred until August. Students may also participate in departmental or school ceremonies according to the policies of the departments or schools.

Doctoral candidates may participate in commencement only after all degree requirements are complete.

An All-University December Commencement Convocation is held each year for students completing degree requirements during the fall term. Students who completed degree requirements during the previous summer session may also participate.

A student may participate once in either the All-University Commencement Convocation in May or the All-University December Commencement Convocation for a given degree, but not both.

To participate in a ceremony, a student must apply online and file with their school's records office an Application for Candidacy to Graduate or Intent to Participate Form.

## **Statute of Limitations for Degree Plans**

A student who has been readmitted to the University following an absence of more than three years will be expected to meet all requirements for graduation current at the time of readmission.

# Dedman College of Humanities and Sciences: Student Life and Housing

## The Division of Student Affairs

The Division of Student Affairs ([www.smu.edu/studentaffairs](http://www.smu.edu/studentaffairs)) creates and supports a robust student experience and forges strategic partnerships to best serve the entire SMU community. As educators and scholar-practitioners, we create purposeful learning and leadership opportunities for students to clarify and develop their knowledge, values, skills, and identities – challenging each to become a world changer. The Division of Student Affairs is comprised of five different organizational units that each provide unique educational and supportive resources for students during their time at SMU: Student Wellbeing and Support, Student Engagement and Success, Residence Life and Student Housing, Religious Life, and the Hegi Family Career Development Center.

## Student Wellbeing and Support

### Health Services

[www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)

The Dr. Bob Smith Health Center provides SMU students with campus access to quality, comprehensive and student-centered medical care, mental health services, and outreach programs designed to promote their health and wellbeing. The new 33,000 square foot state-of-the-art clinic facility is centrally located on campus at 6211 Bishop Boulevard. The Health Center is certified by the Accreditation Association for Ambulatory Health Care (AAAHC) for meeting rigorous nationally recognized standards and committing to delivering the highest quality of care.

**Medical Services.** The Dr. Bob Smith Health Center provides a wide range of health services allowing students to receive primary care on campus. Services available include the treatment of acute illnesses, care of injuries, minor medical procedures, physical exams, STD testing, vaccinations, allergy injections, and limited specialty services. Additional ancillary services include a clinical laboratory, an on-site pharmacy, X-ray imaging and diagnostic services, and a part-time sports medicine clinic. For appointments and health information, students may call 214-768-2141 or visit [www.smu.edu/healthcenter](http://www.smu.edu/healthcenter).

**Acute/After Hours Care.** Students should call 911 for immediate response to life-threatening injuries or illnesses. For other urgent concerns after clinic hours, students should seek a local hospital or urgent care center. A listing of several hospital emergency rooms and after-hours urgent care facilities is provided for general reference on the Health Center website ([www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)).

**Costs.** The Health Services Fee, which is included in general student fees, covers routine medical visits and counseling appointments at the Health Center. Charges are assessed separately for lab services, x-rays, immunizations, medical supplies, pharmacy and specialty care. Claims are filed for students participating in the SMU Student Health Insurance Plan. Students with other insurance plans may request an itemized receipt in order to submit a claim for insurance reimbursement. The Pharmacy files claims for most insurance plans.

**Mandatory Health Insurance Policy.** SMU students are required to maintain insurance coverage as a condition of their enrollment. The University offers the SMU Student Health Insurance Plan (SHIP), which is administered by the Health Center's Student Insurance Office. The plan provides coverage at a reasonable cost for most on- and off-campus health care. Information is available at [www.smu.edu/healthinsurance](http://www.smu.edu/healthinsurance).

Domestic students taking nine or more credit hours and international students taking one credit hour or more are automatically enrolled in the Student Health Insurance Plan (SHIP) each semester unless they expressly waive coverage in their my.SMU account. Information about the waiver deadline is available online at [smu.edu/healthinsurance](http://smu.edu/healthinsurance). Domestic students taking between one and eight credit hours are eligible to enroll in the Student Health Insurance Plan on a voluntary basis.

**Pharmacy.** A full service pharmacy is conveniently located in the Dr. Bob Smith Health Center to meet students' prescription needs from 8:30 a.m. to 5:00 p.m., Monday through Friday. The pharmacy is in network with most insurance plans. Prescriptions and refills may be transmitted directly to the pharmacy from the student's physician.

**Immunizations.** All students (undergraduate, graduate, part-time and full-time, to include international and IEP/ESL students) are required to have an SMU medical history form on file in the Dr. Bob Smith Health Center before registration. (Health history forms are available on the Health Center's website at [www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)). All students must also submit - to the Health Center - immunization records that provide proof of two doses of the vaccine against measles, mumps and rubella. These MMR immunizations must be documented by a physician, public health record, military health record or school health record. Students will not be allowed to register without immunization compliance.

Texas state law requires all new students entering an institution of higher education under the age of 22 to provide proof of immunization for bacterial meningitis. The meningitis vaccine or a booster dose must have been received during the five-year period prior to enrollment and not less than ten days before the start of classes. Students seeking exemption from this requirement due to health risk or conscience, including religious belief, should see the second page of the SMU medical history health form. More information is found under Final Matriculation to the University in the Admission to the University section of this catalog.

All required immunizations may be obtained at the Health Center.

**Class Absence Due to Illness.** The Health Center does not issue excuses from classes for illness. Please refer to the Health Center website ([www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)) for the Class Excuse Policy.

**Confidentiality and Privacy.** Confidentiality and privacy of student health information is of paramount importance at the Dr. Bob Smith Health Center. The Health Center follows all applicable state and federal laws related to the disclosure of medical and mental health information, and applies to the highest professional standards of care and privacy. All student-patient health service records are confidential. No information about a student can be released to any third party without the student's written permission.

**Release of Medical Information.** Patient health information and medical records are released only with a written release by the student. Students may sign a release allowing the Health Center to provide specific medical information with their parents, significant others or health care representatives.

**Health Education and Promotion.** The Health Center's Office for Community Health and Promotion serves as a resource to enhance the well-being of SMU students in support of their learning and success. Health information is presented through engaging programs and services to help students make informed and healthy choices. The Health Center works with students to promote activities that create a healthy environment for the SMU community.

**Counseling Services.** The Health Center provides crisis intervention, individual and group therapy, psychiatric evaluation and counseling referrals for SMU students. Use of all services is voluntary and strictly confidential. There is no charge to students who have paid the University health fee. Students can seek confidential help for concerns such as anxiety, depression, relationships, career/life planning, sexual identity, eating/body image and sexual assault/sexual harassment. Alcohol and drug prevention is a free and confidential source of help and information to the SMU community, covering issues related to substance abuse and addiction. Any laboratory tests or pharmaceuticals ordered will be charged to the student. For more information regarding scheduling appointments, students should call 214-768-2277 or visit [www.smu.edu/counseling](http://www.smu.edu/counseling).

**Testing Services.** Testing Services offers fee-based testing to the Dallas-area community. These services include on-campus administration of national testing programs such as the LSAT, MPRE, GRE and others. Other testing offered includes credit by exam (CLEP), and correspondence examinations for local distance learners enrolled in other universities. For additional information, students should visit [www.smu.edu/testingprogram](http://www.smu.edu/testingprogram) or call the center at 214-768-2269.

## Dedman Center for Lifetime Sports

[www.smu.edu/recsports](http://www.smu.edu/recsports)

The Dedman Center for Lifetime Sports provides aerobic studios, an indoor running track, basketball courts, volleyball courts (indoor and outdoor), racquetball courts, a climbing wall, a bouldering wall, a 25-yard recreational pool with five lanes, 15,000 square feet of fitness and weight equipment and a Starbucks in the lobby area. These facilities are open to SMU students, faculty, staff and paying members.

**Facilities/Operations.** The center is a 170,000 square foot facility designed for recreational sports, wellness, programs and the traditions and spirit of SMU.

**Aquatics.** SMU Aquatics features a five-lane, indoor recreational pool and an out-door, zero-depth entry fountain pool known as "The Falls." Students have opportunities to participate year-round in recreational swimming, sunbathing and water sports such as water basketball, volleyball and polo. Classes offered include water fitness, adult and child swimming lessons, children's group lessons, and American Red Cross lifeguard training.

**Programs.** A variety of services and programs are available, including club sports, fitness classes, intramural sports and the Outdoor Adventure program.

**Club Sports.** Club sports offer an opportunity for students interested in concentrated training and participation in a sport. These recognized student organizations offer competition with other university/college club teams in baseball, cycling, ice hockey, men's and women's lacrosse, polo, rugby, men's and women's soccer, triathlon, ultimate Frisbee, volleyball, wakeboarding and water polo.

**Fitness.** SMU Fitness offers group exercise classes and personal training sessions. Group X exercise classes are offered throughout the day to accommodate a variety of schedules. Different types of cardio, strength and flexibility classes are available. Experienced and knowledgeable personal trainers offer sessions to train members of the University community, either one-on-one or in groups, to meet their personal fitness goals. All SMU Fitness programs have a fee for participation.

**Intramural Sports.** Many opportunities for team and individual competition are available through intramural sports such as golf, racquetball, tennis, and dodgeball. The five major sports are flag football, volleyball, basketball, soccer and softball. Leagues provide year-round opportunities to participate in a wide variety of sports and activities. Additional leadership opportunities are available for those interested in officiating or supervising various activities.

**Outdoor Adventure.** SMU Outdoor Adventures is the campus source for outdoor recreation and adventure, offering fun and challenging recreational adventure activities, community-building programs, and student leadership and personal growth opportunities. Students can sign up for SMU OA trips offering traditional and non-traditional outdoor adventure pursuits such as backpacking, rock climbing, caving and canoeing. SMU OA also manages the SMU Climbing Center, the indoor climbing and bouldering facility and the Portable Challenge and Team Development course.

**Spirit/Traditions.** The Recreational Sports Department houses the spirit and traditions of SMU including the Cheer Squad, Mustang Band, Peruna, Pom Squad and the Rotunda Yearbook.

**Mustang Band.** Founded in 1917, the Mustang Band was named the "Best College Marching Band" in Texas in Kirk Dooley's Book of Texas Bests. Long known as "the hub of SMU spirit," the band represents the University at football and basketball games, produces the Pigskin Revue during Homecoming and performs at special University- and community-related events. Membership is open to all SMU students by audition, regardless of major and scholarships based on need and ability are available.

**Rotunda Yearbook.** For over 100 years, the Rotunda Yearbook has chronicled the history of Southern Methodist University. Named in December 1915 after the architecture of Dallas Hall, the Executive Council of the Student Association voted for the annual's name after seven different students suggested it. From its beautiful art to captivating themes, the Rotunda has evolved with the times, earning national awards and recognition from the Associated Collegiate Press (ACP) and Columbia Scholastic Press Association (CSPA).

**Spirit Squads.** Members are full-time students who dedicate their time, energy and athleticism to support Mustang Athletics.

The Cheerleading Squad is a highly competitive team consisting of 20 to 30 young men and women. Twenty of the team's members compete at NCA College Nationals held in Daytona Beach, Florida where the squad placed first in 2016, 2017 and once again in 2018.

The Pom Squad is well known for their energetic performances and their ability to entertain a crowd. The dancing style of the team includes jazz, pom and hip-hop.

Peruna IX (2011-PRESENT) is the beloved mascot of the university and is accompanied by Peruna handlers that lead him across the field during football games. The Human Peruna Mascot is the costumed hero that represents SMU, and is a traditional accessory to Peruna IX.

## **Academic Integrity and Code of Conduct**

### **The Honor Code of Southern Methodist University**

Intellectual integrity and academic honesty are fundamental to the processes of learning and of evaluating academic performance, and maintaining them is the responsibility of all members of an educational institution. The inculcation of personal standards of honesty and integrity is a goal of education in all the disciplines of the University.

The faculty has the responsibility of encouraging and maintaining an atmosphere of academic honesty by being certain that students are aware of the value of it, understand the regulations defining it and know the penalties for departing from it. The faculty should, as far as is reasonably possible, assist students in avoiding the temptation to cheat. Faculty members must be aware that permitting dishonesty is not open to personal choice. A professor or instructor who is unwilling to act upon offenses is an accessory with the student offender in deteriorating the integrity of the University.

Students must share the responsibility for creating and maintaining an atmosphere of honesty and integrity. Students should be aware that personal experience in completing assigned work is essential to learning. Permitting others to prepare their work, using published or unpublished summaries as a substitute for studying required material, or giving or receiving unauthorized assistance in the preparation of work to be submitted are directly contrary to the honest process of learning. Students who are aware that others in a course are cheating or otherwise acting dishonestly have the responsibility to inform the professor and/or bring an accusation to the Honor Council.

Students and faculty members must share the knowledge that any dishonest practices permitted will make it more difficult for the honest students to be evaluated and graded fairly and will damage the integrity of the whole University. Students should recognize that their own interests and their integrity as individuals would suffer if they condone dishonesty in others.

### **The Honor System**

All SMU undergraduate students and graduate students with the exception of those enrolled in the Schools of Law, Theology, Business, or Education are subject to the Honor Code and as such are required to demonstrate an understanding of and to uphold the Honor Code. Honor codes for graduate students enrolled in the Cox School of Business, Dedman School of Law, Perkins School of Theology and Simmons School of Education and Human Development are explained in their graduate catalogs.

In support of the Honor Code, the Honor Council has the responsibility to maintain and promote academic integrity. The Honor Council is composed of a minimum of 27 members selected through an application and interview process organized by the Honor Council Executive Board.

Academic dishonesty includes plagiarism, cheating, academic sabotage, facilitating academic dishonesty and fabrication. Plagiarism is prohibited in all papers, projects, take-home exams or any other assignments in which the student submits another's work as being his or her own. Cheating is defined as intentionally using or attempting to use unauthorized materials, information or study aids in any academic exercise. Academic sabotage is defined as intentionally taking any action that negatively affects the academic work of another student. Facilitating academic

dishonesty is defined as intentionally or knowingly helping or attempting to help another to violate any provision of the Honor Code. Fabrication is defined as intentional and unauthorized falsification or invention of any information or citation in an academic exercise.

Suspected cases of academic dishonesty may be handled administratively by the appropriate faculty member in whose class the alleged infraction occurred or referred to the Honor Council for resolution. Suspected violations reported to the Honor Council by a student or by an instructor will be investigated and, if the evidence warrants, a hearing will be held by a board composed of a quorum of four members of the Honor Council.

Any appeal of an action taken by the Honor Council shall be submitted to the University Conduct Council in writing no later than four calendar days (excluding school holidays) after notification of the Honor Council's decision.

## **Code of Conduct**

The following are University procedures and standards with which every student must become familiar. The University considers matriculation at SMU an implicit covenant and a declaration of acceptance on the part of the student of all University regulations. The Student Conduct & Community Standards Office, website [www.smu.edu/studentconduct](http://www.smu.edu/studentconduct), promotes community, scholarship and civility by holding students accountable to the Student Code of Conduct and the Honor Code.

Standards of conduct are established through faculty, student and administrative efforts and are under continuous evaluation by the entire University community in order to assure reasonable and fair limits. At SMU, the student is assumed to have a high degree of loyalty and responsibility to the University and its well-being, as well as to himself or herself in personal, social and intellectual pursuits; the student's behavior both on and off campus is evidence of this.

Students at SMU will discover that they are encouraged to exercise a great amount of personal freedom as well as accompanying responsibilities. Through their personal capacities for intelligent thought and action, mature students understand that there are situations in which certain behavior must be modified for the benefit of others. The University stands firm in its commitments to the rights and freedoms of students, expecting in return the same respect and concern.

Due respect for the entire University community, faculty, staff and one's fellow students is always expected. The University expects all students to be responsible citizens and to abide by all federal, state and local laws. The University Code of Conduct applies to students both on and off campus. It is the University's expectation that students will avoid behaviors such as, but not limited to, the misuse of drugs and alcohol, dishonesty, gambling, hazing, or behavior that endangers or threatens to endanger the health and safety of any person.

Students are required to identify themselves when asked by a properly identified faculty or staff member, or by another student serving as a University staff member. Persons who are not members of the University community and without business on campus may be asked to leave.

## **Conduct Review Process**

Clear disciplinary procedures are an important part of the mission of SMU as an educational institution. The intent of the system of due process at SMU is to be educational and not merely punitive for students. The goal continues to be to produce quality citizens. The purpose of the conduct review process is to encourage personal responsibility.

Depending on the degree of misconduct, a student may be subject to sanctions ranging from an informal warning to expulsion from the University. In addition, a student may be assigned educational sanctions designed to promote personal growth and development. Should a student be asked to leave the University, he or she should do so in an expeditious and peaceful manner. The student should remain off campus until he or she receives written permission from the Office of Student Conduct & Community Standards to return to campus. In the event of such separation, a student is still responsible for University financial obligations.

To ensure fairness and due process for all students in the conduct process, the student is granted an impartial hearing and the right to appeal to the University Conduct Council. A student who is appealing a sanction may remain in school until the decision and penalty are reviewed, unless otherwise determined by the Dean of Students, the Vice President

for Student Affairs, or their designee. All actions related to the conduct review process are subject to presidential review.

Having voluntarily enrolled as students at Southern Methodist University and assumed a place in the University community, all students are presumed to be knowledgeable of, and have agreed to abide by the rules and regulations set forth in the Student Code of Conduct as outlined in the SMU Student Handbook, which is available online at [www.smu.edu/StudentAffairs/StudentLife/StudentHandbook](http://www.smu.edu/StudentAffairs/StudentLife/StudentHandbook).

## **Student Engagement and Success**

### **Department of Student Development**

#### **Office of the Student Experience**

The Office of the Student Experience designs a comprehensive student experience supporting students and their families from orientation to graduation. Using a leadership framework, all students are guided through collegiate transitions. With recognition of the unique needs of veterans, graduate, transfer, and international students, the office advocates for and provides support to these special populations.

#### **Leadership**

The leadership programs available to students include the Emerging Leaders First-Year Leadership Development Program, the Crain Leadership Summit, and the Lonestar LeaderShape Institute. The Office of the Student Experience also supports student leadership development through the Caswell Leadership Program, for a group of selected students to develop projects focused on organizational leadership, faith-based leadership, community-based leadership, environmental leadership, fraternity and sorority leadership or culturally competent leadership.

#### **Parent and Family Programs**

Parents and families are supported through the Office of the Student Experience with a focus on assisting families to assist their students. Our office supports the SMU Mothers' and Dads' clubs, welcomes and supports new students and families during orientation, and supports family weekend.

#### **Special Population Support**

The Office of the Student Experience is committed to supporting all SMU students in their transitions into and through SMU. Additional support is coordinated for special student populations who may have unique factors that impact their transitions including Veteran, Transfer, International, and Graduate students.

#### **Women & LGBT Center**

[www.smu.edu/womenandlgbtcenter](http://www.smu.edu/womenandlgbtcenter)

The Women & LGBT Center works to increase awareness and understanding of gender, sexuality, and women's issues on campus through social, cultural and academic programming and outreach. We provide empowering spaces for students to develop as leaders through purposeful learning, educational, and advocacy opportunities. We also advise, support, and develop student organizations focused on gender, sexuality, and women's issues. Some of the organizations we advise include the Feminist Equality Movement, Women in Science and Engineering, and Spectrum: the lesbian, gay, bisexual, transgender and ally organization. Also housed in the center is the SMU Women's Symposium ([www.smu.edu/womsym](http://www.smu.edu/womsym)), which is part of the Education of Women for Social and Political Leadership series, established in 1966.

#### **Office of Social Change and Intercultural Engagement**

The Office of Social Change and Intercultural Engagement exists to connect students with opportunities to engage with and learn from the SMU campus, Dallas community, and beyond. The office prioritizes advocacy and awareness through immersive community engagement experiences and social justice education. There are two major functional areas of the office: community engagement and intercultural engagement.

The community engagement side of the office has signature service programs including The Big Event, Mustang Heroes, and Alternative Breaks—which provide students the opportunity to participate in immersive service

experiences in Dallas and throughout the United States. The office also provides consulting services to individuals, classes, and offices to help connect them to meaningful and educational community engagement opportunities.

In addition, the office sponsors intercultural engagement and social justice education programs to provide opportunities for the exchange of ideas and experiences that enhance student perspectives, and offers various leadership opportunities through culturally based student organizations, student coordinator positions, and the CONNECT Mentoring Program.

For more information about our programs, please visit [www.smu.edu/socialchange](http://www.smu.edu/socialchange).

## **Department of Student Involvement**

[connect.smu.edu](http://connect.smu.edu)

The mission of Student Involvement is to foster experiences and create spaces encouraging students to discover their interests and find a sense of belonging through involvement. Research shows that students who get involved, regardless of the type of activity, tend to be more successful during their college experience. Student Involvement supports more than 200 opportunities for SMU students through academic and professional associations, campus programming boards, community service coalitions, fraternities and sororities, governing boards, honor societies, multicultural organizations, political clubs, club sports, religious organizations, and special interest groups. Professional staff are available to answer student's questions about getting involved and student organization operations.

The Student Involvement Office is located on the third floor of the Hughes-Trigg Student Center, Suite 314. Campus activities and organizations are an integral part of the developmental experience for students and a long-standing SMU tradition. Participation can help students develop leadership skills and provide inter-personal, social and cultural experiences.

Additional information is available online, including organization interests or type, membership requirements, contact information and event calendars. Student Involvement can also assist students in forming a new organization. To learn more visit [connect.smu.edu](http://connect.smu.edu).

Eligibility Requirements. Students who hold office in a student organization or represent the University as a member of a sponsored campus group (Mustang Band, Alternative Breaks, etc.) must be matriculated in a University degree-granting program, maintain a minimum 2.0 GPA, and may not be on academic probation.

## **Student Government**

Through SMU's system of representative governance, students participate with faculty and administration in the University's decision-making process. The primary voice of students in this process is the student-elected Student Senate comprised of senators, committee chairs, general members, and student body officers.

## **Hughes-Trigg Student Center**

[www.smu.edu/htrigg](http://www.smu.edu/htrigg)

The Hughes-Trigg Student Center supports the University's mission by serving as the hub of student life and activities. The Student Center enhances the student experience by providing services, conveniences, amenities, and resources to facilitate programming. The Student Involvement staff strives to provide a safe and community-focused environment to meet the diverse needs of all individuals. Our space offerings include a 6,400 square-foot ballroom, a tiered, amphitheater-style forum classroom, a 470-person capacity auditorium, a convenience store, a food court with a multifunction dining space, a post office, office and meeting space for student organizations, several lounging and quiet areas for studying, and six meeting rooms.

## **Residence Life and Student Housing**

[www.smu.edu/housing](http://www.smu.edu/housing)

The Department of Residence Life and Student Housing supports the goals of the University by creating residential communities that empower residents to value learning, citizenship and leadership in comfortable, well-maintained

facilities. The department is responsible for the campus residential community, including all Residential Commons, Upper Division Housing, SMU-owned apartments, and SMU-owned Greek chapter houses.

## Hegi Family Career Development Center

[www.smu.edu/career](http://www.smu.edu/career)

The Hegi Family Career Development Center at SMU is dedicated to serving the needs of SMU students and alumni and assisting employers in reaching qualified candidates from SMU. The Career Development Center staff guides and encourages students and alumni in the development of skills necessary for lifelong career management and offers opportunities for employers to recruit students through campus events and online resources. At Hegi, the staff cares about helping students develop into well-rounded individuals, and is dedicated to values of consistency, authenticity and commitment to excellence.

**Career Express Drop-in Hours.** The Career Center offers 15-minute drop-in sessions on a first-come, first-served, basis. In these sessions, students can discuss career options or get help editing a resume. Additional information is available on our website at [www.smu.edu/career](http://www.smu.edu/career).

**Counseling Appointments.** The Career Center also provides opportunities for counseling appointments with a staff member. These longer sessions can help students navigate more complex issues, including major exploration, career exploration, professional skill building, and more.

**Peer Mentors.** Peer Mentors are highly trained student leaders who help fellow students navigate the career development process, including assisting with drop-ins, editing cover letters and resumes, and representing Hegi at campus events.

**Career Development Ambassadors.** CDA is a student organization designed to provide career development opportunities on the SMU Campus. CDAs organize events for the SMU community, which inspire engagement in the career development process, develop students' career tools, and provide networking opportunities.

**Experiential Learning.** Want to learn more about an industry, company or specific job? Experiential learning is the best way to do so. Below are some easy ways to get connected:

- **Coffee Chats/Lunch 'n Learns:** Meet an employer in an informal setting to learn about their career journey.
- **Mentors:** Connect and develop a relationship with an industry professional that is in a career you are interested in.
- **Employer Site Visits/Externships:** Shadow professionals and SMU alumni for the day and learn about their career path and what they do on a daily basis. Mustang and SMU Connection programs partner with top regional employers and alumni providing student exposure to today's competitive and ever-changing job market.
- **Informational Interviews:** Have a conversation with an alum and/or employer to build your network and learn about their education and career path.

**Employer Events.** Our Office cultivates meaningful relationships with organizations and employers who are invested in networking with dynamic, talented and skilled students across SMU's liberal and communication arts communities. Throughout the year, the Career Center hosts 2-4 Career and Internship Fairs, along with a host of Employer Industry Panels, Company Information Sessions and Industry Training and Development Workshops. These events offer students an opportunity to work with employers and alumni and to learn the skills necessary to be successful in the workplace.

## Office of the Chaplain and Religious Life

[www.smu.edu/chaplain](http://www.smu.edu/chaplain)

The Office of the Chaplain and Religious Life offers resources of pastoral care and theological reflection that nurture spiritual and vocational development as well as the moral and ethical vision and character of students, faculty and staff. Dr. Stephen W. Rankin is the chaplain and minister to the University community. Chaplain Rankin leads and preaches

at weekly chapel service, an ecumenically Christian, all-University service of worship, each Wednesday during the term. Students, faculty and staff are invited to participate in this service through music, scripture readings or other expressions of worship. Other services, including the University Service of Memory, Ash Wednesday Service and memorial services as needed, are also planned and implemented by the Office of the Chaplain.

Presently, there are more than 28 religious life organizations. Alongside the Christian groups aligned with denominations, local Dallas-area congregations or national parachurch ministries, SMU also has an active Hillel chapter for Jewish students, a bustling Muslim Student Association and other faith groups of various traditions. A large number of undergraduate, graduate and professional students, as well as many of SMU's faculty, staff and administrators, participate in these religious communities.

Additionally, the Office of the Chaplain partners with faculty members across campus to direct the Faith and Learning Scholars, a cohort of students who want the experience of integrating their faith with their academic pursuits. Participants can qualify for the community engagement proficiency. Similarly, the Civil Rights Pilgrimage, founded in 2004, is an eight-day spring break journey through the South whereby students encounter shrines of freedom and meet heroes of the civil rights movement. This collaboration with Dedman College offers students a transformative opportunity while earning academic credit.

Chaplains are available for personal counseling and spiritual direction with students, faculty and staff during office hours. The Office of the Chaplain is located in the Hughes-Trigg Student Center, Suite 316. Nearby are two rooms for prayer, one designated for Muslim community members and the other for all others.

## **Residence Accommodations**

The University prides itself on offering a full living and learning experience for its resident students. The mission of the Department of Residence Life and Student Housing is to advance the goals and objectives of the University by creating residential communities that empower residents to value learning, citizenship and leadership. To this end, RLSH seeks opportunities to promote an intellectual culture in SMU's residential communities that complements an already flourishing campus social culture. RLSH is responsible for residence halls, 11 Residential Commons and 10 SMU-owned Greek chapter houses. This responsibility includes making sure that facilities are well maintained and that students have opportunities to grow personally and excel academically.

## **Housing Policy for All Students**

All incoming first-year undergraduate students are required to live on campus during their first two years at SMU. Exceptions may be granted on the basis of a financial, medical or personal hardship at the discretion of the dean of RLSH to those students from Dallas/Fort Worth who live with a parent or legal guardian in the primary residence of the parent or guardian. For housing purposes, the two years means the first two years of college. Incoming transfer students who are over the age of 16 and under the age of 20 are required to live on-campus for their first year at SMU. For 2018–2019, upperclass and graduate students are not required to live on campus but may apply on a space-available basis.

## **Applications for Residence**

New graduate students should submit the completed application and housing license agreement to RLSH with a check or money order for \$100 made payable to Southern Methodist University for the nonrefundable housing deposit. Notification of assignment will be made by RLSH.

The housing license agreement is for the full academic year (fall and spring terms). Room charges for the fall term will be billed and are payable in advance of the term for students who register before August 1, and room charges for the spring term will be billed and are payable in advance of that term for students who register before December 1. Students who register after these dates must pay at the time of registration. Room charges for the full academic year will be due and payable should a student move out at any time during the school year. Accommodations for shorter periods are available only by special arrangement with RLSH before acceptance of the housing license agreement. It is important that applicants become familiar with the license agreement, as it is a legally binding document.

## **Graduate Residence Accommodations**

The Department of Residence Life and Student Housing operates one apartment residence hall designated for graduate students. Martin Hall, a single occupancy, efficiency apartment facility, houses single graduate students and senior undergraduates.

## **Special Housing Needs**

Students having special housing needs because of a disability should contact the SMU Office of Disability Accommodations and Success Strategies in order to establish eligibility for accommodations. When applying for housing, students should also submit information to RLSH regarding a request for accommodations. DASS and RLSH will work together with the student on their specific situation to make necessary accommodations.

## **General Housing Information**

Each apartment is furnished with a Murphy bed, desk, dresser, kitchen dining table and chairs. All university residences have wired and wireless Ethernet connections to the University's computer system. All residence halls are air-conditioned and some have individually climate-controlled rooms. Washing machines and dryers are located in all residence halls. Meal plans are not required in the graduate hall. For more information, students should visit [www.smu.edu/housing](http://www.smu.edu/housing) or contact the Department of Residence Life and Student Housing, Southern Methodist University, PO Box 750215, Dallas TX 75275-0215; phone 214-768-2407; fax 214-768-4005; [housing@smu.edu](mailto:housing@smu.edu).

Kenneth M. Hamilton, *Ethnic Studies Director*  
Daniel Heitjan, *Biostatistics Program Director*  
James Hollifield, *John Goodwin Tower Center for Political Studies Director*  
Dennis S. Ippolito, *Public Policy Director*  
Shira Lander, *Jewish Studies Director*  
Steven E. Lindquist, *Global and Regional Studies Director, Asian Studies Director*  
Monnie McGee, *Master of Science in Data Science Program Co-Executive Director*  
William Orr, *Natural Sciences Director*  
Carolyn Smith-Morris, *Health and Society Program Director*  
Neil Tabor, *Environmental Science Director, Environmental Studies Director*  
Steven Vik, *Biochemistry Director*  
Pia Vogel, *Center for Drug Discovery, Design and Delivery Director*  
Stephen K. Wegren, *International and Area Studies Director*  
Alvina Bonnie Wheeler, *Medieval Studies Director*  
Cindy L. Havens, *Executive Assistant to the Dean*  
Kimberly Konkel, *Director of Recruiting and Communications*  
J. Jay Orenduff, *Director of Student Services and Academic Services*  
Courtney Roy, *Albert Schweitzer Fellowship Program Director*

## Dedman College Faculty

Gwendoline Aaron, *Senior Lecturer of French, M.A., North Texas*  
Adriana Aceves, *Senior Lecturer of Mathematics, M.S., Arizona*  
Alejandro Aceves, *Professor of Mathematics, Department of Mathematics Chair, Ph.D., Arizona*  
Andrea Adams, *Senior Lecturer of Chemistry, M.S., SMU*  
Michael A. Adler, *Associate Professor of Anthropology, SMU-in-Taos Executive Director, Ph.D., Michigan*  
Vladimir Ajaev, *Professor of Mathematics, Ph.D., Northwestern*

Michael Allred, *Lecturer of Spanish*, Ph.D., Wisconsin (Madison)

Omar Al-Rashdan, *Lecturer of Arabic, Lecturer of French*, M.A., North Texas

Brandy Alvarez, *Senior Lecturer of Italian*, M.A., Yale

Stephanie Amsel, *Lecturer of English, Discernment and Discourse Director*, M.A., Texas (San Antonio)

Kenneth J. Andrien, *Professor of History, Edmund J. and Louise W. Kahn Chair in History*, Ph.D., Duke

Joan Arbery, *Lecturer of English*, Ph.D., Notre Dame

Gizem Arlsan, *Lecturer of German*, Ph.D., Cornell

Stephen Arrowsmith, *Associate Professor in Earth Sciences, William B. Hamilton Chair in Earth Sciences*, Ph.D., University of Leeds

Sabri Ates, *Associate Professor of History*, Ph.D., New York

Helen Babbili, *Senior Lecturer of Chemistry*, M.S., Kakatiya

Durdana Balakishiyeva, *Lecturer of Physics*, Ph.D., Syracuse

Austin Baldwin, *Associate Professor of Psychology*, Ph.D., Minnesota

Nathan S. Balke, *Professor of Economics, Dedman Family Distinguished Professor in Economics*, Ph.D., Northwestern

G. William Barnard, *Professor of Religious Studies*, Ph.D., Chicago

Eric Barnes, *Professor of Philosophy*, Ph.D., Indiana

Andrea Barreiro, *Associate Professor of Mathematics*, Ph.D., New York

James Batchelor, *Lecturer in French*, M.A. Connecticut (Storrs)

Bianca Batista, *Lecturer of Biological Sciences*, Ph.D., Texas (Austin)

Raveendra N. Batra, *Professor of Economics*, Ph.D., Southern Illinois

Doran Bennett, *Assistant Professor of Chemistry*, Ph.D., California (Berkeley)

Steve Bergman, *Research Professor of Earth Sciences*, Ph.D., Princeton

Eric G. Bing, *Professor of Anthropology*, M.D., Harvard, Ph.D., California (Los Angeles)

Donna Binkowski, *Lecturer of Spanish*, Ph.D., Illinois (Urbana-Champaign)

Sarah Bogard, *Lecturer of Spanish*, Ph.D., Virginia

Damiano Bonuomo, *Lecturer of Italian*, M.A., Florida

Matthew Boulanger, *Lecturer of Anthropology*, Ph.D., Missouri (Columbia)

Holly Bowen, *Assistant Professor of Psychology*, Ph.D., Ryerson

Richard Bozorth, *Associate Professor of English*, Ph.D., Virginia

Debra Branch, *Senior Lecturer of Sociology*, Ph.D., Ohio

Teresa Brentegani, *Senior Lecturer of Italian*, B.A., Milan

Caroline Brettell, *University Distinguished Professor of Anthropology, Dedman Family Distinguished Professor of Anthropology, Department of Anthropology Chair*, Ph.D., Brown

Greg Brownderville, *Associate Professor of English, Creative Writing Director*, M.F.A., Mississippi

Paola Buckley, *Senior Lecturer of French*, M.A., New York

Ronald Butler, *Professor of Statistical Science, Charles F. Frenley Chair of Mathematics*, Ph.D., Michigan

John D. Buynak, *Professor of Chemistry*, Ph.D., Rice

Wei Cai, *Professor of Mathematics, Betty Clements Chair in Applied Mathematics*, Ph.D. Brown

Maryann Cairns, *Assistant Professor of Anthropology*, Ph.D., South Florida (Tampa)

Josephine Caldwell-Ryan, *Senior Lecturer of Women's and Gender Studies, Women's and Gender Studies Director*, Ph.D., SMU

James Calvert, *Senior Lecturer of Psychology*, Ph.D., Louisiana State

Nancy Campbell-Jeffrey, *Senior Lecturer of Sociology*, Ph.D., Texas (Austin)

Jing Cao, *Associate Professor of Statistical Science*, Ph.D., Missouri

Thomas W. Carr, *Associate Professor of Mathematics*, Ph.D., Northwestern

Timothy Cassidy, *Associate Professor of English*, Ph.D., New York

Mark A. Chancey, *Professor of Religious Studies*, Ph.D., Duke

John R. Chávez, *Professor of History*, Ph.D., Michigan  
Bo Chen, *Associate Professor of Economics*, Ph.D., Wisconsin-Madison  
Michael Chmielewski, *Associate Professor of Psychology*, Ph.D., Iowa  
Philippe Chuard, *Associate Professor of Philosophy*, Ph.D., Australian National  
J.H. Cullum Clark, *Lecturer of Economics*, Ph.D., SMU  
Karisa T. Cloward, *Associate Professor of Political Science*, Ph.D., Yale  
Thomas E. Coan, *Professor of Physics*, Ph.D., California (Berkeley)  
Richard W. Cogley, *Associate Professor of Religious Studies*, Ph.D., Princeton  
Olga L.V. Colbert, *Associate Professor of Spanish*, Ph.D., Stanford  
Marlen Y. Collazo, *Lecturer of Spanish*, M.A., Bilingual Education, SMU  
Jodi Cooley-Sekula, *Associate Professor of Physics*, Ph.D., Wisconsin  
Pamela Corley, *Associate Professor of Political Science, Law and Legal Reasoning Director*, J.D., Ph.D., Georgia  
Edward F. Countryman, *University Distinguished Professor of History*, Ph.D., Cornell  
Joshua Crabill, *Lecturer of Philosophy*, Ph.D., University of Southern California  
Kenneth Daley, *Senior Lecturer of Philosophy*, Ph.D., Colorado (Boulder)  
Simon Dalley, *Senior Lecturer of Physics*, Ph.D., Southampton  
Leslie DeArman, *Lecturer of Sociology*, M.A., Texas (Arlington)  
Rajat Deb, *Professor of Economics*, Ph.D., London School of Economics  
Allison McCarn Deiana, *Assistant Professor of Physics*, Ph.D. Illinois (Urbana-Champaign)  
Crista J. DeLuzio, *Associate Professor of History*, Ph.D., Brown  
Heather DeShon, *Associate Professor of Earth Sciences*, Ph.D., California (Santa Cruz)  
Klaus Desmet, *Professor of Economics, Ruth and Kenneth Altshuler Centennial Interdisciplinary Professor in Cities, Regions and Globalization*, Ph.D., Stanford  
Miroslava Detcheva, *Lecturer of Spanish*, M.A., Baylor  
Jill DeTemple, *Associate Professor of Religious Studies*, Ph.D., North Carolina (Chapel Hill)  
Carol Dickson-Carr, *Professor of Practice of English*, M.A., California (Santa Barbara)  
Darryl Dickson-Carr, *Professor of English, Department of English Chair*, Ph.D., California (Santa Barbara)  
Thomas DiPiero, *Professor of English, Professor of French*, Ph.D., Cornell  
Santosh R. D'Mello, *Professor of Biological Sciences*, Ph.D., Pittsburgh  
Janet Dodd, *Senior Lecturer of French*, M.A., Texas (Arlington)  
Hao Dong, *Assistant Professor of Economics*, MRes, London School of Economics  
Melissa Barden Dowling, *Associate Professor of History, Classical Studies Director*, Ph.D., Columbia  
David Doyle, *Adjunct Assistant Professor of History*, Ph.D., City University of New York  
Denise DuPont, *Professor of Spanish*, Ph.D., Yale  
Rita Economos, *Assistant Professor of Earth Sciences*, Ph.D., Southern California  
Maria Eguez, *Senior Lecturer of Spanish*, M.A., Maryland  
Douglas E. Ehring, *Professor of Philosophy, William Edward Easterwood Chair in Philosophy*, Ph.D., Columbia  
B. Sunday Eiselt, *Associate Professor of Anthropology*, Ph.D., Michigan  
Carl Johan Elverskog, *Professor of Religious Studies, Department of Religious Studies Chair, Dedman Family Distinguished Professor in Religious Studies*, Ph.D., Indiana  
Liljana Elverskog, *Senior Lecturer of Arabic*, Ph.D., Indiana  
Jeffrey A. Engel, *Professor of History*, Ph.D., Wisconsin (Madison)  
Katherine Carté Engel, *Associate Professor of History*, Ph.D., Wisconsin (Madison)  
Gianna Englert, *Assistant Professor of Political Science*, Ph.D., Georgetown  
Linda Evans, *Lecturer of ESL*, B.A., Graduate Certification, Texas (Dallas)  
Victoria Farrar-Meyers, *Lecturer of Political Science and Director of Tower Scholar's Program*, Ph.D., SUNY (Albany)

Susana Fernandez-Solera, *Senior Lecturer of Spanish*, Ph.D., Complutense de Madrid  
 Mahesh Fernando, *Lecturer of Statistical Science*, Ph.D., SMU  
 Anthony Fiorillo, *Research Professor of Earth Sciences*, Ph.D., Pennsylvania  
 Darrell Fisher, *Lecturer of ESL*, M.A., Texas (Arlington)  
 Justin Fisher, *Associate Professor of Philosophy*, Ph.D., Arizona  
 Keiko Flores, *Senior Lecturer of Japanese*, M.A.T., School for International Training  
 Maxime Foerster, *Associate Professor of French*, Ph.D., Michigan  
 Neil Foley, *Robert H. and Nancy Dedman Professor of History*, Ph.D., Michigan  
 Thomas B. Fomby, *Professor of Economics*, Ph.D., Missouri  
 Daniele Forlino, *Lecturer of Italian*, Ph.D., University of Wisconsin (Madison)  
 Dennis A. Foster, *Dedman Family Distinguished Professor of English, Daisy Deane Frensey Chair in English Literature*, Ph.D., California (Irvine)  
 Serge Frolov, *Professor of Religious Studies, Nate and Ann Levine Endowed Chair in Jewish Studies*, Ph.D., Claremont  
 Marie-Luise Gäetens, *Associate Professor of German*, Ph.D., Texas  
 Isaac Garcia-Bosch, *Assistant Professor of Chemistry, Harold A. Jeskey Endowed Chair in Chemistry*, Ph.D., Girona (Spain)  
 Jessica Garrick, *Assistant Professor of Sociology*, Ph.D., Michigan  
 Weihua Geng, *Associate Professor of Mathematics*, Ph.D., Michigan  
 Justin Michael Germain, *Lecturer of Latin*, M.A., SMU  
 Marcela Giraldo, *Lecturer of Economics*, Ph.D., Florida  
 Albert Edward Glasscock, *Associate Professor of Biological Sciences, C. Vincent Prothro Distinguished Chair of Biological Sciences*, Ph.D., California (Berkeley)  
 Datao Gong, *Research Professor*, Ph.D., Science and Technology (China)  
 Andrew R. Graybill, *Professor of History, Clements Center for Southwest Studies Director*, Ph.D., Princeton  
 Ezra Greenspan, *Professor of English, Edmund J. and Louise W. Kahn Chair in Humanities*, Ph.D., Brown  
 Robert T. Gregory, *Professor of Earth Sciences, Department of Earth Sciences Chair*, Ph.D., California Institute of Technology  
 Stephen Grollman, *Senior Lecturer of German*, Ph.D., Washington University  
 Caroline Grubbs, *Lecturer of French*, Ph.D., Pennsylvania  
 Jo Guldi, *Associate Professor of History*, Ph.D., California (Berkeley)  
 Thomas Hagstrom, *Professor of Mathematics*, Ph.D., California Institute of Technology  
 Rachel Hall, *Lecturer of Spanish*, M.A., Southern Mississippi  
 Rick Halperin, *Professor of Practice of Human Rights, Human Rights Director*, Ph.D., Auburn  
 Kenneth M. Hamilton, *Professor of History, Ethnic Studies Director*, Ph.D., Washington  
 Robert B. Hampson, *Associate Professor of Psychology*, Ph.D., Virginia  
 Ian R. Harris, *Associate Professor of Statistical Science*, Ph.D., Birmingham (United Kingdom)  
 Robert L. Harrod, *Associate Professor of Biological Sciences*, Ph.D., Maryland  
 Kathy Jean Hayes, *Professor of Economics*, Ph.D., Syracuse  
 Kathryn Hedrick, *Assistant Professor of Mathematics*, Ph.D., Rice  
 Daniel Heitjan, *Professor of Statistical Science, Department of Statistical Science Chair, Biostatistics Program Director*, Ph.D., Chicago  
 Stephen Hiltz, *Lecturer of Philosophy*, Ph.D., Texas (Austin)  
 Jeffrey Hobbie, *Lecturer of ESL*, M.A., Texas (Arlington)  
 Erin R. Hochman, *Associate Professor of History*, Ph.D., Toronto  
 Michael N. Holahan, *Associate Professor of English*, Ph.D., Yale  
 George W. Holden, *Professor of Psychology, Department of Psychology Chair*, Ph.D., North Carolina (Chapel Hill)

Kacy Hollenback, *Assistant Professor of Anthropology*, Ph.D., Arizona  
 James Hollifield, *Professor of Political Science, George F. and Ora Nixon Arnold Professor in American Statesmanship and Government, John Goodwin Tower Center for Political Studies Director*, Ph.D., Duke  
 Vanessa Hopper, *Senior Lecturer of English*, M.A., SMU  
 Matthew Hornbach, *Professor of Earth Sciences*, Ph.D., Wyoming  
 Susan Hornstein, *Senior Lecturer of Psychology*, Ph.D., SMU  
 K. Ann Horsburgh, *Assistant Professor of Anthropology*, Ph.D., Stanford  
 Werner Horsthemke, *Professor of Chemistry*, Ph.D., Free University of Brussels  
 Robert Howell, *Dedman Family Distinguished Professor of Philosophy, Department of Philosophy Chair*, Ph.D., Brown  
 Xiao Hu, *Professor of Practice of Chinese*, M.A., Beijing Normal  
 Nathan Hudson, *Assistant Professor of Psychology*, Ph.D., Illinois (Urbana-Champaign)  
 Constantin Icleanu, *Lecturer of Spanish*, Ph.D., University of Kentucky  
 Dennis S. Ippolito, *Professor of Political Science, Eugene McElvaney Chair in Political Science, Department of Political Science Chair, Public Policy Director*, Ph.D., Virginia  
 Bonnie F. Jacobs, *Professor of Earth Sciences*, Ph.D., Arizona  
 Calvin C. Jillson, *Professor of Political Science, Dedman Family Distinguished Professor of Political Science*, Ph.D., Maryland  
 Richard S. Jones, *Professor of Biological Sciences*, Ph.D., Wesleyan  
 Ernest N. Jouriles, *Professor of Psychology, Dedman Family Distinguished Professor of Psychology, G. Dale McKissick Endowed Professor in Psychology*, Ph.D., SUNY (Stony Brook)  
 Akihito Kamata, *Professor of Psychology*, Ph.D., Michigan  
 Jean Kazez, *Adjunct Assistant Professor of Philosophy*, Ph.D., University of Arizona  
 Robert L.P. Kehoe, III, *Professor of Physics*, Ph.D., Notre Dame  
 Macabe Keliher, *Assistant Professor of History*, Ph.D., Harvard  
 Matthew R. Keller, *Associate Professor of Sociology, Department of Sociology Interim Chair*, Ph.D., California (Davis)  
 Jill E. Kelly, *Associate Professor of History*, Ph.D., Michigan  
 Martine Kincaid, *Senior Lecturer of French*, Ph.D., Cincinnati  
 Lucas Kirkpatrick, *Assistant Professor of Sociology*, Ph.D., California (Davis)  
 Thomas J. Knock, *Professor of History, Department of History Chair*, Ph.D., Princeton  
 Joseph F. Kobylka, *Associate Professor of Political Science*, Ph.D., Minnesota  
 Chrystyna Kouros, *Associate Professor of Psychology*, Ph.D., Notre Dame  
 Elfi Kraka, *Professor of Chemistry, Department of Chemistry Chair*, Ph.D., Köln (Germany)  
 Marta Krough, *Lecturer of English*, Ph.D., North Texas  
 Sheri Kunovich, *Associate Professor of Sociology*, Ph.D., Ohio State  
 James Lake, *Associate Professor of Economics*, Ph.D., Johns Hopkins  
 John C. Lamoreaux, *Associate Professor of Religious Studies*, Ph.D., Duke  
 Shira Lander, *Senior Lecturer of Jewish Studies, Jewish Studies Director*, Ph.D., Pennsylvania  
 Allison Larkin, *Lecturer of Spanish*, M.A., Catholic University of America  
 Michael Lattman, *Professor of Chemistry*, Ph.D., City University of New York  
 Barry Lee, *Associate Professor of Mathematics*, Ph.D., Colorado  
 Verónica León, *Senior Lecturer of Spanish*, Ph.D., Texas (Austin)  
 Bruce Levy, *Senior Lecturer of English*, Ph.D., Brown  
 Alida Liberman, *Assistant Professor of Philosophy*, Ph.D., California (Dornsife)  
 Anne E. Lincoln, *Associate Professor of Sociology*, Ph.D., Washington State  
 Steven E. Lindquist, *Associate Professor of Religious Studies, Global and Regional Studies Director, Asian Studies Director*, Ph.D., Texas (Austin)  
 Alexander Lippert, *Associate Professor of Chemistry*, Ph.D., Pennsylvania

Chonghan Liu, *Research Assistant Professor of Physics*, M.S., Texas (Arlington)

Tiankuan Liu, *Research Professor of Physics*, Ph.D., Science and Technology (China)

Matthew Lockard, *Associate Professor of Philosophy*, Ph.D., California (Los Angeles)

Christopher Logan, *Senior Lecturer of Psychology*, Ph.D., Texas Tech

Rebecca Lommel, *Lecturer of ESL*, M.A., Texas (Austin)

Bianca Lopez, *Assistant Professor of History, W.R. Nicholson Professor of Medieval Studies*, Ph.D., Washington (St. Louis)

Zhong Lu, *Professor of Earth Sciences, Shuler-Foscue Chair in Earth Sciences*, Ph.D., Alaska (Fairbanks)

Paul Ludden, *Professor of Biological Sciences*, Ph.D., Wisconsin

Priscilla Lui, *Assistant Professor of Psychology*, Ph.D., Purdue

Karen Lupo, *Professor of Anthropology*, Ph.D., Utah

Michael Lusztig, *Professor of Political Science*, Ph.D., McGill

Rocio Madera, *Assistant Professor of Economics*, Ph.D., Minnesota

Maria Beatrice Magnani, *Professor of Earth Sciences*, Ph.D., Degli Studi di Perugia (Italy)

Luis Maldonado-Peña, *Associate Professor of Spanish*, Ph.D., Georgetown

Peter Malin, *Research Professor of Earth Sciences*, Ph.D., Princeton

Luigi Manzetti, *Professor of Political Science*, Ph.D., Iowa

Stefano Maranzana, *Lecturer of French and Italian*, Ph.D., Arizona

Maria Villar Martin, *Lecturer of Spanish*, M.A., Universidad de Valladolid (Spain)

Jennifer Matey, *Associate Professor of Philosophy*, Ph.D., SUNY (Stony Brook)

Devin Matthews, *Assistant Professor of Chemistry*, Ph.D., Texas (Austin)

Steven May, *Research Professor of Earth Sciences*, Ph.D., Arizona

Russell McConnell, *Lecturer of English*, Ph.D., Western Ontario

Mark D. McCoy, *Associate Professor of Anthropology*, Ph.D., California (Berkeley)

Alexis M. McCrossen, *Professor of History*, Ph.D., Harvard

Renee McDonald, *Professor of Psychology, Individualized Studies Director*, Ph.D., Houston

Leticia McDoniel, *Senior Lecturer of Spanish*, Ph.D., Washington (St. Louis)

Monnie McGee, *Associate Professor of Statistical Science, Master of Science in Data Science Program Co-Executive Director*, Ph.D., Rice

Mihan McKenna, *Research Professor of Earth Sciences*, Ph.D., SMU

Amnon Meir, *Professor of Mathematics*, Ph.D., Carnegie Mellon

Ana Acosta Melgarejo, *Lecturer of Spanish*, M.A. Wisconsin (Milwaukee)

Maria del Pilar Melgarejo, *Lecturer of Spanish*, Ph.D., Pittsburgh

David J. Meltzer, *Professor of Anthropology, Henderson-Morrison Chair in Anthropology, Dedman Family Distinguished Professor of Anthropology*, Ph.D., Washington

Alicia E. Meuret, *Professor of Psychology*, Ph.D., Hamburg

Joel Meyer, *Assistant Professor of Physics*, Ph.D., Texas (Austin)

Brandon Miller, *Adjunct Assistant Professor of History*, Ph.D., Michigan

Daniel Millimet, *Professor of Economics*, Ph.D., Brown

Lourdes Molina, *Senior Lecturer of Spanish*, Ph.D., Texas (Dallas)

Chul Moon, *Assistant Professor of Statistics*, M.A. Seoul National University (Korea)

Peter Moore, *Professor of Mathematics*, Ph.D., Rensselaer Polytechnic Institute

Sherri Morrison, *Lecturer of ESL*, M.Ed., North Texas

Daniel Moss, *Associate Professor of English*, Ph.D., Princeton

Mary Catherine Mueller, *Lecturer of English*, M.A., UT (Dallas)

Neely Myers, *Associate Professor of Anthropology*, Ph.D., Chicago

Pavel Nadolsky, *Associate Professor of Physics*, Ph.D., Michigan State

Jasper Neel, *Professor of English*, Ph.D., Tennessee

Michael Nesuda, *Lecturer of ESL*, M.M., North Texas

Judy Newell, *Senior Lecturer of Mathematics*, M.S., SMU  
 Beth S. Newman, *Associate Professor of English*, Ph.D., Cornell  
 Pauline Newton, *Senior Lecturer of English*, Ph.D., Tulsa  
 Rachel Ney, *Lecturer of French*, Ph.D., Northwestern  
 Hon Keung (Tony) Ng, *Professor of Statistical Science*, Ph.D., McMaster (Ontario)  
 Adam Norris, *Assistant Professor of Biology, Floyd B. James Trustee Professor*, Ph.D. Kansas  
 Scott Norris, *Associate Professor of Mathematics*, Ph.D., Northwestern  
 Eva Oberdörster, *Senior Lecturer of Biological Sciences*, Ph.D., Duke  
 Jennifer O'Brien, *Professor of Practice of Chemistry*, Ph.D., North Texas  
 Fredrick I. Olness, *Professor of Physics, Dedman Family Distinguished Professor of Physics*, Ph.D., Wisconsin  
 Daniel T. Orlovsky, *Professor of History*, Ph.D., Harvard  
 William C. Orr, *Professor of Biological Sciences, Department of Biological Sciences Chair, Natural Sciences Director*, Ph.D., Wayne State  
 Thomas Osang, *Associate Professor of Economics*, Ph.D., California (San Diego)  
 William Osborne, *Lecturer of ESL*, M.A., City University of New York  
 Dayna Oscherwitz, *Professor of French*, Ph.D., Texas  
 Omer Ozak, *Associate Professor of Economics*, Ph.D., Brown  
 Saltuk Ozerturk, *Associate Professor of Economics*, Ph.D., New York  
 Sally Parker-Ryan, *Adjunct Lecturer of Philosophy*, Ph.D., University of Sydney  
 Nia Parson, *Associate Professor of Anthropology*, Ph.D., Rutgers  
 Alberto Pastor, *Associate Professor of Spanish*, Ph.D., Madrid  
 Nathaniel Pattison, *Assistant Professor of Economics*, Ph.D., Virginia  
 Patricia Pisano, *Lecturer of English*, M.A., Cincinnati  
 Kristen Polster, *Lecturer of English*, Ph.D., North Texas  
 Wei Qu, *Professor of Practice of Chinese*, M.A., Beijing Normal  
 James E. Quick, *Professor of Earth Sciences*, Ph.D., California Institute of Technology  
 Svetlana Radyuk, *Research Associate Professor of Biological Sciences*, Ph.D., M. V. Lomonosov Moscow State (Russia)  
 Stefano Recchia, *Associate Professor of Political Science, Director of the Program in National Security and Defense, John Goodwin Tower Distinguished Chair in International Politics and National Security*, Ph.D., Columbia  
 Justin Reeves, *Assistant Professor of Political Science*, California (San Diego)  
 Douglas A. Reinelt, *Professor of Mathematics*, Ph.D., California Institute of Technology  
 Daniel Reynolds, *Associate Professor of Mathematics*, Ph.D., Rice  
 Helen Reynolds, *Senior Lecturer of Economics*, Ph.D., SMU  
 Thomas Ritz, *Professor of Psychology*, Ph.D., Hamburg  
 Stephen Robertson, *Senior Lecturer of Statistical Science*, Ph.D., SMU  
 Luke Robinson, *Associate Professor of Philosophy*, Ph.D., California (San Diego)  
 Ariel Ron, *Assistant Professor of History, Glenn Linden Endowed Professor*, Ph.D., California (Berkeley)  
 Christopher I. Roos, *Associate Professor of Anthropology*, Ph.D., Arizona  
 Timothy Rosendale, *Professor of English*, Ph.D., Northwestern  
 David Rosenfield, *Associate Professor of Psychology*, Ph.D., Texas  
 Santanu Roy, *University Distinguished Professor of Economics, Dedman Family Distinguished Professor of Economics, Department of Economics Chair*, Ph.D., Cornell  
 Jacob Rubin, *Assistant Professor of English, Lawrence and Catherine Perrine Endowed Chair in English*, M.F.A., Mississippi  
 Benno Rumpf, *Associate Professor of Mathematics*, Ph.D., Technische Universität Darmstadt (Germany)

Tomce Runceveski, *Assistant Professor of Chemistry*, Ph.D., Planck Institute for Solid State Research (Germany)

Elizabeth Russ, *Associate Professor of Spanish, Department of World Languages and Literatures Chair*, Ph.D., Columbia

Jayson Gonzales Sae-Saue, *Associate Professor of English*, Ph.D., Stanford

Timothy Salmon, *Professor of Economics*, Ph.D., Johns Hopkins

Rubén Sánchez-Godoy, *Associate Professor of Spanish*, Ph.D., Pittsburgh

Martha G. Satz, *Assistant Professor of English*, Ph.D., Texas (Dallas)

Joy Saunders, *Senior Lecturer of Spanish*, Ph.D., Texas (Austin)

Randall J. Scalise, *Senior Lecturer of Physics*, Ph.D., Pennsylvania State

Mark A.F. Schell, *Professor of Chemistry*, Ph.D., Toronto

Alicia Schortgen, *Lecturer of Sociology*, Ph.D., Texas (Dallas)

Nina Schwartz, *Associate Professor of English*, Ph.D., California (Irvine)

Ona Seaney, *Senior Lecturer of English*, M.A., New Mexico

Carol Seets, *Senior Lecturer of Mathematics*, M.A.T., Texas (Dallas)

Stephen Sekula, *Associate Professor of Physics*, Ph.D., Wisconsin

Emily Sharma, *Lecturer of English*, M.A., Columbia

Matthew Siegler, *Research Professor of Earth Sciences*, Ph.D., California (Los Angeles)

Andrea Laurent-Simpson, *Lecturer of Sociology*, Ph.D., Texas Woman's University

Sam Ross Sloan, *Lecturer of English*, M.A., SMU

Carolyn Smith-Morris, *Associate Professor of Anthropology, Health and Society Program Director*, Ph.D., Arizona

David Y. Son, *Professor of Chemistry*, Ph.D., Massachusetts Institute of Technology

Michael Sposi, *Assistant Professor of Economics*, Ph.D., Iowa

Harold Stanley, *Professor of Political Science, Geurin-Pettus Distinguished Chair in American Politics and Political Economy*, Ph.D., Yale

Lori Ann Stephens, *Lecturer of English*, Ph.D., Texas (Dallas)

Nicolas Sternsdorff-Cisterna, *Assistant Professor of Anthropology*, Ph.D., Harvard

Brandilyn Stigler, *Associate Professor of Mathematics*, Ph.D., Virginia Tech

S. Lynne Stokes, *Professor of Economics, Dedman Family Distinguished Professor of Statistical Science*, Ph.D., North Carolina (Chapel Hill)

Teresa Strecker, *Senior Lecturer of Biological Sciences*, Ph.D., California (Los Angeles)

Ryszard Stroynowski, *Professor of Physics, Department of Physics Chair*, Ph.D., Geneva (Switzerland)

H. Troy Stuckey, *Research Professor of Earth Sciences*, Ph.D., North Texas

Brian W. Stump, *Professor of Earth Sciences, Claude C. Albritton, Jr., Chair in Earth Sciences, Dedman Family Distinguished Professor in Earth Sciences*, Ph.D., California (Berkeley)

Rajani Sudan, *Professor of English*, Ph.D., Cornell

Benjamin A. Tabak, *Assistant Professor of Psychology*, Ph.D., Miami

Naomi Tabak, *Clinical Assistant Professor of Psychology*, Ph.D., Miami

Neil J. Tabor, *Professor of Earth Sciences, Environmental Science Director, Environmental Studies Director*, Ph.D., California (Davis)

Hiroki Takeuchi, *Associate Professor of Political Science*, Ph.D., California (Los Angeles)

Peng Tao, *Assistant Professor of Chemistry*, Ph.D., Ohio State

Johannes Tausch, *Professor of Mathematics*, Ph.D., Colorado State

Hervé Tchumkam, *Associate Professor of French*, Ph.D., Pennsylvania

Brad Thompson, *Associate Professor of Philosophy*, Ph.D., Arizona

Thierry Tirado, *Senior Lecturer of French*, M.A., Texas (Arlington)

Minh Binh Tran, *Assistant Professor of Mathematics*, Ph.D., Département de Mathématiques, Institut Galilée, Université (Paris)

Richard Treat, *Lecturer of English*, M.A., University of North Texas  
 Nicolay Tsarevsky, *Associate Professor of Chemistry*, Ph.D., Carnegie Mellon  
 Robert Viator, *David W. Starr Visiting Assistant Professor in Mathematics*, Ph.D., Louisiana State University  
 Roberto Vega, *Associate Professor of Physics*, Ph.D., Texas  
 Steven B. Vik, *Professor of Biological Sciences, Biochemistry Director, Dedman Family Distinguished Professor in Biological Sciences*, Ph.D., Oregon  
 Pia Vogel, *Professor of Biological Sciences, Dedman Family Distinguished Professor of Biological Sciences, Center for Drug Discovery, Design and Delivery Director*, Ph.D., Kaiserslautern (Germany)  
 Gabriela Vokic, *Associate Professor of Spanish*, Ph.D., Purdue  
 Xinlei (Sherry) Wang, *Professor of Statistical Science*, Ph.D., Texas  
 Stephen K. Wegren, *Professor of Political Science, International and Area Studies Director*, Ph.D., Columbia  
 Steven Weisenburger, *Professor of English, Professor of Humanities, Jacob and Frances Sanger Mossiker Endowed Chair*, Ph.D., Washington  
 Kathleen A. Wellman, *Dedman Family Distinguished Professor of History*, Ph.D., Chicago  
 Elizabeth Wheaton, *Senior Lecturer of Economics*, Ph.D., Temple  
 Alvina Bonnie Wheeler, *Associate Professor of English, Medieval Studies Director*, Ph.D., Brown  
 Emma Wilson, *Assistant Professor of English*, Ph.D., University of St. Andrews (Scotland)  
 J. Matthew Wilson, *Associate Professor of Political Science*, Ph.D., Duke  
 Stephanie Wilson, *Assistant Professor of Psychology*, Ph.D., Pennsylvania  
 Alisa J. Winkler, *Research Professor of Earth Sciences*, Ph.D., SMU  
 Dale A. Winkler, *Research Professor of Earth Sciences*, Ph.D., Texas (Austin)  
 Laurence H. Winnie, *Senior Lecturer of History*, Ph.D., Michigan  
 John Wise, *Associate Professor of Biological Sciences*, Ph.D., Rochester  
 Angela Wood, *Lecturer of English*, M.A., SMU  
 Zhihao Wu, *Assistant Professor of Biological Sciences*, Ph.D., Tsinghua University (China)  
 Yan Xia, *Senior Lecturer of Chinese*, M.A., Beijing Language  
 Sheng Xu, *Associate Professor of Mathematics*, Ph.D., Cornell  
 Crayton J. Yapp, *Professor of Earth Sciences*, Ph.D., California Institute of Technology  
 Jingbo Ye, *Professor of Physics*, Ph.D., Swiss Federal Institute of Technology  
 Yunkai Zhou, *Associate Professor of Mathematics*, Ph.D., Rice  
 Tatiana Zimakova, *Lecturer of Russian*, Ph.D. Russian Academy of Sciences, Institute of International Economic and Political Studies  
 Pierre Zippi, *Research Professor of Earth Sciences*, Ph.D., Toronto  
 Brian D. Zoltowski, *Associate Professor of Chemistry*, Ph.D., Cornell  
 Morteza Zoroufchian, *Lecturer of ESL*, M.A., Allameh Tabatabaei (Tehran)  
 Alicia Zuese, *Associate Professor of Spanish*, Ph.D., Columbia

## **Dedman College Emeritus Faculty**

Peter J. Bakewell, *Professor Emeritus of History*, Ph.D., Cambridge  
 U. Narayan Bhat, *Professor Emeritus of Statistical Science*, Ph.D., Western Australia  
 Edward Robert Biehl, *Professor Emeritus of Chemistry*, Ph.D., Pittsburgh  
 Gordon Eastridge Birrell, *Professor Emeritus of German*, Ph.D., Stanford  
 David D. Blackwell, *Professor Emeritus of Earth Sciences*, Ph.D., Harvard  
 James O. Breeden, *Professor Emeritus of History*, Ph.D., Tulane  
 James E. Brooks, *Professor Emeritus of Geological Sciences*, Ph.D., Washington

Alan S. Brown, *Professor Emeritus of Psychology*, Ph.D., Northwestern  
 Christine E. Buchanan, *Professor Emeritus of Biological Sciences*, Ph.D., Chicago  
 Kenneth Lane Carroll, *Professor Emeritus of Religious Studies*, Ph.D., Duke  
 Bradley Kent Carter, *Professor Emeritus of Political Science*, Ph.D., California (Berkeley)  
 Anthony J. Cortese, *Professor Emeritus of Sociology*, Ph.D., Notre Dame  
 Timothy Wood Crusius, *Professor Emeritus of English*, Ph.D., Southern California  
 Steven V. Daniels, *Professor Emeritus of English*, Ph.D., Harvard  
 Robert Clay Davis, *Professor Emeritus of Mathematics*, Ph.D., Tulane  
 Ronald L. Davis, *Professor Emeritus of History*, Ph.D., Texas (Austin)  
 Vincenzo E. DeNardo, *Professor Emeritus of Italian*, Ph.D., California (Los Angeles)  
 Wonmo Dong, *Professor Emeritus of Political Science*, Ph.D., Georgetown  
 Ann M. Early, *Lecturer Emeritus of English*, M.A.T., Harvard  
 James Gerhardt, *Professor Emeritus of Political Science*, Ph.D., Harvard  
 Ian Gladwell, *Professor Emeritus of Mathematics*, Ph.D., Manchester

Samuel A. Zimmerman, *Professor Emeritus of Spanish*, Ph.D., Florida

# **Dedman School of Law**

## **A Message from the Dean**

Welcome to the SMU Dedman School of Law! We are absolutely delighted that you are here and hope this catalog will give you some idea of the quality, richness and excitement of a legal education at Southern Methodist University. With an outstanding student body, a faculty with superb credentials and a beautiful tree-lined campus just minutes from the heart of vibrant downtown Dallas, the Dedman School of Law seeks to give each student a personal educational experience of the highest order. In addition to the outstanding J.D. program, the school has some of the oldest and most outstanding graduate legal programs in the country, including a Master of Laws in taxation, a Master of Laws in comparative and international law, a General Master of Laws and a Doctor of the Science of Law. We also offer joint degree programs with other colleges in the University, including the J.D./M.B.A. program with the SMU Cox School of Business.

As you will see in the following pages, the school has a diverse and highly talented faculty whose members are dedicated to teaching. Not only do they hold stellar academic credentials, but virtually all of them also had practical experience before entering their teaching careers. Consequently, they provide the invaluable link between the theory of classroom instruction and the reality of legal practice. Dedman School of Law enjoys a national and international reputation, with its graduates practicing in every state in the union and in many foreign countries.

We take pride in offering our students a total educational experience. Students have the opportunity to participate in four respected law journals; a summer program in Oxford, England; ten legal clinics; and many externship programs. While our curriculum is extremely rich, we are still small enough to take a personal interest in each student. The school's Law Quadrangle provides a beautiful setting for learning and includes the Underwood Law Library, a modern and comprehensive research facility equipped with state-of-the-art instructional technologies. Our Office of Career Services sponsors numerous programs throughout the year, including on-campus interview programs and off-campus job fairs, seminars and workshops, to provide a broad range of employment opportunities.

Our student body is diverse, intelligent and inquisitive. Students come from a variety of backgrounds and from all over the United States. The student body is enriched by the addition of students from many other countries who participate in the graduate legal programs. Upon graduation, students enter private practice, government practice and the corporate sector, or they may engage in public interest work, serve as prosecutors or defense attorneys, or obtain judicial clerkships.

I hope that you will visit our campus, interact with our students and experience SMU Dedman School of Law in a way that the pages of a catalog can only suggest. We wish you the best in your pursuit of a legal career.

JENNIFER M. COLLINS  
Judge James Noel Dean and  
Professor of Law

# Dedman School of Law: Academic Calendar

## Fall Term 2019

**August 19, Monday:** Classes begin

**August 23, Friday:** Last day to enroll, add a course or drop a course without tuition billing while remaining enrolled for the term

**August 30, Friday:** Last day to drop a course without academic record (tuition charges apply). Last day to withdraw from the University without academic record (withdrawal refund schedule applies). See Bursar's website for more information.

**September 2, Monday:** University Holiday, Labor Day

**October 29, Tuesday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**November 25, Monday:** Classes end; Last day to drop a course or withdraw from University with a grade of "W". (Permission from instructor)

**November 26, Tuesday:** Reading Day

**November 27, Wednesday:** No classes

**November 28–29, Thursday–Friday:** University Holidays, Thanksgiving

**December 2, Monday:** Reading Day

**December 3, Tuesday:** Examinations begin

**December 13, Friday:** Examinations end

**December 21, Saturday:** Official close of term, degree conferral date and December Commencement Convocation

**December 23–January 1, Monday–Wednesday:** University Holidays, Winter Break

## Spring Term 2020

**January 9, Thursday:** Classes begin

**January 15, Wednesday:** Last day to enroll, add a course or drop a course without tuition billing while remaining enrolled for the term

**January 20, Monday:** University Holiday, Birthday of Martin Luther King, Jr.

**January 23, Thursday:** Last day to drop a course without academic record (tuition charges apply). Last day to withdraw from the University without academic record (withdrawal refund schedule applies). See Bursar's website for more information.

**March 16–20, Monday–Friday:** Spring Break

**March 26, Thursday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**April 10, Friday:** University Holiday, Good Friday

**April 23, Thursday:** Follow Monday class schedule

**April 24, Friday:** Classes end; Last day to drop a course or withdraw from University with a grade of "W". (Permission from Instructor)

**April 27, Monday:** Reading Day

**April 28, Tuesday:** Examinations begin

**May 8, Friday:** Examinations end

**May 16, Saturday:** Official close of term, degree conferral date, Commencement Convocation and Dedman School of Law Hooding Ceremony

## May Term 2020

**May 11, Monday:** Classes begin

**May 12, Tuesday:** Last day to add any hours to your schedule; last day to drop without receiving a grade of "W"

**May 25, Monday:** University Holiday, Memorial Day

**May 31, Sunday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**June 9, Tuesday:** Classes end; Last day to drop a course or withdraw from University with a grade of "W". (Permission from instructor)

**June 10 - 11, Wednesday-Thursday:** Reading Days

**June 12, Friday:** Final Exams

## Summer Term 2020

**May 18, Monday:** Classes begin

**May 21, Thursday:** Last day to add any hours to your schedule; last day to drop without receiving a grade of "W"

**May 25, Monday:** University Holiday, Memorial Day

**June 20, Saturday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**July 3, Friday:** University Holiday, Independence Day

**July 6, Monday:** Classes end; Last day to drop a course or withdraw from University with a grade of "W". (Permission from instructor)

**July 7, Tuesday:** Reading Day

**July 8, Wednesday:** Examinations begin

**July 10, Friday:** Examinations end

**August 4, Tuesday:** Official close of term and degree conferral date

## August Term 2020

*Each August Term course may have unique start and end dates within the August 3-13 term to accommodate the particular needs of the course.*

**August 3, Monday:** Classes begin

**August 3, Monday:** Last day to add any hours to your schedule; last day to drop without receiving a grade of "W"

**August 10, Monday:** 60% point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**August 11, Tuesday:** Classes end; last day to drop a course or withdraw from University with a grade of "W". (Permission from instructor.)

**August 12, Wednesday:** Reading Day

**August 13, Thursday:** Final Exams

April Michele Oswald, *Administrative Assistant, Faculty*  
Sharon Tabbert, *Administrative Assistant, Faculty*  
Carolyn Yates, *Administrative Assistant, Faculty*  
Gloria Zapata, *Administrative Assistant, Legal Clinics*

## Faculty

**Roy Ryden Anderson**, *Vinson & Elkins Fellow and Professor of Law*, B.A., 1966, Texas Christian University; J.D., 1969, Southern Methodist University; LL.M., 1975, Yale University. A former editor of the *Journal of Air Law and Commerce*, Professor Anderson has served at Dedman School of Law as executive director of the criminal justice program, assistant dean, associate dean and senior associate dean for academic affairs. He teaches in the areas of contracts, commercial law and commercial remedies. He is the author of numerous law journal articles and a two-volume treatise entitled *Damages Under the Uniform Commercial Code* (1988; 2d ed. 2003). He also is co-author of three volumes of the Texas Litigation Guide and of Anderson, Bartlett and East's *Texas Uniform Commercial Code Annotated* (2002, 2015). Professor Anderson is a life member of the American Law Institute and a life fellow of the Texas Bar Foundation. He has served as a member of the American Law Institute Consultative Group on the revision of Uniform Commercial Code Article 2 and as a commentator for the American Bar Association subcommittee of advisers to the U.C.C. Article 2 Drafting Committee. Professor Anderson was a member of the State Bar of Texas committee that prepared the bill analysis of U.C.C. Article 1 for the Texas Legislature and was the co-chair and reporter for the Texas Bar committee that prepared a bill analysis of the proposed amendments to U.C.C. Articles 2 and 2A for the Texas Legislature.

**Hillel J. Bavli**, *Assistant Professor of Law*, B.A., 2003, Boston University; J.D., 2006, Fordham University School of Law; LL.M., 2011, Harvard Law School; M.A. (Statistics), 2013, Harvard University Graduate School of Arts and Sciences; Ph.D. (Statistics in Law and Government), 2017, Harvard University Graduate School of Arts and Sciences. Professor Bavli's teaching and scholarship interests are in the fields of evidence, torts, complex litigation, law and economics, and empirical legal studies. He is particularly interested in applications of statistics to law, including the use of experimental and quantitative methods to evaluate law-related interventions and applications of probability theory, Bayesian analysis, sampling, and causal inference to study and improve the law. An experienced litigation attorney, Professor Bavli has practiced in the fields of complex commercial litigation, antitrust law, and criminal law, most recently at the firms Akin Gump Strauss Hauer & Feld LLP and Boies Schiller Flexner LLP. Prior to joining SMU's faculty, Professor Bavli designed and taught a seminar course on the economic analysis of law in the Department of Economics at Harvard University. He received numerous awards for distinction in teaching for the course. He has completed a Fulbright Fellowship studying game theory in Jerusalem, Israel, as well

as short-term clerkships at the Supreme Court of India and the Supreme Court of Rwanda. He recently held a visiting fellowship at the Yale Law School Center for Private Law, and he is a fellow at the Harvard Institute for Quantitative Social Science.

**Lackland H. Bloom, Jr.**, *Larry and Jane Harlan Senior Research Fellow and Professor of Law*, B.A., 1970, Southern Methodist University; J.D., 1973, University of Michigan. A member of Phi Beta Kappa and the Order of the Coif, as well as administrative editor of the Michigan Law Review, Professor Bloom was a law clerk to Chief Judge John R. Brown of the U.S. Court of Appeals for the Fifth Circuit. He later was associated with the Washington firm of Wilmer, Cutler & Pickering. A specialist in constitutional law, he has published two books with the Oxford University Press. The first, *Methods of Interpretation: How the Supreme Court Reads the Constitution*, published in 2009, received the Godbey Lecture Series Authors Award in 2010. The second book, *Do Great Cases Make Bad Law?*, was published in 2014. Professor Bloom has published articles concerning affirmative action, copyright and free speech, defamation and offensive speech. He has recently delivered talks to the Bill of Rights and the Intellectual Property sections of the Texas Bar. He also delivered a four-part Godbey Lecture Series entitled "Constitutional Law 101: One Hundred and Twenty-five Years of Supreme Court Precedent in Four Hours." He teaches courses in constitutional law, freedom of speech and religion, and copyright.

**Chante Brantley**, *Director of The VanSickle Family Law Clinic and Assistant Clinical Professor*, B.S., 1991, Texas Woman's University; M.S.S.W., The University of Texas, J.D., 2006, The University of Texas School of Law. Ms. Prox's work in The VanSickle Family Law Clinic encompasses teaching and supervising students who will represent low-income residents in matters such as divorce, paternity actions, custody and visitation, and child and spousal support. Prior to joining the faculty at SMU Dedman School of Law, Ms. Prox was managing attorney and mediator at Barnes Prox Law, PLLC, which focused exclusively on family law matters. She began her career as a Child Protective Services caseworker, transitioning to law working as a legislative aide to Texas State Senator Royce West. Ms. Prox's experiences as a caseworker helped shaped the health and human services legislation she spearheaded for Senator West which enhanced the lives of many families across Texas. Most notably, she recommended the "Grandparents' Bill" which provides financial assistance to grandparents raising their grandchildren with the goal of preserving family ties. Tenets of this bill have expanded to federal kinship care legislation.

**Dale Carpenter**, *Judge William Hawley Atwell Chair of Constitutional Law and Professor of Law*, B.A., 1989, Yale College; J.D., 1992, University of Chicago Law School. Professor Carpenter teaches and writes in the areas of constitutional law, the First Amendment, and LGBT rights and the law. Professor Carpenter's book, *Flagrant Conduct: The Story of Lawrence v. Texas* (Norton, 2012), was chosen a Notable book for 2012 by the New York Times, and garnered favorable reviews in the Times, the New Yorker, The New York Review of Books, and many other journals and newspapers. Professor Carpenter clerked for the Honorable Edith H. Jones of the United States Court of Appeals for the Fifth Circuit from 1992 to 1993. After his clerkship, he practiced at Vinson & Elkins in Houston and at Howard, Rice, Nemerovski, Canady, Falk & Rabkin in San Francisco. From 2000 to 2016, he taught at the University of Minnesota Law School, where he was a Distinguished University Teaching Professor and held the law school's chair in Civil Rights law. Carpenter is a member of the state bars of Texas and California, and of the American Law Institute. Since 2004, he has served as an editor of Constitutional Commentary. Since 2005, he has been an active blogger on the popular legal blog, the Volokh Conspiracy, which is hosted by the Washington Post.

**Michaela Cashen**, *Clinical Professor of Legal Research, Writing and Advocacy*, B.A., 1981, Augustana College; J.D., 1984, University of Illinois. Prior to attending law school, Ms. Cashen was a practicing registered nurse in Illinois. After graduation from law school, she practiced law as an associate with the Dallas firm of Johnson, Bromberg & Leeds, where she focused on commercial litigation, employment law and construction law. She then served as in-house counsel with Texas Instruments, focusing primarily on

real estate law. Before joining the SMU full-time faculty, she taught legal software and online legal research for a number of years in Dallas. At SMU, she currently teaches primarily in the areas of legal research and legal writing. In addition to her first-year legal research and writing classes, Ms. Cashen teaches a graduate course on perspectives of the American legal system for international Master of Laws students. She also teaches a Texas Bar Exam essay-writing workshop twice a year, prior to both the February and July bar exams.

**Anthony J. Colangelo**, *Professor of Law*, B.A., 2000, (Phi Beta Kappa) Middlebury College; J.D., 2003, (Order of the Coif) Northwestern University; LL.M., 2006, Columbia University; J.S.D., 2009, Columbia University. Professor Colangelo's scholarly and teaching interests are in the fields of conflict of laws, civil procedure, U.S. foreign relations law, and private and public international law. His scholarship has been selected multiple times for presentation at the prestigious Stanford/Yale Junior Faculty Forum and has been published in top general and international scholarly journals. His articles have also been cited and quoted in a number of high-profile cases at the U.S. Court of Appeals and U.S. District Court levels as well as in a recent U.S. Military Commission ruling regarding, among other things, the extraterritorial application of U.S. law implementing the U.N. Torture Convention to Chuckie Taylor (son of former Liberian dictator Charles Taylor), the proper exercise of universal jurisdiction in relation to Alien Tort Statute claims by South African plaintiffs against corporations alleged to have been complicit in apartheid-era abuses by the South African government, and Salim Hamdan's (Osama bin Laden's driver) challenges to U.S. Military Commission jurisdiction. Prior to coming to SMU, Professor Colangelo held an associate-in-law research and teaching fellowship at Columbia Law School. Before Columbia, he worked as a litigation associate at the law firm Cleary Gottlieb Steen and Hamilton LLP in the New York and Rome offices. Following law school, where he was notes editor of the *Northwestern University Law Review*, Professor Colangelo clerked for the Honorable Ralph K. Winter, U.S. Court of Appeals for the Second Circuit.

**James Coleman**, *Associate Professor of Law*, B.A., 2001, Harvard College; J.D., 2007, Harvard Law School. Professor Coleman comes to SMU from the University of Calgary, where he taught at both the law school and the business school. Before Calgary, he served on the faculty at Harvard Law School as a Climenko Fellow and Lecturer on Law. Beginning this fall, he will teach oil and gas. He has earned two degrees from Harvard University — a J.D. (*cum laude*) and B.A. in biology (*magna cum laude* with highest honors in field). Upon graduation from law school, he served as clerk for Eighth Circuit Judge Steve Colloton, and then practiced energy, environmental, and appellate law as an associate in the Washington, D.C., firm of Sidley Austin LLP for three years. Coleman's scholarship addresses regulation of North American energy companies, focusing on how countries account for and influence regulation of fuel and electricity in their trading partners and how global energy companies respond to competing pressures from investors and regulators in multiple jurisdictions. He publishes the *Energy Law Professor* blog and you can follow him on Twitter at @energylawprof.

**Jennifer M. Collins**, *Judge James Noel Dean and Professor of Law*, B.A., 1987, Yale University; J.D. 1991, Harvard University. Dean Collins graduated magna cum laude from Harvard Law School and served as the notes editor of the *Harvard Law Review*. After graduation, she served as a law clerk to the Honorable Dorothy Nelson of the U.S. Court of Appeals for the Ninth Circuit. Dean Collins served as an attorney adviser in the Office of Legal Counsel in the U.S. Department of Justice and as an assistant U.S. attorney for the District of Columbia, where she specialized in homicide cases. She also worked in private practice at Miller Cassidy Larroca & Lewin (now Baker Botts) and Sidley Austin. Prior to joining the SMU faculty, Dean Collins was at the Wake Forest University School of Law, where she taught criminal law, criminal procedure, family law, and gender and the law, and won every teaching award offered by the law school. She also served as vice provost for the university. Dean Collins' articles have appeared in the *Yale Law Journal*, *Northwestern University Law Review*, *Iowa Law Review* and many others. Her first book,

*Privilege or Punish: Criminal Justice and the Challenge of Family Ties* (coauthored with Dan Markel and Ethan Leib), was published by Oxford University Press in 2009.

**Nathan Cortez**, *Adelfa Botello Callejo Endowed Professor in Leadership and Latino Studies and Professor of Law*, B.A., 1999, University of Pennsylvania; J.D., 2002, Stanford University. Professor Cortez teaches and writes on health law, food and drug law, administrative law, and legislation. His research focuses on the challenges of regulating emerging markets in health care and biotechnology. For example, he has become one of the world's leading legal scholars on medical tourism and cross-border health care. He also writes extensively on Food and Drug Administration regulation, including First Amendment challenges, alternative forms of regulation such as adverse publicity and the ways the FDA addresses new technologies such as mobile medical applications. Professor Cortez has presented his research to regulators, at industry conferences, to professional societies and at law schools around the country including Harvard, North Carolina, Texas, Wisconsin and Yale. He also provides frequent legal commentary to the media, including the *Chicago Tribune*, CNN, the *Huffington Post*, the *Los Angeles Times*, NPR and The Associated Press. Before joining SMU, Professor Cortez practiced with the Washington, D.C., law firm Arnold & Porter, representing clients in regulatory matters, with a special emphasis on health care fraud and abuse, FDA enforcement, health privacy, and the Medicare and Medicaid programs. He represented clients in litigation, in transactions, during agency enforcement actions and during congressional investigations and hearings. While at Arnold & Porter, Professor Cortez litigated pro bono cases with the Mexican American Legal Defense and Educational Fund, and was a board member of the D.C. Hispanic Bar Foundation. In 2006, he was a visiting assistant professor at Rutgers-Camden Law School. He received his B.A. from the University of Pennsylvania and J.D. from Stanford University.

**Ruth A. Cross**, *Director and Clinic Professor of Legal Research, Writing and Advocacy*, B.A., 1975, University of Texas at Austin; J.D., 1978, University of Texas School of Law. After graduation, Ms. Cross worked in the Dallas offices of Akin, Gump, Strauss, Hauer, & Feld and Arter & Hadden as a litigator, with an emphasis on appellate practice, and she clerked for the Dallas Court of Appeals. She is heavily involved in creating the research project that serves as the basis for the Jackson Walker Moot Court Oral Advocacy Competition. She also serves as faculty adviser to the Jackson Walker Moot Court Board. Ms. Cross teaches courses in Texas pretrial procedure, Texas trial and appellate procedure, and legal research, writing and advocacy. She taught legal research and writing as an adjunct at SMU during 1984–99 before joining the faculty on a full-time basis.

**Gregory S. Crespi**, *Homer R. Mitchell Endowed Professor in Commercial and Insurance Law and Professor of Law*, B.S., 1969, Michigan State University; M.S., 1974, George Washington University; Ph.D., 1978, University of Iowa; J.D., 1985, Yale Law School. Prior to joining the faculty at SMU, Professor Crespi served in the White House as the senior counsel for the Council of Economic Advisers under the Reagan and Bush administrations. Professor Crespi also practiced law for several years with the firms of Debevoise & Plimpton and Davis, Hockenberg specializing primarily in securities law. He is the author of two books on securities law and of a number of articles on law and economics, securities regulation, contract law, disability rights and other topics. Professor Crespi teaches in the areas of contract law, law and economic analysis, and business enterprise.

**William V. Dorsaneo, III**, *Justice John and Lena Hickman Distinguished Faculty Fellow and Professor of Law*, B.A., 1967, University of Pennsylvania, J.D., 1970, University of Texas. A member of Phi Beta Kappa, grand chancellor of the Order of Chancellors and a member of the Order of the Coif, Professor Dorsaneo was a litigation specialist in Dallas after graduation from law school. He is the principal author of the 26-volume *Texas Litigation Guide* published by Matthew Bender & Company and the co-author of the five-volume *Texas Civil Trial Guide*, as well as three casebooks entitled *Cases and Materials on Civil Procedure*, *Texas Pre-Trial Litigation* and *Texas Trial & Appellate Litigation*, and several other volumes

on Texas litigation. He is board certified in civil appellate law, an active member of the Advisory Committee to the Texas Supreme Court and a member of the American Law Institute.

**Beverly C. Duréus**, *Clinical Professor of Legal Research, Writing and Advocacy*, B.A., 1983, Drake University; J.D., 1986, Drake University Law School; Th.M., 1999, Dallas Theological Seminary; D.Min. 2016, SMU Perkins School of Theology. Ms. Duréus teaches legal research, writing and advocacy, and a course on federal judicial externships. Her scholarship interests and teaching experiences also include civil procedure, evidence, alternative dispute resolutions and an integration of religion and jurisprudence. Ms. Duréus serves as a co-executive editor of *The International Lawyer* and *The Year in Review*. At Drake University Law School, Ms. Duréus was a member of the National Order of the Barristers and Phi Alpha Delta, served as the chair of the Moot Court Board and obtained numerous awards for oral advocacy. Prior employment experiences include working for the chief judge of the U.S. District Court for the Southern District of Iowa, associate professor of law at Drake Law School, shareholder at Chapman & Reese P.C., chair of the Ecclesiastical Section at White & Wiggins LLP, and associate at Gardere & Wynne LLP. She is the president and founder of Katallasso Ministries International and a faculty consultant, and former faculty adviser to the Black Law Students Association and former faculty adviser to the Christian Legal Society. She is also the former president of the Dallas Association of Black Women Attorneys and a member of the William MacTaylor American Inn of Court, Dallas Bar Foundation fellow, Board of Counselors at Drake Law, Who's Who in American Law Schools, American Association of Law Schools, J.L. Turner Legal Association, and Dallas and American bar associations.

**Jeffrey M. Gaba**, *M.D. Anderson Foundation Endowed Professor in Health Law and Professor of Law*, B.A., 1972, University of California, Santa Barbara; J.D., 1976, Columbia University; M.P.H., 1989, Harvard University. Professor Gaba specializes in environmental law. In law school, Professor Gaba was notes and comments editor of the *Columbia Journal of Environmental Law*. Following law school, he was a law clerk to Chief Justice Edward Pringle of the Colorado Supreme Court. Prior to joining the faculty at SMU, he was an attorney with the Environmental Defense Fund and with the Office of General Counsel of the U.S. Environmental Protection Agency. Professor Gaba has published numerous articles on environmental law. He is the author of *Environmental Law* (West Black Letter Series) and co-author of the treatise *The Law of Solid Waste, Pollution Prevention and Recycling*. He teaches environmental law and related courses, property and administrative law.

**Joanna L. Grossman**, *Ellen Solender Endowed Chair in Women and the Law and Professor of Law*, B.A., 1990, Amherst College; J.D. 1994, (Order of the Coif) Stanford University. She teaches in the areas of gender law, family law, and trusts and estates. She is an expert in sex discrimination law and has written extensively about educational and workplace equality, with a special focus on issues such as sexual harassment and pregnancy discrimination. In her most recent book, *Nine to Five: How Sex, Gender, and Sexuality Continue to Define the American Workplace* (Cambridge 2016), Professor Grossman provides a lively and accessible discussion of contemporary cases and events that show it is far too soon to pronounce the triumph of women's work-place equality. She is the co-author of *Gender and Law: Theory, Doctrine, Commentary* (7th ed. 2016), a sex discrimination casebook, and of *Inside the Castle: Law and the Family in 20th Century America* (Princeton 2011), a comprehensive social history of American family law. She is the coeditor of *Gender Equality: Dimensions of Women's Equal Citizenship* (Cambridge University Press 2009), an interdisciplinary anthology that explores persistent gaps between formal commitments to gender equality and the reality of women's lives, and *Family Law in New York*, a guide to domestic relations law in a state that is a "leader" with few followers. A graduate with distinction from Stanford Law School, Professor Grossman served as the articles development editor of the *Stanford Law Review* and was elected to Order of the Coif. She served as a law clerk to Judge William A. Norris of the United States Court of Appeals for the Ninth Circuit before spending a year as staff counsel at the National Women's Law Center

in Washington, D.C., as recipient of the Women's Law and Public Policy Fellowship. She practiced law from 1996 to 1998 at the Washington, D.C., law firm of Williams & Connolly. Prior to joining the SMU faculty, she was the Sidney & Walter Siben Distinguished Professor of Family Law at Hofstra Law School in New York. Professor Grossman is a regular columnist for Justia's Verdict and an elected member of the American Law Institute.

**Christopher H. Hanna**, *Alan D. Feld Endowed Professor, Altshuler Distinguished Teaching Professor and Professor of Law*, B.S., 1984, J.D., 1988, University of Florida, LL.M., 1989, New York University. Professor Hanna has been a visiting professor at the University of Texas School of Law, the University of Florida College of Law and the University of Tokyo School of Law, and a visiting scholar at Harvard Law School and the Japanese Ministry of Finance. In 1998, Professor Hanna served as a consultant in residence to the Organization for Economic Cooperation and Development in Paris. From June 2000 to April 2001, he assisted the U.S. Joint Committee on Taxation in its complexity study of the U.S. tax system; from May 2002 to February 2003, he assisted the joint committee in its study of Enron; and, upon completion of the study, he continued to serve as a consultant to the Joint Committee on Tax Legislation. From May 2011 until December 2018, Professor Hanna served as senior policy adviser for tax reform to the United States Senate Committee on Finance. Prior to coming to SMU, Professor Hanna was a tax attorney with the Washington, D.C., law firm of Steptoe & Johnson. His primary duties included tax planning for partnerships and corporations on both a domestic and international level, and also tax controversy. He has received the Dr. Don M. Smart Teaching Award for excellence in teaching at the SMU Law School on nine separate occasions. In 1995, he was featured in Barrister magazine, a publication of the American Bar Association Young Lawyers Division, as one of "21 young lawyers leading us into the 21st century" (special profile issue 1995). He has authored numerous articles in various areas of taxation including international taxation, corporate taxation, partnership taxation and tax accounting. Professor Hanna's first book, *Comparative Income Tax Deferral: The United States and Japan*, was published in July 2000. He coauthored a second book, *Corporate Income Tax Accounting*, which was published in fall 2007 and is now in its 12th edition. Professor Hanna is a member of the American Law Institute and the American College of Tax Counsel.

**Grant M. Hayden**, *Professor of Law*, B.A., 1989 (Phi Beta Kappa) University of Kansas; M.A., 1991, University of Kansas; J.D., 1995 (Order of the Coif) Stanford University. Professor Hayden received his law degree with distinction from Stanford Law School and holds a Bachelor of Arts in philosophy and a Master of Arts in art history from the University of Kansas. At Kansas, he taught the history of Western art and led efforts to organize the graduate teaching assistants into a collective bargaining unit. As a law student, he was an editor of the Stanford Law Review and the Stanford Law and Policy Review. Professor Hayden served as a law clerk to Judge Deanell Reece Tacha of the U.S. Court of Appeals for the Tenth Circuit, and worked as an associate at the Washington, D.C., law firm of Shea & Gardner. Prior to joining the SMU faculty, Professor Hayden was at the Hofstra University School of Law, where he was chosen by four graduating classes to be the faculty commencement speaker. He writes and teaches in the areas of corporate governance, voting rights, labor law, and employment discrimination. His recent publications include articles in the California, Fordham, Michigan, and Vanderbilt Law Reviews.

**Patricia S. Heard**, *Clinical Professor of Legal Research, Writing and Advocacy*, B.A., 1980, University of Texas at Arlington, J.D., 1983, University of Texas. While in law school, Ms. Heard was a member of the *Texas Law Review*. Prior to joining the law faculty at SMU, Ms. Heard was an attorney with several different firms in the Dallas area, specializing primarily in transaction work and civil litigation. In addition, she was in-house counsel for a large corporation in Birmingham, Alabama. Ms. Heard currently teaches legal research, writing and advocacy, and also serves as a co-executive editor of *The International Lawyer*.

**JoAnn A. Hubbard**, *Clinical Professor of Legal Research, Writing and Advocacy*, B.S. (pharmacy), University of Oklahoma; J.D., 1987, University of Oklahoma. While in law school, Ms. Hubbard was articles editor of the *Oklahoma Law Review* and a member of the Order of the Coif. Prior to joining the SMU faculty in 2000, she was an associate in the Dallas office of Jones Day. After practicing for several years, she joined an independent Texas banking group as its vice president and general counsel. In 2003, she was the assistant director of the SMU Dedman School of Law Corporate Directors' Institute. Her current teaching area is legal research, writing and advocacy.

**Lolita Buckner Inniss**, *Senior Associate Dean for Academic Affairs and Professor of Law*, A. B., 1983, Princeton University; J.D., 1986, University of California at Los Angeles (UCLA); LL.M, 2007, Osgoode Hall, York University; Ph.D, 2011, Osgoode Hall, York University. At Princeton, she majored in Romance Languages and Literature with certifications (minors) in African American and Latin American Studies, and was a National Urban League Essay Prize winner and a Latin American Studies Travel Scholarship winner. At UCLA, she was an editor of the *National Black Law Journal*, a participant in Moot Court Honors, and an extern for the Honorable Consuelo B. Marshall of the United States District Court for the Central District of California. At Osgoode Hall, she earned an LL.M with Distinction and Ph.D. in Law with a specialization in Comparative Equality Jurisprudence, African Diaspora Studies and Feminist Legal Theory. From 1998 until 2017 Dr. Inniss served as an Assistant, Associate and Full Professor of Law at Cleveland-Marshall College of Law, Cleveland State University, where she taught Property Law, Real Estate Law, and Comparative Race and the Law. From 2010 until 2013 she held the Joseph C. Hostetler-Baker & Hostetler Chair in Law at Cleveland-Marshall. In Spring 2012, she was a fellow of New York University-Centre National De La Recherche Scientifique (CNRS) in Paris, France, where she researched slavery, trauma and law. From 2012 to 2014 Dr. Inniss held the Elihu Root Peace Fund Visiting Professorship in Women's Studies, a distinguished visiting chair at Hamilton College in Clinton, New York, where she offered interdisciplinary gender, race and law courses to undergraduates. Dr. Inniss' research addresses geographic, historic and visual norms of law, especially in the context of comparative constitutionalism, gender and race. She is the author of dozens of articles, essays and other writings that have appeared in *Texas Law Review*, *Washington University Law Review*, *Harvard Journal of Racial and Ethnic Justice*, *Columbia Journal of Race and Law*, *Canadian Journal of Women and the Law*, and many other distinguished publications. Her current major research project is a book titled *The Princeton Fugitive Slave: James Collins Johnson*, an account of race, gender, slavery and the law at Princeton University (forthcoming, Rutgers University Press). Dr. Inniss is also one of the contributors to a volume titled *International Law's Objects* (forthcoming, Oxford University Press), a work addressing the legal and metaphoric aspects of various objects in international law. In addition, she is a contributor to a volume titled *Feminist International Judgments* (forthcoming Hart Publishers), a work that explores methods of enacting feminist perspectives in international law. Before going to Cleveland-Marshall, Dr. Inniss served as a clinic director at Seton Hall University Law School in New Jersey, where she led the Immigration Clinic. She also served as a clinic director at Widener University Law School in Delaware, where she founded and led an Immigration Clinic. In addition, she served as the Martin Luther King Jr./Cesar Chavez/Rosa Parks Visiting Associate Professor at Wayne State University in Detroit. Before joining the legal academy, Dr. Inniss was a founder and leader of two law practices in New Jersey where she focused on real estate transactions and litigation, immigration law, and criminal law. She was also a pro bono attorney for the National Lawyer's Guild Immigration Project. Currently she serves as a pro bono attorney with the American Bar Association/United Nations Development Program, where her most recent project was a legislative analysis report for the Government of Grenada.

**Greg Ivy**, *Associate Dean for Library and Technology and Senior Lecturer in Law*, B.B.A., 1981, University of Texas at Austin; J.D., 1984, University of Houston College of Law, 1989; M.A., University of Chicago, 1989. Upon graduation from law school, Dean Ivy practiced with the firms of Buchanan,

Barnett, Schofield & Kent and Cowles & Thompson, predominantly in the area of toxic tort litigation. He has served as director of the Underwood Law Library since 2015. Dean Ivy serves on and has chaired numerous committees of the American Association of Law Libraries. He has published in journals such as the AALL Spectrum and SMU Law Review. He teaches the Advanced Legal Research course and lectures on legal research in other courses.

**Chris Jenks**, *Director of Criminal Clinic and Associate Professor of Law*, B.S., 1992, United States Military Academy; J.D., 2001, University of Arizona College of Law; LL.M., 2006, The Judge Advocate General's School; LL.M., 2009, Georgetown University Law Center (with honors). Professor Jenks is a fellow at the Asia Pacific Centre for Military Law's Program on Emerging Military Technology at Melbourne Law School in Australia and at SMU's John Goodwin Tower Center for Political Studies, and serves as the deputy course director the Peace Support Operations course at the International Institute for Humanitarian Law in Sanremo, Italy. Prior to joining the SMU law faculty, Professor Jenks served in the US Army, first as an Infantry Officer and later as a Judge Advocate, and was detailed to the Office of the Legal Adviser at the Department of State and as a Special Assistant US Attorney on both the civil and criminal side at the Department of Justice.

He is the co-author of a law of armed conflict textbook and has published book chapters with both Oxford and Cambridge University presses. His articles have appeared in the law reviews and journals of Harvard, Berkeley, Georgetown, Stanford, & Washington & Lee and the *International Review of the Red Cross*. His blog posts have been featured on *Lawfare*, *Just Security*, and *Opinio Juris*. He has presented to House and Senate Staffers on Capitol Hill, at the American Society of International Law, the Council on Foreign Relations, and at universities and institutes around the world.

In 2016, he presented at the United Nations Convention on Certain Conventional Weapons Expert Meeting on Lethal Autonomous Weapons (LAWS) in Geneva, Switzerland. In 2015, he was awarded a Fulbright Senior Scholars Grant to research LAWS as part of a multidisciplinary research group based out of Melbourne, Australia. He has spoken on LAWS at the Australian Defence Legal Division Headquarters, the Australian and New Zealand Society of International Law, the German Institute for International and Security Affairs, and at the University of Oxford. In 2014, he served on a working group on the environment and armed conflict at the United Nations in New York organized by the Special Rapporteur for the International Law Commission. And in 2013, he served as a consultant to the Office of the Secretary of Defense on security sector reform in the Democratic Republic of the Congo. Prior to joining the SMU faculty, Professor Jenks served for more than 20 years in the U.S. military, first as an infantry officer serving in Germany, Kuwait and as a NATO peacekeeper in Bosnia, and then as a judge advocate serving near the demilitarized zone in the Republic of Korea and later in Iraq, where he provided law of armed conflict advice on targeting and detention issues during combat operations. The Department of Justice's Counterterrorism Section nominated him for the John Marshall Award for interagency cooperation following his work as the lead prosecutor in the Army's first counterterrorism trial involving a soldier who attempted to aid an al-Qaeda terrorist. While working in the human rights and refugees section of the Office of the Legal Adviser at the Department of State, he served as a member of the U.S. delegation to the Third Committee of the United Nations General Assembly. In his last assignment, Professor Jenks served as the chief of the international law branch for the U.S. Army in the Pentagon, where he supervised the program by which foreign countries asserted criminal jurisdiction over U.S. service members and represented the DOD at Status of Forces Agreement negotiations; he was also the legal adviser to the U.S. military observers group, which provides personnel to U.N. missions around the world.

**Jeffrey Kahn**, *Professor of Law*, B.A., 1994, Yale University; M.Phil., 1996, Oxford University; D.Phil., 1999, Oxford University; J.D., 2002, University of Michigan. Professor Kahn's doctoral dissertation was published by Oxford University Press as *Federalism, Democratization, and the Rule of Law in Russia*

(2002). Following graduation, he served as a law clerk to the Honorable Thomas P. Griesa of the United States District Court for the Southern District of New York. Professor Kahn was a trial attorney in the Civil Division of the United States Department of Justice from October 2003 until April 2006, litigating a nationwide docket of constitutional, statutory and administrative law issues. In 2005, he was briefly detailed to the Criminal Division to conduct research in Russia on Russian criminal procedure for the Justice Department's Office of Overseas Prosecutorial Development, Assistance and Training. In fall 2006, that office sent him to Armenia to advise senior officials of the Armenian Ministry of Justice. During the spring 2006 term, Professor Kahn served as an adjunct assistant professor of the School of Foreign Service at Georgetown University. He has been a Fulbright Research Scholar in the Faculty of Law at the University of Oslo, an O'Brien fellow in residence at McGill University's Faculty of Law and a visiting professor of law at Washington and Lee University School of Law. Professor Kahn was named the 2007–08 teaching fellow by SMU's Cary M. Maguire Center for Ethics and Professional Responsibility, and a 2008–09 Colin Powell Fellow at John Goodwin Tower Center for Political Studies. He won the Don M. Smart Teaching Award for the 2010–11 academic year. His articles have been published in the *Michigan Law Review*, *UCLA Law Review*, *Virginia Journal of International Law* and many other periodicals and edited volumes. His most recent book is *Mrs. Shipley's Ghost: The Right to Travel and Terrorist Watchlists* (University of Michigan Press, 2013; paperback 2014). Professor Kahn teaches and writes on American constitutional law, administrative law, Russian law, human rights and counterterrorism.

**John S. Lowe**, *George W. Hutchison Chair in Energy Law and Professor of Law*, B.A., 1963, Denison University; LL.B., 1966, Harvard University. A Maxwell Fellow in Malawi in 1966–69, Professor Lowe practiced law privately in Columbus, Ohio, from 1970–75. He then became a member of the faculty at the University of Toledo, where he served as assistant and associate professor in 1975–78. He joined the faculty of the University of Tulsa in 1978 as professor and associate director of the National Energy Law and Policy Institute, and came to SMU in 1988. Professor Lowe has been a visiting professor at the University of Texas, the distinguished visiting professor of natural resources law at the University of Denver, the Visiting Judge Leon Karelitz Chair of Oil and Gas Law at the University of New Mexico and the Visiting Borden Ladner Gervais LLP Chair of Energy Law and Policy at the University of Alberta. He is a former chair of the Section of Environment, Energy and Resources Law of the American Bar Association and a former president of the Rocky Mountain Mineral Law Foundation. He is author of *Cases and Materials on Oil and Gas Law*, *Oil & Gas Law in a Nutshell*, *Oil and Gas Law and Taxation*, and *International Petroleum Transactions*. Professor Lowe teaches courses on oil and gas law, and oil and gas contracts. He also teaches as a senior fellow of the faculty of law at the University of Melbourne, Victoria, Australia, and as a visiting professor at the faculty of law at the University of Sydney, NSW, Australia, and as an Honorary Lecturer at the University of Dundee, Scotland. He has been an international legal adviser in the Commercial Law Development Program of the United States Department of Commerce, and he is a member of the bars of Texas, Oklahoma, and Ohio, as well as a member of the commercial arbitration panels of the American Arbitration Association and the CPR Institute for Dispute Resolution.

**George A. Martinez**, *Professor of Law*, B.A., 1976, Arizona State University; M.A. (philosophy), 1979, University of Michigan; J.D., 1985, Harvard University. A member of Phi Beta Kappa, Professor Martinez was a teaching fellow in the department of philosophy at the University of Michigan in 1979–81 and a visiting assistant professor of philosophy at Texas Christian University in 1981–82. He was a litigation associate with the Chicago firm of Mayer, Brown & Platt in 1985–88 and with the San Francisco firm of Morrison & Foerster in 1988–91. Professor Martinez has been a visiting professor of law at the University of Illinois and has presented papers at numerous universities including Yale University, the University of California at Berkeley and the University of Buenos Aires. Professor Martinez has published numerous law review articles in the areas of federal courts, critical race theory and jurisprudence. His work has been reprinted in a number of leading anthologies on critical race theory. He is an editor of *A Reader on Race*,

Civil Rights and American Law: A Multiracial Approach. He is associate editor of Law and Business Review of the Americas. Professor Martinez teaches in the areas of civil procedure, complex litigation, federal courts and jurisprudence.

**Thomas Wm. Mayo**, *Altshuler Distinguished Teaching Professor and Professor of Law*, B.A. (Philosophy), 1971, Amherst College; J.D. (magna cum laude), 1977, Syracuse University College of Law. After law school, where he was editor-in-chief of the Syracuse Law Review and a member of the Order of the Coif, Professor Mayo was an associate with the Rochester, New York, firm of Nixon Peabody LLP, after which he served as a law clerk to the U.S. Court of Appeals for the District of Columbia Circuit. He was then associated with the Washington, D.C., firm of Covington & Burling, where he practiced in the areas of antitrust, securities fraud, communications and election law. Since coming to SMU in 1984, Professor Mayo has taught civil procedure, federal courts, land use law, family law, business torts, constitutional law and administrative law. He currently teaches health care law; bioethics and law; public health law and ethics; law, literature and medicine; nonprofit organizations; legislation; and torts. He is an elected member of the American Law Institute, a charter member of the Fellows of the American Health Lawyers Association, a fellow in the Dallas Institute for Humanities and Culture, and a longtime member of the Council of the Health Law Section of the State Bar of Texas. He received SMU's Altshuler Distinguished Teaching Professor Award for 2012–14, and he is a member of SMU's Academy of Distinguished Teachers. He also received the 2007–08 SMU President's Associates Award as the outstanding member of the University's tenured faculty. He has been awarded the School of Law's Dr. Don M. Smart Award for Teaching Excellence in three different decades, and in 1988–89, he received the University's Outstanding Community Volunteer Award for community service. In 2002, he received the Dallas County Medical Society's Heath Award for outstanding leadership and contributions to medicine. He is also an adjunct associate professor of internal medicine at the University of Texas Southwestern Medical School, and of counsel to Haynes and Boone LLP. Professor Mayo was the longtime poetry columnist for *The Dallas Morning News*.

**Orly Sulami Mazur**, *Associate Professor of Law*, B.B.A., M.P.A., 2004, (summa cum laude) University of Texas; J.D., 2008, (Order of the Coif) SMU Dedman School of Law; LL.M., 2013, New York University. Professor Mazur is a 2016 recipient of the University's Golden Mustang Teaching Award and a 2013 recipient of the David F. Bradford Memorial Prize by NYU School of Law for the best paper in the field of taxation. Professor Mazur is a graduate of the SMU Dedman School of Law, where she graduated first in her class and was a member of the SMU Law Review. Prior to joining the SMU faculty, Professor Mazur worked as an associate in the business planning and taxation group at Haynes and Boone, LLP, where she advised clients on tax aspects of securities offerings, mergers and acquisitions, and other business restructurings, and represented investment funds in their formation, operation and dissolution. Professor Mazur has also worked as a certified public accountant at PricewaterhouseCoopers, LLP, where she focused her practice on international taxation. Professor Mazur has previously taught tax courses at SMU as an adjunct professor and visiting assistant professor and has given short courses on emerging international tax law issues at the International Taxation Academy in Taiwan. Her current research focuses on international and comparative taxation, the intersection of tax law and technology, and tax policy. Professor Mazur teaches a range of tax courses to J.D. and LL.M. students.

**Pamela R. Metzger**, *Director of the Deason Criminal Law Reform Center and Professor of Law*, B.A., 1987, Dartmouth College; J.D., 1991, New York University School of Law. Pam Metzger is a nationally recognized Sixth Amendment and ethics scholar whose work combines theory and practice in driving improvements in criminal justice. Her scholarship, which has appeared in publications such as the *Yale Law Journal*, *Vanderbilt Law Review*, *Southern California Law Review* and *Northwestern University Law Review*, has been widely cited by leading authorities and by the U.S. Supreme Court. Most recently, she has

explored how a data-driven systems approach to high-risk practices can improve the delivery of public defense services. Before joining the Southern Methodist University faculty, Metzger served as an Assistant Federal Defender in the Southern and Eastern Districts of New York and worked in private criminal practice in New York City. She has been a visiting law professor at Washington and Lee University, where she directed the Alderson Legal Clinic for Women in Prison. From 2001 to 2008, she directed the Tulane Law School Criminal Litigation Clinic, where she became a leading voice in reforming the criminal justice systems in New Orleans and throughout Louisiana.

**Natalie Nanasi**, *Director of the Judge Elmo B. Hunter Legal Center for Victims of Crimes Against Women and Assistant Professor of Law*, B.A., 2000, Brandeis University; J.D., 2006, Georgetown University Law Center. Natalie Nanasi is the Director of the Judge Elmo B. Hunter Legal Center for Crimes Against Women. Her work involves teaching and supervising students who represent survivors of gender-based violence in a broad variety of legal matters, including, but not limited to, protective orders, immigration claims, family law matters, and expungement of criminal convictions. Professor Nanasi's research interest is at the intersection of immigration, gender and feminist legal theory. Prior to arriving at SMU, Professor Nanasi was a Practitioner-in-Residence and the Director of the Domestic Violence Clinic at American University, Washington College of Law (WCL), where she supervised students' representation of survivors of intimate partner violence in family law and immigration cases. Before joining the faculty at WCL, Professor Nanasi was the Senior Immigration Attorney and Pro Bono Coordinator at the Tahirih Justice Center, where she represented immigrant women and girls fleeing human rights abuses such as female genital mutilation, domestic violence, human trafficking, forced marriage, honor crimes and sexual violence. She also served as counsel in the landmark asylum case of *Matter of A-T-* and as an Equal Justice Works Fellow from 2007-2009, with a focus on the U visa. Prior to her work at Tahirih, Professor Nanasi was a law clerk to the Honorable Lynn Leibovitz of the District of Columbia Superior Court. Professor Nanasi received her J.D. from the Georgetown University Law Center, where she earned an Equal Justice Foundation fellowship for her work at the South Asia Human Rights Documentation Center in New Delhi, India and assisted in representation of HIV-positive immigrants at Whitman Walker Clinic Legal Services. Prior to her legal career, Professor Nanasi was a rape crisis counselor and assisted single teenage mothers at a transitional residence facility in Boston.

**Joseph Jude Norton**, *James L. Walsh Distinguished Faculty Fellow and Professor in Financial Institutions Law*, A.B., 1966, Providence College; LL.B., 1969, University of Edinburgh; LL.M., 1970, University of Texas; S.J.D., 1973, University of Michigan; Diplôme (*droit privé*), 1976, Hague Academy of International Law; D.Phil. (law), 1995, Oxford University; LLD (h.c.), 2002, University of Stockholm; LLD, 2005, University of London. Professor Norton primarily teaches domestic and international business and banking-related courses along with courses on international economic development law. He holds the James L. Walsh Distinguished Faculty Fellowship and Professorship in Financial Law at the School of Law, where he has been a tenured full professor of law since 1981 and an adjunct professor since 1973. He jointly held the Sir John Lubbock Professorship in Banking Law and head of the International Financial Law Unit at the University of London from 1993 until 2005, and he was the Cameron Professorial Fellow in Banking Law at London in 1988-93. In the spring 2005 term, he held the Nomura Distinguished Visiting Professorship in International Financial Systems at the Harvard Law School. In 1999-2001, he held the Vice Chancellor's Distinguished University Professor of Law at the University of Hong Kong, where he was co-founder of the Asian Institute of International Financial Law. He currently holds visiting university professorships at the Peking University Law Faculty and the Shanghai University of Finance and Economics. He previously held a chaired visiting professorship at the Banking Law Center, University of Johannesburg (RAU) South Africa; a visiting professorial fellowship at the Mandela Institute, Wits University, Johannesburg; and a professorial fellowship in financial law and institutions at the British Institute of International and Comparative Law (London). In addition, he held a visiting professorship

position at the University of Muenster Law Faculty for eight years, and he was a visiting professor at Soochow University Law Faculty, Taipei. He was the editor-in-chief on the *International Lawyer* journal for 14 years, and he is currently editor-in-chief of the *Law and Business Review of the Americas*. He is general editor of three major international book series, and he sits on the advisory boards of five international journals. In September 2001, he was honored with a Doctor of Laws degree from the University of Stockholm in recognition of such accomplishments; and in 2005, he was awarded an earned LL.D. degree from the University of London for his writings in 1996–2001. He also holds a Doctor of Philosophy (law) degree in international banking from Oxford University, and a Doctor of the Science of Law degree in international and European Community law from the University of Michigan Law School. He has published more than 50 books and 150 articles on related subjects, and he has lectured on banking and finance law, international business law, financial sector reform and corporate/enterprise governance issues worldwide. He has practical experience with international and domestic (U.S.) banking and capital markets transactions; international financial regulatory matters; bank, corporate and asset restructuring; asset securitization; and enterprise governance respecting small, medium-sized, "publicly held" and multinational enterprises. He has consulted with a broad range of governmental and intergovernmental authorities worldwide, including the World Bank; the International Monetary Fund; the European Bank for Reconstruction and Development; the Korean government; the South African Development Community; the Federal Deposit Insurance Corporation; the Bank of Thailand; the Bank of England; and the Czech, Estonian and Mauritian banking authorities. He has served as a member of the World Bank/IMF Core Consultative Group Bank Insolvency Initiative and of the London Financial Law Panel, and is currently on the Banking Panel of China International Economic and Trade Arbitration Commission. He also has served as an academic consultant to the Latin American Association of Bank Supervisors and to the International Association of Deposit Insurers, and as an adviser with respect to the Thai, Korean and Indonesian financial crises in the mid-1990s. He has successfully supervised more than 40 Ph.D. (law)/S.J.D. students during the past two decades and is currently supervising or cosupervising four doctoral students. He is an elected member of the American Law Institute, the American College of Commercial Lawyers and the International Academy of Commercial and Consumer Law, and he holds the Martindale Hubbell AV (highest professional lawyer) rating. He has served as a corporate/banking partner (director) of a major Texas law firm; as a consultant to several other major Texas law firms, working for two of these at their London offices; as a member of the American Bar Association and Texas Banking committees; as a council member of the ABA's International Law and Practice Section; and as a member of the United Kingdom/International Chamber of Commerce Banking Committee. He is founder and director of SMU's Institute of International Banking and Finance and of the reactivated SMU Law Institute of the Americas. For 10 years, he was the director of SMU's annual Institutes of Banking Law, Commercial Lending and Finance, and of Lender Liability, and for four years, of SMU's Bankruptcy Law Institute. He is a member of the Advisory Board to the SMU Tower Center for Political Studies. He is a former president, and for 11 years, he was a member of the board of directors of the North Central Texas Legal Service (for the poor). Professor Norton is the founder and executive director of the London (now Global) Forum for International Economic Development Law. He has produced 55 books and more than 155 articles, and he has presented more than 120 papers in 26 countries. His current research interests concern global and U.S. financial sector reform, the reform of international economic and financial institutions/arrangements, comparative and global corporate governance issues, and inadvertent liabilities in enterprise relationships. His most recent books include *Law, Culture and Economic Development: A Liber Amicorum for Professor Roberto MacLean* (2007); *Corporate Governance Post-Enron: Comparative and International Perspectives* (2006); *Universalism v. Multilateralism: Policy Challenges for the 21st Century* (2005); *Festschrift for Sir Joseph Gold* (2002); and *Financial Sector Law Reform in Emerging Economies* (2000).

**Anna C. Offit**, *Assistant Professor of Law*, B.A., 2008, Princeton University (Phi Beta Kappa, summa cum laude); M.Phil., 2009, University of Cambridge; J.D., 2012, Georgetown University Law Center; Ph.D.,

2018, Princeton University. Professor Offit's teaching and research interests span criminal law, evidence, comparative law, legal ethics, law and society, and anthropology. She has applied empirical research methods to the study of prosecutorial ethics and lay participation in legal systems, and as a Fulbright scholar to Norway observed and analyzed the abolition of all-layperson juries in appellate criminal cases. Professor Offit served as a law clerk at the Department of Justice's Office for Civil Rights throughout law school as well as Editor-in-Chief of the Georgetown Journal of Legal Ethics. Prior to joining SMU Law's faculty, Professor Offit served as a Visiting Researcher at the University of Oslo's Department of Public and International Law, a Graduate Prize Fellow at the Princeton University Center for Human Values, and as a post-doctoral Research Fellow with the Civil Jury Project at New York University School of Law. Her research has been funded by the National Science Foundation, U.S.-Norway Fulbright Foundation, the Princeton Institute for International and Regional Studies, and the Lois Roth Foundation. Her articles have appeared in the Northwestern University Law Review, the UC Irvine Law Review, and the Political and Legal Anthropology Review, among other law review and peer-reviewed journals. She is a member of the bar in New York and New Jersey, and of the Association for Political and Legal Anthropology.

**W. Keith Robinson**, *Co-Director of The Tsai Center for Law, Science & Innovation, Altshuler Distinguished Teaching Professor and Associate Professor of Law*, B.S. (electrical engineering), 1999, Duke University; J.D., 2004, Duke University Law School (cum laude). Professor Robinson teaches and writes in the areas of property, intellectual property, patent law and technology law. His current research focuses on analyzing the challenges small firms face in obtaining patent rights in the U.S. Patent system. He has written or lectured on patent lawsuit avoidance, the patenting of business methods, joint infringement and the USPTO's examination guidelines. One of Professor Robinson's most recent articles appeared in the American University Law Review. The article was judged one of the best law review articles related to intellectual property law published in 2012 and was reprinted in the 2013 Intellectual Property Law Review. Professor Robinson practiced law at Foley and Lardner LLP as a member of the electronics practice group in Washington, D.C. There, he assisted clients in various areas of patent law including counseling through negotiations, opinions, prosecution and strategic IP issues including evaluating emerging technology. Professor Robinson has counseled clients in a variety of technical areas including computer software, consumer electronics, display technology, signal processing, telecommunications, wireless communications, network architecture, application specific electronic devices, semiconductor devices and manufacturing, data mining, search technology, vehicle safety systems, RFID technology, Internet applications and business methods. Prior to practicing law, Professor Robinson was a technology consultant for Ernst & Young LLP and Cap Gemini Ernst & Young LLC. He counseled clients on software development processes, developed customized software solutions and designed and implemented web application architectures. Professor Robinson is a graduate of Duke University School of Law (J.D., cum laude, 2004). He holds a degree in electrical engineering from the Duke University Pratt School of Engineering (B.S. 1999). While attending law school, Professor Robinson served in the Duke Law Community Enterprise Clinic, where he provided counseling on copyright and trademark protection and advised entrepreneurial clients on business formation. Professor Robinson is admitted to practice in the District of Columbia, Virginia, and before the U.S. Patent and Trademark Office.

**C. Paul Rogers III**, *Marilyn Jeanne Johnson Distinguished Law Faculty Fellow, Professor of Law and former Dean*, B.A., 1970, J.D., 1973, University of Texas; LL.M., 1977, Columbia University. Professor Rogers practiced law in Pennsylvania before accepting the Krulewitch Fellowship for graduate law study from Columbia University Law School. He subsequently joined the faculty of Loyola University of Chicago and came to SMU in 1980. He has published articles in the areas of antitrust law, contracts, commercial law, regulated industries and legal history and has coauthored an antitrust casebook, *Antitrust Law: Policy & Practice*, now in its fourth edition. He has also taught courses in contracts, antitrust law, business torts and sales of goods transactions and served SMU School of Law as associate dean for

academic affairs in 1982–86 and as dean in 1988–97. He is an elected member of the American Law Institute and a Fellow of the American Bar Foundation, the Texas Bar Foundation and the Dallas Bar Foundation. Professor Rogers is the University's faculty athletic representative, representing SMU before the National Collegiate Athletic Association and the American Athletic Conference. He previously served on the NCAA's Academic, Eligibility and Compliance Cabinet and is currently on its Football Oversight Committee.

**Julie Forrester Rogers**, *Professor of Law*, B.S.E.E., 1981, J.D., 1985, University of Texas at Austin. Professor Forrester joined the law faculty in 1990 after practicing as a real estate attorney with the Dallas law firm of Thompson & Knight. As Associate Provost, she oversees the Altshuler Learning Enhancement Center, the Center for Academic Support of Student Athletes, the Office of International Student and Scholar Services, the President's Scholars Program, the University's Study Abroad Programs and the Taos Campus. Professor Forrester publishes articles on real estate finance, predatory lending, real property and bankruptcy law, and she received the 1995 John Minor Wisdom Award for Excellence in Legal Scholarship for her first predatory lending article. She teaches in the areas of property, real estate transactions and land use, and is co-author with Edward Chase of *Property Law: Cases, Materials, and Questions*. Professor Forrester served as Dean ad interim of the law school from June 1, 2013, through June 30, 2014, and as associate dean for academic affairs during the 1995-96 academic year. She is a member of the American Law Institute, the American College of Real Estate Lawyers and the American College of Mortgage Attorneys. She is on the Executive Board of the American Association of Law Schools Real Estate Transactions Section, serving as chair in 2015. She is a member of the Texas State Bar Real Estate, Probate, and Trust Law Section Council, and she served on the section's committee that drafted the Texas Assignment of Rents Act, which became law in 2011.

**Eric Ruben**, *Assistant Professor of Law*, B.A., 2003, Dartmouth College; J.D., 2007, NYU School of Law. Professor Ruben's research and teaching interests include criminal law, professional responsibility, and the Second Amendment. He is a prominent commentator on the right to keep and bear arms, publishing articles in the *California Law Review* (forthcoming), *Duke Law Journal*, *Yale Law Journal Forum*, and *Journal of Law and Contemporary Problems*, as well as popular outlets such as *The Atlantic*, *New York Times*, *Vox*, *Jurist*, and various legal blogs. Prior to joining SMU, he was a fellow at the Brennan Center for Justice and an adjunct professor at New York University School of Law. Before that, Professor Ruben worked as a criminal defense attorney at Morvillo Abramowitz Grand Iason & Anello, P.C. and served as a law clerk for the Honorable Julio M. Fuentes of the U.S. Court of Appeals for the Third Circuit. He received his J.D. from NYU School of Law, where he was an Articles Editor for the NYU Law Review, and his B.A. from Dartmouth College, where he graduated *magna cum laude*.

**Meghan Ryan**, *Associate Dean for Research, Altshuler Distinguished Teaching Professor, and Professor of Law*, A.B., 2002, Harvard University, J.D., 2005, University of Minnesota. Professor Ryan received her A.B., magna cum laude, in chemistry from Harvard University in 2002. In 2005, she earned a J.D., magna cum laude, from the University of Minnesota Law School, where she was a member of the Order of the Coif and received the American Law Institute-American Bar Association Scholarship and Leadership Award. She was a member of both the *Minnesota Law Review* and the *Minnesota Journal of Global Trade*. After graduation, Professor Ryan clerked for the Honorable Roger L. Wollman of the United States Court of Appeals for the Eighth Circuit. She also worked as an associate in the trial group at the Minneapolis-based law firm of Dorsey & Whitney LLP, where she focused her practice on commercial and intellectual property litigation, as well as on white-collar defense and compliance. Additionally, Professor Ryan has conducted research in the areas of bioinorganic chemistry, molecular biology, and experimental therapeutics at the Mayo Clinic and the University of Minnesota. Prior to joining the SMU faculty, Professor Ryan taught criminal law, advanced criminal procedure, and sales at the University of Minnesota

Law School. Her current research focuses on the Supreme Court's evolving standards of decency jurisprudence and the impact of evolving science, technology and morality on criminal procedural and civil norms. Professor Ryan teaches and writes in the areas of criminal law, criminal procedure, torts, and law and science.

**Mary B. Spector**, *Associate Dean for Clinics, Director of Civil/Consumer Clinic, and Professor of Law*, B.A., 1979, Simmons College; J.D., 1986, Benjamin N. Cardozo School of Law. Professor Spector is a 2009 recipient of the Association of American Law Schools Clinical Section's Bellow Scholar Award, the University's Golden Mustang Teaching Award and the School of Law's Don Smart Directed Student Research Award. She was a law clerk to Judge Jerry Buchmeyer of the U.S. District Court for the Northern District of Texas before joining the Dallas law firm of Akin, Gump, Strauss, Hauer & Feld as an associate. She served as a member of the adjunct faculty from fall 1991 to spring 1995. During that time, she served as a supervising attorney with the SMU Legal Clinic and as a field instructor with the SMU/Legal Services of North Texas externship program. She has served on the board of directors of several community organizations and as a member of the Consumer Law Section Council of the State Bar, the Legal Education Subcommittee of the Texas Access to Justice Commission and the United States District Court Advisory Committee for the Northern District of Texas. She has testified before Congress and before the Consumer Financial Protection Bureau on matters relating to debt collection and credit reporting. She teaches consumer law, codirects the Civil Clinic and directs the Consumer Advocacy Project. Professor Spector has published articles in the area of property law, clinical teaching and consumer credit. She is currently working on projects involving empirical research on credit reporting and consumer debt litigation.

**Marc I. Steinberg**, *Rupert and Lillian Radford Chair in Law and Professor of Law*, A.B., 1972, University of Michigan; J.D., 1975, UCLA; LL.M., 1977, Yale University. Following law school, Professor Steinberg served as law clerk to Judge Stanley N. Barnes of the U.S. Court of Appeals for the Ninth Circuit and as legislative counsel to U.S. Senator Robert P. Griffin. He subsequently served as special projects counsel and confidential legal adviser to the general counsel at the U.S. Securities and Exchange Commission. Before joining the SMU law faculty, Professor Steinberg was professor of law at the University of Maryland School of Law, visiting professor at the Wharton School of Business at the University of Pennsylvania, visiting associate professor at the National Law Center, George Washington University, and adjunct professor at Georgetown University Law Center. In addition, he has lectured and consulted on company law in Australia, China, England, Finland, Germany, Israel, Italy, Japan, New Zealand, Russia, South Africa, Sweden and Taiwan. He also has held the title of visiting professorial fellow in international securities regulation for the Centre for Commercial Law Studies at the University of London, as well as visiting professor of law at Heidelberg University, Bar Ilan University, and a number of other premier universities. Professor Steinberg is the author of more than 125 law review articles as well as 36 books. He is editor-in-chief of the *Securities Regulation Law Journal* and co-editor-in-chief of *The International Lawyer*. He is on the advisory board of *The Journal of Corporation Law* and is a member of the American Law Institute. He teaches in the corporate and securities law areas.

**Heather L. Stobaugh**, *Clinical Professor of Legal Research, Writing and Advocacy*, B. A., 1994, University of Texas at Dallas; M.A. (literary studies), 1997, University of Texas at Dallas; J.D., 2003, Southern Methodist University. After graduation, she was an associate at Carrington, Coleman, Sloman & Blumenthal in Dallas. She practiced primarily in the areas of securities law and business litigation, and she served as outside general counsel to a major telecommunications provider. Stobaugh also has represented numerous clients pro bono, including a renowned nonprofit animal welfare organization for which she wrote an amicus brief that resulted in a favorable interpretation of a revised Texas statute. In 2003, Stobaugh was a member of the *SMU Law Review* and Order of the Coif. She received awards for best

student law review comment and best brief. Her current teaching area is legal research, writing and advocacy.

**Diane M. Sumoski**, *Director of the W.W. Caruth, Jr. Child Advocacy Clinic, Director of the W.W. Caruth, Jr. Institute for Children's Rights and Associate Clinical Professor, B.A., 1984, Franklin & Marshall College; J.D., 1987, Cornell Law School (cum laude).* Sumoski, in her clinical course, teaches child welfare law as well as investigative, case preparation and oral and written advocacy skills. Upon graduation from law school, she began her legal career at the Dallas law firm of Carrington, Coleman, Sloman & Blumenthal LLP, where she became a partner in 1993. Sumoski served as pro bono partner at Carrington Coleman for 15 years and supervised associates in all family law pro bono cases at the firm. She also served on the firm's executive committee for five years. After joining the faculty at SMU Dedman School of Law in 2013, she became of counsel at the firm. Sumoski has been listed in Best Lawyers in America since 2010. She recently served on the Advisory Committee for a Child Welfare Law Speciality and is now a member of the Child Welfare Law Exam Commission for the Texas Board of Legal Specialization. She has held numerous leadership positions in the Litigation Section of the American Bar Association, including director of the section's Public Service Division, chair of the Expert Witnesses Committee, chair of the Woman Advocate Committee, chair of the Special Committee of the Future of Multidistrict Litigation and co-chair for the section's annual meeting. Sumoski also has served as chair of the Host Committee for the Fifth Circuit Judicial Conference. Sumoski served for eight years as a member of the board of directors of the Dallas Bar Association and has been a director since 2009. She has served as chair of numerous DBA committees, resulting in her being awarded with the JoAnna Moreland Outstanding Committee Chair award in both 2008 (for her service as the chair of the Pro Bono Activities Committee) and 2012 (for her service as chair of the Judiciary Committee). She currently serves as vice-chair of the Juvenile Justice Committee. With respect to her pro bono efforts in private practice, Sumoski received the Women's Legal Advocacy Award from Legal Services of Northwest Texas in 2010 for her work benefiting women and children and the Dallas Volunteer Attorney Program's award for Outstanding Pro Bono Coordinator in 1998 and 2005. She also served as chair of the DBA's Equal Access to Justice Campaign, which raises funds to support pro bono legal services to the poor as provided through the Dallas Volunteer Attorney Program and Legal Services of Northwest Texas. Ms. Sumoski is also a member of the Dallas Committee for a Qualified Judiciary. Ms. Sumoski's article "Bridging the Gender Gap" was published in *The Litigation Manual (First Supplement 2007)*. She has also given numerous presentations at American Bar Association meetings and Dallas Bar Association meetings, publishing companion pieces and is a frequent speaker on child welfare law. She is admitted to practice law in all districts of Texas as well as in the U.S. Court of Appeals for the Fifth Circuit, and is a life fellow in the Dallas Bar Foundation and Texas Bar Foundation.

**Joshua C. Tate**, *Professor of Law, B.A. 1996, Pomona College; M.A., 2000, M.Phil., 2001, Yale University Graduate School of Arts and Sciences; J.D., 2002, Yale Law School; Ph.D., 2009, Yale University Graduate School of Arts and Sciences.* Professor Tate's research and teaching focus on legal history, property, and trusts and estates. He has been a full-time faculty member at SMU Dedman School of Law since fall 2005, and he was a visiting assistant professor at the University of Pennsylvania Law School in spring 2008. In fall 2012, he was a Lloyd M. Robbins Senior Research Fellow at the University of California at Berkeley. He is an Academic Fellow of the American College of Trust and Estate Counsel, serves as the Selden Society's Honorary Treasurer for the U.S.A., co-chairs the Uniform Acts for Trust and Estate Law Committee for the ABA Real Property, Trust and Estate Law Section, and is a past chair of the Sutherland Prize Committee for the American Society for Legal History. In August 2015, he was elected as a Miembro de Honor by the Comité Ejecutivo de la Abogacía Colombiana. Professor Tate has given invited presentations at numerous academic conferences, colloquia and workshops in the United States and abroad. From 2013 to 2015, he gave a series of more than sixty lectures in North and South America, Africa, Asia,

and Europe in commemoration of the 800th anniversary of Magna Carta. He is currently engaged in a study of the development of property rights and remedies in medieval England, focusing on issues of jurisdictional conflict with regard to rights of presentation to churches. Professor Tate is admitted to practice in Texas and Connecticut.

**David O. Taylor**, *Co-Director of The Tsai Center for Law, Science & Innovation Robert G. Storey Distinguished Faculty Fellow and Associate Professor of Law*, B.S. (mechanical engineering), 1999, Texas A&M University (magna cum laude); J.D., 2003, Harvard University (cum laude). At Harvard Law School, Professor Taylor was a member of the *Harvard Journal of Law & Technology* and the *Harvard Journal of Law & Public Policy*. After graduation from law school, Professor Taylor clerked for the Honorable Sharon Prost of the U.S. Court of Appeals for the Federal Circuit. Admitted to practice in Texas and before the U.S. Patent and Trademark Office, he also worked in the intellectual property department of the law firm of Baker Botts LLP in its Dallas office. While at Baker Botts, Professor Taylor engaged in patent prosecution, patent licensing and patent litigation in various district courts and at the U.S. Court of Appeals for the Federal Circuit. He also assisted with various advanced patent law courses at SMU and successfully represented clients in pro bono matters, including before the U.S. Court of Veterans Appeals. Professor Taylor currently serves on the Advisory Council for the U.S. Court of Appeals for the Federal Circuit. Professor Taylor has published articles in law reviews at New York University, Georgia, Connecticut, University of California Davis, Tennessee, SMU, and Temple, and in intellectual property journals at University of California Berkeley, Texas, Fordham, and Santa Clara. His scholarship focuses on patent law, patent policy, patent litigation and civil procedure. Professor Taylor teaches contracts, patent law and advanced patent law courses.

**Elizabeth G. Thornburg**, *Richard R. Lee, Jr. Professor, Altschuler Distinguished Teaching Professor and Professor of Law*, B.A., 1976, College of William and Mary (highest honors); J.D., 1979, Southern Methodist University (cum laude). While a student at SMU, Professor Thornburg was the senior notes and comments editor for the *Journal of Air Law and Commerce*, a member of the Barristers and the Order of the Coif, and a law clerk for a small firm specializing in civil rights litigation. After graduation, she clerked for the Honorable Robert M. Hill, U.S. District Judge for the Northern District of Texas, and was a commercial litigation associate at the firm then known as Locke, Purnell, Boren, Laney & Neely. Drawing on her experience with civil rights and commercial litigation, her scholarship focuses on the procedural fairness of the litigation process, especially at the pleadings, discovery and jury charge stages. She also writes and speaks in the areas of comparative procedure, online dispute resolution, and the intersection of law and culture. Her most recent book is *Lawtalk: The Unknown Stories Behind Familiar Legal Expressions* (Yale University Press, with co-authors). Professor Thornburg's articles have appeared in law reviews at Virginia, U.C. Davis, North Carolina, Notre Dame, Michigan, Texas, Wisconsin, Duke, Fordham, Oregon, Missouri, Houston, West Virginia, Edinburgh and SMU, and in international journals in Scotland, England and Australia. She is the co-author (with Professor Dorsaneo) of a study guide for civil procedure; she has two Texas procedure casebooks; and she has contributed chapters to books on civil procedure issues in consumer law, sports law, computer law and classic civil procedure cases. Professor Thornburg is a member of the American Law Institute and served as one of the U.S. representatives to the international project on "Teaching Civil Procedure in Common Law Countries." She teaches civil procedure, conflict of laws, complex litigation, Texas procedure, remedies and an advanced procedure seminar. During 2012–14, Professor Thornburg also served the University as the director of the Center for Teaching Excellence, and in 2013, she received the University Scholar/Teacher of the Year Award.

**Jenia Iontcheva Turner**, *Amy Abboud Ware Centennial Professor in Criminal Law, Robert G. Storey Distinguished Faculty Fellow, and Professor of Law*, B.A. (international relations), 1999, Goucher College; Caplan Scholar, Cambridge University, 1997–98; J.D., 2002, Yale Law School. At Yale Law School,

Professor Turner was a Coker Fellow and articles editor for the Yale Law Journal and the Yale Journal of International Law. In 2000, she was a summer clerk at the Appeals Chamber of the International Criminal Tribunal for the former Yugoslavia, and, the following summer, she worked at the Federal Public Defender's Office in Houston and the New York and Paris offices of Debevoise & Plimpton. In 2002–04, Professor Turner served as a Bigelow Fellow at the University of Chicago Law School, where she taught legal research and writing and comparative criminal procedure. Her teaching and scholarship interests include criminal law and procedure, comparative criminal procedure, international criminal law, international organizations, and European Union law. She is the author, co-author, or co-editor of over thirty law review articles and book chapters, as well as three books: *Plea Bargaining Across Borders* (2009); *The Oxford Handbook of Criminal Process* (with Darryl K. Brown and Bettina Weissner, 2019) and *Criminal Procedures: Cases, Statutes, and Executive Materials* (with Marc L. Miller, Ronald F. Wright, and Kay L. Levine, 6th ed. 2019).

**Jonni Walls**, *Clinical Professor of Legal Research, Writing and Advocacy*, B.A., 1968, University of Tennessee in Knoxville (Phi Beta Kappa); J.D., 1991, Southern Methodist University School of Law. While at SMU, Ms. Walls was notes and comments editor for the *Journal of Air Law and Commerce* and a member of Order of the Coif. She is admitted to practice in all Texas courts; United States District courts for the Northern, Southern, Eastern and Western districts of Texas; and the Fifth Circuit Court of Appeals. After graduation, she practiced with various Dallas law firms, specializing in employment litigation for management, as well as supervisor training and counseling with respect to human resource issues. Ms. Walls' practice experience includes litigation of statutory and common law claims arising in the employment context, practice before administrative agencies, arbitration of disputes arising under employment contracts and collective bargaining agreements, contract negotiation, drafting of employment policies and handbooks, management training seminars, enforcement of confidentiality and noncompetition agreements, and alternative dispute resolution. Her experience also includes traditional labor law, union representation campaigns, and practice before the National Labor Relations Board and the National Mediation Board. Ms. Walls served as an adjunct professor for the School of Law from 1992 through 2010 and joined SMU's faculty full-time in August 2010, teaching legal research, writing and advocacy. She also serves as faculty adviser to the SMU Board of Advocates.

**Jessica Dixon Weaver**, *Robert G. Storey Distinguished Faculty Fellow and Associate Professor of Law*, B.A., 1992, University of Pennsylvania; J.D., 1995, University of Virginia. While at the University of Virginia School of Law, Professor Weaver served as notes development editor of the Virginia Law Review. Professor Weaver teaches Family Law, Advanced Family Law, Professional Responsibility, and Children and the Law. She joined the tenure track faculty in 2009 and became the first African American female to earn tenure at SMU Dedman School of Law in 2015. Prior to being on tenure track, Professor Weaver was the founding director of the W.W. Caruth, Jr. Child Advocacy Clinic, and she was recognized as an Extraordinary Minority in Texas Law for her work as clinic director and a child advocate. She is an expert in child welfare law and public policy, and much of her scholarship focuses on theorizing methods for improvement of the legal systems and policies affecting families and children. She also researches and writes about the intersection of race, gender, and family law.

Her publications have covered a wide array of topics, including the overrepresentation of African-American children in the child welfare system, multigenerational living and intergenerational caregiving, psychological abuse of children, child homelessness, and ethical issues arising from the use of state promulgated forms in family courts. Professor Weaver has been invited to present her research and articles at a number of prestigious law schools, including Yale, University of California Berkeley, Washington University, Emory, Washington and Lee, Brigham Young, and Fordham. Professor Weaver's articles have been published in the Fordham Law Review, Virginia Journal of Law and Social Policy, Seton Hall Law

Review, and the William and Mary Journal of Women and the Law to name a few. They have been cited by top family law and feminist legal scholars as well as excerpted in family law, children and the law, and elder law casebooks. She is currently working on two course books, Family Law Simulations: Bridge to Practice, to be published by West Academic in 2018, and Adoption Law: Theory, Policy, and Practice, 3rd ed., to be published by William S. Hein & Co., Inc. in 2019.

## **Clinical Faculty**

Mary B. Spector, B.A., J.D., *Associate Dean for Clinics, Director of Civil/Consumer Clinic, and Professor of Law*

Chris Jenks, B.S., J.D., LL.M., *Director of Criminal Clinic and Associate Professor of Law*

Natalie Nanasi, B.A., J.D., *Director of the Judge Elmo B. Hunter Legal Center for Victims of Crimes Against Women and Assistant Professor of Law*

Chante Prox, B.S., M.S., J.D., *Director of the VanSickle Family Law Clinic and and Assistant Clinical Professor*

Diane M. Sumoski, B. A., J.D., *Director of the W.W. Caruth, Jr. Child Advocacy Clinic, Director of the W.W. Caruth, Jr. Institute for Children's Rights and Associate Clinical Professor*

Brook Busbee, B.A.S., J.D., *Adjunct Clinical Professor of Law, Criminal Clinic*

Eric Cedillo, B.S., J.D., *Adjunct Clinical Professor of Law, Hunter Center's Karnes Spring Break Clinic*

David J. Cho, B.A., J.D., *Adjunct Clinical Professor of Law, Small Business and Trademark Clinic*

Sally C. Helppie B.A., J.D., *Adjunct Clinical Professor of Law, Small Business and Trademark Clinic*

Marc Hubbard, B.S., J.D., *Adjunct Clinical Professor of Law, Patent Clinic*

Larry Jones, B.B.A., J.D., LL.M., *Adjunct Clinical Professor of Law, Federal Tax Clinic*

Michael McCollum, LL.B., *Adjunct Clinical Professor of Law, Criminal Clinic*

Eliot Shavin, B.A., J.D., *Adjunct Clinical Professor of Law, Civil Clinic*

Christopher Young, B.A., J.D., *Adjunct Clinical Professor of Law, Innocence Clinic*

## **Visiting and Research Professors**

The Honorable Brandon Birmingham, *292 Judicial District Court for Dallas County*

The Honorable Xiomara Davis-Gumbs, *U.S. Immigration Judge, U.S. Department of Justice*

The Honorable A. Joe Fish, *United States Senior District Judge for the Northern District of Texas*

The Honorable Dennise Garcia, *303rd District Court for Dallas County*

Bryan A. Garner, *President of LawProse Inc.*

The Honorable H. DeWayne Hale, *United States Bankruptcy Court for the Northern District of Texas*

The Honorable Kimberly C. Priest Johnson, *United States Magistrate Judge for the Eastern District of Texas*

The Honorable Christine A. Nowak, *United States District Court for the Eastern District of Texas*

The Honorable Judge A. Nugent, *U.S. Immigration Judge, U.S. Department of Justice*

The Honorable Tonya Parker, *United States District Court for the Eastern District of Texas*

## **Faculty Emeriti**

Maureen N. Armour, B.A., M.S.W, J.D., *Professor Emeritus of Law*

William J. Bridge, B.S.F.S., J.D., *Professor Emeritus of Law*

Beverly M. Carl, B.S.L., J.D., LL.M., *Professor Emeritus of Law*

Gail Daly, B.A, M.A, J.D., *Professor Emeritus of Law*

Linda S. Eads, B.A., J.D., *Professor Emeritus of Law*

Ndiva Kofele-Kale, B.A, M.A, J.D. Ph.D., *Professor Emeritus of Law*

Henry J. Lischer, Jr, B.B.A., J.D., LL.M., *Professor Emeritus of Law*

Charles J. Morris, B.A., LL.B., *Professor Emeritus of Law*

Frederick C. Moss, A.B., J.D., LL.M., *Professor Emeritus of Law*  
 John J. Mylan, B.S., J.D., LL.M., *Professor Emeritus of Law*  
 Victoria Palacios, J.D., *Professor Emeritus of Law*  
 Kenneth L. Penegar, A.B., J.D., LL.M., *Professor Emeritus of Law*  
 Walter W. Steele, Jr, LL.B., *Professor Emeritus of Law*

 Peter Winship, A.B., LL.B., LL.M., *Professor Emeritus of Law*

## Adjunct Faculty

**Note:** The list of faculty adjuncts provided here is advisory only. In any given term, a particular adjunct may not be able to teach because of other commitments. This is especially true because many of SMU's adjuncts are professionals or scholars who are in high demand throughout Dallas and the nation.

Reeni Ann Abraham	Stephen Fahey	Gerald N. Olson

# **Dedman School of Law: General Information**

## **Programs and Instruction**

### **Juris Doctor Degree**

The Juris Doctor is the first law degree normally obtained in three years of study. The primary purpose of the J.D. program is preparation for the practice of law, private or public. The curriculum combines training in the science and method of law, knowledge of the substance and procedure of law, understanding of the role of law in society and practical experience in handling professional problems. It also explores the responsibility of lawyers and their relations to other segments of society. Detailed discussions of the J.D. program and the variety of courses offered are found in this catalog under The Juris Doctor Program and The Curriculum.

Most courses are national or international in scope, although emphasis on Texas law is available for those who plan to practice in Texas. In addition to traditional academic study, the school has a vibrant clinical program that provides students with an opportunity to earn academic credit while engaging in the actual practice of law. For this work, the school provides administrative assistants and offices conveniently located on the Dedman School of Law campus. All clinical programs are under the supervision of an Associate Dean who is a full-time faculty member and a combination of full-time and part-time faculty, all of whom are practicing attorneys. The clinics serve clients from the Dallas area in the areas of civil law, consumer advocacy, criminal law, family law, victims of crimes against women, federal taxation, small business, trademark, and patent law. The clinics also work with the Dallas County Public Defender's office to battle against wrongful convictions. Students interview clients, prepare pleadings and present cases in court with the assistance of the clinic faculty. Clinic students also advocate on behalf of clients outside of the courtroom, and work with courts and community groups to solve problems and promote meaningful access to justice. All clinics include classes that provide student opportunities to develop practical legal and professional skills related to the practice of law. This work is open to upper-division students. Individual descriptions and requirements for each clinic are found in this catalog under The Curriculum.

Many graduates choose to practice in the Southwest, but more than 12,000 SMU Dedman School of Law graduates are found in all 50 states and the District of Columbia and in more than 77 foreign countries. Similarly, although most students come from the Southwest, students are enrolled from all parts of the country.

### **Juris Doctor/Master of Business Administration Program**

The Dedman School of Law and the Graduate Division of the SMU Cox School of Business offer a joint program leading to the J.D. and the M.B.A. in four years of full-time study. For students with certain qualifications, a fast-track option may be available. Students must be admitted to both programs as joint J.D./M.B.A. students. The joint program is designed to prepare students for law practice with a business emphasis or for business careers with a legal emphasis. A detailed description is found in this catalog under Joint Degrees.

### **Juris Doctor/Master of Arts in Economics Program**

This program allows for joint study in law and economics following the first year of required legal study. Students must be admitted to both programs separately. A detailed description is found in this catalog under Joint Degrees.

### **Advanced Degrees**

The Master of Laws (taxation) and general LL.M. degrees for U.S.-trained law graduates, the LL.M. degree for foreign law school graduates and the Doctor of the Science of Law advanced research degree for both U.S. and foreign law school graduates are described in this catalog under Graduate Legal Studies. Approximately 70 full-time and 10 part-time students are enrolled in these graduate programs.

### **Nondegree Enrollment and Auditing**

Attorneys holding valid U.S. law licenses or graduates from American Bar Association-approved law schools may enroll in or audit courses offered at the Dedman School of Law on a space available basis. Additional information is found in this catalog under The Juris Doctor Program in the Nondegree Enrollment and Auditors section.

## **The Law School Quadrangle**

The Law School Quadrangle, a four-building complex, occupies 6 acres on the northwest corner of the SMU campus. Storey Hall houses administrative, faculty, law review and student organization offices and a clinical facility. Florence Hall contains class and seminar rooms and a state-of-the-art trial courtroom. Carr P. Collins, Jr. Hall contains a dining facility, career services offices, admissions offices, public service and academic support offices, student lounges and seminar rooms. Underwood Law Library contains open stacks for its collection, computer facilities, carrels and comfortable seating for students. Two large lecture halls, including one that serves as a magnificent grand appellate courtroom, are also located on the main floor of Underwood. Consistent with the entire SMU campus, the buildings are modified Georgian architecture. The Law School Quadrangle is served by a wireless network. Student housing is available on campus in areas close to the quadrangle. Additional information is found in this catalog under University Services in the Residence Accommodations section.

## **The Underwood Law Library**

Familiarity with the materials and services of a law library is essential to effective performance as a law student and as an attorney.

SMU's Underwood Law Library is the largest private academic law library west of the Mississippi River. Its collections include more than 670,000 law-related volumes and equivalents, ranking the library among the top 20% of law libraries in the United States. The library's building is the fifth largest academic law library in the country.

The subject area strengths of the Underwood Law Library's collections mirror the Law School's curriculum and faculty research concentrations: corporate law, commercial and banking law, criminal, securities, taxation, air and space law, constitutional law, intellectual property, international law, law and medicine, and legal ethics. The library's collection of antiquarian law books, including the McKnight Antiquarian Book Collection, is one of the leading collections of its kind in the country, with volumes printed as early as 1473. The library has more than 700 seats and 14 group study rooms.

## **Student Conduct**

Students are expected to conduct themselves as prospective members of the legal profession. A copy of the Student Code of Professional Responsibility is provided in this catalog. The code currently in effect was drafted by a student/faculty committee, approved by the faculty and ratified by the student body. By enrolling in the school, students are deemed to have notice of the code's contents and therefore should familiarize themselves with its standards and disciplinary procedures. In addition, students are expected to comply with the policies and procedures established by the administrative offices at the Dedman School of Law and the University. Matriculation in the University constitutes a declaration of compliance with all University rules and regulations.

The Dedman School of Law strongly discourages full-time students, especially those in the first year, from working more than 20 hours a week.

Students are not permitted, without the written consent of the dean, either individually or collectively to use the name of the University or of the Dedman School of Law in any activity outside the regular work of the school.

## **Policy on Nondiscrimination**

Southern Methodist University's notice of nondiscrimination is found in this catalog under Catalog Policy and Legal Statement. This nondiscrimination policy applies to the activities of the Dedman School of Law in admission, placement, housing, facilities, scholarships, grants and all other academic and nonacademic opportunities, including those that are honorary. Further, the Office of Career Services is available only to employers who sign a statement of compliance with nondiscriminatory practices in hiring as defined by the Association of American Law Schools.

## Scholarly Publications

Students have the opportunity to participate in the publication of five law reviews – the *SMU Law Review*, the *Journal of Air Law and Commerce*, *The International Lawyer*, the *Law and Business Review of the Americas* and the *SMU Science and Technology Law Review*. The *SMU Law Review* and the *Journal of Air Law and Commerce* are published by the SMU Law Review Association, which also publishes as a separate journal, the *Annual Survey of Texas Law*. The *International Lawyer* and *Law & Business Review of the Americas* are published by the International Law Review Association of SMU. The law reviews select their editorial staffs on the basis of academic performance and a writing competition. The writing competition is open to students who have completed all first-year required courses (found in this catalog under The Curriculum) and generally is held during the summer.

The operation and management of each publication is vested in an elected board of editors. The board is selected from those students who have served at least one year on the staff of the law review and who have exhibited a strong ability in legal research and writing. The work of students on the school's publications has produced periodicals of permanent value to the legal profession.

The *SMU Law Review*, formerly the *Southwestern Law Journal*, is published four times each year and reaches law schools, attorneys and judges throughout the United States and abroad. Each issue includes articles by prominent legal scholars and practitioners dealing with significant questions of local, national and international law. In addition, articles by students analyze recent cases, statutes and developments in the law. All editing is done by student members of the board of editors and the staff.

The *SMU Law Review* also sponsors the annual SMU Corporate Counsel Symposium on current developments in corporate law. Selected papers from the symposium may be published in one of its issues. The symposium attracts corporate practitioners from throughout the United States.

The *Journal of Air Law and Commerce*, a quarterly publication of the Dedman School of Law, was founded at Northwestern University in 1930 and moved to SMU in 1961. The oldest scholarly periodical in the English language devoted primarily to the legal and economic issues affecting aviation and space, it has a worldwide circulation of more than 2,300 subscribers in some 54 countries. Articles by distinguished lawyers, economists, government officials and scholars deal with domestic and international problems of the airline industry, private aviation and outer space, as well as general legal topics that have a significant impact on the area of aviation. Also included are student commentaries on a variety of topical issues, case notes on recent decisions, book reviews and editorial comments. The *Journal of Air Law and Commerce* sponsors an annual symposium on selected problems in aviation law and publishes selected papers from that symposium in one of its issues. More than 500 aviation lawyers and industry representatives annually attend.

*The International Lawyer* is the official triannual publication of the American Bar Association's Section of International Law. Prior to 2013, it was a quarterly publication that included a special Year in Review issue, which is now a separate annual publication known as *The Year in Review*. The ABA published the inaugural issue of *The International Lawyer* in 1966, and SMU has been the proud home of this prestigious journal since 1986.

Since then, *The International Lawyer* has grown to become the most widely distributed U.S. international law review in the world, enjoying subscriptions of approximately 22,000 readers in more than 90 countries. In an effort to satisfy its worldwide readership, this publication focuses primarily on practical issues of international law, including trade, licensing, direct investment, finance, taxation, litigation, and dispute resolution.

*The Year in Review*, previously included as an issue of *The International Lawyer*, is now its own annual publication of the American Bar Association's Section of International Law. It has had a place as a prestigious ABA publication since 1966 and has called SMU Dedman School of Law its home since 1986.

*The Year in Review*, as its name suggests, is an annual survey of the law from around the world. On average, thirty to forty Committees of the ABA/SIL contribute to the publication and capture the germane legal developments, key pieces of legislation, and landmark decisions that help to shape the legal tapestry of their respective countries and areas of interest. Catering to the ABA/SIL membership and others, The YIR shares in the same readership as TIL.

The **SMU Science and Technology Law Review** is published two to four times a year. Students from the Dedman School of Law serve as the editorial board and staff members. The journal focuses on national and international science and technology-based legal issues, including the legal use and limits of hardware and software, social media law, data privacy and security, environmental law, the impact of science on law and vice versa, and intellectual property law.

## Student Activities and Organizations

Students are encouraged to involve themselves in the life of the Dedman School of Law community through participation in activities and organizations. The following activities and organizations are currently active:

**SMU Student Bar Association.** The SBA is composed of all students in the Dedman School of Law. Officers and upper-division class representatives are elected in the spring term of each academic year. Class representatives for first-year students are elected approximately one month after the fall term has commenced. The primary function of the SBA is to represent the concerns and interests of the school's student body. The SBA sponsors a variety of extracurricular events. All students are urged to serve on one or more of the SBA committees.

**Barristers.** The Barristers is a general service organization of 15 law students elected on the basis of scholarship, leadership, achievement and personality.

**Board of Advocates.** The SMU Board of Advocates is the umbrella student organization that oversees advocacy programs at the Dedman School of Law. It also coordinates with faculty SMU's participation in national and international advocacy competitions. The board's administrative committee promotes development of the school's advocacy programs, and publicizes and coordinates the various intraschool competitions. Its Interscholastic Competition Board has coordinated participation in a number of mock trial and moot court competitions in which SMU law students compete against students from other law schools across the country.

**Inns of Court Program.** The Inns of Court sponsored by Haynes and Boone, LLP is an interdisciplinary approach to the first-year experience at SMU Dedman School of Law. With over 200 first-year students, the law school recognized a need for smaller, more personalized groups to provide students with a source of relationships and support. Through the Inns, students connect with fellow classmates, faculty, student leaders, career advisers, and alumni for a community experience that extends throughout their time at the law school and beyond graduation. All first-year students are assigned to an Inn during orientation and typically meet weekly with their Inns at the same time and place. In addition to first-year and international LL.M. students, each Inn has two faculty advisers, one Career Services counselor, three alumni Community Fellows and six upper-class students—three Student Bar Association Mentors and three Academic Success Mentors. Inns also provide valuable programming specifically designed to help students become more successful and develop as professionals.

**Mac Taylor Inn of Court.** The William "Mac" Taylor American Inn of Court is a chapter of the American Inns of Court, in which federal and state judges, senior and junior lawyers, and law students participate. Members of the inn meet monthly for dinner and an educational program dealing with an issue of practice and professional responsibility. Several other Inns of Court in the Dallas-Fort Worth area, including some specializing in Bankruptcy, Family Law and Intellectual Property, also accept SMU Dedman School of Law student members.

**Legal Fraternities.** The school has two legal fraternities – the Roger Brooke Taney Chapter of Phi Alpha Delta and the Monteith Inn of Phi Delta Phi. Legal fraternities are open to men and women.

**Moot Court Board.** This student organization administers a program to instruct first-year students in oral advocacy. The board, which is sponsored by Lynn Pinker Cox & Hurst, LLP, organizes a moot court competition that is mandatory for all first-year students.

**Oxford Program.** Approximately 30 students spend six weeks in the summer studying law in Oxford, England. Students earn five hours of credit by taking one course from an SMU professor and one Oxford-style tutorial from an Oxford tutor. Participants live and take their meals in historic University College, Oxford. The program also includes visits with English lawyers and a trip to the Royal Courts of Justice.

**Other Student Organizations.** In addition to those listed above, the following law student organizations are currently active on the SMU campus: Aggie Law Students, American Constitution Society, Asian Pacific American Law Students Association, Association of International Petroleum Negotiators – Student Chapter, Association for Public Interest Law, Baylor Law Student Association, Black Law Students Association, Christian Legal Society, Corporate Law Association, Criminal Law Society, Energy Law Association, Environmental Law Society, Family Law Association, Federalist Society, Health Law Association, Hispanic American Law Students Association, Intellectual Property Organization, International Law Review Association, International Law Society, Jewish Law Students Association, Labor and Employment Law Students Association, Law Students for Life, Law Students for Reproductive Justice, Longhorn Bar Association, Muslim Law Students Association, OutLaw (Lesbian and Gay Law Students), Older and Wiser Law Students, Science and Technology Law Review, Real Estate Law Association, Red Raider Law Student Association, SMU Law Review Association, SMU Veterans Law Association, Student Animal Legal Defense Fund, Sports and Entertainment Law Group, Tax Law Society, and Women in Law.

# Dedman Law: Academic Programs

## Juris Doctor, J.D.

### Admission

#### Dates of Admission

Beginning J.D. students are admitted only for the fall term.

#### Application for Admission

Applications should be submitted using the Law School Admission Council application service. Applications must be submitted by November 15 to be considered for early decision and by February 15 to be considered for regular decision. The applicant must file transcripts from all undergraduate institutions attended with LSAC's Credential Assembly Service.

#### Law School Admission Test

Applicants for admission to the J.D. program must take the Law School Admission Test. Applicants are urged to take the LSAT no later than the February testing date preceding the fall term in which they seek admission.

#### Prelaw Studies

Although exceptions may be made in special circumstances, an entering student is required to have received a bachelor's degree from an accredited college or university prior to enrollment in the Dedman School of Law. Admitted students must provide the school with an official transcript showing receipt of a bachelor's degree before enrollment. The copy of the transcript supplied to the school by the CAS is adequate for preliminary determination of admission but is not an official transcript.

Dedman School of Law does not prescribe a fixed course of prelegal study, but does examine the record of each applicant to determine whether the undergraduate courses taken reflect adequate preparation for the study of law. The student should pursue a well-rounded course of study, with particular attention devoted to the development of analytical skills and facility and style in the use of the English language.

#### Admission by Selection

The purpose of the J.D. program is to train students for competent and ethical practice of law on behalf of both private and public clients and for intelligent use of law in business, government and other pursuits. The course of study requires reading and analysis of difficult legal materials, training in effective advocacy of positions in both oral and written form and the acquisition of other legal skills, such as the drafting of instruments, the counseling of clients and the negotiation of disputes. Only those applicants who have the capacity to acquire these skills will be admitted. In deciding whether an applicant has this capacity, Dedman School of Law relies heavily upon LSAT scores and undergraduate grades. The school also considers the types of courses taken, the schools attended, letters of recommendation, the amount of time the applicant has been required to work during his or her undergraduate career, and extracurricular activities and other maturing experiences.

Each year the number of applicants with the requisite capacity far exceeds the number of places in the entering class. In choosing among these applicants, the admissions committee looks for those whose performance at Dedman School of Law will be outstanding; those who, because of their backgrounds, will bring to the school different and unusual perspectives; and those whose homes are in areas of the country underrepresented in the student body. Applications from members of minority groups are encouraged.

#### Admission Deposit and Medical History

Admitted applicants must make their deposit(s) with the Dedman School of Law as set forth in their admissions packet. The due date for any deposit is not earlier than April 1. The deposit is credited toward tuition charged upon enrollment. It will be forfeited if the student fails to enroll that fall.

All students must have a Report of Medical History on file at the Dr. Bob Smith Health Center prior to their enrollment at SMU. In order to comply with state law, all students must provide proof of certain immunizations.

## **Admission with Advanced Standing (Transfers From Other Law Schools)**

### **Students Eligible**

A student who has successfully completed the traditional first-year curriculum (usually 27–30 hours) at another law school that was at the time of the student's study a member of the Association of American Law Schools or approved by the Section on Legal Education of the American Bar Association may apply for admission with advanced standing. On a limited basis, a student who has successfully completed at least 20 hours in a part-time program at another law school that was at the time of the student's study a member of the Association of American Law Schools or approved by the Section on Legal Education of the American Bar Association may apply for admission with advanced standing. Admission is selective. A student who has been excluded from or who is on probation at another school will not be admitted.

### **Dates of Admission**

A transfer applicant may be admitted in any term or session.

### **Application**

Application for admission with advanced standing must be made using the LSAC's online application. It must be supported by a CAS report including transcripts from all colleges and law schools previously attended. Good standing in the law school last attended must be established by a letter from the administration of that school. The application must be supported by two letters of recommendation and accompanied by a \$75 nonrefundable application fee. The committee cannot consider any application until all law school grades have been received.

### **Advanced Credit**

The amount of advanced credit given for work completed in another law school will be determined by the assistant dean for student affairs. Credit for work completed at another law school transfers as pass/fail credit. In no event can a transfer student receive more than 29 hours of transfer credit. Credit will be given only for coursework completed at an ABA-accredited law school.

### **Minimum Hours Requirement**

A student admitted with advanced standing may not qualify for a degree from Southern Methodist University until the student satisfactorily completes at least 58 credit hours at the Dedman School of Law.

### **Waiver of First-Year Minimum Hour Requirement**

A limited number of qualified applicants who show good cause why they are unable to take the standard number of full-time credit hours required in the first year may obtain a waiver of this requirement. Except as permitted by the assistant dean for student affairs, students permitted to take a reduced course load will take seven to eleven hours per term (excluding the summer) until they have completed all first-year required courses (found in this catalog under The Curriculum). These students must meet all other requirements of the J.D. program. Applicants interested in the reduced load option should contact the Office of Admissions for additional information.

The admission procedure for applicants seeking a waiver of the first-year minimum credit-hour requirement is the same as that for the J.D. program except that applicants should submit a written statement explaining why they are unable to satisfy the standard course load requirement.

## **Graduate Legal Studies**

### **Objectives of Graduate Legal Studies**

SMU's School of Law established graduate degree programs more than 50 years ago to enhance careers in the private practice of law, in teaching and in public service by providing the opportunity for graduate level education and training.

The programs are designed to increase the student's understanding of legal theory and policies, broaden the student's legal horizons and encourage the development of legal research and writing skills.

The Master of Laws degree programs are open to lawyers who are graduates of approved law schools and whose academic and professional records indicate a likelihood of successful graduate legal study.

## Graduate Degrees Offered

Among Dedman School of Law's graduate degree programs, the main focus is on its Master of Laws in taxation degree for those holding a J.D. degree and on its Master of Laws degree for foreign law school graduates. However, the school also offers a general Master of Laws degree and a Doctor of the Science of Law degree.

## Law, S.J.D.

The degree of Doctor of Juridical Science is the highest postgraduate law degree offered by the Dedman School of Law. The S.J.D. primarily is a research and writing degree (as opposed to a course-oriented degree such as the LL.M. degree) during which the S.J.D. candidate conducts extensive postgraduate-level legal research with a view toward submitting an acceptable doctoral dissertation of publishable quality within a five-year period. Additional information is found in this section under Requirements for the Degree.

## Nature of the Degree

The S.J.D. is not a professional degree, such as the Dedman School of Law's J.D. degree; it is intended to be an intense postgraduate, academic research experience.

## Admission Requirements

The S.J.D. is a postgraduate degree. The following are criteria for admission:

1. Career goals. The S.J.D. is primarily intended for highly qualified candidates seeking a legal academic career or a high-level, policy-oriented governmental or intergovernmental position, and the candidate must demonstrate such a career goal.
2. Academic achievement. An applicant must demonstrate outstanding achievement in previous academic programs.
3. Research and writing. An applicant must demonstrate the ability to conduct graduate-level legal research and writing in English. Preference is given to Dedman School of Law LL.M. students who have excelled in their LL.M. degree and have shown an ability to conduct graduate-level legal research and write in English as evidenced by a course paper or a directed research paper submitted as an LL.M. candidate at SMU. Applicants who hold an LL.M. degree or equivalent from another law school and who demonstrate excellent legal research and legal writing abilities in English may be considered for admission. Also, individuals who have an established academic, legal professional, governmental or intergovernmental career, who have suitable career objectives for pursuing the S.J.D. degree and who have demonstrated significant legal research and legal writing abilities in English may be considered for direct admission into the S.J.D. (with or without an LL.M. degree).
4. Primary supervisor. The applicant must obtain as a primary supervisor a faculty member of the SMU Dedman School of Law. The primary supervisor must have particular expertise in the S.J.D. candidate's general area of doctoral research. Additional information is found in this section under Role of Primary Supervisor.
5. Statement of subject of dissertation. The applicant, with the assistance of the primary supervisor, must submit a document of no more than 2,000–3,000 words explaining the research topic the applicant will undertake for the purpose of preparing the dissertation.

## Admission to the S.J.D. Program

An applicant who is granted admission to the S.J.D. program initially is admitted in a probationary status. The S.J.D. candidate must demonstrate progress toward completion of the requirements for the degree to continue as an S.J.D. candidate. The S.J.D. candidate is matriculated as of the first day of the first term in which the S.J.D. candidate commences the S.J.D. program. The date of matriculation is relevant for purposes of the various time periods.

## **Probationary Status for First Two Years**

The S.J.D. candidate must be in residence at the Dedman School of Law for not less than two academic years, during which time the S.J.D. candidate is in probationary status. During the first probationary year, the S.J.D. candidate (subject to the overall direction of the primary supervisor) will be concerned primarily with conducting extensive research for the purpose of identifying all relevant legal and other materials in the dissertation subject matter. In addition, the S.J.D. candidate will prepare and submit to the primary supervisor (in the following order): 1) a suitable research abstract indicating the thematic and analytical framework and proposition(s) to be proved, and the objectives to be achieved by the dissertation; 2) a detailed subject-matter outline for the dissertation; 3) an extensive working bibliography; and 4) an introductory draft chapter (or equivalent writing) that is at least 10,000 words and that indicates doctoral-level legal research and legal writing abilities.

During the first probationary year, the S.J.D. candidate may be required or advised by the primary supervisor to take selected Dedman School of Law or other University courses, classes, seminars, etc., that are directly related to enhancing the S.J.D. candidate's prospects for completion of the degree. As a general proposition, however, the S.J.D. candidate should be engaged in doctoral research and writing, not taking courses. If the S.J.D. candidate is pursuing other time-consuming objectives (such as, studying for a bar examination or for other professional qualifications) at the same time as pursuing the S.J.D., the S.J.D. candidate must advise the primary supervisor and the Committee on Graduate Legal Studies. The Committee on Graduate Legal Studies looks with disfavor on such activities, as they generally are detrimental to the S.J.D. candidate's prospects for completing the degree. In any case, an S.J.D. candidate cannot be pursuing two degree programs at the same time.

## **Annual Progress and Reports to Graduate Committee**

An S.J.D. candidate must submit an annual report to the Committee on Graduate Legal Studies. The report must be submitted within two months after the anniversary date of matriculation as an S.J.D. candidate. The report is to inform the committee of the progress of the S.J.D. candidate and is to include a description of the research and writing completed during the reporting period. In addition, the primary supervisor will submit a report to the committee regarding the progress of the S.J.D. candidate toward completion of the degree.

In order for the S.J.D. candidate to continue in probationary status for the second year, the committee must be satisfied that the S.J.D. candidate, during the first probationary year, has made substantial progress toward completion of the degree. If the committee determines that the S.J.D. candidate, during the first probationary year, has not made substantial progress toward completion of the degree, the status as an S.J.D. candidate is terminated and the person is withdrawn from the S.J.D. program.

By the end of the second probationary year, the S.J.D. candidate must complete a 30,000-word to 40,000-word work product comprising at least two chapters (or equivalent) of the dissertation. This work product must be of "publishable" quality, and the Committee on Graduate Legal Studies will look with favor on the S.J.D. candidate's publishing in an acceptable medium at least a portion of this work product. In order for the S.J.D. candidate to complete the two-year probationary status (and be admitted unconditionally to the S.J.D. program), the S.J.D. candidate must demonstrate by the end of the second probationary year that there is a substantial likelihood the candidate will successfully complete the degree requirements within the required five-year period. In making this determination, the graduate committee will consider, among other relevant information, the candidate's annual report for the second year and the primary supervisor's report for the second year. If the necessary substantial likelihood is not shown, the status as an S.J.D. candidate is terminated and the person is withdrawn from the S.J.D. program.

## **Supervisory Committee**

After an S.J.D. candidate has completed the two-year probationary period, the Committee on Graduate Legal Studies shall appoint other people to comprise a supervisory committee for the S.J.D. candidate. The committee shall be composed of at least three members, including the primary supervisor, another member of the Dedman School of Law faculty appointed by the committee and a senior "external" person qualified in the area of research and appointed by the committee. The primary supervisor has principal responsibility for nurturing and supervising the S.J.D. candidate. The supervisory committee is to read and critique the dissertation submitted by the S.J.D. candidate and to advise the Committee on Graduate Legal Studies as to whether the S.J.D. candidate has produced a satisfactory dissertation.

## After the Probationary Period

After successful completion of the two-year probationary period, an S.J.D. candidate has up to three additional years to satisfy all requirements for the S.J.D. degree. The S.J.D. candidate need not be in residence at SMU during this period. During the post-probationary period, the S.J.D. candidate will have general continuing access to the primary supervisor, but on a less intense and less frequent basis than during the first two years of probationary status.

## Requirements for Degree

Within a five-year period from first matriculation as an S.J.D. candidate, the S.J.D. candidate must satisfy the following requirements:

- a. Completion of the two-year probationary period.
- b. Submission of a doctoral dissertation of at least 80,000 words but no more than 100,000 words (including footnotes, but excluding bibliography, front pages, table of contents, and any annexes or appendices) on a coherent, analytical and focused theme of a substantially legal nature or submission of an equivalent doctoral dissertation in the form of a series of interrelated articles/chapters on a more general topic, but which collectively comprises a topically coherent volume.
- c. The dissertation must constitute the original work product of the S.J.D. candidate.
- d. The dissertation must represent and show evidence of substantial doctoral-level research work.
- e. The dissertation must display significant legal analyses on a doctoral-level subject.
- f. The dissertation must be of a publishable quality according to acceptable U.S. law review standards.
- g. The dissertation must make a substantial contribution to the advancement of the understanding of the relevant research subject matter.
- h. It is within the discretion of a S.J.D. candidate's supervisory committee to require a *viva voce* (oral examination), at which the S.J.D. candidate will be asked "to defend" orally his/her dissertation in the presence of the members of the supervisory committee.
- i. The dissertation must be approved by each member of the supervisory committee.

The award of the S.J.D. requires approvals of the Committee on Graduate Legal Studies, the law faculty and University. Such decisions cannot be appealed, except as provided. If the S.J.D. candidate's doctoral dissertation is not approved, the graduate committee will provide the S.J.D. candidate with an explanation of the reasons why it was disapproved, and the S.J.D. candidate then will be given one further 12-month period within which to endeavor to satisfy such comments and to resubmit a revised dissertation. If the S.J.D. candidate then does not, within the 12-month period, satisfy all doctoral requirements, the person is withdrawn from the S.J.D. program.

## Role of Primary Supervisor

The primary supervisor will serve as the S.J.D. candidate's academic adviser and will provide the S.J.D. candidate with general and specific guidance on the S.J.D. candidate's research and written work product. The supervisor is not to serve as an editor of the S.J.D. candidate's work product. While the supervisor will make general comments on the submitted work product and may make selective specific comments or otherwise may help arrange for the S.J.D. candidate to take advantage of available University/Dedman School of Law postgraduate legal writing resources, the burden is on the S.J.D. candidate to make any needed editorial arrangements at the candidate's own expense (such as a qualified J.D. student who may be willing to assist in the editorial process). During the required two-year residency period, the supervisor will meet on a periodic basis with the S.J.D. candidate. However, it is to be understood that the S.J.D. degree is a research degree requiring extensive independent legal research by the S.J.D. candidate in the area of the dissertation.

## Termination of Status as Candidate

The status of an S.J.D. candidate may be terminated, and the person withdrawn from the S.J.D. program, for any of the following reasons:

1. Failure to satisfy the requirements of the first probationary year.
2. Failure to satisfy the requirements of the second probationary year.
3. Failure to submit a dissertation within the prescribed five-year period.
4. If a dissertation is submitted in a timely manner, failure to satisfy all requirements and standards for the dissertation.

5. Failure to pay in a timely manner any required fees.

An S.J.D. candidate whose status is terminated may make a formal appeal in writing to the Committee on Graduate Legal Studies. This appeal must set forth all relevant and/or extenuating circumstances and reasons why the committee should reconsider the termination. It is within the sole discretion of the committee whether to reconsider or not, and, if it chooses to reconsider, then any decision of the committee is final. If the committee does reconsider, it may impose any general and/or specific conditions/requirements as it wishes.

## Fees

For the first year of the program, S.J.D. candidates will be charged the equivalent of full-time tuition and fees applicable to LL.M. students. Thereafter, S.J.D. candidates will be assessed a special fee for each fall and spring term until approval of the final dissertation. This fee will be set at the beginning of each term. The 2019–2020 fee is \$5,662 per term.

There are no Dedman School of Law scholarships or research/teaching assistantships available for the S.J.D. degree. On an individual basis, an S.J.D. candidate may apply to be the research assistant of a particular faculty member, but any such arrangement must be made individually with the faculty member, who reserves full discretion in such a matter.

## Tuition and Fees

Detailed information about tuition and fees is found in this catalog in the Financial Information section and in the current catalog supplement *Bursar's Financial Information Bulletin*.

## Application and Information

To obtain further information and applications for admission, students should contact the Office of Graduate Legal Studies, Dedman School of Law, Southern Methodist University, PO Box 750111, Dallas TX 75275-0111; 214-768-2658.

## Comparative and International Law, LL.M.

The graduate program for foreign law school graduates is rooted in the efforts of SMU's School of Law in the early 1950s to make the school a leading international legal center. More than 2000 international graduates of the school from more than 80 countries now occupy prominent positions in government, legal practice, business, the judiciary and legal education around the world.

The primary goal of the program is to enhance the international student's legal skills so that he or she may become a more effective lawyer and member of society. In this respect, the program seeks to develop

- An appreciation of the role of law in national and international development.
- The ability to identify, through comparative and international studies, policy considerations of various legal rules.
- An appreciation of the role of the lawyer in social and economic change.
- Legal analysis and problem-solving abilities to enable the student to meet the complex needs of the modern world.
- A basic understanding of the U.S. legal system, as studied from a comparative perspective.
- A frame of reference for dealing with business and legal interests in a transnational setting.

This LL.M. degree can also qualify a person to take the bar examination in Texas, New York and California, if the student meets certain curricular requirements and otherwise complies with the regulations of such states.

## Admission Criteria

An applicant for admission to this LL.M. degree program must be a graduate of a recognized foreign law school. The applicant's undergraduate record must demonstrate scholarly legal aptitude. An applicant for whom English is a second language must present evidence of a TOEFL English language proficiency test, with an Internet-based score of 90 or written score of 575 or IELTS band score of 6. U.S.-trained law students may not apply to this degree program.

Students who do not meet these requirements can apply for conditional admission, subject to completion of an approved English as a Second Language program, or a waiver for good cause.

## Application Procedure

An applicant must include with the application: a short curriculum vitae; evidence of proficiency in English (normally a TOEFL English language proficiency test score of 90 on the Internet-based test or 575 on the written test); a certified transcript in English of grades received in law school; letters of recommendation in English (or translated into English); evidence of financial ability to pay tuition, fees and all other expenses during the applicant's stay in the United States; and a recent head-and-shoulders photograph of the applicant.

## Financial Aid

The Robert G. Storey Memorial Fund provides scholarship support to an outstanding foreign graduate law student who undertakes an intensive course of study in comparative and international law. The Sohmen Endowed Scholarship Fund and Sohmen Chinese Scholars Program Endowment provide full tuition and fees and a monthly living stipend for up to four students from China. Additional scholarships are available for qualified students and are awarded at the time of admission.

International applicants should note that the Dedman School of Law has no funds to grant for travel expenses, either to or from the United States or within the United States, nor does it have any administrative influence through which governmental or private agencies can be persuaded to assist in travel.

## Specialized Courses

The following listing illustrates the diversity and depth of courses offered at the Dedman School of Law in comparative and international law. Applicants should note, however that school does not offer all of these courses and seminars each term or even each year. In addition, some courses have limited enrollments or prerequisites that a student may not satisfy. The school's Registrar's Office publishes a schedule of courses before the beginning of each term. Students must consult these schedules for actual course offerings. The credit hours for each course are given at the beginning of each course description included under The Curriculum in this catalog. Other related courses not listed may also be offered each year on a one-time-only basis.

- LAW 6321 - Admiralty
- LAW 6318 - Banking Law and Regulation: Domestic and International
- LAW 6394 - Business Enterprise for LL.Ms
- LAW 7277 - Business Enterprise for Master of Laws Students
- LAW 7321 - Comparative Law I
- LAW 7122 - Comparative Law II
- LAW 7222 - Comparative Law II
- LAW 7322 - Comparative Law II
- LAW 6136 - Directed Research
- LAW 6353 - Immigration Law
- LAW 8258 - Immigration Law
- LAW 8345 - International and Comparative Health Law
- LAW 8312 - International and Foreign Legal Research
- LAW 7315 - International Business and Financial Transactions
- LAW 6327 - International Commercial Arbitration
- LAW 7356 - International Crimes
- LAW 8219 - International Economic Law and Development
- LAW 8319 - International Economic Law and Development
- LAW 6276 - International Environmental Law
- LAW 7231 - International Franchising Law

- LAW 6226 - International Intellectual Property
- LAW 6355 - International Law
- LAW 6313 - International Petroleum Transactions
- LAW 6224 - International Protection of Human Rights
- LAW 6324 - International Protection of Human Rights
- LAW 7216 - International Tax I
- LAW 7302 - International Tax I
- LAW 7255 - International Tax II
- LAW 6228 - Oil and Gas Contracts
- LAW 7369 - Oil and Gas Contracts
- LAW 9100 - Legal Practical Training Internship
- LAW 6110 - Legal Practical Training II
- LAW 6210 - Legal Research and Writing for International LL.M. Students
- LAW 7293 - Perspectives of the American Legal System
- LAW 6215 - Professional Responsibility for International LL.M. Students
- LAW 6310 - Transnational Law

## **Additional Information**

In addition to the above courses which are related to international legal issues, LL.M. students enroll in many other classes, which emphasize American Law. Students desiring to qualify for the Texas or New York or other state bar exams enroll in some courses that are tested on relevant bar exams, in accordance with such state's bar exam requirements.

## **Degree Requirements**

- A. Students in this program may begin their studies in the fall or spring terms. In addition, they must participate in an extensive orientation program held at the Dedman School of Law in mid-August or early January before the start of classes.
- B. Students pursuing the LL.M. degree for foreign law school graduates must complete 24 hours of credit from courses or seminars selected in consultation with the student's faculty adviser, who is assigned during orientation. Faculty members advising candidates for this degree will make every effort to tailor a student's study plan to his or her specific graduate objectives. However, all students are required to take LAW 7293 - Perspectives of the American Legal System. In addition, many students take LAW 6394 - Business Enterprise for LL.M.s and/or LAW 7315 - International Business and Financial Transactions. Students whose degree plan includes externships for practical skills are required to take LAW 9100 - Legal Practical Training Internship and LAW 6110 - Legal Practical Training II.

The Dedman School of Law awards the LL.M. degree to those students who complete their coursework with an average grade in all courses equivalent to a grade of C- or 1.7. A student will not receive credit for a course or seminar in which his or her grade is below D or 1.0. Students for whom English is a second language are allowed additional time to complete written final examinations.

## **Admission to the Juris Doctor Program**

The J.D. is the basic law degree for U.S. law students. In a limited number of instances, international students who have graduated with distinction in the LL.M. program of the Dedman School of Law and who can demonstrate legitimate graduate study objectives for furthering their careers may be considered for admission to the J.D. program without being required to take the Law School Admission Test. Admission under such conditions to the J.D. program and the award of advanced credit, if any, is solely within the discretion of the admissions committee (taking into consideration any recommendations of the graduate committee). Advanced credit, if any, will be based upon an evaluation of the student's grades in J.D. equivalent courses in the LL.M. program and the student's record in the home country law degree, and will normally range from zero credit hours to 24 credit hours.

## **Master of Laws (General), LL.M.**

The general LL.M. program offers law graduates an opportunity to broaden their backgrounds in certain specialized areas of law by enrolling in advanced courses and seminars and by engaging in specialized research. Although the Dedman School of Law awards no specific subject-designated LL.M. degrees under this program, most students seeking this degree concentrate in areas such as corporate and commercial law, international law, legal practice and procedure, natural resources law or property law.

### **Admission Criteria**

Admission to this program is by selection. An applicant for admission to the general LL.M. degree program must hold a J.D. degree from an American Bar Association-accredited law school. With approval of the Graduate Committee, lawyers holding law degrees from foreign law schools can be admitted.

### **Application Procedures**

Applicants must include with their applications a letter setting out their interest in entering the graduate degree program, two letters of recommendation and certified transcripts from their undergraduate and law schools. Each applicant must have, in advance of acceptance, the commitment of a Dedman School of Law faculty member to serve as the applicant's academic adviser. The application, along with all supporting documentation, must be received in the Office of Graduate Legal Studies by April 15 of the year of intended enrollment or by December 1 for the following spring term. The law school makes decisions on a rolling basis and will accept applications after these dates.

### **Financial Aid**

The SMU Office of Financial Aid is available to assist students in obtaining student loans.

### **Degree Requirements**

To receive the general LL.M. degree, the student must meet all of the following requirements:

- A. Residence in the Dedman School of Law for no fewer than two terms if a full-time student and no fewer than three terms if a part-time student.
- B. Completion of 24 credit hours in courses, seminars or research and writing recommended by the student's academic adviser. A student entering the program must have a GPA of *C* or 2.0 on all courses taken. The requisite GPA of *C* or 2.0 must be obtained in the first 24 credit hours. A student will not receive credit for a course or seminar in which his or her grade is below *D* or 1.0.

With prior approval of the Committee on Graduate Legal Studies, a student may take four of the required 24 credit hours in graduate programs in Dedman College of Humanities and Sciences, Perkins School of Theology or the Cox School of Business. The student will receive Dedman School of Law credit on completion of all work to the instructor's satisfaction, but the grades will not be computed into the student's law school average.

The student may be permitted to undertake directed research for a one-hour to three-hour graded paper if the student can obtain a faculty sponsor.

A student has the option of writing a master's thesis (for four to six credit hours). This thesis must be written under the direction of a professor at the Dedman School of Law and must be approved by both the professor and the Committee on Graduate Legal Studies. After the supervising professor approves the thesis, the student must submit four copies of the thesis to the Committee on Graduate Legal Studies at least 60 days before the date on which the student seeks to receive the degree. In writing the thesis, the student must comply with committee instructions. A thesis is either approved or disapproved; it is not graded.

- C. Completion of all requirements within 36 months from the date of initial registration as a graduate law student. However, a candidate continuously enrolled as a part-time student has 60 months to complete all requirements.

## **Taxation, LL.M.**

Dedman School of Law has a long tradition of strength in the area of federal taxation. The LL.M. (taxation) program, for full-time or part-time students, is a comprehensive, advanced-degree program designed for attorneys intending to specialize in tax practice. It focuses not only on technical mastery of the tax laws but also on wider issues of tax and fiscal policy. Most of the courses in the curriculum provide survey-level instruction in subjects typically not addressed in J.D.-level tax courses. In addition, advanced courses develop in-depth, practice-oriented expertise.

Courses are taught by Dedman School of Law faculty and by adjunct professors and lecturers who are experienced, practicing tax specialists in Dallas area law firms and corporate law departments.

## **Accelerated Tax LL.M. Option**

Students enrolled in the JD Program have the option to earn both a J.D. and LL.M. (in Taxation) in only seven semesters of full-time study. This dual degree program does *not* change the requirements for either degree, but it *does* allow students to count a limited number of classes toward satisfying both degrees.

The existing LL.M. (in Taxation) degree requires 24 credit hours, taken after completion of the J.D. degree. The dual degree program allows students enrolled in the J.D. program at the *SMU Dedman School of Law*, either as a candidate for an SMU degree or as a visiting student from other ABA-accredited American law schools, to count up to 12 credits of specialized tax courses, taken at SMU while a candidate for the J.D. degree, toward the LL.M. (in Taxation) degree. Students participating in the J.D./LL.M. (in Taxation) Program must complete at least 12 credits of study as matriculated LL.M. students after completion of their J.D. degrees. Students interested in this program should meet with the Dean of Graduate and International Programs early in their academic career to be sure they are meeting the requirements of the dual degree.

## **Admission Criteria**

Admission to this program is by selection. An applicant for admission to the LL.M. (taxation) degree program must hold a J.D. degree from an American Bar Association-accredited law school. Students with a law degree from a foreign country and a strong background in tax may also be considered for admission. Students may attend either full time or part time.

## **Application Procedure**

Applicants must include with their applications a letter stating why they are interested in entering the graduate degree program, two letters of recommendation and official transcripts from both their undergraduate and law schools.

Applications for the fall term should be received by the Office of Graduate Legal Studies by April 15 of the year of intended enrollment and for the spring term by December 1 of the year preceding enrollment. The Law School makes admissions decisions on a rolling basis and will accept applications after these dates; however, it strongly encourages applicants to apply within these deadlines.

## **Financial Aid**

The Robert Hickman Smellage, Sr. Memorial Fund provides scholarship assistance to a limited number of graduate students. In addition, the SMU Office of Financial Aid is available to assist U.S. students in obtaining student loans.

## **Specialized Courses**

The following listing (abstracted from the full list of courses found in this catalog under The Curriculum) illustrates the diversity and depth of courses offered at the Dedman School of Law in taxation and related fields. Applicants should note, however that Dedman School of Law does not offer all of these courses and seminars each term or even each year. In addition, some courses have limited enrollments or prerequisites that a student may not satisfy. The school's Registrar's Office publishes a schedule of courses before the beginning of each term. Students must consult these schedules for actual course offerings. The credit hours for each course are given at the beginning of each course description included under The Curriculum in this catalog. Other related courses not listed may also be offered each year on a one-time-only basis.

- LAW 7204 - Advanced Corporate Taxation
- LAW 7235 - Corporate Finance and Acquisitions
- LAW 6232 - Corporate Planning
- LAW 6220 - Corporate Taxation
- LAW 7336 - Corporate Taxation
- LAW 6136 - Directed Research (topic: taxation)
- LAW 6236 - Directed Research (topic: taxation)
- LAW 6336 - Directed Research (topic: taxation)
- LAW 6343 - Estate Planning and Practice
- LAW 8252 - Estate, Gift, and Income Tax
- LAW 7207 - Federal Tax Procedure I
- LAW 7216 - International Tax I
- LAW 7302 - International Tax I
- LAW 7255 - International Tax II
- LAW 6225 - Mergers and Acquisitions
- LAW 6217 - Oil and Gas Taxation
- LAW 7392 - Partnership Taxation
- LAW 6267 - Principles of Accounting and Finance for Lawyers
- LAW 6293 - State and Local Tax
- LAW 7227 - Tax Accounting
- LAW 7294 - Tax Practice and Professional Responsibility
- LAW 7284 - Tax and Fiscal Policy
- LAW 7290 - Real Estate Taxation
- LAW 7291 - Taxation of Property Dispositions
- LAW 8395 - Trusts and Estates

## Degree Requirements

To receive the LL.M. (taxation) degree the student must meet all of the following requirements:

- A. Residence in the Dedman School of Law for no fewer than two terms if a full-time student and no fewer than three terms if a part-time student.
- B. Completion of 24 credit hours in courses, seminars or research and writing. Of these 24 credit hours, 18 hours must be in the taxation area. Mandatory courses are LAW 7227 - Tax Accounting and LAW 7284 - Tax and Fiscal Policy.

With prior approval of the Committee on Graduate Legal Studies, a student may take four of the required 24 credit hours in graduate programs of Dedman College (SMU's school of humanities and sciences), in Perkins School of Theology or in the Cox School of Business. The student will receive Dedman School of Law credit on completion of all work to the instructor's satisfaction, but the grades will not be computed into the student's Dedman School of Law average.

The student may be permitted to undertake directed research for a one-hour to three-hour graded paper if he or she can obtain a faculty sponsor.

- C. A student entering the program must have a GPA of *C* or 2.0 on all courses taken. The requisite GPA of *C* or 2.0 must be obtained in the first 24 credit hours. A student will not receive credit for a course or seminar in which his or her grade is below *D* or 1.0.
- D. Completion of all requirements within 36 months from the date of initial enrollment as a graduate law student. However, a candidate continuously enrolled as a part-time student has 60 months to complete all requirements.

# Dual Degrees

## Juris Doctor/Economics, J.D./M.A.

### Nature of the Program

The combined J.D./M.A. in economics, law and economics track program, is offered jointly by the Dedman School of Law and the SMU Department of Economics in Dedman College. The program is designed for law students who have some prior background in economics and who wish to develop further their abilities to deal with complex economic issues. Through the program, the combined degrees can be obtained in four academic years or even in as little as three years and one additional term if classes are taken during at least one summer term.

### Structure of the Program

The M.A. in economics, law and economics track, is a 30-hour nonthesis program that can be completed in part-time evening study. For students in the combined J.D./M.A. program, the Economics Department will accept up to nine hours of law school credit toward the M.A. degree. Dedman School of Law will accept up to six hours of graduate economics credits toward the 87 hours required for the J.D. degree. Thus, the student in the combined J.D./M.A. program will be able to receive both degrees with a total of 102 hours of credit.

The first year of the program consists entirely of law school courses, and students may apply for the joint degree plan at any time during their first year of law school. The economics curriculum consists of five required courses (15 credits), of which one may be the Dedman School of Law course LAW 6423 - Economic Analysis of Law; three elective courses (nine credits), of which one must be a 6000-level course; and up to three additional law school courses (nine credits). These economics courses will be taken along with law school courses during the remainder of the student's period of residency after the first year. Many of the economics classes are taught in the evening or during the summer term, and generally are small classes (fewer than 20 students).

The M.A. program also is available to those who have received the J.D. degree. Credit from law courses, however, cannot be counted toward the M.A. degree once the J.D. degree has been conferred. Likewise, a student who has completed the M.A. degree or the joint B.A./M.A. degree cannot receive credit toward the J.D. degree for any courses prior to entering the Dedman School of Law.

### Required Economics Courses

The required economics courses and the available electives are

- ECO 5341 - Strategic Behavior
- ECO 5350 - Introductory Econometrics
  
- ECO 5353 - Law and Economics
- or
- LAW 6423 - Economic Analysis of Law
  
- ECO 5380 - Computing For Economics
- ECO 6352 - Applied Econometric Analysis
- ECO 6372 - Econometrics I
- ECO 6381 - Economic Analysis I
- ECO 6383 - New Approaches to Managerial Economics

### Other Requirements

Except as modified by the above, a student must meet all the requirements of both schools for admission, performance, graduation, etc. In particular, the student must satisfy the law requirements outlined in this catalog in the Juris Doctor Program section, and the student must earn a grade of C or better, with an overall *B* cumulative average maintained in

the degree program. Students enrolled in the joint degree program also must complete all noncredit-bearing requirements of the program.

Students must be admitted separately into the Dedman School of Law and the M.A. in economics program.

Additional information may be obtained from the Dedman School of Law: Office of Admissions, SMU Dedman School of Law, PO Box 750110, Dallas TX 75275-0110, 214-768-2550. Applications should be submitted via LSAC.org.

Applications and additional information may be obtained from the Economics Department: Director of Graduate Studies, Department of Economics, Southern Methodist University, Dallas TX 75275-0496, 214-768-4335.

## **Juris Doctor/Master of Business Administration, J.D./M.B.A.**

### **Nature of the Programs**

The Dedman School of Law and the SMU Cox School of Business offer two joint-degree programs: the combined J.D./M.B.A. program (4-year) and the combined J.D./M.B.A. fast track program (3-year). The programs are designed for law practice with a strong business background and for business careers with a strong legal background. Through the J.D./M.B.A. programs, the combined degrees may be obtained in three or four academic years instead of the five academic years required, if pursued separately.

These programs have been established so that an individual may integrate his or her educational experience in law and business. Since management, personnel and corporate attorneys have their individual considerations and goals, by taking law and business courses simultaneously, the student may achieve an understanding of commercial affairs from two different points of view.

### **Structure of the Programs - J.D. /M.B.A.**

For the combined 4-year J.D./M.B.A. students must satisfactorily complete the following credit hours of coursework:

	<i>Law</i>	<i>Business</i>	<i>Total</i>
Required courses	39	24	63
Electives	36	24	60
<b>Totals</b>	<b>75</b>	<b>48</b>	<b>123</b>

Under the structure of J.D./M.B.A. program, the Dedman School of Law will award 12 hours of academic credit toward the J.D. degree (87 hours) for satisfactory completion of the academic requirements of the M.B.A. program. Similarly, the Cox School of Business will award up to 12 hours of academic credit toward the M.B.A. degree for satisfactory completion of the academic requirements of the J.D. program.

### **Structure of the Program – Fast Track J.D./M.B.A.**

The 3-year joint J.D./M.B.A. degree program is made possible by the Fast Track MBA Program at the Cox School of Business. The Cox School of Business requires 48 hours credit for the MBA portion of this degree, but 16 of those hours can be satisfied by choosing any combination of the pre-approved business-related law school courses.

This combined degree program is aimed at the very motivated and able student who starts with a solid grounding in business concepts, and seeks advanced training in business and a professional legal education in a time- and cost-effective manner. We expect students in the three-year JD/MBA program to pursue careers in the legal field, broadly understood.

While students could begin the program with the intensive summer term at the Cox School of Business, most students will begin the program with the full-time first-year law courses, and then take the intensive Cox School summer

courses, which consist of MBA core classes taken by students in the existing one-year MBA program. In the second and third years, students will take a combination of law and business classes.

This highly selective dual-degree program is designed for:

- Candidates with a Business, Economics, or quantitative undergraduate degree
- Candidates seeking a law profession only
- Candidates not seeking a concentration within the business curriculum

## **Other Requirements**

Except as modified by the above, a student in either program must meet all the requirements of both schools for admission, performance, graduation, etc. Students enrolled in either joint degree program also must complete all noncredit-bearing requirements of the programs.

To be admitted to the J.D./M.B.A. program, law students must apply before beginning their law studies or during their first year of law school. Admission applications should be made to both schools, with the selection that they are for the combined J.D./M.B.A. program. Students who wish to pursue the joint program after starting their first year of law school for the J.D./M.B.A. must obtain permission from the Dedman School of Law's assistant dean for student affairs and then should consult with the M.B.A. Admissions Office.

**Law School applications** should be submitted using the LSAC Application Service. **M.B.A. applications** should be submitted through the Cox School of Business Admission's website.

# Dedman School of Law: Office of Career Services

The mission of the Office of Career Services is to provide the resources and professional environment to enable students to achieve their career goals. The OCS assists students in their self-directed career searches by advising them about career options and job search strategies and creating opportunities for them to connect with legal employers. OCS staff provides individual career counseling and coaching, assistance with résumés and cover letters, mock interviews and current and complete resources online through the OCS website and within the Resource Technology Center. The office hosts numerous career-related programs throughout the year, including on-campus interviews and off-campus job fairs, recruiting opportunities, seminars, panel discussions and workshops designed to allow students to network with employers. OCS also works with a wide variety of employers to provide students access and exposure to a broad range of employment opportunities.

The OCS is located on the third floor of Carr Collins, Jr. Hall on the east side of the Law Quadrangle. Interview rooms within the OCS are available for legal employers interviewing on campus.

## Staff

The OCS staff includes six experienced career professionals and an administrative assistant. The assistant dean oversees the management of day-to-day operations, creating and implementing innovative programs for students and employers, and conducting outreach to promote the Dedman School of Law and students to legal employers. Two directors work with the assistant dean to develop permanent job opportunities and clerkships in the small-firm and corporate sectors. The senior associate director is responsible for government employers and develops internships with the federal, state and local agencies. OCS has a special counselor dedicated to working with the international LL.M. students and the judiciary to develop internships and post-graduate judicial clerkships. The associate director for recruiting manages all arrangements with employers and students relating to on-campus and off-campus interview and résumé collection programs; coordinates all job fairs, special events and programs; and maintains technology services and databases, such as the website and the career management software Symplicity. All member of the OCS staff share counseling of the J.D. and Tax LL.M. students and develop programs and opportunities to nurture and enhance the professional development of all students.

## Career Counseling

Career counseling is available to all students by appointment throughout the calendar year. Each student is paired with a career counselor, who will advise and coach the student throughout his or her law school career. An individual career counseling session might include suggestions for self-assessment techniques, planning an individualized job search strategy, reviewing and revising a résumé or cover letter, direct referral to an employer or tips on successful interviewing. The staff is always available on an informal basis to answer questions and guide students through the job search process.

## Resource and Technology Center

The OCS maintains a library of career resources both digitally on the Career Services website and in the office. The Career Services website, as well as the Resource and Technology Center library, contain a wide variety of publications on career and job search information, legal specialties and judicial clerkships. Students have access to directories for courts, government agencies, nonprofit and public interest organizations and corporations throughout the country. In addition, various reference books for nonlegal/alternative careers are available for review. The Resource and Technology Center is equipped with computer terminals, a scanner and printer to provide access for online research of the legal market and legal employers. The office subscribes to Symplicity, a Web-based recruiting system that students use to manage the on-campus and off-campus recruitment programs, from the application process to scheduling interviews. Students also use Symplicity to conduct research on legal employers and access the online job bank for job opportunities posted by the OCS.

## Programming

SMU Dedman School of Law is committed to helping our students develop as polished professionals. In furthering that goal, OCS holds the Career Foundations and Professional Development series, which includes a one-day

Professionalism Summit for first year students. Through the Career Foundations seminars first year students are exposed to the information and skills required to be a competitive candidate in today's job market and a valuable contributor to the legal profession, covering topics such as job search strategies, professionalism, networking, résumé and cover letter writing, interviewing skills and the business of practicing law. For all students throughout the academic year, the OCS conducts an extensive range of career-related presentations. To educate students about the many practice areas of law, including opportunities in private practice, government, and public interest, OCS invites attorneys to campus to conduct information sessions, to network with students and to share their experiences. Also, OCS actively works with student organizations to promote their career-related programs. Most of the programs are taped and posted on the website for students who are unable to attend.

## **Recruitment Programs, the Job Bank and Job Fairs**

The OCS hosts both on-campus and off-campus interview programs for employers. In recent years, more than 100 employers have visited the campus for the fall and spring interview programs. At any time during the year, employers may solicit résumés from students and graduates, including lateral attorneys, by posting a position on the online job bank. More than 1,200 job notices (part-time, full-time, summer and graduate) are posted each year for law students and graduates.

Dedman School of Law also participates in a number of job fairs during the year, providing students access to local, statewide and national opportunities. The public interest job fair, Public Advocate Day, is sponsored by the OCS, along with the Public Service Program. Representatives from government agencies and public service employers come to the campus to discuss with students their work and employment opportunities in the public interest sector. The OCS also facilitates the application process for internships with the Collin County and Dallas County courts, as well as with the Federal Judicial Externship course offered each term. Law students and alumni also participate in the following off-campus annual fairs:

**Bay Area Diversity Career Fair** – San Francisco, California  
**Boston Lawyers Group, Law Students of Color** – Boston, Massachusetts  
**Equal Justice Works Career Fair** – Washington, D.C.  
**Heartland Diversity Legal Job Fair** – Kansas City, Missouri  
**Hispanic National Bar Association Job Fair** – Boston, Massachusetts  
**IMPACT Career Fair for Law Students and Attorneys with Disabilities** – Washington, D.C.  
**Lavender Law Career Fair (LGBT)** – Washington, D.C.  
**International LL.M. Student Interview Program** – New York, New York  
**Minnesota Minority Recruitment Conference** – Minneapolis, Minnesota  
**National Black Law Students Association Career Fair** – Houston, Texas  
**Patent Law Interview Program** – Chicago, Illinois  
**Rocky Mountain Diversity Legal Career Fair** – Denver, Colorado  
**Southeastern Intellectual Property Job Fair** – Atlanta, Georgia  
**Southeastern Minority Job Fair** – Atlanta, Georgia  
**Sunbelt Minority Recruitment Program** – Dallas, Texas  
**Texas in Washington Recruitment Program** – Washington, D.C.  
**University of Texas Public Service Career Day** – Austin, Texas  
**VAULT/MCCA Legal Diversity Job Fair** – Washington, D.C.

As participants in all of the recruiting programs, students have the opportunity to demonstrate their interest for employment with a wide range of employers that have identified Dedman School of Law as a top school from which to recruit. To emphasize the importance of professionalism in the interview process and in order to participate in the interview programs, students must sign the Agreement Regarding Professionalism in Recruiting and Employment acknowledging their agreement to adhere to the ethical and procedural guidelines by which the interview programs operate. Students are expected to attend the interviews they are granted and to uphold their commitments to employers. The legal profession is built upon the highest ethical and professional standards, and cultivating these standards begins the day a student enters law school.

# Dedman School of Law: The Curriculum

## Course Offerings

J.D. program required courses are offered at least once each academic year. Courses that have been offered in the past several years are listed below. Other courses may be offered. The school's Registrar's Office publishes a schedule of courses before the beginning of each term. Students must consult these schedules for actual course offerings and for any prerequisites or co-requisites for those courses. It is the responsibility of each student to verify that he or she has taken the prerequisites, or will be taking concurrently any required co-requisites, at the time he or she registers for a class. Students with any questions concerning these issues should contact the assistant dean for student affairs.

## The Juris Doctor Program

1. First-Year Required Courses
  - Civil Procedure (LAW 6405)
  - Constitutional Law I (LAW 6366)
  - Contracts I and II (LAW 8290, LAW 8390)
  - Criminal Law (LAW 8341)
  - Legal Research, Writing, and Advocacy I and II (LAW 8375, LAW 8376)
  - Legislation and Regulation (LAW 6365)
  - Property (LAW 6404)
  - Torts (LAW 6403)
2. Upper-Year Requirements
  - Professional Responsibility (LAW 7350)
  - Constitutional Law II (LAW 8311)

Edited Writing Seminar (3 hours) - Requires the student to participate in an intensive, scholarly expository writing project that may take the form of a single paper of at least 30 pages, or several shorter papers, as the professor may direct. Includes review and criticism of the student's writing by the professor. Varied subject matter is at the discretion of the professor. Enrollment limited to 20 students.

General Writing Requirement - A student must complete a writing unit in addition to the first-year legal research, writing and advocacy course and an edited writing seminar. May be fulfilled by completing a course designated as a General Writing course (GW) in which more than half the grade for the course is based on written work other than an examination, by completing law review writing requirements for credit or by completing a two-hour or three-hour directed research paper.

Experiential Learning Requirement - A student must complete one or more experiential course(s) totaling at least 6 credit hours. Legal Research, Writing and Advocacy II (Law 8376) satisfies 3 of the required 6 credit hours. Other courses that satisfy this requirement will be designated "(EL)" on the upperclass course list during registration. Students matriculating before the fall of 2017 have different requirements and should refer to the catalog they matriculated under.

There are other non-coursework requirements to obtain the J.D. degree listed in the catalog under degree requirements.

## Elective Courses

Except with special permission of the assistant dean for student affairs, J.D. students may enroll for elective courses only after they have completed all required first-year courses. Other prerequisites for courses are listed; however, the instructor of a course may add or waive prerequisites for the course.

The faculty recommends that each student enroll in courses in each of the following areas: business organizations, administrative law, commercial law, procedural and evidence law, taxation and legal history or the philosophy of law or the study of legal systems.

## **Maximum Number of Elective Course Hours Taken on Credit/No-credit Basis**

A student may not apply more than six hours of upper-class elective courses taken on a credit/no-credit basis toward the 87 hours required for graduation. This six-hour restriction does not include any hours obtained from externship hours or hours in which, with the consent of the instructor and the assistant dean for student affairs, the student was allowed to receive credit for a course in lieu of a grade due to extraordinary circumstances involving the general award of credits for the particular course and/or to the particular student.

## **Courses Outside Law School**

Graduate-level courses that are offered in other graduate or professional schools of the University and are relevant to the student's program may be taken with prior approval of the assistant dean for student affairs, who shall also determine the Dedman School of Law credit equivalents to be awarded for such study. Except for students in joint degree programs, no more than six hours may be awarded toward Dedman School of Law hours required for graduation. For more information, students should contact the school's Registrar's Office.

## **Courses at Other Law Schools**

Detailed information on transfer of courses from other law schools is found in this catalog under The Juris Doctor Program in the Admission With Advanced Standing: Students Eligible section. After entry in the Dedman School of Law, summer courses in other accredited law schools may be taken for transfer of credits with prior approval of the assistant dean for student affairs. Transfer credits may be earned in regular terms only in extraordinary circumstances of demonstrated special need. Detailed information is found under The Juris Doctor Program in the Classroom Work, Attendance and Examinations: Credit for Work Completed at Other Schools section. For more information, students should contact the school's Registrar's Office.

# Dedman Law: Course Descriptions

## Juris Doctor Courses

### **LAW 6100 - SMU Law Review Association**

*Credits: 1*

Maximum of 5 credit hours. Preparation of comments on topics of current interest, notes on cases of significance, and editorial work incidental to publication of the "SMU Law Review" and the "Journal of Air Law and Commerce." Students must be selected for participation before they may enroll.

### **LAW 6108 - Patent Clinic Deputy**

*Credits: 1*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 6218 Patent Clinic.

### **LAW 6109 - Crimes Against Women Clinic Deputy**

*Credits: 1*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 7642

### **LAW 6110 - Legal Practical Training II**

*Credits: 1*

Offers practical training and experience in a law firm, corporate law department, government agency, or other law-related business. Students work on assigned projects under the supervision of lawyers who work at the placement. Activities vary and may include attending meetings, observing negotiations, conducting legal research, working on special projects, and otherwise gaining an understanding of how law is practiced within a business setting.

### **LAW 6111 - Family Law Clinic Deputy**

*Credits: 1*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 7643 Family Law Clinic.

### **LAW 6112 - Small-Business Clinic Deputy**

*Credits: 1*

Assisting in preparing and supervising clinic students in client representation, including fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 8202 Small-Business Clinic.

### **LAW 6113 - Small Business and Trademark Clinic**

*Credits: 1*

Student lawyers advise clients of the Small Business Clinic on the start-up of their businesses and assist in preparing necessary legal documents. The student lawyers will also research and provide advice to non-profit organizations and get experience working with transactional business law issues for clients. The Trademark Clinic is part of the Small Business Clinic and a member of the USPTO Law School Clinic program. Student lawyers gain specific experience in advising clients about basic trademark matters as well as drafting, filing and handling trademark applications with the USPTO. Prerequisites: LAW 6420 and LAW 8203. Students must be in good academic standing and have completed 50 percent of all course requirements.

### **LAW 6114 - Legal Practical Training III**

*Credits: 1*

Offers practical training and experience in a law firm, corporate law department, government agency, or other law-

related business. Students work on assigned projects under the supervision of lawyers who work at the placement. Activities vary and may include attending meetings, observing negotiations, conducting legal research, working on special projects, and otherwise gaining an understanding of how law is practiced within a business setting.

### **LAW 6115 - Legal Practical Training IV**

*Credits: 1*

Offers practical training and experience in a law firm, corporate law department, government agency, or other law-related business. Students work on assigned projects under the supervision of lawyers who work at the placement. Activities vary and may include attending meetings, observing negotiations, conducting legal research, working on special projects, and otherwise gaining an understanding of how law is practiced within a business setting.

### **LAW 6117 - Government and Public Interest Externship Program**

*Credits: 1*

The Government and Public Interest Externship Program is an academic program that combines a weekly public sector law class with hands-on fieldwork in nonprofit and government legal departments. Students who pass both the class and externship components receive one credit for the classroom component and 2-3 hours credit for their field work (depending on the hours worked at the placement).

### **LAW 6118 - Actual Innocence Clinic Deputy**

*Credits: 1*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 6230 or LAW 7401.

### **LAW 6119 - Legal Practical Training V**

*Credits: 1*

Offers practical training and experience in a law firm, corporate law department, government agency, or other law-related business. Students work on assigned projects under the supervision of lawyers who work at the placement. Activities vary and may include attending meetings, observing negotiations, conducting legal research, working on special projects, and otherwise gaining an understanding of how law is practiced within a business setting.

### **LAW 6120 - Legal Practical Training VI**

*Credits: 1*

Offers practical training and experience in a law firm, corporate law department, government agency, or other law-related business. Students work on assigned projects under the supervision of lawyers who work at the placement. Activities vary and may include attending meetings, observing negotiations, conducting legal research, working on special projects, and otherwise gaining an understanding of how law is practiced within a business setting.

### **LAW 6126 - Argumentation in Ethical Debates**

*Credits: 1*

Students are familiarized with the basics of informal logic: deductive arguments, inductive arguments, arguing by analogy, and common argumentative fallacies. Students reinforce their skills in ethical reasoning to discern good from problematic arguments, to build better oral arguments, and to write better argumentative essays.

### **LAW 6130 - International Law Review**

*Credits: 1*

Maximum of 5 credit hours. Law review experience involving preparation of comments on topics of current interest, notes on cases of significance, and editorial work incident to publication of "The International Lawyer," "NAFTA: Law and Business Review of the Americas," and "Yearbook of International Financial and Economic Law." Students must be selected for participation before they may enroll. Available only for J.D. students.

### **LAW 6136 - Directed Research**

*Credits: 1*

Maximum of 3 credit hours. Research on legal problems in any field of law may be carried on with the consent of the instructor involved. A comprehensive, analytical, and critical paper must be prepared to the instructor's satisfaction. Open to students who have completed more than one-third of the credit hours required for graduation. Before enrollment for directed research, the student must obtain, on a form supplied by the Registrar's Office, written approval of the instructor for the research project. Students may not receive more than a total of 3 credit hours of directed research during law school.

### **LAW 6157 - Child Advocacy Clinic Deputy**

*Credits: 1*

Assisting in preparing and supervising clinic students in client representation, including fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors. Students may not enroll before being selected.

### **LAW 6160 - Advanced Legal Writing and Editing**

*Credits: 1*

Designed for students who wish to improve their editorial and writing skills. Targets students who are already competent writers, but it requires no in-depth knowledge of grammar or rhetoric. Covers issue framing, readability, and writing efficiently.

### **LAW 6162 - Across the Finish Line: Sentence Reductions for Federal Commutees**

*Credits: 1*

Teaches students how to use effective post-conviction strategies, including mitigation investigation, negotiation, and motion practice, in the context of federal criminal defense. Students interview clients, family members, and brainstorm negotiation tactics. Students then assist counsel in writing judicial motions for formerly life-sentenced drug offenders who received term commutations from President Obama, but whose sentences were not completely excised. Lawyers for the Decarceration Collective have final responsibility for filing client motions in court.

### **LAW 6177 - Moot Court Board**

*Credits: 1*

Satisfactory work as a member of the Moot Court Board. Maximum of 1 credit hour. Students who are selected to draft the Jackson Walker moot court problem and briefs may be eligible for an additional 1 credit hour, which will count toward the general writing requirement. Students must be selected for participation before they may enroll.

### **LAW 6180 - Moot Court Competition**

*Credits: 1*

Participation as a member of an appellate advocacy team representing Dedman School of Law in one of several interschool competitions in which the school participates each year. Allows 1 credit hour for each competition, up to a maximum of 2 credit hours. Students must be selected for participation on a competition team by the faculty coach before they can register for credit.

### **LAW 6183 - Mock Trial Competition**

*Credits: 1*

Participation as a member of a mock trial team representing Dedman School of Law in one of several interschool competitions in which the school participates each year. Allows 1 credit hour for each competition, up to a maximum of 2 credit hours. Students must be selected for participation on a competition team by the faculty coach before they can register for credit.

## **LAW 6200 - SMU Law Review Association**

*Credits: 2*

Maximum of 5 credit hours. Preparation of comments on topics of current interest, notes on cases of significance, and editorial work incident to publication of the "SMU Law Review" and the "Journal of Air Law and Commerce."

Students must be selected for participation before they may enroll.

## **LAW 6204 - Advanced Legal Research**

*Credits: 2*

An experiential learning course that builds on the legal research systems and methods covered in the first-year legal research course. Through a series of assignments and in-class research simulations, students will develop proficiency in locating and evaluating statutes, case law, secondary authority, administrative regulations and decisions, legislative history, court rules, and local law. Emphasizes advanced research strategies and processes to build research skills in a variety of legal practice areas.

## **LAW 6205 - Law, Literature, and Medicine**

*Credits: 2*

Seminar for law students and medical students that provides an opportunity to read and discuss novels, poems, plays, and short stories concerning the two professions, including ethical dilemmas encountered in legal and medical practice and a variety of client and patient experiences. Readings also focus on the professional and academic aspects of the humanities in law and medicine. Students have joint assignments and projects throughout the term and are required to complete a research paper or comparable final project.

## **LAW 6206 - Aviation Law**

*Credits: 2*

Introduces aviation law covering regulation of domestic and international aviation; deregulation of domestic aviation; the legal regime of the airspace, aircraft, and users of the airspace; the liability of the insurance for the airman, manufacturer, services, airline, and U.S.; aviation litigation fundamentals and focused issues; criminal law specific to aviation; and legal issues governing aviation transactions, aviation labor, and the law of space.

## **LAW 6207 - Administrative Law**

*Credits: 2*

A focus on legislative authority and administrative agencies, with special emphasis on administrative process and judicial review.

## **LAW 6208 - Advanced Legal Reasoning**

*Credits: 2*

This course provides a basic understanding of the contents of the bar exam, strategies for exam success, and development of exam skills. Students have the opportunity to practice answering exam questions in selected subjects tested on the bar exam. The course is intended to supplement but not replace participation in a commercial bar review course; students are strongly encouraged to take a commercial bar preparation course to enhance their chances of passing the bar exam. Limited to students in their last year before graduation.

## **LAW 6209 - Due Diligence in Business Transactions**

*Credits: 2*

Introduces basic due diligence principles and standards, and covers the relevant diligence-related case law. The primary goal is to expose students (through practical skills exercises) to the various components of effective due diligence in real-world transactional settings similar to those they are likely to encounter after entering the practice. Topics include the definition of due diligence; effective due diligence leadership and staffing; the constituents of reasonable due diligence as defined by the Securities and Exchange Commission and the courts; the importance of tools such as forms-driven processes and written memoranda; the significance of red flags in the diligence process; and the responsibilities of buyers, sellers, underwriters, issuers, and their respective diligence team members, including legal counsel.

## **LAW 6210 - Legal Research and Writing for International LL.M. Students**

*Credits: 2*

Introduction to the general principles of U.S. law research, legal analysis, and objective writing. Successful completion of this course enables students to 1) recognize and distinguish primary and secondary levels of authority; 2) locate, read, and understand rules of law available in constitutions, judicial opinions, and statutes; 3) demonstrate the ability to update all types of legal authority, including the process of Shepardizing; 4) demonstrate the ability to recognize and use acceptable citation forms for legal authority; and 5) complete legal research/writing assignments to explain the law pertaining to a legal question.

## **LAW 6212 - Intellectual Property Licensing**

*Credits: 2*

Focuses on intellectual property licensing, with a particular emphasis on the generation and identification of licensable rights, traditional and online licensing structures, underlying legal principles, international considerations, licensing in a standards body, and the terms of specific license agreements and their negotiation. Students explore licensing concepts and trends through current case law, relevant statutes, and selected articles. Includes discussion of licensing copyrights, trademarks, patents, technology, multimedia, software, and general online content.

## **LAW 6213 - Advanced Contracts Workshop**

*Credits: 2*

Limited enrollment, practice skills seminar designed to build upon the lessons learned in first-year contracts (LAW 8290) and first-year torts (LAW 7391) and to apply those lessons to the world of transactional lawyering. Students study real-world agreements (e.g., LOIs, IOIs, term sheets, NDAs, and side letters) entered into at the early stages of an M&A transaction in order to comment upon, draft, and negotiate examples of some of those agreements in class. While the course is geared toward the M&A world, the contract drafting skills covered are applicable in any transactional practice. Students prepare initial drafts of transactional agreements, review agreements in which errors or lack of clarity in contract drafting gave rise to disputes requiring judicial determination, and read current and classic cases to analyze the "contort" common law that forms the basis for interpreting and enforcing each contractual agreement draft. Class attendance, preparation, and participation are critical to a student's learning experience and to that of his or her classmates, as well. Grades are based on a combination of class performance and/or classroom exercises, and either a short paper or a few short memos prepared about specific drafting issues.

## **LAW 6214 - Construction Law**

*Credits: 2*

Addresses the legal aspects of the construction process, with emphasis on the provisions of standard form contracts and the liability issues that arise out of relationships among design professionals, contractors, and owners. Includes bidding, types of contracts, pricing variations, the rights and obligations of parties involved in the process, construction documents, bonds, insurance, changes, scheduling, delays, unforeseen circumstances, risk allocation of defective work, payments, and remedies for breach.

## **LAW 6215 - Professional Responsibility for International LL.M. Students**

*Credits: 2*

An analysis of principles and rules governing the conduct of lawyers. Topics include the client-lawyer relationship, competence, confidentiality, loyalty, the roles of lawyers as counselors and advocates, public service, advertising, admission to practice, and professional discipline.

## **LAW 6216 - Corporate Counsel Externship Program**

*Credits: 2*

Integrates a weekly corporate counsel class with hands-on experience in corporate legal departments. Provides a broad yet comprehensive overview of substantive areas encountered in an in-house legal department and the ethical responsibilities of in-house counsel, as well as professional skills such as working with outside counsel, managing conflicts, drafting contracts, and conducting internal investigations. Chief legal officers, general counsels, and senior managing attorneys guest lecture in certain classes. In addition to the class component, students are assigned to

corporate legal departments where they work approximately 10 hours per week, for a minimum of 120 hours for the term. Student activities vary depending on the corporation but may include attending meetings, observing negotiations, conducting legal research, working on special projects, and otherwise gaining an understanding of how law is practiced within a business setting. The externship component is pass/fail, and the class component is graded; students must pass both to receive credit (total of 4 credit hours for this class plus 2 credit hours for the externship, which is a separate registration). Students may not enroll in this program and another externship or clinical program during the same term. Admission is competitive, and an application does not guarantee admission. Prerequisites: LAW 6420 Business Enterprise and GPA of 2.7 or higher.

### **LAW 6217 - Oil and Gas Taxation**

*Credits: 2*

Focuses on U.S. federal income taxation of domestic oil and gas transactions, and references and contrasts certain international tax aspects of the oil and gas business. Examines taxation associated with the operational life cycle of oil and gas operations, including exploration, development, production, and abandonment. Students study transactions involving oil and gas interests to analyze acquisition, disposition, structuring, and investment. They also study the historical context and development of oil and gas provisions in U.S. tax law as a basis for understanding the applicable laws and regulations that apply today. Current tax legislative proposals and/or final legislation affecting the oil and gas industry are addressed, as warranted.

### **LAW 6218 - Patent Clinic**

*Credits: 2*

Students provide pro bono legal services to individual and small-business clients seeking to protect their inventions using the patent system. This work may involve counseling clients regarding patent-related matters, conducting inventor interviews, conducting patentability searches, preparing patentability opinions, drafting and filing patent applications, and drafting and filing responses to office actions received from the U.S. Patent and Trademark Office.

### **LAW 6219 - Labor Law**

*Credits: 2*

Law regulating the employment relationship studied in connection with various forms of group conflict and organizational activity. The course covers rights and duties of individuals and institutions in the labor-relations context; concerted activity, including strikes, picketing, and boycotts; negotiation and enforcement of collective agreements; employee-union relations; and problems of jurisdiction and accommodation among courts, boards, and arbitrators. The course emphasis is on the substantive and procedural law of the Labor-Management Relations (Taft-Hartley) Act.

### **LAW 6220 - Corporate Taxation**

*Credits: 2*

The formation of corporations, corporate capital structure, earnings and profits, dividends, distributions, redemptions, partial liquidations and complete liquidations, and Subchapter S corporations.

### **LAW 6221 - Banking Law and Regulation: Domestic and International**

*Credits: 2*

Introduces the federal laws governing commercial banking activities, with primary emphasis on the regulation (and deregulation) of national banks and related policy considerations. Lecture topics vary from year to year but generally include key domestic, regional, and international issues with respect to banking, the banking industry, and the overall financial services industry. Uses interdisciplinary subject matter in economics, finance, and business, and may use comparisons to regulation of other financial institutions. When taught as a regular course, assessment may be by examination and/or paper or series of papers satisfying the general writing requirement. When taught as an edited writing seminar, course structure and assessment are consistent with other LAW courses described as edited writing seminars.

## **LAW 6222 - Constitutional Law I**

*Credits: 2*

Examines methods of constitutional interpretation, the role of judicial review, federal power, separation of powers, federalism, and justiciability.

## **LAW 6223 - Representing the Entrepreneurial Client**

*Credits: 2*

An introduction to the legal problems encountered in an entrepreneurial setting, either as lawyers for the enterprise or as owners of an equity position in the enterprise. Interactive discussions provide tools for future attorneys to guide entrepreneurial clients through the challenges of economic pressures, legal liability, technological change, and globalization in the 21st century.

## **LAW 6224 - International Protection of Human Rights**

*Credits: 2*

Selected topics, including the protection of individuals and groups against violations by governments and private institutions of their internationally guaranteed rights, and the promotion of these rights. May require the presentation and discussion of student papers.

## **LAW 6225 - Mergers and Acquisitions**

*Credits: 2*

Introduces the fundamentals of and critical topics in mergers and acquisitions law, as well as the key financial and transactional issues they present, with a focus on the documentation and negotiation of acquisitions of privately held businesses. Also, the key drivers of M&A activity and the business incentives of the parties to the transactions. Touches on securities, tax, antitrust, and regulatory issues. Students review and analyze case law and deal documents (or portions of such documents) and learn how an acquisition agreement's core provisions are negotiated to create value for and allocate risks among the parties.

## **LAW 6226 - International Intellectual Property**

*Credits: 2*

When intangible property crosses imagined borders, it becomes subject to competing cultural concerns, economic interests, and protective regimes. This seminar focuses upon the international regulation of intellectual property and the resolution of disputes through institutions such as the World Intellectual Property Organization and the World Trade Organization, multinational and regional treaty agreements, and national responses. Policy issues include the perspectives of developing and industrialized countries, problems generated by emerging biotechnologies and the growth of cyberspace, and future trends in harmonization of IP protection.

## **LAW 6228 - Oil and Gas Contracts**

*Credits: 2*

A survey of basic oil and gas contracts used in exploration and production operations in the United States and internationally. Includes support agreements, farmout agreements, operating agreements, gas contracts, gas balancing agreements, division orders, concessions, production sharing, participation agreements, and technical agreements, with a focus on fundamental principles and current issues. Drafting solutions and alternatives are explored.

## **LAW 6229 - Government Procurement**

*Credits: 2*

Explores the basic elements of the \$500 billion federal procurement market and the state and local markets estimated to be of roughly equal size. Public contracting presents unique and highly challenging legal issues spanning acquisition planning, bidding, contract performance, administrative law, fraud, litigation, corporate compliance, and complex transactions. Students gain a practical understanding of the Federal Acquisition Regulation, competitive solicitation requirements, sole source awards, and bid protests for application to real-world practice environments. Draws upon Texas and potentially other state procurement laws for comparative purposes. Examines the relationships between

private contractors and various government customers, with emphasis on the defense industry and conflict of interest concerns.

### **LAW 6230 - Actual Innocence Clinic**

*Credits: 2*

The investigation or litigation of actual innocence claims by persons convicted of serious crimes involves unique and highly challenging legal issues. Students assist in a wide range of postconviction case investigation activities, including any or all of the following: locating and reviewing original trial records, searching for any identifying remaining evidence, analyzing cases for viability, submitting evidence for additional testing, interviewing potential witnesses, communicating with clients, meeting face-to-face at least once with clients in the county jail or the assigned prison unit, interacting with assigned personnel from the District Attorney's Office, and identifying and communicating with potential experts. Also, drafting briefs, motions, and proposed findings of fact and conclusions of law.

### **LAW 6231 - International Oil and Gas Negotiations**

*Credits: 2*

Covers transactional law and negotiations in an international oil and gas context through lectures and discussions on negotiation topics. Provides hands-on, practical negotiation experience through participation in a series of simulated negotiations where the student role-plays a lawyer representing a client on one side of an acquisition of oil and gas exploration rights in a foreign country.

### **LAW 6232 - Corporate Planning**

*Credits: 2*

Planning and problem course in corporate, tax, securities, accounting, and related fields. Students draft instruments and supporting memoranda in solution of a variety of questions in corporate organization, financing, operation, acquisition, and reorganization - a fairly typical sequence of high-tech company growth and development. Student solutions and simulated negotiations are presented for class critique, and in most instances, for comparison with actual solutions to similar problems.

### **LAW 6233 - The Expert Witness in Civil Litigation**

*Credits: 2*

Addresses the role of the expert witness in civil litigation, with emphasis on the development of practical skill in the selection, designation, discovery, direct examination, and cross-examination of experts. Considers examples from trial practice in state and federal courts, as well as expert testimony in the context of tort and commercial litigation. Students participate in drafting Daubert/Robinson motions and in mock examination of experts. Prerequisite: LAW 8355 or LAW 8455 Evidence.

### **LAW 6234 - Ethics and Compliance for the Global Enterprise**

*Credits: 2*

The field of ethics and compliance has emerged as a new legal focus area with significant opportunities for legal practitioners, and the discipline has taken on an international aspect because of global enforcement and the growing convergence of standards. Regulators have stepped up enforcement of guidelines in key areas such as anticorruption, export, and trade sanctions. It is imperative that U.S. corporations comply with the United States Sentencing Commission's guidelines for organizations and establish risk management programs and processes to demonstrate their compliance. Using the framework of an overarching hypothetical, this course provides hands-on experience in identifying and reviewing key compliance issues and developing workable tools and solutions to address them, with a focus on the expected components of an effective corporate compliance program, drawing from important statutes, case law, and international treaties. Prerequisite: LAW 6420 Business Enterprise.

### **LAW 6235 - Securities Regulation**

*Credits: 2*

A study of the securities laws (primarily federal but also state, especially Texas) and the activities and industry they govern, with emphasis on the regulation of issuance, sale, resale, and purchase of securities. Also, disclosure

requirements generated by registration, reporting, proxy, tender, and antifraud provisions. Includes civil liability (express and implied), government enforcement, exemptions from registration (especially private placements), insider trading, the meaning of "security," and the functions of the SEC and state securities administrators. May cover broker-dealer and market regulation if time permits.

### **LAW 6236 - Directed Research**

*Credits: 2*

Maximum of 3 credit hours. Research on legal problems in any field of law may be carried on with the consent of the instructor involved. A comprehensive, analytical, and critical paper must be prepared to the instructor's satisfaction. Open to students who have completed more than one-third of the credit hours required for graduation. Before enrollment for directed research, the student must obtain, on a form supplied by the Registrar's Office, written approval of the instructor for the research project. Students may not receive more than a total of 3 credit hours of directed research during law school.

### **LAW 6237 - Wildlife Law**

*Credits: 2*

Explores the complex body of federal and state laws that protect and regulate wildlife, including those that protect ecosystems and habitats. Wildlife law is centuries old and the course covers its interesting history from English common law to the statutes, policies, and regulations that predominate today. Includes cases, statutory laws, and regulations and addresses enforcement of the laws and the constitutional and tribal issues that arise in wildlife cases.

### **LAW 6238 - Data Privacy and Cybersecurity**

*Credits: 2*

Introduces key concepts associated with information privacy and security law and covers how these concepts apply to corporate organizations. Information security and its attendant privacy implications have dominated recent headlines in the wake of electronic intrusions at some of the country's largest and most respected institutions. Broadly reviews the origins and evolution of U.S. information privacy and security law, from constitutional law to common law tort and contract principles as well as modern-day legislative and regulatory privacy and security frameworks. Addresses the latter in the context of recent controversies such as retail data breaches, social media, and domestic surveillance.

### **LAW 6239 - Civil Rights Practicum: Police Misconduct Litigation**

*Credits: 2*

Includes simulations where students represent hypothetical clients from actual civil rights cases that focus on police misconduct. Analyzes videos of police actions and recent civil rights cases highlighted in the national media (e.g., Ferguson, Baltimore, and the Waco biker shootout) to determine whether there was an abuse of force. Helps students develop lawyering skills such as client and witness interviewing, evaluation of damages, fact investigation and analysis, negotiation, and trial advocacy.

### **LAW 6240 - Copyright**

*Credits: 2*

A detailed study of the 1976 Copyright Act as well as other means of obtaining legal protection for literary, musical, and artistic works, including unfair competition, tort, and implied contract.

### **LAW 6241 - Election Law**

*Credits: 2*

Examines the laws that govern the political process in the United States. Topics include the right to vote, political representation, election administration, political parties, ballot initiatives, and campaign finance, with some coverage of tax issues, administrative and judicial enforcement, and ethics law. The goal of the course is to provide students with a solid foundation in the basic principles of election law in this country.

## **LAW 6242 - Consumer Law**

*Credits: 2*

A study of state and federal regulation of credit and noncredit consumer transactions. Special attention will be paid to state and federal legislation regarding unfair and deceptive trade practices embodied in the Federal Trade Commission Act and the Texas Deceptive Trade Practices Act. Other areas of study include the federal Truth-in-Lending, Fair Credit Reporting, Equal Credit Opportunity, and Fair Debt Collection Acts, state and federal warranty law, as well as contractual and procedural devices designed to facilitate collection. Includes study of traditional private and public remedies and the means of achieving them as well as special problems and issues arising in connection with resolving consumer disputes in the world of e-commerce.

## **LAW 6243 - Trademarks**

*Credits: 2*

This course teaches the essentials of U.S. trademark law including what constitutes a protectable trademark, trade dress marks and issues of distinctiveness and functionality, how trademark rights are acquired, how they are enforced in both infringement and dilution actions, and the remedies that are available, both legal and equitable. In addition, the course will cover the federal trademark registration process and the essential steps for filing an application and obtaining a registration.

## **LAW 6244 - Trade Secrets and Business Torts**

*Credits: 2*

Are these "secrets," and if so, whose are they? What separates aggressive free enterprise from unfair competition? We explore in detail the use and protection of "ideas and information" in 21st-century business, particularly the law of trade secrets and confidential information. We also explore the boundary between fair and unfair competition (such as actions for tortious interference, defamation and commercial disparagement, false advertising, common law misappropriation, and conspiracy), and practice under the most prominent trade regulation statutes (such as Section 43(a) of the Lanham Act, the Computer Fraud and Abuse Act and other "Cybertort" statutes, RICO, the Anti-SLAPP Act, civil theft and commercial bribery acts, the Foreign Corrupt Practices Act, and the Federal Trade Commission Act). Issues related to data use, contests, cause-related marketing, hidden endorsements, techniques for ethical investigations, and remedies may be included. No technical background is required.

## **LAW 6245 - Patent Clinic Deputy**

*Credits: 2*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 6218 or LAW 6337.

## **LAW 6246 - Crimes Against Women Clinic Deputy**

*Credits: 2*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 7642

## **LAW 6247 - Family Law Clinic Deputy**

*Credits: 2*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 7643 Family Law Clinic.

## **LAW 6249 - Immigration Practice and Advocacy**

*Credits: 2*

Focuses on the "nuts and bolts" of the immigration litigation process, including proper courtroom practices, strategy, and case presentation. Taught with an emphasis on participation, development of advocacy skills in the immigration hearing process, and on obtaining a working knowledge of the procedural rules governing the immigration litigation

process as well as relevant ethical standards. Immigration Law is not a prerequisite, but completion or concurrent enrollment in Immigration Law is recommended.

### **LAW 6250 - Advanced Criminal Law**

*Credits: 2*

A general writing course that examines hot topics in the criminal justice system such as excessive force and police misconduct, mental health, mass incarceration, and inadequate funding for defense counsel. Topics vary by term and may include recent and recurrent questions in criminal law and criminal procedure. Students write reflection papers on the readings and work in teams to develop concrete solutions to pressing criminal justice problems.

### **LAW 6251 - LGBT Rights and the Law**

*Credits: 2*

Covers the main legal and public policy issues affecting lesbian, gay, bisexual, and transgender people in the U.S., including the history of the nation's treatment of LGBT people. Addresses the criminalization and decriminalization of same-sex sexual intimacy, the military's treatment of LGBT people, public and private employment discrimination, discrimination in public accommodations and housing, religious exemptions from LGBT antidiscrimination law, rights of speech and association for those supporting or opposing LGBT-rights initiatives, parenting by LGBT people, and the controversy over same-sex marriage. Readings include important statutory and constitutional decisions affecting LGBT rights, scholarly writing about LGBT issues, and theoretical discussions of sexuality and sexual identity. Considers a variety of perspectives, including the views of those supporting LGBT rights and those with religious and natural law views that are more traditional. Also addresses the intracommunity debate among LGBT rights supporters on matters like same-sex marriage and the need for antidiscrimination laws. Prerequisites: LAW 6222 - Constitutional Law I, LAW 8311 - Constitutional Law II.

### **LAW 6252 - Estate Planning and Practice**

*Credits: 2*

Functional examination of the integration of the federal estate and gift taxes; marital deduction planning and drafting; drafting the bypass trust; desirability of making lifetime interspousal transfers; gifts to minors and other dependents (including the grantor trust rules); techniques of income deflection and estate shrinkage for tax reasons; transferring ownership of life insurance, with emphasis on irrevocable life insurance trusts; and introduction to the generation-skipping tax. Recommended, previously or concurrently: LAW 8395 Wills and Trusts or LAW 6460/LAW 8360 Income Taxation.

### **LAW 6254 - Insurance**

*Credits: 2*

Principles governing the nature of insurance law; the principle of indemnity, including insurable interest, measure of recovery, and multiple claims for indemnity (subrogation and other insurance); persons and interests protected; risks transferred, including nature of loss and its causes, warranties, representations, and concealment; limits and duration of coverage; rights at variance with policy provisions; claims processes; and insurance institutions.

### **LAW 6256 - Eminent Domain and Condemnation Litigation in Texas**

*Credits: 2*

Explores the history, procedures, issues, and central legal precedents of eminent domain litigation in Texas; namely, the conflicts that arise between condemnors who are trying to spend as little as possible to acquire private property, while still satisfying the Constitutional requirement to pay just compensation and conversely, the landowners who are trying to maximize their recoveries and obtain what they feel is fair compensation for their loss of private property.

### **LAW 6257 - Child Advocacy Clinic Deputy**

*Credits: 2*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected.

## **LAW 6259 - Depositions - Questions Answered and Skills Learned**

*Credits: 2*

This experiential short course on depositions is designed for students who plan to practice litigation, though it will also benefit the transactional lawyer by providing insight into the litigation discovery process. Focuses on the practical aspects of taking, defending, and preparing witnesses for depositions, including depositions of corporate representatives and expert witnesses. Students prepare for, take, and defend depositions using simulated cases. Students also review and comment on depositions of people in well-known cases.

## **LAW 6260 - Actual Innocence Clinic Deputy**

*Credits: 2*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 6230 or LAW 7401.

## **LAW 6261 - Disability Law**

*Credits: 2*

Covers the dynamic and pervasive statutory and regulatory system that touches every business and a growing number of individuals. Provides a broad overview of the widely varied laws concerning disability to help lawyers identify the challenges their clients may face, and to know where to look for more detailed information about those challenges.

## **LAW 6262 - Across the Finish Line: Sentence Reductions for Federal Commutees**

*Credits: 2*

Teaches students how to use effective post-conviction strategies, including mitigation investigation, negotiation, and motion practice, in the context of federal criminal defense. Students interview clients, family members, and brainstorm negotiation tactics. Students then assist counsel in writing judicial motions for formerly life-sentenced drug offenders who received term commutations from President Obama, but whose sentences were not completely excised. Lawyers for the Decarceration Collective have final responsibility for filing client motions in court.

## **LAW 6264 - Contracts II**

*Credits: 2*

The history and development of the common law of contract; principles controlling the formation, performance, and termination of contracts, including the basic doctrines of offer and acceptance, consideration, conditions, material breach, damages, and statute of frauds; and statutory variances from the common law, with particular attention to Uniform Commercial Code sections.

## **LAW 6267 - Principles of Accounting and Finance for Lawyers**

*Credits: 2*

Introduces key accounting and financial principles needed to effectively counsel and represent clients. Students learn to read, understand, and discuss basic accounting statements and basic financial asset valuation principles and methodologies. Also, basic financial instruments and their normal use in major capital markets.

## **LAW 6271 - Payment Systems**

*Credits: 2*

Introduces students to commercial paper and concentrates on legal problems that arise with negotiable instruments. Includes some coverage of consumer credit cards, bank-based electronic funds transfers (including debit and ACH), e-payments (such as Paypal), and commercial payments (wire transfers and letters of credit), but not in great detail. Teaches students to recognize and research payment problems as they arise.

## **LAW 6275 - Franchising and Distribution Law**

*Credits: 2*

There is a growing recognition and respect for franchising and product distribution domestically and around the world. Franchising had its start in the U.S. around the time of the Civil War, but its growth has been explosive during the last

10 years. Franchising no longer concerns only restaurants and lodging but has expanded to areas such as telecom and automotive. The course provides an overview of the law of franchising and product distribution, both domestically and internationally.

### **LAW 6276 - International Environmental Law**

*Credits: 2*

A study of the transnational law concerning environmental protection and the application of such laws to issues facing governments and businesses worldwide. Includes study of major international agreements addressing environmental issues utilizing a problem-oriented approach.

### **LAW 6278 - Employment Law**

*Credits: 2*

Legal regulation of work and the workplace in a nonunion environment. The course covers the expansion of employee rights against unjust dismissal; invasion of privacy and defamation; and government regulation of the workplace in areas of health and safety, wages, hours, and benefits. Also, briefly surveys employment discrimination law.

### **LAW 6279 - Products Liability**

*Credits: 2*

Covers the concept of recovery for injuries caused by products, the problems associated with hazard identification, and the process of evaluation of risk. Surveys civil actions for harm resulting from defective and dangerous products. Also, government regulation on dangerous and defective products, and current and pending legislation dealing with injuries and remedies in specific areas.

### **LAW 6280 - Patent Law**

*Credits: 2*

Introduces patent and trade secret law for the protection of inventions, technical know-how, and other proprietary intellectual property. Includes procedures and approaches to protecting high technology such as computer software, integrated circuitry, and genetic engineering. Also, the law and procedure of developing the rights, as well as licensing and litigation aspects. Trademark law is briefly covered. A technical background is not a prerequisite for the course.

### **LAW 6284 - Patent Prosecution**

*Credits: 2*

Substantive and procedural aspects of patent prosecution before the U.S. Patent and Trademark Office. Practical exercises in prosecution practice, such as claim drafting, preparation of amendments, and other prosecution proceedings. Additional prosecution subjects, including dealing with inventors, developing invention disclosures, and preparing patent applications. Prerequisite: LAW 6280/LAW 6383 Patent Law.

### **LAW 6288 - Regulation of Securities and Commodities Markets**

*Credits: 2*

A study of the securities laws as they relate to the securities industry itself. Focuses on the roles of broker-dealers, investment advisers, and stock exchanges within the scheme of self-regulation under federal law, and on activities of underwriters and specialists. Problems addressed include broker-dealer duties and liabilities to customers, market manipulation, price stabilization, margin regulations, and competition in the industry. Paper or examination. Prerequisite: LAW 6420 Business Enterprise.

### **LAW 6293 - State and Local Tax**

*Credits: 2*

Selected problems in state and local taxation of individuals and corporations, with particular reference to property, sales, and income taxes. Problems of constitutional authority, intergovernmental conflict and cooperation, economic impact, and administrative review processes.

### **LAW 6299 - Federal Taxpayers Clinic Deputy**

*Credits: 2*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7443 Federal Taxpayers Clinic.

### **LAW 6300 - SMU Law Review Association**

*Credits: 3*

Maximum of 5 credit hours. Preparation of comments on topics of current interest, notes on cases of significance, and editorial work incident to publication of the "SMU Law Review" and the "Journal of Air Law and Commerce." Students must be selected for participation before they may enroll.

### **LAW 6304 - Administrative Law**

*Credits: 3*

A focus on legislative authority and administrative agencies with special emphasis on administrative process and judicial review.

### **LAW 6305 - Election Law**

*Credits: 3*

Examines the laws that govern the political process in the United States. Topics include the right to vote, political representation, election administration, political parties, ballot initiatives, and campaign finance, with some coverage of tax issues, administrative and judicial enforcement, and ethics law. The goal of the course is to provide students with a solid foundation in the basic principles of election law in this country.

### **LAW 6307 - International Humanitarian Law/Law of Armed Conflict**

*Credits: 3*

The essential concepts of international humanitarian law (also known as the law of armed conflict) as derived from international treaty law, customary law, and the experience of history, with a focus on the law applicable to today's conflicts, whether internal, transnational, or international or whether involving armed opposition groups or the armed forces of nation-states. Students explore the law of armed conflict by surveying its history and sources and by examining its principles and application. The course covers specific areas of interest such as the obligations and protections afforded combatants and noncombatants, permissible means and methods of warfare, the law of occupation and neutrality, the definition and prosecution of war crimes, and the implementation of the law of war in U.S. domestic law and policy.

### **LAW 6308 - Advanced Family Law Seminar**

*Credits: 3*

Edited writing seminar that covers selected family law topics in greater depth. The topics may vary by term and may include international and comparative family law, adoption, assisted reproduction technology, and domestic violence. Students are required to write a paper on a family law topic within the covered material. Prerequisite: LAW 6347 Family Law, LAW 6495 Trusts and Estates, or LAW 8302 Children and the Law.

### **LAW 6309 - Constitutional Criminal Procedure: Investigation**

*Credits: 3*

Examines constitutional issues (e.g., search and seizure, interrogation, identification, the exclusionary rule, and the fruit of the poisonous tree doctrine) that may arise in the pretrial stage of a criminal case. Students taking this course may not take LAW 6320 Constitutional Criminal Procedure: Survey.

## **LAW 6310 - Transnational Law**

*Credits: 3*

An introduction to the international legal order as it presents itself to the legal practitioner at the beginning of the 21st century. Drawing on elements of public international law, private international law, and comparative law, the course lays the foundation for more specialized courses in these traditional disciplines.

## **LAW 6311 - Alternative Dispute Resolution**

*Credits: 3*

An examination and analysis of materials and skills used in dispute resolution other than litigation. Emphasizes the theory and practice of negotiation, mediation, arbitration, and mini-trials, with examples and problem simulations drawn from various fields of law.

## **LAW 6313 - International Petroleum Transactions**

*Credits: 3*

A survey of basic principles and contracts used internationally in petroleum exploration and production operations. Topics include concessions, production-sharing contracts, participation agreements, and technical agreements such as study and bidding agreements, confidentiality agreements, and dispute resolution agreements. Focuses on fundamental principles and current issues, and explores drafting solutions and alternative structures.

## **LAW 6315 - Advanced Criminal Law**

*Credits: 3*

An edited writing seminar that covers selected criminal law topics in greater depth. Topics vary by term and student interest, and may include recent and recurrent questions in comparative criminal law, professional responsibility in criminal law practice, and evidence in criminal law practice. Students write up to four papers on the same or different topics to fulfill the edited writing requirement. Prerequisite: LAW 8341 Criminal Law.

## **LAW 6316 - Disability Law**

*Credits: 3*

Covers the dynamic and pervasive statutory and regulatory system that touches every business and a growing number of individuals. Provides a broad overview of the widely varied laws concerning disability to help lawyers identify the challenges their clients may face, and to know where to look for more detailed information about those challenges.

## **LAW 6318 - Banking Law and Regulation: Domestic and International**

*Credits: 3*

Often conducted as a writing seminar. Introduces the federal laws governing commercial banking activities, with primary emphasis on the regulation (and deregulation) of national banks and related policy considerations. Lecture topics vary from year to year but generally include key domestic, regional, and international issues with respect to banking, the banking industry, and the overall financial services industry. Uses interdisciplinary subject matter in economics, finance, and business, and may use comparisons to regulation of other financial institutions. When taught as a regular course, assessment may be by examination and/or paper or series of papers satisfying the writing unit requirement. When taught as a third-year writing seminar, course structure and assessment are consistent with other LAW courses described as writing seminars.

## **LAW 6319 - Public Health Law and Ethics**

*Credits: 3*

Explores the legal structure, legitimacy, design, and implementation of policies that aim to promote public health and reduce the social burden of disease and injury. Highlights the challenge posed by public health's population-based perspective to traditional individual-centered, autonomy-driven perspectives in constitutional law and contemporary U.S. public policy. Illustrative topics (which may vary from year to year) include responses to public health emergencies such as pandemics, mandatory immunization for children, and tensions between public health reporting requirements and the privacy of health information.

## **LAW 6320 - Constitutional Criminal Procedure: Survey**

*Credits: 3*

A survey of criminal procedure, including topics such as investigation, right to counsel, bail, discovery, trial procedure, sentencing, double jeopardy, and postconviction challenges. Intended for the nonspecialist. Students taking this course may not take LAW 6309 Constitutional Criminal Procedure: Investigation or LAW 6390 Constitutional Criminal Procedure: Adjudication.

## **LAW 6321 - Admiralty**

*Credits: 3*

Addresses some or all of the following topics: jurisdiction of maritime cases, practice in admiralty cases, maritime property, chartering, cargo, personal injury and death, marine insurance, and limitation of liability.

## **LAW 6322 - LGBT Rights and the Law**

*Credits: 3*

Covers the main legal and public policy issues affecting lesbian, gay, bisexual, and transgender people in the U.S., including the history of the nation's treatment of LGBT people. Addresses the criminalization and decriminalization of same-sex sexual intimacy, the military's treatment of LGBT people, public and private employment discrimination, discrimination in public accommodations and housing, religious exemptions from LGBT antidiscrimination law, rights of speech and association for those supporting or opposing LGBT-rights initiatives, parenting by LGBT people, and the controversy over same-sex marriage. Readings include important statutory and constitutional decisions affecting LGBT rights, scholarly writing about LGBT issues, and theoretical discussions of sexuality and sexual identity. Considers a variety of perspectives, including the views of those supporting LGBT rights and those with religious and natural law views that are more traditional. Also addresses the intracommunity debate among LGBT rights supporters on matters like same-sex marriage and the need for antidiscrimination laws. Prerequisites: LAW 6222, LAW 8311 Constitutional Law I, II.

## **LAW 6324 - International Protection of Human Rights**

*Credits: 3*

Selected topics, including the protection of individuals and groups against violations by governments and private institutions of their internationally guaranteed rights, and the promotion of these rights. Presentation and discussion of student papers may be required.

## **LAW 6325 - Intellectual Property and Business Organizations**

*Credits: 3*

Students examine the role of intellectual property as a business asset by studying the critical events in a hypothetical business as it progresses from startup to a terminating event such as bankruptcy, merger, or acquisition. Includes identifying intellectual property at the startup phase, protecting intellectual property interests in the employment relationship, and managing an intellectual property portfolio. Also, trade secrets, licensing, antitrust issues, and intellectual property at the termination of a business. Evaluation is by exam, and possibly with problem sets. Recommended: LAW 6356 Intellectual Property or two other intellectual property courses. Prerequisites or corequisites: LAW 6420 Business Enterprise and LAW 6356 Intellectual Property or instructor permission. These requirements may be waived, with the instructor's permission, in unusual circumstances when a student brings extensive business experience involving practice with intellectual property issues.

## **LAW 6327 - International Commercial Arbitration**

*Credits: 3*

Provides reasonably in-depth coverage of the basic concepts and issues of international commercial arbitration. Students review the arbitration rules of the primary institutions and the arbitration laws of the primary arbitration sites, and draft basic arbitration clauses. The course does not cover international litigation.

## **LAW 6329 - Consumer Law**

*Credits: 3*

A study of state and federal regulation of credit and noncredit consumer transactions. Special attention is paid to state and federal legislation regarding unfair and deceptive trade practices embodied in the Federal Trade Commission Act and the Texas Deceptive Trade Practices Act. Includes the federal Truth-in-Lending, Fair Credit Reporting, Equal Credit Opportunity, and Fair Debt Collection acts. Also, state and federal warranty law, contractual and procedural devices designed to facilitate collection, traditional private and public remedies and the means of achieving them, and special problems and issues arising in connection with resolving consumer disputes in the world of e-commerce.

## **LAW 6330 - Conflict of Laws**

*Credits: 3*

An analysis of transactions that have elements in more than one state. Covers the choice of the law applicable to the issues in the case, the enforcement of judgments rendered outside the forum state, and jurisdiction over the out-of-state party. Focuses on relationships among American states but also includes choices between state and national law (the Erie doctrine).

## **LAW 6331 - Pretrial Practice and Advocacy**

*Credits: 3*

Covers pretrial civil litigation procedure, practice, and strategy. Emphasizes participating, developing advocacy skills in the pretrial process, and obtaining a working knowledge of procedural rules governing the pretrial process. A skills course that focuses on the practical application of the civil rules, decision-making, and judgment.

## **LAW 6333 - Creditors' Rights**

*Credits: 3*

Introduces federal and state law governing the debtor-creditor relationship: enforcement of judgments; attachment, garnishment, and sequestration; fraudulent conveyances; and bankruptcy as affecting secured and unsecured creditors under the Bankruptcy Code.

## **LAW 6334 - Law and Behavioral Economics**

*Credits: 3*

Economic analysis of law is an increasingly important mode of legal analysis involving the application of microeconomic tools (and assumptions) to the study of legal rules, legal institutions, and legal compliance. The field of behavioral economics employs theoretical and empirical insights from psychology (and other fields) in an effort to critically evaluate and build upon economic models. Students learn the basic microeconomic toolset used in traditional law and economics analyses, and a handful of psychological findings that challenge and refine the economic assumption of "rationality."

## **LAW 6335 - Aging and the Law Practicum**

*Credits: 3*

Introduces the physiological, psychological, sociological, and legal realities that shape the experience of aging in society today. This experiential course focuses on ways lawyers act collaboratively to solve problems, including contextualizing and expanding basic doctrinal analysis of applicable law and how it can be used to constrain or facilitate human action. Includes solving problems, using law as a tool of advocacy, collaborating with firm members, developing fact-based expertise, using cognitive capacity assessment tools, and exploring varied paradigms of legal thinking. Students work with federal and state laws and judicial processes that impact aging individuals. Special projects and exercises, including collaborative work in small firms and fieldwork in the Dallas area, exposes students to the legal systems addressing competency and independence, such as consumer protection and guardianship, aging in place, and the array of income and health benefits programs. Provides a foundation to pursue a legal practice incorporating the special concerns of the aging.

### **LAW 6336 - Directed Research**

*Credits: 3*

Maximum of 3 credit hours. Research on legal problems in any field of law may be carried on with the consent of the instructor involved. A comprehensive, analytical, and critical paper must be prepared to the instructor's satisfaction. Open to students who have completed more than one-third of the credit hours required for graduation. Before enrollment for directed research, the student must obtain, on a form supplied by the Registrar's Office, written approval of the instructor for the research project. Students may not receive more than a total of 3 credit hours of directed research during law school.

### **LAW 6337 - Patent Clinic**

*Credits: 3*

Students provide pro bono legal services to individual and small-business clients seeking to protect their inventions using the patent system. This work may involve counseling clients regarding patent-related matters, conducting inventor interviews, conducting patentability searches, preparing patentability opinions, drafting and filing patent applications, and drafting and filing responses to office actions received from the U.S. Patent and Trademark Office.

### **LAW 6338 - Small Business and Trademark Clinic**

*Credits: 3*

The Small Business Clinic provides free legal services to new and existing small businesses and nonprofit organizations that cannot afford to pay legal fees. The clinic provides students real-world training and experience in the transactional practice of law. Student lawyers advise clients in the startup phase of their businesses, form and advise nonprofit organizations, assist in preparing necessary legal documents, and learn ways to assist clients involved in transactional business law. In the Trademark Clinic, which is part of the Small Business Clinic and a member of the USPTO Law School Clinic program, student lawyers gain specific experience in advising clients about basic trademark matters as well as experience in drafting, filing, and handling trademark applications with the USPTO. Prerequisites: LAW 6420 Business Enterprise, and LAW 8203 Counseling the Small-Business Owner. Students must be in good academic standing and have completed 50 percent of all course requirements.

### **LAW 6339 - Appellate Advocacy**

*Credits: 3*

An advanced skills course designed to build upon the first-year persuasive writing experience, to explore issues common to appellate advocacy (including preservation of error, assessment of the trial record, appellate jurisdiction, and standards of review), and to practice and refine advocacy skills through writing persuasive briefs and making oral arguments.

### **LAW 6340 - Employment Law**

*Credits: 3*

Legal regulation of work and the workplace in a nonunion environment. Covers the expansion of employee rights against unjust dismissal, invasion of privacy, and defamation. Also, government regulation of the workplace in the areas of health and safety, wages, hours, and benefits. Briefly surveys employment discrimination law.

### **LAW 6341 - Advanced Legal Research**

*Credits: 3*

An experiential learning course that builds on the legal research systems and methods covered in the first-year legal research course. Through a series of assignments and in-class research simulations, students will develop proficiency in locating and evaluating statutes, case law, secondary authority, administrative regulations and decisions, legislative history, court rules, and local law. Emphasizes advanced research strategies and processes to build research skills in a variety of legal practice areas.

## **LAW 6342 - Issues in Contracts Used in International and Domestic Petroleum Transactions**

*Credits: 3*

Focuses on legal issues that arise in the oil and gas industry in exploring, developing, and marketing petroleum. Specific topics will include issues that arise from so-called "granting instruments" (leases, concessions, production-sharing agreements, and service contracts), "intra-industry contracts" (such as confidentiality agreements, study and bid contracts, assignments and farmouts, operating agreements, purchase and sale agreements, and contracts for the sale of production), as well as from the transfer of mineral rights and royalty rights.

## **LAW 6343 - Estate Planning and Practice**

*Credits: 3*

Functional examination of the integration of the federal estate and gift taxes; marital deduction planning and drafting; drafting the bypass trust; desirability of making lifetime interspousal transfers; gifts to minors and other dependents (including the grantor trust rules); techniques of income deflection and estate shrinkage for tax reasons; transferring ownership of life insurance, with emphasis on irrevocable life insurance trusts; and introduction to the generation-skipping tax. Recommended, previously or concurrently: LAW 8395 Wills and Trusts or LAW 6460/LAW 8360 Income Taxation.

## **LAW 6344 - Environmental Law**

*Credits: 3*

A survey that introduces basic elements of federal environmental law. Includes analysis of environmental regulatory policy; statutory control of air, water, and hazardous waste pollution; and allocation of the costs of cleaning environmental contamination.

## **LAW 6345 - IP and the Creative Entrepreneur**

*Credits: 3*

In this hands-on experiential course, students will have the opportunity to develop knowledge and skills needed to represent entrepreneurs whose businesses include intellectual property rights. Topics include entity formation, trademark and copyright applications, launching the business, employment contracts, company IP policies, dispute resolution, and exit strategies. Students will negotiate and draft a number of key documents and work on case studies involving graphic design firms, film production companies, and performing arts groups.

## **LAW 6347 - Family Law**

*Credits: 3*

The legal problems of the family, including marriage, annulment, divorce, legitimacy, custody, support of family members, adoption, and related matters. Does not include Texas matrimonial property law. If the student plans to take instruction in both courses, this course should be taken first.

## **LAW 6349 - Federal Courts**

*Credits: 3*

Congressional control of the distribution of judicial power among federal and state courts. Also, practice and procedure in the federal district courts, including choice of law, federal question and diversity jurisdiction, and state-federal conflicts.

## **LAW 6350 - Crimes Against Women Clinic Deputy**

*Credits: 3*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 7642

### **LAW 6351 - Family Law Clinic Deputy**

*Credits: 3*

Includes assisting in preparing and supervising clinic students in client representation. Deputies are selected by the clinic instructors. Students may not enroll before being selected. Prerequisite: LAW 7643 Family Law Clinic.

### **LAW 6352 - Corporate and Transactional Legal Research**

*Credits: 3*

Designed for students who are interested in practicing corporate and transactional law, this course helps develop advanced proficiency in case law and statutory research and knowledge of regulatory materials, secondary sources, and other fundamental research concepts utilized in a corporate law practice. Focuses on locating and evaluating primary and secondary sources that can be used to research issues involving business transactions, securities offerings, corporate governance, and a number of related topics. Assignments and in-class exercises simulate activities frequently performed by transactional attorneys.

### **LAW 6353 - Immigration Law**

*Credits: 3*

An analysis of the Immigration and Nationality Act and relevant regulations with respect to the immigration of aliens, the substantive and procedural aspects of deportation, and exclusion proceedings. A review of nationality law with respect to citizenship and expatriation. Special problems of refugees in the U.S. may be considered.

### **LAW 6354 - Insurance**

*Credits: 3*

Principles governing the nature of insurance law; the principle of indemnity, including insurable interest, measure of recovery, and multiple claims for indemnity (subrogation and other insurance); persons and interests protected; risks transferred, including nature of loss and its causes, warranties, representations, and concealment; limits and duration of coverage; rights at variance with policy provisions; claims processes; and insurance institutions.

### **LAW 6355 - International Law**

*Credits: 3*

The basic course in public international law includes (with varying emphasis depending on teacher preference) such topics as nature, history, and sources of international law; customary international law; law of treaties; the relationship between municipal law (especially of the U.S.) and international law; recognition and subjects of international law; law of the sea; air, and space law; environmental law; human rights; jurisdiction; state responsibility; state succession; dispute settlement; and regulation of state use of force.

### **LAW 6356 - Intellectual Property**

*Credits: 3*

An overview of intellectual property law for students with a general interest in the area and for students who are pursuing specialized fields with IP. Includes an analysis of the competing theories underlying IP law and outlines the basic principles of patent, copyright, trademark, and trade secret protection. Also, current issues in software protection, biotechnology, and competition policy.

### **LAW 6357 - Child Advocacy Clinic Deputy**

*Credits: 3*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected..

### **LAW 6358 - Selected Issues in Sports Law**

*Credits: 3*

Explores various important and topical case law and transactional issues in the area of sports law, such as free speech

issues for athletes, sports gambling and daily fantasy sports, the Commissioners' authority to discipline in professional sports, and the viability of the NCAA's amateurism model. Students will be expected to delve deeply into a sports law related topic by researching and writing a substantial research paper which will meet our edited writing requirements.

### **LAW 6359 - Criminal Plea Negotiations**

*Credits: 3*

Explains the history and rise of plea negotiations within the American judicial system. Analyzes the two major theories of punishment, the Utilitarian Theory and the Retributive Theory. Students evaluate what they believe about the basis and possible purposes of punishment. Describes the roles and legal and ethical duties of a prosecutor and defense attorney. Explores the various levels and types of offenses contained within the Texas Penal Code. Students then use that knowledge to effectively negotiate a plea agreement as both a prosecutor and a defense attorney on both the misdemeanor level and felony level of case prosecution, specifically focusing on Texas law. Prerequisite: LAW 8341.

### **LAW 6360 - Labor Law**

*Credits: 3*

Provides a detailed study of the National Labor Relations Act and its interpretation by the National Labor Relations Board and federal courts. Covers the rights and duties of individuals and institutions in the labor-relations context, as well as concerted activity, including strikes, boycotts, and picketing.

### **LAW 6361 - Technology, Innovation, and Law - Designing Legal Apps**

*Credits: 3*

Exposes students to the varied uses of computer technologies in the practice of law. Familiarizes students with various innovative software platforms that are being adopted in law practice to enhance access to justice, capture legal expertise, interface with clients, manage litigation and transactional processes, and increase the efficiency and quality of legal services. Introduces students to justice/social justice issues through readings and guest speakers. Students learn teamwork, an understanding of the relationship among the rules and doctrines that apply within a particular legal regime, and visual literacy skills. Students work in small teams for a law school clinical program or a legal service organization to develop a platform, application, or automated system that increases access to justice and/or improves the effectiveness of legal representation. Culminates in an app design competition, which is judged by outside experts in the field. The goal is that, by the end of the semester, each team will have built a functional app that is adopted by the legal clinic or legal service organization and put into use for the organization or its clients.

### **LAW 6362 - Selected Topics in Gender Law**

*Credits: 3*

Edited writing seminar that covers selected topics in gender law. Topics may vary by term and may include women and violence, reproductive rights, workplace equality, intersectionality, educational equity, and women in the justice system.

### **LAW 6363 - Land Use**

*Credits: 3*

Planning, zoning, subdivision, takings, zoning and discrimination, and administrative process in public land use planning.

### **LAW 6364 - Legal Research and Writing for International LL.M. Students**

*Credits: 3*

Introduction to the general principles of U.S. law research, legal analysis, and objective writing. Successful completion of this course enables students to recognize and distinguish primary and secondary levels of authority; locate, read, and understand rules of law available in constitutions, judicial opinions, and statutes; demonstrate the ability to update all types of legal authority, including the process of Shepardizing; demonstrate the ability to recognize and use acceptable citation forms for legal authority; and complete legal research/writing assignments to explain the law pertaining to a legal question.

## **LAW 6365 - Legislation and Regulation**

*Credits: 3*

Examines the lawmaking function of legislatures and agencies, as well as their interaction with the courts. Drawing on examples from a variety of substantive areas, the course covers the legislative process, statutory interpretation, administrative processes, various forms of agency action, and judicial review of agency decisions.

## **LAW 6366 - Constitutional Law I**

*Credits: 3*

Examines methods of constitutional interpretation, the role of judicial review, federal power, separation of powers, federalism, and justiciability.

## **LAW 6367 - Contracts I**

*Credits: 3*

History and development of the common law of contract; principles controlling the formation, performance, and termination of contracts, including the basic doctrines of offer and acceptance, consideration, conditions, material breach, damages, and statute of frauds; and statutory variances from the common law, with particular attention to Uniform Commercial Code sections.

## **LAW 6371 - Civil Procedure I**

*Credits: 3*

Civil procedure, focusing on judicial resolution of disputes and development of the modern civil action, including consideration of the jurisdiction of courts, venue, process, pleading, joinder, discovery, pretrial practice, right to a jury trial, withdrawing cases from a jury, motions after verdict, judgments and their effects, and appellate review. Also, an introduction to alternative dispute resolutions.

## **LAW 6378 - Oil and Gas**

*Credits: 3*

Ownership in oil and gas, correlative rights and duties in a common reservoir, instruments conveying mineral interests, partition, and pooling and unitization. Special emphasis on the rights and duties of the oil and gas lessee and lessor in leasing transactions.

## **LAW 6379 - Products Liability**

*Credits: 3*

Covers the concept of recovery for injuries caused by products, the problems associated with hazard identification, and the process of evaluation of risk. Surveys civil actions for harm resulting from defective and dangerous products. Also, government regulation on dangerous and defective products, and current and pending legislation dealing with injuries and remedies in specific areas.

## **LAW 6380 - Texas Land Titles**

*Credits: 3*

Law of Texas land titles, with a title examination practice skills component. Also, recording acts, bona fide purchaser, conveyancing, title standards, land descriptions, adverse possession, and title insurance.

## **LAW 6381 - Property II**

*Credits: 3*

Selected topics in personal property, adverse possession, present possessory and future estates in land, concurrent estates, the law of landlord and tenant, easements, private covenants, public land use regulation, and real estate conveyancing.

### **LAW 6382 - Animal Law**

*Credits: 3*

Introduces the field of animal law, a dynamic and emerging area of the law. Not an animal rights course. Surveys the historical origins of the legal status of animals and examines the common law and statutory foundations upon which it operates. Also, traditional legal disciplines such as constitutional law, contracts, and torts through the lens of animal interests. Explores the often-controversial moral, ethical, and public policy considerations faced when balancing the legal interests of humans and nonhumans. Covers current laws affecting animals at the local, state, and federal levels.

### **LAW 6383 - Patent Law**

*Credits: 3*

An introduction to patent law. Analyzes the goals and costs of the patent law system. Studies substantive and procedural aspects of obtaining patents from the U.S. Patent and Trademark Office and enforcing patents through licensing and litigation. Covers patentability, validity, enforceability, claim construction, infringement, and remedies. Does not require a technical background as a prerequisite for the course.

### **LAW 6384 - Energy and Natural Resources Law**

*Credits: 3*

This introduction to energy law surveys the legal and policy issues raised by the major sources of energy, while emphasizing environmental and natural resources issues. Significant attention is devoted to hot topics in energy law, including BP's 2010 Gulf of Mexico oil spill, the natural gas drilling boom, nuclear energy concerns following the March 2011 earthquake in Japan, and climate change issues.

### **LAW 6389 - Sale of Goods Transaction**

*Credits: 3*

An introductory survey of the law of sales under the Uniform Commercial Code, with particular emphasis on Article 2. Also, contract formation, parol evidence rule, statute of frauds, risk of loss, receipt and inspection, acceptance, revocation, warranties, remedies of buyer and seller, remedy disclaimers and limitations, documentary transactions, and consumer protection.

### **LAW 6390 - Constitutional Criminal Procedure: Adjudication**

*Credits: 3*

Examines constitutional issues (e.g., custody and release pending trial, preliminary hearings, the grand jury, joinder and severance, discovery, plea bargaining, trial procedures, double jeopardy, sentencing, and postconviction remedies) that may arise during the postinvestigation stage of a criminal case. Students taking this course may not take LAW 6320 Constitutional Criminal Procedure: Survey.

### **LAW 6392 - Patent Law and Institutional Choice**

*Credits: 3*

Explores the institutional structure of the U.S. patent system and the roles of the different institutions: the U.S. Patent and Trademark Office; federal district courts and juries; the U.S. Court of Appeals for the Federal Circuit; and the U.S. Supreme Court. Covers critiques of this structure and these institutions, with a particular emphasis on critiques of the Federal Circuit. Compares and contrasts the U.S. institutional structure with the structure of the patent systems of other countries and regions of the world. Corequisite: LAW 7262 Patent Litigation or LAW 6284 Patent Prosecution or professor's permission.

### **LAW 6394 - Business Enterprise for LLMS**

*Credits: 3*

A survey of American business laws for international graduate students. Selected topics may be drawn, from year to year, from the laws of agency, partnership, corporation, securities, antitrust, bankruptcy, and business taxation. Taught from the perspective of assisting non-U.S. trained lawyers to draw comparative and practical lessons. Enrollment is limited to international graduate students not trained in U.S. law.

### **LAW 6395 - Texas Matrimonial Property**

*Credits: 3*

The Texas law of marital property; its characterization as separate or community property; its management and liability; and its division on dissolution of marriage by annulment, divorce, or death of a spouse, with special attention to the family home and other exempt property.

### **LAW 6396 - Energy Transport and Trade**

*Credits: 3*

Focuses on complex and emerging issues in energy trade and transport law. Explores the physical and legal forces that shape energy transport markets in oil, coal, natural gas, and other electricity. Examines how energy transport projects, such as oil and gas pipelines, liquefied natural gas facilities, export terminals, and power lines, are authorized by regulators and given the power of eminent domain. Scrutinizes supply chain standards for energy projects that favor energy sources based on how they were produced in other jurisdictions, favoring fuels designated as clean or renewable. Also examines legal limits on energy trade restrictions between states and between countries. Students analyze and discuss important recent energy transport legal decisions and scholarship. Students are expected to submit comments and questions on each week's scholarship, occasionally present to the class, and engage in class discussion.

### **LAW 6397 - Trademark and Business Torts**

*Credits: 3*

An examination into common law and statutory remedies for a variety of trade practices denominated "unfair," including misappropriation, the right of publicity, and trade secret protection; trademarks; copyrights; deceptive advertising; and issues of federal preemption. Also, the role of the Federal Trade Commission with respect to unfair and deceptive practices, with emphasis on its regulation of advertising.

### **LAW 6399 - Federal Taxpayers Clinic Deputy**

*Credits: 3*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7443 Federal Taxpayers Clinic.

### **LAW 6401 - Introduction to the Uniform Commercial Code**

*Credits: 4*

Emphasis on the U.C.C.'s general principles and secured transactions, commercial paper, and bank collections. Students enrolled in the course may enroll in LAW 9301 -Negotiable Instruments and Payment Systems and LAW 6389 Sale of Goods Transaction but may not enroll in LAW 7325 Secured Transactions.

### **LAW 6402 - Small Business and Trademark Clinic**

*Credits: 4*

The Small Business Clinic provides free legal services to new and existing small businesses and nonprofit organizations that cannot afford to pay legal fees. The clinic provides students real-word training and experience in the transactional practice of law. Student lawyers advise clients in the startup phase of their businesses, form and advise nonprofit organizations, assist in preparing necessary legal documents, and learn ways to assist clients involved in transactional business law. In the Trademark Clinic, which is part of the Small Business Clinic and a member of the USPTO Law School Clinic program, student lawyers gain specific experience in advising clients about basic trademark matters as well as experience in drafting, filing, and handling trademark applications with the USPTO. Prerequisites: LAW 6420 Business Enterprise. Students must be in good academic standing and have completed 50 percent of all course requirements.

## **LAW 6403 - Torts**

*Credits: 4*

Civil liability arising from breach of common law and statutory duties as distinguished from duties created by contract, including coverage of intentional wrongs, negligence, and product liability. Discusses the methods and process of the American legal system, with attention paid to legislation and the common law.

## **LAW 6404 - Property**

*Credits: 4*

Selected topics in personal property, adverse possession, present possessory and future estates in land, concurrent estates, the law of landlord and tenant, easements, private covenants, public land use regulation, and real estate conveyancing.

## **LAW 6405 - Civil Procedure**

*Credits: 4*

Civil procedure, focusing on judicial resolution of disputes and development of the modern civil action, including consideration of the jurisdiction of courts, venue, process, pleading, joinder, discovery, pretrial practice, right to a jury trial, withdrawing cases from a jury, motions after verdict, judgments and their effects, and appellate review. Also, an introduction to alternative dispute resolutions.

## **LAW 6420 - Business Enterprise**

*Credits: 4*

Basic business law course that begins with an emphasis on the closely held business, including 1) general principles of the law of agency and 2) general and limited partnerships: formation, control, liabilities, property, dissolution, and disposition of business, as well as internal and external relations of partners. Also, limited liability companies and corporations: formation, control, and allocation concerns; duties, liabilities, and rights of management and shareholders or members; dispute resolution devices; and fundamentals of capitalization and financing (including basic securities financing and securities law concerns, particularly respecting the private exempt offering). The second portion of the course emphasizes the widely owned business, including general corporate governance and capitalization problems such as preferred stock and debt securities structuring, corporate distributions and repurchases, and fundamental corporate changes. Also, analysis of mergers and acquisitions. Depending on available time, may focus on the impact of federal securities laws on the corporate governance structure, including discussion of ongoing public disclosure requirements, proxy regulations, and insider trading restrictions and liabilities. This transaction-oriented course stresses planning and problem-solving and includes interdisciplinary use of basic notions of taxation, accounting, and finance. Special attention is given to modern statutory trends.

## **LAW 6423 - Economic Analysis of Law**

*Credits: 4*

Introduces the economic analysis of legal rules and institutions. Examines the efficiency paradigm in some detail, and then analyzes basic common law and criminal law doctrines from an economic perspective. Seeks to develop a facility in the application of economic reasoning to legal questions, and to impart a sense of the limitations of the economic approach. Does not presuppose extensive familiarity with economics but some background is essential (i.e., at least an introductory course in microeconomics and preferably also some exposure to intermediate-level microeconomics or price theory).

## **LAW 6430 - Constitutional Criminal Procedure**

*Credits: 4*

A survey of criminal procedure, including topics such as investigation, right to counsel, bail, discovery, trial procedure, sentencing, double jeopardy, and postconviction challenges. This course is intended for the nonspecialist. Students taking this course may not take LAW 6309 Constitutional Criminal Procedure: Investigation or LAW 6390 Constitutional Criminal Procedure: Adjudication.

## **LAW 6460 - Income Taxation**

*Credits: 4*

Introduction to the federal income tax system; analysis of Internal Revenue Code, Treasury Regulations, rulings, and case law; and consideration of income, deductions, credits, assignment of income, and accounting periods and methods.

## **LAW 6495 - Trusts and Estates**

*Credits: 4*

A general survey of the law relating to family wealth transmission, taking into account transfers within the probate system - wills and intestate succession - and transfers outside it, with special attention to trusts. Topics include the legal definition of family relationships; formalities required for execution and revocation of wills and other donative documents; mental capacity and volition; drafting pitfalls, postexecution events, and difficulties of interpretation; legal protections offered to a decedent's spouse and children; will substitutes such as life insurance, pension plans, and rights of survivorship; planning for incapacity and other changes in circumstances; obligations and powers of fiduciaries; rights of creditors and beneficiaries; trust creation, supervision, modification, duration, and termination; charitable purposes; and the impact of tax policy on estate planning.

## **LAW 7100 - Advanced Legal Research: Texas**

*Credits: 1*

Expands on research skills and materials explored in the first-year legal research course, with a focus on Texas specific resources. Topics for the class include sources for Texas case law, statutory, and regulatory research; secondary sources and practitioners' materials specific to Texas; understanding and using Texas legislative histories; local law including local court rules and municipal law; and locating non-legal information relevant to the practice of law, e.g. statistical data. Prerequisites: LAW 8375 - Legal Research, Writing, and Advocacy I and LAW 8376 - Legal Research, Writing, and Advocacy II.

## **LAW 7101 - Oil and Gas Finance**

*Credits: 1*

Immerses students in practical business and legal concepts pertaining to oil and gas development and demonstrates how those issues manifest themselves in the financing documents drafted by lawyers. Students learn the provisions of financing documents and the legal and business issues behind the provisions. The tools and concepts taught in class lectures are implemented by students in practice. Like first-year associates, students start the class with a form of term sheet, a form of credit agreement, and the The LSTA's Complete Credit Agreement Guide, Second Edition. With input from a client, groups negotiate and agree on the final term sheet and credit agreement. The final work product is a credit agreement redlined against the form. In the final class, each group discusses the final "deal" that was struck and explains the principal points of contention and how they drafted compromises in the documents.

## **LAW 7102 - Presidential Impeachment**

*Credits: 1*

This paper course investigates the legal and political issues relating to Presidential impeachment and removal from office. During the first half of the semester students meet weekly in a seminar-style format to discuss several assigned books relating to impeachment issues. Students then choose an impeachment-related topic of appropriate scope and research and write a 15-20 page paper. At least one draft of this paper is submitted to the instructor for comments and suggested revisions prior to submission of the final paper.

## **LAW 7103 - Mid-Size and Small Law Firm Externship**

*Credits: 1*

The midsize and small firm externship program combines a weekly classroom component with hands-on experience in a mid-size or small law firm. Students develop practical skills within the classroom which are enhanced through observational and/or participatory experiences at a law firm. Students apply substantive knowledge in a variety of matters and develop a range of skills and aptitudes necessary for successful lawyering in smaller firm environments. The class addresses time keeping, marketing, networking and its relation to social media, professionalism and ethics,

presentation skills, drafting skills, deposition skills, the importance of both internal and external relationships, and the importance of asking for and responding to feedback on work.

### **LAW 7105 - Business Law Boot Camp**

*Credits: 1*

Introduces vocabulary, concepts, and skills needed to effectively understand how business works so students are able to communicate with and advise business clients (including as regulatory and litigation counsel). The course is not designed to go in-depth, but moves quickly over key business concepts and terminology. Students learn from expert SMU faculty (including from the Cox School of Business) and from industry experts, both lawyers and business professionals. A background in finance, accounting, or business is neither required nor expected.

### **LAW 7122 - Comparative Law II**

*Credits: 1*

Limited enrollment seminar course designed to accommodate specific seminar interests of faculty and visiting faculty in comparative law-related subject matter. May examine topics such as selected aspects of law and judicial processes or specific legal areas of selected foreign countries, regions, and economic markets; laws impacting foreign investment and dispute resolution; treaty law-making processes; or comparative corporate governance, business organization, commercial law, and accounting trends. Because topics vary from year to year, students may repeat the course for credit. Transcribed as CL-2 [specific seminar name]. No knowledge of a foreign language is required.

### **LAW 7141 - Criminal Litigation Clinic**

*Credits: 1*

### **LAW 7142 - Anatomy of a Deal**

*Credits: 1*

Discusses how the various legal doctrines students learn in different courses impact a business transaction, and how a business transaction requires teamwork and project management from its early stages through closing and integration of the business. Explores these and other related questions through a series of readings and a review of actual transactions, and culminates in an exercise where students are broken into teams to draft and negotiate agreements addressing specific fact situations.

### **LAW 7157 - Civil Clinic Deputy**

*Credits: 1*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7559 Civil Clinic.

### **LAW 7180 - Moot Court Competition**

*Credits: 1*

Participation as a member of an appellate advocacy team representing the Dedman School of Law in one of several interschool competitions in which the school participates each year. Allows 1 credit hour for each competition, up to a maximum of 2 credit hours. Students must be selected for participation on a competition team by the faculty coach before they can register for credit.

### **LAW 7183 - Mock Trial Competition**

*Credits: 1*

Participation as a member of a mock trial team representing Dedman School of Law in one of several interschool competitions in which the school participates each year. Allows 1 credit hour for each competition, up to a maximum of 2 credit hours. Students must be selected for participation on a competition team by the faculty coach before they can register for credit.

## **LAW 7201 - Entertainment Law**

*Credits: 2*

An overview of the entertainment business and its fundamental legal and financial issues. Includes the role of attorneys and agents, personal and intellectual property rights, motion picture production and distribution, television rights and procedures, literary publishing, and music publishing and sound recordings. Particular emphasis is placed on technological developments and contract negotiation.

## **LAW 7203 - Criminal Procedure in the Digital Age**

*Credits: 2*

Examines how law enforcement officers use new technology in combating crime and how the law regulates the use of such technology. Can constitutional language that pre-dates the discovery of electricity and the invention of the telephone, the computer, and the internet adequately address questions raised by big data policing, mass surveillance, and cross-border cyber-investigations? How can longstanding legal doctrines be adapted to meet the challenges of the digital age? How should the law balance individual interests in privacy and dignity against interests in security and efficiency? Should such matters be regulated through legislation or through case law?

## **LAW 7204 - Advanced Corporate Taxation**

*Credits: 2*

Taxation of corporate reorganizations and carry-over of tax attributes.

## **LAW 7205 - White-Collar Crime**

*Credits: 2*

Advanced criminal law course that covers the substantive law of federal white-collar crime, including conspiracy, mail fraud, RICO, public corruption, money laundering, financial institution fraud, tax fraud, and environmental crime. Also, issues of corporate and executive criminal liability and parallel civil and criminal proceedings.

## **LAW 7206 - Trials at the Patent Office**

*Credits: 2*

Provides an advanced look into the adversarial proceedings conducted before the Patent Trial and Appeal Board (PTAB) at the U.S. Patent and Trademark Office. Focuses on the practical aspects of inter partes review (IPR), post-grant review (PGR), and covered business method (CBM) review, and examines the strategies and interplay of these proceedings with patent litigation in federal courts. Students conduct a case study of an actual IPR from initial filing to the Federal Circuit, review PTAB rules and orders, draft pleadings, conduct mock oral hearings, and analyze the groundbreaking (and often contradictory) rulings in this relatively new area of law.

## **LAW 7207 - Federal Tax Procedure I**

*Credits: 2*

Preparation and trial of tax cases in the federal courts, representation of a taxpayer before the Internal Revenue Service, administrative powers and procedures of the Internal Revenue Service, criminal violations of the Internal Revenue Code, and accumulations of supporting evidence for a tax plan.

## **LAW 7208 - Drafting Oil and Gas Contracts**

*Credits: 2*

Drafting effective and clear oil and gas contracts; reviewing basic components and building blocks of contracts; translating the business deal into an oil and gas contract; proposing solutions for problems encountered by counsel in the oil and gas industry. Prerequisites or corequisites: LAW 6378 Oil and Gas Law, LAW 6228/LAW 7369 Oil and Gas Contracts, or LAW 6313 International Petroleum Transactions.

## **LAW 7209 - Employment Law: Addressing Social Change in the Work Place**

*Credits: 2*

Examines different strategies lawyers use to effectuate social change in the workplace. Students learn strategies that are

used in challenging and advancing employment law, including advocating for or against legislation; individual and class litigation; and changes to private company work policies. Specific strategies used in combating historical workplace discrimination (e.g. race, gender, sexual orientation) are put in a social context. In addition to studying strategies used in the past, this course critically assesses contemporary workplace issues and how best to address them. Topics will include sexual harassment and the "me too" movement, salary and criminal history questions, employee drug testing in light of the changing landscape of marijuana laws, family leave, organized labor, and more.

### **LAW 7210 - Advanced Legal Research: Texas**

*Credits: 2*

Expands on research skills and materials explored in the first-year legal research course, with a focus on Texas specific resources. Topics for the class include sources for Texas case law, statutory, and regulatory research; secondary sources and practitioners' materials specific to Texas; understanding and using Texas legislative histories; local law including local court rules and municipal law; and locating non-legal information relevant to the practice of law, e.g. statistical data. Prerequisites: Law 8375 Legal Research and Writing I and LAW 8376 Legal Research and Writing II.

### **LAW 7211 - Entertainment Law II**

*Credits: 2*

An experiential learning course with a heavy writing component. Students identify the fundamental interests in entertainment deals, analyze customary contract provisions, and negotiate and draft agreements. Prerequisite: LAW 7201 Entertainment Law I.

### **LAW 7212 - Selected Topics in Labor Law**

*Credits: 2*

This course is for students interested in acquiring a more in-depth understanding of labor law in the United States. Addresses advanced labor issues from the perspectives of management, labor organizations, individual employees, and the government. Examines labor issues arising in the non-union workplace; tools of economic pressure, including strikes and lockouts; and advanced remedial rights. Explores current hot topics including the use of social media in the workplace; labor rights in the gig economy; the interplay between labor rights and immigration law; and the impact of politics on labor policy. The course is interactive and includes writing, discussion, and practical and "real world" exercises.

### **LAW 7216 - International Tax I**

*Credits: 2*

A basic course for U.S. and international students focusing on foreign citizens, residents, and business entities conducting business or investment in the United States - so-called inbound transactions.

### **LAW 7218 - Race and Intellectual Property**

*Credits: 2*

Explores the relationship between race and intellectual property case law, principles, and policy. This relational exploration includes analyzing constitutional law principles, statutory histories, and legal interpretations. Students analyze the impact of this intersection on socioeconomic status, wealth, and education as well as on intellectual property case law and policy. Applies a critical race theory lens to intellectual property. This course is reading intensive, and explores how and in what ways racial and other forms of inequality are built into intellectual property law, policy, and practice. Students are expected to complete the readings, lead one session, and write a research paper to be turned in and presented to the class.

### **LAW 7219 - Circumstantial Evidence in Murder Trials**

*Credits: 2*

Examines the techniques of properly analyzing circumstantial evidence in the context of a murder trial. From the crime scene to the courthouse, students learn the role of and the technical process of presenting circumstantial evidence. The class is based on crime scene evidence and trial transcripts from several famous Dallas murders including Jack Ruby (the assassination of Lee Harvey Oswald), Charles Tex Watson (the Manson Family Killings), Charles Albright (The

Eyeball Killer), and the Trinity River Massacre. It is recommended that students have either taken or are enrolled in Evidence.

### **LAW 7220 - Law and Statistics**

*Credits: 2*

Introduces students to the role of statistics in litigation and legal policy. In particular, after introducing basic concepts in statistics (with a focus on concepts rather than techniques), it examines, first, how scholars and legal decision-makers use data and statistics to inform policy regarding major areas of the law, such as torts, property, and criminal law, and, second, how statistics is and can be used in the courts to prove claims and improve legal outcomes. Addresses questions such as what does it mean to have accuracy in the law? How can methods of estimation in the sciences be applied to attain better legal outcomes? And how can scholars, courts, and policy makers use data to analyze and improve the law?

### **LAW 7221 - Mid-Size and Small Law Firm Externship**

*Credits: 2*

The midsize and small firm externship program combines a weekly classroom component with hands-on experience in a mid-size or small law firm. Students develop practical skills within the classroom which are enhanced through observational and/or participatory experiences at a law firm. Students apply substantive knowledge in a variety of matters and develop a range of skills and aptitudes necessary for successful lawyering in smaller firm environments. The class addresses time keeping, marketing, networking and its relation to social media, professionalism and ethics, presentation skills, drafting skills, deposition skills, the importance of both internal and external relationships, and the importance of asking for and responding to feedback on work.

### **LAW 7222 - Comparative Law II**

*Credits: 2*

Limited enrollment seminar course designed to accommodate specific seminar interests of faculty and visiting faculty in comparative law-related subject matter. May examine topics such as selected aspects of law and judicial processes or specific legal areas of selected foreign countries, regions, and economic markets; laws impacting foreign investment and dispute resolution; treaty law-making processes; or comparative corporate governance, business organization, commercial law, and accounting trends. Because topics vary from year to year, students may repeat the course for credit. Transcribed as CL-2 [specific seminar name]. No knowledge of a foreign language is required.

### **LAW 7223 - Texas Pre-Trial Procedure**

*Credits: 2*

Texas civil procedure prior to trial, including establishing the attorney-client relationship, the pre-litigation aspects of civil controversies, jurisdiction, service of process, pleading, joinder of parties and claims, venue, res judicata and related principles, discovery, summary judgment practice, and settlement.

### **LAW 7224 - Commercial Real Estate Seminar**

*Credits: 2*

A practice-oriented study of documentation of and due diligence in the transfer, leasing, and finance of commercial real estate. Includes exercises in negotiation; title review; and drafting of documents, letters, and memoranda.

### **LAW 7225 - Art Crimes**

*Credits: 2*

Introduces students to laws, regulations, policies, and international conventions that govern criminal activities related to works of art, antiquity, and cultural heritage. Includes readings and discussions of statutory laws and regulations, case opinions, ethical codes, scholarly articles, and news reports. Topics include theft, forgery, fraud, graffiti, looting, grave-robbing, crimes during military conflict, illicit trafficking, illegal import and export, and violations of laws and policies targeting national and indigenous objects of cultural heritage. Discussions and debates involving legal and ethical issues enable students to explore differing viewpoints and assumptions about the rights and obligations of various stakeholders and interested parties who interact with objects of art and culture.

## **LAW 7226 - Reflections of Global Privacy in Black Mirror**

*Credits: 2*

Uses viewings and discussion of the Netflix series Black Mirror as an entry point for comparison of current global privacy law and how the legal, technological, and ethical choices of today shape our future. Students develop conceptual and practical understandings of privacy law.

## **LAW 7227 - Tax Accounting**

*Credits: 2*

Timing of income and deductions for federal income tax purposes, including accounting periods, the cash receipts and disbursements and accrual methods, installment sales, interest income and deductions, time value of money provisions, depreciation, and recapture. Prerequisite: LAW 6460/LAW 8360 Income Taxation. Required for LL.M. (taxation) candidates.

## **LAW 7228 - Small Business and Trademark Clinic**

*Credits: 2*

The Small Business Clinic provides free legal services to new and existing small businesses and nonprofit organizations that cannot afford to pay legal fees. The clinic provides students real-world training and experience in the transactional practice of law. Student lawyers advise clients in the startup phase of their businesses, form and advise nonprofit organizations, assist in preparing necessary legal documents, and learn ways to assist clients involved in transactional business law. In the Trademark Clinic, which is part of the Small Business Clinic and a member of the USPTO Law School Clinic program, student lawyers gain specific experience in advising clients about basic trademark matters as well as experience in drafting, filing, and handling trademark applications with the USPTO. Prerequisites: LAW 6420 Business Enterprise . Students must be in good academic standing and have completed 50 percent of all course requirements.

## **LAW 7229 - Presidential Impeachment**

*Credits: 2*

Investigates the legal and political issues relating to Presidential impeachment and removal from office, focusing primarily but not exclusively on the current President. During the first ten weeks of the semester the class meets twice each week in a seminar-style format to discuss several assigned books and other current topical materials relating to various legal or political impeachment issues, including related criminal indictment and 25th Amendment issues. By the end of the tenth week, students are asked to choose an impeachment-related topic of appropriate scope, and research and write a 25-30 page law journal-style paper. During the last four weeks of the semester students are asked to briefly present their paper ideas and outlines or preliminary paper drafts for general class discussion and suggestions. The course satisfies the School of Law general writing requirement.

## **LAW 7231 - International Franchising Law**

*Credits: 2*

Addresses topics to consider in internationalizing a franchise, both economically and legally. Each class period is an in-depth look at a step in the internationalization process or at a major area of consideration before going global. Special attention is paid to the European Union and major emerging markets such as Eastern Europe, the Middle East, China, South America, India, and Asia. Includes structuring the franchise, tax, trade, intellectual property, mergers and acquisitions, and dispute resolution. Recommended course for those considering franchise law or international business as international franchising is the next big wave in the global economy, and a trend that will continue well past the foreseeable future.

## **LAW 7233 - Law and Medicine: Malpractice**

*Credits: 2*

An examination of the legal and economic aspects of medical malpractice, including elements of the prima facie case, defenses, and problems of proof. From time to time, the course also focuses on the potential liability of the individual practitioner and of health care institutions; tort reform legislation; the structure of insurance markets; negligent

nondisclosure risks and treatment alternatives; forensic medicine and the use of medical and scientific evidence in the courtroom; and legal and ethical aspects of the professional-patient relationship.

### **LAW 7235 - Corporate Finance and Acquisitions**

*Credits: 2*

Provides a basis for resolving the typical valuation questions that arise in the corporate acquisition context. Critically assesses the basic concepts of financial theory, including discounting, diversification, portfolio theory, the capital asset pricing model, and the Black-Scholes option pricing model. Examines certain issues arising in the corporate acquisition context that involve valuation questions, including the scope of application of the de facto merger and successor liability doctrines, appraisal rights, and the fairness of freeze-out transactions. Does not consider issues arising under federal securities law. A background in economics or finance is strongly recommended. Prerequisite: LAW 6420 Business Enterprise.

### **LAW 7239 - Texas Criminal Procedure**

*Credits: 2*

A study of the Texas Code of Criminal Procedure and its implementation in the Texas courts from the point of arrest through the appellate stage of the proceedings.

### **LAW 7241 - Criminal Litigation Clinic**

*Credits: 2*

### **LAW 7255 - International Tax II**

*Credits: 2*

A basic course for U.S. and international students focusing on U.S. citizens, residents, and business entities conducting business or investment outside the United States - so-called outbound transactions.

### **LAW 7257 - Civil Clinic Deputy**

*Credits: 2*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7559 Civil Clinic.

### **LAW 7262 - Patent Litigation**

*Credits: 2*

A study of issues related to enforcement and defense of patent rights in federal court. Focuses on strategies and best practices related to patent litigation. Covers selected topics related to jurisdiction and forum, complaints and answers, local patent rules, infringement and invalidity contentions, fact and expert discovery, technology tutorials, claim construction briefs and presentations, summary judgment briefs and presentations, trial practice, and post-trial and appeal briefing and procedures. Prerequisite: LAW 6280/LAW 6383 Patent Law.

### **LAW 7264 - Toxic Tort Litigation in the Petroleum Industry**

*Credits: 2*

A study of environmental law as it applies to the oil and gas extraction, processing, refining, and transportation segments of the energy industry, with emphasis on common law and solid waste.

### **LAW 7273 - Sports Law**

*Credits: 2*

A study of the legal and business structure of professional and amateur sports, including an overview of the development of the professional sports industry and an examination of the basic agreements controlling professional sports. Also, representation of professional athletes, the role of labor unions in professional sports, sports league governance and decision-making, sports media issues, and amateur athletic associations. Consideration is given to the

various constituencies within professional and amateur sports, the extent to which they have different interests, and the legal framework within which they seek to advance those interests.

### **LAW 7276 - Securities Litigation and Enforcement**

*Credits: 2*

A comprehensive study of public and private actions under the Securities Act of 1933, the Securities Exchange Act of 1934, and the Investment Advisors Act of 1940. Special attention is paid to the implication of causes of action; the elements of each cause; vicarious liability; the liability of attorneys, accountants, and directors; and the peculiarities of civil procedure as applied to securities litigation and damages. Also examines nondamage actions, including SEC enforcement proceedings, criminal actions, contempt proceedings, and state actions. Papers required. Prerequisite: LAW 6420 Business Enterprise.

### **LAW 7277 - Business Enterprise for Master of Laws Students**

*Credits: 2*

A survey of American business laws for international graduate students. Selected topics may be drawn, from year to year, from the laws of agency, partnership, corporation, securities, antitrust, bankruptcy, and business taxation. Taught from the perspective of assisting non-U.S. trained lawyers to draw comparative and practical lessons. Enrollment is limited to international graduate students not trained in U.S. law.

### **LAW 7284 - Tax and Fiscal Policy**

*Credits: 2*

The interaction between budgetary demands and revenue policy; equity and fairness of taxation; the effect of taxation on business activity; and social, political, and economic implications of the tax structure. Prerequisites: LAW 6460, LAW 8360. Required for LL.M. (taxation) candidates.

### **LAW 7285 - Negotiations**

*Credits: 2*

Introduces legal negotiation theory and practice, and prepares students to engage as lawyers in the negotiation process. Covers all major areas of negotiation theory (e.g., interest-based, cooperative-competitive, aggressive-competitive). Uses practical skills exercises to explore the various contrasting approaches to negotiation, which allows the student to determine the style and approach that best fits his/her personality in the context of legal conflicts likely to be encountered after law school. Provides the fundamental skills, knowledge, and actual experience in real negotiations so the future lawyer can further develop and hone negotiation skills through continuing practice and experience after conclusion of the course.

### **LAW 7290 - Real Estate Taxation**

*Credits: 2*

Income, estate, and gift tax law relating to various deferred compensation plans, including profit sharing, stock bonus, and pension plans; qualified and nonqualified stock options; deferred compensation contract; and restricted property. Considers corporate, securities, labor, and community property law where appropriate. Prerequisites: LAW 6460/LAW 8360 Income Taxation and LAW 6220/LAW 7336 Corporate Taxation.

### **LAW 7291 - Taxation of Property Dispositions**

*Credits: 2*

A survey of property transaction taxation including realization events, amount realized, basis rules, nonrecognition exchanges, losses, characterization rules, debt and security transactions, and mortgaged property transactions.

### **LAW 7293 - Perspectives of the American Legal System**

*Credits: 2*

Provides international graduate students with an introduction to the U.S. legal system, integrated with an optional tutorial component. Examines the nature of the U.S. judicial system, the common law system of case law development,

and trial and appellate processes (in part through a study of selected tort cases). Presents a special segment on U.S. constitutional law issues, and explores the interrelationship of law and U.S. society. Attempts to develop basic U.S. legal writing, research, and exam-taking skills. Enrollment is limited to and required of international graduate students not trained in U.S. law, except with special permission of the Graduate Committee.

### **LAW 7294 - Tax Practice and Professional Responsibility**

*Credits: 2*

Incorporates federal tax research and writing, as well as the parameters of professional responsibility, in the context of the three main aspects of federal tax practice: planning, reporting, and representation in controversies. Prerequisites: LAW 7350 Professional Responsibility. Limited J.D. enrollment. Required for LL.M. (taxation) candidates.

### **LAW 7301 - Civil Litigation: The Current Status of Jury Trial Practice**

*Credits: 3*

Examines the background and the current status of jury trial practice in Texas courts including the judge-jury relationship and judicial review of verdict and judgments. Topics include the Constitutional right to jury trial in civil cases; the impact of the adoption and amendment of the Texas Rules of Civil Procedure on jury trial rights and practices; and the impact of alternative dispute resolution standards and practices on civil practice in Texas courts.

### **LAW 7302 - International Tax I**

*Credits: 3*

A basic course for U.S. and international students focusing on foreign citizens, residents, and business entities conducting business or investment in the United States - so-called inbound transactions.

### **LAW 7303 - The European Convention on Human Rights**

*Credits: 3*

Introduces students to the history, structure, and application of the European Convention on Human Rights. Particular attention is given to the role of the European Court of Human Rights and the right (unusual in international law) of individuals to petition the Court to remedy concrete violations of their rights by signatory states. Students are expected to write a substantial paper on either a subject-matter area of Convention law or the experience of one of the forty-seven signatory states subject to the Court's jurisdiction.

### **LAW 7304 - Remedies**

*Credits: 3*

Considers the question of what plaintiffs are entitled to when they win a case and why. Covers damages, punitive damages, restitution, unjust enrichment, and injunctive relief. Considers public remedies in constitutional cases and focuses on remedies in private law civil actions.

### **LAW 7308 - Civil Rights Litigation**

*Credits: 3*

A survey of federal legislation protecting the individual against governmental and private interference with constitutional and statutory rights, which may include those pertaining to employment, personal security, housing, and voting, among others.

### **LAW 7311 - Copyright**

*Credits: 3*

A detailed study of the 1976 Copyright Act as well as other means of obtaining legal protection for literary, musical, and artistic works, including unfair competition, tort, and implied contract.

### **LAW 7315 - International Business and Financial Transactions**

*Credits: 3*

A basic course for U.S. and international students on fundamental legal problems encountered in international business

transactions (e.g., international sales, licensing, and foreign direct investments) and in international financial arrangements (e.g., international letters of credit, syndicated loans, project financing, and Eurobond offerings and securitizations), along with selective issues facing the multinational enterprise. Particularly beneficial as a foundation course for the student desiring to pursue the international law area or for the student desiring only a survey of the area.

### **LAW 7319 - International Economic Law and Development**

*Credits: 3*

Foundation course that enhances the understanding of financial, monetary, trade, and investment law and regulations. Also, related economic development theories and policies in their current global setting, particularly as they directly impact 80 percent of the world population (i.e., the developing world). Against the constantly changing background of economic policymaking, examines economic and legal interaction among industrialized states, developing countries, international economic institutions (e.g., U.N. economic functions, IMF, and World Bank Group) and regional economic institutions (e.g., in Latin America and Africa), and private actors (e.g., multinational corporations, international commercial financial institutions, and nongovernment organizations). Provides an overview of the legal and institutional foundations of the evolving global international economic order. Particular attention is given to the issues of sustainable economic development, stable financial systems, and alleviation of poverty in developing and emerging countries. May cover issues such as the basic legal principles and doctrines governing international economic organizations, official development assistance, the U.N. Millennium Goals, the Washington Consensus versus the Monterrey Consensus, the WTO Doha Agenda for developing countries, South-South and North-South regional economic integration efforts, sovereign debt reduction and rescheduling, privatization development programs, development of appropriate economic legal and judicial infrastructures for development, and post-conflict economic reconstruction. The course should be of particular importance for domestic and international students seeking an international legal practice with private firms, international and regional bodies, and domestic government and private bodies dealing with the international arena.

### **LAW 7320 - Law and Medicine: Health Care**

*Credits: 3*

### **LAW 7321 - Comparative Law I**

*Credits: 3*

The purposes and methods of comparative law and an introduction to legal systems other than the common law, including sources of law, structure of legal rules, substantive law, procedure, and courts and legal professions.

### **LAW 7322 - Comparative Law II**

*Credits: 3*

Limited enrollment seminar course designed to accommodate specific seminar interests of faculty and visiting faculty in comparative law-related subject matter. May examine topics such as selected aspects of law and judicial processes or specific legal areas of selected foreign countries, regions, and economic markets; laws impacting foreign investment and dispute resolution; treaty law-making processes; or comparative corporate governance, business organization, commercial law, and accounting trends. Because topics vary from year to year, students may repeat the course for credit. Transcribed as CL-2 [specific seminar name]. No knowledge of a foreign language is required.

### **LAW 7325 - Secured Transactions**

*Credits: 3*

An introductory survey of the law governing security interests in personal property, with particular emphasis on Article 9 of the Uniform Commercial Code and the Bankruptcy Code.

### **LAW 7326 - Real Estate Transactions**

*Credits: 3*

Transfer, finance, and development of real property; the real estate sales contract; the duties and remedies of sellers, purchasers, and brokers; conveyancing; title protection, including recording laws, the mechanics of title search, clearing

titles, and title insurance; real estate finance, including mortgages and federal programs; and condominiums, cooperatives, and shopping centers. Some emphasis on Texas law.

### **LAW 7329 - Jurisprudence I**

*Credits: 3*

A survey of major theories of legal philosophy.

### **LAW 7330 - Law and Medicine: Bioethics**

*Credits: 3*

Focuses on the interplay between bioethics and law in the context of topics such as human reproduction, death and dying, and human experimentation.

### **LAW 7333 - First Amendment and Freedom of Speech**

*Credits: 3*

Examines constitutional issues and interpretation under the First Amendment, with a focus on the freedom of speech and of the press, as well as the establishment and free exercise of religion.

### **LAW 7334 - Perspective on Counter Terrorism**

*Credits: 3*

Takes an insistently interdisciplinary and occasionally comparative approach to explore legal issues in America's war on terror, including but not limited to following: Acts of terrorism committed against the state by non-state actors are not new, but from a lawyer's point of view, what is new about the states repertoire of responses to them? What are the constants and what are the variables that influence a state's recognition, definition, and reaction to real or perceived threats to the state's core responsibility for domestic security? By what standards should state action be assessed? What role should law and lawyers play during such extraordinary times? Readings are drawn from familiar legal sources and from works of history, the social sciences, and literature.

### **LAW 7336 - Corporate Taxation**

*Credits: 3*

The formation of corporations, corporate capital structure, earnings and profits, dividends, distributions, redemptions, partial liquidations and complete liquidations, and Subchapter S corporations.

### **LAW 7337 - Selected Topics in Intellectual Property**

*Credits: 3*

The course is designed to allow students to develop their own research projects in the field of intellectual property. Student discussion of their research will be combined with discussion of current topics of litigation and legislation in the field, including patent reform, international intellectual property harmonization, digital rights management, and competition issues in intellectual property.

### **LAW 7341 - Criminal Litigation Clinic**

*Credits: 3*

### **LAW 7342 - Federal Taxpayers Clinic**

*Credits: 3*

Clinical instruction in federal tax practice emphasizing the representation of taxpayers before the Internal Revenue Service and the Tax Court. Classroom instruction in interviewing techniques and counseling is integrated with interviewing prospective clients and with the ultimate representation of taxpayers before the Internal Revenue Service and before the Tax Court. Prerequisite: LAW 6460 or LAW 8360 Income Taxation.

### **LAW 7344 - Employment Discrimination**

*Credits: 3*

Examination of the federal law regulating discrimination in employment. The primary emphasis is upon Title VII of the Civil Rights Act of 1964 (discrimination on the basis of race, sex, religion, and national origin), the Age Discrimination in Employment Act, the Equal Pay Act, the Americans with Disabilities Act, and federal requirements of affirmative action imposed upon government contractors, but other civil rights statutes and the National Labor Relations Act will be treated as they bear upon the subject.

### **LAW 7350 - Professional Responsibility**

*Credits: 3*

An analysis of principles and rules governing the conduct of lawyers. Includes the client-lawyer relationship, competence, confidentiality, loyalty, the roles of lawyers as counselors and advocates, public service, advertising, admission to practice, and professional discipline.

### **LAW 7352 - Estate Gift and Income Tax**

*Credits: 3*

### **LAW 7354 - Sentencing and the Death Penalty**

*Credits: 3*

An examination of the role of sentencing in the criminal justice system, contrasting sentencing models and ranges of authority. Includes study of alternatives to incarceration in light of criminal justice philosophies, scarce resources, and political support. Exploration of the decision-making process, the use of sentencing guidelines, and habeas corpus. Also includes examination of the death penalty from historical and contemporary perspectives, justifications for it, evolution of constitutional standards for its imposition, review of empirical data on deterrent effect and demographic distribution of death sentences, modes of execution, access to review of sentences, and state and federal relations.

### **LAW 7356 - International Crimes**

*Credits: 3*

Focuses on the origins, development, and growth of international crimes. Examines the juridical bases and processes by which objectionable or offensive conduct is transformed into an international crime. Also, identifies the attributes and characteristics of international crimes, and explores the practical and doctrinal problems relating to the regulation, prevention, control, and suppression of this genre of crimes.

### **LAW 7357 - Civil Clinic Deputy**

*Credits: 3*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7559 Civil Clinic.

### **LAW 7358 - Criminal Litigation Clinic Deputy**

*Credits: 3*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7641 Criminal Law Clinic.

### **LAW 7361 - Women and the Law**

*Credits: 3*

Explores the topic of gender equality as reflected in constitutional law and in various bodies of federal and state statutory law. Using different theories of equality, it covers such matters as modern equal protection jurisprudence; sex discrimination in employment and education; reproductive rights; domestic violence; sex work; and women in the legal profession.

## **LAW 7369 - Oil and Gas Contracts**

*Credits: 3*

A survey of basic oil and gas contracts used in exploration and production operations in the United States and internationally, and the problems and legal issues that they present. Includes lease addenda, assignments, support agreements, farmout agreements, operating agreements, gas contracts and balancing agreements, division orders, and technical agreements. Drafting solutions and alternatives are explored. Oil and Gas may be completed beforehand or taken simultaneously.

## **LAW 7370 - Regulation of Hazardous Substances**

*Credits: 3*

Issues relating to regulation of the use and disposal of hazardous substances. Deals largely with federal regulation of the disposal of hazardous wastes under the Resource Conservation and Recovery Act and the remediation of hazardous substances under the Comprehensive Environmental Response Compensation and Liability Act. Includes analysis of the impact of these statutes on business decisions relating to property transactions, corporate structure, bankruptcy, and insurance. Also, addresses basic science and/or policy issues relating to the control of substances with uncertain effects on human health and the environment.

## **LAW 7373 - Critical Race Theory**

*Credits: 3*

This seminar rigorously examines the theoretical and case law analyses made by scholars of critical race theory. Topics include the emergence of critical race theory as an area of legal scholarship; the relationships among critical race theory, feminist legal theory, and critical legal studies; colorblind constitutional theory and affirmative action doctrine; discriminatory intent and antidiscrimination jurisprudence; race and criminal justice; race and education policy; the intersection of racism and other sources of oppression such as sexism and heterosexism; and the role of law as a means of eradicating racial inequality. Satisfies the edited writing requirement.

## **LAW 7375 - Securities Regulation**

*Credits: 3*

A study of the securities laws (primarily federal but also state, especially Texas) and of the activities and industry they govern. The principal emphasis is on the regulation of issuance, sale, resale, and purchase of securities, and on the disclosure requirements generated by the registration, reporting, proxy, tender, and antifraud provisions. Other important subjects are civil liability (express and implied), government enforcement, exemptions from registration (especially private placements), insider trading, and the meaning of "security." Also treated are the functions of the SEC and of state securities administrators. Broker-dealer and market regulation may be covered if time permits.

## **LAW 7376 - Securities Litigation and Enforcement**

*Credits: 3*

A comprehensive study of public and private actions under the Securities Act of 1933, the Securities Exchange Act of 1934, and the Investment Advisors Act of 1940. Special attention is paid to the implication of causes of action; the elements of each cause; vicarious liability; the liability of attorneys, accountants, and directors; and the peculiarities of civil procedure as applied to securities litigation and damages. Also, examines nondamage actions, including SEC enforcement proceedings, criminal actions, contempt proceedings, and state actions. Papers required. Prerequisite: LAW 6420 Business Enterprise.

## **LAW 7378 - Civil Rights Seminar**

*Credits: 3*

Advanced civil procedure course that critically examines the policy issues underlying various procedural issues. Topics may include the nature of the adversary system, the history of procedural reform, personal jurisdiction, subject matter jurisdiction, controlling nonmeritorious claims, discovery, class actions, managerial judging, judicial discretion, judicial selection, jury trial, alternative dispute resolution, and comparative civil procedure. Satisfies the edited writing requirement.

### **LAW 7383 - Selected Problems in Antitrust**

*Credits: 3*

Seminar in antitrust law that considers topics not covered nor emphasized in the basic antitrust course. Content may vary but could include private antitrust enforcement, patent law and antitrust, antitrust exemptions and immunities, and extraterritoriality and foreign antitrust law. Satisfies the edited writing requirement. Prerequisites: All first-year courses and LAW 7388 Antitrust Law, or permission of instructor.

### **LAW 7385 - Texas Pretrial Procedure**

*Credits: 3*

Texas civil procedure prior to trial, including establishing the attorney-client relation, the prelitigation aspects of civil controversies, jurisdiction, service of process, pleading, joinder of parties and claims, venue, res judicata and related principles, discovery, summary judgment practice, and settlement.

### **LAW 7386 - Texas Trial and Appellate Procedure**

*Credits: 3*

Texas civil procedure from the commencement of trial through appeal, including selection of the jury, presentation of the case, motions for instructed verdict, preparation of the jury charge, motions for judgment notwithstanding the verdict and for new trial, rendition of judgment, and perfection and prosecution of civil appeals through the courts of appeals and Texas Supreme Court.

### **LAW 7388 - Antitrust Law**

*Credits: 3*

A survey of the federal antitrust laws as they relate to mergers, monopolization, and price discriminations, and horizontal and vertical restraints of trade, including price fixing, refusals to deal, territorial and product divisions, tie-ins, exclusive dealing, resale price maintenance, and customer restrictions. Also, enforcement and the private treble damage remedy, including the concepts of antitrust standing and antitrust injury.

### **LAW 7389 - Legislation**

*Credits: 3*

A study of the products of the legislative process: the place of statutes in relation to decisional law in historical perspective, types of legislation, and the component parts of statutes. Special emphasis is placed upon statutory interpretation as an essential lawyering skill.

### **LAW 7391 - Torts I**

*Credits: 3*

Civil liability arising from breach of common law and statutory duties as distinguished from duties created by contract, including coverage of intentional wrongs, negligence, and product liability. Also, the methods and process of the American legal system, with attention paid to legislation and common law.

### **LAW 7392 - Partnership Taxation**

*Credits: 3*

The formation of partnerships, taxation of partnership income, special allocations, elective basis adjustments, distributions, liquidations, retirements, transfers of partnership interests, and family partnerships. Prerequisites: LAW 6460/LAW 8360 Income Taxation.

### **LAW 7400 - Criminal Litigation Clinic**

*Credits: 4*

A practice-based period of study involving representation of indigent clients in Dallas County criminal courts. Classroom instruction and skills training are integrated with actual casework.

## **LAW 7401 - Actual Innocence Clinic**

*Credits: 4*

The investigation or litigation of actual innocence claims by persons convicted of serious crimes involves unique and highly challenging legal issues. Students assist in a wide range of postconviction case investigation activities, including any or all of the following: locating and reviewing original trial records, searching for any identifying remaining evidence, analyzing cases for viability, submitting evidence for additional testing, interviewing potential witnesses, communicating with clients, meeting face-to-face at least once with clients in the county jail or the assigned prison unit, interacting with assigned personnel from the District Attorney's Office, and identifying and communicating with potential experts. Also, drafting briefs, motions, and proposed findings of fact and conclusions of law.

## **LAW 7403 - Criminal Justice Policy Practicum**

*Credits: 4*

The Criminal Justice Policy Practicum exposes students to an interdisciplinary approach to criminal justice reform policy. Through the CJPP, students learn how their lawyering can influence local, statewide, and national criminal policy. For the Spring of 2019, the CJPP project is Misdemeanor Justice in Dallas County Courts. Students study Texas misdemeanor criminal procedure rules and observe Dallas County misdemeanor practice. Working with a dataset of nearly 200,000 Dallas County misdemeanor cases, students examine the basic tenets of criminal justice data assessment and analysis. As part of that process, students learn to clean data sets, design research inquiries, code data, and report on the results of data assessments. By the end of the semester, students write an empirical report describing the results of their data-driven inquiry into Dallas County Misdemeanor Justice. Professional Responsibility (LAW 7350) may be taken prior to enrolling or simultaneously. Constitutional Criminal Procedure is recommended but not required.

## **LAW 7420 - Law and Medicine: Health Care**

*Credits: 4*

An examination of the application of law and legal process to the resolution of problems and the development of policies relating to health and health care services. The course is intended to develop an understanding of the social, business, policy, and ethical implications of legal rules and procedures, as well as an understanding of how the law shapes the financing, organization, and delivery of health care in America. Topics usually include tax, antitrust, insurance, and tort law; medical and hospital licensure and accreditation; Medicare and Medicaid; and state and federal health care regulation.

## **LAW 7443 - Federal Taxpayers Clinic**

*Credits: 4*

Clinical instruction in federal tax practice emphasizing the representation of taxpayers before the Internal Revenue Service and the Tax Court. Classroom instruction in interviewing techniques and counseling is integrated with interviewing prospective clients and with the ultimate representation of taxpayers before the Internal Revenue Service and before the Tax Court. Prerequisite: LAW 6460 or LAW 8360 Income Taxation.

## **LAW 7459 - Civil Clinic**

*Credits: 4*

Develops lawyering skills and the analytical methods used to develop those skills. Clinic students represent indigent clients in actual cases. Topics include interviewing; counseling; case planning; and drafting of pleadings, motions, and memoranda. Also, fact investigation and discovery, negotiation, and pretrial and trial advocacy. Special emphasis is placed on professional responsibility issues and strategic planning methods. Employs a combination of teaching methods, including one-on-one case supervision, classroom instruction, simulations, and videotaped exercises. A third of the students in the clinic represent resident aliens facing deportation proceedings in the Immigration Clinic. Prerequisites: Completion of 45 credit hours and good academic standing.

## **LAW 7496 - Trial Advocacy**

*Credits: 4*

Limited enrollment. An intensive course in trial tactics, techniques, and advocacy, with a focus on the practice of the separate components of a trial: direct examination, objections, cross-examination, rehabilitative devices, expert witness

examination, jury selection, opening statements, and closing arguments. At the end of the term, each student acts as co-counsel in a full trial. Videotape recording is used for critiquing student performance throughout the term. Prerequisite: LAW 8355 or LAW 8455 Evidence.

### **LAW 7541 - Criminal Litigation Clinic**

*Credits: 5*

### **LAW 7559 - Civil Clinic**

*Credits: 5*

Develops lawyering skills and the analytic methods used to develop those skills. Clinic students represent indigent clients in actual cases. Topics include interviewing; counseling; case planning; and drafting of pleadings, motions, and memoranda. Also, fact investigation and discovery, negotiation, and pretrial and trial advocacy. Special emphasis is placed on professional responsibility issues and strategic planning methods. Employs a combination of teaching methods, including one-on-one case supervision, classroom instruction, simulations, and videotaped exercises. A third of the students in the clinic represent resident aliens facing deportation proceedings in the Immigration Clinic. Prerequisites: Completion of 45 credit hours and good academic standing.

### **LAW 7560 - Child Advocacy Clinic**

*Credits: 5*

The W.W. Caruth, Jr. Child Advocacy Clinic at Dedman School of Law represents abused and neglected children in Dallas County. The clinic is appointed by the juvenile district courts to serve as guardian and/or attorney ad litem for children. Student attorneys, under the supervision of the clinic director, are responsible for determining the best interests of the children and for representing their voices in court. Prerequisite or corequisite: LAW 8355 or LAW 8455 Evidence.

### **LAW 7561 - Consumer Advocacy Project**

*Credits: 5*

Students work with area consumers to assist in resolving a variety of disputes such as deceptive trade practices, credit matters, and debt collection. Student representation generally includes intake, analysis, and evaluation for informal dispute resolution or advice for consumer self-help. Students advise and counsel a client and may evaluate disputes for possible litigation and referral, as appropriate, to local attorneys or to the SMU Civil Clinic. In addition, students may engage in advocacy and research on behalf of client groups, and organize and present community outreach education programs. The project specializes in representing Spanish-speaking consumers from initial intake through informal or formal mediation. Accordingly, when necessary, students work with consumers with the aid of an interpreter. Students need not be fluent in Spanish to enroll. Prerequisites: Completion of 44 credit hours and good academic standing.

### **LAW 7641 - Criminal Litigation Clinic**

*Credits: 6*

A practice-based period of study involving representation of indigent clients in Dallas County criminal courts. Classroom instruction and skills training are integrated with actual casework. Corequisite: LAW 8455 Evidence. LAW 7350 Professional Responsibility and LAW 7239 Texas Criminal Procedure are recommended.

### **LAW 7642 - Crimes Against Women Clinic**

*Credits: 6*

Students enrolled in the Hunter Legal Center provide representation to survivors of gender-based harms, including domestic violence, sexual assault, and human trafficking. Student attorneys participate in a range of lawyering activities: client screening, individual client representation (in matters such as obtaining orders of protection, family law, humanitarian immigration claims, and postconviction relief), and representation of institutional clients seeking long-term solutions to the problem of violence against women. Work on actual cases, in combination with faculty supervision sessions and the clinic seminar, allows students to hone a wide range of lawyering skills, both practical and analytical. Prerequisites: Completion of 44 hours and good academic standing. Corequisite: LAW 7350 Professional Responsibility. Recommended: LAW 8455 Evidence and LAW 6347 Family Law.

### **LAW 7643 - Family Law Clinic**

*Credits: 6*

Under the supervision of an experienced clinical faculty member, student attorneys in the VanSickle Family Law Clinic represent and provide counsel to low-income clients in matters of family law such as divorce, child custody, possession and access, paternity, modifications, enforcement actions, child and spousal support, and adoption. Through client representation and the clinic seminar, student attorneys have the opportunity to engage in the performance of fundamental lawyering skills necessary for competent representation and zealous advocacy. These skills include interviewing and counseling clients, negotiating, developing and analyzing facts, strategically planning cases, resolving conflicts and making decisions, applying motion and trial practice, drafting legal pleadings and ancillary documents, organizing and managing legal work, utilizing cultural competency, collaborating, and performing self-evaluations. Student attorneys also collaborate with community-based organizations to provide limited consulting to pro se litigants at organized community legal clinics located in a low-income, culturally diverse area of Dallas. Prerequisite: Completion of 44 hours and good academic standing. Corequisite: LAW 7350 Professional Responsibility.

### **LAW 7644 - Civil Clinic**

*Credits: 6*

Develops lawyering skills and the analytic methods used to develop those skills. Clinic students represent indigent clients in actual cases. Topics include interviewing; counseling; case planning; and drafting of pleadings, motions, and memoranda. Also, fact investigation and discovery, negotiation, and pretrial and trial advocacy. Special emphasis is placed on professional responsibility issues and strategic planning methods. Employs a combination of teaching methods, including one-on-one case supervision, classroom instruction, simulations, and videotaped exercises. A third of the students in the clinic represent resident aliens facing deportation proceedings in the Immigration Clinic. Prerequisites: Completion of 45 credit hours and good academic standing.

### **LAW 7660 - Child Advocacy Clinic**

*Credits: 6*

The W.W. Caruth, Jr. Child Advocacy Clinic at Dedman School of Law represents abused and neglected children in Dallas County. The clinic is appointed by the juvenile district courts to serve as guardian and/or attorney ad litem for children. Student attorneys, under the supervision of the clinic director, are responsible for determining the best interests of the children and for representing the children's voices in court. Prerequisite or corequisite: LAW 8355 or LAW 8455 Evidence.

### **LAW 8137 - Federal Judicial Externship**

*Credits: 1*

Provides opportunities to work in the chambers of the U.S. District Court judges, U.S. Magistrate judges, and U.S. Bankruptcy judges in the Northern District of Texas, Dallas, and Fort Worth divisions. From time to time, students may also have the opportunity to work with federal judges in the Eastern District of Texas, Plano Division, and the United States Court of Appeals for the Fifth Circuit. Students are paired with an individual judge and work approximately 10-15 hours per week under that judge's supervision for one term, for a total of at least 120 hours. Also includes a judicial externship that meets for at least 14 hours (50-minute hours). Students successfully completing the externship and class receive 3 credit hours (based on 2 credit hours for the externship itself and 1 credit hour for the classroom component). Primary activities are research, drafting bench memos, and drafting opinions as well as observing conferences, motion hearings, and evidentiary hearings. Students occasionally have the opportunity to prepare short articles for publication. The teacher of the classroom component also serves as faculty supervisor for the externships, while the judges serve as field supervisors.

### **LAW 8157 - Criminal Litigation Clinic Deputy**

*Credits: 1*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7641 Criminal Law Clinic.

## **LAW 8202 - Small-Business Clinic**

*Credits: 2*

Provides hands-on experience representing small-business and nonprofit organization clients in a wide variety of business and legal issues. Student attorneys assist in a range of lawyering activities such as advising clients in the startup of their business, assisting in the preparation of necessary legal documents, forming and advising nonprofit organizations, and dealing with clients' issues that involve transactional business law. For many students, this is their first time to practice law and have an experience dealing with clients. Prerequisite: LAW 6420 Business Enterprise and LAW 8203 Counseling the Small-Business Owner.

## **LAW 8203 - Forming and Operating Closely Held Businesses**

*Credits: 2*

This how-to course focuses on forming and representing small businesses and nonprofit organizations. Includes advice regarding selection of a client, understanding the client's goals, what choice of entity to recommend to the client, entity creation by drafting various documents such as certificates of formation for profit and nonprofit corporations and limited liability companies, bylaws, noncompetition agreements, nondisclosure agreements, employment agreements, and other documents that relate to a small business. Students draft various documents throughout the course. Prerequisite: LAW 6420 Business Enterprise.

## **LAW 8204 - Trial Techniques**

*Credits: 2*

Introductory trial techniques course that offers a unique opportunity to learn fundamental trial skills against the backdrop of studying real trials. For example, through the study of video footage and trial transcripts, students examine trial techniques as they were executed in the O.J. Simpson civil and criminal trials and the Timothy McVeigh trial. Students get to study one of the greatest opening statements ever given: the prosecution's opening in the McVeigh trial. Likewise, students view unforgettable video footage of the execution of specific trial techniques in the Simpson criminal trial. Such footage includes F. Lee Bailey's cross-examination of Mark Fuhrman, Christopher Darden's direct examination of a key witness, and Johnnie Cochran's closing argument. The course is taught by Assistant U.S. Attorney Shane Read, who is also the author of the trial advocacy textbook "Winning at Trial." Grades are based on student performances throughout the term (i.e., opening statement, direct examination, cross-examination, and closing argument) and class participation. Preclusions: This course is an alternative to LAW 7394 Trial Advocacy for students who are interested in a trial skills class but who do not have time to devote the 4 hours required for the full course. There is nevertheless substantial overlap, such as opening statement, direct examination, cross-examination, and closing argument. However, in addition to the subjects covered in this class, LAW 7394 includes voir dire, impeachment, the introduction and utilization of exhibits, and a final full jury trial downtown. Students who have taken LAW 7394 may not take this class, and students who take this class may not take LAW 7394. Prerequisite: LAW 8355 or LAW 8455 Evidence.

## **LAW 8205 - The Role of the General Counsel**

*Credits: 2*

Explores the expanding role of in-house counsel. Provides a broad yet comprehensive overview of the practice areas and corporate situations that require legal assistance and the responsibilities of in-house counsel. Invited general counsels, senior managing attorneys of major corporations, and outside counsel occasionally join class discussions on substantive issues in their particular practice areas and provide practical information on topics such as working with business people and managing outside counsel.

## **LAW 8208 - Private Equity and Hedge Fund Law and Related Finance**

*Credits: 2*

An ever-growing portion of investment capital is being controlled by private funds (i.e., hedge funds, equity funds, real estate funds, and hybrid funds). It is important for lawyers to understand how law affects both the investment and legal aspects of the private fund marketplace. Uses a mixture of cases, lectures, and guest speakers to study each component of the private fund world and how law, from both an investment and a legal perspective, affects the private fund community. Looks at the financial analysis behind these funds and how law affects such decisions, and focuses on the

legal structure and regulatory environment of private funds. The course primarily takes the viewpoint of the private fund manager versus the perspective of the investing community. A general description of the investment community of private funds (i.e., high net worth individuals, university endowments, and corporate pension funds) are discussed in light of how those investors affect the decisions with respect to investing and legal structure of the private fund. Also looks at the structures under which investment funds raise capital and the internal management challenges faced by the managers, in relation to limited partners, entrepreneurs, investment bankers, regulators, and the company. Examines investment structures from the seed, or angel, financing stage up to the sale, or IPO, of the company. Focuses on the various components of the private fund community, the role of law at private funds from an investment perspective, the role of law at private funds from a legal perspective, and a comparison of private funds to their public fund/company counterparts from an investment and from a legal perspective. This survey course is designed to provide an overview of the private fund community from a legal and investment perspective. Accounting, finance, legal, and tax issues are discussed at a very high level in order to provide a broad general overview.

### **LAW 8209 - Law and Medicine: Bioethics**

*Credits: 2*

The course focuses on the interplay between bioethics and law in the context of topics such as human reproduction, death and dying, and human experimentation.

### **LAW 8211 - Water Law**

*Credits: 2*

A survey of water law examining concepts of ownership and rights of use, statutory and common law rules for allocating and administering surface and underground water rights, environmental protections of water resources, shared public and private uses of water, competing claims of governmental entities, and transboundary conflicts.

### **LAW 8212 - Law Practice Management**

*Credits: 2*

The law practice environment is changing dramatically. This course teaches students how to recognize, react to, and take advantage of such changes. Moreover, it teaches the management and ethical sensitivity concepts that are fundamental to success as a practicing lawyer. Although theory is not overlooked, the course is designed as a skills class, giving students the opportunity to make practical application to the principles they learn.

### **LAW 8214 - Employment Discrimination**

*Credits: 2*

Examination of the federal law regulating discrimination in employment. The primary emphasis is upon Title VII of the Civil Rights Act of 1964 (discrimination on the basis of race, sex, religion, and national origin), the Age Discrimination in Employment Act, the Equal Pay Act, the Americans with Disabilities Act, and federal requirements of affirmative action imposed upon government contractors, but other civil rights statutes and the National Labor Relations Act will be treated as they bear upon the subject.

### **LAW 8216 - Financial Products: Economics, Regulation, and Taxation**

*Credits: 2*

Introduces the fundamentals of equity and debt instruments, futures, forwards, options, and swaps. Also covers other products, including investment funds, real estate investment trusts, and securitizations. Examines key concepts such as time value of money, original issue discount, hedging, synthetic instruments, and put-call parity. Considers regulatory regimes and basic tax principles that apply to certain financial products. Explores financial products that have lately become a concern of policymakers and various reforms presently under debate.

### **LAW 8218 - Regulation and Deregulation**

*Credits: 2*

Economic, social, and public safety regulation in the U.S. is pervasive, directly affecting the economy, business operations, and individual liberties. This course analyzes the policy rationale and legal bases for regulation, application of regulation to various industries (e.g., financial services, transportation, electric utilities, telecommunications, cable

and/or broadcast media, and natural gas pipelines), constitutional limitations on regulation, basic features of rate regulation, and evolving justifications for deregulation or alternative regulation in markets that have become increasingly competitive. A key objective is to analyze the public policy justifying regulatory constraints on American commerce.

### **LAW 8219 - International Economic Law and Development**

*Credits: 2*

### **LAW 8222 - Advanced Contracts: Drafting**

*Credits: 2*

Provides the practical skills necessary to draft effective and clear business contracts. Students gain real-world skills of benefit to a transactional lawyer or litigator. The focus is not especially theoretical, as was the case with the first-year contracts course. The purpose is to train students how to translate the terms of a client's business deal into a contract that advances the client's interest without being so one-sided that it is unacceptable to the other side. Students prepare and submit drafting exercises each week; many are ungraded, but several larger drafting projects are graded.

### **LAW 8223 - Small-Business Clinic Deputy**

*Credits: 2*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Pass/fail or graded, at the option of the professor.

### **LAW 8224 - Texas Land Titles**

*Credits: 2*

Law of Texas land titles, with a title examination practice skills component. Also, recording acts, bona fide purchaser, conveyancing, title standards, land descriptions, adverse possession, and title insurance.

### **LAW 8230 - International Law Review**

*Credits: 2*

Law review experience involving preparation of comments on topics of current interest, notes on cases of significance, and editorial work incident to publication of "The International Lawyer" and "NAFTA: Law and Business Review of the Americas." Students must be selected for participation before they may register. Available only for J.D. students.

### **LAW 8252 - Estate, Gift, and Income Tax**

*Credits: 2*

Consideration of the kinds of transfers that attract the estate and gift tax, the generation-skipping tax, and income taxation of estates and trusts.

### **LAW 8257 - Criminal Litigation Clinic Deputy**

*Credits: 2*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7641 Criminal Law Clinic.

### **LAW 8258 - Immigration Law**

*Credits: 2*

An analysis of the Immigration and Nationality Act and relevant regulations with respect to the immigration of aliens, the substantive and procedural aspects of deportation, and exclusion proceedings. A review of nationality law with respect to citizenship and expatriation. Special problems of refugees in the U.S. may be considered.

## **LAW 8262 - Animal Law**

*Credits: 2*

Introduces the field of animal law, a dynamic and emerging area of the law. Not an animal rights course. Surveys the historical origins of the legal status of animals and examines the common law and statutory foundations upon which it operates. Also, traditional legal disciplines such as constitutional law, contracts, and torts through the lens of animal interests. Explores the often-controversial moral, ethical, and public policy considerations faced when balancing the legal interests of humans and nonhumans. Covers current laws affecting animals at the local, state, and federal levels.

## **LAW 8270 - Lawyering and Ethics for the Business Attorney**

*Credits: 2*

Examines the role of the corporate lawyer in counseling and litigation settings. Subjects addressed include the role of the lawyer in the close corporation, client fraud dilemmas, conflicts of interest, internal corporate investigations, litigating with the SEC, the role of inside counsel, business relationships with clients, and related party transactions.

## **LAW 8271 - Civil Procedure II**

*Credits: 2*

Civil procedure, focusing on judicial resolution of disputes and development of the modern civil action, including consideration of the jurisdiction of courts, venue, process, pleading, joinder, discovery, pretrial practice, right to a jury trial, withdrawing cases from a jury, motions after verdict, judgments and their effects, and appellate review. Also, an introduction to alternative dispute resolutions.

## **LAW 8281 - Chapter 11 Reorganization**

*Credits: 2*

In-depth study of corporate reorganization under Chapter 11 of the Bankruptcy Code.

## **LAW 8282 - Property I**

*Credits: 2*

Selected topics in personal property, adverse possession, present possessory and future estates in land, concurrent estates, the law of landlord and tenant, easements, private covenants, public land use regulation, and real estate conveyancing.

## **LAW 8290 - Contracts I**

*Credits: 2*

History and development of the common law of contract; principles controlling the formation, performance, and termination of contracts, including the basic doctrines of offer and acceptance, consideration, conditions, material breach, damages, and statute of frauds; and statutory variances from the common law, with particular attention to Uniform Commercial Code sections.

## **LAW 8292 - Torts II**

*Credits: 2*

Civil liability arising from breach of common law and statutory duties as distinguished from duties created by contract, including coverage of intentional wrongs, negligence, and product liability. Discusses the methods and process of the American legal system, with attention paid to legislation and the common law.

## **LAW 8293 - Social Media Law**

*Credits: 2*

This course provides a comprehensive look at how social media is affecting the legal system. Using actual trial and appellate level cases, the course examines the many ways in which information from sites like Facebook, MySpace, and Twitter is being utilized in everything from criminal and family law matters to personal, employment, and commercial litigation nationwide. In addition to analyzing discoverability and evidentiary issues involving social media content, the course will look at how traditional notions in such areas as duty, jurisdiction, and legal ethics are impacted

by such new technology. Topics like the implications of social media use by judges and jurors will also be explored, along with the ways in which social media use has affected attorney marketing practices. As it considers social media's impact on the evolving legal landscape, the course will also examine constitutional concerns raised by social networking's rapid spread, including privacy and First Amendment concerns.

### **LAW 8302 - Children and the Law**

*Credits: 3*

Focuses on three interrelated questions involving the legal relationships among the child, parent, and state. First, who decides on behalf of the child? Second, how does law allocate decisional power and responsibility for children in our society? Finally, what voice should law give to children in situations where their rights and/or interests are affected? These questions are explored in the context of the following topics: parental rights to raise their children; constitutional rights of children (e.g., privacy and free speech); child abuse and neglect (civil and criminal); termination of parental rights; foster care and adoption; and medical decision-making. Some emphasis is placed on examining the practical considerations of providing legal representation to children, particularly in cases involving child abuse and neglect.

### **LAW 8305 - Intellectual Property Licensing Law**

*Credits: 3*

Focuses on how holders of intellectual property assets exploit and retain their rights in the realm of licensing. Also, the legal and business issues relating to licensing of intellectual property, including trademarks, patents, copyrights, trade secrets, software, and information database assets. Explores the rights and duties of the license parties, negotiation of the terms and clauses of the license agreement for each form of intellectual property, misuse and antitrust constraints on licensing, and management and enforcement of the license. Examines university technology transfer, government procurement licensing, third party rights in the license, and international licensing. Considers open licensing practices as seen in open source software and the Creative Commons. Hands-on and practical course with many drafting assignments and a take-home exam.

### **LAW 8306 - Law and Science**

*Credits: 3*

Edited writing seminar. Examines the various interactions of science and law in both civil and criminal contexts. Students read about and discuss how science aids in achieving just results, some new problems that science poses in the legal arena, and the importance of understanding science in practicing law. Topics include the importance of DNA, fingerprint, and statistical evidence; how scientific understanding affects notions of liability and culpability; the protection of research subjects; and bioethics, cloning, and nanotechnology.

### **LAW 8308 - History of Anglo-American Legal Institutions**

*Credits: 3*

Examines the development of the Anglo-American system of civil and criminal justice from the Medieval Period to the present day. Topics may include the origins and evolution of the common-law jury, the emergence of rules of procedure and evidence, and the changing roles of judges and attorneys.

### **LAW 8311 - Constitutional Law II**

*Credits: 3*

A study of individual rights, including such areas as equal protection of the laws and due process of law, with particular emphasis on issues of racial discrimination, gender discrimination, and the right to privacy. Depending on the professor, may also include freedom of speech and freedom of religion.

### **LAW 8312 - International and Foreign Legal Research**

*Credits: 3*

Provides the basic knowledge and skills needed to conduct competent international and foreign legal research, including methods to find and evaluate international and foreign legal materials using both electronic and print resources. Expands on and reinforces the basic legal research skills taught in the first-year legal research and writing course. Students become skilled in researching various international and foreign legal sources and in using research

techniques through practical application in assignments and class exercises. Students need to bring their own laptop computer to class.

### **LAW 8315 - International Business and Financial Transactions**

*Credits: 3*

A basic course for U.S. and international students on fundamental legal problems encountered in international business transactions (e.g., international sales, licensing, and foreign direct investments) and in international financial arrangements (e.g., international letters of credit, syndicated loans, project financing, and Eurobond offerings and securitizations), along with selective issues facing the multinational enterprise. Particularly beneficial as a foundation course for the student desiring to pursue the international law area or for the student desiring only a survey of the area.

### **LAW 8318 - Seminar on Extraterritorial Jurisdiction**

*Credits: 3*

The proliferation of legal regimes purporting to govern the same activities presents opportunities and conundrums for lawyers dealing with a wide variety of cutting-edge U.S. and/or international law issues that span civil and criminal divides (e.g., free speech on the Internet and intellectual property rights; the geographic reach of antitrust and securities laws; and laws designed to combat terrorism, child sex tourism, piracy, and international human rights violations like torture and genocide). Requires students to write a substantial research paper of publishable quality. The first part of the seminar explores recent cases and scholarship related to extraterritorial jurisdiction in order to raise the students' awareness of the theoretical and doctrinal issues involved and to develop the students' ability to evaluate and critique legal scholarship. In the second part of the seminar, students discuss their research proposals and works-in-progress in light of substantive and methodological insights gained from the first part of the seminar.

### **LAW 8319 - International Economic Law and Development**

*Credits: 3*

Foundation course that enhances the understanding of financial, monetary, trade, and investment law and regulations. Also, related economic development theories and policies in their current global setting, particularly as they directly impact 80 percent of the world population (i.e., the developing world). Against the constantly changing background of economic policymaking, examines economic and legal interaction among industrialized states, developing countries, international economic institutions (e.g., U.N. economic functions, IMF, and World Bank Group) and regional economic institutions (e.g., in Latin America and Africa), and private actors (e.g., multinational corporations, international commercial financial institutions, and nongovernment organizations). Provides an overview of the legal and institutional foundations of the evolving global international economic order. Particular attention is given to the issues of sustainable economic development, stable financial systems, and alleviation of poverty in developing and emerging countries. May cover issues such as the basic legal principles and doctrines governing international economic organizations, official development assistance, the U.N. Millennium Goals, the Washington Consensus versus the Monterrey Consensus, the WTO Doha Agenda for developing countries, South-South and North-South regional economic integration efforts, sovereign debt reduction and rescheduling, privatization development programs, development of appropriate economic legal and judicial infrastructures for development, and postconflict economic reconstruction. The course should be of particular importance for domestic and international students seeking an international legal practice with private firms, international and regional bodies, and domestic government and private bodies dealing with the international arena.

### **LAW 8321 - Complex Litigation**

*Credits: 3*

Advanced civil procedure, primarily on the pretrial and trial levels, involving multiple party, multiple claim litigation and the manual for complex litigation, with special emphasis placed on complex practice areas, e.g., multi-district litigation, securities litigation, shareholder derivative suits, antitrust, civil rights, and other class actions.

### **LAW 8323 - Small-Business Clinic Deputy**

*Credits: 3*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact

investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Pass/fail or graded, at the option of the professor.

### **LAW 8330 - International Law Review**

*Credits: 3*

Law review experience involving preparation of comments on topics of current interest, notes on cases of significance, and editorial work incident to publication of "The International Lawyer" and "NAFTA: Law and Business Review of the Americas." Students must be selected for participation before they may register. Available only for J.D. students.

### **LAW 8340 - Advanced Environmental Law Seminar**

*Credits: 3*

Seminar on selected problems in environmental law. Requires students to draft and present a paper on an environmental law topic selected by the student with the consent of the professor; topics may be selected from virtually any area of environmental law, including pollution control statutes, common law toxic tort, environmental regulation of land use, protection of endangered species, regulatory policy, and enforcement of environmental requirements.

### **LAW 8341 - Criminal Law**

*Credits: 3*

Origins and sources of the criminal law and general principles of criminal law, including actus reus, mens rea, and causation. May cover the elements of some specific crimes such as homicide and/or theft offenses, and some conditions of exculpation such as justification and insanity.

### **LAW 8343 - Civil Litigation: Critical Issues and Policies in Civil Procedure**

*Credits: 3*

An edited writing seminar that focuses on the policy issues underlying civil procedure. Students read classic and contemporary literature regarding the procedure system, and use the tools provided by this overview to craft an original analysis of a contemporary controversy facing courts and legislatures. Readings include topics such as access to justice, the vanishing trial, the roles of judges and juries, the insights of empirical research, aggregate litigation, and comparative civil procedure.

### **LAW 8345 - International and Comparative Health Law**

*Credits: 3*

Seminar that compares how different countries regulate costs, quality, and access in their health care systems. Countries with vastly different legal and health care systems must respond to essentially the same concerns: Who has access to health care services? Who pays for health care, and how? How do we regulate medical negligence? How do our systems respond to public health crises such as HIV/AIDS and infectious diseases? The first part of the term is an overview of different health care and legal systems. Students then prepare and present research comparing and contrasting how two countries respond to a particular issue.

### **LAW 8346 - Food and Drug Law**

*Credits: 3*

Examines how the Food and Drug Administration regulates food, drugs, medical devices, and biotechnology. The FDA is the oldest consumer protection agency in the United States, and it regulates a significant portion of the U.S. economy. Addresses the history and scope of the FDA's authority, how the agency has evolved to deal with modern developments in the biosciences, and emerging public health and safety issues such as bioterrorism and advances in genetic research. Students learn theories and study examples of risk regulation, statutory interpretation, interagency cooperation, public participation, and agency policymaking. Also, the FDA's relationships with Congress, the executive branch, and the industries it regulates.

## **LAW 8354 - Telecommunications Law and Policy**

*Credits: 3*

Provides an overview of the adoption and evolution of telecommunications regulation in the United States, covering the broadcast, satellite, and cable television industries along with the wired and wireless telephony and Internet industries. Through the history of telephony regulation, students learn fundamental concepts and theory surrounding traditional rate base, rate of return regulation, the development of alternate forms of incentive regulation, and different perspectives on managing the transition from monopoly to competition. Students learn fundamental administrative law principles and gain insight into the adaptive nature of administrative regulation through its application to this technologically dynamic part of our Nation's economy. In studying the adoption and implementation of the 1996 Federal Telecommunications Act, students also gain insight into the interaction of the legislative, administrative, and judicial branches of government. The history of telecommunications regulation exposes students to public policy issues surrounding the interaction between the competition laws administered by the Department of Justice and Federal Trade Commission and public utility regulation administered by the Federal Communications Commission and State Public Utility Commissions in the United States.

## **LAW 8355 - Evidence**

*Credits: 3*

Principles governing the admission and exclusion of evidence, including functions of judge and jury, examination and competency of witnesses, demonstrative evidence, the hearsay rule and its exceptions, burdens of proof and presumptions, privileges, and judicial notice.

## **LAW 8360 - Income Taxation**

*Credits: 3*

Introduction to the federal income tax system; analysis of Internal Revenue Code, Treasury Regulations, rulings, and case law; and consideration of income, deductions, credits, assignment of income, and accounting periods and methods.

## **LAW 8369 - Oil and Gas Contracts**

*Credits: 3*

A survey of basic oil and gas contracts used in exploration and production operations in the United States and internationally, and the problems and legal issues that they present. Includes lease addenda, assignments, support agreements, farmout agreements, operating agreements, gas contracts and balancing agreements, division orders, and technical agreements. Drafting solutions and alternatives are explored. Oil and Gas may be completed beforehand or taken simultaneously.

## **LAW 8375 - Legal Research, Writing, and Advocacy I**

*Credits: 3*

Students meet in small groups and integrate instruction in research, analysis, and writing as well as instruction in advocacy skills such as brief writing, oral argument, and negotiation. Uses simulated interviewing and negotiation exercises, group discussions, and writing exercises to teach these skills. In the fall, emphasizes research skills and legal analysis; focuses writing instruction on organization and synthesis; and requires students to write an objective legal memorandum containing a well-reasoned, clearly written analysis of several legal issues, substantiated by legal authority in correct citation form. In the spring, involves research and analysis that are more advanced and focuses on persuasive writing. Grades each term are based in large part on one research and writing project.

## **LAW 8376 - Legal Research, Writing, and Advocacy II**

*Credits: 3*

Students meet in small groups and integrate instruction in research, analysis, and writing as well as instruction in advocacy skills such as brief writing, oral argument, and negotiation. Uses simulated interviewing and negotiation exercises, group discussions, and writing exercises to teach these skills. In the fall, emphasizes research skills and legal analysis; focuses writing instruction on organization and synthesis; and requires students to write an objective legal memorandum containing a well-reasoned, clearly written analysis of several legal issues, substantiated by legal

authority in correct citation form. In the spring, involves research and analysis that are more advanced and focuses on persuasive writing. Grades each term are based in large part on one research and writing project.

### **LAW 8390 - Contracts II**

*Credits: 3*

The history and development of the common law of contract; principles controlling the formation, performance, and termination of contracts, including the basic doctrines of offer and acceptance, consideration, conditions, material breach, damages, and statute of frauds; and statutory variances from the common law, with particular attention to Uniform Commercial Code sections.

### **LAW 8395 - Trusts and Estates**

*Credits: 3*

A general survey of the law relating to family wealth transmission, taking into account transfers within the probate system - wills and intestate succession - and transfers outside it, with special attention to trusts. Topics include the legal definition of family relationships; formalities required for execution and revocation of wills and other donative documents; mental capacity and volition; drafting pitfalls, post execution events, and difficulties of interpretation; legal protections offered to a decedent's spouse and children; will substitutes such as life insurance, pension plans, and rights of survivorship; planning for incapacity and other changes in circumstances; obligations and powers of fiduciaries; rights of creditors and beneficiaries; trust creation, supervision, modification, duration, and termination; charitable purposes; and the impact of tax policy on estate planning.

### **LAW 8455 - Evidence**

*Credits: 4*

Principles governing the admission and exclusion of evidence, including functions of judge and jury, examination and competency of witnesses, demonstrative evidence, the hearsay rule and its exceptions, burdens of proof and presumptions, privileges, and judicial notice.

### **LAW 8601 - Legal Externship**

*Credits: 6*

Offers an opportunity to earn credit through various externship programs under the supervision of a faculty member. Students work a designated number of hours each week, without compensation, at specified legal offices. Each student must fulfill the requirements established for the program.

### **LAW 9001 - Legal Practical Training Internship**

*Credits: 0*

### **LAW 9100 - Legal Practical Training Internship**

*Credits: 1*

Offers practical training and experience in a law firm, corporate law department, government agency, or other law-related business. Students work on assigned projects under the supervision of lawyers who work at the placement. Activities vary and may include attending meetings, observing negotiations, conducting legal research, working on special projects, and otherwise gaining an understanding of how law is practiced within a business setting.

### **LAW 9115 - Science and Technology Law Review**

*Credits: 1*

Law review experience involving preparation of comments on topics of current interest, notes on cases of significance, and editorial work incidental to the publication of the "SMU Science and Technology Law Review." Students must be selected for participation before they may enroll. Available to J.D. students only.

### **LAW 9157 - Consumer Advocacy Project Deputy**

*Credits: 1*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7561 Consumer Advocacy Project.

### **LAW 9201 - Employee Benefits and Erisa Litigation**

*Credits: 2*

A study of the evolution, theory, and structure of employment-related benefit law. Covers social, economic, and political considerations and their influence on federal labor and tax law in the area of employee benefits, with emphasis on the labor provisions of the Employee Retirement Income Security Act of 1974. Also, the balancing of authority among several federal agencies in the regulation of employee retirement and medical benefit plans and the interpretation and application of federal statutory law.

### **LAW 9211 - Alternative Dispute Resolution**

*Credits: 2*

An examination and analysis of materials and skills used in dispute resolution other than litigation. Emphasizes the theory and practice of negotiation, mediation, arbitration, and mini-trials, with examples and problem simulations drawn from various fields of law.

### **LAW 9215 - Science and Technology Law Review**

*Credits: 2*

Law review experience involving preparation of comments on topics of current interest, notes on cases of significance, and editorial work incidental to the publication of the "SMU Science and Technology Law Review." Students must be selected for participation before they may enroll. Available to J.D. students only.

### **LAW 9257 - Consumer Advocacy Project Deputy**

*Credits: 2*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7561 Consumer Advocacy Project.

### **LAW 9305 - Remedies: Law of Damages and Restitution**

*Credits: 3*

A functional analysis of standards, rules, and devices applicable generally to the trial of various types of commercial claims, including the standards of value, certainty, and avoidable consequences. Also, the concepts of interest, expenses of litigation, and exemplary damages. Detailed consideration is given to all types of commercial remedies, both at law and in equity, that result in a money judgment.

### **LAW 9315 - Science and Technology Law Review**

*Credits: 3*

Law review experience involving preparation of comments on topics of current interest, notes on cases of significance, and editorial work incidental to the publication of the "SMU Science and Technology Law Review." Students must be selected for participation before they may enroll. Available to J.D. students only.

### **LAW 9357 - Consumer Advocacy Project Deputy**

*Credits: 3*

Deputies help supervise clinic students preparing client representation, and provide assistance in areas such as fact investigations and analysis, legal research and writing, litigation training, and court appearances. Deputies are selected by the clinic instructors; students may not enroll before being selected. Prerequisite: LAW 7561 Consumer Advocacy Project.

# Dedman School of Law: Student Code of Professional Responsibility

## Preamble

The law is a learned profession that demands from its members standards of honesty and integrity, and these standards are far higher than those imposed on society as a whole. A dishonest attorney is a menace to the profession and to society. Because there is no reason to believe that dishonest students will become honest attorneys, insistence on the highest ethical standards must begin in law school. This Student Code of Professional Responsibility is dedicated to that end.

The code is designed to assure that each student can be evaluated on his or her own merits, free from the unfairness of competing with students who attempt to enhance their own efforts unfairly. This code describes the obligations of students, faculty and administrators; the composition and jurisdiction of the honor council; and the procedures to be followed in determining whether a student has violated the code and the sanctions that may be imposed. Although law students are subject to this Student Code of Professional Responsibility, as students of Southern Methodist University, they are also subject to the University Student Code of Conduct to the extent that the latter is not inconsistent with this code. (See the University publication *SMU Policies for Community Life*.)

Although the failure to report one's own act or another student's act that may constitute a violation of this code is not itself a violation of this code, it is the sense of the Dedman School of Law community that a student should report conduct that he or she reasonably suspects does constitute a violation.

## Section I. Definitions

- A. **Assistant Dean** – the assistant dean for student affairs or that person to whom the dean has delegated the functions of that office
- B. **Chair** – that faculty member serving as the chair of the honor council (See Section II A3 in the Student Code.)
- C. **Code** – the Dedman School of Law at Southern Methodist University Student Code of Professional Responsibility
- D. **Complaint** – the formal charging document submitted to the council by the investigating committee when it finds probable cause to bring a reported violation to a hearing (See Section VIII F in the Student Code.)
- E. **Council** – the honor council (See Section II in the Student Code.)
- F. **Days** – calendar days
- G. **Dean** – the dean of the Dedman School of Law
- H. **Defense Counsel** – the individual who, either by the accused student's selection or by appointment, shall represent the accused student during an investigation, hearing or appeal (See Section IX A in the Student Code.)
- I. **Instructor** – any person, regardless of rank or title, who teaches law students at the School of Law
- J. **Investigating Committee** – the committee appointed by the dean to investigate possible violations of the code (See Section IV B13 and Section VIII F. in the Student Code.)
- K. **Knowingly** – A person acts knowingly, or with knowledge, with respect to the nature of his or her conduct or to the circumstances surrounding such conduct, when he or she is aware of the nature of such conduct or that such circumstances exist. A person also acts knowingly, or with knowledge, with respect to a result of his or her conduct, when that person is aware that the conduct is reasonably certain to cause that result.
- L. **Law School** – the Dedman School of Law at Southern Methodist University
- M. **Negligence** – A person acts negligently with respect to circumstances surrounding his or her conduct or the result of that conduct when he or she ought to be aware of a substantial and unjustifiable risk that the circumstances exist or the result will occur.
- N. **Purposefully** – A person acts purposefully, or with purpose with respect to an act or to a result, when it is his or her intention, conscious object or desire to engage in the act or to cause the result.
- O. **Recklessly** – A person acts recklessly, or is reckless, with respect to circumstances surrounding his or her conduct or the result of that conduct, when he or she is aware of but consciously disregards a substantial and unjustifiable risk that the circumstances exist or the result will occur.

- P. **Report of an Alleged Violation** – a report to the assistant dean of a possible violation of the code (See Section VII in the Student Code.)
- Q. **School Prosecutor** – the member of the investigating committee chosen by that committee to prosecute the accused student at the hearing and any possible appeal (See Section VIII F and Section IX E in the Student Code.)
- R. **Student** – any person who is, or has been, enrolled at the Southern Methodist University Dedman School of Law
- S. **Transactional Immunity** – immunity that bars prosecution under this code of the immunized person for any activity mentioned in the immunized testimony
- T. **Use Immunity** – immunity that bars the admission of the immunized testimony, and any evidence derived therefrom, and the same from being used against the immunized person, at any hearing before the honor council

## Section II. The Honor Council

- A. The honor council shall consist of six members.
  - 1. Three of the members shall be students. Under rules promulgated by the Student Bar Association, the student body shall elect the three student members and one alternate at the time the Student Bar Association representatives are elected. Student members shall serve one-year terms. If, for any reason, a student member cannot complete his or her term, attend a particular hearing or vote on a particular question (for example, whether to decline jurisdiction over a matter), the alternate shall complete such term, attend the hearing or vote, as the circumstances may require.
  - 2. Three of the members shall be law faculty members appointed by the dean of the Law School with the advice of the faculty executive committee. The dean also shall appoint an alternate faculty member. The dean shall not appoint an assistant or senior associate dean or himself or herself to the council. Faculty members shall serve three-year staggered terms, so that no two faculty members will have the same number of years remaining in their terms of appointment. If, for any reason, a faculty member cannot complete his or her term, attend a particular hearing or vote on a particular question (for example, whether to decline jurisdiction over a matter), the alternate shall complete the unexpired term, attend the hearing or vote, as the circumstances require.
  - 3. The faculty member who is serving in the last year of his or her term on the council shall be the chair. The chair's term shall be for one year. If, at any time, the chair is unavailable to perform chair duties, the faculty member on the council with the next longest tenure shall act as the chair.
- B. The council shall have jurisdiction over any student conduct that is prohibited by this code. A student's conduct is not subject to this code unless it has occurred while the student is enrolled at or was seeking admission to the Law School. For good cause, the council may decline or postpone asserting jurisdiction over the conduct of a student. For example, any of the following may constitute good cause for declining or postponing jurisdiction: 1) the fact that such conduct is being or has been handled by federal, state or local authorities, 2) the conduct is only a *de minimis* violation of this code, 3) the conduct in question is not sufficiently related to Law School matters, or 4) assuming the allegation to be true, the conduct does not evidence a lack of honesty, integrity or trustworthiness on the part of the student.

## Section III. Limitations

The council may not exercise jurisdiction over student conduct unless a complaint is filed within one year of graduation, withdrawal or dismissal of the student from the Law School; however, this limitation shall not apply to conduct involving either serious academic misconduct, such as plagiarism or cheating, or serious misrepresentation with respect to the student's application for enrollment in the Law School.

## Section IV. Standards of Conduct

- A. Prohibited Conduct: Generally  
The following student conduct shall constitute a violation of the code:

1. Any conduct pertaining to academic or other University matters that evidences fraud, deceit, dishonesty or an intent to obtain unfair advantage over other students or that interferes unreasonably with the rights of other students, and
2. Any conduct that violates University regulations not inconsistent with this code, and
3. Any criminal act that raises serious doubts about the accused student's honesty, integrity or fitness to practice law.

B. Prohibited Conduct: Nonexclusive Examples

To assist students in understanding their responsibilities under the code, the following is a nonexclusive list of examples of conduct pertaining to academic or other University matters that violate this code:

1. A student shall not commit plagiarism. Plagiarism is appropriating another's words, ideas or modes of analysis and representing them in writing as one's own. Whenever a student submits written work as his or her own, the student shall not use the words of another verbatim without presenting them as quoted material and citing the source. If the words of another are paraphrased, there must be a clear attribution of the source. If the student uses another's ideas, concepts or modes of analysis, there must be a clear accompanying attribution of the source.
2. A student shall not invade the security maintained for the preparation and storage of examinations. If a student learns that the security maintained for the preparation and storage of examinations has been compromised, he or she shall notify the instructor immediately.
3. A student shall not take an examination for another nor permit another to take an examination for him or her.
4. While taking an examination, a student shall neither possess nor refer to any material (such as books, notebooks, outlines, papers or notes) not authorized by the instructor for use during the examination.
5. A student shall follow all instructions concerning the administration of examinations.
6. In connection with an examination or an academic assignment, a student shall neither give, receive nor obtain information or help in any form not authorized by the instructor or the person administering the examination or assignment.
7. A student who is taking or has taken an examination shall not discuss any part of that examination with another student who is taking the examination or will be taking a deferred examination or with anyone else when such discussion is likely to endanger the security of the examination questions.
8. While taking an examination, a student shall neither converse nor communicate with any person other than the person(s) administering the examination, except as permitted by the administrator(s) of the examination.
9. A student shall not submit to any instructor or Law School organization any written work (or part thereof) prepared, submitted or used by him or her for any other purpose (such as, by way of example, work prepared for or submitted in another course or work prepared for a law journal, clinic, law firm, government agency or other organization) or prepared by another, except upon specific disclosure of the facts and receipt of permission from the instructor or organization to whom the work is submitted.
10. A student shall not take or copy material (such as personal items, books, notebooks, outlines, papers or notes) belonging to another student without the consent of the latter.
11. A student shall not make a false statement to a Law School instructor, administrator or organization or to the honor council or an investigating committee.
12. A person shall not refuse to cooperate with the honor council or an investigating committee constituted under this code, except that a student who is being investigated or who is charged shall not be obliged to provide oral or written testimony without a grant of use or transactional immunity.
13. Unless authorized by this code or required by law or court order, no member of the Law School faculty, administration, honor council or an investigating committee shall disclose information concerning the identity of the accused, the accuser or witnesses without the express permission of the council or committee. Students who are questioned by a member of the faculty, administration,

honor council or investigating committee about a suspected code violation by another student shall not disclose to anyone else information concerning the identity of the accused, the accuser or witnesses learned during the questioning without the express permission of the council or committee.

14. With respect to the Law School library or other University library, a student shall not: (a) mark, tear, mutilate or destroy library material, (b) hide, misshelve or misfile library material, (c) remove library material from the library without complying with library regulations or (d) otherwise fail to comply with library regulations.
  15. A student violates this code by conspiring, soliciting, attempting or agreeing to commit, assist or facilitate the commission of any violation of this code.
  16. A student shall comply with any requirement imposed upon him or her by the honor council as a sanction under this code.
  17. A student shall not engage in any act that materially disrupts a class, meeting or other function of the Law School so as to interfere unreasonably with the rights of other students in the pursuit of their education.
  18. Purposefully engaging in racial, ethnic, religious or sexual harassment of a student interferes with the rights of that student; accordingly, such conduct violates this code.
  19. A student shall not knowingly make a false allegation of a violation of this code.
  20. A student shall not use computer information systems for non-Law School related activities (such as employment outside of the Law School) without authorization or for assignments, projects or coursework in which use of such systems is prohibited.
- C. Before a student may be found to have violated this code, there must be clear and convincing evidence that the accused committed the act or acts constituting the violation and that the accused did so purposefully, knowingly, recklessly or negligently.
- D. Extenuating circumstances or good motives (such as, by way of example, pressure from school or outside work, family obligations or to help a friend) are no defense to a violation of the code but may be relevant to the determination of sanction.
- E. It is not a defense to charges of violating this code for a student to claim he or she has not received, read or understood this code or is otherwise ignorant of its provisions. A student is held to have notice of this code by enrolling in the Law School. (See Section II C4 in the Student Code.) A copy of the code will be distributed to each entering first-year student, placed on file in the Law School library and made available from the Law School's Office of Academic Services.

## Section V. Sanctions

- A. Sanctions for violations of this code may include but are not limited to one or more of the following:
1. Public or private admonition, warning, reprimand or censure.
  2. Counseling.
  3. Additional academic work.
  4. A requirement that a student take extra credit hours.
  5. Public or University service.
  6. Suspension or loss of specific Law School benefits, privileges, memberships and/or honors, including financial aid and scholarships.
  7. Fines.
  8. Compensation for or replacement of any damaged or destroyed property.
  9. Recording of findings in the student's Law School file for any length of time.
  10. Probation, with or without conditions.
  11. Suspension for a period not longer than two years.
  12. Expulsion.
  13. Recommendation of a lowered grade.
  14. Recommendation to the board of trustees that an awarded degree be withdrawn.

15. Request to the dean that he or she take other appropriate action.
- B. The honor council has no authority to determine or change a student's grade based upon the student's conduct in connection with a course or other graded academic activity.
- C. Notwithstanding the provisions of this section, any official student organization may suspend, expel (with or without retroactive effect) or terminate any membership or honors accorded a member found to have violated this code.

## **Section VI. Responsibilities of Faculty and Administration**

- A. By the second meeting of a course, each instructor shall identify with precision the materials (if any) that the students may use during the instructor's examination and shall describe the condition (for example, annotated or unannotated) in which those materials may be used. However, if an instructor does not identify the materials usable during the final examination and their condition, students must assume that the examination in that course is "closed book," that is that no materials will be permitted to be used by students during the final examination. In order to eliminate ambiguity or uncertainty, the instructor shall answer any student question concerning those materials and shall communicate that same information to all students in the course.
- B. Each instructor shall include the instructions described in paragraph A in the written instructions accompanying the examination.
- C. Each instructor shall exercise caution in preparing, administering and discussing an examination to ensure that no student receives an unfair advantage.
- D. Each instructor and member of the Law School staff shall report to the assistant dean for student affairs any student conduct that is reasonably believed to constitute a violation of this code.
- E. It is the responsibility of the dean, or his or her delegate, to supervise the imposition of any sanction directed by the council or modified by any appeal.

## **Section VII. Report of an Alleged Violation**

- A. If a person wishes to initiate a disciplinary proceeding against a student for violating this code, the person must report the matter to the assistant dean for student affairs. The report of the suspected code violation may be either written or oral. Such report may not be made anonymously; however, confidentiality relating to the identity of the accuser shall be maintained, subject to the provisions of Section VIII C, E and Section IX B, K, L and M. If the assistant dean is not available to receive the report, then the suspected violation must be reported to the senior associate dean for academic affairs or to the instructor, if any, whose course is affected by the conduct. An anonymous report will not be sufficient to initiate an investigatory or disciplinary proceeding under this code.
- B. If the report of the suspected violation is made orally, the person who initiated the report must submit a brief written report of the facts surrounding the suspected violation to the assistant dean, who shall in turn deliver the written report to the chair of the honor council or the investigating committee, if one has been constituted.
- C. The assistant dean for student affairs, upon receiving a report and after consultation with the chair of the council, may determine that no violation of the code has occurred even if the allegation is assumed to be true.

## **Section VIII. Investigation of Violations**

- A. Upon receipt of a report of a suspected code violation, the assistant dean for student affairs, associate dean for academic affairs or instructor shall promptly notify the chair of the honor council of the allegations contained in the report, including the names of the accused student(s) and the person(s) making the allegation. Upon receiving this report, the chair shall promptly inform the members of the council of the substance of the report and the identity of the members of the Law School community allegedly involved in the incident.
- B. A meeting to determine whether to decline or postpone asserting jurisdiction shall be held if requested by at least two members of the council. The council may not decline or postpone taking jurisdiction of a matter unless at least four members of the council and/or their alternates if any members are not available vote to decline or postpone taking jurisdiction.
- C. If the council elects to decline or postpone asserting jurisdiction, the council shall submit a written report to the dean giving its reasons. The council may publish its decision, but in doing so, no information identifying

the accused or the accuser shall be revealed. The council's election not to take jurisdiction of a matter for any reason shall not prevent the dean from taking whatever administrative action against the student he or she deems appropriate. This report may include a recommendation that the dean take administrative action against the student or consider the incident when deciding whether to recommend the student for the award of a degree or other purpose. Whenever the council's report includes a recommendation of action by the dean against the student, a copy of the report shall be sent to the student.

- D. If the council does not decline or postpone asserting jurisdiction over the matter, the chair shall promptly notify the assistant dean for student affairs of that fact and whether it recommends that the matter be resolved through nonbinding summary disposition as set forth in the Section XIV of this code.
  - 1. Upon the assistant dean's receipt of notice that summary disposition is recommended, the matter shall proceed as set forth in Section XIV below.
  - 2. Upon receipt of such notice that the council does not decline or postpone asserting jurisdiction over the matter, or that the council does not recommend the matter for summary disposition, the assistant dean for student affairs shall promptly notify the accused student of the allegation and that an investigation will begin and shall furnish the student with a copy of this code. Where a report of a suspected code violation accusing a currently enrolled student is received by the council at a time when it appears that the investigation and hearing before the council, if any, could not be completed at least two weeks before the end of classes, the chair of the council may direct the assistant dean to postpone notification until after the accused student has completed his or her examinations.
- E. The assistant dean shall notify the accused student that an investigation is to be initiated and shall also notify the dean, but such notice to the dean shall not disclose the identity of the accused, the accuser or the nature of the alleged violation. The dean shall promptly appoint an investigating committee consisting of two faculty members and one student. The associate and assistant deans and members of the council shall not be appointed to the investigating committee.
- F. Duties of the Investigating Committee
  - 1. Except for good cause shown, the investigating committee shall complete its investigation of the alleged violation within 30 days of its formation.
  - 2. The committee shall have the power to question persons having pertinent information, examine any pertinent material and question an accused student if he or she is willing to speak. If the committee questions a student whom the committee reasonably believes has committed a code violation, it shall advise the student: (a) of his or her right not to speak, (b) that what the student says can be used against the student, (c) that the student has the right to consult an attorney or other representative before answering any questions and (d) that the student has the right to have that representative present during the questioning. At the request of the investigating committee, the chair of the honor council shall have the authority to subpoena Law School instructors, staff and students to appear as witnesses before the investigating committee or the council and to grant use or transactional immunity to a witness or to an accused student if he or she is not willing to speak to the committee.
  - 3. Upon completion of its investigation, the investigating committee shall determine whether probable cause exists to believe that a student has violated this code. A finding of probable cause must be supported by at least two members of the committee. The committee shall promptly report its determination, whether affirmative or negative, to the chair of the honor council, to the accused student and to the person(s) who reported the alleged violation of the code. A complaint issued by the committee shall be sent to the chair of the honor council.
  - 4. If the investigating committee determines that a complaint shall be filed, the committee shall also give to the accused student the following information in writing:
    - a. A copy of the complaint, which shall be a plain, concise and definite written statement of the essential facts of the violation(s) charged, citing the specific provision(s) of this code that the accused student is alleged to have violated.
    - b. The identity of known witnesses, a general description of what each is expected to testify about, their written statements, if any, and either copies or a description of any physical evidence that may be used at the hearing; all written reports concerning the alleged violation, if any, submitted to the assistant dean for student affairs or other member of the staff, faculty or administration.

- c. The names of the honor council members.
  - d. A statement that the student may be assisted by an attorney or other adviser of the student's choice. (See Section IX A in the Student Code.)
  - e. A statement that the student has a right to review any information gathered by the investigating committee during the investigation, other than the work product of the investigating committee.
5. The investigating committee shall not enter into any agreement with the accused student whereby the committee agrees not to bring before the honor council any violations for which probable cause has been found or which commits the honor council to any finding or sanction. The committee must present all such violations to the council for a hearing by filing a complaint as provided by this code. The accused may admit guilt by testifying on the record before the council that he or she committed the alleged act(s) and by waiving a hearing before the council on the question of guilt. Upon receiving such an admission of guilt, the council shall proceed by hearing to determine the appropriate sanction.
  6. The investigating committee shall appoint one of its members to act as school prosecutor in presenting the evidence against the accused student during the hearing and any appeal.
  7. Notwithstanding that the investigating committee has issued a complaint, it shall be the duty of the school prosecutor to continue to gather other evidence relevant to the determination of guilt or innocence of the accused and to present it to the council at the hearing on the complaint. Any such evidence shall be disclosed to the accused student as soon as possible after it has been obtained.

## Section IX. Hearing

- A. Upon receiving a complaint from the investigating committee, the chair of the council shall convene a hearing before the honor council. Before and during the hearing, and through any appeals within the University, the accused student shall be entitled to representation by or assistance from a retained attorney or anyone else who is the student's choice and who agrees to represent or assist the student. If the student wishes to be represented by an attorney and is able to demonstrate to the satisfaction of the assistant dean for student affairs that he or she is financially unable to retain an attorney, the assistant dean shall arrange for a law faculty member or other attorney to represent the student without cost. It is the sense of the Law School community that the law faculty should provide pro bono representation to such accused students.
- B. The hearing shall be attended by the council, school prosecutor, the remaining members of the investigating committee (if they so desire), the accused student and the student's representative, if any. Witnesses may also attend unless exclusion is requested by any party. This section is subject to the following provisions:
  1. The council may proceed with no fewer than two faculty and two student members present.
  2. No later than one day before the hearing, the accused student may request that the chair allow other people to attend; if the chair grants that request, the chair may also open the hearing to people other than those requested by the accused student.
  3. A request to open the hearing shall not preclude the council, by majority vote of those present, from closing the hearing during the testimony of any witness who may be extraordinarily embarrassed by public testimony.
- C. The chair shall rule on all motions and objections and may be overruled only by a majority of the council present.
- D. The council may consider only evidence made part of the record at the hearing. It shall not be bound by rules of evidence. All relevant evidence shall be admissible if it is not manifestly unreliable. Hearsay evidence may be admissible, but it shall be accorded only such weight as it is entitled under the circumstances. Proof of conviction of a crime shall be prima facie evidence that the person committed the offense of which he or she was convicted and of any facts necessary for that finding of guilt. The council, by majority vote, may grant use or transactional immunity to any witness. The council may subpoena any Law School instructor, staff or student to appear as a witness.
- E. Normally, the council shall hear evidence regarding the question of guilt before hearing evidence regarding sanctions. The school prosecutor shall initiate the presentation of evidence. The accused student (or his or her defense counsel) may then offer evidence relevant to the charge(s). After the presentation of evidence regarding guilt, the council shall meet in camera to decide the question of guilt. Upon reaching a decision, it

- shall reconvene before the parties and announce its decision. If it finds the accused guilty, it shall then give the parties the opportunity to present evidence, if any, relevant to sanctions. At that time, the student shall have the option either to proceed first or to follow the prosecutor. The prosecutor shall present all aggravating and mitigating evidence in his or her possession and may recommend particular sanctions. After hearing this evidence, the council shall again meet in camera to decide the question of sanctions. Upon reaching a decision, the council shall reconvene before the parties and impose sanctions, if any.
- F. The council, the school prosecutor and the student (or his or her defense counsel) may question any witness. However, the accused student shall not be required to testify, and no adverse inferences shall be drawn from the accused student's decision not to testify.
  - G. The school prosecutor and the accused student (or defense counsel) may make opening and concluding statements. However, an accused student who has chosen not to testify may not make a statement to the council unless the student allows questions from council members and the school prosecutor.
  - H. The hearing shall be recorded by means of stenographic or audio or videotape recording.
  - I. The council may not find the accused student guilty of any code violation not charged in the complaint. After the hearing begins, the complaint may be amended over the accused's objection, provided the accused is not thereby prejudiced in his or her defense. A continuance of the hearing may be granted to avoid such prejudice. The school prosecutor shall bear the burden of proving the alleged violation(s) by clear and convincing evidence. A 2/3 vote of the council members present shall be necessary for a finding of guilt and the imposition of any sanction, except that expulsion or a recommendation that an awarded degree be withdrawn shall each require unanimity.
  - J. After the hearing is concluded, the chair or the council shall prepare a written report detailing the evidence considered, the reasons for its decision and any sanction(s) imposed. Concurring and dissenting members may prepare reports explaining their positions. Copies of the reports shall be given to the accused and to the dean.
  - K. At the conclusion of a case, including an appeal, if any, the council shall publish the results of its decision (as amended by any appeal). The council may publish the decision in any way it considers appropriate. Factors it might consider include, by way of examples, the relevancy of publicity as to the sanction or the informational value of the decision to the Law School community. In publicizing its decision, the council shall not publish the name of any participant, except that in exceptional circumstances the council may reveal the name of the student found guilty of the violation(s). Beginning with the effective date of this code, all published decisions shall be maintained on reserve in the library.
  - L. Regardless of the decision on the merits, the council shall keep a permanent record of the evidence presented at the hearing, the report(s) and the opinion(s) of the council, if any, and any other information it decides should be retained. Such record may be referred to later by the council for whatever purpose it considers relevant, but the council shall not reveal the names of the accuser or the witnesses. At any time after three years from the conclusion of an appeal, the council may destroy any record of the matter other than its written report(s) and the opinion(s) of the dean, if any. When no complaint is filed because the allegation is deemed without merit, the conduct is *de minimis* or the evidence is deemed insufficient, the council shall nevertheless keep a record of the allegation, the reason(s) for nonaction, the name of the student whose conduct was under investigation and the names of the accuser and/or the witness(es) for three years, after which time such record shall be destroyed. Subject to paragraph K, neither the contents nor the existence of any record referred to in this paragraph may be disclosed except 1) when required by law or order of court, 2) when required by the dean or 3) when the concerned student has signed a written waiver of confidentiality.
  - M. At the end of each chair's tenure, the chair shall transfer all case files to the dean's office, and the dean shall transfer them to the next chair. Such transfers shall be made without breach of the confidentiality of the files.

## **Section X. Appeal of Adjudications of Academic Dishonesty**

- A. A student who is adjudged guilty by the honor council of a violation of this code concerning a matter of academic dishonesty, an attempt to gain an unfair advantage over other law students or an unreasonable interference with the rights of other students may appeal such finding or any sanction imposed to the dean of the Law School. A student who admits the truth of the complaint may challenge the council's jurisdiction and the sanction on appeal. Normally, the filing of a notice of appeal shall automatically stay the execution of all sanctions imposed by the council on the student filing the notice; however, the dean shall have authority to

order that some or all of the sanction(s) be executed during the pendency of the appeal. Notwithstanding any further appeal by the student to the president of the University, all unexecuted sanctions upheld by the dean shall be executed following the dean's determination of the appeal.

- B. Notice of intent to appeal must be given to the dean and the chair of the council. The notice of appeal shall be in writing and shall contain the reasons for the appeal. Upon receipt of the notice of appeal, the chair shall transmit its response(s) and the record of the hearing to the dean.
- C. If, following the council's decision, the student discovers new information relevant to the merits or the sanction, the student may ask the council to reconsider its decision or may ask the dean to consider such new information along with the record of the hearing. The dean may remand to the council for consideration of the new information. If the student discovers new information after the dean has decided the appeal, the student may ask the dean to reconsider his or her decision. If the dean decides not to change that decision, he or she shall give the reason(s) for not doing so to the student in writing. The student may then appeal the dean's decision to the president of the University.
- D. Normally, the dean's appellate review will be based on the record of the hearing and any written submissions. However, the dean may choose to hear oral argument by the student or by the defense counsel and by the school prosecutor.
- E. The dean may affirm, reverse, remand or modify the decision of the council, or the dean may dismiss the complaint. If the dean concludes that the decision of the council is factually correct and that its sanction is appropriate, the dean shall affirm. The dean may dismiss the complaint only if he or she concludes that the council lacked jurisdiction or that its determination was not supported by the greater weight of the evidence. The dean may reduce the sanction if he or she believes that the sanction is inappropriate but may not increase the sanction. If the matter is remanded, the council shall reconvene to reconsider the case.
- F. The dean shall prepare an opinion explaining the reasons for the decision. A copy of that opinion shall be given to the student and to the council, and the council shall keep a copy as part of its permanent record. Except as to sanctions, the decision of the dean with respect to the student's guilt or innocence shall be final.
- G. After the dean's decision, the student may ask the president of the University to modify the sanction(s), but not the finding of guilt. The president may consider any information he or she considers pertinent, including the report(s) of the council and the opinion(s) of the dean. The president may not increase the sanction.

## **Section XI. Appeal of Adjudications of Nonacademic Violations**

A student who is adjudged guilty by the honor council of conduct that does not involve academic misconduct, an attempt to gain unfair academic advantage over other law students or an unreasonable interference with the rights of other students may appeal the determination of the council to the University Judicial Council according to the University procedures for the appeal of Level II hearing boards. (See the University publication *SMU Policies for Community Life*.)

## **Section XII. Notification**

Whenever this code requires notification and does not otherwise specify the manner by which such notification shall be accomplished, the following methods are proper:

- A. Verbal notification, either in person or by telephone, with written confirmation sent by regular mail or
- B. Written notification sent by email to the recipient's Law School email address or to the last non-Law School email address provided to the Law School by the recipient or by registered or certified mail to the last local address provided to the Law School by the recipient or, if the Law School is not in session, to the last home address provided to the Law School by the recipient.

## **Section XIII. Timeliness of Proceedings**

- A. All actions taken pursuant to duties imposed by this code shall be accomplished in a timely manner. The specific time guidelines are the following:
  - 1. The assistant dean for student affairs shall bring a report of a suspected code violation to the attention of the chair of the council within four days of receiving it.

2. The chair of the council shall bring the substance of a report of a suspected violation to the attention of the council within four days of receiving notice from the assistant dean.
  3. The honor council shall determine whether to assert, decline or postpone taking jurisdiction of a reported matter within seven days of the receipt by the chair of the reported violation.
  4. The council's determination to decline or postpone asserting jurisdiction shall be reported to the dean in writing within 14 days of the determination.
  5. The council's determination to assert jurisdiction, if such a determination is made, or the chair's determination to initiate an investigation of a reported code violation shall be reported to the office of the assistant dean for student affairs and to the accused student within four days of the determination.
  6. The dean of the Law School shall appoint an investigating committee within 14 days of the receipt by the assistant dean for student affairs of a report of a suspected code violation from the council chair.
  7. The investigating committee shall reach a determination regarding the reported code violation within 30 days of its appointment.
  8. The investigating committee shall report its determination of whether to file a complaint to the chair of the honor council, to the accused student and to the person or persons initiating the report of the suspected violation within four days of reaching its determination.
  9. The investigating committee shall give to the accused student the information specified in Section VIII F4, a–f of the Student Code, within seven days of the notification to the student that a complaint will issue.
  10. The honor council shall convene to hear a complaint within 21 days of receipt of the complaint by the chair.
  11. The chair's written report of the council's determination(s) and its summary of the evidence shall be submitted to the dean within seven days of the termination of the hearing.
  12. A student's written notice of an intent to appeal an honor council determination must be received by the dean's office within seven days of that determination.
  13. Except for the notice of appeal, deadlines for written submissions to the dean from any party relating to a matter on appeal will be set by the dean.
  14. The dean shall decide the appeal within 30 days of the date the dean's office receives the notification of an intent to appeal.
  15. A student's written appeal of a sanction shall be submitted to the office of the president of the University within 14 days of the student's receipt of the dean's determination.
  16. This code imposes no period of time within which the president of the University must decide an appeal.
- B. In computing any period of time prescribed or allowed by this code, the day of the act or event from which the designated period of time begins to run shall not be included.
  - C. The accused may waive time periods imposed by this code on others. Noncooperation by the accused is a basis for the suspension of time requirements imposed by the code. The honor council, by majority vote, and the dean shall have the authority to extend time limits imposed upon the accused.
  - D. Failure by Law School personnel to abide by the time requirements of this code without the accused's consent may be grounds for dismissal of the complaint or mitigation of sanctions only if a substantial delay has been caused and the accused has suffered prejudice thereby.

## **Section XIV. Nonbinding Summary Disposition**

- A. Upon receiving notice that the council recommends the matter for summary disposition, the assistant dean for student affairs shall promptly notify the accused student of the allegation and the council's recommendation and shall furnish the student with a copy of this code. Notification by the assistant dean shall also include the following information:
  1. The matter may proceed in accordance with this Section XIV only upon the written consent of the accused student and the reporting party.
  2. The student may be assisted by an attorney or other representative in the process.

3. The consent of any party participating in summary disposition may be revoked at any time prior to the delivery to the dean of the report prepared by the Honor Council chair as described in Paragraph F of this Section XIV.
- B. The assistant dean shall also promptly notify the reporting party of the council's recommendation that the matter proceed in accordance with Section XIV and that it may do so only upon the consent of the accused student and the reporting party.
- C. Within 5 days of receiving notice from the assistant dean in accordance with Paragraphs A and B of this Section, the reporting party and the student shall notify, in writing, the assistant dean of their decision to consent or not to consent to proceeding with summary disposition. The assistant dean shall promptly inform the chair of the Honor Council of the parties' decisions.
- D. If either of the parties notify the assistant dean that they do not consent to summary disposition, the assistant dean shall promptly inform the chair of the Honor Council of that fact and the matter shall proceed as otherwise provided under the code with the appointment of an investigating committee.
- E. Upon receiving the parties' written consent to summary disposition, the assistant dean in consultation with the chair of the Honor Council shall inform the parties of a recommended sanction. If the parties reach an agreement regarding a proposed sanction, they shall provide written notification of their agreement and its substance to the assistant dean who shall immediately notify the chair of the Honor Council of the agreement. If the parties are unable to reach an agreement regarding a proposed sanction within 5 days, they shall notify the assistant dean and may obtain an additional 5 days to reach an agreement, with the approval of the chair of the Honor Council. If they are unable to reach an agreement within 10 days after receiving the notice of proposed sanctions, they must provide written notice to the chair of the Honor Council, and the matter shall promptly proceed as otherwise provided under the code with the appointing of an Investigating Committee.
- F. Upon receiving notice that the parties reached an agreement regarding a summary disposition, the chair of the Honor Council shall prepare a written report adopting the parties' agreement, detailing the reported violation and the nature of the summary disposition, including a description of any sanctions agreed upon and imposed. The chair shall provide copies of the report to the student and to the dean. The council shall publish its report and maintain a record of it in accordance with Section IX. K. and Section IX. L. of this code.

# Dedman School of Law: Tuition, Fees and Financial Aid

## Tuition, Fees and Living Expenses

The *Financial Information Bulletin* is issued each academic year. It provides the general authority and reference for SMU financial regulations and obligations, as well as detailed information concerning tuition, fees and living expenses.

Continuing students registering must ensure that payment for the full amount of charges is posted to their account by the payment due date showing on their bill. The due dates are also published on the Bursar website.

Billing notifications are sent to the student's SMU email address and to the designated authorized payer(s) email address when a bill is generated. The billing notification will provide instructions on how to view the bill online through SMU<sup>pay</sup>. If notification is not received two weeks prior to the due date, the student and/or designated authorized payer(s) should contact the Office of the University Bursar.

Payments made in person or mailed must be received by the Office of the University Bursar, located on the first floor of the Laura Lee Blanton Student Services Building, no later than 4 p.m. Central Time on the payment due date. Payments made online via electronic check or credit card must be posted no later than 11:59 p.m. Central Time on the payment due date. Students and/or those paying on behalf of students who pay online automatically receive an electronic confirmation of payment; students and/or designated authorized payer(s) paying through other methods can also verify receipt of payment online.

Students enrolling after the payment due date must pay at the time of enrollment. Students whose accounts are not cleared by the payment due date or at the time of enrollment are subject to a late payment fee of \$50 for balances between \$250 and \$999.99, and \$150 for balances between \$1,000 and \$5,000. Balances more than \$5,000 are charged 3 percent of the outstanding balance, not to exceed \$750. Also, after the monthly payment due date has passed, a 1.5 percent past due fee will be assessed on the unpaid student and/or miscellaneous account each month until the balance is paid. The enrollment of students whose accounts remain unpaid after the payment due date may be canceled at the discretion of the University. Students are individually responsible for their financial obligations to the University.

All refunds except federal Parent PLUS loans, prepayment accounts, the SMU Monthly TuitionPay Payment Plan and international wires will be made payable to the student. A credit card payment will only be refunded to the student if federal student loans have been applied to their account. International wires will be refunded by wire to the originating wire account less a \$35 wire-processing fee. The Parent PLUS loan borrower can request the refund to be processed to the student by submitting a Parent PLUS Release form, located on the Bursar website. If the refund is issued by check, the student may request, in writing, that the refund be sent to another party.

Any outstanding debts to the University will be deducted from the credit balance prior to issuing a refund. Any outstanding debts to the University that include Title IV funds must have an Authorization to Credit Account form and/or an Authorization to Credit Account Parent form on file in order to transfer funds to cover current award year debts. Students need to sign the ACA form and the federal parent PLUS loan borrower needs to sign the ACAP form.

Any outstanding debts to the University that do not include Title IV funds will be deducted from the credit balance prior to issuing a refund. All other debts should be paid directly by the student.

A student whose University account is overdue or who in any other manner has an unpaid financial obligation to the University will be denied the recording and certification services of the Office of the Registrar, including the issuance of a transcript or diploma, and may be denied readmission until all obligations are fulfilled. The Division of Enrollment Services may stop the registration, or may cancel the completed registration, of a student who has a delinquent account or debt, and may assess all attorney's fees and other reasonable collection costs (up to 50 percent) and charges necessary for the collection of any amount not paid when due. Matriculation in the University constitutes an agreement by the student to comply with all University rules, regulations and policies.

Applications for financial assistance should be submitted well in advance of registration in accordance with recommended filing dates set forth by the Division of Enrollment Services, Office of Financial Aid. Applications

received after the recommended deadline can expect a delay in application processing time due to the increased volume. This will ultimately delay disbursement of financial aid to the student account. Students and families are expected to clear all billed charges by the published billing due dates regardless of the status of their financial aid application. Any funds that disburse to the student account after the payment due date has passed, will be applied to any outstanding charges first. Remaining financial aid funds will be refunded to the student.

During the registration process, students will be prompted to read and agree to the Student Rights and Responsibilities, which provides information regarding financial rights and obligations, SMU's Honor Code, the Code of Conduct, and the student appeals and complaints process.

Students who elect to register for courses outside of their school of record will pay the tuition rate of their school of record.

## **Tuition Refunds for Withdrawal from the University**

No refunds of tuition or fees will be considered without an official withdrawal. Policies for official withdrawal, including medical and mandatory administrative withdrawal, are found under Withdrawal From the University in the Academic Records and General and Enrollment Standards section of this catalog.

Reduction of tuition and fees is determined by the effective date of the withdrawal and is based on the schedule listed in the *Financial Information Bulletin* and the SMU Bursar website.

## **Financial aid implications of withdrawing from the University**

Federal regulations require schools to adjust financial aid when a student officially withdraws from the University before completing 60% of the term. Financial aid is reduced to a pro-rated amount based on the amount of time the student was enrolled in classes in that specific term, thus "earning" financial aid proportionate to the amount of time enrolled. The "unearned" portion of aid will be returned to the funding source. Students completing 60% or more of a term are considered to have earned 100% of their financial aid for that term. This federally mandated calculation is completely independent of university's refund policies for withdrawals and may require a reduction in financial aid even if there is no reduction in tuition charges. The end result could create a substantial student account balance after the withdrawal is processed. For this reason, students are strongly encouraged to contact their financial aid adviser, before initiating a withdrawal, to discuss the financial implications of withdrawing. For additional information on the University's tuition refund policies, see the SMU *Financial Information Bulletin* or the University Bursar's website.

Information on the implications of withdrawing on your financial aid can be found on the Office of Financial Aid website.

Medical withdrawals and mandatory administrative withdrawals allow a prorated refund of tuition and fees and must be initiated through the academic adviser or academic Dean's office.

## **Payment Plan Options**

### **SMU Monthly Payment Plan**

SMU offers several payment plan options to assist students and families. Refer to the Bursar's website for detailed payment plan information: [www.smu.edu/paymentplans](http://www.smu.edu/paymentplans).

Annual payment plans are available in 12-month and 10-month formats. Term payment plans are available in 6-month and 5-month formats. The summer payment plan is three months. Payment plan options are not available for short terms including JanTerm, MayTerm, August Term and Winter Term.

## **Graduate and Professional Student Aid**

University grants, scholarships, fellowships and assistantships are awarded in the school or department in which the graduate student will enroll. Schools and departments that offer master's or Ph.D. degrees offer a significant number of tuition scholarships and teaching or research assistantships each year. For more information, students should contact the appropriate school or department.

Grants and loans for Texas residents, private and federal loans, and employment programs may be available by filing the Free Application for Federal Student Aid. The FAFSA may be completed online at [www.fafsa.gov](http://www.fafsa.gov). The SMU Title IV school code number is 003613.

More information is available online at [www.smu.edu/financialaid](http://www.smu.edu/financialaid).

## **Scholarships**

A limited number of awards of full and partial tuition and fees are made annually to entering first-year students. The Law School endeavors to use the available funds to attract students who will enhance the Dedman School of Law with their academic achievement and potential (relying primarily on undergraduate grade point averages and Law School Admission Test scores) and life experiences. Unless otherwise specified in the award letter, these grants are renewed for subsequent years provided the student remains in good standing. Scholarships are applied to courses taken during fall and spring terms at Dedman School of Law.

### **James Elliot Bower Memorial Scholarship**

Selection of James Elliot Bower Memorial scholars is made on the basis of academic proficiency, extracurricular achievement and financial need.

### **The Charles and Peggy Galvin Endowment Fund**

This fund was established in 1979 by multiple donors in honor of Charles and Peggy Galvin. The endowment provides support for a full-tuition scholarship based on merit.

### **The Sarah T. Hughes Diversity Law Fellowship**

The Dallas Bar Foundation funds one or more full-tuition scholarships annually to enable men and women from minority groups to obtain a legal education at Dedman School of Law and subsequently enter the legal profession. The fellowship is awarded initially to entering full-time students for one year and is renewable for the second and third years of study as long as the student remains in good standing. Applicants must complete a separate scholarship application and be accepted for admission to Dedman School of Law by the regular decision deadline.

### **The Hutchison Endowed Scholarship Program Fund**

In 1984, Mr. and Mrs. William L. Hutchison, Sr., created this endowment to fund full-tuition scholarships with the following objectives: 1) to foster and encourage excellence in legal study so that students selected by the school for an award from the endowment income may become competent, able and respected members of the legal profession and/or the business community and 2) to develop in such students the highest sense of duty to community and nation in accordance with the Constitution of the United States. To accomplish these objectives, the school shall employ the following criteria in making scholarship awards: 1) Entering students selected as Hutchison Scholars shall have a superior undergraduate academic record and shall have a high sense of duty and commitment to the community and the nation. 2) A Hutchison Scholar must be a full-time student of the Dedman School of Law each term and must maintain a cumulative average in the upper third of his or her Dedman School of Law class. 3) A Hutchison Scholar shall attend classes regularly, abide by the rules and procedures of the school and maintain a cooperative, friendly attitude and relationship with school administrators, professors and other students.

### **The Thomas W. Luce, III Centennial Dedman Law Scholars Program Fund**

Thomas W. Luce, III Centennial Dedman Law Scholars was established in 2015 by Sarah and Ross Perot, Jr. Recipients of this full-tuition scholarship will be selected based upon academic excellence, demonstrated leadership ability and financial need.

### **Cary Maguire Ethics Scholarship**

Cary M. Maguire created this endowment in 2001 for entering first-year law students who have demonstrated concern and interest in ethical behavior in law. The Cary Maguire Ethics Scholar selection process is based on the law school application and the recipient must write a paper on a topic related to ethical issues in the legal profession during his or her second year.

### **Rupert and Lillian Radford Scholarship Fund**

The Rupert Radford Estate endowed this scholarship fund to aid worthy full-time students at the Dedman School of Law who have high financial need.

### **The Robert Hickman Smellage, Sr. Memorial Fund**

In 1984, the estate of Oda Elizabeth Smellage created this endowment for worthy students at the Dedman School of Law or for students who have graduated from a law school and are enrolled in a postgraduate law program or course of study at the Dedman School of Law.

### **The Sohmen Endowed Scholarship Fund and The Sohmen Chinese Scholars Program Endowment**

These scholarships were endowed by the Sohmen Foundation and Dr. Helmut Sohmen to provide awards for not fewer than four students from mainland China or Hong Kong who are in the one-year LL.M. program and have demonstrated high academic achievement. The scholarships include full tuition, fees and a supplemental living stipend. Students must evidence their commitment to return to China immediately (within seven months) following graduation from the program.

### **The Hatton W. Sumners Foundation Scholarship Program**

Endowed in 1979 by the Hatton W. Sumners Foundation, the scholarships, which cover the cost of full tuition, fees, books and a living stipend, are awarded each year to qualified entering students who are residents of or who attended colleges or universities in Texas, Louisiana, Oklahoma, New Mexico, Arkansas, Kansas, Nebraska and Missouri. Applicants must complete a separate scholarship application and be accepted for admission to the Dedman School of Law by the regular decision deadline (to be admitted by February 15, an applicant must have a complete application on file no later than January 15.).

### **The James Cleo Thompson, Sr. Endowed Scholarship Fund**

Mr. and Mrs. James Cleo Thompson, Jr., and Mrs. James Cleo Thompson, Sr., created this endowment in 1984. James Cleo Thompson, Sr. Scholars are students who show high academic performance in their undergraduate education and demonstrate valuable traits as community citizens, including service in leadership positions, experience in the workplace, and volunteer commitment to the community.

## **Endowed Scholarships**

The Dedman School of Law awards varying amounts of tuition and fee support from the following endowments that are established through gifts or bequests from graduates and other supporters.

- The Nelda Sánchez Adamson Endowed Scholarship Fund
- The Akin, Gump, Strauss, Hauer & Feld Council for Excellence Scholarship Endowment Fund
- The Elizabeth and Louis Altman Endowed Scholarship Fund
- Anonymous Law School Endowment
- The Webster Atwell Scholarship Endowment Fund
- Baker & Botts Council for Excellence Scholarship Endowment Fund
- Dennis Barger Memorial Scholarship
- The Michael C. Barrett Endowed Scholarship Fund
- The Bennett Scholarship for International Studies
- The Nancy L. Benoit Memorial Scholarship Endowment Fund
- The William K. Berenson Endowed Scholarship
- James Elliot Bower Memorial Scholarship
- The James Bozzell Endowed Memorial Scholarship Fund
- The Eugene and Juanita Brady Endowed Scholarship Fund
- The Frank and Debbie Branson Trial Advocacy Scholarship
- Dan Burney Law Students Scholarship
- The R.W. Calloway Scholarship Endowment Fund

- The Class of 1986 Teresa Jenkins Carson Memorial Scholarship Endowment
- Clovis G. Chappell Endowment
- Citigroup Foundation Law Scholarship
- The Tom C. Clark Scholarship Fund
- The Frances Spears Cloyd Endowed Scholarship Fund
- Rosser J. Coke Scholarship
- Dallas Lawyers' Auxiliary Endowed Scholarship Fund
- The J. Carlisle DeHay, Jr. Endowed Scholarship in Law
- Israel Dreeben Scholarship
- The Easterwood Foundation
- The Ray and Kay Bailey Hutchison Scholarship Endowment Fund
- The Hutchison Endowed Scholarship Program Fund
- The Jackson Walker, L.L.P. Endowed Scholarship Fund
- Jackson & Walker Council for Excellence Scholarship Endowment Fund
- Johnson & Swanson Council for Excellence Scholarship Endowment Fund
- The Jones Day Endowed Scholarship Fund
- Jones, Day, Reavis & Pogue Council for Excellence Scholarship Endowment Fund
- The John Leddy Jones Memorial Scholarships
- Journal of Air Law and Commerce Fund
- K&L Gates Council for Excellence Scholarship Endowment Fund
- The K&L Gates Endowed Scholarship Fund
- The Locke Liddell & Sapp Endowment Fund
- The Thomas W. Luce, III Centennial Dedman Law Scholars Program Fund
- Cary Maguire Ethics Scholarship
- E. Eugene Mason Endowed Scholarship Fund
- Joseph P. McKnight Memorial Scholarship
- The Alfred E. McLane Endowed Scholarship Fund
- Tom and Rosemary Medders Law Scholarship Fund
- Marvin and Mollyann R. Menaker Endowment Fund
- The Britton D. Monts Endowed Scholarship Fund
- Annie Morris Law Scholarship
- Alfred P. Murrah Memorial Scholarship
- The James L. Noel, Jr. Endowed Scholarship Fund
- The Dean Charles Shirley Potts Scholarship Endowment Fund
- Maurice E. Purnell Endowed Scholarship Fund
- Rupert and Lillian Radford Scholarship Fund
- The Rain, Harrell, Emery, Young & Doke Council for Excellence Scholarship Endowment Fund
- Joy and Ralph Ellis Scholarship
- The Bess and Ted Enloe Endowed Scholarship Fund
- The Armine C. Ernst Endowed Scholarship Fund
- The Favrot and Hartwell Endowed Scholarship Fund
- The Henry R. and Rose S. Feld and Morton H. and Hortense Sanger Endowed Scholarship Fund
- Donald C. Fitch, Jr. Endowed Scholarship
- The Charles and Peggy Galvin Endowment Fund
- The Judge Dean Gandy Endowed Scholarship Fund
- Gardere & Wynne Council for Excellence Scholarship Endowment Fund
- The Larry D. George Endowed Scholarship Fund
- Gibbs Memorial Scholarship Fund
- Arthur I. and Jeannette M. Ginsburg Scholarship
- Hawkins Golden Law Scholarship
- The J. Roscoe Golden Memorial Endowed Law Scholarship
- The Hall Family Endowed Scholarship in Law

- W. R. Harris, Sr. Memorial Scholarship
- The Linda Wertheimer Hart and Milledge A. Hart III Endowment for the School of Law
- James Hartnett Scholarship Endowment Fund
- Haynes and Boone Council for Excellence Scholarship Endowment Fund
- Will T. Henry Endowment
- Wilson W. Herndon Memorial Fund
- Justice John and Lena Hickman Scholarship Fund
- The John Howie Family Scholarship Endowment Fund
- The Richard M. Hull Endowed Service Scholarship
- The William A. Hunter Memorial Scholarship Fund
- The Homer B. Reynolds III Endowed Scholarship Fund
- The Dean John W. Riehm Endowed Memorial Scholarship Fund
- William J. Rochelle, Jr. Scholarship Endowment Fund
- Professor Roy R. Ray Scholarship
- The Martin Samuelsohn Endowed Scholarship
- The Richard L. Scott Family Scholarship Endowment Fund
- The John T. Sharpe Scholarship Endowment Fund
- The Robert Hickman Smellage, Sr. Memorial Fund
- The Edward R. & Jo Anne M. Smith Endowment Fund
- Wm. Elliott and Mildred Smith Scholarship
- The Sohmen Chinese Scholars Program Endowment
- The Sohmen Endowed Scholarship Fund
- Fred S. Stradley Memorial Scholarship
- Strasburger & Price Council for Excellence Scholarship Endowment Fund
- Carl W. Summers, Jr., Endowment Fund
- The Hatton W. Sumners Foundation Scholarship Program
- The Louis Szep Endowed Memorial Fund
- Thompson & Knight Council for Excellence Scholarship Endowment Fund
- The Thompson & Knight Endowed Scholarship Fund
- The James Cleo Thompson, Sr. Endowed Scholarship Fund
- The John J. Tigert VI Endowed Memorial Scholarship Fund
- Vial, Hamilton, Koch & Knox Council for Excellence Scholarship Endowment Fund
- The Vinson & Elkins Endowed Scholarship Fund
- The Vinson & Elkins Endowed Scholarship Fund – 2002
- W.A. Rhea Scholarship Fund
- James L. and Catherine Nolan Walsh Scholarship Fund
- James L. Walsh, Jr. for the Support of the Law School
- Meade Whitaker Law Scholarship
- Winstead PC Council for Excellence Scholarship Endowment Fund
- The Robert A. Wooldridge Endowed Scholarship Fund

# Dedman School of Law: Enrollment and Academic Records

The standards herein are applicable to all students at the University and constitute the basic authority and reference for matters pertaining to University academic regulations and records management. Enrollment in the University is a declaration of acceptance of all University rules and regulations. A complete University Policy Manual is available at [www.smu.edu/policy](http://www.smu.edu/policy). Additional information regarding rules and regulations of the University can be found in this catalog. Undergraduate students must follow the University-wide requirements that are in effect for the academic year of matriculation to SMU. The applicable requirements of majors and minors are those in effect during the academic year of matriculation to SMU or those of a subsequent academic year. Students may not follow a catalog for an academic year in effect prior to their matriculation term. Students who are not enrolled for three or more years will return to SMU under the current catalog.

## General Policies

### Confidentiality of Education Records

The Family Educational Rights and Privacy Act of 1974 is a federal law that grants students the right to inspect, obtain copies of, challenge, and, to a degree, control the release of information contained in their education records. The act and regulations are very lengthy, and for that reason, SMU has issued its own FERPA-based guidelines that are available at the University Registrar's Office FERPA website [www.smu.edu/FERPA](http://www.smu.edu/FERPA). Policy 1.10 of the *University Policy Manual* also discusses this law.

In general, no personally identifiable information from a student's education record will be disclosed to any third party without written consent from the student. Several exceptions exist, including these selected examples: 1) information defined by SMU as directory information may be released unless the student requests through my.SMU Student Homepage that it be withheld, 2) information authorized by the student through my.SMU Student Homepage may be released to those individuals designated by the student and 3) information may be released to a parent or guardian if the student is declared financially dependent upon the parent or guardian as set forth in the Internal Revenue Code. Additional information is available at [www.smu.edu/FERPA](http://www.smu.edu/FERPA).

### Student File Number

The University assigns each student an eight-digit SMU identification number, which is used to verify each student's identity and is provided without additional charges. The student should furnish the SMU ID number on all forms when requested, as this number is the primary means the University has to verify the identity for each student's academic records and transactions related to the records.

### Name Change

A student who has a change in name must provide to the University Registrar's Office his or her Social Security card or the form issued by the Social Security Administration. A valid passport may also be used to complete a name change. Enrollment or records services for the student under a name different from the last enrollment cannot be accomplished without one of the above documents. All transcripts and diplomas are issued only under a person's legal name as recorded by the University Registrar's Office.

### Preferred Name

Students who wish to use a name other than their legal name can add a preferred name to their file in addition to their primary/legal name, or update a preferred name already on file, using the self service functions in the my.SMU Student Homepage. The University will make efforts to use the preferred name in communications and in the course of university business. However, there are situations that due to business practices, legal requirements or system limitations the use of a primary/legal name will be used.

SMU has many offices that keep records with student names and many data systems used for specific applications. In addition to updating their preferred name in my.SMU, students may need to notify some offices regarding their use of a preferred name.

A preferred name is a first, middle and/or last name that may be chosen to be used instead of legal first, middle and last name. There is no documentation required to create or change a preferred name. Students are advised that if they choose to use a preferred name, they should use it consistently and resist changing it frequently. Students also are advised that the use of a preferred last name can lead to confusion with employers and organizations in attempting to match official educational records with applications and it is recommended that students provide both their preferred and legal names on applications.

Here is a partial list of standard name usage:

Display name – my.SMU Student Homepage	Preferred name, if provided
Instructor Class Roster	Preferred name, if provided
Instructor Grade Roster	Preferred name, if provided
Canvas	Preferred name, if provided
Global Directory of email addresses	Preferred name, if provided
SMU online directory	Preferred name, if provided
SMU ID Card	Primary (legal) name -- under review
Financial Aid related forms and documents	Primary (legal) name
Official Academic Transcript	Primary (legal) name
Diploma	Primary (legal) name or derivative
Degree Verifications	Primary (legal) name
Housing / Residence Life	Preferred first name, Primary last name
SEVIS Reporting (international students)	Primary (legal) name

## **Email and Mailing Addresses, Telephone, and Emergency Contact**

Each student must provide the University Registrar's Office with both a home and local (mailing) address, both a home and local telephone number and contact information of a designated emergency contact using the self-service functions in the my.SMU Student Homepage. Students enrolling at SMU authorize the University to notify their emergency contacts in the event of a situation affecting their health, safety, or physical or mental well-being, and to provide these contacts with information related to the situation.

Students who enroll in an arranged section course will be asked to provide the University Registrar's Office with an off-campus study address. This is the physical location the student is living while enrolled in this course.

When a student applies for graduation and becomes a candidate they can provide a diploma address (address to which they would like their diploma mailed) to the University Registrar's Office.

International students are required to provide a residence address (physical street address where they are currently living) as their mailing (local) address. International students will be prevented from enrolling if a U.S. address is not provided.

Students are expected to keep current all their addresses and telephone numbers, including emergency contact details, through my.SMU, the University's Web-based self-service system. Students may be prevented from enrolling if their information is insufficient or outdated. Changes to parent information should be reported by contacting records@smu.edu, and the email should include the student's full name and SMU student ID number.

The University issues all students an email address. Students may have other email addresses, but the University-assigned email address is the official address for University electronic correspondence, including related communications with faculty members and academic units.

Official University correspondence may be sent to students' mailing addresses or SMU email addresses on file. It is the responsibility of students to keep all their addresses current and to regularly check communications sent to them since they are responsible for complying with requests, deadlines and other requirements sent to any of their mailing addresses on file or to their SMU email.

## Cell Phones

The University requests that students provide mobile/cell telephone numbers, as they are one means of communicating with students during an emergency. Mobile/cell telephone numbers may also be used by University officials conducting routine business. Students who do not have a mobile/cell telephone or do not wish to report the numbers should provide this information to the University through my.SMU Student Homepage. Students may be prevented from enrolling if their mobile/cell telephone numbers are not on file or if they have not declared "no cell" or "prefer not to report" in my.SMU.

## Ethnicity

SMU requires that a valid ethnic group category be on file for all students. SMU's policies and the Family Educational Rights and Privacy Act of 1974 protect the confidentiality and privacy of this information. A student's ethnic group category can be viewed in my.SMU Student Homepage.

**U.S. Citizens or Permanent Residents.** Ethnicity is self-determined. Students of multiple ethnic backgrounds may select multiple ethnic group categories. If the ethnic group value is incorrect, the student should go to the University Registrar's Office in the Laura Lee Blanton Student Services Building and complete an Ethnic/Racial Category Update Form

**International Students Living in the U.S. While Attending School.** Selecting an ethnic group category is not required unless the student becomes a U.S. citizen or permanent resident.

## Transcript Service

A transcript is an official document of the permanent academic record maintained by the University Registrar's Office. The permanent academic record includes all SMU courses attempted, all grades assigned, degrees received and a summary of transfer hours accepted. Official transcripts and certifications of student academic records are issued by the University Registrar's Office for all students. Copies of high school records and transfer transcripts from other schools must be requested from the institutions where the coursework was taken.

Transcripts are \$12.25 per copy. Additional copies in the same request mailed to the same address are \$3.50. Additional copies mailed to different addresses are \$12.25 a copy. PDF transcripts are \$16.00 per email address and are available only for students who attended after summer 1996.

**Note:** No incomplete or partial transcripts, including only certain courses or grades, are issued.

Transcripts cannot be released unless the student has satisfied all financial and other obligations to the University. Instructions for requesting a transcript to be mailed or picked up on campus are available at [www.smu.edu/registrar](http://www.smu.edu/registrar) ("Transcript Requests" link). A student may request his or her official transcript through the online my.SMU Student Homepage. Requests are processed through the National Student Clearinghouse. Telephone and email requests are not accepted. Students or their specified third party can pick up their transcripts at the University Registrar's Office, 101 Blanton Student Services Building.

Transcripts may be released to a third party as specified by the student on the Student's Consent for SMU to Release Information to Student's Specified Third Party form accessible at [www.smu.edu/LegalDisclosures/FERPA/Forms](http://www.smu.edu/LegalDisclosures/FERPA/Forms).

**Note:** Chapter 675, S.B. 302. Acts of the 61st Texas Legislature, 1969 Regular Session, provides as follows: *Section I.* No person may buy, sell, create, duplicate, alter, give or obtain; or attempt to buy, sell, create, duplicate, alter, give or obtain a diploma, certificate, academic record, certificate of enrollment or other instrument which purports to signify merit or achievement conferred by an institution of education in this state with the intent to use fraudulently such document or to allow the fraudulent use of such document. *Section II.* A person who violates this act or who aids

another in violating this act is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than \$1,000 and/or confinement in the county jail for a period not to exceed one year.

## **Veterans**

The University Registrar's Office certifies veterans each term for their benefits under federal programs, including the Yellow Ribbon Program. Most academic programs at SMU qualify for U.S. Department of Veterans Affairs benefits, making an SMU education accessible and affordable. Veterans are required to provide specific documents before they can be certified with the VA's Veterans Benefits Administration. Specific information regarding the certification process is available from the University Registrar's Office at [www.smu.edu/EnrollmentServices/Veterans](http://www.smu.edu/EnrollmentServices/Veterans).

The University complies with Title 38 United States Code Section 3679(e) which states that any individual who is entitled to educational assistance under chapter 31 (Vocational Rehabilitation and Employment) or chapter 33 (Post 9/11 GI Bill®) benefits will be permitted to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement (or "Statement of Benefits" obtained from the Department of Veterans Affairs' website – eBenefits, or a VAF 28-1905 form for chapter 31 authorization purposes) for said entitlement and ending on the earlier of the following dates: a) the date on which payment from VA is made to the institution; or b) 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility. SMU will not impose any penalties, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or require that a covered individual borrow additional funds to meet his/her financial obligation due to delayed disbursement funding from VA under chapter 31 or 33. However, if the anticipated funding from VA will not cover all tuition and fees, then the student is responsible for paying the difference immediately. Failure to do so may result in late or past due fees. Students who wish to be certified under chapter 31 or 33 must request in writing each semester that they wish to be certified and provide an updated statement of benefits. Additional documents are required to be submitted to the University upon initial request to be certified. See our website at [www.smu.edu/enrollmentservices/veterans](http://www.smu.edu/enrollmentservices/veterans).

## **Complaint Procedures for Students With Disabilities**

The complaint procedures for students with disabilities are available in the Disability Accommodations and Success Strategies office, Loyd Center, Suite 202, and online at [www.smu.edu/Provost/ALEC/DASS](http://www.smu.edu/Provost/ALEC/DASS).

## **Credit Hour Loads**

Each "credit hour" awarded generally reflects work over a 15 week period, including a period for exam review. It is the Dedman School of Law policy that each "credit hour" awarded reflects an amount of work equivalent to approximately 1) 50 minutes of direct faculty instruction or examination and 2) 120 minutes of out-of-class student work including study, preparation of assignments, review, or other course related activities. Seminar courses, clinics, externships and other courses involving substantial out-of-class required activities may have fewer minutes of direct faculty instruction per credit hour. The senior associate dean for academic affairs will periodically review faculty and adjunct syllabuses to assess compliance with this policy.

Enrollment for nine credit hours of coursework per term is recognized as a full load for students engaged in J.D. and eight credit hours for LL.M. graduate studies. Individuals who enroll for fewer than these minimum hours are designated as part-time students.

Per ABA Standard 310, the Dedman School of Law requires that for every credit hour, the student will be do an amount of work that approximates 42.5 hours of in and out of class work. Often for course-based work, that will take the form of one hour of classroom or direct faculty instruction and two hours of out-of-class work per week for 15 weeks, including the final exam. In calculating the time required, fifty minutes suffices for one "hour" of classroom or direct faculty instruction, but an "hour" for out-of-class student work is sixty minutes. Other credit-awarded work requires at least an equivalent amount of work.

A graduate student

- working on the completion of a thesis, dissertation or performance recital requirement on a full-time or part-time basis;

- enrolled in an internship or co-op program;
- enrolled as a third-year theatre major working on the completion of required production projects;
- or having an instructor appointment as part of a teaching fellowship, but not enrolled for the required number of hours;

may be certified as a full-time or part-time student if the student

- is enrolled officially for at least one course and
- is recognized by his or her director or academic dean or the dean for the Office of Research and Graduate Studies as working on the completion of the thesis, dissertation or internship requirement on a full-time or part-time basis.

In other special situations, a student not enrolled for the required number of hours may be certified as a full-time or part-time student if the student is officially enrolled for at least one course and is recognized by the academic dean or director as a full-time or part-time student, and if such recognition is approved by the provost.

**Cautionary Note:** Federal financial aid agencies and some other agencies require a minimum number of hours of enrollment for full-time status and do not make exceptions for summer, internship, co-op or student-teaching enrollments. Students on financial aid should consult an adviser in the Financial Aid Office regarding minimum enrollment requirements for their situation.

Likewise, international students on an F-1 or J-1 visa should consult an adviser in the International Student & Scholar Services office regarding minimum enrollment requirements for their situation.

**Minimum and Maximum Course Loads.** Minimum and maximum course loads allowed are based on the school of record.

## Stop Enrollment/Administrative Withdrawal

Insufficient or improper information given by the student on any admission or enrollment form – or academic deficiencies, disciplinary actions and financial obligations to the University – can constitute cause for the student to be determined ineligible to enroll or to be administratively withdrawn.

## Transfer Courses From Other Institutions

Information about transfer credit is found in this catalog in the Courses Outside the Dedman School of Law section and in the Grades and Credits section under Credit for Work Completed at Other Schools.

## Schedule Changes

The deadline for adding courses, dropping courses without grade record and changing sections for each enrollment period is listed on the Dedman School of Law Calendar. Students must seek the professor's permission to drop a class. Students have until noon of the last day of instruction to drop a class and receive a grade of *W*. The specific deadline is listed in the Dedman School of Law Calendar.

After the deadline date on the Dedman School of Law Calendar, the student may not drop a class. All schedule changes must be processed by the deadline date specified on the Dedman School of Law Calendar. **Note:** Schedule changes are not complete for official University record purposes unless finalized in the University Registrar's Office.

**Student-Athletes.** Students must consult with the Athletic Compliance Office prior to dropping a course. In the consultation, the student will review the effects the drop might have on his or her athletic participation and financial aid. After the consultation, the Athletic Compliance Office will update my.SMU to allow the student to process the drop, if necessary. The consultation is advisory; students are responsible for their enrollment. For assistance regarding scholarships or other aspects of being a student-athlete, students should contact the Office of the Assistant Athletic Director for Student-Athlete Development.

**International Students.** Students must consult with the International Student & Scholar Services office prior to dropping a course. (Contact [iss@smu.edu](mailto:iss@smu.edu) for consultation.) If dropping a course will cause the student to be enrolled in fewer than the required number of hours to remain a full-time student, the student's immigration status

could be affected. After the consultation, the International Student & Scholar Services office will update my.SMU to allow the student to process the drop, if necessary. The consultation is advisory; students are responsible for their enrollment.

**Students on Merit or Need-based Financial Aid.** Students should consult with their financial aid adviser prior to dropping a course. (See [www.smu.edu/EnrollmentServices/FinancialAid](http://www.smu.edu/EnrollmentServices/FinancialAid) for information regarding your financial aid counselor.) If dropping a course will cause the student to be enrolled in fewer than the required number of hours to remain a full-time student, the student's financial aid status may be affected. After the consultation, the student may drop a course through my.SMU Self-Service. The consultation is advisory; students are responsible for their enrollment. Questions regarding this procedure or financial aid should be directed to the Office of Financial Aid.

## Withdrawal From the University

Policies on refunds for withdrawal from the University are found in the Financial Information section of this catalog and in the *Financial Information Bulletin*. No refunds are made without an official withdrawal.

Students should be aware of the difference between a drop and a withdrawal and remember that they have different deadlines and separate financial policies. The deadlines for each are posted each term on the Dedman School of Law Calendar at [www.smu.edu/Law/Academics/Academic-Calendar](http://www.smu.edu/Law/Academics/Academic-Calendar). A *drop* occurs when a student removes one or more courses from his or her schedule and remains enrolled in at least one credit hour for the term. A withdrawal occurs when removing the course or courses will result in the student being enrolled in zero hours for the term.

A student who wishes to withdraw (resign) from the University before the end of a term or session must initiate a Student Petition for Withdrawal form and obtain approval from the assistant dean for student affairs. The assistant dean will then submit the form to the school's Registrar's Office. The effective date of the withdrawal is the date on which the Student Petition for Withdrawal is processed in the University Registrar's Office. Discontinuance of class attendance or notification to the instructors of intention to withdraw does not constitute an official withdrawal.

The enrollment of students who withdraw on or before the tenth class day of the fall or spring semester as listed on the Dedman School of Law Calendar will be canceled. Courses and grades are not recorded for canceled enrollments; however, the student will owe a portion of his/her tuition and fees. Additional information is available in the *Financial Information Bulletin*. A student who withdraws after the tenth class day of the fall or spring semester will receive the grade of *W* in each course in which he or she enrolled.

Medical withdrawals allow a prorated refund of tuition and fees and have conditions that must be met prior to re-enrollment at SMU. Medical withdrawals can only be authorized by professionals in the Dr. Bob Smith Health Center, Dean of Student Life, or Vice President for Student Affairs. The last day for a medical withdrawal is the last day of class instruction for the term from which the student is withdrawing. Retroactive medical withdrawals cannot be granted.

Mandatory administrative withdrawals occur when a student is not suspended but current and/or future enrollments are canceled or withdrawn. A student's academic record is annotated with "mandatory administrative withdrawal" and the effective dates for this withdrawal. Mandatory administrative withdrawals allow a prorated refund of tuition and fees and have conditions that must be met prior to re-enrollment at SMU. Mandatory administrative withdrawals can be authorized only by the Provost and Vice President for Academic Affairs, Vice President for Student Affairs or Dean of Student Life.

Withdrawing students living in SMU housing must check out of the residence halls with the Department of Residence Life and Student Housing per established procedures.

## **Excused Absences for University Extracurricular Activities and Religious Holidays**

Students who participate in officially sanctioned, scheduled University extracurricular activities or observe a religious holiday should be given an opportunity to make up class examinations or other graded assignments missed as a result of this participation or related travel. The manner in which examinations or other assignments missed because of these activities are to be made up is left to the discretion of each individual faculty member. However, students should not be penalized in any way for these excused absences and should be informed by the instructor at the beginning of the term, preferably in writing, of the instructor's makeup policy. It is the responsibility of the student to make arrangements with the instructor prior to any missed scheduled examination or other missed assignment for making up this work, and to obtain any class notes or other course material missed due to absence prior to taking any subsequent examinations or submitting any subsequent graded assignments.

This statement of University policy applies for all students. To minimize the difficulties caused for both student-athletes and their instructors by excused absences due to University-sanctioned athletic activities or related travel, the Athletic Department shall 1) make available to all student-athletes and their academic advisers prior to registration a copy of the student's activity and travel schedule for the upcoming term, so as to facilitate the student's enrollment in class sections that will minimize activity and travel conflicts; and 2) require all student-athletes to provide a copy of that term's activity and travel schedule, and a copy of this Statement of University Policy, to each of their instructors at the first class meeting of the term.

Other University colleges and departments whose students will miss classes because of their participation in officially sanctioned, scheduled University extracurricular activities, related travel, or observing of religious holidays are encouraged to adopt similar procedures to minimize the difficulties caused by such absences.

A list of religious holidays for use in requesting excused absences is available on the Official University Calendar. Students must notify the class instructor in writing by the 12th day of the term of any such absences that will occur during that term. Accommodations are to be made without penalty. More information can be found in the *University Policy Manual*, available at [www.smu.edu/policy](http://www.smu.edu/policy).

## **Absence Due to Illness**

The Dr. Bob Smith Health Center does not provide documentation for granting excused absences from class. If students are absent for illness, they should talk to their professors about how they might catch up with the material missed. If students are seriously ill and require hospitalization or an extended absence, students should talk to their professors and the assistant dean for student affairs to decide how to deal with the interruption in their studies.

## **Transfer Coursework**

Policies for transfer credit are found in this catalog in the Courses Outside the Dedman School of Law section and in the Enrollment and Academic Records section under Credit for Work Completed at Other Schools.

## **Commencement Participation**

An All-University Commencement Convocation is held in May for students enrolled and on schedule to complete degree requirements during the spring term. Students enrolled and on schedule to complete all degree requirements during the following summer session may also participate in the University Commencement Convocation, although their degrees will not be conferred until August. Students may also participate in departmental or school ceremonies according to the policies of the departments or schools.

An All-University December Commencement Convocation is held each year for students completing degree requirements during the fall term. Students who completed degree requirements during the previous summer session may also participate. Students on schedule and enrolled to complete all degree requirements during the following Jan Term (January) intersession may also participate in the December ceremony, although their degrees will be conferred in January.

A student may participate once in either the All-University Commencement Convocation in May or the All-University December Commencement Convocation for a given degree, but not both.

## **Dedman School of Law Policies and Procedures**

### **Visiting Students**

To be a visiting student at the Dedman School of Law, an applicant must be in good standing at an accredited law school and have permission to visit. Students who meet these requirements will be admitted so long as space is available. Visiting student applicants must submit a visitor application via LSAC's application service, a dean's letter of good standing and permission to visit and a statement articulating the reasons for wanting to visit the Dedman School of Law.

### **Nondegree Enrollment and Auditors**

#### **Nondegree Enrollment**

An attorney holding a valid U.S. license to practice law or a graduate of an American Bar Association-approved law school may enroll for credit in a course at the Dedman School of Law, though not seeking a degree, on a space-available basis with the permission of the instructor. A nondegree enrollee must participate in class and complete all work required of degree students in the course. A grade will be awarded and placed on a transcript. Applicable tuition and fees must be paid at enrollment. Credit earned in this category cannot be applied to a Dedman School of Law degree program. Information on course availability can be obtained through the school's Registrar's Office.

#### **Auditors**

An attorney holding a valid U.S. license to practice law or a graduate of an American Bar Association-approved law school may audit a course at the Dedman School of Law on a space-available basis with the consent of the instructor. The instructor will determine the extent, if any, of permitted participation in class discussion. An auditor may not submit a research paper, sit for an exam or receive academic credit. Audited courses are not recorded or placed on a transcript. An auditor must pay the applicable per hour tuition and fees in full prior to attendance. Information on course availability can be obtained through the school's Registrar's Office. In special circumstances and with the consent of the instructor, the assistant dean for student affairs and the senior associate dean for academic affairs, other students may be permitted to audit a course in accordance with the above requirements and any other requirements imposed by the instructor, the assistant dean for student affairs or the associate dean for academic affairs.

### **Enrollment**

#### **Enrollment Periods**

The times for enrollment are announced by the Dedman School of Law Registrar's Office. Students who fail to enroll during the announced enrollment period will be charged a late enrollment fee.

#### **Minimum and Maximum Hours**

Generally, except for those students enrolled for a reduced course load, first-year students are required to take 16 credit hours in the fall term and 16 credit hours in the spring term. Beyond the first year, a student normally will take no fewer than 12 and no more than 17 credit hours in a regular term and no more than eight credit hours in the May term, Summer term, and August term combined. Students may take more than 16 credit hours in a regular term only with permission of the assistant dean for student affairs. Under no circumstances will a student be permitted to take more than 17 credit hours in a regular term.

#### **Adding and Dropping a Course**

A student may add or drop a course during the periods set forth in the Dedman School of Law Calendar.

**Dropping a Course: Grading** – A student may withdraw from a course at any time with the permission of the instructor. Students enrolled in required first-year courses (found in this catalog under The Curriculum) must also obtain the permission of the assistant dean for student affairs to withdraw from a course. If the student withdraws from a course

before noon on the last day of classes, the student will ordinarily receive no grade for the course. If a student withdraws from a course after noon on the last day of classes, the student will ordinarily receive a failing grade for the course.

## **Withdrawal From the Dedman School of Law**

**Withdrawal** – Withdrawal means the student's enrollment is canceled and the student is no longer enrolled for any classes. If a student is enrolled for only one course, dropping this course constitutes withdrawal from the Dedman School of Law and is subject to the penalties. The student must contact the Dedman School of Law Registrar's Office in writing to withdraw. The effective date of the withdrawal is the date the Student Petition for Withdrawal is processed in the Registrar's Office. This date is the date used for credit or refund purposes. Information on the consequences of withdrawal on grading and readmission is found under The Juris Doctor Program in the Withdrawal, Re-entry and Readmission section.

**Credit or Refund** – A credit or refund will be issued if notification is received prior to the close of the business day according to the following schedules:

<i>Effective Date</i>	<i>Fall and Spring Terms</i>
Prior to first day of term	100%
1st–5th day of term	90%
6th–10th day of term	50%
11th–15th day of term	25%
16th–20th day of term	10%
After the 20th day of term	0%

<i>Effective Date</i>	<i>Summer Term</i>
Prior to first day of term	100%
1st–2nd day of term	50%
After the 2nd day of term	0%

## **Classroom Work, Attendance and Examinations**

### **Classroom Work and Assignments**

Students are expected to prepare all assignments and to participate in classroom discussions. The instructor may exclude a student from a course for poor classroom performance, for failure to meet attendance requirements, for improper conduct in the classroom or for failure to prepare assignments. In such cases, the student will receive a failing grade in the course.

### **Attendance**

Regular and punctual class attendance is necessary to satisfy residence and class hours requirements.

### **Rescheduling of Examinations**

The assistant dean for student affairs may reschedule a student's examination in the event of an emergency. Two or more examinations in close time proximity do not constitute an emergency.

### **Use of Laptop Computers on Examinations**

The use of laptop computers during examinations, using specially provided software, is allowed subject to any restrictions imposed by the instructor.

### **Accommodations in the Classroom and on Examinations**

If a student is requesting academic accommodations for a disability, he or she must first contact the Disability Accommodations and Success Strategies Office (DASS) at the Altshuler Learning Enhancement Center to verify the disability and to establish eligibility for accommodations. Once registered with DASS, the student must then provide

the letter of accommodation to the Dedman School of Law's assistant dean for student affairs to put accommodations in place at the law school. Reasonable accommodations will be offered to students with disabilities, upon request.

## Grades and Credits

### Methods of Grading

Students enrolled in the Dedman School of Law receive letter grades:

<i>A</i>	4.0
<i>A -</i>	3.7
<i>B +</i>	3.3
<i>B</i>	3.0
<i>B -</i>	2.7
<i>C +</i>	2.3
<i>C</i>	2.0
<i>C -</i>	1.7
<i>D</i>	1.0
<i>F</i>	0.0

### Minimum Passing Grade

The minimum passing grade is *D* or 1.0, and an average grade of *C* or 2.0 is necessary for graduation. Detailed information is found in this catalog under The Juris Doctor Program in the section Requirements for Degree: Hours and Grades.

### Incompletes

A student may receive a grade of *I* (Incomplete) if, for some justifiable reason acceptable to the instructor, the student has been unable to complete the requirements of the course. The maximum period of time allowed to clear the grade of *I* (Incomplete) is 12 months. If the Incomplete grade is not cleared by the date set by the instructor or by the end of the 12-month deadline, the grade of *I* will be changed to the grade provided by the instructor. If no alternative grade is provided, the grade of *F* will be recorded.

The grade of *I* is not given in lieu of a grade of *F* (Fail), *W* (Withdraw) or other grade, each of which is prescribed for other specific circumstances. The grade of *I* does not authorize a student to attend the course during a later term. Graduation candidates must clear all Incomplete grades prior to the deadline in the Official University Calendar, which may allow less time than 12 months. Failure to do so can result in removal from the degree candidacy list.

The senior associate dean for academics may, with the instructor's permission, waive the 12-month time period of this policy under extraordinary circumstances.

### Method of Computing Averages

The grade in a course will be weighted by the credit hours in the course. The computation will include marks from all courses in which the student has taken the final examination or received a final grade, regardless of whether credit in a particular course is necessary to meet the requirements for graduation. When a course is repeated, both grades will be used in the computation. A course may not be repeated if the student has previously received credit for the course. Only Dedman School of Law courses will be used in the computation.

### Credit for Work Completed at Other Schools

Official college transcripts are required for all college-level work attempted, regardless of transferability. Military transcripts are also required for students receiving VA benefits; more information is available at [www.smu.edu/registrar](http://www.smu.edu/registrar) ("Veterans Affairs" link). Students are responsible for making sure a transcript of all transfer work attempted is sent to the University Registrar's Office immediately following completion of the work.

Dedman School of Law will not grant credit for any coursework completed prior to a student's matriculation in a J.D. program at an American Bar Association-approved or Association of American Law Schools-approved law school. While enrolled at the Dedman School of Law, students may earn up to eight credit hours at other ABA-approved law schools outside the Dallas-Fort Worth area during the summer. Students interested in this option must make application through the school's Registrar's Office to the assistant dean for student affairs and may be charged an administrative fee.

In extraordinary circumstances, a student may be granted permission to attend another law school for his or her final term or year of law school while still receiving an SMU degree. Permission to apply to another school must be obtained through the school's Registrar's Office from the assistant dean for student affairs. Permission will not be granted without evidence of compelling personal circumstances that require a student's relocation. The Dedman School of Law reserves the right to designate the schools to which a student may apply, to approve the courses taken at the other law school, to limit the number of students to whom permission is granted and to charge an administrative fee.

The school will consider student applications to study abroad at internationally recognized law programs. Each student's application will be considered on a case-by-case basis and must meet all the requirements of the ABA criteria, with particular emphasis on the need for the student's proposed course of study abroad to further his or her legitimate academic or career objectives.

## Residence

Six residence credits are required for graduation. One residence credit will be given for each term in which the student passes at least 12 credit hours. Three-quarters of a residence credit will be given for passing nine to 11 credit hours. One-half of a residence credit will be given for passing six to eight credit hours. One-quarter of a residence credit will be given for passing three to five credit hours. One-half of a residence credit will be given for successfully completing five credit hours at the Oxford Summer Program. Credits taken in the May term, Summer term, and August term will be combined for residence credit purposes.

## Student Employment

The full-time study of law is designed to require substantially all of the student's time during the academic year. Excessive employment may lead to academic disappointment or failure. Hence, the Dedman School of Law encourages full-time law students to limit outside employment to no more than 20 hours per week. First-year students should not work at all, but if employment is absolutely necessary, they should limit their hours to 10 per week.

## Withdrawal From the Dedman School of Law

**In Good Standing.** A student may voluntarily withdraw in good standing from the Dedman School of Law before noon on the last day of classes in a term or summer session. In this event, no credit will be given. A student who is failing a course, either because of academic work or because of poor performance at the time of withdrawing from school, will receive either a failing grade or no grade, at the discretion of the instructor. Additional information is found in this catalog under Enrollment and Academic Records.

Additional information is found under Withdrawal From the University.

## Re-entry or Readmission

### Students Who Left in Good Standing

**Re-entry.** Students who withdraw while in good standing after completing at least one term in this law school may re-enter to continue their studies without re-examination of their entrance credentials if such re-entry is approved by the assistant dean for student affairs and re-entry occurs within 24 calendar months after the date of withdrawal. Students who have completed only the first term at the Dedman School of Law may re-enter only in the spring term. The 24-calendar-month deadline for re-entry is extended by any time spent after withdrawal in active U.S. military service.

**Readmission.** Students who withdraw and do not meet the requirements for re-entry may apply to the admissions committee for readmission. If readmission is granted, these students must meet the graduation requirements in effect at the date of readmission.

## **Academic Probation, Dismissal, and Readmission or Re-entry (Dismissed Students)**

In this section, "term" includes the summer session. Information on the method of computing grade averages is found in this catalog under Enrollment and Academic Services.

### **Dismissal After the First Term**

**Dismissal After the First Term.** A student whose overall grade average at the end of the first term at the Dedman School of Law is less than 1.0 is automatically dismissed.

**Dismissal After Two or More Terms.** A student whose overall grade average at the end of two or more terms is less than 1.8 is automatically dismissed.

### **Probation**

A student whose overall grade average at the end of any term at Dedman School of Law is 1.8 or more but less than 2.0 shall be on probation.

A student who is placed on probation is automatically dismissed unless at the end of the next term the student's overall grade average is 2.0 or more or unless the student obtains a grade average for that term of 2.3 or more.

### **Re-entry and Readmission of Dismissed Students**

**Re-entry.** A student who is dismissed for unsatisfactory academic performance may petition the admissions committee for re-entry. Petitions for re-entry are granted only in extraordinary circumstances. A petition for re-entry, if granted, permits a student to continue his or her legal education at the point he or she was dismissed. A copy of the re-entry guidelines established by the admissions committee is available from the Dedman School of Law Registrar's Office and on the Academic's page of the Dedman School of Law website.

**Readmission.** A student who is dismissed for unsatisfactory academic performance may petition the admissions committee for readmission. Petitions for readmission are granted only in extraordinary circumstances. A petition for readmission, if granted, permits a student to begin his or her legal education from the beginning. A copy of the readmission guidelines established by the admissions committee is available from the Dedman School of Law Registrar's Office and on the Academics page of the Dedman School of Law website.

### **Mandatory Academic Counseling**

A student with a cumulative GPA below 2.7 is required to consult with the assistant dean for student affairs or the director of academic success prior to each fall, spring and summer enrollment regarding the student's proposed schedule. The assistant dean for student affairs or the director of academic success may require the student to enroll each term in up to three courses that are tested on the Texas bar examination.

### **Academic Success Program**

The Academic Success Program (ASP) provides skills training and support for students at all stages of their law school education. The program is focused on helping students maximize their potential for learning the law while acquiring effective study skills as well as aiding students in developing their ability to perform legal analysis.

## **Degree Requirements**

### **Residence**

Six residence credits are required for graduation. Detailed information is found under The Juris Doctor Program in the Enrollment and Academic Records section. Information on the requirements concerning attendance at other law schools is found under The Juris Doctor Program in the Admission With Advanced Standing section and in the Visiting Students section.

## **Hours and Grades**

Candidates must earn 87 credit hours of credit (with grades of D or 1.0 or higher) with an overall average grade of C or 2.0 or more. All credit hours must be earned at this school, except for students admitted with advanced standing and students approved to study at other law schools. All students must earn a minimum of 58 credit hours of credit at this school. Additional information is found in this catalog in the section Enrollment and Academic Records.

## **Courses**

The following requirements must be fulfilled: LAW 6405 - Civil Procedure; LAW 6366 - Constitutional Law I; LAW 8311 - Constitutional Law II; LAW 8290 - Contracts I; LAW 8390 - Contracts II; LAW 8341 - Criminal Law; LAW 8375 - Legal Research, Writing, and Advocacy I; LAW 8376 - Legal Research, Writing, and Advocacy II; LAW 6365 - Legislation and Regulation; LAW 6404 - Property; LAW 7350 - Professional Responsibility; LAW 6403 - Torts; an edited writing seminar; the general writing requirement; and the experiential learning requirement. If a student fails to receive a minimum passing grade in a required course, the student must repeat the course the next time it is offered.

## **Public Service Requirement**

All students must complete a minimum of 30 hours of law-related public service to be eligible to graduate. Students may perform this service after they have completed two semesters of law study. All such service must be performed at an approved service placement. The Dedman School of Law's Public Service program director is charged with arranging for approved public service placements for students. Public service used to fulfill this requirement cannot be compensated work nor can it be work for which academic credit or student organization points are awarded.

## **Time Limit**

All requirements must be met in the Dedman School of Law, or another approved law school, within 60 months or five years from commencing law school. In computing the period, any time during which the candidate was in active U.S. military service shall be excluded.

## **Effects of Changes in Requirements**

A student must meet the residence and grade requirements in effect at the time that the student enters. The student will not be affected by later changes in these requirements. Other requirements may be changed from time to time with such applicability as the faculty determines.

## **Waivers**

Waivers of requirements may, for good cause, be granted by the assistant dean for student affairs. Requests should be made in writing, with all relevant information and reasons, to the assistant dean for student affairs.

## **Honors**

The Order of the Coif is a national law-school scholastic honor society. Not more than 10 percent of all graduates during the academic year may be elected to membership by vote of the faculty.

Candidates for the J.D. degree having superior grades may by vote of the faculty be awarded the degree cum laude, magna cum laude or summa cum laude. The average grade shall be based on work done in this school only, but, to receive the degree with honors, a transfer from another law school must have at least an average grade of B in law courses at the school previously attended. The minimum grade averages for honors are cum laude – 3.2, magna cum laude – 3.6 and summa cum laude – 3.8.

## **Grade Appeals**

1. The award of a grade is a matter solely within the academic discretion of the faculty member. A student who believes that the assigned grade is incorrect must first discuss the matter with the faculty member who awarded the grade.
2. A faculty member may change a grade that has been submitted to and recorded by the Dedman School of Law registrar only for reasons of mathematical error. A faculty member who wishes to change a grade for reasons of mathematical error shall submit the proposed change along with a brief statement of the reasons

- for the change to the senior associate dean for academic affairs, who shall approve all grade changes for mathematical error and report them to the Dedman School of Law registrar.
3. A faculty member who wishes to change a grade for reasons other than mathematical error must seek the permission of the faculty, which grants such requests only in extraordinary circumstances.
  4. If the faculty member decides not to seek a grade change, the student may petition the senior associate dean for academic affairs for a review of the faculty member's decision. The senior associate dean may not change a grade, even with the consent of the faculty member who awarded it. If, after discussion of the matter with the senior associate dean, the faculty member decides to seek a grade change, he or she may proceed as described in paragraph 2 or 3, as appropriate. The senior associate dean will then report the faculty member's decision to the student.
  5. If, after discussion of the matter with the senior associate dean, the faculty member decides not to pursue a grade change, the student may petition the dean for a review of the faculty member's decision. The dean may proceed as he or she deems appropriate. The dean may not ask another person to review the grade without the permission of the faculty member who awarded it. The dean may not change a grade even with the consent of the faculty member who awarded it. The dean may bring the matter before the faculty. However, the faculty may not change the grade without the consent of the faculty member who awarded it. If, upon reconsideration, the faculty member decides that the grade was not accurately determined mathematically or is incorrect for any other reason, he or she may proceed as described in paragraph 2 or 3, as appropriate.
  6. If there is evidence of unethical or incompetent behavior on the part of a faculty member in the award of a grade, the dean or faculty may refer the matter to the Committee on Ethics and Tenure of the Faculty Senate, with a request that the committee may recommend to the dean or faculty whatever action it considers appropriate. The faculty may change a grade without a faculty member's consent only upon the recommendation of the Committee on Ethics and Tenure of the Faculty Senate.
  7. Should the student be convinced that his or her complaint has not been fairly decided by the dean or the faculty, he or she may bring the matter to the attention of the provost. The provost may proceed, as he or she deems appropriate. However, the provost may not ask another person to review the grade without the permission of the faculty member who awarded the grade. The final authority in matters of academic judgment in the determination of a grade rests with the individual faculty member.
  8. A student who wishes to institute a grade appeal must file a formal appeal request in writing with the senior associate dean for academic affairs no later than 60 days after the grade in question is posted to the student's transcript. No grade appeals will be considered unless this written appeal is delivered within this 60-day period.
  9. These provisions are the sole rules that govern the Dedman School of Law course grade appeals at Southern Methodist University.

## **Courses Outside the Dedman School of Law**

Graduate-level courses that are offered in other graduate or professional schools of the University and are relevant to the student's program may be taken with approval of the assistant dean for student affairs, who shall also determine Dedman School of Law credit equivalents to be awarded for such study. Except with respect to students in joint degree programs, no more than six hours may be awarded toward Dedman School of Law hours required for graduation. Additional information is available from the school's Registrar's Office.

## **Courses at Other Law Schools**

Information about transfers from other law schools is found in this catalog under The Juris Doctor Program in the section Admission With Advanced Standing. After entry into the Dedman School of Law, summer courses in other law schools may be taken for transfer of credits with prior approval of the assistant dean for student affairs. Transfer credits may be earned in regular terms only in extraordinary circumstances of demonstrated special need. Detailed information is found under Enrollment and Academic Records. Additional information is available from the school's Registrar's Office.

# Dedman School of Law: Student Life and Housing

## The Division of Student Affairs

The Division of Student Affairs ([www.smu.edu/studentaffairs](http://www.smu.edu/studentaffairs)) creates and supports a robust student experience and forges strategic partnerships to best serve the entire SMU community. As educators and scholar-practitioners, we create purposeful learning and leadership opportunities for students to clarify and develop their knowledge, values, skills, and identities – challenging each to become a world changer. The Division of Student Affairs is comprised of five different organizational units that each provide unique educational and supportive resources for students during their time at SMU: Student Wellbeing and Support, Student Engagement and Success, Residence Life and Student Housing, Religious Life, and the Hegi Family Career Development Center.

## Student Wellbeing and Support

### Health Services

[www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)

The Dr. Bob Smith Health Center provides SMU students with campus access to quality, comprehensive and student-centered medical care, mental health services, and outreach programs designed to promote their health and wellbeing. The new 33,000 square foot state-of-the-art clinic facility is centrally located on campus at 6211 Bishop Boulevard. The Health Center is certified by the Accreditation Association for Ambulatory Health Care (AAAHC) for meeting rigorous nationally recognized standards and committing to delivering the highest quality of care.

**Medical Services.** The Dr. Bob Smith Health Center provides a wide range of health services allowing students to receive primary care on campus. Services available include the treatment of acute illnesses, care of injuries, minor medical procedures, physical exams, STD testing, vaccinations, allergy injections, and limited specialty services. Additional ancillary services include a clinical laboratory, an on-site pharmacy, X-ray imaging and diagnostic services, and a part-time sports medicine clinic. For appointments and health information, students may call 214-768-2141 or visit [www.smu.edu/healthcenter](http://www.smu.edu/healthcenter).

**Acute/After Hours Care.** Students should call 911 for immediate response to life-threatening injuries or illnesses. For other urgent concerns after clinic hours, students should seek a local hospital or urgent care center. A listing of several hospital emergency rooms and after-hours urgent care facilities is provided for general reference on the Health Center website ([www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)).

**Costs.** The Health Services Fee, which is included in general student fees, covers routine medical visits and counseling appointments at the Health Center. Charges are assessed separately for lab services, x-rays, immunizations, medical supplies, pharmacy and specialty care. Claims are filed for students participating in the SMU Student Health Insurance Plan. Students with other insurance plans may request an itemized receipt in order to submit a claim for insurance reimbursement. The Pharmacy files claims for most insurance plans.

**Mandatory Health Insurance Policy.** SMU students are required to maintain insurance coverage as a condition of their enrollment. The University offers the SMU Student Health Insurance Plan (SHIP), which is administered by the Health Center's Student Insurance Office. The plan provides coverage at a reasonable cost for most on- and off-campus health care. Information is available at [www.smu.edu/healthinsurance](http://www.smu.edu/healthinsurance).

Domestic students taking nine or more credit hours and international students taking one credit hour or more are automatically enrolled in the Student Health Insurance Plan (SHIP) each semester unless they expressly waive coverage in their my.SMU account. Information about the waiver deadline is available online at [smu.edu/healthinsurance](http://smu.edu/healthinsurance). Domestic students taking between one and eight credit hours are eligible to enroll in the Student Health Insurance Plan on a voluntary basis.

**Pharmacy.** A full service pharmacy is conveniently located in the Dr. Bob Smith Health Center to meet students' prescription needs from 8:30 a.m. to 5:00 p.m., Monday through Friday. The pharmacy is in network with most insurance plans. Prescriptions and refills may be transmitted directly to the pharmacy from the student's physician.

**Immunizations.** All students (undergraduate, graduate, part-time and full-time, to include international and IEP/ESL students) are required to have an SMU medical history form on file in the Dr. Bob Smith Health Center before registration. (Health history forms are available on the Health Center's website at [www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)). All students must also submit - to the Health Center - immunization records that provide proof of two doses of the vaccine against measles, mumps and rubella. These MMR immunizations must be documented by a physician, public health record, military health record or school health record. Students will not be allowed to register without immunization compliance.

Texas state law requires all new students entering an institution of higher education under the age of 22 to provide proof of immunization for bacterial meningitis. The meningitis vaccine or a booster dose must have been received during the five-year period prior to enrollment and not less than ten days before the start of classes. Students seeking exemption from this requirement due to health risk or conscience, including religious belief, should see the second page of the SMU medical history health form. More information is found under Final Matriculation to the University in the Admission to the University section of this catalog.

All required immunizations may be obtained at the Health Center.

**Class Absence Due to Illness.** The Health Center does not issue excuses from classes for illness. Please refer to the Health Center website ([www.smu.edu/healthcenter](http://www.smu.edu/healthcenter)) for the Class Excuse Policy.

**Confidentiality and Privacy.** Confidentiality and privacy of student health information is of paramount importance at the Dr. Bob Smith Health Center. The Health Center follows all applicable state and federal laws related to the disclosure of medical and mental health information, and applies to the highest professional standards of care and privacy. All student-patient health service records are confidential. No information about a student can be released to any third party without the student's written permission.

**Release of Medical Information.** Patient health information and medical records are released only with a written release by the student. Students may sign a release allowing the Health Center to provide specific medical information with their parents, significant others or health care representatives.

**Health Education and Promotion.** The Health Center's Office for Community Health and Promotion serves as a resource to enhance the well-being of SMU students in support of their learning and success. Health information is presented through engaging programs and services to help students make informed and healthy choices. The Health Center works with students to promote activities that create a healthy environment for the SMU community.

**Counseling Services.** The Health Center provides crisis intervention, individual and group therapy, psychiatric evaluation and counseling referrals for SMU students. Use of all services is voluntary and strictly confidential. There is no charge to students who have paid the University health fee. Students can seek confidential help for concerns such as anxiety, depression, relationships, career/life planning, sexual identity, eating/body image and sexual assault/sexual harassment. Alcohol and drug prevention is a free and confidential source of help and information to the SMU community, covering issues related to substance abuse and addiction. Any laboratory tests or pharmaceuticals ordered will be charged to the student. For more information regarding scheduling appointments, students should call 214-768-2277 or visit [www.smu.edu/counseling](http://www.smu.edu/counseling).

**Testing Services.** Testing Services offers fee-based testing to the Dallas-area community. These services include on-campus administration of national testing programs such as the LSAT, MPRE, GRE and others. Other testing offered includes credit by exam (CLEP), and correspondence examinations for local distance learners enrolled in other universities. For additional information, students should visit [www.smu.edu/testingprogram](http://www.smu.edu/testingprogram) or call the center at 214-768-2269.

## **Dedman Center for Lifetime Sports**

[www.smu.edu/recsports](http://www.smu.edu/recsports)

The Dedman Center for Lifetime Sports provides aerobic studios, an indoor running track, basketball courts, volleyball courts (indoor and outdoor), racquetball courts, a climbing wall, a bouldering wall, a 25-yard recreational pool with

five lanes, 15,000 square feet of fitness and weight equipment and a Starbucks in the lobby area. These facilities are open to SMU students, faculty, staff and paying members.

**Facilities/Operations.** The center is a 170,000 square foot facility designed for recreational sports, wellness, programs and the traditions and spirit of SMU.

**Aquatics.** SMU Aquatics features a five-lane, indoor recreational pool and an out-door, zero-depth entry fountain pool known as "The Falls." Students have opportunities to participate year-round in recreational swimming, sunbathing and water sports such as water basketball, volleyball and polo. Classes offered include water fitness, adult and child swimming lessons, children's group lessons, and American Red Cross lifeguard training.

**Programs.** A variety of services and programs are available, including club sports, fitness classes, intramural sports and the Outdoor Adventure program.

**Club Sports.** Club sports offer an opportunity for students interested in concentrated training and participation in a sport. These recognized student organizations offer competition with other university/college club teams in baseball, cycling, ice hockey, men's and women's lacrosse, polo, rugby, men's and women's soccer, triathlon, ultimate Frisbee, volleyball, wakeboarding and water polo.

**Fitness.** SMU Fitness offers group exercise classes and personal training sessions. Group X exercise classes are offered throughout the day to accommodate a variety of schedules. Different types of cardio, strength and flexibility classes are available. Experienced and knowledgeable personal trainers offer sessions to train members of the University community, either one-on-one or in groups, to meet their personal fitness goals. All SMU Fitness programs have a fee for participation.

**Intramural Sports.** Many opportunities for team and individual competition are available through intramural sports such as golf, racquetball, tennis, and dodgeball. The five major sports are flag football, volleyball, basketball, soccer and softball. Leagues provide year-round opportunities to participate in a wide variety of sports and activities. Additional leadership opportunities are available for those interested in officiating or supervising various activities.

**Outdoor Adventure.** SMU Outdoor Adventures is the campus source for outdoor recreation and adventure, offering fun and challenging recreational adventure activities, community-building programs, and student leadership and personal growth opportunities. Students can sign up for SMU OA trips offering traditional and non-traditional outdoor adventure pursuits such as backpacking, rock climbing, caving and canoeing. SMU OA also manages the SMU Climbing Center, the indoor climbing and bouldering facility and the Portable Challenge and Team Development course.

**Spirit/Traditions.** The Recreational Sports Department houses the spirit and traditions of SMU including the Cheer Squad, Mustang Band, Peruna, Pom Squad and the Rotunda Yearbook.

**Mustang Band.** Founded in 1917, the Mustang Band was named the "Best College Marching Band" in Texas in Kirk Dooley's Book of Texas Bests. Long known as "the hub of SMU spirit," the band represents the University at football and basketball games, produces the Pigskin Revue during Homecoming and performs at special University- and community-related events. Membership is open to all SMU students by audition, regardless of major and scholarships based on need and ability are available.

**Rotunda Yearbook.** For over 100 years, the Rotunda Yearbook has chronicled the history of Southern Methodist University. Named in December 1915 after the architecture of Dallas Hall, the Executive Council of the Student Association voted for the annual's name after seven different students suggested it. From its beautiful art to captivating themes, the Rotunda has evolved with the times, earning national awards and recognition from the Associated Collegiate Press (ACP) and Columbia Scholastic Press Association (CSPA).

**Spirit Squads.** Members are full-time students who dedicate their time, energy and athleticism to support Mustang Athletics.

The Cheerleading Squad is a highly competitive team consisting of 20 to 30 young men and women. Twenty of the team's members compete at NCA College Nationals held in Daytona Beach, Florida where the squad placed first in 2016, 2017 and once again in 2018.

The Pom Squad is well known for their energetic performances and their ability to entertain a crowd. The dancing style of the team includes jazz, pom and hip-hop.

Peruna IX (2011-PRESENT) is the beloved mascot of the university and is accompanied by Peruna handlers that lead him across the field during football games. The Human Peruna Mascot is the costumed hero that represents SMU, and is a traditional accessory to Peruna IX.

## **Academic Integrity and Code of Conduct**

### **The Honor Code of Southern Methodist University**

Intellectual integrity and academic honesty are fundamental to the processes of learning and of evaluating academic performance, and maintaining them is the responsibility of all members of an educational institution. The inculcation of personal standards of honesty and integrity is a goal of education in all the disciplines of the University.

The faculty has the responsibility of encouraging and maintaining an atmosphere of academic honesty by being certain that students are aware of the value of it, understand the regulations defining it and know the penalties for departing from it. The faculty should, as far as is reasonably possible, assist students in avoiding the temptation to cheat. Faculty members must be aware that permitting dishonesty is not open to personal choice. A professor or instructor who is unwilling to act upon offenses is an accessory with the student offender in deteriorating the integrity of the University.

Students must share the responsibility for creating and maintaining an atmosphere of honesty and integrity. Students should be aware that personal experience in completing assigned work is essential to learning. Permitting others to prepare their work, using published or unpublished summaries as a substitute for studying required material, or giving or receiving unauthorized assistance in the preparation of work to be submitted are directly contrary to the honest process of learning. Students who are aware that others in a course are cheating or otherwise acting dishonestly have the responsibility to inform the professor and/or bring an accusation to the Honor Council.

Students and faculty members must share the knowledge that any dishonest practices permitted will make it more difficult for the honest students to be evaluated and graded fairly and will damage the integrity of the whole University. Students should recognize that their own interests and their integrity as individuals would suffer if they condone dishonesty in others.

### **Code of Conduct**

The following are University procedures and standards with which every student must become familiar. The University considers matriculation at SMU an implicit covenant and a declaration of acceptance on the part of the student of all University regulations. The Student Conduct & Community Standards Office, website [www.smu.edu/studentconduct](http://www.smu.edu/studentconduct), promotes community, scholarship and civility by holding students accountable to the Student Code of Conduct and the Honor Code.

Standards of conduct are established through faculty, student and administrative efforts and are under continuous evaluation by the entire University community in order to assure reasonable and fair limits. At SMU, the student is assumed to have a high degree of loyalty and responsibility to the University and its well-being, as well as to himself or herself in personal, social and intellectual pursuits; the student's behavior both on and off campus is evidence of this.

Students at SMU will discover that they are encouraged to exercise a great amount of personal freedom as well as accompanying responsibilities. Through their personal capacities for intelligent thought and action, mature students understand that there are situations in which certain behavior must be modified for the benefit of others. The University stands firm in its commitments to the rights and freedoms of students, expecting in return the same respect and concern.

Due respect for the entire University community, faculty, staff and one's fellow students is always expected. The University expects all students to be responsible citizens and to abide by all federal, state and local laws. The

University Code of Conduct applies to students both on and off campus. It is the University's expectation that students will avoid behaviors such as, but not limited to, the misuse of drugs and alcohol, dishonesty, gambling, hazing, or behavior that endangers or threatens to endanger the health and safety of any person.

Students are required to identify themselves when asked by a properly identified faculty or staff member, or by another student serving as a University staff member. Persons who are not members of the University community and without business on campus may be asked to leave.

## **Conduct Review Process**

Clear disciplinary procedures are an important part of the mission of SMU as an educational institution. The intent of the system of due process at SMU is to be educational and not merely punitive for students. The goal continues to be to produce quality citizens. The purpose of the conduct review process is to encourage personal responsibility.

Depending on the degree of misconduct, a student may be subject to sanctions ranging from an informal warning to expulsion from the University. In addition, a student may be assigned educational sanctions designed to promote personal growth and development. Should a student be asked to leave the University, he or she should do so in an expeditious and peaceful manner. The student should remain off campus until he or she receives written permission from the Office of Student Conduct & Community Standards to return to campus. In the event of such separation, a student is still responsible for University financial obligations.

To ensure fairness and due process for all students in the conduct process, the student is granted an impartial hearing and the right to appeal to the University Conduct Council. A student who is appealing a sanction may remain in school until the decision and penalty are reviewed, unless otherwise determined by the Dean of Students, the Vice President for Student Affairs, or their designee. All actions related to the conduct review process are subject to presidential review.

Having voluntarily enrolled as students at Southern Methodist University and assumed a place in the University community, all students are presumed to be knowledgeable of, and have agreed to abide by the rules and regulations set forth in the Student Code of Conduct as outlined in the SMU Student Handbook, which is available online at [www.smu.edu/StudentAffairs/StudentLife/StudentHandbook](http://www.smu.edu/StudentAffairs/StudentLife/StudentHandbook).

## **Student Engagement and Success**

### **Department of Student Development**

#### **Office of the Student Experience**

The Office of the Student Experience designs a comprehensive student experience supporting students and their families from orientation to graduation. Using a leadership framework, all students are guided through collegiate transitions. With recognition of the unique needs of veterans, graduate, transfer, and international students, the office advocates for and provides support to these special populations.

#### **Leadership**

The leadership programs available to students include the Emerging Leaders First-Year Leadership Development Program, the Crain Leadership Summit, and the Lonestar LeaderShape Institute. The Office of the Student Experience also supports student leadership development through the Caswell Leadership Program, for a group of selected students to develop projects focused on organizational leadership, faith-based leadership, community-based leadership, environmental leadership, fraternity and sorority leadership or culturally competent leadership.

#### **Parent and Family Programs**

Parents and families are supported through the Office of the Student Experience with a focus on assisting families to assist their students. Our office supports the SMU Mothers' and Dads' clubs, welcomes and supports new students and families during orientation, and supports family weekend.

#### **Special Population Support**

The Office of the Student Experience is committed to supporting all SMU students in their transitions into and through

SMU. Additional support is coordinated for special student populations who may have unique factors that impact their transitions including Veteran, Transfer, International, and Graduate students.

### **Women & LGBT Center**

[www.smu.edu/womenandlgbtcenter](http://www.smu.edu/womenandlgbtcenter)

The Women & LGBT Center works to increase awareness and understanding of gender, sexuality, and women's issues on campus through social, cultural and academic programming and outreach. We provide empowering spaces for students to develop as leaders through purposeful learning, educational, and advocacy opportunities. We also advise, support, and develop student organizations focused on gender, sexuality, and women's issues. Some of the organizations we advise include the Feminist Equality Movement, Women in Science and Engineering, and Spectrum: the lesbian, gay, bisexual, transgender and ally organization. Also housed in the center is the SMU Women's Symposium ([www.smu.edu/womsym](http://www.smu.edu/womsym)), which is part of the Education of Women for Social and Political Leadership series, established in 1966.

### **Office of Social Change and Intercultural Engagement**

The Office of Social Change and Intercultural Engagement exists to connect students with opportunities to engage with and learn from the SMU campus, Dallas community, and beyond. The office prioritizes advocacy and awareness through immersive community engagement experiences and social justice education. There are two major functional areas of the office: community engagement and intercultural engagement.

The community engagement side of the office has signature service programs including The Big Event, Mustang Heroes, and Alternative Breaks—which provide students the opportunity to participate in immersive service experiences in Dallas and throughout the United States. The office also provides consulting services to individuals, classes, and offices to help connect them to meaningful and educational community engagement opportunities.

In addition, the office sponsors intercultural engagement and social justice education programs to provide opportunities for the exchange of ideas and experiences that enhance student perspectives, and offers various leadership opportunities through culturally based student organizations, student coordinator positions, and the CONNECT Mentoring Program.

For more information about our programs, please visit [www.smu.edu/socialchange](http://www.smu.edu/socialchange).

### **Department of Student Involvement**

[connect.smu.edu](http://connect.smu.edu)

The mission of Student Involvement is to foster experiences and create spaces encouraging students to discover their interests and find a sense of belonging through involvement. Research shows that students who get involved, regardless of the type of activity, tend to be more successful during their college experience. Student Involvement supports more than 200 opportunities for SMU students through academic and professional associations, campus programming boards, community service coalitions, fraternities and sororities, governing boards, honor societies, multicultural organizations, political clubs, club sports, religious organizations, and special interest groups. Professional staff are available to answer student's questions about getting involved and student organization operations.

The Student Involvement Office is located on the third floor of the Hughes-Trigg Student Center, Suite 314. Campus activities and organizations are an integral part of the developmental experience for students and a long-standing SMU tradition. Participation can help students develop leadership skills and provide inter-personal, social and cultural experiences.

Additional information is available online, including organization interests or type, membership requirements, contact information and event calendars. Student Involvement can also assist students in forming a new organization. To learn more visit [connect.smu.edu](http://connect.smu.edu).

**Eligibility Requirements.** Students who hold office in a student organization or represent the University as a member of a sponsored campus group (Mustang Band, Alternative Breaks, etc.) must be matriculated in a University degree-granting program, maintain a minimum 2.0 GPA, and may not be on academic probation.

## Student Government

Through SMU's system of representative governance, students participate with faculty and administration in the University's decision-making process. The primary voice of students in this process is the student-elected Student Senate comprised of senators, committee chairs, general members, and student body officers.

## Hughes-Trigg Student Center

[www.smu.edu/htrigg](http://www.smu.edu/htrigg)

The Hughes-Trigg Student Center supports the University's mission by serving as the hub of student life and activities. The Student Center enhances the student experience by providing services, conveniences, amenities, and resources to facilitate programming. The Student Involvement staff strives to provide a safe and community-focused environment to meet the diverse needs of all individuals. Our space offerings include a 6,400 square-foot ballroom, a tiered, amphitheater-style forum classroom, a 470-person capacity auditorium, a convenience store, a food court with a multifunction dining space, a post office, office and meeting space for student organizations, several lounging and quiet areas for studying, and six meeting rooms.

## Residence Life and Student Housing

[www.smu.edu/housing](http://www.smu.edu/housing)

The Department of Residence Life and Student Housing supports the goals of the University by creating residential communities that empower residents to value learning, citizenship and leadership in comfortable, well-maintained facilities. The department is responsible for the campus residential community, including all Residential Commons, Upper Division Housing, SMU-owned apartments, and SMU-owned Greek chapter houses.

## Hegi Family Career Development Center

[www.smu.edu/career](http://www.smu.edu/career)

The Hegi Family Career Development Center at SMU is dedicated to serving the needs of SMU students and alumni and assisting employers in reaching qualified candidates from SMU. The Career Development Center staff guides and encourages students and alumni in the development of skills necessary for lifelong career management and offers opportunities for employers to recruit students through campus events and online resources. At Hegi, the staff cares about helping students develop into well-rounded individuals, and is dedicated to values of consistency, authenticity and commitment to excellence.

**Career Express Drop-in Hours.** The Career Center offers 15-minute drop-in sessions on a first-come, first-served, basis. In these sessions, students can discuss career options or get help editing a resume. Additional information is available on our website at [www.smu.edu/career](http://www.smu.edu/career).

**Counseling Appointments.** The Career Center also provides opportunities for counseling appointments with a staff member. These longer sessions can help students navigate more complex issues, including major exploration, career exploration, professional skill building, and more.

**Peer Mentors.** Peer Mentors are highly trained student leaders who help fellow students navigate the career development process, including assisting with drop-ins, editing cover letters and resumes, and representing Hegi at campus events.

**Career Development Ambassadors.** CDA is a student organization designed to provide career development opportunities on the SMU Campus. CDAs organize events for the SMU community, which inspire engagement in the career development process, develop students' career tools, and provide networking opportunities.

**Experiential Learning.** Want to learn more about an industry, company or specific job? Experiential learning is the best way to do so. Below are some easy ways to get connected:

- **Coffee Chats/Lunch 'n Learns:** Meet an employer in an informal setting to learn about their career journey.

- **Mentors:** Connect and develop a relationship with an industry professional that is in a career you are interested in.
- **Employer Site Visits/Externships:** Shadow professionals and SMU alumni for the day and learn about their career path and what they do on a daily basis. Mustang and SMU Connection programs partner with top regional employers and alumni providing student exposure to today's competitive and ever-changing job market.
- **Informational Interviews:** Have a conversation with an alum and/or employer to build your network and learn about their education and career path.

**Employer Events.** Our Office cultivates meaningful relationships with organizations and employers who are invested in networking with dynamic, talented and skilled students across SMU's liberal and communication arts communities. Throughout the year, the Career Center hosts 2-4 Career and Internship Fairs, along with a host of Employer Industry Panels, Company Information Sessions and Industry Training and Development Workshops. These events offer students an opportunity to work with employers and alumni and to learn the skills necessary to be successful in the workplace.

## Office of the Chaplain and Religious Life

[www.smu.edu/chaplain](http://www.smu.edu/chaplain)

The Office of the Chaplain and Religious Life offers resources of pastoral care and theological reflection that nurture spiritual and vocational development as well as the moral and ethical vision and character of students, faculty and staff. Dr. Stephen W. Rankin is the chaplain and minister to the University community. Chaplain Rankin leads and preaches at weekly chapel service, an ecumenically Christian, all-University service of worship, each Wednesday during the term. Students, faculty and staff are invited to participate in this service through music, scripture readings or other expressions of worship. Other services, including the University Service of Memory, Ash Wednesday Service and memorial services as needed, are also planned and implemented by the Office of the Chaplain.

Presently, there are more than 28 religious life organizations. Alongside the Christian groups aligned with denominations, local Dallas-area congregations or national parachurch ministries, SMU also has an active Hillel chapter for Jewish students, a bustling Muslim Student Association and other faith groups of various traditions. A large number of undergraduate, graduate and professional students, as well as many of SMU's faculty, staff and administrators, participate in these religious communities.

Additionally, the Office of the Chaplain partners with faculty members across campus to direct the Faith and Learning Scholars, a cohort of students who want the experience of integrating their faith with their academic pursuits. Participants can qualify for the community engagement proficiency. Similarly, the Civil Rights Pilgrimage, founded in 2004, is an eight-day spring break journey through the South whereby students encounter shrines of freedom and meet heroes of the civil rights movement. This collaboration with Dedman College offers students a transformative opportunity while earning academic credit.

Chaplains are available for personal counseling and spiritual direction with students, faculty and staff during office hours. The Office of the Chaplain is located in the Hughes-Trigg Student Center, Suite 316. Nearby are two rooms for prayer, one designated for Muslim community members and the other for all others.

## Residence Accommodations

The University prides itself on offering a full living and learning experience for its resident students. The mission of the Department of Residence Life and Student Housing is to advance the goals and objectives of the University by creating residential communities that empower residents to value learning, citizenship and leadership. To this end, RLSH seeks opportunities to promote an intellectual culture in SMU's residential communities that complements an already flourishing campus social culture. RLSH is responsible for residence halls, 11 Residential Commons and 10 SMU-owned Greek chapter houses. This responsibility includes making sure that facilities are well maintained and that students have opportunities to grow personally and excel academically.

## **Housing Policy for All Students**

All incoming first-year undergraduate students are required to live on campus during their first two years at SMU. Exceptions may be granted on the basis of a financial, medical or personal hardship at the discretion of the dean of RLSH to those students from Dallas/Fort Worth who live with a parent or legal guardian in the primary residence of the parent or guardian. For housing purposes, the two years means the first two years of college. Incoming transfer students who are over the age of 16 and under the age of 20 are required to live on-campus for their first year at SMU. For 2018–2019, upperclass and graduate students are not required to live on campus but may apply on a space-available basis.

## **Applications for Residence**

New graduate students should submit the completed application and housing license agreement to RLSH with a check or money order for \$100 made payable to Southern Methodist University for the nonrefundable housing deposit. Notification of assignment will be made by RLSH.

The housing license agreement is for the full academic year (fall and spring terms). Room charges for the fall term will be billed and are payable in advance of the term for students who register before August 1, and room charges for the spring term will be billed and are payable in advance of that term for students who register before December 1. Students who register after these dates must pay at the time of registration. Room charges for the full academic year will be due and payable should a student move out at any time during the school year. Accommodations for shorter periods are available only by special arrangement with RLSH before acceptance of the housing license agreement. It is important that applicants become familiar with the license agreement, as it is a legally binding document.

## **Graduate Residence Accommodations**

The Department of Residence Life and Student Housing operates one apartment residence hall designated for graduate students. Martin Hall, a single occupancy, efficiency apartment facility, houses single graduate students and senior undergraduates.

## **Special Housing Needs**

Students having special housing needs because of a disability should contact the SMU Office of Disability Accommodations and Success Strategies in order to establish eligibility for accommodations. When applying for housing, students should also submit information to RLSH regarding a request for accommodations. DASS and RLSH will work together with the student on their specific situation to make necessary accommodations.

## **General Housing Information**

Each apartment is furnished with a Murphy bed, desk, dresser, kitchen dining table and chairs. All university residences have wired and wireless Ethernet connections to the University's computer system. All residence halls are air-conditioned and some have individually climate-controlled rooms. Washing machines and dryers are located in all residence halls. Meal plans are not required in the graduate hall. For more information, students should visit [www.smu.edu/housing](http://www.smu.edu/housing) or contact the Department of Residence Life and Student Housing, Southern Methodist University, PO Box 750215, Dallas TX 75275-0215; phone 214-768-2407; fax 214-768-4005; [housing@smu.edu](mailto:housing@smu.edu).

## Academic Calendar

### Academic Year 2019-2020

[www.smu.edu/registrar/academic\\_calendar.asp](http://www.smu.edu/registrar/academic_calendar.asp)

This calendar includes an addendum listing religious holidays for use in requesting excused absences according to University Policy, Excused Absences for University Extracurricular Activities and Religious Holidays. For religious holidays not listed, contact the Office of the Chaplain.

Graduate programs in the Cox School of Business, Perkins School of Theology, Dedman School of Law, and Research and Graduate Studies have different calendars.

A comprehensive schedule of holiday dates that the offices of the University will be closed will be announced at a later date.

### Fall Term 2019

*(August 26 - December 21, 2019)*

**April 8–26, Monday–Friday:** Enrollment for fall 2019 continuing students for all undergraduates and for graduates in Dedman College, Lyle and Meadows.

**May, July, August (TBA):** Academic Advising, Enrollment and Orientation conferences for new first-year and transfer undergraduate students. Conference dates to be announced. More information about AARO is available from the Office of the Student Experience, Student Affairs, 214-768-4560, [www.smu.edu/studentaffairs/newstudent](http://www.smu.edu/studentaffairs/newstudent).

**August 24, Saturday:** Residence halls officially open at 9:00 a.m.

**August 25, Sunday:** Opening Convocation, McFarlin Auditorium.

**August 26, Monday:** First day of classes.

**August 30, Friday:** Last day to enroll, add a course, or drop a course without tuition billing while remaining enrolled for the term. Last day to file for graduation in December.

**September 2, Monday:** Labor Day. University offices closed.

**September 9, Monday:** Last day to drop a course without academic record (**tuition charges apply**). Last day to withdraw from the university without academic record (**withdrawal refund schedule applies**). See Bursar's website for more information.

**September 11, Wednesday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**October 1, Tuesday:** Early intervention grades due for first-year undergraduate students.

**October 4-5, Friday-Saturday:** Family Weekend

**October 14-15, Monday-Tuesday:** Fall Break.

**October 16, Wednesday:** Last day for continuing undergraduate students to change their majors before November enrollment.

**October 27, Sunday:** Midterm grades due for first-year and sophomore students.

**November 4, Monday:** 60 percent point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**November 4-22, Monday–Friday:** Enrollment for spring 2020 continuing students for all undergraduates and graduates in Dedman College, Lyle, Meadows and Simmons.

**November 8, Friday:** Last day to drop a course (grade of W).

**November 8-9, Friday-Saturday:** Homecoming Weekend.

**November 14, Thursday:** Last day for December graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**November 18, Monday:** Students should file for May graduation. The last day to file is January 24, 2020.

**November 26, Tuesday:** Last day to withdraw from the University.

**November 27, Wednesday:** No classes.

**November 28–29, Thursday–Friday:** Thanksgiving holiday. University offices closed.

**December 4-9, Wednesday–Monday:** No final examinations or unscheduled tests and papers.

**December 5, Thursday:** Last day for oral/written examinations for December graduate degree candidates.

**December 9, Monday:** Last day of classes.

**December 10-11, Tuesday-Wednesday:** Reading days.

**December 12-18, Thursday–Wednesday:** Examinations. (No examinations scheduled for Sunday).

**December 19, Thursday:** Residence halls close at 10:00 a.m. for winter break. (December graduates should contact the Department of Residence Life and Student Housing).

**December 20, Friday:** December Rotunda Recessional.

**December 21, Saturday:** December Commencement Convocation. Official close of term and conferral of degrees.

**December 23 - January 1, Monday - Wednesday:** University closed.

**December 25, Wednesday:** Christmas Day.

## January Term 2020

*(December 19, 2019 – January 16, 2020)*

The January Term consists of two primary sessions: Dallas January Session and SMU-in-Taos January Session. Each primary session has different deadline dates. Some areas of instruction may offer a limited number of selected courses during the January Term, December 19, 2019 – January 16, 2020 with unique start, end, deadline dates and class meeting times to accommodate the particular needs of the course.

**January 1, Wednesday:** New Year's Day. University offices closed.

## Dallas January Session 2020

**Note:** *Classes meet six hours per day, Monday through Friday. See Intersessions website for specific class information.*

**January 5, Sunday:** Last day to enroll, add a course, or drop a course without academic record. Last day to file for graduation in January Term.

**January 6, Monday:** First day of classes.

**January 7, Tuesday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**January 9, Thursday:** Last day for January Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term

**January 15, Wednesday:** Last day to drop a course or withdraw from the University (grade of W).

**January 16, Thursday:** Last day of classes, including examinations. Official close of the term and conferral of degrees.

## SMU-in-Taos January Session 2020

**Note:** *Permission of SMU-in-Taos required for all enrollments.*

**January 2, Thursday:** Last day to enroll, add a course, or drop a course without academic record.

**January 2, Thursday:** Student travel/arrival.

**January 3, Friday:** First day of classes.

**January 6, Monday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**January 9, Thursday:** Last day for January Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**January 14, Tuesday:** Last day to drop a course or withdraw from the University (grade of W).

**January 15, Wednesday:** Last day of classes, including examinations. Travel Day.

**January 16, Thursday:** Unofficial Taos Travel.

## Spring Term 2020

*(January 17 - May 16, 2020)*

**November 4-January 24, Monday–Friday:** Enrollment for spring 2020 continuing students for all undergraduates and graduates in Dedman College, Lyle, Meadows and Simmons.

**January (TBA):** Residence halls officially open at 9:00 a.m.

**January (TBA):** Academic Advising, Enrollment and Orientation conferences for new first-year and transfer undergraduate students. Conference dates to be announced. More information about AARO is available from the Office of the Student Experience, Student Affairs, 214-768-4560, [www.smu.edu/studentaffairs/newstudent](http://www.smu.edu/studentaffairs/newstudent).

**January 1, Wednesday:** New Year's Day. University offices closed.

**January 15, Wednesday:** Spring Rotunda Passage (*Tentative; subject to change*)

**January 17, Friday:** First day of classes.

**January 20, Monday:** Martin Luther King, Jr. Day. University offices closed.

**January 24, Friday:** Last day to enroll, add a course, or drop a course without tuition billing while remaining enrolled for the term. Last day to file for graduation in May.

**January 31, Friday:** Last day to drop a course without academic record (**tuition charges apply**). Last day to withdraw from the university without academic record ([withdrawal refund schedule applies](#)). See Bursar's website for more information.

**February 4, Tuesday:** Last day to declare pass/fail or no credit grading options. Also, last day to request an excused absence for the observance of a religious holiday.

**February 24, Monday:** Early intervention grades due for first-year undergraduate students.

**March 6, Friday:** Last day for continuing undergraduate students to change their majors before April enrollment.

**March 16-22, Monday-Sunday:** Spring Break.

**March 24, Tuesday:** Midterm grades due for first-year and sophomore students.

**March 31, Tuesday:** 60 percent point of the term that federal financial aid has been earned if a student officially withdraws from SMU; prior to this date a partial calculated return to federal programs will be required.

**April 6-24, Monday–Friday:** Enrollment for summer 2020 and fall 2020 continuing students for all undergraduates and graduates in Dedman College, Lyle, Meadows and Simmons.

**April 7, Tuesday:** Last day to drop a course (grade of W).

**April 10, Friday:** Good Friday. University offices closed.

**April 12, Sunday:** Easter Sunday.

**April 13, Monday:** Last Day for May graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**April 13, Monday:** Honors Convocation, 5:30 p.m.

**April 22, Wednesday:** Students should file for August or December graduation. Last day to file for August graduation is June 4. Last day to file for December graduation is the last day to enroll for fall 2020.

**April 24, Friday:** Last day to withdraw from the University.

**April 29-May 4, Wednesday–Monday:** No final examinations or unscheduled tests and papers.

**April 30, Thursday:** Last day for oral/written examinations for graduate students who are May degree candidates.

**May 4, Monday:** Last day of classes.

**May 5, Tuesday:** Reading Day.

**May 6-12, Wednesday–Tuesday:** Examinations (No examinations scheduled for Sunday).

**May 13, Wednesday:** Residence halls officially close for non-graduating students.

**May 15, Friday:** Baccalaureate.

**May 16, Saturday:** May Commencement Convocation. Official close of term and conferral of degrees.

**May 17, Sunday:** Residence halls officially close for graduating seniors.

## May Term 2020

*(May 14 - 29, 2020)*

The May Term consists of two primary sessions: Dallas May Session and SMU-in-Taos May Session. Each primary session has different deadline dates. Some areas of instruction may offer a limited number of selected courses during the May Term, May 14 - 29, 2020 with unique start, end, deadline dates, and class meeting times to accommodate the particular needs of the course.

## Dallas May Session 2020

*Note: Classes meet four hours per day, Monday through Friday.*

**May 14, Thursday:** First day of classes.

**May 14, Thursday:** Last day to enroll, add a course, or drop a course without academic record (tuition charges apply). See Bursar's website for more information. Last day to declare pass/fail or no credit grading options. Last day to file for graduation in May Term. Last day to request an excused absence for the observance of a religious holiday.

**May 22, Friday:** Last day for May Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**May 25, Monday:** Memorial Day. University offices closed.

**May 26, Tuesday:** Last day to drop a course or withdraw from the University (grade of W).

**May 29, Friday:** Last day of classes, including examinations. Official close of term and conferral of degrees.

## SMU-in-Taos May Session 2020

*Note: Permission of SMU-in-Taos required for all enrollments.*

**May 13, Wednesday:** Travel day and arrival of students, 2–6 p.m.

**May 14, Thursday:** First day of classes.

**May 14, Thursday:** Last day to enroll, add a course, or drop a course without academic record (tuition charges apply). See Bursar's website for more information. Last day to declare pass/fail or no credit grading options. Last day to file for graduation in May Term. Last day to request an excused absence for the observance of a religious holiday.

**May 22, Friday:** Last day for May Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**May 26, Tuesday:** Last day to drop a course or withdraw from the University (grade of W).

**May 29, Friday:** Last day of classes, including examinations.

**May 30, Saturday:** Travel Day.

## Summer Term 2020

*(June 1 – August 4, 2020)*

The summer term consists of four primary sessions: Dallas Full Session, Dallas First Session (June), SMU-in-Taos First Session, and Dallas Second Session (July). Each primary session has different deadline dates. There are also four shorter sessions within the first and second sessions. Some areas of instruction may offer a limited number of selected courses during the Summer Term, June 1 – August 4, with unique start, end, deadline dates and class meeting times to accommodate the particular needs of the course.

### Dallas Full Session

**Note:** *Classes meet 2 hours, 15 minutes twice a week or 1 hour, 30 minutes three times a week.*

**May 25, Monday:** Memorial Day. University offices closed.

**June 1, Monday:** First day of classes.

**June 4, Thursday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information. Last day to file for August graduation.

**June 10, Wednesday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**July 3, Friday:** Independence Day observed. University offices closed.

**July 16, Thursday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**July 23, Thursday:** Last day to drop a course (grade of W).

**July 29, Wednesday:** Last day to withdraw from the University.

**August 4, Tuesday:** Last day of classes, including examinations. Official close of term and conferral of degrees.

### Dallas First Session (June)

**Note:** *Classes meet 2 hours a day, Monday–Friday*

**May 25, Monday:** Memorial Day. University offices closed.

**June 1, Monday:** First day of classes.

**June 2, Tuesday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information.

**June 4, Thursday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday. Last day to file for August graduation.

**June 16, Tuesday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**June 23, Tuesday:** Last day to drop a course (grade of W).

**June 24, Wednesday:** Last day to withdraw from the University.

**June 30, Tuesday:** Last day of classes, including examinations.

**August 4, Tuesday:** Official close of term and conferral of degrees.

## June A (11-day June Session)

*Classes meet four hours per day, Monday through Friday.*

**June 1, Monday:** First day of classes.

**June 1, Monday:** Last day to add/enroll and to declare pass/fail or no credit grading options.

**June 10, Wednesday:** Last day to drop/withdraw from the University (grade of W).

**June 15, Monday:** Last day of classes, including examinations.

## June B (11-day June Session)

*Classes meet four hours per day, Monday through Friday.*

**June 16, Tuesday:** First day of classes.

**June 16, Tuesday:** Last day to add/enroll and to declare pass/fail or no credit grading options.

**June 25, Thursday:** Last day to drop/withdraw from the University (grade of W).

**June 30, Tuesday:** Last day of classes, including examinations.

## SMU-in-Taos First Session

*Note: Permission of SMU-in-Taos required for all enrollments.*

*(Regular Session)*

**June 2, Tuesday:** Travel day and arrival of students, 2-6 p.m.

**June 3, Wednesday:** First day of classes.

**June 3, Wednesday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information.

**June 4, Thursday:** Last day to file for August graduation.

**June 8, Monday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**June 11, Thursday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**June 16, Tuesday:** Last day to drop a course or withdraw from the University (grade of W).

**June 18, Thursday:** Last day of classes, including examinations.

**June 19, Friday:** Departure of students.

**August 4, Tuesday:** Official close of term and conferral of degrees.

*(Field Session)*

**June 2, Tuesday:** Travel day and arrival of students, 2-6 p.m.

**June 3, Wednesday:** First day of classes.

**June 3, Wednesday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information.

**June 4, Thursday:** Last day to file for August graduation.

**June 8, Monday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**June 16, Tuesday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**June 25, Thursday:** Last day to drop a course or withdraw from the University (grade of W).

**June 30, Tuesday:** Last day of classes, including examinations.

**July 1, Wednesday:** Departure of students.

**August 4, Tuesday:** Official close of term and conferral of degrees.

## Dallas Second Session (July)

*Note: Classes meet 2 hours a day, Monday–Friday.*

**June 4, Thursday:** Last day to file for August graduation.

**July 3, Friday:** Independence Day observed. University offices closed.

**July 6, Monday:** First day of classes.

**July 7, Tuesday:** Last day to enroll, add courses or drop courses without academic record (tuition charges apply). See Bursar's website for more information.

**July 9, Thursday:** Last day to declare pass/fail or no credit grading options. Last day to request an excused absence for the observance of a religious holiday.

**July 14, Tuesday:** Last day for August graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**July 27, Monday:** Last day to drop a course (grade of W).

**July 29, Wednesday:** Last day to withdraw from the University.

**August 4, Tuesday:** Last day of classes, including examinations. Official close of term and conferral of degrees.

## July A (11-day July Session)

*Classes meet four hours per day, Monday through Friday.*

**July 6, Monday:** First day of classes.

**July 6, Monday:** Last day to add/enroll and to declare pass/fail or no credit grading options.

**July 15, Wednesday:** Last day to drop/withdraw from the University (grade of W).

**July 20, Monday:** Last day of classes, including examinations.

## July B (11-day July Session)

*Classes meet four hours per day, Monday through Friday.*

**July 21, Tuesday:** First day of classes.

**July 21, Tuesday:** Last day to add/enroll and to declare pass/fail or no credit grading options.

**July 30, Thursday:** Last day to drop/withdraw from the University (grade of W).

**August 4, Tuesday:** Last day of classes, including examinations.

## August Term 2020

*(August 6 – 21, 2020)*

The August Term consists of one primary session: SMU-in-Taos August Session. Some areas of instruction may offer a limited number of selected courses during the August Term, August 6 – 21, 2020 with unique start, end, and deadline dates to accommodate the particular needs of the course.

## SMU-in-Taos August Session

*Note: Permission of SMU-in-Taos required for all enrollments.*

**August 5, Wednesday:** Travel day and arrival of students, 2-6 p.m.

**August 6, Thursday:** First day of classes.

**August 7, Friday:** Last day to enroll, add a course, or drop a course without academic record (tuition charges apply). See Bursar's website for more information. Last day to declare pass/fail or no credit grading options. Last day to file for graduation in August Term. Last day to request an excused absence for the observance of a religious holiday.

**August 14, Friday:** Last day for August Term graduation candidates to change grades of Incomplete, and to obtain a final grade for a grade of X or a missing grade from a previous term.

**August 20, Thursday:** Last day to drop a course or withdraw from the University (grade of W).

**August 21, Friday:** Last day of classes, including examinations. Official close of term and conferral of degrees.

**August 22, Saturday:** Travel Day.

## Major Religious Holidays

*(August 2019-August 2020)*

Listing of religious holidays for use in requesting excused absences according to University Policy, Excused Absences for University Extracurricular Activities and Religious Holidays. For religious holidays not listed, the instructor or supervisor may contact the Office of the Chaplain.

### Christian

**Christmas:** December 25, 2019

**Good Friday:** April 10, 2020

**Easter Sunday:** April 12, 2020

**Easter Sunday (Orthodox):** April 19, 2020

### Hindu

**Janmashtami:** August 23, 2019

**Dasera:** October 7, 2019

**Diwali:** October 27, 2019

### Jewish\*

**Rosh Hashanah:** September 30, 2019

**Yom Kippur:** October 9, 2019

**Sukkot/Simchat Torah:** October 14-15, 2019

**Hanukkah:** December 23, 2019

**Purim:** March 10, 2020

**Pesach (Passover):** April 9-10, 2020

**Shavuot:** May 29, 2020

### Muslim

**Eid al-Adha:** August 12, 2019

**Islamic New Year:** August 31, 2019

**Ashura:** September 10, 2019

**Mawlid an-Nabi:** November 10, 2019

**Ramadan:** April 24, 2020

**Eid al-Fitr:** May 24, 2020

\* All holidays begin at sundown before the first day noted and conclude at sundown on the day(s) noted.

# Lyle School of Engineering: General Information

The Bobby B. Lyle School of Engineering traces its roots to 1925, when the Technical Club of Dallas, a professional organization of practicing engineers, petitioned SMU to fulfill the need for an engineering school in the Southwest. The Lyle School of Engineering has grown to become a thriving school, with graduate programs in a variety of areas.

Corporate support for the engineering school has generated a remarkable array of equipment and laboratories. Recent additions include a microwave lab from General Dynamics and a robotics lab from General Electric. Additional laboratories are being developed with funds from AT&T and Southwestern Bell. The Dallas area's national prominence in high technology and research is a major benefit for the Lyle School of Engineering.

All programs of education and research in engineering and applied science are conducted through the Lyle School of Engineering. The school is organized into the following five departments: Civil and Environmental Engineering; Computer Science and Engineering; Electrical Engineering; Engineering Management, Information and Systems; and Mechanical Engineering.

## Programs and Courses

All courses offered in the Lyle School of Engineering are identified by a two-, three- or four-letter prefix code, designating the general subject area of the course, followed by a four-digit number. The first digit specifies the approximate level of the course as follows: 7 – graduate and 8 – advanced graduate. The second digit denotes the credit hours associated with the course. The last two digits specify the course numbers. Thus, CS 7320 denotes a course offered by the Department of Computer Science and Engineering at the (7) graduate level, having three credit hours and having the course number 20. The prefix codes are as follows:

<b>CEE</b>	Department of Civil and Environmental Engineering
<b>CS</b>	Department of Computer Science
<b>DSIN</b>	Multidisciplinary Programs - Design and Innovation
<b>ECE</b>	Department of Electrical and Computer Engineering
<b>EMIS</b>	Department of Engineering Management, Information and Systems
<b>ENGR</b>	Multidisciplinary Programs
<b>ME</b>	Department of Mechanical Engineering
<b>MSDS</b>	Multidisciplinary Programs - Master of Science in Data Science

Additional information is found under Interpretation of Course Numbers in the Enrollment Policies section of this catalog.

## Degree Programs

The Lyle School of Engineering offers curricula leading to M.A., M.S., Doctor of Engineering and Ph.D. degrees. The M.A., M.S. and Ph.D. degrees generally are directed toward specific branches of engineering and applied science, whereas the curricula for the professional degree of Doctor of Engineering is directed toward professional practice based on a broad range of engineering fundamentals. All graduate programs are individually designed in conference between the student and his or her supervisory committee. The following table shows the major areas in which students may major at the several graduate-degree levels:

<b>Transcript</b>		<b>Degree or Diploma</b>	
<i>Dept.</i>	<i>Major Area</i>	<i>Master</i>	<i>Doctor</i>
CEE	Civil Engineering	M.S.C.E.	
CEE	Civil and Environmental Engineering		Ph.D.
CEE	Environmental Engineering	M.S.Env.E.	
CEE	Sustainability and Development	M.A.	
ECE	Computer Engineering	M.S.Cp.E.	Ph.D.
CS	Computer Science	M.S.	Ph.D.

CS	Cybersecurity	M.S.	
CS	Software Engineering	M.S.	D.Engr.
ECE	Electrical Engineering	M.S.E.E.	Ph.D.
ECE	Telecommunications and Network Engineering	M.S.	
EMIS	Engineering Management	M.S.E.M.	D.Engr.
EMIS	Engineering Entrepreneurship	M.S.E.N.	
EMIS	Information Engineering and Management	M.S.I.E.M.	
EMIS	Operations Research	M.S.	Ph.D.
EMIS	Systems Engineering	M.S.	Ph.D.
ME	Mechanical Engineering	M.S.M.E.	Ph.D.
ME	Manufacturing Systems Management	M.S.	
Multiple	Applied Science	M.S.	Ph.D.
Multiple	Data Science	M.S.D.S.	
Multiple	Datacenter Systems Engineering	M.S.	
Multiple	Design and Innovation	M.A.	

Engineering education beyond the baccalaureate degree may have one or any combination of the following four objectives, some of which may relate only indirectly to a graduate degree:

1. **Upgrading:** Taking advanced work to raise the level of one's formal capabilities.
2. **Updating:** Keeping one's education current; for example, a person who received a B.S. degree 10 years ago may take coursework to make his or her formal education comparable to that of a person receiving a B.S. degree this year.
3. **Diversification:** Seeking to obtain formal education in another field, but not necessarily at a higher degree level.
4. **Maturing:** Adding new perspectives on one's own field without raising the academic level of the education.

## Admission

Applicants who hold baccalaureate or higher degrees in engineering, mathematics or the sciences from a U.S. college or university accredited by a regional accrediting association, or who have completed an international degree that is equivalent to a U.S. bachelor's degree from a college or university of recognized standing, will be considered for admission to the Graduate Division of the Lyle School of Engineering for the purpose of pursuing work leading to an advanced degree in engineering or applied science. Each case is considered on an individual basis, and due to the wide variations in student education, past performance, age, experience and academic objective, individualized graduate-program requirements for each student may be anticipated.

## Admission Requirements

Applicants for admission to the Graduate Division must have a minimum GPA of 3.000 on a 4.000 scale for all previous undergraduate and graduate studies. Three letters of recommendation are required for all doctoral applicants and for all applicants requesting financial aid. In addition, an official GRE graduate school admission test score is required in the following cases: 1) for master's applicants in civil engineering, computer engineering, computer science, electrical engineering, environmental engineering, and mechanical engineering programs; 2) for all doctoral applicants; and 3) for all applicants requesting financial aid.

Graduate students applying for admission to the Lyle School of Engineering are required to pay an appropriate application fee, which must accompany the application. Applications will not be considered unless the complete official transcripts of the applicant's prior undergraduate and graduate work are in the possession of the SMU Office of Admissions. The transcript is regarded as official only if it is received directly from the registrar of the institution in which the work was done, or if it is an original and authenticated transcript bearing the institutional seal. A statement of purpose is required.

Graduates from foreign countries who apply to Ph.D. programs are required to submit three letters of recommendation. A notarized financial certification form verifying sufficient assets in the form of savings accounts must be received

prior to issuance of a student visa. All international students whose native language is not English and who have not graduated from an American university must submit a TOEFL English language proficiency test or its equivalent with a minimum score of 550 on the paper-based examination, 213 on the computer-based examination or 80 overall score on the Internet-based examination. A score of 6.5 or better is also acceptable on the IELTS English language proficiency test. For further information, students should write to TOEFL, PO Box 899, Princeton NJ 08541, U.S.A., or visit [www.TOEFL.org](http://www.TOEFL.org).

Domestic students must apply and submit all requisite application materials by no later than July 1 for fall admission, November 15 for spring admission and April 15 for summer admission. *All international students* use the following dates: May 15 for fall admission, and September 1 for spring admission. Students apply for admission online at [www.smu.edu/Lyle/ApplyNow](http://www.smu.edu/Lyle/ApplyNow).

## **Readmission of Students**

Students who formerly attended SMU but who did not attend the immediately prior regular term or terms (not including the summer session) are considered readmission students and are required to file an application for readmission by the application deadline. If a student applies for readmission, all incomplete grades must be removed prior to readmission. The decision to re-admit or not re-admit is made by each department in consultation with the Associate Dean. Additional information is found in under Lyle Graduate Programs Policies and Procedures in the Academic Records and General and Enrollment Standards section of this catalog.

## **Financial Aid**

Graduate students who would like to be considered for financial aid must first be accepted for admission to the Lyle School of Engineering. For financial aid from the Lyle School of Engineering, contact the specific academic department. Requests for financial assistance from departments are reviewed during the admission process and applicants are notified at the time of admission if a department has awarded any financial assistance. For other sources of financial aid, students should apply to the Office of Financial Aid, SMU, PO Box 750196, Dallas TX 75275-0196. All applicants will be considered for Texas Tuition Equalization Grant eligibility. Additional information is found in the Financial Information section of this catalog.

## **Residence Hall Directorships**

A limited number of residence hall directorships are offered to men and women graduate students. These positions offer room and board in a residence hall plus a monthly stipend. Students who have been admitted to the graduate school may request applications from the Office of Residence Life, Southern Methodist University, PO Box 750452, Dallas TX 75275-0452.

## **Scholarships**

Scholarships are available for students whose scholastic attainments are outstanding. Holders of scholarships must maintain a grade average of *B*.

## **Graduate Assistantships**

Graduate assistantships for teaching and research are available in the Lyle School of Engineering. These carry monthly pay and tuition benefits. The school also has a limited number of instructorships. Applications for these appointments should be submitted before March 1 to the individual department of interest.

## **Master of Science and Master of Arts Degrees**

### **Admission to the Master's Program**

Admission to the Graduate Division of the Lyle School of Engineering is a prerequisite to postbaccalaureate registration for any graduate course or to any program of graduate study. A student wishing to study for a master's degree may be admitted on either a regular or a conditional basis.

## Regular Admission

After submission of a complete application, an applicant is evaluated for regular admission. Typically, the following requirements must be satisfied for regular admission:

- Completion of a bachelor's degree from a U.S. college or university accredited by a regional accrediting association or completion of an international degree that is equivalent to a U.S. bachelor's degree from a college or university of recognized standing. Each program has additional information on appropriate academic backgrounds required for admission into that program.
- A minimum GPA of 3.000 on a 4.000 scale for all previous undergraduate and graduate studies.
- Submission of a complete application, including a statement of purpose, official transcripts for all previous undergraduate and graduate studies and payment of the appropriate application fee.

A score of 155 or higher (revised scale) on the quantitative portion of the GRE graduate school admission test score for the following programs:

Electrical Engineering  
Mechanical Engineering

A score at the 90th percentile or higher on the quantitative portion of the GRE graduate school admission test for the following programs:

Computer Engineering  
Computer Science

Other Ph.D. and DE programs may have specific GRE requirements. Please see those program descriptions for specific admission requirements.

Graduates from foreign countries are required to submit three letters of recommendation and a notarized financial certification form. All international students whose native language is not English and who have not graduated from an American university must submit a minimum TOEFL English language proficiency test score before being considered for admission, as follows:

- 550 – paper-based examination.
- 213 – computer-based examination.
- 80– Internet-based examination overall score

A score of 6.5 on the IELTS English language proficiency examination is acceptable in place of the above scores for the TOEFL examination.

## Conditional Admission

An applicant may be offered admission to the Graduate Division on a conditional basis to ascertain his or her ability to successfully pursue graduate work. The necessity for such a conditional admission may arise when a student's undergraduate program, however high in quality, does not provide a completely adequate base on which to build the particular graduate program desired by the student. This may be due to a variety of reasons, of which the following are a few examples:

1. The undergraduate program may have been taken so many years ago that it differs from what is offered today.
2. The undergraduate degree may have been completed in a field other than that in which the master's degree is sought.
3. Despite strong evidence that the student possesses both the necessary qualities and the motivation to succeed in graduate study, his or her undergraduate record may have been undistinguished.
4. The student has not been awarded a bachelor's degree because he or she is currently enrolled in the final academic term.

A student who is admitted on a conditional basis may be required to take up to 12 credit hours of coursework beyond the minimum 30 credit hours required for the master's degree. Although a necessary part of the student's plan of study,

such extra courses are admission requirements and cannot be counted in determining progress toward satisfaction of the minimum requirements for the master's degree. Because they provide a connecting path between the student's previous work and the graduate coursework, these extra courses are termed *articulation courses*. When the articulation coursework has been completed with an average grade of B (3.000 GPA) or better, the student's admission classification is changed from conditional to regular.

## **Degree Requirements**

The minimum credit hour requirement for the master's degree in the Lyle School of Engineering is 30 credit hours beyond the baccalaureate, of which six credit hours may be in a thesis. Additional hours may be required depending on the student's background, objectives of the degree program and the demands of the discipline.

Any student whose articulation into engineering or whose objective will require more than 12 credit hours of articulation courses will be denied admission to the Graduate Division. Such students should enroll in additional undergraduate courses until these deficiencies are removed. The major department should be consulted for counseling information.

All Lyle School of Engineering coursework satisfying degree requirements must be in graduate courses numbered 7000 and above.

All work for the master's degree must be completed no later than seven years after matriculation.

Students must complete any required articulation courses with a minimum GPA of 3.000.

Admission to candidacy is automatically achieved when the student has obtained 12 credit hours with a minimum 3.000 GPA and that student has filed a degree plan. A student who fails to achieve this standard of performance may be required to take additional courses to satisfy the requirements of his or her degree plan and to bring his or her GPA to 3.000 or better or may be asked to discontinue graduate study.

All work attempted for the master's degree must be completed with an overall GPA of 3.000 or better. A grade of *D* obtained by a student will be figured into his or her overall GPA, but cannot be applied to his or her degree plan. Specific curricular requirements for Lyle master's degrees are detailed in departmental sections of this catalog.

## **Study Loads**

The Graduate Division faculty expects its students to fully meet the rigorous demands of its program. For many students, this will mean a weekly time investment averaging at least three hours for each credit hour of graduate registration. This figure derives from experience that shows that each hour of class work generates two hours of homework. Each student should bear this in mind in working out a schedule of studies.

Students desiring special counseling concerning an appropriate study load should consult their faculty adviser or the director of the Graduate Division.

All international students are required to be full-time students, taking at least nine credit hours for each fall and spring term.

Part-time students are allowed to register for a maximum of six credit hours. Students are considered part-time if they hold a full-time job. Students who have a grade of Incomplete can register for a maximum of three credit hours until the incomplete grade is removed.

## **Articulation Course Requirements**

A recent engineering graduate with an undergraduate GPA of approximately 3.000 or better and pursuing a master's program in the bachelor's degree field will have few, if any, problems articulating into the master's program.

Engineering graduate students have a wide range of preparatory education, industrial experience, age and academic objectives. It is often difficult to articulate these highly variable factors when determining educational programs in

engineering. As a result, a plan of study often includes a series of specific courses that articulate an individual student's previous education and experience into an established educational program.

Students are required to complete these articulation courses, maintaining a minimum 3.000 GPA. The student who fails to achieve this record is automatically dropped from the graduate program, is not eligible to enroll in graduate courses and is denied the right to petition for readmission.

Students who maintain the requisite minimum 3.000 GPA in these courses may advance into the balance of their plan of study. As nearly as possible, these articulation courses should be completed before the courses in the balance of the plan of study are attempted.

## **Major Department Requirement**

The program in the major field usually amounts to at least 18 credit hours and may vary with the discipline. These include basic curriculum core courses, plus electives in the particular area of interest to the student. In some disciplines, a thesis may be required. The courses are drawn from the various offerings of the department of the Lyle School of Engineering, as well as other departments of SMU outside the school. Specific requirements in the individual areas of concentration may be obtained from the appropriate department or the Graduate Division.

## **The Minor Requirement**

Minor work must be in an area other than the major. This is usually associated with six to 12 credit hours of courses. In special cases, this requirement may be modified, but only with the approval of the faculty adviser, the curriculum chair and the associate dean.

## **Thesis Requirement**

For the purposes of this section, Faculty Adviser (or Academic Adviser) is the person responsible for advising on the coursework to be taken and for setting up a Thesis Committee, if the thesis option is pursued. The Thesis Adviser is the person advising on the thesis research topic. The Thesis Committee Chair is the faculty member chairing the Thesis Committee and responsible for the quality of the thesis.

When a thesis is not required by a department, the student seeking a master's degree has the option of writing a thesis or of taking an equivalent number of credit hours of additional coursework.

The decision to choose the thesis option should be made by the student in consultation with the faculty adviser under the condition that a thesis adviser and a thesis committee chair can be identified and approved by the department chair and the associate dean. In some cases, a student may require a thesis adviser or a thesis committee chair other than the faculty adviser. The associate dean, with the advice of the major department chair, appoints the thesis adviser and the thesis committee chair.

All master's degree candidates who present a thesis in partial fulfillment of their degree requirements must pass a written and/or oral examination, administered by an examining committee recommended by the major department chair and appointed by the associate dean. The oral examination involves, largely, a defense of the thesis, although questions may be asked in areas that relate to the student's program of study. The examination committee should be made up of at least three members chaired by a tenured or tenure track faculty member from the candidate's major department. One of the committee members may be chosen from outside the major area to examine the student's general knowledge.

The thesis format must follow the University guidelines as indicated in the *Guidelines for Preparation of Theses and Dissertations*. After successful completion of the thesis defense, the thesis committee chair must sign the abstract original, and all the faculty members attending the final examination must sign the half-title page of the thesis. After the thesis has been checked and approved by the Lyle School of Engineering examiner, the thesis is uploaded to the SMU/UMI thesis submission website. One extra copy of the abstract signed by the committee chair and one copy of the original half-title page with signatures must be delivered to the office of the director of graduate student experience before the final examination period in a regular term and before examinations in a summer term.

An announcement of all scheduled examinations must be sent to the associate dean. Using the form provided for the purpose, the examining committee shall report in writing to the associate dean no later than one week before the time

for conferring the degree whether all work has been completed in a satisfactory manner and whether, on the basis of the final examination, the student is recommended for the desired degree. In no case may this examination be scheduled earlier than six months before the degree is to be conferred.

## **Faculty Adviser**

The faculty adviser is appointed by the chair, subject to approval by the associate dean. It is the adviser's responsibility to review and eventually approve the student's specific plan of study, and to check on subsequent progress. It is the responsibility of the faculty adviser to secure approval of the plan of study by the Graduate Division and to arrange for the appointment of the thesis committee if there is a thesis.

Once the plan of study is approved, it becomes the curriculum for the student, and deviations are permitted only if the student obtains formal approval for the change from the faculty adviser, department chair and director of graduate studies. All such approved changes are incorporated into the student's plan of study and are placed on file in the office of the director of graduate studies.

## **Probation and Suspension**

A student with a GPA lower than 3.000 will be placed on probation, and his or her record will be reviewed at the closing of each term. A student on probation for two terms can be placed on suspension only to be readmitted by special approval from the faculty adviser, department chair and associate dean. A student who does not meet his or her suspension conditions in the allotted time stated at the time of acceptance will be permanently suspended.

## **Transfer of Credits**

Official college transcripts are required for all college-level work attempted, regardless of transferability. Military transcripts are also required for students receiving VA benefits; more information is available at [www.smu.edu/registrar](http://www.smu.edu/registrar) ("Veterans Affairs" link). Students are responsible for making sure a transcript of all transfer work attempted is sent to the University Registrar's Office immediately following completion of the work.

Generally, up to six credit hours of graduate courses may be transferred from an institution approved by the Graduate Division, provided that such courses 1) were completed in the five years prior to matriculation, 2) carried graduate credit and 3) earned grades of *B-* or higher.

Grades of courses transferred for credit are neither recorded nor used in computing GPAs. Acceptance of transfer credit requires approval of the student's faculty adviser, department chair and the director of graduate studies.

The request to transfer credit must be made, using the appropriate forms, during the term of matriculation to the Graduate Division. Usually, this is done at the time the detailed plan of study is developed in consultation with the faculty adviser. The plan of study must be filed with the Graduate Division during the term of matriculation. Transfer of credit for courses that are taken at other institutions after matriculation into the Graduate Division in the Lyle School of Engineering is not normally permitted. Any deviations must be approved in writing by the adviser, department chair and the associate dean prior to such action and will be granted only under extenuating circumstances, as determined by each department.

## **Fast Second Master's Degree**

Students who are currently enrolled in an SMU Lyle graduate program and who are seeking a new master's degree from SMU Lyle must take a minimum of 18 credit hours of Lyle graduate coursework for the new SMU Lyle master's degree, and these hours will not be applied toward another SMU graduate degree. In such cases, the master's degree will not be awarded until a minimum of 30 credit hours of graduate coursework has been completed at SMU.

Students who hold an SMU graduate degree and who are seeking a new master's degree from SMU Lyle must take a minimum of 18 credit hours of graduate coursework for the new master's degree, and these hours must not have been applied toward another SMU graduate degree.

## **The Accelerated Pathways Master's Degree Program**

The Accelerated Pathways program permits undergraduate Lyle Engineering students to take some graduate courses while an undergraduate, which will count both toward B.A./B.S. and M.A./M.S. degrees. Up to nine (9) semester credit hours of graduate course work may be permitted to be taken as an undergraduate and be applied toward fulfilling the undergraduate degree requirements. In such cases, students may fulfill both Bachelor's and Master's degree requirements in as few as 21 semester credit hours beyond the B.A./B.S. coursework.

Furthermore, because the graduate work is spread over two or more academic years, students have a greater selection of courses in both their undergraduate and graduate studies and are able to complete a thesis, should they so desire. The student must work closely with his or her academic adviser to ensure that the requirements of the Accelerated Pathways program, the B.A./B.S. degree, and the M.A./M.S. degree all are met.

### **Requirements**

For students admitted to the Accelerated Pathways program, up to nine (9) semester credit hours of graduate courses (7000-level and above) may be applied toward fulfilling the student's undergraduate program requirements. The student must complete a minimum of 21 semester credit hours of graduate course work at SMU beyond the undergraduate residency requirement to satisfy the graduate residency requirement. In addition, the Accelerated Pathways program student is permitted to take additional graduate courses while an undergraduate, up to their eighth semester, that can be marked for graduate credit only. No graduate course work for graduate-only credit will be permitted after the eighth semester, although the students will be permitted to take dual-credit graduate courses (up to 9 hours) even beyond the eighth semester. Furthermore, the student must take at least one of the courses for the graduate degree while holding graduate status, i.e., after the student graduates with the undergraduate degree.

NOTE: Undergraduate students may take graduate courses only after they have reached senior status (90 or more earned credit hours).

### **Admission Requirements**

For admission to the Accelerated Pathways program, the student must:

1. Be enrolled in an undergraduate program in the Lyle School of Engineering;
2. Have achieved junior-level status;
3. Apply no later than the semester before they finish their undergraduate studies;
4. Have an overall GPA of 3.000 or higher;
5. Upon request, provide three letters of recommendation, one from the student's academic adviser and two from other faculty members in the School of Engineering; and
6. Be accepted into the desired M.A./M.S. program

### **Bachelor's Degree Requirements**

All undergraduate degree requirements must be satisfied, with up to 9 semester credit hours of graduate course work (7000 and above) applying toward the satisfaction of those requirements. It is important to note that the graduate courses must be taken at the 7000 level from the beginning, as no conversion from 5000 to 7000 will be permitted after the add/drop deadline in the semester the course is taken. The undergraduate adviser should be consulted on the appropriateness of the 7000 dual-counting courses for the undergraduate degree.

### **Master's Degree Requirements**

To receive a master's degree under the Accelerated Pathways program, the student must have a cumulative GPA of 3.0 in the M.S. degree course work (including the graduate course work applied towards the undergraduate degree requirements), and satisfy all requirements for the master's degree. The master's degree requirements must be completed after the semester the student graduates with the bachelor's degree. The designated graduate adviser should be consulted when registering for any graduate courses, to make sure that these courses satisfy requirements of the master's degree pursued.

## Graduate Cooperative Education Program

The graduate co-op program is an academic enrichment opportunity designed to give students the ability to apply their academic studies to real-world problems. Qualified students may apply to join this program and are eligible to enroll up to two terms of relevant professional work experience. The work experience must be related to the student's major area of study and is subject to these regulations:

1. Students are eligible to apply for graduate co-op only *after* completion of both a fall term and a spring term.
2. Students must be in good academic standing to be admitted to the co-op program with a minimum GPA of 3.000.
3. Students must secure their own co-op position.
4. Co-op positions must be full-time, and subsequent co-op positions must be with eligible employers.
5. Students may not quit co-op assignments in midterm to seek a position with a different employer.
6. All paperwork must be completed prior to the deadline:
  - a. SMU graduate co-op application (requires adviser, department chair and director's approval).
  - b. Legal agreement between SMU and employer (requires supervisor, Lyle dean and SMU provost approval).
  - c. Curricular practical training request form for international students. (CPT form requires adviser, department chair and director's approval.)
  - d. Offer letter from employer stating beginning and ending dates, salary per hour and job description on company letterhead and signed by supervisor. The letter must also indicate that the position is full-time (40 hours per week).
  - e. Application deadline: All co-op paperwork for the work term is due by the deadline set each term by the graduate co-op director, and the deadline is approximately eight business days before the start of the term. **Note:** The process to obtain an I-20 Certificate of Eligibility from English for Internationals takes five business days after the co-op paperwork has been completed.
7. The duration of the co-op work term must coincide with the SMU academic term.
8. Students must be enrolled in graduate co-op course ENGR 8199 while on co-op work assignments.
9. Students may take no more than three credit hours (one course) during a co-op work term, and only if the course is needed to graduate on time. The course may be taken on campus or by distance learning.
10. Students must complete a minimum of two, but no more than three, co-op work terms.
11. Students may complete only spring/summer or summer/fall back-to-back work terms. (Fall/spring and spring/fall back-to-back work terms are not allowed.)
12. Students must submit a report at the end of each work term, signed by the student's supervisor, academic adviser and department chair, no later than two weeks after the end of the co-op work term.
13. Students must read and become familiar with the graduate engineering co-op policy.

## Nondegree Study

Nondegree studies are subject to the following:

1. A baccalaureate degree is required for admission.
2. Admission to nondegree study requires the consent of the program director who oversees the course(s) taken by the student.
3. Students who apply to the Lyle School of Engineering graduate programs after the deadline for admission may be offered the nondegree option to begin their studies.
4. Students applying for nondegree study must submit an application, an application fee of \$75 and an official transcript from the institution that conferred the student's baccalaureate degree.
5. Students may not take more than three courses on a nondegree status.
6. Students on a nondegree study plan may apply to study toward a graduate degree. All requirements for admission must be met. After a student is admitted, he or she may petition to transfer the nondegree courses subject to approval of the adviser, department chair and associate dean.

Tuition for nondegree students is the same as tuition for students who take the course toward a degree.

## Off-Campus Distance Education

SMU, through its Lyle School of Engineering (Lyle), has supported distance education graduate programs for nearly 50 years. The Lyle Distance Education (DE) program is designed to provide qualified students a rewarding graduate education that fits their busy lifestyles. DE instruction has proven to be an effective education medium with advantages such as access to digital library resources and the ability to replay the lectures as many times as needed.

Lyle graduate course lectures are recorded "live" in one of the school's state-of-the-art studio classrooms. Our classroom recordings include the lecture and all dialogue in the class between the students and the professor. The recorded lectures are then posted to a Lyle server within 24 hours of the on-campus course. Subsequently, DE students download the lecture to their computer and watch it on-demand. Course handouts, syllabi and assignments are distributed by the department or via Canvas, SMU's learning management system. Graded coursework is returned as directed by the professor. DE students are encouraged to contact the instructor by email or telephone to ask questions and clarify points from the lecture. DE students are required to identify a proctor for all exams. Proctors are verified and vetted in accordance with SMU's academic standards and are required to agree and abide by the SMU Honor Code.

Lyle offers DE students the opportunity to complete master's degrees in professional and traditional engineering disciplines. Each of the programs is interdisciplinary in content and flexible in approach. The programs available via distance education are as follows:

Civil Engineering	Manufacturing Systems Management
Computer Engineering	Mechanical Engineering
Computer Science	Operations Research
Datacenter Systems Engineering	Cybersecurity
Electrical Engineering	Software Engineering
Engineering Management	Sustainability and Development
Environmental Engineering	Systems Engineering
Information Engineering and Management	Telecommunications and Network Engineering

**Note:** Students should see specific program sections for the admission and curricular requirements for each program.

More information regarding Lyle off-campus distance education graduate programs can be obtained by visiting [www.smu.edu/Lyle/Graduate/ProspectiveStudents/Lyle-Distance-Education-Program](http://www.smu.edu/Lyle/Graduate/ProspectiveStudents/Lyle-Distance-Education-Program).

[https://www.dca.ca.gov/consumers/complaints/oos\\_students.shtml](https://www.dca.ca.gov/consumers/complaints/oos_students.shtml)

Most students receive a quality education and have a generally positive experience. However, in the event a California resident enrolled in an online program at public or private nonprofit colleges or universities that are physically located in other states believes the institution's administrative processes or educational programs are compromised, DCA should be notified. A complaint may be filed by writing to DCA or calling DCA's Consumer Information Center (CIC) at:

California Department of Consumer Affairs  
Consumer Information Center  
1625 North Market Blvd., Suite N-112  
Sacramento, California 95834  
Telephone: (833) 942-1120

## Doctor of Engineering Degrees

The objective of a Doctor of Engineering degree is to provide students with adequate preparation to meet doctoral standards in an applied science or engineering practice. Applied science, as a focus for a doctoral degree, refers to the study of advanced theory and its application to a practical problem in order to test and verify performance and limitations. A doctorate with focus on applied science requires a high level of expertise in the theoretical aspects of the relevant scientific principles and experience with the details of the implementation of this theory on realistic problems. Engineering practice, as a focus for a D.E. degree, is the study of the different aspects that play a role in the transfer of technology from its inception in research to the intended engineering environment. This requires a high level of expertise in 1) theoretical aspects of the relevant scientific principles, 2) solving the problems and understanding the details of the transfer and application of the technology and 3) economic issues.

A D.E. degree is distinguished from a Ph.D. degree in that a Ph.D. is expected to make a significant advance to scientific knowledge, whereas a D.E. is expected to make a contribution to science by studying its implementation and participating in the transformation of knowledge into technology. Currently, D.E. degrees are offered with majors in engineering management and software engineering.

Specific degree requirements for the D.E. with a major in software engineering are found in the Computer Science and Engineering Department section of this catalog. Specific degree requirements for the D.E. with a major in engineering management are found in the Engineering Management, Information and Systems Department section of this catalog.

## Sequence of Events

The following events must occur in the process of obtaining a Doctor of Engineering degree. Some events may occur concurrently.

1. Acceptance into the program and assignment of an academic adviser.
2. Preparation of a formal degree plan (form labeled "Degree Plan – Doctor of Engineering") and creation of the supervisory committee ("Recommendation and Certification of Supervisory Committee").
3. Basic coursework and preliminary counseling examination (if required by the student's department).
4. Written qualifying examination.
5. Submission of written proposal for praxis project.
6. Oral qualifying examination and proposal presentation.
7. Admission to candidacy (form labeled "Admission to Candidacy").
8. Preparation of praxis.
9. Review of praxis by project supervisor and chair of committee.
10. Presentation and defense of praxis to the committee (form labeled "Report on Thesis or Dissertation and/or Final Examination").

## Admissions Criteria

Persons with a B.S., or equivalent baccalaureate degree, and a master's degree may qualify for admission. The undergraduate degree must be in a technical or applied science area. This includes all engineering degrees as well as degrees in mathematics and applied sciences. The master's degree may be in a technical area or other areas such as business administration or economics. The degrees must be from U.S. colleges or universities accredited by regional accrediting associations, or be international degrees equivalent to a U.S. bachelor's and/or master's degrees from colleges and universities of recognized standing. Each program has additional information on appropriate academic backgrounds required for admission into that program.

## Initial Advising

Upon acceptance into a D.E. program, the student is assigned an academic adviser. This adviser is a resident tenured or tenure-track faculty member in the student's home department. The selection of the adviser is an administrative decision that may not necessarily be connected to the student's academic interests. At the outset, the student should identify whether the focus of the doctorate will be in applied science or in engineering practice. The adviser and the student will prepare a formal degree plan based on the student's academic background and declared interests and objectives. This plan of study should present clearly how past and proposed coursework will satisfy the requirements

for the degree. It should also provide a term-by-term schedule for taking courses consistent with current course offering projections.

## **Total Academic Credit**

The total credit hour requirement is 78–66 credit hours of graduate coursework and 12 credit hours devoted to the praxis project. Postbaccalaureate coursework from other institutions and other graduate degrees may be applied toward the degree requisites subject to approval of the supervisory committee. There must be a minimum of 36 credit hours of graduate coursework and a minimum of 12 credit hours of praxis project work, none of which have been nor can be applied to any other degree.

## **Residence Requirement**

The term *residence requirement* refers to the minimum number of required academic credit hours a student must complete while properly enrolled at SMU. At least 18 of the 66 credit hours of coursework as well as the 12 credit hours devoted to the praxis must be taken in residence at SMU.

## **Recognition of Previous Postbaccalaureate Coursework**

Graduate-level courses may be used to fulfill the course requirements for the degree. Any course assigned to a specific requirement must be approved by the supervisory committee.

## **Preliminary Counseling Examination**

The preliminary counseling examination is designed to establish the academic strengths and weaknesses of the student. If required by the department, the individual department determines the format of the preliminary counseling examination. Depending on the results of the preliminary counseling examination, one of the following three actions is taken: 1) the student is allowed to take advanced courses for the degree, 2) the student is disallowed from further study at SMU or 3) remedial action in areas of academic weakness is recommended.

## **The Qualifying Examination**

The qualifying examination marks the transition from preparation to execution of the doctoral research. Upon its successful completion, and the presentation of a research plan, the student is certified to proceed with the research directly related to the praxis. Beyond this point, the student is formally recognized as a doctoral candidate. Transition into candidacy occurs after the following three requirements are satisfied.

## **The Written Qualifying Examination**

The written portion of the qualifying examination is composed of several tests. Members of the supervisory committee administer the tests. The supervisory committee has full discretion as to the choice of material and the format and style of the written exam. Usually, the tests are designed to measure knowledge in an area of expertise of an individual supervisory committee member or on a topic from a course taught by that member. Tests are commonly take-home exams over the course of a week or more. It is the responsibility of the student to inquire as to the nature and format of the tests and the availability of the supervisory committee members when scheduling the exam. When the student is ready to proceed with the written portion of the qualifying examination, and when all participating examiners have been consulted and have agreed on a schedule, the academic adviser issues a memorandum to all members of the supervisory committee formalizing the schedule for this portion of the exam.

## **The Written Research Proposal**

A formal document describing in detail the proposed research project that constitutes the praxis must be submitted to the supervisory committee in time to be read prior to the oral presentation. This document outlines the responsibilities of the supervisory committee as well as presents a realistic plan and time schedule for the completion of the praxis.

## **The Oral Qualifying Examination and Proposal Presentation**

The oral qualifying examination and the oral presentation of the research project proposal may be presented following the successful completion of the written examination and when the members of the supervisory committee have had time to review the written research proposal. The oral qualifying examination is a continuation of the written qualifying examination. At this time, the supervisory committee may proceed with an oral examination of the student. After this, the student presents the proposed praxis project. The student must be prepared to defend the proposal to the supervisory committee.

## **The Doctorate Praxis Project**

### **Composition of the Supervisory Committee**

The purpose of the supervisory committee is to supervise the student's praxis project. The supervisory committee is made up of at least five members. At least four members of the committee must be resident tenured or tenure-track faculty members at SMU, three of whom must be members of the student's home department. The chair of the committee must be a member of the resident tenured or tenure-track faculty of the Lyle School and a member of the student's home department; however, a different committee member may act as the praxis director. Other members of the supervisory committee may come from related areas such as engineering, business or economics. One committee member can be from outside the Lyle School of Engineering. The supervisory committee must be approved by the chair of the department and the associate dean, who is an ex officio member of the supervisory committee. The supervisory committee may be modified as the student progresses in the program. The supervisory committee may add members to include faculty members from other areas of specialization or cognizant members from industry who may contribute to the praxis.

### **The Project and Final Defense**

As a culmination of a doctoral program, the student must perform a suitable engineering praxis (practical engineering study), including both a written report and an oral presentation of the results. The scope of the praxis may be broad or narrow and may involve engineering design, development or any other major category of engineering work, typically revolving around a well-defined project relevant to current engineering practice. Good scholarship, including recognition of both previous and current work in the subject area, is required. The praxis may be conducted on campus or at an industrial location. The proposal will 1) outline the general technical scope of the project, 2) state the economic and technical relevance of the work and 3) give a time schedule for accomplishing the project. It is expected that this proposal will be worked out in close consultation with the faculty member supervising the work and cognizant industry people when the project is to be conducted off campus. Once the project is set into motion, the student is expected to adhere to the time schedule and to keep the supervisory committee informed on a regular basis of progress made. The project may focus on a well-defined practical problem or on a more general theoretical development. If the focus is a practical problem, economic considerations must also be incorporated in the praxis. If the focus is more general, the supervisory committee will determine whether or not economic aspects will be required.

### **The Praxis Report**

The praxis report is expected to be a mature and competent piece of writing. The praxis format must follow the University guidelines as indicated in the Guidelines for Preparation of Theses and Dissertations. Upon successful completion of the praxis defense, the abstract original must be signed by the praxis director, and the original half-title page of the praxis must be signed by all the supervisory committee members attending the final examination. After the praxis has been checked and approved by the Lyle School of Engineering examiner, the praxis is uploaded electronically to the SMU/UMI Dissertation Publishing submission website. One extra copy of the abstract signed by the adviser and one copy of the original half-title page with signatures must be delivered to the director of Graduate Student Experience before the final examination period in a regular term and before examinations in a summer term.

## **Doctor of Philosophy Degrees**

General requirements for a Ph.D. degree include the following components: 1) total academic credit, 2) residence requirements, 3) course requirements, 4) preliminary counseling examination, 5) qualifying examination, 6) admission to candidacy, 7) dissertation, 8) final examination and 9) supervisory committee. A student admitted to a doctoral

program is expected to have been awarded a master's degree in the same or a closely related program or to earn such a master's degree during the course of the program. The following sections define and discuss these general requirements. Specific details about Ph.D. program requirements are found in the departmental sections of this catalog.

## **Total Academic Credit**

The Lyle School of Engineering requires for a Ph.D. degree a *minimum* academic credit of 54 credit hours earned in coursework beyond the baccalaureate degree or 24 credit hours earned in coursework beyond a master's degree, in addition to 24 credit hours earned in dissertation work. There must be a minimum of 24 credit hours of graduate coursework and a minimum of 24 credit hours of dissertation work, none of which have been nor can be applied to any other degree. The student's supervisory committee determines the precise amount of course credit to be required, subject to the approval of the department chair and the associate dean. A student who is actively working on his or her dissertation must be enrolled in dissertation study each term until completion of all requirements for a Ph.D. degree.

## **Resident Requirement**

The term *residence requirement* refers to the minimum number of required academic credit hours a student must complete while properly enrolled at SMU. The residence requirement is 30 credit hours of graduate credit, normally the last 30.

## **Time Limitations**

A Ph.D. degree is given in recognition of the highest attainment in a specific field. It requires novel, high-quality research work recognized and accepted by other scholars in the field. Due to this need for timeliness, all requirements for a Ph.D. degree must be satisfied within five years after the date the qualifying examination is passed. If such period has expired without successful completion of a Ph.D. degree, the associate dean, in consultation with the thesis adviser and the department chair, may ask the student to retake the Ph.D. qualifying examination or may disallow the student from further study.

## **Preliminary Counseling Examination**

Upon admission of each student into the program, the associate dean, on the recommendation of the department chair, appoints a faculty adviser. The faculty adviser is responsible for providing the student with advice on a proper plan of study on fundamental courses in the discipline to prepare for the preliminary counseling examination, which is designed to establish the academic strengths and weaknesses of the student. If required by the department, the individual department determines the format of the preliminary counseling examination. The background expected for this examination is similar to that of a master's level, and the final examination for the master's degree may substitute for this exam for students who complete master's degrees at SMU. Depending on the results of the preliminary counseling examination, one of the following three actions is taken: 1) the student is allowed to take advanced courses for a Ph.D., 2) the student is disallowed from further study at SMU or 3) remedial action in areas of academic weakness is recommended.

Every student who is admitted to a Ph.D. program must form a supervisory committee with the approval of the dissertation director, the department chair and the associate dean. Because the chair of this committee normally will also be the student's dissertation director, the student should decide upon a general area of the dissertation before requesting the appointment of a supervisory committee. It is essential that the student do this quickly because there are no assurances that graduate work completed before the appointment of the committee will be accepted as part of a Ph.D. program.

## **Course Requirements**

The minimum academic coursework of 54 credit hours should include a major as well as a minor area of investigation. The individual departments identify specific course requirements for these areas. As a general guideline, at least 12 credit hours are required for the minor, which should be in an area providing breadth as well as support to the major field of investigation.

For a Ph.D. program, qualifying examinations and the dissertation are paramount. Course requirements are identified to facilitate the student's training toward the qualifying examination. Of the 24 credit hours required in coursework beyond a master's degree, 12 credit hours must be taken at SMU. Generally, up to 12 credit hours of graduate courses may be transferred into a Ph.D. program from an institution approved by the Graduate Division, provided that such courses 1) were completed in the five years prior to matriculation, 2) were taken toward a Ph.D. degree and 3) received grades of *B-* or higher. The request to transfer credit must be made using appropriate forms during the term of matriculation to the Graduate Division. Grades of courses transferred for credit are neither recorded nor used in computing GPAs. Acceptance of transfer credit requires approval of the student's faculty adviser, department chair and the associate dean. Transfer of any credit for courses taken at other institutions after admission to SMU is not normally permitted.

## Qualifying Examination Process

These examinations must be taken after the student has completed some of the advanced coursework in the major and minor fields of investigation.

Each department within the Lyle School of Engineering specifies the formats, schedules and areas for the qualifying examinations. The student should contact his or her department for these requirements.

This examination process is comprehensive in scope, covering the student's entire academic career, and includes the major and minor areas planned for the Ph.D. degree. It is conducted by the supervisory committee with the aid of faculty members drawn from the major and minor areas of concentration, and it consists of both written and oral parts. As part of the oral examination, the student will be required to discuss the proposed dissertation topic. This is desirable because a student's program of study should be supportive of his or her intended dissertation research. Successful performance on the examination results in a recommendation that the student be admitted to candidacy for a Ph.D. degree. The committee may believe that, while a student passed the major parts of the examination, his or her performance disclosed weaknesses requiring further coursework. The committee may then modify the student's plan of study to include specific additional courses before he or she may be recommended for admission to candidacy.

Should the student fail the examination process, the supervisory committee may recommend a re-examination, subject to approval by the department chair and the associate dean. The right of re-examination is not automatic; rather, it is a special privilege recommended in those cases in which the supervisory committee believes a student has the necessary potential but needs some additional preparation.

## Admission to Candidacy

A graduate student does not become a candidate for a Ph.D. degree until the formal application for candidacy has been approved. Such admission requires the approval of the student's supervisory committee, the department chair and the associate dean. The approval is based upon 1) passing the qualifying examination, 2) the academic record of the student as attested by a 3.000 GPA or better (4.000 = *A*), 3) selection of a tentative title for the dissertation and 4) the student's overall fitness as judged by the supervisory committee. The formal application for candidacy should be submitted as soon as these four requirements have been met, as judged by the supervisory committee.

## Dissertation Requirement

The dissertation format must follow the *Guidelines for Preparation of Theses and Dissertations*. Each student is also expected to submit articles for publication in reputable journals and conferences appropriate to the field of research.

The most clearly distinguishing characteristic of a program leading to a Ph.D. degree is the requirement that the candidate write a dissertation embodying the results of a significant and original investigation. The dissertation is expected to be a mature and competent piece of writing and must make a significant and novel contribution to the engineering or applied science discipline. The work it reports may be basic scientific research, engineering research or creative design. The progress of the student toward a Ph.D. degree is monitored closely by the thesis adviser and the supervisory committee, with an annual report to the department chair. In the event a student is judged by the supervisory committee not to be making satisfactory progress, he or she will be placed on probation for one term, at the

conclusion of which his or her progress will be reevaluated. Should the progress be found unsatisfactory, the student will be suspended.

Upon successful completion of the dissertation defense, the dissertation director must sign the abstract original, and all faculty members attending the final examination must sign the original half-title page of the dissertation. After the dissertation has been checked and approved by the Lyle School of Engineering examiner, the dissertation is uploaded electronically to the SMU/UMI Dissertation Publishing submission website. One extra copy of the abstract signed by the adviser and one copy of the original half-title page with signatures must be delivered to the director of Graduate Student Experience before the final examination period in a regular term and before examinations in a summer term.

## **Dissertation Research in Industrial Laboratories**

Under special circumstances, some students may be permitted to undertake their dissertation in industrial laboratories in the Dallas-Fort Worth area or elsewhere. This situation may arise when the research requires special laboratory facilities that are not available at SMU but that are available elsewhere. Such an operation creates special problems for both the University and the company, particularly when the dissertation research is also the student's work assignment as an employee of the company. From the viewpoint of the school, the principal requirement is that the particular research on which the dissertation is to be based be undeniably the individual work of the student. The second requirement on which the school must stand is that the dissertation results be available for free dissemination via open publication, whatever those results may be.

To minimize difficulties arising out of these requirements, the Lyle School of Engineering has adopted the following regulations:

1. The chair of the student's supervisory committee must be a member of the resident tenured or tenure-track faculty of the school.
2. The student may register for dissertation-research credit only after appointment of a dissertation director by the department chair, subject to the approval of the associate dean.
3. The supervisory committee must approve the specific character of the work to be conducted, the conditions under which it is conducted and the time schedule for completion. It is expected that the supervisory committee shall have access to the student's experimental apparatus, and the chair of that committee shall join with the dissertation director in meeting at intervals with the student at the scene of the research to evaluate the process and the conditions under which the research is carried out.
4. The dissertation director has the responsibility to ensure that the student's work is identifiably the student's own and that needed equipment belonging to SMU will not be diverted from the dissertation research by the company except in cases of extreme need.

## **Supervisory Committee**

The membership of the supervisory committee is selected by the student in consultation with the dissertation director. After the student has obtained the written consent of those selected, he or she must obtain the written endorsement of the department chair before transmitting the list to the associate dean for official certification. The supervisory committee is made up of at least five members. Three resident tenured or tenure-track faculty members are drawn from the student's department, as well as one resident tenured or tenure-track faculty member from each minor field. The chair of the supervisory committee shall be a resident tenured or tenure-track member of the school faculty and shall normally be the dissertation director and a member of the student's department. Thus, a minimum of four members must be resident tenured or tenure-track faculty of Southern Methodist University. The supervisory committee should be constituted as early as possible after the student has begun doctoral work and normally before the completion of 15 credit hours of work beyond the master's degree (or 45 credit hours of work beyond the baccalaureate degree). The associate dean is an ex officio member of all supervisory committees and should be notified in writing, at least one week in advance, of all meetings of such committees. The associate dean may, at his or her own discretion, reconstitute any supervisory committee.

The duties of a supervisory committee shall be

1. To assist the student in interpreting all regulations governing the degree sought. This duty does not absolve the student from the sole responsibility to remain informed concerning these regulations.

2. To meet immediately after its appointment for the purpose of passing on the qualifications of the student, to discuss and approve a plan of study, and to set a tentative time schedule for the qualifying examination.
3. To discuss and approve the dissertation project proposed by the student and the plans for implementing it.
4. To participate in the qualifying examination.
5. To convene whenever needed during dissertation research to review procedure, progress and expected results, and to develop suggestions for the remainder of the work. The supervisory committee may be convened by either the chair of the supervisory committee or the associate dean of graduate studies. The supervisory committee may suggest discontinuation of the student if sufficient progress toward a Ph.D. degree has not been achieved.
6. To conduct the final examination.

## **Final Examination**

Upon completion of all other requirements, a final examination of the candidate will be announced, registered with the Graduate Division and subsequently conducted by the supervisory committee. The candidate must make six unbound copies of the complete draft version of his or her dissertation available to the Graduate Division for distribution to the members of the supervisory committee at least three weeks prior to scheduling of the final examination. This examination, which is conducted orally, must enable the committee to satisfy itself that the dissertation is an original piece of work, either in research or creative design; that it has been carried out in keeping with the highest standards of investigation and reporting; and that it makes a contribution to knowledge that is of value to the engineering profession or scientific community. Satisfactory performance on this examination is the last requirement to be met for a Ph.D. degree. The degree may be awarded at the end of the term in which the final examination is passed, but the prospective candidate should note that at least one academic year must elapse between the passing of the qualifying examination and the conferring of the degree.

## **Multidisciplinary Studies**

A Ph.D. degree in the Lyle School of Engineering may be pursued in areas that do not belong strictly to any one department but nevertheless are of interest to some faculty members of the school. In such cases, the composition of the supervisory committee will be made flexible in order to allow for the interdisciplinary nature of the program, with the single restriction that at least three of the five members of the supervisory committee are tenured or tenure-track faculty members in the Lyle School of Engineering. Additional information is found in the Multidisciplinary Studies section of this catalog.

# **Lyle School of Engineering: Academic Programs**

## **Applied Science**

### **Applied Science, Ph.D.**

A Ph.D. degree in the Lyle School of Engineering may be pursued in areas that do not belong strictly to any one department but nevertheless are of interest to some faculty members of the school. In such cases, the composition of the supervisory committee will be made flexible in order to allow for the interdisciplinary nature of the program, with the single restriction that at least three of the five members of the supervisory committee are tenured or tenure-track faculty members in the Lyle School of Engineering. The major area of this degree will be designated as applied science. Admission to and oversight of program is at the discretion of a designated academic officer in the Lyle School of Engineering Dean's Office, who also serves as department chair.

Applicants to the program must meet all requirements for admission stated in the general admission requirements section for Doctor of Philosophy Degrees section of this catalog. Additionally, all applicants must secure the approval of a tenured or tenure-track member of the Lyle Engineering faculty to serve as dissertation adviser and dissertation committee chair, submit a tentative supervisory committee form with 5 members at least 4 of which must be tenured track Lyle faculty including the dissertation adviser, and submit a research proposal.

### **Applied Science, M.S.**

Applicants to the M.S. with a major in applied science must meet all relevant admission requirements set forth in the Master of Science and Master of Arts Degrees section of this catalog. Additionally, all applicants must secure the approval of a tenured or tenure-track member of the Lyle Engineering faculty to serve as faculty adviser. Thesis track applicants must also submit a tentative supervisory committee form with at least three tenured track Lyle faculty members and submit a research proposal. Admission to and oversight of the program is at the discretion of a designated academic officer in the Lyle School of Engineering Dean's Office, who also serves as department chair.

## General Information

### Department Facilities

CEE departmental offices and instructional and research laboratories are located in the new, state-of-the-art J. Lindsay Embrey Engineering Building, which is certified as a Leadership in Energy and Environmental Design Gold Building in LEED's internationally recognized green building certification program. Teaching and research laboratories include dedicated space for air quality and meteorology, industrial hygiene, environmental microbiology, soil and water quality, mechanics of materials and structural engineering, hydraulics and hydrology, geotechnical engineering and transportation materials, infrastructure and environmental systems, and intelligent transportation systems.

The environmental teaching and research laboratories have sophisticated analytical capabilities for performing chemical analyses of air samples and for assessing the quality of water supplies and wastes and the effectiveness of water and waste treatment procedures. Major equipment includes a Thermo Scientific inductively coupled plasma mass spectrometer, a PerkinElmer fourier transform infrared spectrometer with attenuated total reflectance, a Dionex ion chromatography unit, an Agilent gas chromatography and mass spectrometry unit, a PerkinElmer thermogravimetric analyzer with scanning calorimetry, a Quantachrome surface area analyzer, and an Agilent high performance liquid chromatograph. Other miscellaneous equipment includes continuous ambient air monitoring devices, UV-visible spectrophotometers, pH and other specific ion meters, incubating ovens, microscopes, anaerobic chamber, furnaces, centrifuges, dissolved oxygen meters, several temperature control baths, hot and cold rooms, autoclave, microscopes, and a UV light reader.

Civil engineering teaching and research laboratories include dedicated space for structural engineering, hydraulics and hydrology, geotechnical engineering and transportation materials, and intelligent transportation systems. The Structural laboratory is equipped for instruction and research on the behavior of materials under various loading conditions. This lab is equipped with an Instron 5582 universal materials testing machine, a 16' x 20' strong floor for small scale load and reaction frames, and comprehensive data acquisition capabilities. Data from string potentiometers, accelerometers, cameras, and strain gages is collected by a wired Strainbook 616 DAQ and Lord Microstrain wireless nodes through a Lord WSDA base station. Major hydraulics and hydrology laboratory equipment includes a 5-meter open channel flume with various accessories (e.g., undershot weir, rotary undershot gate, and sharp and broadcrested weirs), a basic hydraulics bench for fundamental fluid mechanics experiments (e.g., hydrostatic pressure forces, Bernoulli's theorem and pipe friction losses), and a hydrology study system for hydrology experiments (e.g., simulating rainfall over watersheds and measuring resulting outflow hydrographs, and groundwater flow profiles). The geotechnical engineering and transportation materials laboratory has a Geocomp soil testing equipment automated set, a Geocomp direct residual shear test system automated set, a pocket penetrometer and the torvane shear device, and liquid and plastic limit devices. Traditional geotechnical testing equipment such as sieve analysis, hydrometer, constant head/falling head permeameter, liquid and plastic limits, compaction, and relative density are also available.

The Embrey Building also houses computing facilities with general applications software and specialized software for engineering problems, including air dispersion modeling, AutoCAD, ArcGIS, hydrologic and hydraulic modeling,

statistical analysis and stochastic modeling, structural analysis and design, transportation systems planning and analysis, and water quality modeling.

## Graduate Programs

Graduate programs in the Department of Civil and Environmental Engineering educate and train leaders in the fields of environmental protection, resource management, engineering design, and construction and facilities management. Programs are tailored to the individual needs and interests of students, so that students with interests in studying global climate change, protecting the quality of drinking water, designing the next generation of high-rise buildings or smart highways, managing commercial buildings, or managing large institutional and industrial facilities receive the training they need to excel in their careers.

Civil and environmental engineering are inextricably linked. While civil engineering focuses on the infrastructure of modern society, environmental engineering is concerned with the well-being and health of people and the environment. Civil and environmental engineering entered the early 1900s as a single integrated discipline, when it was critical to address sanitary problems to protect public health and to develop regional water supplies and the civil infrastructure to support rapid urbanization and early industrialization. Separate disciplines gradually emerged, evolving and broadening to address the overall quality and function of modern society – preserving the environment while enabling the realization of an enriched life through technology.

**Graduate Degrees.** The Civil and Environmental Engineering Department offers the following graduate degrees:

Civil Engineering	M.S.C.E.
Environmental Engineering	M.S.Env.E.
Sustainability and Development	M.A.
Civil and Environmental Engineering	Ph.D.

**Civil Engineering Program.** Civil engineers are engaged in planning, design, construction, maintenance and management of the infrastructure of modern society. They are responsible for the design of water-supply and wastewater treatment systems; transportation systems such as highways, railways, waterways, mass transit, airports, ports and harbors; dams, reservoirs and hydroelectric power plants; thermoelectric power plants; transmission and communication towers; high-rise buildings; and even aircraft and aerospace structures, shuttles and space stations. Every major structure critical to this country and global society depends on the work of civil engineers. The civil engineering program prepares graduates for professional and academic careers through a focus in the following areas: 1) construction management, 2) geomechanics and foundations, 3) structural analysis and design, and 4) transportation planning.

**Environmental Engineering Program.** Today, the environmental field is dynamic and wide-ranging, comprising many different disciplines and professional roles. Environmental engineering and science involve not only traditional water and wastewater management, but also the management of hazardous and radioactive materials, pollution prevention and waste minimization, innovative hazardous waste treatment and site remediation processes, environmental and occupational health, resource conservation and recovery, sustainable development of natural resources and air quality management, and air pollution control. In addition, modern manufacturing, both domestic and worldwide, is focusing on products fabricated from recycled and natural materials that are both competitive and harmlessly degraded in the environment. The trend toward global manufacturing will grow stronger in the years ahead. Environmental challenges presented by this movement must be overcome if the economic and lifestyle benefits of globalization are to be extended to all people of the world.

SMU's environmental engineering program prepares graduates for professional and academic careers dealing with a broad spectrum of environmental issues: 1) atmospheric systems and air-pollution control, 2) environmental and occupational health, 3) environmental chemistry and biology, 4) environmental systems and process modeling, 5) hazardous and waste materials management, 6) solid-waste management, 7) surface and groundwater quality management, and 8) wastewater management.

**Contact Information.** For more information about graduate programs in civil engineering and environmental engineering, students should call 214-768-3894 or visit the Department of Civil and Environmental Engineering website at [www.smu.edu/lyle/departments/cee](http://www.smu.edu/lyle/departments/cee). Additional contact and enrollment information is available from the Lyle School of Engineering at 214-768-1817 or [www.smu.edu/Lyle/graduate](http://www.smu.edu/Lyle/graduate).

**Distance Learning.** All M.S. and M.A. degrees offered by the Department of Civil and Environmental Engineering are available to distance learning students. The distance-learning program is managed by the Lyle School of Engineering and is available to students throughout the United States and many foreign countries. Lectures are available via streaming video on the Internet.

## **Civil and Environmental Engineering Ph.D. Admission Requirements**

Applicants are required to satisfy these requirements:

1. An M.S. degree in civil engineering, environmental engineering or a closely related discipline in engineering or the physical sciences from a U.S. college or university accredited by a regional accrediting association, or completion of an international degree that is equivalent to a U.S. master's degree from a college or university of recognized standing.
2. Excellent academic performance in all completed coursework, with a minimum GPA of 3.000 on a 4.000 scale.
3. Submission of a complete application, including a statement of purpose, official transcripts for all previous undergraduate and graduate studies, and payment of appropriate application fee.
4. Official GRE graduate school admission test scores.
5. Three letters of recommendation from individuals who can judge the applicant's potential success as a doctoral student.
6. Graduates from foreign countries are required to submit a notarized financial certification form. All international students whose native language is not English and who have not graduated from an American university must submit a minimum TOEFL English language proficiency score before being considered for admission:
  - 550 – paper-based examination.
  - 213 – computer-based examination.
  - 80 – Internet-based examination.

## **Degree Requirements**

In addition to meeting the Lyle School of Engineering requirements for the Ph.D. degree, candidates are required to satisfy the following:

1. At least 54 credit hours of coursework beyond the baccalaureate degree.
2. A minor of at least 12 credit hours providing breadth and support to the doctoral program.
3. Twenty-four credit hours of dissertation.

The major and minor courses comprising a degree plan for a doctoral student will be determined by the student's advisory committee. These plans will vary among students depending on their background and dissertation research topic. Possible Ph.D. program focus areas include geotechnical engineering, structural engineering, transportation systems management, air pollution control and atmospheric science, or water and wastewater engineering.

## **Qualifying Exam (QE)**

All Ph.D. students will be required to pass a QE to be admitted to candidacy. The QE is administered by the student's supervisory committee, which should be formed and approved by the department and Lyle School at least one month prior to the exam. The exam should be completed no later than 12 months after completing 24 credit hours of coursework towards the PhD.

The QE consists of the following components:

- A comprehensive written exam to be completed prior to the oral exam. The supervisory committee should develop the exam and inform the student of its format and timing at least 2 weeks prior to the start of the written exam. At a minimum, the written exam assesses the student's ability to respond to open-ended questions, apply critical thinking skills, synthesize across course topics, and demonstrate adequate writing skills to complete a dissertation.
- A written dissertation proposal to be submitted to the committee at least 14 days prior to the oral exam. The proposal should include, at minimum, the first draft of the student's first research paper, as well as a plan for completion of the remainder of the dissertation.
- An oral exam, during which the student will present a summary of the dissertation proposal and committee members will ask questions about both written portions of the exam, as well as assess the student's ability to respond effectively to oral questioning.

## **Dissertation**

All Ph.D. candidates will be required to complete and successfully defend a dissertation.

## **Civil Engineering, M.S.C.E.**

The M.S.C.E. offers four areas of emphasis, construction management, geotechnical engineering, structural engineering and transportation systems management, while offering breadth in the areas of environmental engineering and water resources. A minimum of 30 credit hours beyond the baccalaureate degree is required. For full-time graduate students, six credit hours may involve research and completion of a thesis, with approval from the student's adviser, with an additional 24 credit hours of coursework. The program also has the flexibility to meet the needs of part-time students, already working in industry, who typically take the nonthesis route with 30 credit hours of coursework. All civil engineering graduate courses are offered with evening class times or via distance learning to accommodate the schedule of working professionals.

## **Admission Requirements**

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy the following additional requirement: a B.S. in civil engineering or a closely related engineering discipline.

## **Degree Requirements**

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy these additional requirements:

1. A total of 30 credit hours, with a minimum graduate GPA of 3.000 on a 4.000 scale. Additional articulation courses may be required for students without a civil engineering undergraduate degree.
2. Given the multidisciplinary nature of civil engineering, the core curriculum and elective courses comprising the degree plans for M.S. students will vary, depending on the student's undergraduate background and his or her desired area of specialization.

The following sample degree plans are for students who have a civil engineering undergraduate degree and want a primary specialty in construction management, structural engineering, geotechnical engineering or transportation systems management:

### **Primary Specialty: Construction Management**

#### **Core Courses**

Satisfactory completion of the core curriculum consisting of five courses (15 credit hours):

- CEE 7323 - Project Management
- CEE 7330 - Design for Sustainable Buildings and Infrastructure
- CEE 7356 - Civil Infrastructure Systems
- CEE 7365 - Introduction to Construction Management

- CEE 7391 - Special Projects

## Elective Courses

Satisfactory completion of five elective courses (15 credit hours or 6 hours with a **secondary specialty**) chosen from:

- CEE 7304 - Civil and Environmental Informatics
- CEE 7308 - Smart Infrastructure and Environment
- CEE 7329 - Methods and Technology for Sustainability
- CEE 7357 - Civil Infrastructure Operations Management
- CEE 7362 - Engineering Analysis with Numerical Methods
- CEE 7368 - Contracts in Design & Construction
- CEE 7370 - Quality Management in Construction
- EMIS 7303 - Integrated Risk Management

## Primary Specialty: Geotechnical Engineering

### Core Courses

Satisfactory completion of the core curriculum consisting of five courses (15 credit hours):

- CEE 7361 - Matrix Structural Analysis and Introduction to Finite Element Methods
- CEE 7385 - Advanced Soil Mechanics
- CEE 7386 - Foundation Engineering
- CEE 7387 - Geotechnical Earthquake Engineering
- CEE 7388 - Groundwater and Seepage

## Elective Courses

Satisfactory completion of five elective courses (15 credit hours or 6 hours with a **secondary specialty**) chosen from:

- CEE 7096 - Master's Thesis
- CEE 7196 - Master's Thesis
- CEE 7296 - Master's Thesis
- CEE 7396 - Master's Thesis
- CEE 7696 - Master's Thesis
- CEE 7340 - Introduction to Solid Mechanics
- CEE 7362 - Engineering Analysis with Numerical Methods
- CEE 7364 - Introduction to Structural Dynamics
- CEE 7391 - Special Projects
- CEE 8340 - Theory of Elasticity
- CEE 8364 - Finite Element Methods in Structural and Continuum Mechanics
- CEE 8366 - Basic Concepts of Structural Stability

## Primary Specialty: Structural Engineering

### Core Courses

Satisfactory completion of the core curriculum consisting of five courses (15 credit hours):

- CEE 7340 - Introduction to Solid Mechanics
- CEE 7361 - Matrix Structural Analysis and Introduction to Finite Element Methods
- CEE 7364 - Introduction to Structural Dynamics
- CEE 7375 - Advanced Concrete Design

- CEE 7377 - Advanced Steel Design

## Elective Courses

Satisfactory completion of five elective courses (15 credit hours or 6 hours with a **secondary specialty**) chosen from:

- CEE 7096 - Master's Thesis
- CEE 7196 - Master's Thesis
- CEE 7296 - Master's Thesis
- CEE 7396 - Master's Thesis
- CEE 7696 - Master's Thesis
- CEE 7362 - Engineering Analysis with Numerical Methods
- CEE 7364 - Introduction to Structural Dynamics
- CEE 7365 - Introduction to Construction Management
- CEE 7373 - Prestressed Concrete
- CEE 7385 - Advanced Soil Mechanics
- CEE 7386 - Foundation Engineering
- CEE 7391 - Special Projects
- CEE 8340 - Theory of Elasticity
- CEE 8364 - Finite Element Methods in Structural and Continuum Mechanics
- CEE 8366 - Basic Concepts of Structural Stability
- CEE 8368 - Theory of Plate Behavior

## Primary Specialty: Transportation Systems Management

### Core Courses

Satisfactory completion of the core curriculum consisting of five courses (15 credit hours):

- CEE 7378 - Transportation Planning and Traffic Engineering
- CEE 7379 - Highways Design and Safety
- CEE 8379 - Analysis of Transportation Systems
- EMIS 7370 - Probability and Statistics for Scientists and Engineers
- EMIS 8360 - Operations Research Models

## Elective Courses

Satisfactory completion of five elective courses (15 credit hours or 6 hours with a **secondary specialty**) chosen from:

- CEE 7096 - Master's Thesis
- CEE 7196 - Master's Thesis
- CEE 7296 - Master's Thesis
- CEE 7396 - Master's Thesis
- CEE 7696 - Master's Thesis
- CEE 7323 - Project Management
- CEE 7324 - Geographical Information Systems and Mapping
- CEE 7326 - Sustainable Transportation
- CEE 7331 - Air Pollution Management and Engineering
- CEE 7350 - Introduction to Environmental Management Systems
- CEE 7362 - Engineering Analysis with Numerical Methods
- CEE 7365 - Introduction to Construction Management
- CEE 7391 - Special Projects

- CEE 8378 - Transportation Demand Analysis
- CS 7345 - Advanced Application Programming
- EMIS 7331/CS 7331- Data Mining
- EMIS 7313 - Integrated Logistics Support
- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8371 - Linear Programming
- EMIS 8373 - Integer Programming
- EMIS 8374 - Network Flows
- STAT 6336 - Statistical Analysis

## Secondary Specialties

Students can choose to group at least three elective courses (nine credit hours) into the following secondary specialties: smart and resilient infrastructure, environmental health and compliance, or global and sustainable development. Secondary specialties are optional. If a student wishes to pursue this option, he/she must complete the core courses from one CEE primary specialty and at least 9 credit hours in one of the secondary specialties as follows:

### *Smart and Resilient Infrastructure*

#### Required Course

- CEE 7308 - Smart Infrastructure and Environment

At least one course (three credit hours) from the following:

- CEE 7304 - Civil and Environmental Informatics
- CEE 7324 - Geographical Information Systems and Mapping

At least one course (three credit hours) from the following:

- CEE 7325 - Disaster Management
- CEE 7330 - Design for Sustainable Buildings and Infrastructure
- CEE 7362 - Engineering Analysis with Numerical Methods
- CEE 7376 - Intelligent Transportation Systems

#### Elective Courses

- CS 7323 - Mobile Applications for Sensing and Learning
- CS 7394 - Special Topics (Measurement Study Design With Phones & Drones)
- ECE 7372 - Topics in Digital Signal Processing

### *Environmental Health and Compliance*

#### Required Courses

- CEE 7312 - Risk Assessment and Health Effects
- CEE 7314 - Environmental Regulations and Compliance
- CEE 7353 - Environmental Epidemiology

#### Elective Courses

- CEE 7317 - Environmental Organic Chemistry
- CEE 7320 - Biodegradation of Hazardous Organic Pollutants
- CEE 7331 - Air Pollution Management and Engineering
- CEE 7332 - Groundwater Hydrology and Contamination
- CEE 7334 - Fate and Transport of Contaminants

- CEE 7351 - Introduction to Environmental Toxicology

### *Global and Sustainable Development*

#### Required Course

- CEE 7306 - Sustainable Urban Development and Design

At least one course (three credit hours) from the following:

- CEE 7307 - Infrastructure Design for the Developing World
- CEE 7330 - Design for Sustainable Buildings and Infrastructure

At least one course (three credit hours) from the following:

- CEE 7302 - Leadership in Development Sector
- CEE 7303 - Leadership Innovation Hub
- CEE 7324 - Geographical Information Systems and Mapping
- CEE 7326 - Sustainable Transportation
- CEE 7329 - Methods and Technology for Sustainability
- CEE 8325 - The Sustainable Urban Plan
- CEE 8327 - Policy Impacts on Sustainability
- CEE 8329 - Global Resource Assessment and Management

## **Environmental Engineering, M.S.Env.E.**

The M.S.Env.E. emphasizes engineering analysis and design of both technological and management-oriented solutions to environmental problems, while broadly addressing the fundamental science and regulatory aspects of the field. A minimum of 30 credit hours beyond the baccalaureate degree is required. For full-time graduate students, six credit hours may involve research and completion of a thesis, with approval from the student's adviser, with an additional 24 credit hours of coursework. The program also has the flexibility to meet the needs of part-time students, already working in industry, who typically take the nonthesis route requiring 30 credit hours of coursework. All environmental graduate courses are offered in the evening and via distance learning to accommodate the busy schedules of working professionals.

### **Admission Requirements**

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy these additional requirements:

1. A B.S. in one of the engineering disciplines or in a quantitative science closely related to environmental engineering.
2. A minimum of one year of college-level calculus. An additional half-year of differential equations is desirable.
3. A minimum of one year of college-level chemistry. An additional half-year of organic chemistry is desirable.
4. A solid background in the fundamental engineering sciences, including thermodynamics and fluid mechanics, is desirable.

### **Degree Requirements**

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy these additional requirements: 30 credit hours, with a minimum graduate GPA of 3.000 on a 4.000 scale. Additional articulation courses may be required for students without rigorous engineering undergraduate degrees.

## Primary Specialty: Environmental Engineering

### Core Courses

Satisfactory completion of the core curriculum consisting of three courses (9 credit hours):

- CEE 7313 - Environmental Chemistry
- CEE 7322 - Biological Processes and Treatment
- CEE 7354 - Environmental Engineering Principles and Processes

### Processes and Treatment

Satisfactory completion of at least one processes and treatment course (three credit hours) chosen from environmental engineering courses and related engineering disciplines, including:

- CEE 7317 - Environmental Organic Chemistry
- CEE 7318 - Bioremediation of Inorganic Contaminants
- CEE 7319 - Soil Chemistry and Mineralogy
- CEE 7320 - Biodegradation of Hazardous Organic Pollutants
- CEE 7331 - Air Pollution Management and Engineering
- CEE 7332 - Groundwater Hydrology and Contamination
- CEE 7334 - Fate and Transport of Contaminants
- CEE 7335 - Aerosol Mechanics
- CEE 7336 - Urban Hydrology and Hydraulics
- ME 7336 - Intermediate Fluid Dynamics

### Tools/Applications

Satisfactory completion of at least one tools/applications course (three credit hours) chosen from environmental engineering courses, including:

- CEE 7303 - Leadership Innovation Hub
- CEE 7312 - Risk Assessment and Health Effects
- CEE 7314 - Environmental Regulations and Compliance
- CEE 7324 - Geographical Information Systems and Mapping
- CEE 7325 - Disaster Management
- CEE 7338 - Laboratory Methods in Environmental Engineering
- CEE 7362 - Engineering Analysis with Numerical Methods

### Elective Courses

Satisfactory completion of at least five courses (fifteen credit hours), or two courses (six credit hours) with a **secondary specialty**, chosen from courses listed above or below:

- CEE 7096 - Master's Thesis
- CEE 7196 - Master's Thesis
- CEE 7296 - Master's Thesis
- CEE 7396 - Master's Thesis
- CEE 7696 - Master's Thesis
- CEE 7323 - Project Management
- CEE 7350 - Introduction to Environmental Management Systems
- CEE 7351 - Introduction to Environmental Toxicology
- CEE 7353 - Environmental Epidemiology

- EMIS 7370 - Probability and Statistics for Scientists and Engineers
- EMIS 8360 - Operations Research Models
- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8362 - Engineering Accounting
- EMIS 8363 - Engineering Finance
- EMIS 8364 - Engineering Management
- EMIS 8378 - Optimization Models for Decision Support

## Secondary Specialties

Students can choose to group at least three elective courses (nine credit hours) into the following secondary specialties: smart and resilient infrastructure, environmental health and compliance, or global and sustainable development.

Secondary specialties are optional. If a student wishes to pursue this option, he/she must complete the core courses from one CEE primary specialty and at least 9 credit hours in one of the secondary specialties as follows:

### *Smart and Resilient Infrastructure*

#### Required Course

- CEE 7308 - Smart Infrastructure and Environment

At least one course (three credit hours) from the following:

- CEE 7304 - Civil and Environmental Informatics
- CEE 7324 - Geographical Information Systems and Mapping

At least one course (three credit hours) from the following:

- CEE 7325 - Disaster Management
- CEE 7330 - Design for Sustainable Buildings and Infrastructure
- CEE 7362 - Engineering Analysis with Numerical Methods
- CEE 7376 - Intelligent Transportation Systems

#### Elective Courses

- CS 7323 - Mobile Applications for Sensing and Learning
- CS 7394 - Special Topics (Measurement Study Design With Phones & Drones)
- ECE 7372 - Topics in Digital Signal Processing

### *Environmental Health and Compliance*

#### Required Courses

- CEE 7312 - Risk Assessment and Health Effects
- CEE 7314 - Environmental Regulations and Compliance
- CEE 7353 - Environmental Epidemiology

#### Elective Courses

- CEE 7317 - Environmental Organic Chemistry
- CEE 7320 - Biodegradation of Hazardous Organic Pollutants
- CEE 7331 - Air Pollution Management and Engineering
- CEE 7332 - Groundwater Hydrology and Contamination
- CEE 7334 - Fate and Transport of Contaminants
- CEE 7351 - Introduction to Environmental Toxicology

## *Global and Sustainable Development*

### Required Course

- CEE 7306 - Sustainable Urban Development and Design

At least one course (three credit hours) from the following:

- CEE 7307 - Infrastructure Design for the Developing World
- CEE 7330 - Design for Sustainable Buildings and Infrastructure

At least one course (three credit hours) from the following:

- CEE 7302 - Leadership in Development Sector
- CEE 7303 - Leadership Innovation Hub
- CEE 7324 - Geographical Information Systems and Mapping
- CEE 7326 - Sustainable Transportation
- CEE 7329 - Methods and Technology for Sustainability
- CEE 8325 - The Sustainable Urban Plan
- CEE 8327 - Policy Impacts on Sustainability
- CEE 8329 - Global Resource Assessment and Management

## **Sustainability and Development, M.A.**

The M.A. with a major in sustainability and development offers a graduate-level degree to students looking for advanced education in the growing fields of sustainability and development. The program will produce graduates who will connect and contribute to the local community, deal with problems on the national and international stages, and increase the profile of the Bobby B. Lyle School of Engineering and Southern Methodist University as a whole. It will also be synergistic with and an important contributor to the success of the new Hunter and Stephanie Hunt Institute for Engineering and Humanity. All graduate courses are offered with evening class times and via distance learning to accommodate the busy schedules of working professionals.

### **Admission Requirements**

Applicants holding a bachelor's degree from an institution of standard collegiate rank, recognized by the accrediting agencies in whose jurisdiction the college is located, may apply for admission to the M.A. with a major in sustainability and development. Graduates of colleges not fully recognized will be treated as special cases and required to produce evidence attesting to the quality of their programs. Any student whose bachelor's degree is not equivalent to the comparable baccalaureate degree from SMU may be required to take sufficient additional work to make up the deficiency. All applicants must have an overall grade point average of 3.000 (on a 4.000 scale).

### **Degree Requirements**

Candidates are required to satisfy these requirements: 30 credit hours, with a minimum graduate GPA of 3.000 on a 4.000 scale. All students must complete at least nine credit hours of core requirements to include:

#### **Core Courses**

- CEE 7306 - Sustainable Urban Development and Design
- CEE 7330 - Design for Sustainable Buildings and Infrastructure

And at least one of the following:

- CEE 7307 - Infrastructure Design for the Developing World
- CEE 8329 - Global Resource Assessment and Management

## Capstone Synthesis

Three credit hours of capstone experience are required and satisfied by:

- CEE 7128 - MASD Capstone 1A
- CEE 7228 - MASD Capstone 1B

## Concentration Requirements

A depth component of an additional at least six credit hours is required in one specialty, either sustainable global development and design or sustainable management.

### Sustainable Global Development and Design

- CEE 7324 - Geographical Information Systems and Mapping
- CEE 7329 - Methods and Technology for Sustainability
- CEE 8325 - The Sustainable Urban Plan
- CEE 8327 - Policy Impacts on Sustainability
- CEE 8328 - Defining the Future of Global Sustainability
- DSIN 7303 - Human-Centered Design

### Sustainable Management

- CEE 7302 - Leadership in Development Sector
- CEE 7303 - Leadership Innovation Hub
- CEE 7312 - Risk Assessment and Health Effects
- CEE 7327 - Optimization and Reliability for Infrastructure and Environmental Systems
- CEE 8327 - Policy Impacts on Sustainability
- EMIS 8361 - Engineering Economics and Decision Analysis

### Elective Courses

A breadth component of up to twelve credit hours, chosen from the following Sustainability and Development courses, is required.

- CEE 7303 - Leadership Innovation Hub
- CEE 7313 - Environmental Chemistry
- CEE 7325 - Disaster Management
- CEE 7326 - Sustainable Transportation
- CEE 7338 - Laboratory Methods in Environmental Engineering
- CEE 7353 - Environmental Epidemiology
- CEE 7378 - Transportation Planning and Traffic Engineering
- CEE 7380 - Management of Industrial and Mission-Critical Facilities
- DSIN 7301 - The Context and Impact of Design

# **Civil Engineering/Master of Business Administration, M.S./M.B.A.**

## **Joint Master of Science in Engineering/Master of Business Administration Program**

### **Overview**

The Bobby B. Lyle School of Engineering and the Edwin L. Cox School of Business offer a two-year, dual-degree in Master of Science in Engineering (with one of the specific degrees listed above) and Master of Business Administration, with as few as 68 semester credit hours. The program is intended for full-time graduate students with Bachelor degrees in engineering or science. The program is offered on-campus although some of the engineering courses may be taken by means of the Lyle School's distance learning facilities. This program is geared toward recent graduates as well as early-career professionals employed in the engineering and technology sector who desire to broaden and deepen their skills to further their career opportunities and become leaders in technology with the appropriate business and management acumen.

This program takes advantage of the 44-credit hour Fast Track MBA degree offered by Cox School and double-counts up to 6 credit hours of MBA courses as electives in the 30-credit hour MS Engineering degree programs making it possible to obtain two degrees with a total of 68 semester credit hours (24 credit hours of engineering and 44 credit hours in MBA program). As an example, students first complete the 24 credit hour of required courses for the specific MS engineering degree sought during the fall and spring semesters of the first year. Students then start the year-long Fast Track MBA (starting with the summer term and continuing in the fall and spring terms) completing both degrees at the end of the second academic year.

At the conclusion of the dual degree program, students obtain a MS in the specific engineering degree and the MBA.

The overall educational objective of the joint MS-MBA program is to impart the necessary breadth and depth in business and in technology for those individuals preparing for leadership roles in technology firms. The program provides a reduction of 6 credit hours from the total credits that would be required for a student earning the two degrees separately (one of the MS engineering degrees listed at the title page and the Fast Track MBA) and reduces the time to complete both degrees to 2 years, including a summer semester.

### **Admission Requirements**

The applicants must meet both Lyle School of Engineering admission requirements (general School requirements and program admission requirements) for the specific Lyle Master of Science degree and Cox School of Business Fast Track MBA requirements. See admission requirements in each School program section for details. Applicants must submit separate applications to the Lyle and Cox programs.

### **Curriculum Example**

The general course of study for the joint program follows:

#### **Fall Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

### Spring Term (Lyle School)

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

Total Engineering: 24 Credit Hours

### Summer Term (Cox School)

#### Module A Courses

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis

#### Module B Courses

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- MNGT 6001 - Managing Your Career
- Elective: one course (2 Credit Hours)

Term Total: 12 Credit Hours

### Fall Term (Cox School)

#### Module A Courses

- ITOM 6203 - Operations Management
- MNGT 6003 - Business Presentation Techniques
- STRA 6201 - Strategic Management
- Elective: two courses (4 Credit Hours)

#### Module B Courses

- ACCT second required accounting (2 Credit Hours)
- BUSE 6202 - Managerial Economics
- MNO 6201 - Organizational Behavior: Managing and Leading People
- Elective: one course (2 Credit Hours)

Term Total: 16 Credit Hours

### Spring Term (Cox School)

#### Module A Courses

- Elective: four courses (8 Credit Hours)

#### Module B Courses

- Elective: four courses (8 Credit Hours)

Term Total: 16 Credit Hours

Total MBA: 44 Credit Hours

Total for Joint MS-MBA: 68 Credit Hours

## **Environmental Engineering/Master of Business Administration, M.S./M.B.A.**

### **Joint Master of Science in Engineering/Master of Business Administration Program**

#### **Overview**

The Bobby B. Lyle School of Engineering and the Edwin L. Cox School of Business offer a two-year, dual-degree in Master of Science in Engineering (with one of the specific degrees listed above) and Master of Business Administration, with as few as 68 semester credit hours. The program is intended for full-time graduate students with Bachelor degrees in engineering or science. The program is offered on-campus although some of the engineering courses may be taken by means of the Lyle School's distance learning facilities. This program is geared toward recent graduates as well as early-career professionals employed in the engineering and technology sector who desire to broaden and deepen their skills to further their career opportunities and become leaders in technology with the appropriate business and management acumen.

This program takes advantage of the 44-credit hour Fast Track MBA degree offered by Cox School and double-counts up to 6 credit hours of MBA courses as electives in the 30-credit hour MS Engineering degree programs making it possible to obtain two degrees with a total of 68 semester credit hours (24 credit hours of engineering and 44 credit hours in MBA program). As an example, students first complete the 24 credit hour of required courses for the specific MS engineering degree sought during the fall and spring semesters of the first year. Students then start the year-long Fast Track MBA (starting with the summer term and continuing in the fall and spring terms) completing both degrees at the end of the second academic year.

At the conclusion of the dual degree program, students obtain a MS in the specific engineering degree and the MBA.

The overall educational objective of the joint MS-MBA program is to impart the necessary breadth and depth in business and in technology for those individuals preparing for leadership roles in technology firms. The program provides a reduction of 6 credit hours from the total credits that would be required for a student earning the two degrees separately (one of the MS engineering degrees listed at the title page and the Fast Track MBA) and reduces the time to complete both degrees to 2 years, including a summer semester.

#### **Admission Requirements**

The applicants must meet both Lyle School of Engineering admission requirements (general School requirements and program admission requirements) for the specific Lyle Master of Science degree and Cox School of Business Fast Track MBA requirements. See admission requirements in each School program section for details. Applicants must submit separate applications to the Lyle and Cox programs.

#### **Curriculum Example**

The general course of study for the joint program follows:

##### **Fall Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)
- Engineering core/elective (3 Credit Hours)
- Engineering core/elective (3 Credit Hours)

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

### Spring Term (Lyle School)

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

Total Engineering: 24 Credit Hours

### Summer Term (Cox School)

#### Module A Courses

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis

#### Module B Courses

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- MNGT 6001 - Managing Your Career
- Elective: one course (2 Credit Hours)

Term Total: 12 Credit Hours

### Fall Term (Cox School)

#### Module A Courses

- ITOM 6203 - Operations Management
- MNGT 6003 - Business Presentation Techniques
- STRA 6201 - Strategic Management
- Elective: two courses (4 Credit Hours)

#### Module B Courses

- ACCT second required accounting (2 Credit Hours)
- BUSE 6202 - Managerial Economics
- MNO 6201 - Organizational Behavior: Managing and Leading People
- Elective: one course (2 Credit Hours)

Term Total: 16 Credit Hours

## Spring Term (Cox School)

### Module A Courses

- Elective: four courses (8 Credit Hours)

### Module B Courses

- Elective: four courses (8 Credit Hours)

Term Total: 16 Credit Hours

Total MBA: 44 Credit Hours

Total for Joint MS-MBA: 68 Credit Hours

## Civil and Environmental Engineering Courses

### CEE 7049 - Master's Full-Time Status

*Credits: 0*

### CEE 7090 - CEE Seminar

*Credits: 0*

Lectures by invited speakers from industry and academia, including SMU faculty and students, dealing with engineering practice and research topics of current interest in environmental and civil engineering. All students, staff, and faculty are invited.

### CEE 7096 - Master's Thesis

*Credits: 0*

### CEE 7128 - MASD Capstone 1A

*Credits: 1*

This capstone course is required of all MASD students. Conducted as independent directed studies, the two capstone courses are the opportunity for individual focused research, bringing together topics covered over the course of students' MASD degree programs. Capstone projects should relate to students' areas of specialty and show knowledge of sustainability, specific focus on an issue of concern, an understanding of existing initiatives in the focus area, and evidence of participation or collaboration in project based work. In this first course, students choose a direction of study, develop a topic and arrange a faculty mentor (or approved outside professional mentor) with whom to work. In consultation with the mentor, students write up a short proposal and outline their capstone project. The project outline must include both a proposed research direction and a proposed project based study. The project proposal and outline must be submitted to and approved by the course instructor. During this first of two terms, students begin work on the project and are expected to make significant progress on the research portion of the work. Prerequisite: At least 9 credits in the MASD program.

### CEE 7191 - Special Projects

*Credits: 1*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### CEE 7192 - Special Projects

*Credits: 1*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 7196 - Master's Thesis**

*Credits: 1*

### **CEE 7228 - MASD Capstone 1B**

*Credits: 2*

This capstone course is required of all MASD students. Conducted as independent directed studies, the two capstone courses are the opportunity for individual focused research, bringing together topics covered over the course of students' MASD degree programs. Students' capstone projects should relate to the general area of specialty developed, and should show knowledge of sustainability, a specific focus on an issue of concern, an understanding of existing initiatives in this area, and a project based initiative or collaborative work. Students spend the second of two full terms working on their final project from Capstone 1A, in consultation with their mentor. Students submit their final document to the mentor and course instructor, showing evidence of research based work, as well as project based work with stakeholder participation. Students are required to present their completed projects at an on-campus public presentation. (Distance students, while encouraged to present on-campus may present electronically, with prior arrangement.) Prerequisite: Capstone 1A.

### **CEE 7291 - Special Projects**

*Credits: 2*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 7292 - Special Projects**

*Credits: 2*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 7296 - Master's Thesis**

*Credits: 2*

### **CEE 7302 - Leadership in Development Sector**

*Credits: 3*

Examines issues, strategies, and techniques related to leadership and management of third-sector organizations. Designed to provide future global development professionals with an overview of a range of concerns and practices, while honing their analytic skills. In addition to lectures and discussions, this course employs a heavy applied field component through meetings and collaborations with governmental ministries and NGOs. Additionally, case analyses to contrast Rwanda with other examples will be a key element of the course. Prerequisite: Instructor approval.

### **CEE 7303 - Leadership Innovation Hub**

*Credits: 3*

Leading change in disruptive times using systems-level innovation and data-driven analysis. Experiential and project-based learning about social and environmental justice with community partners. Addressing challenges with curiosity and compassion. Prerequisites: DISC 1312 and DISC 1313, or equivalent, and instructor approval.

### **CEE 7304 - Civil and Environmental Informatics**

*Credits: 3*

Data-driven analyses and decision making within the context of infrastructure and environmental challenges. Identifying and predicting trends, finding patterns, identifying stakeholder needs and recommendations, and engaging stakeholders and decision makers through the tools of machine learning, visualization, workflows and data/model services, and Web applications. Project-based and experiential learning that contributes to ongoing projects on urban grand challenges. Prerequisites: CEE 3310, CS 1340, CS 1341, or CS 1342 and STAT 4340 or STAT 4341 (or equivalents).

### **CEE 7306 - Sustainable Urban Development and Design**

*Credits: 3*

The classroom is the research base for an actual sustainable development and design project. The work builds on an immersion into the primary historical texts of sustainable urban development with readings covering the range of issues central to sustainable development: ecological, economic, and social. Practical workshop lab exercises introduce a number of the tools developers of sustainable projects need to draw upon, from research and data analysis, to GIS mapping, and financial brackets, which will be tested in the project-based portion of the course.

### **CEE 7307 - Infrastructure Design for the Developing World**

*Credits: 3*

Engineering design in the developed world takes for granted the availability of several key resources, namely construction material, water, and electricity. This class examines engineering design in the absence of these resources. The course focuses on the development of shelter and sanitation in an efficient manner. Understanding the total energy cycle of a structure will be emphasized, as well as multiple alternative energy solutions. Additional material on topics such as developing solutions for extreme low cost, high population densities, and ecological sustainability will also be covered. Specifically, water and soil environmental contamination and sustainable management will be emphasized. The course looks at urban and rural settings. Further, the course integrates with other coursework in development leadership on certain topics such as natural resource management. This course involves a heavy lab component. Students work on interdisciplinary teams to assess and redesign projects related to structures, energy systems, and water systems. Prerequisite: Instructor approval.

### **CEE 7308 - Smart Infrastructure and Environment**

*Credits: 3*

Provides fundamental knowledge and application of analysis and design techniques for collection, processing, and analysis of data streams from infrastructure components and systems. Topics include design of data streams, sensor design and implementation, signal processing, and analysis of data in the context of infrastructure monitoring.

Prerequisites: CEE 3310 or equivalent.

### **CEE 7311 - Environmental and Hazardous Waste Laws**

*Credits: 3*

Federal environmental laws, with emphasis on laws dealing with hazardous substances, such as CERCLA and RCRA; regulations and the regulatory framework; definitions and substantive requirements; roles of the states and the federal EPA; compliance and enforcement; and case studies.

### **CEE 7312 - Risk Assessment and Health Effects**

*Credits: 3*

Introduction to toxicology as it relates to environmental and health effects of hazardous materials; toxicology methodology; risk management factors including legal aspects; human health and ecological risk assessment and risk communication; emergency response; computer databases.

### **CEE 7313 - Environmental Chemistry**

*Credits: 3*

Covers chemical and biochemical processes, chemical thermodynamics, acid-base equilibria, precipitation and dissolution, oxidation-reduction processes, environmental transformations of organic materials, introductory taxonomy, microbial growth and kinetics, energy transfer, and microbial ecosystems. Also, controlling fate and transport of hazardous materials, with emphasis on chemical equilibria.

### **CEE 7314 - Environmental Regulations and Compliance**

*Credits: 3*

Practical knowledge of federal and state environmental permitting processes and procedures is provided. Regulatory requirements are reviewed with emphasis on the 40 CFR regulations for water, air, and solid hazardous waste. Air, water, stormwater, and waste permits are reviewed, as well as permits-by-rule. Also explored are the consequences of noncompliance with regulations by presenting enforcement options available to government agencies.

### **CEE 7315 - Integrated Waste Management**

*Credits: 3*

Comprehensive introduction to the fundamentals of the complex interdisciplinary field of hazardous waste management; current management practices; treatment and disposal methods; and site remediation. Topics include detailed case studies and design examples to evaluate the effectiveness of different treatment and containment technologies in addressing today's hazardous waste situations.

### **CEE 7316 - Engineering Microbiology**

*Credits: 3*

Examines aspects of microbiology that are particularly valuable to the practice of environmental engineering. Specific areas of focus include enzyme and growth kinetics, cell structure and physiology, the process of biotransformation, microbial and/or environmental interactions, and biogeochemical cycles. Elements of molecular biology and biotechnology are also presented as appropriate. Students gain a basic understanding and appreciation of microbial processes that are applicable in the field of environmental engineering. Prerequisites: CHEM 1303 and CEE 2321, or equivalent.

### **CEE 7317 - Environmental Organic Chemistry**

*Credits: 3*

Examines the fundamental processes that govern transformation of organic chemicals in natural and engineering systems. The course is divided into three parts: organic chemistry overview, physical transformations of organic compounds, and organic chemical reactions in the environment. The organic chemistry overview provides knowledge regarding basic properties of organic compounds such as nomenclature and structures. Physical transformation of organic compounds provides an understanding in processes (such as sorption and volatilization) that control the distribution of organic chemicals between different phases (such as air, water, and soil). Environmentally mediated reactions (such as hydrolysis and photolysis) that control the breakdown of organic chemicals are the focus of chemical reactions.

### **CEE 7318 - Bioremediation of Inorganic Contaminants**

*Credits: 3*

Focuses on bioremediation techniques and applications for removing inorganic contaminants (nitrogen, sulfur and phosphorus compounds, iron, heavy metals, metalloids and radionuclides) through the metabolic activities of microorganisms. Explores fundamental chemical and biological processes as well as engineering aspects. Prerequisites: Prior course experience with biochemistry or instructor approval.

### **CEE 7319 - Soil Chemistry and Mineralogy**

*Credits: 3*

Examines soil solution chemistry and reactivity. Covers distribution and significance of common soil minerals, weathering, and general solid phase reactivity. Lab covers mineral structures, techniques of mineral identification, and solution-solid phase partitioning. Prerequisite: CEE 2321 or permission of instructor.

### **CEE 7320 - Biodegradation of Hazardous Organic Pollutants**

*Credits: 3*

Students learn and integrate the basic principles of biochemistry required for understanding the biodegradation of hazardous and toxic organic compounds. Students become familiar with current biological remediation techniques and molecular microbiology and solve problems often encountered in application of bioremediation. Prerequisite: Prior course experience with biochemistry.

### **CEE 7321 - Physical and Chemical Processes and Treatment**

*Credits: 3*

Introduces waste minimization techniques and objectives, and thoroughly reviews chemical equilibrium and chemical reaction kinetics. Design and analysis equations and procedures are rigorously derived for chemical reactors and physical unit operations. The treatment objectives examined include 1) solids-liquid separation accomplished by coagulation and flocculation, sedimentation, filtration, flotation, and solids handling processes; 2) immiscible liquid

separation brought about by emulsion-breaking chemicals and gravity and flotation oil/water separators; 3) phase and species transformations through pH neutralization, chemical precipitation, chemical oxidation/reduction, air stripping, and solidification/stabilization; and 4) solute separation and concentration achieved with activated carbon absorption, synthetic ion exchange resins, and membrane separation techniques.

### **CEE 7322 - Biological Processes and Treatment**

*Credits: 3*

Biological treatment topics include an overview of microbiology and microbial metabolism; kinetics of biological growth; aerobic suspended growth processes including the various modifications of the activated sludge process, aerated lagoons, and sequencing batch reactors; aerobic attached growth processes including trickling filters, biofilter towers, and rotating biological contactors; anaerobic processes including sludge digestion and liquid waste treatment with the anaerobic contact process and anaerobic filters; biosolids handling and disposal; composting; land treatment; in situ biotreatment and biotreatment of contaminated soils.

### **CEE 7323 - Project Management**

*Credits: 3*

Role of project officer; systems and techniques for planning, scheduling, monitoring, reporting, and completing environmental projects; total quality management; project team management, development of winning proposals; contract management and logistics; case study application of project management to all environmental media and programs; community relations, risk communication, crisis management, consensus building, media, and public policy.

### **CEE 7324 - Geographical Information Systems and Mapping**

*Credits: 3*

Introduces modern GIS software and tools, including map design, geodatabases, geospatial and attribute data, geocoding, and simple spatial analysis. Students use research-based projects to explore GIS as a tool for innovative spatial thinking and as a catalyst for sustainable strategies.

### **CEE 7325 - Disaster Management**

*Credits: 3*

Introduces basic concepts in disaster management. Drawing on a range of sources, from the textbook to the U.S. National Response Plan to research papers, the course covers the fundamentals of preparedness, mitigation, response, and recovery. An all-hazards approach is taken, providing analysis of natural, technological, and man-made disasters. Also introduces key methods in the field, including simulation modeling, consequence analysis tools, design criteria, statistical and case study methods (lessons learned), and risk analysis.

### **CEE 7326 - Sustainable Transportation**

*Credits: 3*

Covers planning and operations management of sustainable transportation systems with a focus on energy efficiency. Provides an integrated overview of main concepts and issues related to developing sustainable transportation systems for urban areas, freight transportation, and aviation. Also, advanced topics related to vehicle technologies, alternative energy, and smart cities. Presents findings from national and international case studies.

### **CEE 7327 - Optimization and Reliability for Infrastructure and Environmental Systems**

*Credits: 3*

This course introduces the concepts of engineering systems optimization, reliability and risk assessment, and applies them to civil and environmental engineering systems. Topics include an introduction to engineering systems definition, classical methods of optimization, linear programming, integer programming, dynamic programming, nonlinear optimization, and reliability and risk concepts in engineering planning and design. Engineering applications will include transportation networks, fleet assignment, supply chain management, environmental engineering systems, fluid transport and water reservoir operation and structural engineering systems. Advance topics will include an introduction to chance-constrained optimization and basic decomposition approaches and their application to real-world problems.

### **CEE 7328 - Introduction to Sustainability**

*Credits: 3*

Introduces basic concepts in sustainability. Drawing on a range of sources, including selected books and readings, the course explores the idea of total connectedness of resource use globally, with particular emphasis on the situation in North Texas. Addresses the issues of air quality and energy supply, sustainable construction, water use, transit and other related areas of resource use, and waste generation. Guest lecturers provide a series of multiple viewpoints in areas of specific expertise. Prerequisite: Graduate standing or permission of instructor.

### **CEE 7329 - Methods and Technology for Sustainability**

*Credits: 3*

This course covers technologies and methods used in sustainable design and analysis. Areas covered include the scientific understanding of alternative energy systems, water reuse and supply, and state-of-the-art materials created for sustainability. Also discussed are methods for assessing sustainability, including life cycle assessment and the development of sustainable indicators. Prerequisite: Graduate standing, or permission of instructor.

### **CEE 7330 - Design for Sustainable Buildings and Infrastructure**

*Credits: 3*

Covers basic methods of sustainable building and environmental design to assure minimal and efficient resource and energy use. Students undertake a design project and work to integrate green strategies into their proposal. Covers technical methods for assessing predictive resource use, including energy modeling, water balance calculations, daylight modeling, and energy generation estimations. Emphasis is placed on passive, non-mechanical building systems. Defining occupant comfort as a balance of multiple factors is addressed, as well as methods for effective use of water management and land use. Sustainable infrastructure will be addressed, including integrated storm water management, water quality and runoff management, and passive water systems. The USGBC's LEED system will be specifically addressed. Prerequisite: Graduate standing, or permission of instructor.

### **CEE 7331 - Air Pollution Management and Engineering**

*Credits: 3*

Covers the science, engineering, public health, and economic aspects of air quality. Students develop in-depth understanding and broad knowledge of the sources and properties of air pollutants, air quality management, fate and transport of pollutants in the environment, regulations of air quality, and the operation and design of air pollution control systems. Reviews the status of science, policy, and regulations on several selected topics such as urban smog, regional haze, greenhouse gas and global climate change, stratospheric ozone depletion, and mercury emissions and control.

### **CEE 7332 - Groundwater Hydrology and Contamination**

*Credits: 3*

Groundwater hydrology; aquifer and well hydraulics; flow equations and models; implications for landfill design; sources and nature of groundwater contaminants; monitoring and analysis; contaminant fate and transport; transport model for hazardous substances; groundwater pollution control measures; containment and treatment; groundwater quality management.

### **CEE 7334 - Fate and Transport of Contaminants**

*Credits: 3*

Development and application of fate and transport models for hazardous substances with focus on water-sediment, water-soil, and water-air interfaces; material balance principle; mass transport and transformation processes; modeling of lakes and reservoirs; stream modeling; general flow case; groundwater models; multiphase and integrated modeling approaches; and case studies.

### **CEE 7335 - Aerosol Mechanics**

*Credits: 3*

Fundamental and advanced principles of airborne particles, including their physical properties, aerodynamic behavior,

and their collection, measurement, and analysis. The course emphasizes the origins and properties of atmospheric aerosols and the design of air pollution control equipment.

### **CEE 7336 - Urban Hydrology and Hydraulics**

*Credits: 3*

Urban hydrology and watershed response to rainfall events; hydrologic systems; design of stormwater conveyance systems, storage facilities, inlets, and culverts; and use of engineering tools for assessing stormwater best management practices (BMPs) and green infrastructure implementation. Prerequisites: CEE 2342 and CEE 3323 (or equivalents) or instructor approval.

### **CEE 7337 - Field Methods for Soil and Water Analysis**

*Credits: 3*

Covers topics related to environmentally relevant fieldwork and field data analysis, with emphasis on field and lab practical experiences that are supplemented with necessary lecture. Addresses surface water and groundwater collection as well as the analysis of coliform bacteria, basic water quality parameters, and inorganic contaminants. Topics also include soil collection and analysis, sanitation and water systems in the field, mapping, basic GIS, and systems planning. Prerequisite: Sophomore or above standing.

### **CEE 7338 - Laboratory Methods in Environmental Engineering**

*Credits: 3*

Provides hands-on, state-of-the-art experience with important experimental methods in environmental systems, evaluating the reliability and significance of parameter determinations. Covers instrumental and statistical methods used for characterization of water, air, and soil quality. Also introduces treatability studies, including reactor dynamics. Provides 2 hours of lecture and 3 hours of laboratory component. Prerequisite: CEE 5313 or two terms of undergraduate chemistry.

### **CEE 7340 - Introduction to Solid Mechanics**

*Credits: 3*

Three dimensional stress and strain, failure theories, introduction to two-dimensional elasticity, torsion of prismatic members, beams on elastic foundation, introduction to plates and shells, and energy methods. Prerequisites: CEE 2340 and MATH 2343.

### **CEE 7350 - Introduction to Environmental Management Systems**

*Credits: 3*

An in-depth introduction to environmental management systems. Includes systems such as EMAS, Responsible Care, OHSAS 18000, ISO 14000, and the Texas EMS program. Takes a step-by-step look at the ISO 14001 standard, from the policy statement to the management to review, so students can fully understand the plan-do-check-act approach of the system. Also introduces management systems auditing the requirements of a system auditor, and the certification process.

### **CEE 7351 - Introduction to Environmental Toxicology**

*Credits: 3*

Presents toxicology as it relates to environmental and health effects of hazardous materials. Examines toxicological methodologies, pharmacokinetics, mechanisms of action to toxicants, origin response to toxic substances, and relevant aspects of the occupational and regulatory environment. Includes toxicology of metals, radiation, industrial solvents and vapors, pesticides, teratogens, mutagens, and carcinogens. Examines risk communication and risk assessment as they relate to toxic substance exposure.

### **CEE 7352 - Management of Radioactive Hazards**

*Credits: 3*

Principles of radioactive material production, uses, and hazards are presented with emphasis on their safe control and management. Topics in health physics and radiation protection related to the commercial nuclear industry are examined including uranium fuel production, light water reactor technologies, and industrial and medical uses of radioactive byproduct materials. Risk assessment methods and hazard management connected to the fuel cycles are developed. The

regulation of radioactive materials is studied, with emphasis on licensing of regulated industries, radioactive material transportation, radioactive waste management and disposal, radiological emergency preparedness, and decommissioning. Prerequisite: CEE 5313.

### **CEE 7353 - Environmental Epidemiology**

*Credits: 3*

Introduction to the science of epidemiology. Design and conduct of studies examining health effects of environmental exposures. Strengths and limitations of research strategies and interpretation of study results. Areas of interest include air and water pollution, lead, and biological marker outcomes.

### **CEE 7354 - Environmental Engineering Principles and Processes**

*Credits: 3*

Waste minimization and pollution prevention techniques and objectives are introduced. A comprehensive study is made of biological, chemical, and physical principles and treatment strategies for controlling pollutant emissions. Equal emphasis is placed on underlying theory and practical engineering application of both common and innovative water and wastewater treatment processes. Design equations, procedures, and process models are rigorously derived for chemical/biological reactors and physical unit operations. Emphasis is placed on engineering analysis and application of process modeling techniques for design unit processes to achieve specific treatment objectives.

### **CEE 7356 - Civil Infrastructure Systems**

*Credits: 3*

Covers different civil infrastructure systems serving urban and rural communities. Introduces main concepts related to infrastructure project conceptualization and lifecycle analysis, demand and supply interactions, planning, and operations management. Topics such as infrastructure interdependences, resilience, sustainability, security and cyber-physical systems are discussed. Prerequisite: Senior/graduate standing or permission of instructor.

### **CEE 7357 - Civil Infrastructure Operations Management**

*Credits: 3*

Introduces students to challenges related to managing complex civil infrastructure systems and common approaches used to address these challenges. Provides understanding of operation under uncertainty and the need to develop proactive and robust management strategies to attain desired performance measures for the infrastructure systems. The use of decision support systems for managing different civil infrastructure systems is presented. Prerequisite: Senior/graduate standing or permission of instructor.

### **CEE 7358 - Demand Forecasting for Infrastructure Systems**

*Credits: 3*

Introduces students to the problem of long-term demand forecasting for civil infrastructure systems. Covers common techniques used to develop models for infrastructure demand forecasting including growth factor methods, regression and time series analysis, learning-based models, and utility-based models. Advanced topics related to the use of the activity-based framework for demand forecasting are also covered. Prerequisite: Senior/graduate standing or permission of instructor.

### **CEE 7361 - Matrix Structural Analysis and Introduction to Finite Element Methods**

*Credits: 3*

A systematic approach to formulation of force and displacement method of analysis; representation of structures as assemblages of elements; and computer solution of structural systems. Prerequisite: CEE 3350 and CEE 3310 or CEE 7362 or consent of instructor.

### **CEE 7362 - Engineering Analysis with Numerical Methods**

*Credits: 3*

Applications of numerical and approximate methods in solving a variety of engineering problems. Examples include equilibrium, buckling, vibration, fluid mechanics, thermal science, and other engineering applications. Prerequisite: Permission of instructor.

### **CEE 7363 - Architectural and Structural Engineering**

*Credits: 3*

The basic principles of structural analysis and mechanics of deformable bodies are introduced. Structural systems and principles are presented with an emphasis on architectural design. Students will be provided with a conceptual introduction to structures emphasizing the integration of structural and architectural design. Case studies of buildings are presented and discussed.

### **CEE 7364 - Introduction to Structural Dynamics**

*Credits: 3*

Covers the dynamic responses of structures and the behavior of structural components to dynamic loads and foundation excitations. Also, single- and multidegree-of-freedom systems response and its applications to analysis of framed structures. Introduces systems with distributed mass and flexibility. Prerequisites: MATH 3313, CEE 3350/ME 3350 or CEE 5361/ME 5361, and CEE 3310 or CEE 7362.

### **CEE 7365 - Introduction to Construction Management**

*Credits: 3*

Construction practice techniques and current technological tools are examined. Included are cost estimating, bidding, contracts and contract bonds, risk and umbrella excess insurance, labor law and labor relations. Building codes and regulations are examined. Business methods with respect to managing project time and cost including typical forms used in construction are addressed.

### **CEE 7366 - Introduction to Facilities Engineering Systems**

*Credits: 3*

The inter-relationships of fire protection, HVAC, electrical, plumbing, lighting, telecommunications, energy management systems for buildings are examined. A life-cycle approach examines each of these systems with respect to cost, durability, maintainability, operability, and safety. Facility operations, facility maintenance and testing, and assessments are discussed.

### **CEE 7367 - Telecommunications in Facility Planning**

*Credits: 3*

A thorough description of telecommunications technology is presented. Provides a working knowledge of the fundamental concepts of telecommunications technology for both voice and data. Topics include digital communications, standards and protocols, Ethernets, local area networks, fiber optics, and voice technologies.

### **CEE 7368 - Contracts in Design & Construction**

*Credits: 3*

Covers the role of contracts in defining the roles and obligations of the parties involved in the design, construction, and construction management of a project. Students learn the basic structure and requirements of a contract and how laws and regulations affect contracts and relationships between parties to the contract. The impact of laws and regulations on the selection process for project participants, contracting provisions, and execution of construction is also considered. Systems thinking is applied to determine the best allocation of risk factors that are addressed in contracts. Prerequisites: Adviser approval and CEE 5365 or equivalent.

### **CEE 7369 - Electrical, Mechanical, and Piping Systems for Buildings**

*Credits: 3*

Mechanical and electrical systems for buildings are examined with emphasis on practical aspects of the subjects. Space planning and architectural considerations, including cost and environmental impact of the mechanical and electrical systems are presented. Prerequisites: Undergraduate introduction to electrical circuits, classical mechanics, and fluid dynamics, or instructor's approval.

### **CEE 7370 - Quality Management in Construction**

*Credits: 3*

Covers quality management as applied to construction projects. Students learn the principles of quality management

and how these principles apply to the construction manager's professional services and construction processes. Uses data analytics to identify trends in quality to enhance testing efforts and structured problem-solving techniques to address the root causes of quality issues. Prerequisites: Adviser approval and CEE 5365 or equivalent.

### **CEE 7371 - Facility Financial and Asset Management**

*Credits: 3*

Examines financial analysis and reporting, concepts and methods of accounting, budgeting, and evaluation of projects. Presents the role of facility managers in affecting corporate earnings and valuations. Includes the management of the facility over its entire life cycle, extending from planning and budgeting to the management of its assets and construction projects.

### **CEE 7373 - Prestressed Concrete**

*Credits: 3*

Theory and application of prestressed concrete members, time-dependent deflections, and continuous prestressed beams. Prerequisite: CEE 4350 or equivalent.

### **CEE 7375 - Advanced Concrete Design**

*Credits: 3*

Behavior, analysis, and design of concrete slender columns, two-way slab systems, and deep beams. Yield line analysis for slabs. Design and behavior of shear walls, retaining walls, and foundation systems. Prerequisite: CEE 4350 or equivalent.

### **CEE 7376 - Intelligent Transportation Systems**

*Credits: 3*

Covers different topics related to intelligent transportation systems (ITS), including technological and institutional aspects, regional ITS architectures, and cost benefit analysis of ITS projects. Advanced traveler information systems, advanced public transportation systems, and advanced traffic network management systems are discussed. The application of ITS for safety, security, environmental quality, and sustainable mobility are also presented. Prerequisites: Senior/graduate standing or permission of instructor.

### **CEE 7377 - Advanced Steel Design**

*Credits: 3*

Behavior and design of steel structures, including general methods of plastic analysis, plastic moment distribution, steel frames, unbraced and braced frames, and composite construction. Prerequisite: CEE 4350 or equivalent.

### **CEE 7378 - Transportation Planning and Traffic Engineering**

*Credits: 3*

This course is concerned mainly with the analysis and modeling of urban transportation systems. The course consists of three main parts. The first part provides an overview of main definitions and terminologies involved in the planning and modeling of urban transportation systems. The second part introduces the concept of urban transportation planning systems along with an overview of various models used in travel demand forecasting. The third part describes principles of traffic operations, analysis and control. Prerequisites: Basic principles of probability and statistics.

### **CEE 7379 - Highways Design and Safety**

*Credits: 3*

Provides an overview of the principals of highways design and traffic safety. Topics include highways functional classification, design control and criteria, driver performance, sight distance, horizontal and vertical alignments, cross section elements, design of freeways, intersections and interchanges, traffic safety, and environmental impact assessment.

### **CEE 7380 - Management of Industrial and Mission-Critical Facilities**

*Credits: 3*

Efficient industrial centers require balanced consideration with respect to facility design and function. Mission-critical component management and information technology systems are designed for exceptionally reliable performance and

efficient operation. This course emphasizes the component systems that are designed to maintain a high level of function. Covers electrical and mechanical reliability, efficiency, readiness, robustness, and flexibility, and the management of the information technology systems. Explores strategies designed to eliminate costly downtimes, with emphasis on standby generators; automatic transfer switches; uninterruptable power supplies; fuel, fire, and battery systems; energy security; and environmental and cooling technologies. Presents the implementation of sustainable technology, green certifications, and alternative energy strategies that are compatible with the mission-critical requirements of the facility. Includes operational approaches to reduce energy requirements for power and cooling, mandated safety standards, and environmental codes. Prerequisite: Graduate standing or permission of instructor.

### **CEE 7381 - Site Selection for Industrial and Mission-Critical Facilities**

*Credits: 3*

Efficient industrial centers and facilities with mission-critical subsystems such as datacenters require balanced considerations with respect to facility design and site location. Site location plays an integral role in creating successful projects that especially support high reliability and promote sustainable design. While the important factors may vary from site to site, in any given instance a single factor can undermine the success of an otherwise excellent project. Ready availability and proper site selection that minimizes risk of disruption are particularly important factors for successful operation. Covers siting considerations, including power needs, electrical mix, weather patterns, building codes, proximity to the workforce and transportation, and other topics that bear on reliable operation. Emphasizes strategies of site selection to adequately safeguard hardware and mission-critical data. Prerequisite: Graduate standing or permission of instructor.

### **CEE 7383 - Heating, Ventilating, and Air Conditioning**

*Credits: 3*

Examines the science and practice of controlling environmental conditions through the use of thermal process and systems. Specific applications include refrigeration, psychometrics, solar radiation, heating and cooling loads in buildings, and design of duct and piping systems. Theory and analysis are emphasized. Prerequisites: CEE 2331, CEE 2342, and ME 3332.

### **CEE 7384 - Energy Management for Buildings**

*Credits: 3*

Procedures to select energy saving options for buildings are examined with emphasis on practical aspects of the subjects. Space planning, architectural considerations, cost and environmental impact of the mechanical and electrical systems are considered along with optimizing the life cycle cost of the proposed alternative. Software for life-cycle cost and energy analysis are used to calculate energy consumption and compare energy features of proposed, audit-determined feasible changes to a building.

### **CEE 7385 - Advanced Soil Mechanics**

*Credits: 3*

Physicochemical properties of soil and soil stabilization. Advanced theories of soil deformation and failure as applied to slope stability and lateral loads. Soil-water interaction in earthen dams. Prerequisite: CEE 3385.

### **CEE 7386 - Foundation Engineering**

*Credits: 3*

Application of soil mechanics principles to the design and construction of shallow and deep foundations. Topics include subsurface investigation procedures to obtain soil parameters for design and construction of structure foundations, bearing capacity and settlement analyses, construction procedures, and soil improvement techniques. Prerequisite: CEE 3385.

### **CEE 7387 - Geotechnical Earthquake Engineering**

*Credits: 3*

This course provides fundamental knowledge and practical application of soil dynamics and geotechnical earthquake engineering. This includes an overview of seismic hazards, the fundamentals of vibration, wave propagation in elastic medium, properties of dynamically loaded soils, earthquake-induced ground motion, ground response analysis, lateral

earth pressure on retaining walls, liquefaction of soils, and seismic stability of earth embankments. Prerequisite: CEE 3310 or CEE 7362.

### **CEE 7388 - Groundwater and Seepage**

*Credits: 3*

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; the principle of effective stress; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems. Prerequisite: CEE 3310 or CEE 7362.

### **CEE 7391 - Special Projects**

*Credits: 3*

Intensive study of a particular subject or design project, not available in regular course offerings, under the supervision of a faculty member approved by the department chair.

### **CEE 7392 - Special Projects**

*Credits: 3*

Intensive study of a particular subject or design project, not available in regular course offerings, under the supervision of a faculty member approved by the department chair.

### **CEE 7396 - Master's Thesis**

*Credits: 3*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **CEE 7418 - Engineering Microbiology**

*Credits: 4*

Examines aspects of microbiology that are particularly valuable to the practice of environmental engineering. Specific areas of focus include enzyme and growth kinetics, cell structure and physiology, process of biotransformation, microbial and/or environmental interactions, and biogeochemical cycles. Elements of molecular biology and biotechnology are also presented as appropriate. Students gain a basic understanding and appreciation of microbial processes that are applicable in the field of environmental engineering. Prerequisites: CHEM 1303 and CEE 2321, or equivalent.

### **CEE 7491 - Special Projects**

*Credits: 4*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 7492 - Special Projects**

*Credits: 4*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 7696 - Master's Thesis**

*Credits: 6*

### **CEE 8049 - Ph.D. Full-Time Status**

*Credits: 0*

**CEE 8096 - Dissertation**

*Credits: 0*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**CEE 8190 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8191 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8192 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8193 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8194 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8196 - Dissertation**

*Credits: 1*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**CEE 8290 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8291 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8292 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 8293 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 8294 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 8325 - The Sustainable Urban Plan**

*Credits: 3*

Focused on the strategic role of an urban plan in the sustainable environment, this course contrasts the inventive and critical aspects of developing a sustainable urban plan, exploiting the potentials and limits of government, finance, stakeholders, and urban design. Lectures, readings and workshops lead to a project-based site planning policy and design exercise, resulting in a site-specific urban proposal. The 'UrbanPlan' project, administered through the Urban Land Institute (Dallas), then introduces team based development approaches including a market simulation model, with local professional input.

### **CEE 8327 - Policy Impacts on Sustainability**

*Credits: 3*

The idea of a truly sustainable society is either encouraged or negated by its policies. This course will examine policies at multiple levels to assess their impact on our society's ability to become a sustainable one. Guest lecturers from the city, regional and state level will be included, as well as examinations of policies at the national level from around the world.

### **CEE 8328 - Defining the Future of Global Sustainability**

*Credits: 3*

To discuss the long-term future of global sustainability, what that term includes must be defined. Examines the national and international drivers of change, both current and trends toward the future that can be identified.

### **CEE 8329 - Global Resource Assessment and Management**

*Credits: 3*

The globalization of the world's economy and politics has resulted in a globalization of resource use, in both materials and service terms. This course provides an understanding of how the management of global resources has an interrelated impact on the resilience of our environment and civilization and explores ways to assess resource use in global development projects. Students examine global energy distribution and production and its impact on air quality, goods production and transit, food availability, ocean use and impact, climate change, and global housing. Alongside the lectures, a series of practical workshop lab exercises introduce hands-on tools for global resource management, including food security indicators, environmental justice, risk management, and metrics for sustainable policy assessment.

### **CEE 8330 - Engineering Sustainability for the Future**

*Credits: 3*

Solving the global challenges of the future will require innovative engineering of problems that are understood now, and those not yet faced. Examines the status of cutting-edge technologies and analyzes what issues need to be addressed for the future survival of the planet.

### **CEE 8340 - Theory of Elasticity**

*Credits: 3*

The study of stress, strain, and stress-strain relationships for elastic bodies. Classical solutions of two- and three-dimensional problems. The use of the Airy stress function is covered. Prerequisite: CEE 7340 or equivalent.

### **CEE 8364 - Finite Element Methods in Structural and Continuum Mechanics**

*Credits: 3*

Theory and application of finite element; two- and three- dimensional elements; bending elements; applications to buckling, and dynamic problems. Prerequisite: CEE 7361.

### **CEE 8365 - Construction Methods and Rehabilitation**

*Credits: 3*

Examines basic construction methods and equipment used to rehabilitate existing buildings and structures. Includes building maintenance, space improvement, and building component alteration. Also, installation of utilities, including underground utility design. Prerequisites: CEE 7363, CEE 7365.

### **CEE 8366 - Basic Concepts of Structural Stability**

*Credits: 3*

Unified approach to elastic buckling analysis of columns, plates, and shells using variational calculus (developed entirely in the course). Prerequisite: CEE 7340 or permission of instructor.

### **CEE 8368 - Theory of Plate Behavior**

*Credits: 3*

Analysis of flat plates subjected to normal loading, inplane loading, and thermal stresses. Plates of various shapes, thick plates, and anisotropic plates are analyzed for both small and large deflections. Prerequisite: CEE 7340 or permission of instructor.

### **CEE 8370 - Facility Project Management**

*Credits: 3*

Presents the principles and techniques of project management, beginning with the conceptual phase, through the coordination of design and construction, to project completion. Prerequisite: CEE 7370.

### **CEE 8378 - Transportation Demand Analysis**

*Credits: 3*

An overview of the theory of discrete choice and applications related to modeling travel demand. Topics include theories of choice behavior, theory of estimation, binary choice models, multinomial choice models, multidimensional choice and nested logit, aggregate forecasting techniques, and estimation software. Prerequisite: Basic principles of probability and statistics.

### **CEE 8379 - Analysis of Transportation Systems**

*Credits: 3*

An overview of techniques used to model and analyze transportation systems. Topics include queuing theory, graph theory, network modeling, development of algorithms, shortest path problem, vehicle routing problem, and simulation techniques. Applications to transportation systems. Prerequisite: Basic principles of probability and statistics.

### **CEE 8390 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

### **CEE 8391 - Special Topics**

*Credits: 3*

### **CEE 8392 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in environmental engineering approved by the department chair, the instructor, and the academic dean.

**CEE 8393 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8394 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8396 - Dissertation**

*Credits: 3*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**CEE 8490 - Special Topics**

*Credits: 4*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8491 - Special Topics**

*Credits: 4*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8492 - Special Topics**

*Credits: 4*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8493 - Special Topics**

*Credits: 4*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8494 - Special Topics**

*Credits: 4*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8590 - Special Topics**

*Credits: 5*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8591 - Special Topics**

*Credits: 5*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8592 - Special Topics**

*Credits: 5*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8593 - Special Topics**

*Credits: 5*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8594 - Special Topics**

*Credits: 5*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8690 - Special Topics**

*Credits: 6*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8691 - Special Topics**

*Credits: 6*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8692 - Special Topics**

*Credits: 6*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8693 - Special Topics**

*Credits: 6*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8694 - Special Topics**

*Credits: 6*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8696 - Dissertation**

*Credits: 6*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**CEE 8790 - Special Topics**

*Credits: 7*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8791 - Special Topics**

*Credits: 7*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8792 - Special Topics**

*Credits: 7*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8793 - Special Topics**

*Credits: 7*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8794 - Special Topics**

*Credits: 7*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8890 - Special Topics**

*Credits: 8*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8891 - Special Topics**

*Credits: 8*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8892 - Special Topics**

*Credits: 8*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8893 - Special Topics**

*Credits: 8*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8894 - Special Topics**

*Credits: 8*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8990 - Special Topics**

*Credits: 9*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8991 - Special Topics**

*Credits: 9*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8992 - Special Topics**

*Credits: 9*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8993 - Special Topics**

*Credits: 9*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8994 - Special Topics**

*Credits: 9*

Individual or group study of selected topics in environmental or civil engineering. Topics must be approved by the department chair and the instructor.

**CEE 8996 - Dissertation**

*Credits: 9*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms. For example, CEE 8396 and CEE 8996 (12 credit hours total) would be allowed during a fall term.

# Computer Science

**Professor** Frederick Chang, **Chair**

**Professors:** Frederick R. Chang, Ira Greenberg, Jeff Tian

**Associate Professors:** LiGuo Huang

**Assistant Professor:** Corey Clark, Eric C. Larson

**Senior Lecturer:** Frank P. Coyle

**Lecturer:** Donald E. Evans

**Clinical Professors:** Mark E. Fontenot, Theodore W. Manikas

**Adjunct Faculty:** Jennifer Alford, Nima Baha, Ben A. Calloni, Hakki C. Cankaya, John P. Carbone, Christian P. Christensen, Maya El Dayeh, Vidroha Debroy, Aaron L. Estes, Mark Hoffman, Kenneth R. Howard, Mihaela Iridon, Bhanu Kapoor, Karl C. Lewis, D. Kall Loper, Matthew R. McBride, Lee D. McFearin, John Medellin, Freeman L. Moore, Padmaraj M.V. Nair, Klyne Smith

## Graduate Programs

The department offers graduate programs in computer science, cybersecurity and software engineering. Faculty research interests include CAD methods and algorithms for digital systems design, computer arithmetic, computer architecture, configurable hardware, design automation, VLSI design, bioinformatics, database systems, data mining, design and analysis of algorithms, theory of computation, software engineering, parallel processing, mobile computing, computer networks, fault tolerance, computer security, and information assurance.

In addition to the research labs, students in the Department of Computer Science have access to a wide range of facilities and equipment. The CS Department's computing environment has evolved into an Ethernet-based network of personal computers and servers. General-use UNIX servers are available that run OSF1, SunOS and Linux. A wireless network is also available throughout the facilities of CS. Access to the network is also available via open-area labs containing X terminals and PCs.

**Graduate Degrees.** The Department of Computer Science offers the following graduate degrees:

## Computer Science, Ph.D.

Students receiving a Ph.D. in computer science are expected to achieve and demonstrate a mastery of the discipline and to significantly advance the state of knowledge through an original research effort.

## Admission Requirements

Applicants are required to satisfy the following:

1. An M.S. degree in computer science or a related field, including computer engineering, electrical engineering, mathematics or physics, from a U.S. college or university accredited by a regional accrediting association, or completion of an international degree that is equivalent to a U.S. master's degree from a college or university of recognized standing. In the case of direct admission without a previous M.S. degree, the baccalaureate degree must be conferred prior to the time the student begins classes as a graduate student, and the student will fulfill the requirements for and obtain an M.S. degree and then continue working toward the Ph.D. Also, the student's GPA must be at least 3.400 on a 4.000 scale in the student's junior and senior years.
2. Excellent academic performance in all completed coursework, with a GPA of at least 3.000 on a 4.000 scale.
3. A reasonable level of mathematical maturity.
4. Submission of a complete application, including a statement of purpose, official transcripts for all previous undergraduate and graduate studies and payment of appropriate application fee.
5. Submission of official GRE graduate school admission test scores.
6. Three letters of recommendation from individuals who can judge the applicant's potential success as a doctoral student.

7. Submission of a notarized financial certification form (graduates from foreign countries only). Before being considered for admission, all international students whose native language is not English and who have not graduated from an American university must submit a minimum TOEFL English language proficiency exam score as follows:
  - 550 – paper-based examination.
  - 213 – computer-based examination.
  - 80 – Internet-based examination.

## Degree Requirements

In addition to meeting the Lyle School of Engineering requirements for the Ph.D. degree, candidates are required to satisfy the following:

1. The graduation requirements fall into the categories of completion of a specified number of graduate credit hours in appropriate subjects with an acceptable GPA, demonstration of understanding of the discipline of computer science as evidenced by examination, and completion of a substantial research effort documented in a doctoral dissertation. Doctoral students must maintain at least a 3.000 GPA every term and at least a 3.300 overall (cumulative) GPA during their course of study.
2. All requirements must be completed within seven years of entry into the program.

The steps for completion of the doctoral program are

1. Initial advising.
2. Basic coursework to prepare for the commencement of research work.
3. Selection of a dissertation director and supervisory committee.
4. Advanced coursework in the chosen research area and guided thesis research to prepare for the qualifying examination.
5. Successful completion of the qualifying examination as determined by the doctoral advising committee.
6. Dissertation research supervised by the candidate's doctoral adviser.
7. Successful defense of the research leading to the Ph.D.

Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

## Initial Advising

Upon entry into the Ph.D. program, students are assigned a faculty adviser who acts as an academic adviser. The responsibilities of this adviser are to examine the student's prior background and current state of knowledge and to recommend courses to be taken in preparation for conducting research.

## Credit Requirements

### Prerequisites

All students entering the program are expected to possess knowledge equivalent to the following CS courses:

- CS 1341 - Principles of Computer Science
- CS 1342 - Programming Concepts
- CS 2240 - Assembly Language Programming and Machine Organization
- CS 2341 - Data Structures
- CS 2353 - Discrete Computational Structures
- CS 3342 - Programming Languages
- CS 3353 - Fundamentals of Algorithms
- CS 3381 - Digital Logic Design
- CS 4345 - Software Engineering
- CS 4381 - Digital Computer Design

## Graduate Credit Hours

A minimum of 54 graduate credit hours is required beyond the baccalaureate degree in order to achieve the Ph.D. degree. Of this, a minimum of 21 credit hours must be at the 8000 level. In addition to these 54 credit hours, 24 credit hours are required for dissertation credit. Of the 54 graduate credit hours, a maximum of 30 credit hours may be used if an entering student possesses an M.S. in an appropriate major from another institution.

## Core Courses

The following core courses must be taken at SMU if the student has not received credit for these at another university:

- CS 7330 - File Organization and Database Management
- CS 7343 - Operating Systems and System Software
- CS 7350 - Algorithm Engineering
- CS 7381 - Computer Architecture

## Minor Requirement

A minor, usually in an area of computer engineering, electrical engineering or mathematics, of a minimum of 12 credit hours supporting the chosen research area is required. These courses may be taken in CS or in another department in the Lyle School of Engineering. The minor requirement may be satisfied by transfer credit.

## Residency Requirement

All full-time Ph.D. students in residence at the main campus of SMU are required to enroll in the CS seminar class CS 8098. The CS 8098 course is graded on a pass/fail basis with a grade of Pass requiring the attendance of at least two-thirds of the CS departmental seminars and distinguished speaker series. The seminar coordinator will keep attendance records.

## Grades

No graduate credit is earned for a course in which a grade of less than C- is received. Such courses do, however, count toward the total GPA. A student must have a GPA of at least 3.000 on a 4.000 scale to graduate. If at any point, a student's GPA drops below 3.000, the student is placed on academic probation. The student then has one term to raise his or her GPA to 3.000 or be dismissed from the program. For part-time students, one term is taken to mean six credit hours. A grade of I (Incomplete) affects the GPA for the term in which the grade is granted rather than when it is removed; therefore, a student is placed on academic probation if he or she is granted a grade of I on currently completed work in the course and that grade causes the student's GPA to drop below 3.000.

## Computer Science Seminar

All Ph.D. students that are receiving financial support from the department (such as teaching and research assistantships) must enroll in the seminar class CS 8098 each term that the course is offered.

## Advanced Study

Advanced study in computer science consists of a major concentration area. A concentration area consists of a number of courses that are related to a specific subfield of computer science. The major concentration consists of a minimum of 18 credit hours, no more than six of which can be independent study.

Credit earned for the core courses (CS 7330, CS 7343, CS 7350 and CS 7381) will not be counted for the concentration area. The student must file an advanced study degree plan with the department. No degree plan is accepted until approved by the chair of CS. Credits received prior to filing a degree plan are not guaranteed to count toward graduation.

## **Research Adviser and Supervisory Committee**

Before the student has completed 18 credit hours or two years of Ph.D. study (whichever comes first), he or she must identify a dissertation director and form a supervisory committee. It is the responsibility of the student to find a faculty member willing to provide a research topic or to supervise a topic of the student's choosing. The dissertation director must be one of the full-time tenure or tenure-track faculty members of the CS Department. This requirement will be satisfied by successful completion and filing of the Recommendation and Certification of Appointment of Supervisory Committee form.

The dissertation director, together with the student, should prepare the advanced study degree plan. They should also form the supervisory committee. The supervisory committee is made up of at least five members. Three resident tenured or tenure-track faculty members are drawn from the student's department, and one resident tenured or tenure-track faculty member is chosen from each minor field. The chair of the supervisory committee shall be a resident tenured or tenure-track member of the school faculty and shall normally be the dissertation director and a member of the student's department. Thus, a minimum of four members must be resident tenured or tenure-track faculty of SMU. The names of the supervisory committee members must be submitted to the chair of the CS Department and the director of the graduate division for approval.

## **Qualifying Examination**

The student must complete all the core courses with an average grade of *B+* (3.300) or better before he or she can appear for the qualifying examination. The student will give a written proposal to the committee members. The timing of this submission will be determined by the thesis adviser and usually occurs at the 40–50 percent completion point of the thesis research.

Committee members will submit questions to the Ph.D. dissertation director. The director and the members will negotiate the content of the questions. The questions will generally be from areas related to the student's area of research and, hence, the questions will be submitted only after student has submitted the written proposal. However, should a majority of the committee judge that the student has not shown strong credentials in one or more of the core areas, the examination may include questions designed specifically to determine whether or not the student has sufficient background in those areas. Examinations will be graded by each submitting member and given back to the chair. The chair, along with the other members, will decide the outcome (pass/fail) of the examination.

The written portion of the qualifying examination is a take-home (open-book) examination with four questions. Although there will be more than four members in the committee, usually one member will be from outside CS and will not be required to submit a question. The questions will be given to the students on a Friday as determined by the committee chair, and the answers will be due back on the following Friday. The student must attain an average score of 70 percent and a minimum score of 50 percent on each individual question in order to receive a passing grade.

After passing the written portion, the student will appear for the oral portion of the qualifying examination. In addition to evaluating the presentation based on the proposed research, the oral part will also address any deficiencies the written examination may reveal. The student should schedule the oral presentation at the time the written proposal is submitted, even though he or she will be eligible to appear for the oral presentation only after passing the written portion.

Students will have a maximum of two attempts to pass the qualifying examination.

If a student changes her or his area of research significantly or if significant changes are made to the composition of the supervising committee, the student may be required to repeat the qualifying examination.

## **Change of Committee or Concentration**

A student may change concentration, dissertation director or supervisory committee at any point, subject to the approval of the CS faculty. Such a change will generally require the formation of a new supervisory committee and will definitely require the filing of a new advanced study plan. The student must take a qualifying examination in the new concentration area to be admitted to candidacy. In the event that the student changes concentration after being admitted to candidacy, the candidacy is revoked and the student must pass the qualifying examination in the new concentration.

Two attempts are allowed for a student in this position. A student may also change areas before being admitted to candidacy. In this event, it is possible that one or more unsuccessful attempts will have been made to pass the qualifying examination. The student may, at the discretion of the CS supervisory committee be allowed two attempts in the new concentration, but under no circumstances will more than three attempts be allowed at the examination. It is also possible that a student will change dissertation director or composition of the supervisory committee while still retaining the same concentration area. Such changes may be made only with the approval of the CS supervisory committee. If the dissertation director is changed, the new dissertation director may, at his or her discretion, require a new qualifying examination. In addition, if the makeup of the supervisory committee changes substantially, the CS supervisory committee may require a new qualifying examination to be taken with the newly constituted committee.

## **Doctoral Dissertation**

The most clearly distinguishing characteristic of a program leading to the Ph.D. degree is the requirement that the candidate write a dissertation embodying the results of a significant and original investigation. The dissertation must make a contribution to knowledge that is of value to the computer science discipline, and it is expected to be a mature and competent piece of writing. The work reported in the dissertation may be basic scientific research, engineering research or creative design.

Upon the successful completion of the dissertation defense, the dissertation is electronically uploaded to the SMU/UMI Dissertation Publishing submission website. The original abstract must be signed by the dissertation director, and the original half-title page of the dissertation must be signed by all of the CS faculty members attending the dissertation defense.

## **Dissertation Defense**

### **Final Examination:**

Upon completion of all other requirements, a dissertation defense by the candidate will be announced, registered with the Graduate Division and subsequently conducted by the supervisory committee. The candidate must make six unbound copies of his or her dissertation available to the members of the supervisory committee at least two weeks in advance of the dissertation defense. This defense, which is conducted orally, must enable the supervisory committee to satisfy itself that the dissertation is an original piece of work, either in research or creative design that it has been carried out in keeping with the highest standards of investigation and reporting, and that it makes a contribution to knowledge that is of value to the computer profession or scientific community. The defense must be scheduled with the CS departmental office and posted in the Lyle School of Engineering. This defense is open to the public, with the possible exception of a period open only to committee members and CS faculty in which general questions in computer science may be asked. Satisfactory performance on this defense constitutes the last requirement to be met for the Ph.D. degree.

## **Software Engineering, D.Engr.**

Students receiving a D.Engr. with a major in software engineering are expected to achieve and demonstrate a solid foundation and depth in software engineering practice, a breadth across the engineering discipline, and a significant and industrially relevant engineering innovative experience through the D.Engr. praxis.

## **Admission Requirements**

Applicants are required to satisfy the following requirements:

1. A master's degree in software engineering, computer science, computer engineering, engineering management or a related discipline.
2. Submission of official test scores from the GRE graduate school admission test score and submission of TOEFL English language proficiency exam scores if English is not the applicant's native language.
3. Approval of the director of the software engineering program.

## Degree Requirements

In addition to meeting the Lyle School of Engineering requirements for the D.Engr. degree, candidates are required to satisfy the following: The graduation requirements fall into the categories of completion of a specified number of graduate credit hours in appropriate subjects and completion of a praxis. Doctoral students must maintain at least a 3.000 GPA every term and at least a 3.300 overall (cumulative) GPA during their course of study.

1. Twenty-four credit hours of core software engineering courses. These credit hours must come from graduate-level courses in software engineering, as specified.
2. Twelve credit hours of core engineering management courses. These credit hours must come from graduate-level courses in engineering management, as specified.
3. Fifteen credit hours in a technical specialty. These credit hours must be taken in software engineering, computer science, computer engineering, engineering management, systems engineering or other technical areas consistent with anticipated doctoral work demands.
4. Fifteen credit hours of electives. All elective credit hours must come from graduate-level courses and must be approved by the advisory committee. These courses should, in some way, complement and strengthen the student's degree plan. They should broaden the student's understanding of the issues and problems relating to the application of software technologies to different engineering disciplines.
5. Twelve credit hours of praxis. These credit hours must be taken in residence. The student enrolls for these credit hours in the course of preparing the praxis project.

Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

## Core Courses in Software Engineering

### Required Courses

The following courses or their equivalents must be included in the degree plan:

- CS 7314 - Software Testing and Quality Assurance
- CS 7315 - Software Project Planning and Management
- CS 7316 - Software Requirements
- CS 7319 - Software Architecture and Design

### Additional Courses

In addition, at least four of the following courses must be taken:

- CS 8312 - Software Generation and Maintenance
- CS 8313 - Object-Oriented Analysis and Design
- CS 8314 - Software Metrics and Quality Engineering
- CS 8315 - Software Acquisition, Legal, and Economic Issues
- CS 8316 - User Interface Design
- CS 8317 - Software Reliability and Safety
- CS 8340 - Advanced Topics in Software Engineering

## Core Courses in Engineering Management

### Required Courses

The following courses, or their equivalents, must be included in the degree plan:

- EMIS 7370 - Probability and Statistics for Scientists and Engineers
- EMIS 7377 - Statistical Design and Analysis of Experiments

## Additional Courses

In addition, at least two of the following courses must be taken:

- EMIS 8360 - Operations Research Models
- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8364 - Engineering Management
- EMIS 8378 - Optimization Models for Decision Support

## Engineering Praxis

The student must perform a suitable engineering praxis proposed by the student and approved by the praxis adviser and the supervisory committee. The praxis must include a significant and industrially relevant engineering innovative experience, typically revolving around a well-defined project relevant to current software engineering practice. Good scholarship and the significance of the student's praxis could be demonstrated by relevant technical publications, patents (or patent applications) or invention disclosures. As a culmination of the doctoral program, the student must submit an acceptable written praxis report and pass the oral praxis presentation and defense.

Upon the successful completion of the praxis defense, the praxis is uploaded to the SMU/UMI Praxis Publishing website. The original abstract must be signed by the praxis adviser, and the original half-title page of the praxis must be signed by all of the CS faculty members attending the praxis defense.

## Sample Doctoral Degree Plans

The courses comprising a degree plan for a D.Engr. with a major in software engineering will be determined by the student's supervisory committee. The plans will vary among students depending on their background and praxis topics. Sample degree plans cover both basic degree requirements and technical specialties. All students must select a technical specialty track that is approved by their committee and that relates to their praxis topic. The following are *examples* of technical specialty tracks appropriate for a D.Engr. with a major in software engineering candidates:

### Security

- CS 7339 - Computer System Security
- CS 7348 - Internetworking Protocols and Programming
- CS 7349 - Data and Network Security
- CS 7359 - Software Security
- CS 8349 - Advanced Network and System Security
- CS 8352 - Cryptography and Data Security

### Networks/Distributed Computing

- CS 7344 - Computer Networks and Distributed Systems II
- CS 7348 - Internetworking Protocols and Programming
- CS 8344 - Computer Networks
- CS 8377 - Fault-Tolerant Computing
- CS 8380 - Parallel and Distributed Processing

### Data Management

- CS 7330 - File Organization and Database Management
- CS 7331 - Data Mining
- CS 7347 - XML and the Enterprise
- CS 8330 - Database Management Systems
- CS 8331 - Advanced Data Mining

- CS 8337 - Information Storage and Retrieval

### **Embedded Systems**

- CS 7380 - VLSI Algorithms
- CS 7385 - Microcontroller Architecture and Interfacing
- CS 8317 - Software Reliability and Safety
- CS 8387 - Switching Theory and Applications in VLSI CAD
- CS 8388 - Embedded Computing System Design

### **High-Performance Applications Engineering**

e.g., computer gaming

- CS 7350 - Algorithm Engineering
- CS 7381 - Computer Architecture
- CS 7382 - Computer Graphics
- CS 8355 - Graph Theory: Algorithms and Applications
- CS 8351 - Computer Arithmetic
- CS 8383 - Advanced Computer Architecture

### **Recognition of Previous Postbaccalaureate Coursework**

Students with an M.S. in software engineering, engineering management or other related areas may apply up to 30 credit hours of their M.S. degree credits toward their D.Engr. with a major in software engineering, subject to approval of their supervisory committee.

## **Computer Science, M.S.**

### **Admission Requirements**

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy the following:

1. A bachelor's degree in computer science, computer engineering or a closely related discipline. Applicants with undergraduate degrees in disciplines other than computer science may be admitted to the program and may be required to take articulation coursework and/or satisfy the competency requirement (see below).
2. A minimum GPA of 3.000 on a 4.000 scale in the student's junior and senior years.
3. A reasonable level of mathematical maturity.

### **Degree Requirements**

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following:

- Either 24 credit hours of coursework and a master's thesis or 30 credit hours of coursework.
- Twelve credit hours of core courses. Students on campus are required to register for a seminar course (for zero credit hours) for at least one term and secure a grade of Pass.
- Six credit hours of concentration. Thesis students take six credit hours of thesis, instead of concentration.
- Twelve credit hours of electives. All students are allowed to take at most three credit hours of independent study, which will be counted as one elective course.

The CS Department requires that the courses taken constitute a coherent program leading to mastery of computer science. These requirements are discussed in the subsequent subsections. Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

Students entering the program without an undergraduate degree in computer science must satisfy the following competency requirements in addition to the degree requirements listed above:

1. The ability to write programs in a high level language such as Java, C++, Python, etc.
2. Demonstrate competence in six core areas of computer science.

Students may fulfill (1) by either:

- a. Demonstrating their programming ability in a departmental examination.
- b. Successful completion of CS 1341 - Principles of Computer Science.
- c. Obtaining a certificate of achievement from EDX (or comparable entity) in one of the high-level programming languages (e.g. Java, C++, Python).

Students may fulfill (2) by demonstrating competence in the following core areas of Computer Science:

- a. Computer Architecture
- b. Programming Languages
- c. Data Structures and Algorithms
- d. Database Management Systems
- e. Operating Systems and Concurrency
- f. Networks and Distributed Systems

Competence in core areas may be demonstrated by one of the following:

- Completing a course from an ABET Accredited program that covers a core area.
- Obtaining 70% or better on a departmental examination that covers a core area. Exams will be based on a set of specified readings published by the Computer Science Department and should be taken prior to beginning of the first semester.
- Completing and passing one or more of the following core-area courses:
  - CS 7101 - Foundations of Computer Architecture
  - CS 7102 - Foundations of Programming Languages
  - CS 7103 - Foundations of Data Structures and Algorithms
  - CS 7104 - Foundations of Database Management Systems
  - CS 7105 - Foundations of Operating Systems
  - CS 7106 - Foundations of Networks and Distributed Systems

These courses are 1 credit hour each, are offered pass-fail and do not count toward the 30 hour degree requirement. The grade for the course will be based on several assignments and a final examination.

## Residency and Level Requirements

A minimum of 30 graduate credit hours must be earned toward an M.S. degree, of which at least 24 must be earned in residency at SMU. Up to six credit hours may be transferred with departmental approval.

Of the 30 credit hours needed for graduation, at least nine credit hours must be at the 8000 level, with the remainder at the 7000 level or above. For the 8000-level courses, at least six credit hours must be CS courses.

## Distribution of Courses

Courses are considered to be core, concentration or elective. Core courses cover material considered fundamental to graduate-level computer science and are required of all students. Each student is expected to specialize in some area of computer science. The concentration area is a mechanism by which a student can tailor a coherent program of study to his or her interests. Electives are courses taken to round out the 30 credit hour requirement. Transferred credit hours may be used to satisfy any of these requirements. The specific requirements are discussed in detail in the following subsections.

## Course Requirements

A student who elects to take the nonthesis option must take 12 credit hours of core courses, six credit hours of concentration and 12 credit hours of electives. The electives may be selected from available graduate-level course offerings in the Lyle School of Engineering, subject to the residency and level requirements and adviser approval. Those who elect to take thesis option will substitute the concentration with thesis credit hours.

### Core Courses

- CS 7330 - File Organization and Database Management
- CS 7343 - Operating Systems and System Software
- CS 7350 - Algorithm Engineering
- CS 7381 - Computer Architecture
- CS 8098 - Computer Science Seminars

Total: 12 Credit Hours

### Electives

Electives may be selected from available graduate-level course offerings in the Lyle School of Engineering, subject to the residency and level requirements and adviser approval.

Total: 12 Credit Hours

## Concentration

### Algorithms

Two of the following:

- CS 7380 - VLSI Algorithms
- CS 8350 - Algorithms II
- CS 8351 - Computer Arithmetic
- CS 8355 - Graph Theory: Algorithms and Applications

Total: 6 Credit Hours

### Architecture Concentration

Two of the following:

- CS 7380 - VLSI Algorithms
- CS 8377 - Fault-Tolerant Computing
- CS 8380 - Parallel and Distributed Processing
- CS 8383 - Advanced Computer Architecture
- CS 8387 - Switching Theory and Applications in VLSI CAD

Total: 6 Credit Hours

### Data Science Concentration

Two of the following:

- CS 7323 - Mobile Applications for Sensing and Learning

- CS 7331 - Data Mining
- CS 7337 - Information Retrieval and Web Search
- CS 7338 - Security Economics
- CS 7347 - XML and the Enterprise
- CS 8331 - Advanced Data Mining
- CS 8337 - Information Storage and Retrieval

Total: 6 Credit Hours

### **Security Concentration**

Two of the following:

- CS 7338 - Security Economics
- CS 7339 - Computer System Security
- CS 7349 - Data and Network Security
- CS 7359 - Software Security
- CS 7369 - Hardware Security and Trojan Detection
- CS 8349 - Advanced Network and System Security
  
- CS 8352 - Cryptography and Data Security  
or
- ECE 8372 - Cryptography and Data Security
  
- CS 8359 - Advanced Software Security

Total: 6 Credit Hours

### **Software Concentration**

Two of the following:

- CS 7314 - Software Testing and Quality Assurance
- CS 7319 - Software Architecture and Design
- CS 7345 - Advanced Application Programming
- CS 8313 - Object-Oriented Analysis and Design
- CS 8316 - User Interface Design

Total: 6 Credit Hours

### **Thesis Option**

A student may elect to write a master's thesis, which counts as the six credit hours of concentration. The student must register for at least six credit hours under CS 7(1–6)96. If the thesis option is chosen, all other requirements are the same. The six credit hours of thesis satisfy six of the nine required credit hours for advanced courses.

A master's thesis represents one or more of the following: synthesis of divergent ideas or a scholarly critique of current literature, a creative research activity or a significant design project, the results of which must be documented in a well-written thesis. The thesis should be of publishable quality, and it is recommended that it be submitted to an appropriate conference or journal before the thesis defense.

A thesis must be supervised by a faculty adviser selected by the student. Any full-time faculty member supporting the student's concentration area may serve as the thesis adviser. It is the student's responsibility to find an adviser willing to provide a thesis topic or willing to supervise a topic of the student's choosing.

Once the student has found an adviser and a topic has been selected, the student and adviser should jointly form a thesis supervisory committee. This committee must consist of at least three members, two of whom must represent the concentration area. The adviser chairs this committee. The makeup of this committee must be approved by the chair of CS and the director of the Graduate Division.

The student must provide the members of the committee with a written thesis proposal. Typically, this will be done before faculty agrees to serve on the committee.

A thesis is judged by the supervisory committee based upon technical merit, originality and presentation. The thesis must be presented orally to the committee at a thesis defense. A copy of the thesis must be made available to each member of the committee at least two weeks before the planned defense. The defense must be scheduled with the CS department office and posted on appropriate bulletin boards. The defense is open to the public.

## **Cybersecurity, M.S.**

Cybersecurity is the computer science discipline concerned with the design and development of secure systems and applications. Cybersecurity covers security of computer networks and systems as well as physical security. In addition to the technical aspects such as cryptography, protocols and access control, the curriculum deals with the policy and management issues, integration and logistics, and budgeting. Centering on the problems of working professionals in the critical field of security, the SMU program in cybersecurity serves the needs of both full-time and part-time students.

## **Admission Requirements**

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy the following:

1. A bachelor's degree in one of the quantitative sciences, mathematics or computer science or in one of the engineering disciplines.
2. A minimum of one year of college-level calculus.
3. A minimum of two years of industry experience or submission of official GRE general graduate school admission test scores.

## **Degree Requirements**

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following:

### **Core Courses**

Satisfactory completion of the core curriculum encompassing four courses:

- CS 7339 - Computer System Security
- CS 7343 - Operating Systems and System Software
- CS 7349 - Data and Network Security
- CS 7359 - Software Security

### **Advanced Elective Courses**

Satisfactory completion of three advanced elective courses from the following:

- CS 7314 - Software Testing and Quality Assurance
- CS 7331 - Data Mining
- CS 7338 - Security Economics

- CS 7359 - Software Security
- CS 7369 - Hardware Security and Trojan Detection
- CS 8317 - Software Reliability and Safety
- CS 8331 - Advanced Data Mining
- CS 8349 - Advanced Network and System Security
  
- CS 8352 - Cryptography and Data Security  
or
- ECE 8372 - Cryptography and Data Security
  
- CS 8353 - Digital Forensics
- CS 8356 - Border and Transportation Security
- CS 8359 - Advanced Software Security
- CS 8377 - Fault-Tolerant Computing
- EMIS 7313 - Integrated Logistics Support

### **Elective Courses**

Satisfactory completion of three elective courses; these courses may be any of the available graduate-level course offerings in the Lyle School of Engineering.

### **Note**

Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

### **Additional Requirements**

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following:

- Either 24 credit hours of coursework and a master's thesis or 30 credit hours of coursework.
- Twelve credit hours of core courses. Students on campus are required to register for a seminar course (for zero credit hours) for at least one term and secure a grade of Pass.
- Six credit hours of concentration. Thesis students take six credit hours of thesis, instead of concentration.
- Twelve credit hours of electives. All students are allowed to take at most three credit hours of independent study, which will be counted as one elective course.

The CS Department requires that the courses taken constitute a coherent program leading to mastery of computer science. These requirements are discussed in the subsequent subsections. Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

Students entering the program without an undergraduate degree in computer science must satisfy the following competency requirements in addition to the degree requirements listed above:

1. The ability to write programs in a high level language such as Java, C++, Python, etc.
2. Demonstrate competence in six core areas of computer science.

Students may fulfill (1) by either:

- a. Demonstrating their programming ability in a departmental examination.
- b. Successful completion of CS 1341 - Principles of Computer Science.
- c. Obtaining a certificate of achievement from EDX (or comparable entity) in one of the high-level programming languages (e.g. Java, C++, Python).

Students may fulfill (2) by demonstrating competence in the following core areas of Computer Science:

- a. Computer Architecture
- b. Programming Languages
- c. Data Structures and Algorithms
- d. Database Management Systems
- e. Operating Systems and Concurrency
- f. Networks and Distributed Systems

Competence in core areas may be demonstrated by one of the following:

- Completing a course from an ABET Accredited program that covers a core area.
- Obtaining 70% or better on a departmental examination that covers a core area. Exams will be based on a set of specified readings published by the Computer Science & Engineering Department and should be taken prior to beginning of the first semester.
- Completing and passing one or more of the following core-area courses:
  - CS 7101 - Foundations of Computer Architecture
  - CS 7102 - Foundations of Programming Languages
  - CS 7103 - Foundations of Data Structures and Algorithms
  - CS 7104 - Foundations of Database Management Systems
  - CS 7105 - Foundations of Operating Systems
  - CS 7106 - Foundations of Networks and Distributed Systems

These courses are 1 credit hour each, are offered pass-fail and do not count toward the 30 hour degree requirement. The grade for the course will be based on several assignments and a final examination.

## Residency and Level Requirements

A minimum of 30 graduate credit hours must be earned toward an M.S. degree, of which at least 24 must be earned in residency at SMU. Up to six credit hours may be transferred with departmental approval. Of the 30 credit hours needed for graduation, at least six credit hours must be at the 8000-level CS courses, with the remainder at the 7000 level or above.

## Software Engineering, M.S.

Software engineering is the computer science discipline concerned with developing large applications. Software engineering covers not only the technical aspects of building software systems, but also management issues.

The SMU master's degree program in software engineering offers a balanced approach to management issues, such as directing programming teams, scheduling and budgeting, and technical expertise necessary to succeed in this critically important field. Many of the courses are based upon those proposed by the Software Engineering Institute, specifically founded by the Department of Defense to assist in the development of a sound foundation for this rapidly emerging field. Centering on the problems of working professionals in this field, the SMU program in software engineering serves the needs of both the full-time and part-time student.

## Admission Requirements

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy the following:

1. A bachelor's degree in one of the quantitative sciences, mathematics or computer science, or in one of the engineering disciplines.
2. A minimum of one year of college-level calculus.
3. A minimum of two years of experience in software development and/or maintenance, or submission of official GRE graduate school admission test scores.

## Degree Requirements

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following: 30 credit hours of coursework consisting of 12 credit hours of core courses and 18 credit hours of electives as follows:

### Core Courses

Satisfactory completion of the core curriculum encompassing four courses:

- CS 7314 - Software Testing and Quality Assurance
- CS 7315 - Software Project Planning and Management
- CS 7316 - Software Requirements
- CS 7319 - Software Architecture and Design

### Advanced Elective Courses

Satisfactory completion of three advanced elective courses from the following:

- CS 7111 - Intellectual Property and Information Technology
- CS 7340 - Service-Oriented Computing
- CS 7345 - Advanced Application Programming
- CS 7349 - Data and Network Security
- CS 8312 - Software Generation and Maintenance
- CS 8313 - Object-Oriented Analysis and Design
- CS 8314 - Software Metrics and Quality Engineering
- CS 8315 - Software Acquisition, Legal, and Economic Issues
- CS 8316 - User Interface Design
- CS 8317 - Software Reliability and Safety
- CS 8340 - Advanced Topics in Software Engineering

### Elective Courses

Satisfactory completion of three elective courses from available graduate-level course offerings.

### Note

Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

### Additional Requirements

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following:

- Either 24 credit hours of coursework and a master's thesis or 30 credit hours of coursework.
- Twelve credit hours of core courses. Students on campus are required to register for a seminar course (for zero credit hours) for at least one term and secure a grade of Pass.
- Six credit hours of concentration. Thesis students take six credit hours of thesis, instead of concentration.
- Twelve credit hours of electives. All students are allowed to take at most three credit hours of independent study, which will be counted as one elective course.

The CS Department requires that the courses taken constitute a coherent program leading to mastery of computer science. These requirements are discussed in the subsequent subsections. Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

Students entering the program without an undergraduate degree in computer science must satisfy the following competency requirements in addition to the degree requirements listed above:

1. The ability to write programs in a high level language such as Java, C++, Python, etc.
2. Demonstrate competence in six core areas of computer science.

Students may fulfill (1) by either:

- a. Demonstrating their programming ability in a departmental examination.
- b. Successful completion of CS 1341 - Principles of Computer Science.
- c. Obtaining a certificate of achievement from EDX (or comparable entity) in one of the high-level programming languages (e.g. Java, C++, Python).

Students may fulfill (2) by demonstrating competence in the following core areas of Computer Science:

- a. Computer Architecture
- b. Programming Languages
- c. Data Structures and Algorithms
- d. Database Management Systems
- e. Operating Systems and Concurrency
- f. Networks and Distributed Systems

Competence in core areas may be demonstrated by one of the following:

- Completing a course from an ABET Accredited program that covers a core area.
- Obtaining 70% or better on a departmental examination that covers a core area. Exams will be based on a set of specified readings published by the Computer Science & Engineering Department and should be taken prior to beginning of the first semester.
- Completing and passing one or more of the following core-area courses:
  - CS 7101 - Foundations of Computer Architecture
  - CS 7102 - Foundations of Programming Languages
  - CS 7103 - Foundations of Data Structures and Algorithms
  - CS 7104 - Foundations of Database Management Systems
  - CS 7105 - Foundations of Operating Systems
  - CS 7106 - Foundations of Networks and Distributed Systems

These courses are 1 credit hour each, are offered pass-fail and do not count toward the 30 hour degree requirement. The grade for the course will be based on several assignments and a final examination.

## **Residency and Level Requirements**

A minimum of 30 graduate credit hours must be earned toward an M.S. degree, of which at least 24 must be earned in residency at SMU. Up to six credit hours may be transferred with departmental approval. Of the 30 credit hours needed for graduation, at least six credit hours must be at the 8000-level CS courses, with the remainder at the 7000 level or above.

## **Computer Science/Master of Business Administration, M.S./M.B.A.**

### **Joint Master of Science in Engineering/Master of Business Administration Program**

#### **Overview**

The Bobby B. Lyle School of Engineering and the Edwin L. Cox School of Business offer a two-year, dual-degree in Master of Science in Engineering (with one of the specific degrees listed above) and Master of Business Administration, with as few as 68 semester credit hours. The program is intended for full-time graduate students with Bachelor degrees in engineering or science. The program is offered on-campus although some of the engineering courses may be taken by means of the Lyle School's distance learning facilities. This program is geared toward recent

graduates as well as early-career professionals employed in the engineering and technology sector who desire to broaden and deepen their skills to further their career opportunities and become leaders in technology with the appropriate business and management acumen.

This program takes advantage of the 44-credit hour Fast Track MBA degree offered by Cox School and double-counts up to 6 credit hours of MBA courses as electives in the 30-credit hour MS Engineering degree programs making it possible to obtain two degrees with a total of 68 semester credit hours (24 credit hours of engineering and 44 credit hours in MBA program). As an example, students first complete the 24 credit hour of required courses for the specific MS engineering degree sought during the fall and spring semesters of the first year. Students then start the year-long Fast Track MBA (starting with the summer term and continuing in the fall and spring terms) completing both degrees at the end of the second academic year.

At the conclusion of the dual degree program, students obtain a MS in the specific engineering degree and the MBA.

The overall educational objective of the joint MS-MBA program is to impart the necessary breadth and depth in business and in technology for those individuals preparing for leadership roles in technology firms. The program provides a reduction of 6 credit hours from the total credits that would be required for a student earning the two degrees separately (one of the MS engineering degrees listed at the title page and the Fast Track MBA) and reduces the time to complete both degrees to 2 years, including a summer semester.

## **Admission Requirements**

The applicants must meet both Lyle School of Engineering admission requirements (general School requirements and program admission requirements) for the specific Lyle Master of Science degree and Cox School of Business Fast Track MBA requirements. See admission requirements in each School program section for details. Applicants must submit separate applications to the Lyle and Cox programs.

## **Curriculum Example**

The general course of study for the joint program follows:

### **Fall Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

### **Spring Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

**Total Engineering: 24 Credit Hours**

### **Summer Term (Cox School)**

Module A Courses

- ACCT 6201 - Financial Accounting I

- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis

#### Module B Courses

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- MNGT 6001 - Managing Your Career
- Elective: one course (2 Credit Hours)

Term Total: 12 Credit Hours

### Fall Term (Cox School)

#### Module A Courses

- ITOM 6203 - Operations Management
- MNGT 6003 - Business Presentation Techniques
- STRA 6201 - Strategic Management
- Elective: two courses (4 Credit Hours)

#### Module B Courses

- ACCT second required accounting (2 Credit Hours)
- BUSE 6202 - Managerial Economics
- MNO 6201 - Organizational Behavior: Managing and Leading People
- Elective: one course (2 Credit Hours)

Term Total: 16 Credit Hours

### Spring Term (Cox School)

#### Module A Courses

- Elective: four courses (8 Credit Hours)

#### Module B Courses

- Elective: four courses (8 Credit Hours)

Term Total: 16 Credit Hours

Total MBA: 44 Credit Hours

Total for Joint MS-MBA: 68 Credit Hours

## **Software Engineering/Master of Business Administration, M.S./M.B.A.**

### Joint Master of Science in Engineering/Master of Business Administration Program

#### **Overview**

The Bobby B. Lyle School of Engineering and the Edwin L. Cox School of Business offer a two-year, dual-degree in Master of Science in Engineering (with one of the specific degrees listed above) and Master of Business Administration, with as few as 68 semester credit hours. The program is intended for full-time graduate students with

Bachelor degrees in engineering or science. The program is offered on-campus although some of the engineering courses may be taken by means of the Lyle School's distance learning facilities. This program is geared toward recent graduates as well as early-career professionals employed in the engineering and technology sector who desire to broaden and deepen their skills to further their career opportunities and become leaders in technology with the appropriate business and management acumen.

This program takes advantage of the 44-credit hour Fast Track MBA degree offered by Cox School and double-counts up to 6 credit hours of MBA courses as electives in the 30-credit hour MS Engineering degree programs making it possible to obtain two degrees with a total of 68 semester credit hours (24 credit hours of engineering and 44 credit hours in MBA program). As an example, students first complete the 24 credit hour of required courses for the specific MS engineering degree sought during the fall and spring semesters of the first year. Students then start the year-long Fast Track MBA (starting with the summer term and continuing in the fall and spring terms) completing both degrees at the end of the second academic year.

At the conclusion of the dual degree program, students obtain a MS in the specific engineering degree and the MBA.

The overall educational objective of the joint MS-MBA program is to impart the necessary breadth and depth in business and in technology for those individuals preparing for leadership roles in technology firms. The program provides a reduction of 6 credit hours from the total credits that would be required for a student earning the two degrees separately (one of the MS engineering degrees listed at the title page and the Fast Track MBA) and reduces the time to complete both degrees to 2 years, including a summer semester.

## **Admission Requirements**

The applicants must meet both Lyle School of Engineering admission requirements (general School requirements and program admission requirements) for the specific Lyle Master of Science degree and Cox School of Business Fast Track MBA requirements. See admission requirements in each School program section for details. Applicants must submit separate applications to the Lyle and Cox programs.

## **Curriculum Example**

The general course of study for the joint program follows:

### **Fall Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

### **Spring Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

**Total Engineering: 24 Credit Hours**

## Summer Term (Cox School)

### Module A Courses

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis

### Module B Courses

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- MNGT 6001 - Managing Your Career
- Elective: one course (2 Credit Hours)

Term Total: 12 Credit Hours

## Fall Term (Cox School)

### Module A Courses

- ITOM 6203 - Operations Management
- MNGT 6003 - Business Presentation Techniques
- STRA 6201 - Strategic Management
- Elective: two courses (4 Credit Hours)

### Module B Courses

- ACCT second required accounting (2 Credit Hours)
- BUSE 6202 - Managerial Economics
- MNO 6201 - Organizational Behavior: Managing and Leading People
- Elective: one course (2 Credit Hours)

Term Total: 16 Credit Hours

## Spring Term (Cox School)

### Module A Courses

- Elective: four courses (8 Credit Hours)

### Module B Courses

- Elective: four courses (8 Credit Hours)

Term Total: 16 Credit Hours

Total MBA: 44 Credit Hours

Total for Joint MS-MBA: 68 Credit Hours

## Computer Science Courses

### CS 7049 - Master's Full-Time Status

*Credits: 0*

Full-time status for students in the master's program.

## **CS 7096 - Master's Thesis**

*Credits: 0*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

## **CS 7101 - Foundations of Computer Architecture**

*Credits: 1*

Provides a foundation in computer architecture for students interested in taking graduate level courses in computer science. Topics include the von Neumann architecture, digital logic design, processors, primary and secondary storage, instructions, pipelining, cache, and the memory hierarchy. The course is intended as articulation for the M.S. degree in computer science.

## **CS 7102 - Foundations of Programming Languages**

*Credits: 1*

Provides a foundation in programming languages for students interested in taking graduate level courses in computer science. Topics include interpreted vs. compiled languages, object-oriented vs. functional programming, static vs. dynamic typing, regular expressions, context free grammars, and the role of the stack and heap in programming language implementations. The course is intended as articulation for the M.S. degree in computer science.

## **CS 7103 - Foundations of Data Structures and Algorithms**

*Credits: 1*

Provides a foundation in data structures and algorithms for students interested in taking graduate level courses in computer science. Topics include hashing, linked-lists, sorting and searching, dynamic arrays, and big-O analysis. The course is intended as articulation for the M.S. degree in computer science.

## **CS 7104 - Foundations of Database Management Systems**

*Credits: 1*

Provides a foundation in database management for students interested in taking graduate level courses in computer science. Topics include the entity-relationship model, working with primary and secondary keys, relational database normalization, and the Structured Query Language (SQL). The course is intended as articulation for the M.S. degree in computer science.

## **CS 7105 - Foundations of Operating Systems**

*Credits: 1*

Provides a foundation in operating systems and concurrency for students interested in taking graduate level courses in computer science. Topics include memory management, paging, processes and threads, locks, deadlock, and concurrency. The course is intended as articulation for the M.S. degree in computer science.

## **CS 7106 - Foundations of Networks and Distributed Systems**

*Credits: 1*

Provides a foundation in operating systems and concurrency for students interested in taking graduate level courses in computer science. Topics include network protocols, the OSI and TCP/IP reference models, the architecture of the Web, and network security. The course is intended as articulation for the M.S. degree in computer science.

## **CS 7111 - Intellectual Property and Information Technology**

*Credits: 1*

Presents fundamentals in the nature, protection, and fair use of intellectual property. Covers patent, copyright, trademark, trade secret, and antitrust principles, with an emphasis on the Internet, software, databases, and digital transmission technologies. Investigates the open source and creative commons alternatives for disseminating intellectual property. Examines the engineer's, scientist's, manager's, and creative artist's professional and ethical responsibilities and opportunities regarding intellectual property. Also investigates the rapid change in types and uses

of intellectual property spawned by computers, digital media, e-commerce, and biotechnology. Prerequisites: Graduate standing and a general understanding of software and digital information systems.

### **CS 7190 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7191 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7192 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7193 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7194 - Special Topics**

*Credits: 1*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7196 - Master's Thesis**

*Credits: 1*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **CS 7290 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7291 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7292 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7293 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7294 - Special Topics**

*Credits: 2*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

## **CS 7296 - Master's Thesis**

*Credits: 2*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

## **CS 7312 - Software Systems Engineering**

*Credits: 3*

Focuses on the engineering of complex systems that have a strong software component. For such systems, software often assumes functions previously allocated to mechanical and electrical subsystems, changing the way systems engineers must think about classical systems issues. Provides a framework for addressing systems engineering issues by focusing on the Software Engineering Institute's Capability Maturity Model. Topics include deriving and allocating requirements, system and software architectures, integration, interface management, configuration management, quality, verification and validation, reliability, and risk.

## **CS 7313 - Software Configuration Management**

*Credits: 3*

Successful software development and maintenance requires an understanding and application of many activities and functions throughout the software engineering process. One of the key areas is software configuration management. Students explore the principles and practices of the software configuration management function and mandatory role, including how CM is defined, planned, implemented, and measured over the life cycle of any development or maintenance project. Focuses on understanding specific roles of project team members and the tasks they plan and execute: managers who must support the CM efforts; project managers who must plan and design the CM system for their projects; those who implement the system; those who manage and administer the system; and the testers, engineers, and quality assurance personnel who are affected by the system.

## **CS 7314 - Software Testing and Quality Assurance**

*Credits: 3*

Examines the relationship of software testing to quality, with emphasis on testing techniques and the role of testing in the validation of system requirements. Topics include module and unit testing, integration, code inspection, peer reviews, verification and validation, statistical testing methods, preventing and detecting errors, selecting and implementing project metrics, and defining test plans and strategies that map to system requirements. Testing principles, formal models of testing, performance monitoring, and measurement also are examined.

## **CS 7315 - Software Project Planning and Management**

*Credits: 3*

Intended for individuals who seek to plan and/or lead a software development project in industry or academia. Covers the process of planning and managing a software development project from initiation to implementation. Primary topics include Schedule, Risk, Issue, Financial, Scope, and Change Management. Other key topics deal with controlling functions for tracking progress, estimating of cost, duration, complexity, functionality, and delivery management. Additional topics addressed include the software development process, capability maturity models, software lifecycle models (Waterfall, Agile, Iterative), configuration management, quality assurance, measurement, and process improvement. Prerequisites: Graduate students in computer science, software engineering, computer engineering or engineering management (business majors with permission). It is helpful to have experience in software development, planning, or management outside of the classroom environment (i.e., development of software that will be delivered to a customer).

## **CS 7316 - Software Requirements**

*Credits: 3*

Focuses on defining and specifying software requirements that can be used as the basis for designing and testing software. Topics include use-cases for describing system behavior, formal methods, specifying functional versus nonfunctional requirements, and the relationship of requirements to software testing.

## **CS 7317 - Leadership for Architecting Software Systems**

*Credits: 3*

Principles of leadership and software architecture in building large software systems or leading large teams. Involves a mix of personal assessment, reflection, and the development of leadership and influence skills and concepts unique to each student. Examines the process of developing large software systems in a constantly changing commercial environment.

## **CS 7319 - Software Architecture and Design**

*Credits: 3*

Successful software development requires both an understanding of software design principles and a broader understanding of software architectures that provide a framework for design. The course explores the role of design in the software life cycle, including different approaches to design, design trade-offs, and the use of design patterns in modeling object-oriented solutions. Focuses on important aspects of a system's architecture, including the division of functions among system modules, synchronization, asynchronous and synchronous messaging, interfaces, and the representation of shared information.

## **CS 7320 - Artificial Intelligence**

*Credits: 3*

Introduces basic principles and current research topics in artificial intelligence. Includes the formal representation of real-world problems; the search of problem spaces for solutions; and the deduction of knowledge in terms of predicate logic, nonmonotonic reasoning, and fuzzy sets. Also, the application of these methods to important areas of artificial intelligence, including expert systems, planning, language understanding, machine learning, neural networks, computer vision, and robotics. Prerequisites: CS 2341, CS 3342.

## **CS 7323 - Mobile Applications for Sensing and Learning**

*Credits: 3*

Equips students with the practical skills necessary to develop mobile applications that take advantage of the myriad sensing and control capabilities of modern smartphones. Focuses on interfacing with phone hardware, efficient computing on the phone and in the cloud using virtualized servers, and efficient analysis of the peripheral sensor streams of today's smartphones. Students integrate real-time control and/or automation using a third-party hardware platform to interface with the mobile platform.

## **CS 7324 - Machine Learning in Python**

*Credits: 3*

Introduces the processes of learning from data. Provides an overview of a number of machine learning techniques, including pre-processing, visualization, classification, and regression, used in analytics. Covers classic and contemporary learning techniques, with emphasis on artificial neural networks and deep learning methods. Material covered will be reinforced through hands-on experience using state-of-the-art tools. Class examples and assignments will come from the programming language Python. Knowledge of linear algebra, calculus, introductory algorithm analysis, statistics/probability, and an introduction to python programming is suggested.

## **CS 7330 - File Organization and Database Management**

*Credits: 3*

A survey of current database approaches and systems, and the principles of design and use of these systems. Covers query language design and implementation constraints, and applications of large databases. Includes a survey of file structures and access techniques. Also, the use of a relational database management system to implement a database design project. Prerequisite: CS 2341.

## **CS 7331 - Data Mining**

*Credits: 3*

Introduces data mining techniques (classification, association analysis, and cluster analysis) used in analytics. All

material covered is reinforced through hands-on experience using state-of-the art tools to design and execute data mining processes. Prerequisites: CS 1342 or equivalent, CS 4340/EMIS 3340/STAT 4340, or CS 7370/EMIS 7370.

### **CS 7333 - Quantifying the World**

*Credits: 3*

In the global information age, data can be leveraged to rapidly answer previously unanswerable questions. Students explore how to make sense of the large amounts of data frequently available, from hypothesis formation and data collection to methods of analysis and visualization. Includes ways to set up Internet-level measurements and formulate testable hypotheses; ways to automatically gather, store, and query large datasets; and ways to apply statistical methods (descriptive and predictive) and information visualization to collected datasets. Students learn to use Python and R programming languages to carry out data collection, analysis, and visualization. Culminates in a final project using real data of the students' choosing.

### **CS 7337 - Information Retrieval and Web Search**

*Credits: 3*

Introduces the field of information retrieval, with an emphasis on its application in Web search. Also introduces the basic concepts of stemming, tokenizing and inverted indices, text similarity metrics, and the vector-space model. Students study popular Web search engines and apply the concepts in several Java-based projects. Prerequisite: CS 3353 or permission of instructor.

### **CS 7338 - Security Economics**

*Credits: 3*

Introduces economics as a tool for understanding and managing information security. Reviews key information security challenges and technologies in order to reason about the topics economically. Students are introduced to techniques of analytic and empirical modeling. Economic concepts reviewed include rationality, markets, and information. Presents models and metrics of security investment, along with cost-benefit analysis techniques, and techniques for empirical investigation and measurement of cybercrime. Security games are designed to capture the strategic interaction between defenders, as well as between attacker and defenders. Implications for public policy are discussed.

### **CS 7339 - Computer System Security**

*Credits: 3*

Investigates a broad selection of contemporary issues in computer security, including an assessment of state-of-the-art technology used to address security problems. Includes sources for computer security threats and appropriate reactions, basic encryption and decryption, secure encryption systems, program security, trusted operating systems, database security, network and distributed systems security, administering security, and legal and ethical issues. Prerequisite: CS 5343 or equivalent.

### **CS 7340 - Service-Oriented Computing**

*Credits: 3*

SOC is the computing paradigm that utilizes services as fundamental elements for developing applications. Service providers expose capabilities through interfaces. Service-oriented architecture maps these capabilities and interfaces so they can be orchestrated into processes. Fundamental to the service model is the separation between the interface and the implementation, such that the invoker of a service need only (and should only) understand the interface; the implementation can evolve over time, without disturbing the clients of the service. Topics include Web architecture, HTTP, XML, SOAP, REST, and BPEL. Also, developing interfaces that connect to independent services. The course will be of interest to those interested in creating and/or aggregating Web services and developing user interfaces for the display of those services. Prerequisites: Programming experience and senior or graduate standing.

### **CS 7341 - Compiler Construction**

*Credits: 3*

Reviews programming language structures, loading, execution, and storage allocation; the compilation of simple expressions and statements; and the organization of a compiler, including compile-time and run-time symbol tables,

lexical analysis, syntax analysis, code generation, error diagnostics, and simple code optimization techniques. Also, the use of a recursive high-level language to implement a complete compiler. Prerequisites: CS 2341, CS 3342.

### **CS 7342 - Concepts of Language Theory and Their Applications**

*Credits: 3*

Introduction to formal languages and their relation to automata, and to denotational and operational semantics. Also, applications of formal semantics to the design and specification of programming languages and programming language processors, including computer architectures. Includes the predicate calculus, logic programming, and axiomatic semantics, as well as the application of axiomatic semantics to the verification of programs. Prerequisite: CS 3342 or permission of the instructor.

### **CS 7343 - Operating Systems and System Software**

*Credits: 3*

Theoretical and practical aspects of operating systems, including an overview of system software, time-sharing, and multiprogramming operating systems. Also, network operating systems and the Internet, virtual memory management, interprocess communication and synchronization, file organization, and case studies. Prerequisite: CS 2341.

### **CS 7344 - Computer Networks and Distributed Systems II**

*Credits: 3*

Introduction to network protocols, layered communication architecture, multimedia applications and protocols, QoS, congestion control, optical networks, DWDM, network survivability and provisioning, and wireless networks. Includes an interdisciplinary project requiring the use of currently available network design and simulation tools. Prerequisite: C- or better in CS 4344.

### **CS 7345 - Advanced Application Programming**

*Credits: 3*

Covers advanced programming techniques that span a range of programming languages and technologies. Topics include server-side application development, client graphical user interface implementation, application frameworks, design patterns, model-based development, and multithreading. The specific programming language or languages covered may vary from term to term. Prerequisite: CS 3345 or consent of instructor.

### **CS 7346 - Cloud Computing**

*Credits: 3*

Explores architectures for cloud computing, and provides hands-on experience with virtualization technologies. Topics include cloud computing architectures such as infrastructure as a service, platform as a service, and software as a service. Covers programming models for cloud computing, the fundamentals of virtualization technologies that enable scalability, and an introduction to the security and energy efficiency challenges of cloud computing.

### **CS 7347 - XML and the Enterprise**

*Credits: 3*

XML, the Extensible Markup Language, is widely used to define vocabularies for a wide range of applications, including software configuration, data exchange, and Web-based protocols. This course provides a detailed examination of XML as an enterprise technology. Focuses on APIs, interfaces, and standards that are driving this technology, including DTDs and XML Schema to structure XML data, XSLT to transform XML, XML protocols for distributed computing, and XML security initiatives. Students gain a broad understanding of XML and the technical issues and trade-offs among different alternatives for processing XML. Prerequisites: An understanding of object-oriented concepts and familiarity with Java and/or C++.

### **CS 7348 - Internetworking Protocols and Programming**

*Credits: 3*

Processing and interprocess communications, UNIX domain sockets, fundamentals of TCP/IP, Internet domain sockets,

packet routing and filtering and firewall, SNMP and network management, client-server model and software design, remote procedure call (XDR, RPC, DCE), design of servers and clients, networking protocols for the World Wide Web, and internetworking over new networking technologies. Prerequisites: CS 7343 and C programming.

### **CS 7349 - Data and Network Security**

*Credits: 3*

Investigates a broad selection of contemporary issues in computer security, including an assessment of state-of-the-art technology used to address security problems. Includes sources for computer security threats and appropriate reactions, basic encryption and decryption, secure encryption systems, program security, trusted operating systems, database security, network and distributed systems security, administering security, and legal and ethical issues. Prerequisites: CS 7339.

### **CS 7350 - Algorithm Engineering**

*Credits: 3*

Covers algorithm design techniques; methods for evaluating algorithm efficiency; data structure specification and implementation; and applications to fundamental computational problems in sorting and selection, graphs and networks, scheduling and combinatorial optimization, computational geometry, and arithmetic and matrix computation. Also, introduction to parallel algorithms and to computational complexity and a survey of NP-complete problems. Prerequisites: CS 2341, CS 3353 (for non-CS graduate students: CS 2341).

### **CS 7359 - Software Security**

*Credits: 3*

As software is delivered across network and Web-based environments, security is critical to successful software deployment. This course focuses on software security issues that pertain to the network application layer in the classic OSI model. At the application network layer, issues related to encryption, validation, and authentication are handled programmatically rather than at the network level. Students work with APIs for cryptography, digital signatures, and third-party certificate authorities. The course also explores issues related to XML and Web services security by examining standards and technologies for securing data and programs across collaborative networks. Prerequisite: CS 7339.

### **CS 7365 - Introduction to Numerical Analysis**

*Credits: 3*

Covers numerical solution of linear and nonlinear equations, interpolation and approximation of functions, numerical integration, floating-point arithmetic, and the numerical solution of initial value problems in ordinary differential equations. Emphasizes student use of the computer. Prerequisites: Graduate standing or grades of C- or higher in MATH 3315/CS 3365 and MATH 2343. Graduate students who have doubts about their preparedness for this course should consult the course instructor before enrolling.

### **CS 7369 - Hardware Security and Trojan Detection**

*Credits: 3*

Introduces several contemporary topics in hardware security, with a particular emphasis on hardware Trojans. Other topics include physically unclonable functions, the problem of counterfeiting, security implications of design for testability in hardware, intellectual property protection, and secure coprocessors and smart cards.

### **CS 7370 - Probability and Statistics for Scientists and Engineers**

*Credits: 3*

Introduction to fundamentals of probability, probability distributions, and statistical techniques used by engineers and physical scientists. Topics include basic concepts and rules of probability, random variables, probability distributions, expectation and variance, sampling and sampling distributions, statistical analysis techniques, statistical inference estimation and tests of hypothesis, correlation and regression, and analysis of variance. Prerequisite: Knowledge of calculus required.

### **CS 7380 - VLSI Algorithms**

*Credits: 3*

Introduces problems, algorithms, and optimization techniques used in the design of high-performance VLSI design. Emphasis on algorithms for partitioning, placement, floor planning, wire routing, and layout compaction. Prerequisites: C- or better in CS 3353, CS 3381.

### **CS 7381 - Computer Architecture**

*Credits: 3*

Introduces the state of the art in uniprocessor computer architecture, with a focus on the quantitative analysis and cost-performance trade-offs in instruction set, pipeline, and memory design. Topics include quantitative analysis of performance and hardware costs, instruction set design, pipeline, delayed branch, memory organization, and advanced instruction-level parallelism. Prerequisite: C- or better in CS 4381.

### **CS 7382 - Computer Graphics**

*Credits: 3*

Hardware and software components of computer graphics systems: display files, 2-D and 3-D transformations, clipping and windowing, perspective, hidden-line elimination and shaping, interactive graphics, and applications. Prerequisite: C- or better in CS 3353.

### **CS 7385 - Microcontroller Architecture and Interfacing**

*Credits: 3*

Emphasizes the design of embedded systems using microcontrollers. Briefly reviews microcontroller architecture. Includes hierarchical memory systems and interfacing of memory and peripherals, industry standard bus interfaces and other applicable standards, and topics in real-time operating systems and system-level design considerations. The corequisite laboratory requires students to develop software using assembler and high-level languages. Prerequisite: CS 3381 or ECE 3181, ECE 3381.

### **CS 7387 - Digital Systems Design**

*Credits: 3*

Modern topics in digital systems design, including the use of HDLs for circuit specification and automated synthesis tools for realization. Programmable logic devices are emphasized and used throughout the course. The course has heavy laboratory assignment content and a design project. Prerequisite: C- or better in CS 3381.

### **CS 7390 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7391 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7392 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7393 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7394 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in computer science. Prerequisite: Permission of instructor.

### **CS 7396 - Master's Thesis**

*Credits: 3*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **CS 7696 - Master's Thesis**

*Credits: 6*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **CS 8049 - Ph.D. Full-Time Status**

*Credits: 0*

Full-time status for students in the Ph.D. program.

### **CS 8091 - Special Topics**

*Credits: 0*

### **CS 8092 - Special Topics**

*Credits: 0*

### **CS 8095 - Independent Study**

*Credits: 0*

### **CS 8096 - Dissertation**

*Credits: 0*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms. For example, CS 8396 and CS 8996 (12 credit hours total) would be allowed during a fall term.

### **CS 8098 - Computer Science Seminars**

*Credits: 0*

Seminars and colloquia in various specialized and general topics in computer science, given by the resident faculty and invited guests.

### **CS 8190 - Special Topics**

*Credits: 1*

Special and intensive study of selective topics in computer science aimed at encouraging students to follow recent developments through regular critical reading of the literature.

### **CS 8191 - Special Topics**

*Credits: 1*

Individual or group study of selected advanced topics in computer science. Prerequisite: Permission of instructor.

### **CS 8192 - Special Topics**

*Credits: 1*

Individual or group study of selected advanced topics in computer science. Prerequisite: Permission of instructor.

### **CS 8193 - Special Topics**

*Credits: 1*

Special and intensive study of selective topics in computer science aimed at encouraging students to follow recent developments through regular critical reading of the literature.

### **CS 8194 - Selected Problems**

*Credits: 1*

Independent investigation of topics in computer science approved by the department chair and the major professor. Prerequisite: 12 credit hours, graduate level.

### **CS 8195 - Selected Problems**

*Credits: 1*

Independent investigation of topics in computer science approved by the department chair and by the major professor. Prerequisite: 12 credit hours, graduate level.

### **CS 8196 - Dissertation**

*Credits: 1*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms. For example, CS 8396 and CS 8996 (12 credit hours total) would be allowed during a fall term.

### **CS 8290 - Special Topics**

*Credits: 2*

### **CS 8291 - Special Topics**

*Credits: 2*

Individual or group study of selected advanced topics in computer science. Prerequisite: Permission of instructor.

### **CS 8292 - Graduate Seminar**

*Credits: 2*

Individual or group study of selected advanced topics in computer science. Prerequisite: Permission of instructor.

### **CS 8293 - Special Topics**

*Credits: 2*

Special and intensive study of selective topics in computer science aimed at encouraging students to follow recent developments through regular critical reading of the literature.

### **CS 8294 - Selected Problems**

*Credits: 2*

Independent investigation of topics in computer science approved by the department chair and by the major professor. Prerequisite: 12 credit hours, graduate level.

### **CS 8295 - Selected Problems**

*Credits: 2*

Independent investigation of topics in computer science approved by the department chair and by the major professor. Prerequisite: 12 credit hours, graduate level.

## **CS 8296 - Dissertation**

*Credits: 2*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms. For example, CS 8396 and CS 8996 (12 credit hours total) would be allowed during a fall term.

## **CS 8312 - Software Generation and Maintenance**

*Credits: 3*

Examines techniques for generating software and maintaining revisions to existing software. Topics include alternatives to coding, the use of program generators and very high-level languages, CASE tools, component reuse, and the role of standards in the generation of software. Also, issues related to maintenance as a part of software evolution, the impact of the design process on long-term software maintainability, software re-engineering, and the planning of release cycles.

## **CS 8313 - Object-Oriented Analysis and Design**

*Credits: 3*

Object-oriented analysis and design is essential in developing high-quality object-oriented systems. Provides an overview of object-oriented analysis and design by integrating the work of Booch, Rumbaugh, Jacobson, and Wirfs-Brock. Topics include use-case analysis, responsibility-driven design, object modeling, entity-relationship modeling, and the design notation of the Unified Modeling Language. Also, object-oriented class libraries, object-oriented databases, and the Common Object Request Broker Architecture.

## **CS 8314 - Software Metrics and Quality Engineering**

*Credits: 3*

Addresses techniques of software quality engineering, with emphasis on the role of metrics. Draws from practical experience and uses many examples from industry. Includes the psychological and behavioral aspects of quality and quality assurance. Metrics and quality are presented in relationship to the software process and software process maturity models. Selection of quality metrics is addressed in terms of the goal-question-metric paradigm as well as various quality models. Also, methods of storing data for historical purposes, analyzing data, and presenting data to others.

## **CS 8315 - Software Acquisition, Legal, and Economic Issues**

*Credits: 3*

Examines issues relating to software procurement, contract law, and specification and control of product processes. Topics include factors that affect cost, cost estimation, cost-benefit analysis, risk analysis, and legal implications with respect to ownership and use. Covers techniques and models of cost estimation in detail.

## **CS 8316 - User Interface Design**

*Credits: 3*

Design methodologies for user interfaces. Includes life cycles for UI development, human factors issues, prototyping, user analysis and evaluation, and design techniques. Students perform the analysis, design, and evaluation of a UI through two iterations.

## **CS 8317 - Software Reliability and Safety**

*Credits: 3*

In-depth study of techniques for ensuring software reliability and safety. Topics include software reliability engineering, software safety engineering, and recent developments in those areas. Reliability concepts applied to the software domain and safety concepts applied to computer-intensive systems will be discussed. Specific techniques such as software reliability models and analysis methods, operational profiles, safety and hazard analysis using fault trees and event trees, and formal verification for safety-critical software systems will be covered.

## **CS 8320 - Knowledge-Intensive Problem-Solving**

*Credits: 3*

Focuses on higher-level artificial intelligence techniques for problem-solving guided by domain-specific knowledge. Topics include the use of planning systems, heuristic rule-based systems, model-based systems, learning networks, and semantic technologies. Prerequisite: CS 7320.

## **CS 8321 - Machine Learning and Neural Networks**

*Credits: 3*

Introduction to the principles and motivation behind forms of machine learning with emphasis on neural networks. Survey of important topics and current areas of research, including the use of deep learning for training massive networks. Prerequisite: CS 7320 or CS 7331, or permission of instructor.

## **CS 8322 - Natural Language Processing and Internet Applications**

*Credits: 3*

This course covers state-of-the-art methods for natural language processing. After an introduction to the basics of syntax, semantic, and discourse analysis, the focus shifts to the integration of these modules into complex natural-language processing systems. In addition to natural language understanding, the course presents advanced material on lexical knowledge acquisition, natural language generation, machine translation, and parallel processing of natural language. Prerequisite: CS 7320.

## **CS 8325 - Logic Programming**

*Credits: 3*

Explores logic-based computing and logic programming. Introduces fundamentals of logic programming and covers basic techniques for solving problems in Prolog, including nondeterministic programming, incomplete data structures, definite clause grammars, and meta interpreters. Examines implementation of a logic programming system as a generalization of both traditional programming language systems and traditional databases. Prerequisites: CS 2341, CS 3342.

## **CS 8330 - Database Management Systems**

*Credits: 3*

An extensive investigation of distributed databases and implementation issues. Included are design, data replication, concurrency control, and recovery. Implementation project included. Prerequisite: CS 7330.

## **CS 8331 - Advanced Data Mining**

*Credits: 3*

Provides a review of several data mining topics and an in-depth technical discussion of advanced data mining techniques. In addition, research methods applied in the field will be studied. Prerequisite: CS 7331.

## **CS 8337 - Information Storage and Retrieval**

*Credits: 3*

Examination of techniques used to store and retrieve unformatted/textual data. Examination of current research topics of data mining, data warehousing, digital libraries, hypertext, and multimedia data. Prerequisite: CS 7330.

## **CS 8340 - Advanced Topics in Software Engineering**

*Credits: 3*

In-depth study of specific topics in software engineering techniques, methodologies, and issues. Topics will change from term to term and will include advanced software reliability models, software development process models, advanced object-oriented design, and cleanroom software engineering.

## **CS 8343 - Advanced Operating Systems**

*Credits: 3*

Theoretical and practical aspects of operating system design, implementation, system organization, and resource management. The emphasis is on distributed operating systems and advanced research issues. Prerequisite: CS 7343.

## **CS 8344 - Computer Networks**

*Credits: 3*

Fundamentals of computer communications networks. Introduction to computer networking elements, communications architectures and protocols. Case studies. Design and analysis of computer networks: topology, LAN/MAN technology network interface, LAN/MAN performance internetworking, and network management. Prerequisite: CS 7344.

## **CS 8345 - Software Centric Telecom Networks**

*Credits: 3*

Focuses on the software architecture and technologies needed to design, deploy, and operate a software-centric telecom network. Such networks are architected through network function virtualization and software defined networking to achieve high availability, network and data automation, and security. The course has several hands-on projects and all students actively take part in in-class demonstrations and presentations. There are guest lectures on current topics by industry experts. Prerequisites by topic: Computer networks, cloud computing, strong programming background, consent of the instructor.

## **CS 8349 - Advanced Network and System Security**

*Credits: 3*

In-depth analysis of secure networks and systems, security audit, intrusion detection and prevention, storage security, firewall configurations, security log analysis, DMZs, honeypots, malicious codes, and mobile and grid computing security. Prerequisite: CS 7349.

## **CS 8350 - Algorithms II**

*Credits: 3*

Analysis of dynamic data structures, lower bound theory, problem equivalence and reducibility, complexity theory, probabilistic algorithms, machine models of sequential and parallel computation, parallel algorithms. Prerequisite: CS 7350.

## **CS 8351 - Computer Arithmetic**

*Credits: 3*

Number representation and algorithms for arithmetic unit design; redundant radix representation; highly parallel add, multiply, divide, and square root algorithms; IEEE floating-point standard; directed roundings; base conversion; VLSI floating-point units; vector and matrix arithmetic; residue arithmetic; rational arithmetic; and online arithmetic. Prerequisite: Knowledge of computer organization, data structures, and algorithms, as taught in CS 2341.

## **CS 8352 - Cryptography and Data Security**

*Credits: 3*

Cryptography is the study of mathematical systems for solving two kinds of security problems on public channels: privacy and authentication. Covers the theory and practice of both classical and modern cryptographic systems. The fundamental issues involved in the analysis and design of a modern cryptographic system will be identified or studied. Prerequisite: ECE/STAT/CS 4340 or equivalent.

## **CS 8353 - Digital Forensics**

*Credits: 3*

Collection and analysis of evidence from electronic storage media or active systems. Methods to preserve, document, and present evidence in a court of law.

## **CS 8355 - Graph Theory: Algorithms and Applications**

*Credits: 3*

Development of algorithmic and computational aspects of graph theory, with application of concepts and techniques to solving problems of: connectivity, set covering, scheduling, shortest paths, traveling salesmen, network flow, matching, and assignment. Prerequisite: CS 7350 or permission of instructor.

## **CS 8356 - Border and Transportation Security**

*Credits: 3*

Legal, political, and economic challenges of border and transportation security. Specific technologies include power solutions, wireless communications, sensor networks, sensing devices, screening devices, image acquisition, and image processing.

## **CS 8359 - Advanced Software Security**

*Credits: 3*

Advanced software security architectural patterns, software reverse engineering, and malware analysis. Advanced software exploitation techniques including shell coding, return-oriented programming, ASLR, and DEP bypassing. Advanced Web application security and secure coding principles/practices. Security testing techniques, fuzzing, operating system security, and root kits. Prerequisite: CS 5359, or CS 7359, or equivalent.

## **CS 8375 - Coding Theory and Applications**

*Credits: 3*

Information theory concepts: measure of information, mutual information, entropy. Algebra: groups, rings, finite fields, algebra of polynomials. Algebraic codes: linear codes, cyclic codes, BCH codes. Fire codes: encoding/decoding logic. Arithmetic codes: AN codes, separate adder and checker. Applications to computer systems. Prerequisites: Elementary probability concepts and digital logic circuits.

## **CS 8377 - Fault-Tolerant Computing**

*Credits: 3*

Faults, errors and failures, hardware fault tolerance, reliability, availability, reliable distributed systems, checkpointing and recovery, atomic actions data and process resiliency, software fault tolerance, and case studies. Prerequisite: Permission of the instructor.

## **CS 8380 - Parallel and Distributed Processing**

*Credits: 3*

Parallel and distributed processing is a fast-growing technology that permeates many aspects of computer science and engineering. This course emphasizes the strong interaction between parallel and distributed algorithms, architectures, and software. Topics include parallelism analysis in numeric and non-numeric algorithms, array processors, associative processors, multiprocessors, marker-propagation networks, distributed operating systems, networks of workstations, Internet computing, and case studies. Prerequisites: Computer architecture and a high-level programming language.

## **CS 8381 - Quantum Logic and Computing**

*Credits: 3*

Survey of quantum logic and quantum computing from the viewpoint of a computer engineer or computer scientist. Focuses on issues in reversible computation, quantum information modeling, quantum logic circuit design, models of quantum computation, and quantum computer algorithms. Also surveys existing and emerging circuit models used to implement quantum logic circuits. Introduces principles of quantum mechanics as related to quantum computation. Prerequisite: CS 7381 or CS 7385, or ECE 7381 or ECE 7385, or consent of instructor.

## **CS 8383 - Advanced Computer Architecture**

*Credits: 3*

Advanced topics in computer architecture and parallel processing. Prerequisite: CS 7381.

### **CS 8386 - Testing of VLSI Circuits**

*Credits: 3*

The objective of testing is to verify that the manufactured custom chips function correctly according to their specifications. Testing process includes fault modeling, mainly automated simulation, test pattern generation, and testable and self-testing design synthesizing. Structured chips such as memories, PLAs, and FPGAs are also tested for correctness. The course surveys the state-of-the-art test approaches used in industry and in other research environments. Prerequisite: Digital logic design, data structures, and algorithms.

### **CS 8387 - Switching Theory and Applications in VLSI CAD**

*Credits: 3*

Advanced topics in switching theory and electronic design automation methods. Emphasizes the underlying theory and algorithms of EDA tools and their application. Particular emphasis on the representation and properties of discrete mathematics and synthesis, verification, and simulation problems. Includes binary and multiple-valued logic models that are targeted to conventional and emerging technologies, as well as optimization techniques for cost, performance, low power, and other constraints. Recommended: Experience in the use of HDLs and algorithm development and implementation.

### **CS 8388 - Embedded Computing System Design**

*Credits: 3*

Embedded systems are generally part of complex systems. An embedded system carries out the computational subtasks of the main system. The computing systems within home appliances and automobiles are examples of such systems. This course will cover the process of embedded computing system design under, mainly, cost, power, performance and several system-specific restrictions.

### **CS 8389 - Foundations of Formal Verification and Validation**

*Credits: 3*

Detecting and correcting integrated circuit design errors before device fabrication is an increasingly complex and costly problem. This course surveys common approaches for formal methods used in industry and in other research environments. Emphasizes trade-offs between formal methods and validation techniques and the use of commercial state-of-the-art software tools. Includes equivalence checking, model checking, theorem proving, and advanced topics in validation and simulation. Introduces the application of formal methods in other areas. Prerequisite: Knowledge of programming languages, data structures, advanced digital logic design, and computer architecture, or consent of instructor.

### **CS 8390 - Special Topics**

*Credits: 3*

Special and intensive study of selective topics in computer science aimed at encouraging students to follow recent developments through regular critical reading of the literature.

### **CS 8391 - Special Topics**

*Credits: 3*

Individual or group study of selected advanced topics in computer science. Prerequisite: Permission of instructor.

### **CS 8392 - Special Topics**

*Credits: 3*

Individual or group study of selected advanced topics in computer science. Prerequisite: Permission of the instructor.

### **CS 8393 - Special Topics**

*Credits: 3*

Special and intensive study of selective topics in computer science aimed at encouraging students to follow recent developments through regular critical reading of the literature.

### **CS 8394 - Selected Problems**

*Credits: 3*

Independent investigation of topics in computer science approved by the department chair and by the major professor.  
Prerequisite: 12 credit hours, graduate level.

### **CS 8395 - Selected Problems**

*Credits: 3*

Independent investigation of topics in computer science approved by the department chair and by the major professor.  
Prerequisite: 12 credit hours, graduate level.

### **CS 8396 - Dissertation**

*Credits: 3*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms. For example, CS 8396 and CS 8996 (12 credit hours total) would be allowed during a fall term.

### **CS 8490 - Special Topics**

*Credits: 4*

Special and intensive study of selective topics in computer science aimed at encouraging students to follow recent developments through regular critical reading of the literature.

### **CS 8491 - Special Topics**

*Credits: 4*

### **CS 8492 - Special Topics**

*Credits: 4*

### **CS 8493 - Special Topics**

*Credits: 4*

Special and intensive study of selective topics in computer science aimed at encouraging students to follow recent developments through regular critical reading of the literature.

### **CS 8494 - Selected Problems**

*Credits: 4*

Independent investigation of topics in computer science approved by the department chair and by the major professor.  
Prerequisite: 12 credit hours, graduate level.

### **CS 8495 - Selected Problems**

*Credits: 4*

Independent investigation of topics in computer science approved by the department chair and by the major professor.  
Prerequisite: 12 credit hours, graduate level.

### **CS 8496 - Dissertation**

*Credits: 4*

### **CS 8596 - Dissertation**

*Credits: 5*

### **CS 8693 - Special Topics**

*Credits: 6*

Special and intensive study of selective topics in computer science or computer engineering aimed at encouraging students to follow recent developments through regular critical reading of the literature.

### **CS 8694 - Selected Problems**

*Credits: 6*

Independent investigation of topics in computer science or computer engineering approved by the department chair and by the major professor. Prerequisite: 12 credit hours, graduate level.

### **CS 8695 - Selected Problems**

*Credits: 6*

Independent investigation of topics in computer science or computer engineering approved by the department chair and by the major professor. Prerequisite: 12 credit hours, graduate level.

### **CS 8696 - Dissertation**

*Credits: 6*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms. For example, CS 8396 and CS 8996 (12 credit hours total) would be allowed during a fall term.

### **CS 8996 - Dissertation**

*Credits: 9*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms. For example, CS 8396 and CS 8996 (12 credit hours total) would be allowed during a fall term.

# Data Science

## Data Science, M.S.

[www.datascience.smu.edu](http://www.datascience.smu.edu)

The M.S.D.S. degree is an interdisciplinary program that combines courses taught by professors from SMU's Dedman College, Lyle School of Engineering and Meadows School of the Arts. The program is delivered online to provide access to working professionals and students located around the world.

The program gives students who are prospective data scientists an enriched background in computer science, statistics, strategic behavior and data visualization. Course instruction includes oral and written communication skills and the basics of database structure, including building, maintaining and securing databases. Graduates will be able to form relevant questions, collect and analyze appropriate data, and make informed decisions regarding the question of interest.

Refer to the Data Science section of the catalog (p. 1252) for admission requirements, courses, degree requirements, academic regulations and the calendar.

## Data Science Courses

### DS 6110 - Immersion

*Credits: 1.5*

A three (plus) day immersion experience on SMU's Dallas campus. Students collaborate on group projects, attend information and networking sessions, and meet program faculty and leadership. Required for M.S. in data science students. \*International students, military personnel on deployment, and those with disabilities who cannot attend may have other arrangements made for the on-campus requirement of this course. Permission for non-attendance in-person MUST be approved prior to enrollment.

### DS 6120 - Capstone A

*Credits: 1*

Students spend the first of two consecutive full terms working on a collaborative group project. During the first of the two terms, students begin their work on the project and are expected to complete at least half the project by the end of the term. Students develop and work on their projects under faculty supervision. Prerequisites: DS 7331 and department consent.

### DS 6130 - Capstone B

*Credits: 1*

Students spend the second of two consecutive full terms working on their collaborative group project from Capstone A. Students are then required to present their completed projects during the on-campus immersion, typically held near week 11 of the term. Prerequisite: DS 6120. \*International students, military personnel on deployment, and those with disabilities who cannot attend may have other arrangements made for the on-campus requirement of this course. Permission for non-attendance in-person MUST be approved prior to enrollment.

### DS 6306 - Doing Data Science

*Credits: 3*

An introduction to methods, concepts, and current practice in the growing field of data science, including statistical inference, algorithms, financial modeling, data visualization, social networks, and data engineering.

## **DS 6370 - Statistical Sampling**

*Credits: 3*

Covers principles of planning and conducting surveys: simple random sampling; stratified and systematic subsampling; means, variances, and confidence limits; finite population correction; sampling from binomial populations; and margin of error and sample-size determination. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6372.

## **DS 6371 - Statistical Foundations for Data Science**

*Credits: 3*

Noncalculus development of fundamental statistical techniques, including hypothesis testing for population means and proportions, analysis of variance, factorial designs, and linear regression. Covers obtaining sample sizes during the planning stages of research studies and emphasizes interpretation of results from analysis with SAS statistical software. Reserved for students in the M.S.D.S. program.

## **DS 6372 - Applied Statistics: Inference and Modeling**

*Credits: 3*

Extension of techniques taught in DS 6371 to multivariate data, including multiple linear regression, multivariate analysis of variance, canonical regression, and principal components analysis. Emphasizes interpretation of results from analysis with SAS. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6371.

## **DS 6373 - Time Series**

*Credits: 3*

Explores serially correlated observations recorded over time and the theory and methods to appropriately model such data using several parametric and non-parametric models to both estimate population parameters and forecast future values. Students learn how to apply autoregressive, moving average, ARMA, and ARIMA models through lectures, light-board sessions, coding in R, real life data sets, and interviews with currently practicing industry professionals. Students practice working with the statistical package R in estimating and visualizing these models through the use of numerous real-world datasets. Stationary and non-stationary time series with many covariates are addressed. Students also estimate the spectral density to estimate frequencies in the data. Concludes with a look at a neural network application to time series data and compares the performance of these models with the parametric models mentioned above. Prerequisite: DS 6372.

## **DS 6390 - Visualization of Information**

*Credits: 3*

Introduces data visualization and creative coding utilizing the Processing programming language. Explores visual and information design principles, primarily through hands-on programming exercises. Includes assignments and exams that incorporate 2-D and 3-D computer graphics, interactivity, and data input. Covers procedural and object-oriented programming approaches to data visualization and provides an overview of leading-edge data visualization libraries and application program interfaces, including Web-based approaches. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6306.

## **DS 6391 - Visualization of Information and Creative Coding II**

*Credits: 3*

Extends the study of creative coding and visualization across numerous languages, specialized libraries/APIs, and distribution platforms. Students build data-driven visualizations in Java, C++, and JavaScript, including the P5.js, three.js, and d3.js libraries. Prerequisite: DS 6390.

## **DS 7330 - File Organization and Database Management**

*Credits: 3*

A survey of current database approaches and systems, and the principles of design and use of these systems. Covers query language design and implementation constraints, and applications of large databases. Includes a survey of file

structures and access techniques. Also, the use of a relational database management system to implement a database design project. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6306.

### **DS 7331 - Machine Learning I**

*Credits: 3*

Introduces data mining topics, with an emphasis on understanding concepts through an applied, hands-on approach. Includes other related topics such as data warehousing and dimensional modeling. All material covered is reinforced through hands-on implementation exercises. Prerequisites: DS 6110, DS 6372, and DS 7330; or instructor permission.

### **DS 7333 - Quantifying the World**

*Credits: 3*

In the global information age, data can be leveraged to rapidly answer previously unanswerable questions. Students explore how to make sense of the large amounts of data frequently available, from hypothesis formation and data collection to methods of analysis and visualization. Includes ways to set up Internet-level measurements and formulate testable hypotheses; ways to automatically gather, store, and query large datasets; and ways to apply statistical methods (descriptive and predictive) and information visualization to collected datasets. Students learn to use Python and R programming languages to carry out data collection, analysis, and visualization. Culminates in a final project using real data of the students' choosing. Reserved for students in the M.S.D.S. program. Prerequisite: DS 7331.

### **DS 7335 - Machine Learning II**

*Credits: 3*

An elective, theoretical course in Machine Learning providing an overview of multivariate nonlinear nonparametric regression, supervised classification, unsupervised classification, and deep learning. Begins with a portfolio of case studies to give an overview of the type of things that can be done with machine learning. Each area of machine learning is introduced with a description of how to test its performance. This is followed by hands on exercises. Learning through doing is the key goal of this class. Prerequisite: DS 7331.

### **DS 7337 - Natural Language Processing**

*Credits: 3*

Introduces natural language processing (NLP) as applied to data mining, text mining, and machine learning tasks with unstructured Big Data. Students receive a broad survey of the major tasks in natural language understanding with some coverage of natural language generation. Topics include document clustering and classification, automated tagging and highlighting, semantic search, and text normalization to support machine learning applications. Focuses on best practices for choosing the right tool and method for an application, illustrated with real-world case studies. Students gain experience building solutions from real-world data sets, utilizing WordNet and the data of some leading websites. Learn text classification, clustering, tagging, and synopsising; taxonomy alignment; corpus analytics; and semantic query analysis. Apply WordNet, Python, R, SVM, and LSA. Prerequisite: DS 7331.

### **DS 7346 - Cloud Computing**

*Credits: 3*

Introduces students to exponentially growing Cloud Computing technologies with an emphasis on the fundamental Cloud topics such as Virtualization, IaaS, PaaS, and DevOps. Includes a high-level overview of NoSQL. Covers big data topics such as Hadoop, MapReduce, Pig, Hive, and Spark. Intended to be hands-on with students working with current technologies that make Cloud possible. Prerequisite: DS 6306 and DS 7331, or department permission.

### **DS 7349 - Data and Network Security**

*Credits: 3*

Covers conventional and state-of-the-art methods for achieving data and network security. Private key and public key encryption approaches are discussed in detail, with coverage of popular algorithms such as DES, Blowfish, and RSA. In the network security area, the course covers authentication protocols, IP security, Web security, and system-level security. Reserved for students in the M.S.D.S. program. Prerequisite: DS 6306.

## **DS 7374 - Business Analytics**

*Credits: 3*

Through a combination of lectures and case analyses, students learn how to practically implement and apply a proven, best practice methodology which illustrates how best to integrate analytics into corporate strategy. In addition, students gain experience in enabling businesses to solve real-world problems, some of which were previously intractable, using the models, methods, and techniques they have studied previously. Moreover, students extend their data science capabilities to handle challenges requiring prescriptive analytics through a brief yet thorough two-week introduction to optimization. Students gain the experience and expertise described above through a balanced combination of lectures and interviews with several practicing and senior level data scientists from a variety of industries. Prerequisite: DS 6372.

# Datacenter Systems Engineering

**Professor M. Volkan Otugen, Program Director**

**Professor:** Sukumaran V.S. Nair

**Assistant Professor:** Mohammad Khodayar

**Adjunct Professors:** Bhanu Kapoor, Nomaan Mufti, Nagarajan Sridhar, Rumanda Young

## Datacenter Systems Engineering, M.S.

The purpose of the curriculum is to impart the necessary breadth and depth of knowledge of datacenter cloud infrastructure engineering needed by professionals preparing to fully participate in leadership roles as either managers or technologists.

Qualified students with undergraduate degrees in engineering, computer science or one of the physical sciences or mathematics are required to complete 30 credit hours (typically 10 courses). Students entering the program with an undergraduate degree other than in engineering or one of the physical sciences or mathematics may be asked to articulate the necessary courses.

Students are required to complete the five core courses and three Group I electives (or 9 credit hours) from one or more of the four optional specializations: facilities/infrastructure; data engineering and analytics; networks, virtualization and security; and business specialization.

The two additional Group II electives may be selected with adviser approval from the offerings of the Lyle School of Engineering, Cox School of Business and Dedman College (Physics, Chemistry, Mathematics or Statistics departments). The student is responsible for ensuring that the prerequisites for the elective courses have been met.

The core courses, encompassing the activities of the data center, reflect the breadth of the technology as it is conducted in the industry. The Group I course concentrations serve to develop or extend competence in one or more of the technical fields of interest to the student. The Group II electives enable the student to build interests broadly by selecting courses under the guidance of the academic adviser from the Lyle School of Engineering or the University as a whole.

## Admission Requirements

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy the following requirements:

1. B.S. in one of the engineering disciplines, computer science, one of the quantitative sciences or mathematics.
2. A minimum of two years of college-level mathematics, including one year of college-level calculus.

## Degree Requirements

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following requirements:

1. A total of 30 credit hours with a GPA of at least 3.000.
2. Satisfactory completion of the core curriculum encompassing 15 credit hours (five required courses).
3. Satisfactory completion of nine credit hours from Group I electives.
4. Satisfactory completion of six credit hours from Group II electives.

## Core Courses

- CS 7346 - Cloud Computing
- CS 7349 - Data and Network Security
- ECE 7301 - Power Management for Industrial and Mission-Critical Facilities
- EMIS 7357 - Analytics for Decision Support
  
- CEE 7380 - Management of Industrial and Mission-Critical Facilities

or

- ME 7380 - Management of Industrial and Mission-Critical Facilities

## **Group I Electives**

### **Facilities Infrastructure Management**

- CEE 7325 - Disaster Management
- CEE 7370 - Quality Management in Construction
- CEE 7366 - Introduction to Facilities Engineering Systems
- CEE 7369 - Electrical, Mechanical, and Piping Systems for Buildings
- CEE 7384 - Energy Management for Buildings
- EETS 7307 - Telecommunications for Data Systems Engineering
- EMIS 8363 - Engineering Finance
- ME 7330 - Heat Transfer
- ME 7336 - Intermediate Fluid Dynamics
- ME 7383/CEE 7383 - Heating, Ventilating, and Air Conditioning
- CEE 7381/ME 7381 - Site Selection for Industrial and Mission-Critical Facilities

### **Data Engineering and Analytics**

- CS 7330 - File Organization and Database Management
- CS 7340 - Service-Oriented Computing
- CS 7347 - XML and the Enterprise
- CS 8316 - User Interface Design
- CS 8321 - Machine Learning and Neural Networks
- EMIS 7352 - Information Systems Architecture
- EMIS 7353 - Information System Design Strategies
- EMIS 8331/CS 8331 - Advanced Data Mining
- EMIS 8337/CS 8337 - Information Storage and Retrieval

### **Networks, Virtualization and Security**

- EMIS 7382 - Information Technology Security and Risk Management
- EMIS 8364 - Engineering Management
- EMIS 8356 - Global Perspectives for Information Engineering
- CS 7339 - Computer System Security
- CS 7344 - Computer Networks and Distributed Systems II
- CS 7359 - Software Security (Virtualization)
- CS 8343 - Advanced Operating Systems
- CS 8349 - Advanced Network and System Security
- CS 8352/ECE 8372 - Cryptography and Data Security
- EETS 7304 - Network Protocols

### **Business Specialization**

- EMIS 8362 - Engineering Accounting
- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis
- RE 6211 - Real Estate Investment

## **Group II Electives**

With adviser guidance and approval, students may select two courses (or six credit hours) from graduate-level courses offered by the Lyle School of Engineering, Cox School of Business and Dedman College (departments of Physics, Chemistry, Mathematics or Statistics).

# Design and Innovation

**Clinical Assistant Professor** Jessica Burnham, **Program Director**

**Clinical Assistant Professor** Jessica Burnham

**Adjunct Lecturer:** Justin Childress, Richard Crum, Christina Donaldson, Michael Frieble, Suzanne Larkin

## Design and Innovation, M.A.

This project-based program focuses on skills and processes of creative thinking and problem-solving in a multidisciplinary setting. The degree is grounded in the methodologies of human-centered design, including design research, solution frameworks, idea generation and rapid prototyping. The program involves coursework in theories of design, 2D and 3D tools, innovation processes, and project-based design studios focused on real-world design challenges. Additionally, the degree requires coursework in electives outside of Lyle to build cross-disciplinary experiences and knowledge. This degree is for students seeking to become more versatile thinkers regardless of their disciplinary background. The skills and modes of thought acquired through this degree are particularly applicable to future careers in design, engineering, advertising, education, business, and the social sciences.

## Admission Requirements

In addition to meeting the Lyle School of Engineering degree requirements, candidates are required to hold a bachelor's degree from an institution of standard collegiate rank recognized by the accrediting agencies in whose jurisdiction the college is located or to be in the final year of an accredited bachelor's degree program.

## Degree Requirements

In addition to meeting the Lyle School of Engineering degree requirements, candidates must meet the following requirement: satisfactory completion of the following courses with an overall graduate GPA of at least 3.000. Only a few of the advanced elective courses have prerequisites, ensuring that students are able to fulfill program requirements on a reasonable timeline. Students wishing to choose any of the electives below will need to have met all course requirements and prerequisites. Enrollment in open electives will be at the discretion of the academic department where the course is offered and the course instructor. Open electives are designed to allow students to gain specialized skills in the field that they may go on to practice or to pursue a personal passion or interest that will complement their future work.

## Core Courses

- DSIN 7301 - The Context and Impact of Design
- DSIN 7302 - Form and Composition
- DSIN 7303 - Human-Centered Design
- DSIN 7501 - Design and Innovation Studio I
- DSIN 7502 - Design and Innovation Studio II

Total: 19 Credit Hours

## Suggested Elective Courses

Four (4) electives must be completed with a satisfactory grade in order to fulfill the Masters of Design and Innovation degree. The following is a list of highly recommended courses, but students are allowed to take courses from across the University to complete the degree. Some courses will require approval for enrollment. It is the student's responsibility to obtain this approval in conjunction with approval from their program advisor. All electives need to be taken at the 6000 level or higher.

Two from the following:

- ADV 6317 - Consumer Insight and Persuasion
- AMAE 6375 - Social Entrepreneurship: Creating a Movement and Innovating Through Social Good
- ANTH 6305 - Applied Anthropology
- ANTH 6384 - Global Issues and Development: An Overview
- ARHS 6356 - Modern Architecture
- 6000-level ARHS course(s) approved by program administrators and the Meadows Art History Department
- CEE 8325 - The Sustainable Urban Plan
- CEE 7330 - Design for Sustainable Buildings and Infrastructure
- CEE 7306 - Sustainable Urban Development and Design
  
- CISB 6222 - Starting a Business (both in the same term, for 4 credit hours)
- CISB 6223 - Early-Stage Valuation and Fund (both in the same term, for 4 credit hours)
  
- CS 8316 - User Interface Design
- DSIN 7390 - Special Topics (Designing the Visual Environment)
- DSIN 7390 - Special Topics (Interactive Product Design)
- DSIN 7391 - Special Topics (Design Research Strategies)
- EMIS 7301 - Systems Engineering Process
- ENGR 7190 - Special Topics (Sketching for Visual Communication)
- ENGR 7390 - Special Topics (Systems Engineering Process)
- ME 7369 - Innovation Management
- ME 7392 - Selected Topics (Special Projects, Rapid Product Realization)

Total: 6-8 Credit Hours

### Free Elective Courses

- Two courses from graduate programs on campus, approved by the student's adviser.

Total: 6 Credit Hours

Total: 30-33 Credit Hours

## Design and Innovation Courses

### DSIN 7301 - The Context and Impact of Design

*Credits: 3*

Focuses on a series of broad cultural topics through a design lens. Includes discussion and exploration of design topics that cut across eras, mediums, and scales. Emphasizes the idea of the intentionality of a design, as situated in its original context, as well as a design's continuing relevance to modern life.

### DSIN 7302 - Form and Composition

*Credits: 3*

Introduces 2-D and 3-D design through assignments focused on the process of creating design work and receiving criticism. Includes overall design principles, 2-D graphic design, 3-D form making, and a culminating final assignment to utilize a full repertoire of design skills. Concentrates on design production with brief training on various digital and

analog tools. Students do not need to have a design production background to complete the assigned projects. MADI majors only.

### **DSIN 7303 - Human-Centered Design**

*Credits: 3*

A fast-paced, project-based examination of human-centered design, which is a well-established process and set of methods aimed at devising solutions based on people's needs. Explores HCD's foundation in design research that emphasizes primary, contextual research such as interviews, observations, and adapted ethnographic methods, with a focus on empathy for the user and rapid prototyping to quickly express possible solutions. MADI majors only.

### **DSIN 7304 - Building Creative Confidence**

*Credits: 3*

Focuses on traditional and nontraditional strategies, tools, and mind-shifts required for creativity. Students develop tactical skills to generate, express, and develop their ideas. Investigates the essential components of successful innovation and ways to overcome cultural and personal blocks against creativity. Work is individually produced.

### **DSIN 7390 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in engineering. Prerequisite: Permission of instructor.

### **DSIN 7391 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in engineering. Prerequisite: Permission of instructor.

### **DSIN 7392 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in engineering. Prerequisite: Permission of instructor.

### **DSIN 7393 - Special Topics**

*Credits: 3*

Individual or group study of selected topics in engineering. Prerequisite: Permission of instructor.

### **DSIN 7501 - Design and Innovation Studio I**

*Credits: 5*

Students use problem-solving techniques, individually and collectively, to achieve an appropriate design solution in an unscripted and dynamic situation much like a real-life employment scenario. Projects are determined each term dependent on potential partnerships, available resources, and current municipal issues or topical events in the DFW area. Includes practical application of human-centered design processes and skills, as well as problem definition, design research, team collaboration, rapid prototyping and testing, storytelling, and presentation. Cotaught by a design faculty member and industry expert. Culminates with a public critique of the students' work by faculty and external stakeholders. MADI majors only. Prerequisite: DSIN 7303.

### **DSIN 7502 - Design and Innovation Studio II**

*Credits: 5*

Students use problem-solving techniques, individually and collectively, to achieve an appropriate design solution in an unscripted and dynamic situation much like a real-life employment scenario. Projects are determined each term dependent on potential partnerships, available resources, and current municipal issues or topical events in the DFW area. Includes practical application of human-centered design processes and skills, as well as problem definition, design research, team collaboration, rapid prototyping and testing, storytelling, and presentation. Cotaught by a design faculty member and industry expert. Culminates with a public critique of the students' work by faculty and external stakeholders. MADI majors only. Prerequisite: DSIN 7501.

**DSIN 7590 - Special Topic**

*Credits: 5*

Individual or group study of selected topics in engineering. Prerequisite: Permission of instructor.

**DSIN 7591 - Special Topic**

*Credits: 5*

Individual or group study of selected topics in engineering. Prerequisite: Permission of instructor.

# Electrical and Computer Engineering

**Professor** Dinesh Rajan, **Chair**

**Professors:** Jerome K. Butler, Jung-Chih Chiao, Marc P. Christensen, Scott C. Douglas, Gary A. Evans, Ping Gui, Duncan L. MacFarlane, Suku Nair, Panos E. Papamichalis, Behrouz Peikari, Dinesh Rajan, Ron Rohrer, Mitch Thornton

**Associate Professors:** Joseph D. Camp, Carlos E. Davila, James G. Dunham, Jennifer Dworak, Choon S. Lee, Jianhui Wang

**Assistant Professors:** Mohammad Khodayar, Prasanna Rangarajan, Dario J. Villarreal Suarez

**Senior Lecturer:** M. Scott Kingsley

**Adjunct Faculty:** Sudipto Chakraborty, Joseph R. Cleveland, John Fattaruso, Clark D. Kinnaird, Rajin Koonjbeary, Peter Nguyen, John Rhymer, Kamakshi Sridhar, John Widhalm

## General Information

### Department Facilities

The department has access to the Lyle School of Engineering academic computing resources, consisting of shared-use computer servers and desktop client systems connected to a network backbone. All of the servers in the Lyle School of Engineering are running some variant of UNIX or Microsoft Windows. There is one primary file server that exports files using FNS or CIFS protocols. Each user, whether faculty, staff or student, has a "home" directory on the central file server. This directory is exported to other servers or desktop computers, regardless of operating systems, as needed. There are more than 40 servers whose purposes include the following: file service, UNIX mail, Exchange mail, firewall, UNIX authentication, NT authentication, printer management, lab image download, classroom-specific software, X windows service, news, domain name service, computational resources, and general use. This primary file server allows a user's files to be used as a resource in both the UNIX and Microsoft PC environments. Almost all computing equipment within the Lyle School of Engineering is connected to the engineering network at 100 megabits and higher. The network backbone is running at a gigabit per second over fiber.

Most servers and all engineering buildings are connected to this gigabit backbone network. The backbone within the Engineering School is connected to both the Internet 2 and the campus network that is then connected to the Internet at large. In addition to servers and shared computational resources, the Lyle School of Engineering maintains a number of individual computing laboratories associated with the departments. Specific department laboratory facilities for instruction and research include the following:

**Antenna Laboratory.** This laboratory consists of two facilities for fabrication and testing. Most of the antennas fabricated at the SMU antenna lab are microstrip antennas. Antennas are made with milling machines. Fabricated antennas are characterized with a network analyzer. Workstations are available for antenna design and simulation with COMSOL and HFSS. Radiation characteristics are measured at the SMU Antenna Characterization Chamber in the SMU East campus, where the frequency ranges from 500 MHz to 40 GHz.

**Biomedical Engineering Laboratory.** This laboratory contains instrumentation for carrying out research in electrophysiology and psychophysics. Four Grass physiographs permit the measurement of electroencephalograms as well as visual and auditory evoked brain potentials. The lab also contains a state-of-the-art dual Purkinje eye tracker and image stabilizer, a Vision Research Graphics 21-inch Digital Multisync Monitor for displaying visual stimuli, and a Cambridge Research Systems visual stimulus generator capable of generating a variety of stimuli for use in psychophysical and electro-physiological experiments.

**Circuit Fabrication Laboratory.** This lab is fully equipped with modern fabrication tools to design and fabricate multi-layer circuit boards of various sizes, complexity, and design rules, ideally suited for RF and microwave applications. An automated circuit board plotter produces PCB prototypes from CAD files, for both rigid and flexible substrates. An integrated through-hole electroplating system yields reliable copper layers on the surfaces of all existing vias, including multilayer boards. The boards are passed through six cascaded baths that are integrated in a safe enclosed benchtop system. Multi-layer boards are fabricated using a benchtop multi-layer hydraulic press to aid in

bonding the layers together. The lab also includes an automated de-solder/solder tool for surface mount components, and supporting instruments such as oscilloscopes, multi-meters, and microscopes.

**Integrated Circuits and Systems Laboratory.** This facility has state-of-the-art design tools and equipment to conduct design, simulations, and measurements of integrated circuits and systems. The tools, facility and equipment include electronic design automation (EDA) tools such as Cadence, ADS, Synopsys, HFSS, and Xilinx software; IC measurement equipment including a high-speed sampling oscilloscope, spectrum analyzer, RF signal sources and a network analyzer. The SMU high-performance computer cluster is used for mixed-signal simulations.

**NeuroMechatronics Lab.** This laboratory is a fully equipped biomechanics facility, which supports the activities of faculty, graduate students, and undergraduate students in theoretical and experimental tasks related to research in human-robot interfaces. The lab has the equipment to analyze, interpret, and decode the biomechanics and biological signals of human across a wide range of activities. In addition, this laboratory has the equipment to rapid prototype and test data-driven control systems in robotic and wearable devices designed to improve the quality of life in impaired individuals. The main equipment in the lab consists of a 16-camera motion capture system, wireless electromyography and electroencephalography sensors, and a lower-limb robotic exoskeleton.

**Multimedia Systems Laboratory.** This facility includes an acoustic chamber with adjoining recording studio to allow high-quality sound recordings to be made. The chamber is sound isolating with double- or triple-wall Sheetrock on all four sides, as well as an isolating ceiling barrier above the drop ceiling. The walls of the chamber have been constructed to be nonparallel to avoid flutter echo and dominant frequency modes. Acoustic paneling on the walls of the chamber are removable and allow the acoustic reverberation time to be adjusted to simulate different room acoustics. The control room next to the acoustic chamber includes a large, 4-foot-by-8-foot acoustic window and an inert acoustic door facing the acoustic chamber. Up to 16 channels of audio can be carried in or out of the chamber to the control room. Experiments conducted in the Multimedia Systems Laboratory include blind source separation, deconvolution and dereverberation. Several of the undergraduate courses in electrical engineering use sound and music to motivate system-level design and signal processing applications. The Multimedia Systems Laboratory can be used in these activities to develop data sets for use in classroom experiments and laboratory projects for students to complete.

**Wireless Systems Laboratory.** This laboratory contains an array of infrastructure for experimentation across a number of wireless frequency bands, platforms and environments for research and instruction in lab-based courses on wireless communications and networking. The infrastructure includes 1) state-of-the-art test equipment for repeatability, control and observability of wireless channels, including complex channel emulators, fixed and mobile spectrum analyzers, wide-band oscilloscopes, and signal generators; 2) a wide range of reprogrammable wireless testbeds that operate from 400 MHz to 6 GHz for IEEE 802.11, cellular, and Bluetooth network and protocol development; and 3) diverse mobile phones, drones and tablets that enable participatory sensing, context-aware applications and large-scale deployment in the field. The in-lab infrastructure is also enhanced by multiple outdoor antennas deployed on campus buildings and buses for understanding real wireless channels.

**Photonic Architectures Laboratory.** This laboratory is a fully equipped optomechanical prototyping facility, supporting the activities of faculty and graduate students in experimental and analytical tasks. The lab is ideally suited for the prototyping, integration and testing of optical devices and systems. It includes infrastructure for imaging at microscopic and macroscopic scales. The lab has five optical tables three of which include vibration isolation. It also contains an assortment of light sources, both coherent and incoherent sources, at visible and infrared wavelengths. Devices for patterning light including Spatial Light Modulators, deformable mirror and pattern projectors. The lab also includes an assortment of detectors ranging from single pixel area detectors to focal plane arrays (FPA) at visible and infrared wavelengths. The lab additionally contains lock-in FPA's and Time-of-Flight (ToF) sensors featuring support for per-pixel homodyne detection. The lab also hosts a variety of measurement equipment including a wavefront sensor and a surface profilometer. A vast array of manual and motorized optomechanical components are also available. Support electronics hardware includes various test instrumentation, such as arbitrary waveform generators, and a variety of CAD tools for optical and electronic design, including optical ray trace and finite difference time domain software.

**Photonic Characterization Laboratory.** This laboratory is dedicated to characterizing the optical and electrical properties of photonic devices. Equipment in this laboratory program includes optical spectrum analyzers, optical

multimeters, visible and infrared cameras, an automated laser characterization system for edge-emitting lasers, a manual probe test system for surface-emitting lasers, a manual probe test system for edge-emitting laser die and bars, and near- and far-field measurement systems.

**Photonics Devices and Systems Laboratory.** The PDSL houses a wealth of resources for developing and applying photonic components, devices and systems, including optics, mounting hardware, optical tables, design software, electronic instrumentation and fabrication equipment. Examples of ongoing research areas include communications and instrumentation, particularly for biomedical applications.

**Photonics Simulation Laboratory.** This laboratory has developed and continuously updates software for modeling and designing semiconductor lasers, optical waveguides, optical fibers, couplers, switches and optical waveguide isolators. These programs include:

- **WAVEGUIDE:** Calculates near-field, far-field and effective indices of dielectric waveguides and semiconductor lasers. Each layer can contain gain or loss.
- **GAIN:** Calculates the gain as a function of energy, carrier density and current density for strained and unstrained quantum wells for a variety of material systems.
- **GRATING:** Uses the Floquet Bloch approach and the boundary element method to calculate reflection, transmission and outcoupling of dielectric waveguides and laser structures with periodic layers or interfaces.
- **FIBER:** Calculates the fields, effective index, group velocity and dispersion for fibers with circularly symmetric index of refraction profiles.
- **WAVEGUIDEISOLATOR:** Calculates the bi-directional propagation constants in optical waveguides with ferromagnetic layers for the design, fabrication and analysis of integrated waveguide isolators.

**Semiconductor Processing Cleanroom.** The 2,800 square-foot cleanroom, consisting of a 2,400 square-foot, Class 10,000 room and a Class 1,000 lithography area of 400 square feet, is located in the Jerry R. Junkins Engineering Building. A partial list of equipment in this laboratory includes acid and solvent hoods, photoresist spinners, two contact mask aligners, a thermal evaporator, a plasma asher, a plasma etcher, a turbo-pumped methane hydrogen reactive ion etcher, a four-target sputtering system, a plasma-enhanced chemical vapor deposition reactor, a diffusion-pumped four pocket e-beam evaporator, an ellipsometer and profilometers. Other equipment includes a boron-trichloride reactive ion etcher, a chemical-assisted ion-beam etcher, a four-tube diffusion furnace, numerous optical microscopes and a scanning electron microscope. The cleanroom is capable of processing silicon, compound (III-V) semiconductors and piezo-electric materials for microelectronic, photonic and nanotechnology devices.

**Submicron Grating Laboratory.** This laboratory is dedicated to holographic grating fabrication and has the capability of 70 nm lines and spaces. Equipment in this laboratory includes a floating air table, a 266 nm UV laser, and an Atomic Force Microscope. This laboratory is used to make photonic devices with periodic features such as distributed feedback, distributed Bragg reflector, and grating-outcoupled and photonic crystal semiconductor lasers along with grating couplers and silicon photonic devices. Measurements of radiation patterns of millimeter wave gratings can be evaluated in the W band.

## Graduate Programs

The discipline of electrical engineering is at the core of today's technology-driven society. Personal computers, computer-communications networks, integrated circuits, optical technologies, digital signal processors and wireless communications systems have revolutionized the way people live and work, and extraordinary advances in these fields are announced every day. Because today's society truly is a technological society, graduate education in electrical engineering offers exceptional opportunities for financial security and personal satisfaction.

The Department of Electrical and Computer Engineering at SMU offers a full complement of courses at the master's and Ph.D. level in biomedical devices, computer architecture, CAD, wireless communication networks, digital signal processing, lasers and optoelectronics, photonics, electromagnetics, microelectronics, VLSI design, systems and control, and image processing and computer vision. The courses and curriculum are designed and continuously updated to prepare the student for engineering research, design and development at the forefront of these fields.

A professionally oriented master's degree in telecommunications systems is also offered through the Electrical Engineering Department, and courses in the curriculum (designated EETS) prepare the student for leadership roles in telecommunications systems management and planning and for developing new telecommunications products, services and applications.

**Graduate Degrees.** The Electrical and Computer Engineering Department offers the following graduate degrees:

## Computer Engineering, Ph.D.

Students receiving a Ph.D. in computer engineering are expected to achieve and demonstrate a mastery of the discipline and to significantly advance the state of knowledge through an original research effort.

### Admission Requirements

Applicants are required to satisfy the following:

1. An M.S. degree in computer engineering or a related field, including computer science, electrical engineering, mathematics or physics, from a U.S. college or university accredited by a regional accrediting association, or completion of an international degree that is equivalent to a U.S. master's degree from a college or university of recognized standing. In the case of direct admission without a previous M.S. degree, the baccalaureate degree must be conferred prior to the time the student begins classes as a graduate student, and the student will fulfill the requirements for, obtain an M.S. degree, and then continue working toward the Ph.D. Also, the student's GPA must be at least 3.400 on a 4.000 scale in the student's junior and senior years.
2. Excellent academic performance in all completed coursework, with a GPA of at least 3.000 on a 4.000 scale.
3. A reasonable level of mathematical maturity.
4. Submission of a complete application, including a statement of purpose, official transcripts for all previous undergraduate and graduate studies and payment of appropriate application fee.
5. Submission of official GRE graduate school admission test scores.
6. Three letters of recommendation from individuals who can judge the applicant's potential success as a doctoral student.
7. Submission of a notarized financial certification form (graduates from foreign countries only). Before being considered for admission, all international students whose native language is not English and who have not graduated from an American university must submit a minimum TOEFL English language proficiency exam score as follows:
  - 550 – paper-based examination.
  - 213 – computer-based examination.
  - 80 – Internet-based examination.

### Degree Requirements

In addition to meeting the Lyle School of Engineering requirements for the Ph.D. degree, candidates are required to satisfy the following:

1. The graduation requirements fall into the categories of completion of a specified number of graduate credits in appropriate subjects with an acceptable GPA, demonstration of understanding of the discipline of computer engineering as evidenced by examination and completion of a substantial research effort documented in a doctoral dissertation. Doctoral students must maintain at least a 3.000 GPA every term and at least a 3.300 overall (cumulative) GPA during their course of study.
2. All requirements must be completed within seven years of entry into the program.

The steps for completion of the doctoral program are

1. Initial advising.
2. Basic coursework to prepare for the commencement of research work.
3. Selection of a dissertation director and supervisory committee.
4. Advanced coursework in the chosen research area and guided thesis research to prepare for the qualifying examination.
5. Successful completion of the qualifying examination as determined by the doctoral advising committee.
6. Dissertation research supervised by the candidate's doctoral adviser.

7. Successful defense of the research leading to the Ph.D.

Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

## **Initial Advising**

Upon entry into the Ph.D. program, students are assigned a faculty adviser who acts as an academic adviser. The responsibilities of this adviser are to examine the student's prior background and current state of knowledge and to recommend courses to be taken in preparation for the commencement of research work.

## **Credit Requirements**

### **Prerequisites**

All students entering the program are expected to possess knowledge equivalent to the following CS courses:

- CS 1341 - Principles of Computer Science
- CS 1342 - Programming Concepts
- CS 2240/ECE 3381 - Assembly Language Programming and Machine Organization
- CS 2341 - Data Structures
- CS 2353 - Discrete Computational Structures
- CS 3342 - Programming Languages
- CS 3353 - Fundamentals of Algorithms
- CS 3381/ECE 2381 - Digital Logic Design
- CS 4344 or ECE 5376 - Computer Networks and Distributed Systems
- CS 4345 - Software Engineering Principles
- CS 4381 - Digital Computer Design

### **Graduate Credit Hours**

A minimum of 54 graduate credit hours is required beyond the baccalaureate degree in order to achieve the Ph.D. degree. Of this, a minimum of 21 credit hours must be at the 8000 level. In addition to these 54 credit hours, 24 credit hours are required for dissertation credit. Of the 54 graduate credit hours, a maximum of 30 credit hours may transfer from an appropriate major from another institution.

### **Core Courses**

The following core courses must be taken at SMU if the student has not received credit for these at another university:

- CS 7343 - Operating Systems and System Software
- CS 7344 - Computer Networks and Distributed Systems II
- CS 7381 - Computer Architecture
- CS 7387 - Digital Systems Design

### **Minor Requirement**

A minor, usually in an area of computer science, electrical engineering, computer engineering or mathematics, with a minimum of 12 credit hours supporting the chosen research area is required. The minor requirement may be satisfied by transfer credit.

### **Residency Requirement**

All full-time Ph.D. students in residence at the main campus of SMU are required to enroll in the CS seminar class CS 8098. The CS 8098 course is graded on a pass/fail basis with a grade of Pass requiring the attendance of at least two-

thirds of the CS departmental seminars and distinguished speaker series. The seminar coordinator will keep attendance records.

## **Grades**

No graduate credit is earned for a course in which a grade of less than C- is received. Such courses do, however, count toward the total GPA. A student must have a GPA of at least 3.000 on a 4.000 scale to graduate. If at any point a student's GPA drops below 3.000, the student is placed on academic probation. The student then has one term to raise his or her GPA to a minimum of 3.000 or be dismissed from the program. For part-time students, one term is taken to mean six credit hours. A grade of *I* (Incomplete) affects the GPA for the term in which the grade is granted rather than when it is removed; therefore, a student is placed on academic probation if he or she is granted a grade of *I* on currently completed work in the course and that grade causes the student's GPA to drop below 3.000.

## **Computer Science Seminar**

All Ph.D. students who are receiving financial support from the department (such as teaching and research assistantships) must enroll in the seminar class CS 8098 each term that the course is offered.

## **Advanced Study**

Advanced study in computer engineering consists of a major concentration area. A concentration area consists of a number of courses that are related to a specific subfield of computer engineering. The major concentration consists of a minimum of 18 credit hours, no more than six of which can be independent study.

Credit earned for the core courses (CS 7343, CS 7350, CS 7381 and CS 7387) will not be counted for the concentration area. The student must file an advanced study degree plan with the department. No degree plan is accepted until approved by the chair of ECE. Credits received prior to filing a degree plan are not guaranteed to count toward graduation.

## **Dissertation Director and Supervisory Committee**

Before the student has completed 18 credit hours or two years of Ph.D. study (whichever comes first), he or she must identify a dissertation director and form a supervisory committee. It is the responsibility of the student to find a faculty member willing to provide a research topic or to supervise a topic of the student's choosing. The dissertation director must be one of the full-time tenure or tenure-track faculty members of the ECE Department. This requirement will be satisfied by successful completion and filing of the Recommendation and Certification of Appointment of Supervisory Committee form.

The dissertation director, together with the student, should prepare the advanced study degree plan. They should also form the supervisory committee. The supervisory committee is made up of at least five members. Three resident tenured or tenure-track faculty members are drawn from the student's department, and one resident tenured or tenure-track faculty member is chosen from each minor field. The chair of the supervisory committee shall be a resident tenured or tenure-track member of the school faculty and shall normally be the dissertation director and a member of the student's department. Thus, a minimum of four members must be resident tenured or tenure-track faculty of SMU. The names of the supervisory committee members must be submitted to the chair of the ECE Department and the director of the graduate division for approval.

## **Qualifying Examination**

The student must complete all the core courses with an average grade of B+ (3.300) or better before he or she can appear for the qualifying examination. The student will give a written proposal to the committee members. The timing of this submission will be determined by the thesis adviser and usually occurs at the 40–50 percent completion point of the thesis research.

Committee members will submit questions to the Ph.D. dissertation director. The director and the members will negotiate the content of the questions. The questions will generally be from areas related to the student's area of research and, hence, the questions will be submitted only after student has submitted the written proposal. However,

should a majority of the committee judge that the student has not shown strong credentials in one or more of the core areas, the examination may include questions designed specifically to determine whether or not the student has sufficient background in those areas. Examinations will be graded by each submitting member and given back to the chair. The chair, along with the other members, will decide the outcome (pass/fail) of the examination.

The written portion of the qualifying examination is a take-home (open-book) examination with four questions. Although there will be more than four members in the committee, usually one member will be from outside ECE and will not be required to submit a question. The student will have one week to answer questions and return the answers to the adviser. Each question is to be graded by the committee member who submitted that question. The student must attain an average score of 70 percent and a minimum score of 50 percent on each individual question in order to receive a passing grade.

After passing the written portion, the student will appear for the oral portion of the qualifying examination. In addition to evaluating the presentation based on the proposed research, the oral part will also address any deficiencies the written examination may reveal. The student should schedule the oral presentation at the time the written proposal is submitted, even though he or she will be eligible to appear for the oral presentation only after passing the written portion.

Students will have a maximum of two attempts to pass the qualifying examination.

If a student changes her or his area of research significantly, or if significant changes are made to the composition of the supervising committee, the student may be required to repeat the qualifying examination.

### **Change of Committee or Concentration**

A student may change concentration, dissertation director or supervisory committee at any point, subject to the approval of the ECE faculty. Such a change will generally require the formation of a new supervisory committee and will definitely require the filing of a new advanced study degree plan. The student must take a qualifying examination in the new concentration area to be admitted to candidacy. In the event that the student changes concentration after being admitted to candidacy, the candidacy is revoked and the student must pass the qualifying examination in the new concentration. Two attempts are allowed for a student in this position. A student may also change areas before being admitted to candidacy. In this event, it is possible that one or more unsuccessful attempts will have been made to pass the qualifying examination. The student may, at the discretion of the supervisory committee, be allowed two attempts in the new concentration, but under no circumstances will more than three attempts be allowed at the examination. It is also possible that a student will change dissertation director or composition of the supervisory committee, while still retaining the same concentration areas. Such changes may be made only with the approval of the supervisory committee. If the dissertation director is changed, the new research adviser may, at his or her discretion, require a new qualifying examination. In addition, if the makeup of the supervisory committee changes substantially, the supervisory committee may require a new qualifying examination to be taken with the newly constituted committee.

### **Doctoral Dissertation**

The most clearly distinguishing characteristic of a program leading to the Ph.D. degree is the requirement that the candidate write a dissertation embodying the results of a significant and original investigation. The dissertation must make a significant contribution to the engineering discipline, and it is expected to be a mature and competent piece of writing. The work reported in the dissertation may be basic scientific research, engineering research or creative design.

Upon the successful completion of the dissertation defense, the dissertation is uploaded to the SMU/UMI Dissertation Publishing website. The original abstract must be signed by the dissertation director, and the original half-title page of the dissertation must be signed by all of the ECE faculty members attending the dissertation defense.

### **Dissertation Defense**

#### **Final Examination:**

Upon completion of all other requirements, a dissertation defense by the candidate will be announced, registered with the Graduate Division and subsequently conducted by the supervisory committee. The candidate must make six

unbound copies of his or her dissertation available to the members of the supervisory committee at least two weeks in advance of the dissertation defense. This defense, which is conducted orally, must enable the supervisory committee to satisfy itself that the dissertation is an original piece of work, either in research or creative design that it has been carried out in keeping with the highest standards of investigation and reporting, and that it makes a contribution to knowledge that is of value to the engineering profession or scientific community. The defense must be scheduled with the ECE departmental office and posted in the Lyle School of Engineering. This defense is open to the public, with the possible exception of a period that involves general questions in computer engineering that is open only to committee members and Lyle faculty. Satisfactory performance on this defense constitutes the last requirement to be met for the Ph.D. degree.

## Electrical Engineering, Ph.D.

### Admission Requirements

1. An M.S. degree in electrical engineering or in a closely related discipline from a U.S. college or university accredited by a regional accrediting association or completion of an international degree that is equivalent to a U.S. master's degree from a college or university of recognized standing.
2. Excellent academic performance in all completed coursework, with a minimum GPA 3.000 on a 4.000 scale.
3. Submission of a complete application, including a statement of purpose, official transcripts for all previous undergraduate and graduate studies and payment of appropriate application fee.
4. Official GRE graduate school admission test quantitative score of 151 or greater (revised scale).
5. Three letters of recommendation from individuals who can judge the applicant's potential success as a doctoral student.
6. Graduates from foreign countries are required to submit a notarized financial certification form. All international students whose native language is not English and who have not graduated from an American university must submit a minimum TOEFL English language proficiency score before being considered for admission:
  - 550 – paper-based examination.
  - 213 – computer-based examination.
  - 80 – Internet-based examination.

### Degree Requirements

In addition to meeting the Lyle School of Engineering requirements for the Ph.D. degree, candidates are required to satisfy the following:

**Supervisory Committee.** The supervisory committee plays an important role in guiding the student and monitoring his or her progress at all stages of the Ph.D. program. As such, the committee should be constituted as early as possible after the student has begun doctoral work and before he or she has completed the coursework. The committee will be selected by the student in consultation with the dissertation director, who must be a member of the regular (tenure-track) faculty of the Electrical and Computer Engineering Department. The committee chair must be a member of the regular faculty of the department and will normally be the dissertation director. The committee must have a minimum of five members of the regular faculty of the University and will consist of at least three faculty members from the Electrical Engineering Department (including the chair and the dissertation director, if different from the chair), as well as one member from each minor field.

**Qualifying Examination.** The qualifying examination for admission to candidacy for the Ph.D. degree consists of both written and oral parts. The written part will be administered by the Doctoral Program Committee of the Electrical and Computer Engineering Department and will normally be scheduled once each fall and spring term on dates to be announced by the committee. The exam must be taken on or before the third scheduled offering after the student begins the Ph.D. program. The exam is based on coursework in the student's major area. A student who desires to take the written exam in any term must file a registration form with the doctoral program committee prior to the deadline specified each term. The student is required to pass the exam in one area to be chosen from the list below:

- Circuits
- Communications

- Control Systems
- Electromagnetics
- Semiconductor Devices and Photonics
- Signal processing

Each exam will be three hours in duration and will typically be closed book. The determination as to whether a student has passed the written exam will be made by the department faculty based on recommendations from the doctoral program committee.

1. A student who does not pass the exam can take it a second time.
2. A student who fails the exam both times will not be permitted to continue in the Ph.D. program.
3. A student who repeats an exam must do so at the earliest possible time after the first attempt.
4. If, after passing the written exam, the student decides to change his or her research area, he or she will be required to pass another written exam in the new area.

The oral qualifying exam will be administered by the student's supervisory committee. The exam will be taken after the student has passed the written exam and has completed most of the required coursework, but no later than one year after completing all coursework. A student who does not meet the deadline must petition the doctoral program committee for permission to take the oral exam.

The main focus of the oral exam will be on the research the student proposes to conduct for his or her dissertation. The student is expected to write up a description of the research problem, the previous results, and the approach or approaches he or she proposes to consider in the investigation. The write-up must be made available to the supervisory committee at least two weeks prior to the scheduled date of the exam, and it should clearly indicate the significance and originality of the research, the proposed approaches and the expected results.

The student will be admitted to candidacy upon passing the oral qualifying exam. A student who does not pass the oral exam may be permitted by the supervisory committee to retake it once. If, after admission to candidacy, the student decides to change his or her research area, he or she will be required to take the qualifying exam again and be readmitted to candidacy before being permitted to complete the dissertation.

**Final Examination.** Upon completion of all other requirements, the student is required to take a final examination conducted by his or her supervisory committee, in which he or she will present the dissertation. The student will notify the Lyle School of Engineering Graduate Division in advance of the date, time and place of the exam so that it can be publicized on campus. The student should provide copies of the complete draft version of the dissertation to the supervisory committee at least three weeks prior to the date of the final exam. It is recommended that students submit the results of their research for publication at conferences or in journals before taking the final exam.

The supervisory committee may ask questions and make comments or require changes in the dissertation to satisfy itself that the quality of the work is in keeping with the highest standards of research. If the dissertation requires substantial changes, the student should submit the revised dissertation to the supervisory committee for re-examination.

## **Computer Engineering, M.S.Cp.E.**

### **Admission Requirements**

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy the following:

1. A bachelor's degree in computer engineering, computer science or closely related discipline. Applicants with undergraduate degrees in other disciplines may also be admitted to the program and may be required to take articulation coursework.
2. A minimum GPA of 3.000 on a 4.000 scale in the student's junior and senior years.
3. A reasonable level of mathematical maturity.

## Degree Requirements

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following:

1. Either 24 credit hours of coursework and a master's thesis or 30 credit hours of coursework.
2. Twelve credit hours of core courses. Students on campus are required to register for a seminar course (for zero credit hours) for at least one term and secure a grade of Pass.
3. Six credit hours of concentration. Thesis students take six credit hours of thesis, instead of concentration.
4. Twelve credit hours of electives. All students are allowed to take at most three credit hours of independent study, which will be counted as one elective course.

The ECE Department requires that the courses taken constitute a coherent program leading to mastery in computer engineering. These requirements are discussed in the subsequent subsections. Any deviation from the stated requirements must be approved in writing from the student's adviser and department chair.

## Articulation

All students entering the program are expected to possess knowledge equivalent to the following courses:

- CS 1341 - Principles of Computer Science
- CS 1342 - Programming Concepts
- CS 2240/ECE 3381 - Assembly Language Programming and Machine Organization
- CS 2341 - Data Structures
- CS 2353 - Discrete Computational Structures
- CS 3353 - Fundamentals of Algorithms
- CS 3381/ECE 2381 - Digital Logic Design
- CS 4381/ECE 3382 - Digital Computer Design

## Note

Students with deficiencies may be granted conditional admission to the program and be required to take some of courses as articulation. Students are required to complete these articulation courses, maintaining a minimum 3.000 GPA. A student who fails to achieve this record is automatically dropped from the graduate program, may not enroll in graduate courses and may be denied the right to petition for readmission. Students who maintain the minimum 3.000 GPA in these courses may advance into the balance of their plan of study. As nearly as possible, these articulation courses should be completed before the courses in the balance of the plan of study are attempted. An articulation course must be completed before undertaking any graduate coursework, which requires it as prerequisite.

## Residency and Level Requirements

A minimum of 30 graduate credit hours must be earned toward an M.S. degree, of which at least 24 must be earned in residency at SMU. Up to six credit hours may be transferred with departmental approval. Of the 30 credit hours needed for graduation, at least nine credit hours must be at the 8000 level, with the remainder at the 7000 level or above. For the 8000-level courses, at least six credit hours must be ECE or CS courses.

## Distribution of Courses

Courses are considered to be core, concentration or elective. Core courses cover material fundamental to graduate-level computer science and are required of all students. Each student is expected to specialize in some area of computer engineering. The concentration area is a mechanism by which a student can tailor a coherent program of study to his or her interests. Electives are courses taken to round out the 30 credit hour requirement. Transferred credit hours may be used to satisfy any of these requirements. The specific requirements are discussed in detail in the following subsections.

## Course Requirements

A student who elects to take the nonthesis option must take 12 credit hours of core courses, six credit hours of concentration and 12 credit hours of electives. The electives may be selected from available graduate-level course

offerings in the Lyle School of Engineering, subject to the residency and level requirements and adviser approval. Those who elect to take the thesis option will substitute the concentration with thesis credit hours.

### Core Courses

- CS 7343 - Operating Systems and System Software
- CS 7344 - Computer Networks and Distributed Systems II
- CS 7381 - Computer Architecture
- CS 7387 - Digital Systems Design
- CS 8098 - Computer Science Seminars

Total: 12 Credit Hours

### Concentration

One of the following programs:

#### Architecture

Two of the following:

- CS 7385 - Microcontroller Architecture and Interfacing
- CS 8377/ECE 8379 - Fault-Tolerant Computing
- CS 8380 - Parallel and Distributed Processing
- CS 8383 - Advanced Computer Architecture

#### Design Automation

Two of the following:

- CS 7380 - VLSI Algorithms
- CS 7387 - Digital Systems Design
- CS 8377/ECE 8379 - Fault-Tolerant Computing
- CS 8387/ECE 8387 - Switching Theory and Applications in VLSI CAD

#### Networking

Two of the following:

- CS 7348 - Internetworking Protocols and Programming
- CS 7349/ECE 7349 - Data and Network Security
- CS 8344 - Computer Networks
- CS 8349 - Advanced Network and System Security

Total: 6 Credit Hours

### Electives

Electives may be selected from available graduate-level course offerings in the Lyle School of Engineering, subject to the residency and level requirements and adviser approval.

Total: 12 Credit Hours

## Thesis Option

A student may elect to write a master's thesis, which counts as the six credit hours of concentration. The student must register for at least six credit hours under ECE 7(1–6)96. If the thesis option is chosen, all other requirements are the same. The six credit hours of thesis satisfy six of the nine required credit hours for advanced (8000 level) courses.

A master's thesis represents one or more of the following: synthesis of divergent ideas or a scholarly critique of current literature, a creative research activity or a significant design project, the results of which must be documented in a well-written thesis. The thesis should be of publishable quality, and it is recommended that it be submitted to an appropriate conference or journal before the thesis defense.

A thesis must be supervised by a faculty adviser selected by the student. Any full-time faculty member supporting the student's concentration area may serve as the thesis adviser. It is the student's responsibility either to find an adviser willing to provide a thesis topic or willing to supervise a topic of the student's choosing.

Once the student has found an adviser and a topic has been selected, the student and adviser should jointly form a thesis supervisory committee. This committee must consist of at least three members, two of whom must represent the concentration area. The adviser chairs this committee. The makeup of this committee must be approved by the chair of ECE and the director of the graduate division.

The student must provide the members of the committee with a written thesis proposal. Typically, this will be done before the faculty agrees to serve on the committee.

A thesis is judged by the supervisory committee based upon technical merit, originality and presentation. The thesis must be presented orally to the committee at a thesis defense. A copy of the thesis must be made available to each member of the committee at least two weeks before the planned defense. The defense must be scheduled with the ECE department office and posted in appropriate bulletin boards. The defense is open to the public.

## Electrical Engineering, M.S.E.E.

The Electrical Engineering Department emphasizes the following major areas of interest:

1. **Communications.** Detection and estimation theory, digital communications, computer and communication networks, cellular communications, coding, encryption, data compression, and wireless and optical communications.
2. **Signal Processing and Control.** Digital filter design, system identification, spectral estimation, adaptive filters, neural networks and digital signal processing implementations. Digital image processing, computer vision and pattern recognition. Linear and nonlinear systems, robotics, and computer and robot vision.
3. **Computer Engineering.** Electronic circuits, computer-aided design, VLSI design, neural network implementations, parallel array architectures and memory interfaces.
4. **Electromagnetics.** Electromagnetic theory including microwave electronics, classical optics, metallic and dielectric wave-guides, antennas and transmission lines.
5. **Semiconductors, Materials and Photonics.** Theory, fabrication and characterization of devices, processing and materials, device physics, ultrafast electronics and photonics, semiconductor lasers and detectors, active optical fibers and switches, integrated optics, fiber optics, photonic integrated circuits, optical waveguides, optical backplanes and silicon photonics.

## Admission Requirements

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy this additional requirement: a B.S. degree in electrical engineering or a closely related discipline.

## Degree Requirements

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy additional requirements. The plan of study involves these requirements:

## Articulation Courses

Articulation courses, if necessary, are used to prepare a student for graduate study in electrical engineering (to bring the student's knowledge to the required level). Students must complete any required articulation courses with a GPA of 3.000 prior to entering the program.

## Required Courses

A total of 30 credit hours must be taken, of which 24 must be in ECE. A minimum of four ECE courses must be taken from one of the tracks listed below.

### Communication and Networking

- ECE 7351 - Power System Operation and Electricity Markets
- ECE 7353 - Power System Planning
- ECE 7370 - Communication and Information Systems
- ECE 7375 - Random Processes in Engineering
- ECE 7376 - Introduction to Computer Networks
- ECE 7377 - Embedded Wireless Design Lab
- ECE 7378 - Mobile Phone Embedded Design
- ECE 7379 - Optimization in Wireless Networks
- ECE 8368 - Signal Processing for Wireless Communications
- ECE 8370 - Analog and Digital Communications
- ECE 8371 - Information Theory
  
- ECE 8372 - Cryptography and Data Security  
or
- CS 8352 - Cryptography and Data Security
  
- ECE 8375 - Error Control Coding
- ECE 8376 - Detection and Estimation Theory
- ECE 8377 - Advanced Digital Communications
- ECE 8378 - Performance Modeling and Evaluation of Computer Networks

### Signaling Processing and Control

- ECE 7345 - Medical Signal Analysis
- ECE 7352 - Power Systems Analysis
- ECE 7360 - Analog and Digital Control Systems
  
- ECE 7362 - Systems Analysis  
or
- ME 7302 - Linear System Analysis
  
- ECE 7371 - Analog and Digital Filter Design
- ECE 7372 - Topics in Digital Signal Processing
- ECE 7373 - DSP Programming Laboratory
- ECE 7374 - Digital Image Processing
- ECE 7375 - Random Processes in Engineering
- ECE 8364 - Statistical Pattern Recognition
- ECE 8365 - Adaptive Filters

- ECE 8367 - Nonlinear Control  
or
- ME 8367 - Nonlinear Control
- ECE 8368 - Signal Processing for Wireless Communications
- ECE 8373 - Digital Speech Processing
- ECE 8374 - Fundamentals of Computer Vision
- ECE 8376 - Detection and Estimation Theory
- ECE 8382 - Digital Signal Processing Architectures

### Computer Engineering

- ECE 7321 - Semiconductor Devices and Circuits
- ECE 7340 - Medical Systems Designs
- ECE 7356 - VLSI Design and Lab
- ECE 7357 - CAE Tools for Structured Digital Design
- ECE 7378 - Mobile Phone Embedded Design
- ECE 7381 - Digital Computer Design
- ECE 7385 - Microcontroller Architecture and Interfacing
- ECE 7387 - Digital Systems Design
- ECE 8356 - Advanced VLSI Design and Lab
- ECE 8382 - Digital Signal Processing Architectures
- ECE 8386 - Testing of VLSI Circuits

### Electromagnetics

- ECE 7330 - Electromagnets: Guided Waves
- ECE 7332 - Electromagnets: Radiation and Antennas  
or
- MATH 6360 - Computational Electromagnetics
- ECE 7333 - Antennas and Radio Wave Propagation for Personal Communications
- ECE 8331 - Microwave Electronics
- ECE 8332 - Numerical Techniques in Electromagnetics
- ECE 8333 - Advanced Electromagnetic Theory

### Semiconductors, Materials and Photonics

- ECE 7310 - Introduction to Semiconductors
- ECE 7312 - Compound Semiconductor Devices and Processing
- ECE 7314 - Introduction to Microelectromechanical Systems  
or
- ME 7314 - Introduction to Microelectromechanical Systems and Devices
- ECE 7321 - Semiconductor Devices and Circuits
- ECE 7322 - Semiconductor Devices and Fabrication
- ECE 7336 - Introduction to Integrated Photonics
- ECE 8322 - Semiconductor Optical Systems
- ECE 8323 - Lasers and Photonics

- ECE 8331 - Microwave Electronics
- ECE 8355 - Transistor Integrated Circuits

### **Additional Courses**

The remaining courses may be taken from different tracks. Of these, two can be from outside the ECE department. Non-ECE courses are restricted to Biology, Business, Chemistry, Civil and Environmental Engineering, Computer Science and Engineering, Earth Sciences, Electrical Engineering Telecommunications (with the exception of EETS 7301), Engineering Management and Information Sciences, Mathematics, Mechanical Engineering, Physics and Statistics. At least two of the ECE courses (six credit hours) must be graduate courses numbered 8000. EETS courses do not count toward this requirement.

### **ECE Courses**

At least two of the ECE courses (six credit hours) must be graduate courses numbered 8000. EETS courses do not count toward this requirement.

### **Optional Master's Thesis**

An M.S. thesis can be used in place of 6 hours of ECE courses, including 8000 level courses, provided the four course track requirement is met.

### **Degree Plan of Study**

The student should file a degree plan of study with the help of his or her adviser as soon as possible after admission, but no later than the end of the second term after matriculation. Courses not listed on the degree plan of study should not be taken without the approval of the adviser. Any revision or alteration of the degree plan must be approved by the student's adviser, the Department Chair, and the Director of the Graduate Division.

## **Telecommunications and Network Engineering, M.S.**

Telecommunications provides corporate management with many new opportunities for enhancing efficiency and improving profits. Rapid advances in technology and changes in the regulatory climate have made major impacts in the telecommunications industry. A host of new products, services and applications are creating alternatives in carriers, equipment and networks. In recognition of the critical need for professional education in this field, the Lyle School of Engineering offers a program oriented toward the management of corporate communications and the engineering of telecommunication networks. This program is intended for students interested in employment with a corporate telecommunications management group, equipment vendor, service provider, regulatory agency, or research or consulting firm. This program is offered both on- and off-campus via remote delivery systems. Students should see the Off-campus Distance Education section for more information regarding off-campus delivery systems.

The department offers several specialization options under the M.S. (major in telecommunications and network engineering) program: engineering management, network design, software engineering and wireless communications.

### **Admission Requirements**

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy these additional requirements:

1. A B.S. in one of the sciences, mathematics or computer science or in one of the engineering disciplines.
2. A bachelor's degree in liberal arts or business with additional background in differential and integral calculus and physics.
3. Computer programming experience preferred.

### **Degree Requirements**

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy these additional requirements:

## Core Curriculum

Satisfactory completion of the core curriculum encompassing three courses:

- EETS 7301 - Introduction to Telecommunications
- EETS 7304 - Network Protocols
- EETS 8303 - Switching and Routing With Lab

## Additional Courses

Satisfactory completion of seven additional courses, four of which must be from the list of advanced electives. The seven courses may all be from the list of advanced electives; however, up to three additional electives can be substituted to fulfill degree requirements.

### Advanced Electives

- EETS 7302 - TCP/IP Network Administration
- EETS 7316 - Wireless, Cellular, and Personal Telecommunications
- EETS 7341 - Fiber Optic Telecommunications
- EETS 8304 - Multiprotocol Label Switching
- EETS 8305 - Telecommunications Software Design
- EETS 8313 - Internet Telephony
- EETS 8315 - Advanced Topics in Wireless Communication
- EETS 8316 - Wireless Networks
- EETS 8317 - Switching and QoS Management in IP Networks
- EETS 8321 - Telecommunications Network Security
- EETS 8331 - Network Analysis, Architecture, and Design
- EETS 8332 - Advanced Network Design With Lab
- EETS 8337 - Telecommunications Network Management
- EETS 8341 - Optical and DWDM Networks

### Additional Electives

- ECE 7370 - Communication and Information Systems
- EMIS 7370 - Probability and Statistics for Scientists and Engineers
- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8362 - Engineering Accounting
- EMIS 8363 - Engineering Finance
- EMIS 8364 - Engineering Management

## Computer Engineering/Master of Business Administration, M.S./M.B.A.

### Joint Master of Science in Engineering/Master of Business Administration Program

#### Overview

The Bobby B. Lyle School of Engineering and the Edwin L. Cox School of Business offer a two-year, dual-degree in Master of Science in Engineering (with one of the specific degrees listed above) and Master of Business Administration, with as few as 68 semester credit hours. The program is intended for full-time graduate students with Bachelor degrees in engineering or science. The program is offered on-campus although some of the engineering courses may be taken by means of the Lyle School's distance learning facilities. This program is geared toward recent graduates as well as early-career professionals employed in the engineering and technology sector who desire to

broaden and deepen their skills to further their career opportunities and become leaders in technology with the appropriate business and management acumen.

This program takes advantage of the 44-credit hour Fast Track MBA degree offered by Cox School and double-counts up to 6 credit hours of MBA courses as electives in the 30-credit hour MS Engineering degree programs making it possible to obtain two degrees with a total of 68 semester credit hours (24 credit hours of engineering and 44 credit hours in MBA program). As an example, students first complete the 24 credit hour of required courses for the specific MS engineering degree sought during the fall and spring semesters of the first year. Students then start the year-long Fast Track MBA (starting with the summer term and continuing in the fall and spring terms) completing both degrees at the end of the second academic year.

At the conclusion of the dual degree program, students obtain a MS in the specific engineering degree and the MBA.

The overall educational objective of the joint MS-MBA program is to impart the necessary breadth and depth in business and in technology for those individuals preparing for leadership roles in technology firms. The program provides a reduction of 6 credit hours from the total credits that would be required for a student earning the two degrees separately (one of the MS engineering degrees listed at the title page and the Fast Track MBA) and reduces the time to complete both degrees to 2 years, including a summer semester.

## **Admission Requirements**

The applicants must meet both Lyle School of Engineering admission requirements (general School requirements and program admission requirements) for the specific Lyle Master of Science degree and Cox School of Business Fast Track MBA requirements. See admission requirements in each School program section for details. Applicants must submit separate applications to the Lyle and Cox programs.

## **Curriculum Example**

The general course of study for the joint program follows:

### **Fall Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

### **Spring Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

Total Engineering: 24 Credit Hours

### **Summer Term (Cox School)**

#### **Module A Courses**

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance

- ITOM 6202 - Management Decision Analysis

#### Module B Courses

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- MNGT 6001 - Managing Your Career
- Elective: one course (2 Credit Hours)

Term Total: 12 Credit Hours

### Fall Term (Cox School)

#### Module A Courses

- ITOM 6203 - Operations Management
- MNGT 6003 - Business Presentation Techniques
- STRA 6201 - Strategic Management
- Elective: two courses (4 Credit Hours)

#### Module B Courses

- ACCT second required accounting (2 Credit Hours)
- BUSE 6202 - Managerial Economics
- MNO 6201 - Organizational Behavior: Managing and Leading People
- Elective: one course (2 Credit Hours)

Term Total: 16 Credit Hours

### Spring Term (Cox School)

#### Module A Courses

- Elective: four courses (8 Credit Hours)

#### Module B Courses

- Elective: four courses (8 Credit Hours)

Term Total: 16 Credit Hours

Total MBA: 44 Credit Hours

Total for Joint MS-MBA: 68 Credit Hours

## **Electrical Engineering/Master of Business Administration, M.S./M.B.A.**

### Joint Master of Science in Engineering/Master of Business Administration Program

#### **Overview**

The Bobby B. Lyle School of Engineering and the Edwin L. Cox School of Business offer a two-year, dual-degree in Master of Science in Engineering (with one of the specific degrees listed above) and Master of Business Administration, with as few as 68 semester credit hours. The program is intended for full-time graduate students with Bachelor degrees in engineering or science. The program is offered on-campus although some of the engineering

courses may be taken by means of the Lyle School's distance learning facilities. This program is geared toward recent graduates as well as early-career professionals employed in the engineering and technology sector who desire to broaden and deepen their skills to further their career opportunities and become leaders in technology with the appropriate business and management acumen.

This program takes advantage of the 44-credit hour Fast Track MBA degree offered by Cox School and double-counts up to 6 credit hours of MBA courses as electives in the 30-credit hour MS Engineering degree programs making it possible to obtain two degrees with a total of 68 semester credit hours (24 credit hours of engineering and 44 credit hours in MBA program). As an example, students first complete the 24 credit hour of required courses for the specific MS engineering degree sought during the fall and spring semesters of the first year. Students then start the year-long Fast Track MBA (starting with the summer term and continuing in the fall and spring terms) completing both degrees at the end of the second academic year.

At the conclusion of the dual degree program, students obtain a MS in the specific engineering degree and the MBA.

The overall educational objective of the joint MS-MBA program is to impart the necessary breadth and depth in business and in technology for those individuals preparing for leadership roles in technology firms. The program provides a reduction of 6 credit hours from the total credits that would be required for a student earning the two degrees separately (one of the MS engineering degrees listed at the title page and the Fast Track MBA) and reduces the time to complete both degrees to 2 years, including a summer semester.

## **Admission Requirements**

The applicants must meet both Lyle School of Engineering admission requirements (general School requirements and program admission requirements) for the specific Lyle Master of Science degree and Cox School of Business Fast Track MBA requirements. See admission requirements in each School program section for details. Applicants must submit separate applications to the Lyle and Cox programs.

## **Curriculum Example**

The general course of study for the joint program follows:

### **Fall Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

### **Spring Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

**Total Engineering: 24 Credit Hours**

## Summer Term (Cox School)

### Module A Courses

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis

### Module B Courses

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- MNGT 6001 - Managing Your Career
- Elective: one course (2 Credit Hours)

Term Total: 12 Credit Hours

## Fall Term (Cox School)

### Module A Courses

- ITOM 6203 - Operations Management
- MNGT 6003 - Business Presentation Techniques
- STRA 6201 - Strategic Management
- Elective: two courses (4 Credit Hours)

Students then start the year-long Fast Track MBA (starting with the summer term and continuing in the fall and spring terms) completing both degrees at the end of the second academic year.

At the conclusion of the dual degree program, students obtain a MS in the specific engineering degree and the MBA.

The overall educational objective of the joint MS-MBA program is to impart the necessary breadth and depth in business and in technology for those individuals preparing for leadership roles in technology firms. The program provides a reduction of 6 credit hours from the total credits that would be required for a student earning the two degrees separately (one of the MS engineering degrees listed at the title page and the Fast Track MBA) and reduces the time to complete both degrees to 2 years, including a summer semester.

### **Admission Requirements**

The applicants must meet both Lyle School of Engineering admission requirements (general School requirements and program admission requirements) for the specific Lyle Master of Science degree and Cox School of Business Fast Track MBA requirements. See admission requirements in each School program section for details. Applicants must submit separate applications to the Lyle and Cox programs.

### **Curriculum Example**

The general course of study for the joint program follows:

#### **Fall Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

#### **Spring Term (Lyle School)**

- Engineering core/elective (3 Credit Hours)

- Engineering core/elective (3 Credit Hours)
- Engineering core/elective (3 Credit Hours)
- Engineering core/elective (3 Credit Hours)

Term Total: 12 Credit Hours

Total Engineering: 24 Credit Hours

### Summer Term (Cox School)

#### Module A Courses

- ACCT 6201 - Financial Accounting I
- FINA 6201 - Managerial Finance
- ITOM 6202 - Management Decision Analysis

#### Module B Courses

- MAST 6201 - Managerial Statistics
- MKTG 6201 - Marketing Management
- MNGT 6001 - Managing Your Career
- Elective: one course (2 Credit Hours)

Term Total: 12 Credit Hours

### Fall Term (Cox School)

#### Module A Courses

- ITOM 6203 - Operations Management
- MNGT 6003 - Business Presentation Techniques
- STRA 6201 - Strategic Management
- Elective: two courses (4 Credit Hours)

#### Module B Courses

- ACCT second required accounting (2 Credit Hours)
- BUSE 6202 - Managerial Economics
- MNO 6201 - Organizational Behavior: Managing and Leading People
- Elective: one course (2 Credit Hours)

Term Total: 16 Credit Hours

### Spring Term (Cox School)

#### Module A Courses

- Elective: four courses (8 Credit Hours)

#### Module B Courses

- Elective: four courses (8 Credit Hours)

Term Total: 16 Credit Hours

Total MBA: 44 Credit Hours

Total for Joint MS-MBA: 68 Credit Hours

## **Electrical and Computer Engineering Courses**

### **ECE 7049 - Masters Full-Time Status**

*Credits: 0*

### **ECE 7090 - Graduate Seminar**

*Credits: 0*

### **ECE 7096 - Master's Thesis**

*Credits: 0*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **ECE 7190 - Special Topics**

*Credits: 1*

Students may need to register in several special topics courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **ECE 7196 - Master's Thesis**

*Credits: 1*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **ECE 7290 - Special Topics**

*Credits: 2*

Students may need to register in several special topics courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **ECE 7296 - Master's Thesis**

*Credits: 2*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **ECE 7301 - Power Management for Industrial and Mission-Critical Facilities**

*Credits: 3*

Overview of the issues in power management (maximize uptime, minimize costs, reduce risk, improve reliability, and increase operation efficiency) in a data center or other mission-critical facility. Topics include DC and AC power concepts (three-phase power, etc.), tier level rankings and their impact on design and cost, redundancy and fault tolerant integration to avoid single points of failure, power quality indices and methods to improve power quality, introduction to AC and DC distribution systems in data centers, design and installation of LED lighting systems, UPS, battery, generators, uninterrupted operating capability in power distribution, air conditioning and air distribution architecture, energy efficiency in data centers, fault protection and system grounding, system security (fire detection systems, pre-action sprinkler systems, dry suppression systems, etc.), comprehending IT hardware refresh cycles, and standardization in energy infrastructure.

### **ECE 7310 - Introduction to Semiconductors**

*Credits: 3*

Explores the basic principles in the physics and chemistry of semiconductors that have direct applications on device operation and fabrication. Topics include basic semiconductor properties, elements of quantum mechanics, energy band theory, equilibrium carrier statistics, carrier transport, and generation-recombination processes. These physical principles are applied to semiconductor devices. Devices studied include metal-semiconductor junctions, p-n junctions,

LEDs, semiconductor lasers, bipolar junction transistors, field-effect transistors, and integrated circuits. Emphasizes obtaining the governing equations of device operation based on physical principles.

### **ECE 7312 - Compound Semiconductor Devices and Processing**

*Credits: 3*

Laboratory-oriented elective course for graduate and upper-level undergraduate students that provides in-depth coverage of InP- and GaAs-based device processing and silicon integrated circuit processing. Students without fabrication experience fabricate and characterize MOSFETs and semiconductor lasers. Students with some previous fabrication experience (such as ECE 3311) fabricate and test an advanced device mutually agreed upon by the student(s) and the instructor (e.g., HEMTs, HBTs, phase shifters, DBR lasers, grating-assisted directional couplers, and semiconductor lasers from developing materials such as GaInNAs). The governing equations of photolithography, oxidation, diffusion, ion-implantation, metallization, and etching are derived from fundamental concepts. Silicon process modeling uses the CAD tool SUPREM. Optical components are modeled using the SMU developed software WAVEGUIDE, GAIN, and GRATING. A laboratory report describing the projects is peer-reviewed before final submission. Prerequisite: ECE 3311 or equivalent.

### **ECE 7313 - Solar Cells and Applications**

*Credits: 3*

This laboratory-oriented course explores the sun's energy as a source of electrical power and the working principles of silicon and III-V solar cells. Covers characteristics of the sun, semiconductor properties, p-n junctions, solar cell fabrication, and photovoltaic system design. Students fabricate and test silicon solar cells in the SMU cleanroom. Lectures and class discussions explain the basic operation of p-n junction diodes and solar cells along with the basics of device processing, including photolithography, oxidation, diffusion, ion implantation, metallization, and etching. Prerequisite: ECE 3311 or permission of instructor.

### **ECE 7314 - Introduction to Microelectromechanical Systems**

*Credits: 3*

Develops the basics for microelectromechanical devices and systems, including microactuators, microsensors, micromotors, principles of operation, different micromachining techniques (surface and bulk micromachining), IC-derived microfabrication techniques, and thin-film technologies as they apply to MEMS.

### **ECE 7318 - Introduction to MEMS**

*Credits: 3*

### **ECE 7321 - Semiconductor Devices and Circuits**

*Credits: 3*

A study of the basics of CMOS integrated analog circuits design. Topics include MOSFET transistor characteristics, DC biasing, small-signal models, different amplifiers, current mirrors, single- and multistage electronic amplifiers, frequency response of electronic amplifiers, amplifiers with negative feedback, and stability of amplifiers. Each student completes one or more design projects by the end of the course. Prerequisites: ECE 3122, ECE 3322.

### **ECE 7322 - Semiconductor Devices and Fabrication**

*Credits: 3*

Laboratory-oriented elective course that introduces the working principles of semiconductor devices and includes the fabricating and testing of silicon MOSFET transistors in the SMU cleanroom. Lectures and class discussions (about 22 hours) explain the basic operation of p-n junction diodes, bipolar junction transistors, heterojunction bipolar transistors, field-effect transistors, high-electron mobility transistors, solar cells, detectors, light-emitting diodes, and semiconductor lasers. Class lectures (about 20 hours) cover the basics of device processing, including photolithography, oxidation, diffusion, ion-implantation, metallization, and etching. Weekly laboratory reports and a final project report describing the fabrication and testing of devices account for a major portion of the course grade. Students lead weekly discussions of the previous week's laboratory experiences and homework problems. An optional field trip to a local semiconductor related company is possible. Credit will not be given for both ECE 7322 and ECE 3311.

### **ECE 7330 - Electromagnets: Guided Waves**

*Credits: 3*

Application of Maxwell's equations to guided waves; transmission lines, plane wave propagation, and reflection; hollow waveguides and dielectric waveguides; and fiber optics, cavity, and dielectric resonators. Prerequisite: ECE 3330.

### **ECE 7332 - Electromagnets: Radiation and Antennas**

*Credits: 3*

Polarization, reflection, refraction, and diffraction of EM waves; dipole, loop, slot, and reflector antennas; array analysis and synthesis; self- and mutual impedance; and radiation resistance. Prerequisite: ECE 3330.

### **ECE 7333 - Antennas and Radio Wave Propagation for Personal Communications**

*Credits: 3*

Covers fixed-site antennas, radio wave propagation, and small antennas proximate to the body. Also, electromagnetics fundamentals; general definitions of antenna characteristics; electromagnetic theorems for antenna applications; various antennas for cellular communications, including loop, dipole, and patch antennas; wave propagation characteristics as in earth-satellite communications, radio test sites, urban and suburban paths, and multipath propagation; and radio communication systems. Prerequisite: ECE 3330.

### **ECE 7335 - Quantum Electronics**

*Credits: 3*

Optical properties of solids: wave-length dependent dielectric constant, reflectivity, dispersion relations, quantum principles of absorption and emission, free-carrier absorption, electric dipole transitions, resonant processes, and field quantization. Prerequisite: ECE 7330.

### **ECE 7336 - Introduction to Integrated Photonics**

*Credits: 3*

Covers the issues of integrated photonics and the fundamental principles of electromagnetic theory. Also, waveguides, simulation of waveguide modes, and photonic structures. Emphasizes optical waveguides and numerical simulation techniques because advances in optical communications will be based on nanostructure waveguides coupled with new materials. Includes Maxwell's equations; slab, step index, rectangular, and graded index waveguides; dispersion; attenuations; nonlinear effects; numerical methods; and coupled mode theory. Mathematical packages such as MATLAB and Mathematica are used extensively. Prerequisites: ECE 3311, ECE 3330 or permission of instructor.

### **ECE 7339 - Computer System Security**

*Credits: 3*

Investigates a broad selection of contemporary issues in computer security, including an assessment of state-of-the-art technology used to address security problems. Includes sources for computer security threats and appropriate reactions, basic encryption and decryption, secure encryption systems, program security, trusted operating systems, database security, network and distributed systems security, administering security, and legal and ethical issues. Prerequisite: CS 5343 or equivalent.

### **ECE 7340 - Medical Systems Designs**

*Credits: 3*

Focuses on the principles of sensing biological signals and their applications in medicine. Main topics include electrical and mechanical signal transduction principles, electrophysiology and electrochemistry, measurement methods, and biomedical instrumentation. Prerequisites: Fundamental knowledge in physics and chemistry. Elective course.

### **ECE 7341 - Computational Neuroscience**

*Credits: 3*

Computational (theoretical) neuroscience is a multidisciplinary field that seeks to understand information processing in biological neural systems using mathematical models and principles. The field draws on foundations from systems

theory, signal processing, and information theory to derive models that describe the functionality of biological neural systems, including encoding/decoding of information, learning, and memory.

### **ECE 7342 - Principles of Medical Imaging**

*Credits: 3*

An introduction to the physics and engineering of medical imaging technologies. Offered at an introductory level assuming no prior contact with the material. Covers imaging modalities of radiography (X-ray), computed tomography (CT), nuclear medicine (PET & SPECT), ultrasound (US), and magnetic resonance imaging (MRI), as well as extensions of these techniques. Focuses on the underlying physics of each modality and the creation and detection of signals, signal processing, and image analysis. The students enrolled in the graduate level of this course will need to do an additional project including a project proposal. Prerequisites include differential equations and at least one course in electricity and magnetism.

### **ECE 7345 - Medical Signal Analysis**

*Credits: 3*

This course looks at the analysis of discrete-time medical signals and images. Topics include the design of discrete-time filters, medical imaging and tomography, signal and image compression, and spectrum estimation. The course project explores the application of these techniques to actual medical data. Research element required for course project.

### **ECE 7349 - Data and Network Security**

*Credits: 3*

Covers conventional and state-of-the-art methods for achieving data and network security. Private key and public key encryption approaches are discussed in detail, with coverage of popular algorithms such as DES, Blowfish, and RSA. In the network security area, the course covers authentication protocols, IP security, Web security, and system-level security. Prerequisites: CS 7339 or ECE 7339 or equivalent, with instructor permission.

### **ECE 7351 - Power System Operation and Electricity Markets**

*Credits: 3*

An overview of power generation systems, economic operation of power systems, and electricity market operation. Introduces mathematical optimization methods used to solve practical problems in power system operation addressing economic and technical aspects of power generation and transmission. Topics include power generation characteristics; economic dispatch; unit commitment and proposed solution methodologies; the effect of transmission systems on unit commitment and economic dispatch of power systems; restructuring in power systems; power pools and bilateral contracts; pricing in electricity markets; day-ahead, real-time, and ancillary service markets; financial transmission rights; competition between market participants; congestion management; and demand response.

### **ECE 7352 - Power Systems Analysis**

*Credits: 3*

Provides an overview of the power systems, including complex power calculation; theory of balanced three-phase circuits; per-unit system; transmission line characteristics for short, medium, and long lines; power flow analysis; three-phase balance fault; unbalanced fault and sequence impedances; and transient stability analysis in power systems. Prerequisites: Basic knowledge of electric power systems, fundamentals of electric power engineering (EE 3352) or equivalent.

### **ECE 7353 - Power System Planning**

*Credits: 3*

Overview of power system planning, including basics of restructuring in power systems, reliability analysis in power systems, long-term demand forecast, power system production simulation, introduction to stochastic programming, midterm maintenance scheduling, mathematical model for generation expansion planning, transmission expansion planning, coordinated expansion planning, and other practices, such as transmission switching and demand response, which affect the expansion planning. Prerequisite: ECE 5352/ECE 7352, ECE 3352, or permission of instructor.

### **ECE 7354 - Biomechatronics**

*Credits: 3*

Introduces the field of biomechatronics, an applied interdisciplinary science that merges concepts from physiology, biomechanics, and neuroscience with the fields of mechanics, electronics, and robotics. Describes the most commonly used sensors, actuators, feedback control systems, and signal-processing techniques applied to biomedical applications. Discusses the inventions that are transforming the fields of biomechatronics and biomedical engineering.

### **ECE 7356 - VLSI Design and Lab**

*Credits: 3*

Explores the design aspects involved in the realization of CMOS integrated circuits from device up to the register/subsystem level. Addresses major design methodologies with emphasis placed on structured, full-custom design. Also, the MOS device, CMOS inverter static characteristics, CMOS inverter dynamic characteristics, CMOS transistor fabrication technology, combination logic circuit, alternative static logic circuit, sequential logic circuit, dynamic logic circuit, propagation delay and interconnect, power dissipation and design for low power, memory device (DRAM/SRAM/ROM), ESD protection, packaging, testing, and VLSI design flow. Students use state-of-the-art CAD tools to verify designs and develop efficient circuit layouts. Prerequisites: C- or better in ECE 2181, ECE 2381, ECE 3311.

### **ECE 7357 - CAE Tools for Structured Digital Design**

*Credits: 3*

This course concentrates on the use of CAE tools for the design and stimulation of complex digital systems. Verilog, a registered trademark of Cadence Design Systems, Inc., hardware description language, will be discussed and used for behavioral and structural hardware modeling. Structured modeling and design will be emphasized. Design case studies include a pipelined processor, cache memory, UART, and a floppy disk controller. Prerequisite: ECE 2381 or permission of instructor.

### **ECE 7360 - Analog and Digital Control Systems**

*Credits: 3*

Feedback control of linear continuous systems in the time domain and frequency domain. Topics include plant representation, frequency response, stability, root locus, linear state variable feedback, and design of compensators. Prerequisite: ECE 3372.

### **ECE 7362 - Systems Analysis**

*Credits: 3*

State space representation of continuous and discrete-time systems, controllability, observability, and minimal representations; linear state variable feedback, observers, and quadratic regulator theory. Prerequisite: ECE 3372.

### **ECE 7365 - Adaptive Algorithms for Machine Learning**

*Credits: 3*

Explains what an adaptive algorithms is, how it is used to solve problems in the processing of measurements and/or data, how it works, and some of the possible design choices. Includes both supervised and unsupervised learning. Discusses derivation, description, and implementation of various machine learning algorithms for estimation, feature extraction and filtering, and classification. Prerequisites: MATH 3304/MATH 3353 or equivalent linear algebra and probability and statistics to the level of ECE 3360, CS 4340, EMIS 3340, STAT 4340, or STAT 4341, or instructor consent.

### **ECE 7369 - Trojan Detection and Hardware Security**

*Credits: 3*

Introduces several contemporary topics in hardware security, with a particular emphasis on hardware Trojans. Other topics include physically unclonable functions, the problem of counterfeiting, security implications of design for testability in hardware, intellectual property protection, and secure coprocessors and smart cards.

## **ECE 7370 - Communication and Information Systems**

*Credits: 3*

An introduction to communication in modulation systems in discrete and continuous time, information content of signals, and the transition of signals in the presence of noise. Also, amplitude, frequency, phase and pulse modulation, and time and frequency division multiplexing. Prerequisite: ECE 3360 and ECE 3372.

## **ECE 7371 - Analog and Digital Filter Design**

*Credits: 3*

Approximation and analog design of Butterworth, Chebyshev, and Bessel filters. Basic frequency transformations for designing low-pass, band-pass, band-reject, and high-pass filters. Concept of IIR digital filters using impulse-invariant and bilinear transformations. Design of FIR digital filters using frequency sampling and window methods. Canonical realization of IIR and FIR digital filters. Wave digital filters. Introduction to two-dimensional filters. Prerequisite: ECE 5372.

## **ECE 7372 - Topics in Digital Signal Processing**

*Credits: 3*

Provides extended coverage of discrete-time signals processing. Reviews discrete-time signals and the analysis of systems in both the time and frequency domains. Includes multirate signal processing, digital filter structures, filter design, and power spectral estimation. Prerequisite: C- or better in ECE 3372.

## **ECE 7373 - DSP Programming Laboratory**

*Credits: 3*

Covers applications of digital signal processor technology based on the Texas Instruments TMS320C50 DSP processor. Also, DSP device architecture, assembly language, DSP development tools, of FIR and IIR filter design, and real-time spectrum analysis with the FFT.

## **ECE 7374 - Digital Image Processing**

*Credits: 3*

Introduces the basic concepts and techniques of digital image processing. Includes characterization and representation of images, image enhancement, image restoration, image analysis, image coding, and reconstruction. Prerequisite: ECE 7372.

## **ECE 7375 - Random Processes in Engineering**

*Credits: 3*

Introduces probability and stochastic processes, as used in communication and control, and estimation and queuing theory. Includes probability theory, random variables, expected values and moments, multivariate Gaussian distributions, stochastic processes, and autocorrelation and power spectral densities. Prerequisite: Permission of instructor.

## **ECE 7376 - Introduction to Computer Networks**

*Credits: 3*

Surveys basic topics in communication networks, with an emphasis on layered protocols and their design. Includes OSI protocol reference model, data link protocols, local area networks, routing, congestion control, network management, security, and transport layer protocols. Network technologies include telephony, cellular, Ethernet, Internet protocol, TCP, and ATM. Assignments may include lab exercises involving computer simulations.

## **ECE 7377 - Embedded Wireless Design Lab**

*Credits: 3*

A wide variety of real-world experiences in wireless communications and networking using FPGAs equipped with embedded microprocessors. Covers basic wireless concepts of scheduled and random access as well as modulation and power control via labs that enable implementation of cellular and 802.11-based wireless protocols such as TDMA, Aloha, CSMA, and CSMA/CA. Also, broader topics that range from embedded programming, interrupt-driven operation, and FPGA-based design are covered in some depth. In a course project, student teams design novel wireless

protocols and carry out experiments to measure the performance. Prerequisite: C- or better in ECE 3360 or equivalent, or permission of instructor.

### **ECE 7378 - Mobile Phone Embedded Design**

*Credits: 3*

Students learn how to develop embedded software for the most widely used smartphone platforms, with an emphasis on wireless and sensing applications. Topics include user interface design such as multitouch and basic HCI design tenets, storing and fetching data with local networked systems and databases, localization via GPS and wireless signal triangulation, sensing environmental and user characteristics, networking with various wireless protocols, graphics rendering, multimedia streaming, and designing for performance such as controlling memory leaks, object allocation, and multithreading. Content draws from various fields, including wireless communications and networking, embedded programming, and computer architecture.

### **ECE 7379 - Optimization in Wireless Networks**

*Credits: 3*

Covers a wide variety of optimization problems in the design and operation of wireless networks. Introduces basic linear programming and integer linear programming concepts and explains these concepts using examples from wired and wireless networks. Also, the basic structure and design of various wireless networks, including cellular networks (such as GSM) and wireless LANs (e.g., those based on 802.11g/n). Prerequisite: ECE 2170 or equivalent, or permission of instructor.

### **ECE 7381 - Digital Computer Design**

*Credits: 3*

Emphasizes the design of digital systems and register transfer. Covers design conventions, addressing modes, interrupts, input-output, channel organization, high-speed arithmetic, and hardwired and microprogrammed control. Also, central processor organization design and memory organization. Each student completes one or more laboratory projects. Prerequisites: ECE 2181, ECE 2381.

### **ECE 7385 - Microcontroller Architecture and Interfacing**

*Credits: 3*

Emphasizes the design of embedded systems using microcontrollers. Briefly reviews microcontroller architecture. Includes hierarchical memory systems and interfacing of memory and peripherals, industry standard bus interfaces and other applicable standards, and topics in real-time operating systems and system-level design considerations. The corequisite laboratory requires students to develop software using assembler and high-level languages. Prerequisite: CS 3381 or ECE 3181, ECE 3381.

### **ECE 7387 - Digital Systems Design**

*Credits: 3*

Modern topics in digital systems design, including the use of HDLs for circuit specification and automated synthesis tools for realization. Programmable logic devices are emphasized and used throughout the course. Includes heavy laboratory assignment content and a design project. Prerequisite: ECE 2381 or CS 3381.

### **ECE 7390 - Special Topics**

*Credits: 3*

Students may need to register in several special topics courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **ECE 7391 - Special Topics**

*Credits: 3*

Students may need to register in several special topics courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

**ECE 7392 - Special Topics**

*Credits: 3*

Students may need to register in several special topics courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

**ECE 7393 - Special Topics**

*Credits: 3*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 7395 - Special Topics**

*Credits: 3*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 7396 - Master's Thesis**

*Credits: 3*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

**ECE 7490 - Special Topics**

*Credits: 4*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 7696 - Master's Thesis**

*Credits: 6*

Students may need to register in several master's thesis courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

**ECE 8049 - Ph.D. Full-Time Status**

*Credits: 0*

**ECE 8095 - Independent Study**

*Credits: 0*

**ECE 8096 - Dissertation**

*Credits: 0*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**ECE 8190 - Special Topics**

*Credits: 1*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8191 - Special Topics**

*Credits: 1*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8192 - Special Topics**

*Credits: 1*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8193 - Special Topics**

*Credits: 1*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8194 - Special Topics**

*Credits: 1*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8195 - Special Topics**

*Credits: 1*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8196 - Dissertation**

*Credits: 1*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**ECE 8290 - Special Topics**

*Credits: 2*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8291 - Special Topics**

*Credits: 2*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8292 - Special Topics**

*Credits: 2*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8293 - Special Topics**

*Credits: 2*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8294 - Special Topics**

*Credits: 2*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

### **ECE 8295 - Special Topics**

*Credits: 2*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

### **ECE 8296 - Dissertation**

*Credits: 2*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

### **ECE 8310 - Electronic Processes**

*Credits: 3*

Study of atomic, molecular, and crystal structures; electron motion in crystals; carrier statistics; band theory; electronic transport properties; and scattering and recombination mechanisms in metals and semiconductors.

### **ECE 8322 - Semiconductor Optical Systems**

*Credits: 3*

A study of semiconductor lasers and light-emitting diode optical sources, semiconductor optical detectors, receiver noise, optical fiber waveguides and their transmission characteristics, and optical fiber systems.

### **ECE 8323 - Lasers and Photonics**

*Credits: 3*

Introduces lasers and photonics. Includes ray and beam optics, analysis and design of cavities and resonators, the interaction of light with matter, rate equations and pumping, power optimization, pulsed behavior, diode lasers, and topics in photonic integration. Prerequisite: ECE 7330 or ECE 7332, or equivalent.

### **ECE 8325 - Infrared Systems Engineering**

*Credits: 3*

Develops the basic physical and operating principles of optical detectors, with a focus on infrared detectors. Includes geometric optics, blackbody radiation, radiometry, photon detection mechanisms, thermal detection mechanisms, probability and statistics of optical detection, noise in optical detectors, figures of merit, photovoltaic detectors, photoconductive detectors, bolometers, pyroelectric detectors, Schottky diode detectors, and quantum well detectors. Prerequisites: ECE 3311, ECE 3330 or optics.

### **ECE 8331 - Microwave Electronics**

*Credits: 3*

A study of microwave circuit design covering amplifiers, mixers, and oscillators using s-parameters. Topics include scattering parameters, transmission lines, impedance matching, network synthesis, stability, noise, narrowband and broadband amplifier design, low-noise amplifiers, multistage amplifiers, biasing considerations, microwave oscillators, microwave mixers, and relationships to CAE tools. Prerequisite: ECE 3330, ECE 7330, or ECE 7332.

### **ECE 8332 - Numerical Techniques in Electromagnetics**

*Credits: 3*

Introduces various numerical methods in electromagnetics, including the moment method, finite difference method, and finite element method. Emphasizes practical applications. Prerequisites: ECE 7330 and proficiency in one computer language (e.g., Fortran), or permission of instructor.

### **ECE 8333 - Advanced Electromagnetic Theory**

*Credits: 3*

The course offers the advanced level of electromagnetic theory beyond ECE 5330. Topics include various electromagnetic theories and principles. Green's functions, and perturbational and variational techniques. Prerequisite: ECE 7330.

## **ECE 8351 - Computer Arithmetic**

*Credits: 3*

Discusses number representation and algorithms for arithmetic unit design; redundant radix representation; highly parallel add, multiply, divide, and square root algorithms; IEEE floating-point standard; directed roundings; base conversion; VLSI floating-point units; vector and matrix arithmetic; residue arithmetic; rational arithmetic; and online arithmetic. Prerequisite: Knowledge of computer organization, data structures, and algorithms, as taught in CS 2341.

## **ECE 8355 - Transistor Integrated Circuits**

*Credits: 3*

An introduction to CMOS, BJT, and BiCMOS analog integrated circuits. Includes the development of the detailed, physically based device model for SPICE simulations and their application to components of operational amplifiers such as bias, differential, gain and output stages, frequency response and compensation, and feedback circuits. Emphasis is on modern CMOS operational amplifier design with BiCMOS applications. As an extension of ECE 7321, this course covers the topics in more depth and considers the high-frequency aspects of analog circuits. Prerequisite: ECE 7321.

## **ECE 8356 - Advanced VLSI Design and Lab**

*Credits: 3*

Explores the advanced mixed-signal VLSI design aspects involved in the realization of CMOS integrated circuits and systems, from device up to the high-speed VLSI circuits and real system-level design. Addresses major design methodologies, with emphasis on full-custom mixed-signal VLSI design. Includes the study of the CMOS advanced VLSI circuits, logics, high-speed interconnect, and key building blocks that determine the performance of VLSI circuits. Also, CMOS VLSI IC design, from transistor-level schematic to layout for fabrication. Students use state-of-the-art CAD tools (e.g., Cadence) to verify designs and develop efficient circuit layouts. Prerequisites: C or better in ECE 7356.

## **ECE 8361 - Optimal Control**

*Credits: 3*

Topics related to deterministic system control include applications of the variational calculus using Hamiltonian methods, optimization with control variable constraints, maximum principle, linear quadratic problem, Riccati equation and principle of optimality. Optimal stochastic control discusses point estimation, state estimation, Kalman filter, linear quadratic Gaussian problem, and separation principle. Prerequisites: ECE 7360 and ECE 7375.

## **ECE 8364 - Statistical Pattern Recognition**

*Credits: 3*

Introduction to various parametric and nonparametric statistical approaches to automatic classification of a set of processes. Topics include Bayes, Neyman-Pearson, minimax, sequential, and nearest-neighbor classifier. Also, estimation of classifier error, parameter estimation, density function estimation, linear discriminant functions, feature selection and evaluation, unsupervised recognition techniques, and clustering analysis. Prerequisite: ECE 7375 or equivalent.

## **ECE 8365 - Adaptive Filters**

*Credits: 3*

A detailed treatment of the theory and application of adaptive filter processing. Covers linear prediction, stochastic gradient (LMS) adaptive transversal filters, recursive least squares and fast RLS algorithms, adaptive transversal filters, and lattice filters. Applications include adaptive equalization, echo cancellation, system identification, beamforming, speech coding, and spectral estimation. Prerequisites: ECE 7372, ECE 7375 or permission of instructor.

## **ECE 8367 - Nonlinear Control**

*Credits: 3*

Introduces methods used to control nonlinear systems. Reviews phase plane analysis of nonlinear systems, Lyapunov theory, nonlinear stability, and describing function analysis. Advanced control techniques include feedback

linearization, sliding control, and adaptive control. Emphasizes application of the developed concepts to the robust regulation of the response of nonlinear systems. Prerequisite: ECE 7362.

### **ECE 8368 - Signal Processing for Wireless Communications**

*Credits: 3*

Emphasis is given to channel equalization, which can be considered a form of temporal signal processing, spatial array processing, and space-time processing. Topics include classical and blind channel equalization; Fourier, parametric, and subspace-based direction finding methods for smart antennas; and space-time signal processing. Prerequisite: ECE 7372.

### **ECE 8370 - Analog and Digital Communications**

*Credits: 3*

Review of stochastic processes. Detection of waveform in noise. Matched filters and correlation receivers. Parameter and waveform estimation. Wiener and Kalman filters. Optimal receivers for analog and digital communication systems. Prerequisite: ECE 7375.

### **ECE 8371 - Information Theory**

*Credits: 3*

An investigation of the fundamental performance limits of communication systems. Includes developments and proofs of Shannon's three theorems involving channel capacity, lossless source coding and rate distortion theory; entropy; entropy rate; mutual information; discrete memoryless channels and sources; and the additive white Gaussian noise channel. Prerequisite: ECE 3360 or course equivalent.

### **ECE 8372 - Cryptography and Data Security**

*Credits: 3*

Cryptography is the study of mathematical systems for solving two kinds of security problems on public channels: privacy and authentication. Covers the theory and practice of both classical and modern cryptographic systems. The fundamental issues involved in the analysis and design of a modern cryptographic system will be identified or studied. Prerequisite: ECE/STAT/CS 4340 or equivalent.

### **ECE 8373 - Digital Speech Processing**

*Credits: 3*

A detailed treatment of theory and application of digital speech processing. Provides a fundamental knowledge of speech signals and speech processing techniques. Includes digital speech coding, speech synthesis, speech recognition, and speech verification. Prerequisite: ECE 7372.

### **ECE 8374 - Fundamentals of Computer Vision**

*Credits: 3*

Introduction to the basic concepts and various techniques for computer analysis, interpretation, and recognition of pictorial data. Topics include binary image analysis, edge and curve detection, image segmentation, shape and texture representation and recognition, morphological methods, and stereo vision. Prerequisites: Familiarity with basic concepts in signal processing and probability theory.

### **ECE 8375 - Error Control Coding**

*Credits: 3*

Topics include information theory, algebraic and arithmetic codes, and applications to computer systems. Prerequisites: Elementary probability concepts and digital logic circuits and ECE 3360 or course equivalent.

### **ECE 8376 - Detection and Estimation Theory**

*Credits: 3*

Advanced topics in detection and estimation, including asymptotic detector and estimator performance, robust detection, and nonparametric detection techniques. Prerequisite: ECE 8370.

### **ECE 8377 - Advanced Digital Communications**

*Credits: 3*

Quantized, binary, and block encoding signals and systems. Also, convolution coding, fading, diversity, spread-spectrum communications, mobile radio, and packet-radio communications. Prerequisite: ECE 8370.

### **ECE 8378 - Performance Modeling and Evaluation of Computer Networks**

*Credits: 3*

Applies probabilistic modeling and evaluation techniques to understanding the behavior of traffic, switching, and network protocols. Includes basic queuing theory, traffic models, multiplexing, scheduling, switch models, routing, and traffic control, in the context of protocols such as TCP/IP and ATM. Prerequisites: Probability, random processes, and some knowledge of networks. ECE 5376 or ECE 7376 recommended.

### **ECE 8379 - Fault-Tolerant Computing**

*Credits: 3*

Discusses faults, errors and failures, hardware fault tolerance, reliability, availability, reliable distributed systems, checkpointing and recovery, atomic actions data and process resiliency, and software fault tolerance. Uses case studies. Prerequisite: Permission of the instructor.

### **ECE 8381 - Quantum Logic and Design**

*Credits: 3*

Survey of quantum logic and quantum computing from the viewpoint of a computer engineer or computer scientist. Focuses on issues in reversible computation, quantum information modeling, quantum logic circuit design, models of quantum computation, and quantum computer algorithms. Also surveys existing and emerging circuit models used to implement quantum logic circuits. Introduces principles of quantum mechanics as related to quantum computation. Prerequisite: CS 7381, CS 7385, ECE 7381, or ECE 7385; or consent of instructor.

### **ECE 8382 - Digital Signal Processing Architectures**

*Credits: 3*

Introduction to DSP systems; iteration bound; pipelining and parallel processing, retiming, unfolding, and folding; systolic architecture design; speed, power, computational, and memory resource design issues; case studies and design examples for FIR filters, IIR filters, and orthogonal transforms; and architectural overview of programmable digital signal processors. Prerequisite: ECE 5372, equivalent knowledge of digital signal processing concepts, or permission of instructor.

### **ECE 8386 - Testing of VLSI Circuits**

*Credits: 3*

The objective of testing is to verify that the manufactured custom chips function correctly according to their specifications. Testing process includes fault modeling, mainly automated simulation, test pattern generation, and testable and self-testing design synthesizing. Structured chips such as memories, PLAs, and FPGAs are also tested for correctness. The course surveys the state-of-the-art test approaches used in industry and in other research environments. Prerequisite: Digital logic design, data structures, and algorithms. Crosslisted as CS 8386.

### **ECE 8387 - Switching Theory and Applications in VLSI Cad**

*Credits: 3*

Advanced topics in switching theory and electronic design automation methods. Emphasizes the underlying theory and algorithms of EDA tools and their application. Particular emphasis on the representation and properties of discrete mathematics and synthesis, verification, and simulation problems. Includes binary and multiple-valued logic models that are targeted to conventional and emerging technologies, as well as optimization techniques for cost, performance, low power, and other constraints. Recommended: Experience in the use of HDLs and algorithm development and implementation.

### **ECE 8388 - Embedded Computing System Design**

*Credits: 3*

Covers the process of embedded computing system design under cost, power, performance, and several system-specific restrictions.

### **ECE 8389 - Foundations of Formal Verification and Validation**

*Credits: 3*

Surveys common approaches for formal methods of detecting and correcting integrated circuit design errors before device fabrication used in industry and in other research environments. Emphasizes trade-offs between formal methods and validation techniques and the use of commercial state-of-the-art software tools. Includes equivalence checking, model checking, theorem proving, and advanced topics in validation and simulation. Introduces the application of formal methods in other areas. Prerequisite: Knowledge of programming languages, data structures, advanced digital logic design, and computer architecture, or consent of instructor.

### **ECE 8390 - Special Topics**

*Credits: 3*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

### **ECE 8391 - Special Topics**

*Credits: 3*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

### **ECE 8392 - Special Topics**

*Credits: 3*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

### **ECE 8393 - Special Topics**

*Credits: 3*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

### **ECE 8394 - Special Topics**

*Credits: 3*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

### **ECE 8395 - Special Topics**

*Credits: 3*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

### **ECE 8396 - Dissertation**

*Credits: 3*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

### **ECE 8490 - Special Topics**

*Credits: 4*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8491 - Special Topics**

*Credits: 4*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8492 - Special Topics**

*Credits: 4*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8493 - Special Topics**

*Credits: 4*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8494 - Special Topics**

*Credits: 4*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8495 - Special Topics**

*Credits: 4*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8496 - Dissertation**

*Credits: 4*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**ECE 8596 - Dissertation**

*Credits: 5*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**ECE 8690 - Special Topics**

*Credits: 6*

Study of selected topics in electrical engineering. The course must have a section number associated with a faculty member.

**ECE 8696 - Dissertation**

*Credits: 6*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

**ECE 8796 - Dissertation**

*Credits: 7*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

### **ECE 8896 - Dissertation**

*Credits: 8*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

### **ECE 8990 - Dissertation**

*Credits: 9*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

### **ECE 8996 - Dissertation**

*Credits: 9*

Students may need to register in several dissertation courses to obtain the desired number of dissertation credit hours, with a limit of no more than 15 credit hours in a single term and no more than 10 credit hours in the summer terms.

## **Telecommunications and Network Engineering Courses**

### **EETS 7090 - Special Topics**

*Credits: 0*

Students may need to register in several special topics courses to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

### **EETS 7301 - Introduction to Telecommunications**

*Credits: 3*

Overview of public and private telecommunications systems, traffic engineering, switching, transmission, and signaling. Channel capacity, media characteristics, Fourier analysis and harmonics, modulation, electromagnetic wave propagation and antennas, modems and interfaces, and digital transmission systems. DSL technologies, digital microwave, satellites, fiber optics and SONET, and Integrated Services Digital Networks.

### **EETS 7302 - TCP/IP Network Administration**

*Credits: 3*

Reviews the OSI and Internet protocol models and the Linux and Windows operating system environments. Network administration operations are discussed, including IP, TCP, UDP, DNS, NFS, SMTP, IMAP, DHCP, IPsec and sendmail protocols as well as web services. Hardware and software configuration and implementations are detailed. Students complete numerous hands-on assignments reflecting topics discussed in the classroom using open source software products that can be downloaded and used on students' personal computers.

### **EETS 7304 - Network Protocols**

*Credits: 3*

This course is an introductory graduate course on the protocol architecture of the Internet, following a bottom-up approach to the protocol layers. The objective of this core course is to provide an understanding of the internetworking concepts in preparation for advanced networking courses. The first part of the course covers networking technologies such as local area networks, packet switching, and ATM. The second part of the course examines the Internet protocol (IP) and TCP/UDP in-depth. The last part of the course is an overview of important application protocols such as HTTP, client/server computing, SMTP, FTP, and SNMP. Prerequisite: EETS 7301 or equivalent.

### **EETS 7307 - Telecommunications for Data Systems Engineering**

*Credits: 3*

Covers topics related to the technologies and physical management of corporate telecommunications systems, including current voice, data, and wireless telecommunications technologies and hardware. Legal and regulatory topics include a review of regulatory agency responsibilities. Also, intellectual property, net neutrality, privacy and fraud, and facilities planning and management processes, including lease analysis, licensing and permits, bidding contracts, development of specifications, and supplier and vendor management as they pertain to telecommunications systems. Examines

engineering topics of fire protection, HVAC, electrical, plumbing, and lighting, and energy management systems for telecommunications. Prerequisites: 1 year of physics, including electricity and magnetism, and 1 year of calculus.

### **EETS 7316 - Wireless, Cellular, and Personal Telecommunications**

*Credits: 3*

A comprehensive course in the fast-developing field of wireless mobile/cellular and personal telecommunications. Topics include mobile/cellular communications; frequency allocations; base station site selection; cellular structures; channel trunking; analog cellular signalling; handover; data over cellular; multipath fading; diversity reception; modulation techniques; speech coding; digital cellular design, including GSM and TDMA; spectral efficiency considerations; spectral management and regulations; roaming; and current world systems and standards. Topics on personal communications include basic concepts and terminology for PCS; PCS technology; design based on CSM, TDMA, and CDMA; spectrum sharing with other services such as FSM; PCS standards; intelligent networks for PCS; global challenges for PCS; third-generation wireless, number portability, and roaming; and satellites in wireless. Prerequisites: EETS 7301, and ECE 5370 or ECE 7370, or permission of the instructor. This course is primarily for the telecommunications program but can also be very useful for ECE students who plan to specialize in this field.

### **EETS 7341 - Fiber Optic Telecommunications**

*Credits: 3*

This is an introductory course designed to familiarize students with practical concepts involved in optical fiber communications systems. Basic optical principles are reviewed. Dielectric-slab waveguides, fiber waveguides, and integrated optics devices are discussed. The major components of a fiber communications link, including optical sources, detectors, and fibers, are covered.

### **EETS 7353 - Cloud Computing for Network Engineers**

*Credits: 3*

A comprehensive overview of cloud computing. Defined categories of computer, storage, and network are examined with an emphasis on network. Application of the cloud delivery models of Infrastructure-, Platform- and Software-as-a-Service (IaaS, PaaS, SaaS) to deployment models of public, private, and hybrid clouds are covered. Physical and logical cloud architectures are thoroughly reviewed. Server and network virtualization using virtual machine hypervisors and virtual containers are surveyed. Data center applications of cloud technology, particularly internal and external data center network architectures, are discussed in depth. Public cloud provider implementations and cloud management are observed. Learning is confirmed and enhanced by real world case studies and labs.

### **EETS 7355 - Software Defined Network**

*Credits: 3*

A comprehensive course on Software Defined Networks (SDN). Begins with SDN theoretical concepts and evolution. Business drivers for SDN are considered. SDN operation and its practical application using the Openflow specification is discussed in detail. SDN alternative approaches are presented. SDN protocols, controllers, and application models are studied in depth and observed in use. SDN application in data centers and other use cases are thoroughly evaluated. Network Function Virtualization (NFV) and its relationship to SDN is examined. Industry SDN developments from major equipment and network providers are reviewed. Finally, SD-WAN and anticipated future SDN developments are considered. Learning is confirmed and enhanced by hands-on labs. Prerequisites: EETS 7304 and EETS 8303. Recommended: EETS 7353.

### **EETS 8303 - Switching and Routing With Lab**

*Credits: 3*

Switching and routing architectures, protocols, and functions are explained. For switching, Spanning Tree Protocol (STP), Trill, Virtual LANs (VLANs), VLAN Trunking Protocol (VTP), and inter-VLAN trunking are covered. For routing, static routing and dynamic routing protocols including RIP (version 1 and 2), OSPF, IS-IS, BGP, and Cisco's EIGRP are examined. IPv4 subnetting, with and without classes, and IPv6 are analyzed. Software tools are used to simulate the operation and performance of protocols studied. A lab using switches and routers is used to provide hands-on, real world implementation of the simulated networks.

## **EETS 8304 - Multiprotocol Label Switching**

*Credits: 3*

Examines the MPLS protocol and its applications in networks. Introduces the basics of MPLS and MPLS traffic engineering, DiffServ QoS, and network survivability. Investigates Layer 2 and Layer 3 MPLS virtual private networks. Covers MPLS management, access networks, MPLS Transport Profile, and Generalized MPLS. Prerequisite: EETS 7304.

## **EETS 8305 - Telecommunications Software Design**

*Credits: 3*

Comprehensive course to familiarize telecommunications professionals with the state-of-the-art software concepts and technology in modern telecommunications applications. Focuses on software process modeling, user interface design, CASE tool, reusability, quality assurance, reliability, distributed computing, real-time operating system and database and understanding of ROOM in analysis and design, and high-level programming language design concepts such as C++ as required in telecommunications software development. Heavy emphasis on real-world applications topics, including CO or PBX switch, CTI, LAN-to-WAN node processor, AIN, PCS, ATM, ISDN, and demonstration of ObjecTime, a real-time object-oriented modeling software tool. Prerequisites: EETS 7301 or permission of instructor and knowledge of one high-level programming language, preferably Pascal, C, or C++.

## **EETS 8313 - Internet Telephony**

*Credits: 3*

Provides a comprehensive introduction to the background, protocols, standards, and issues related to Internet telephony. Describes the changing telecommunications environment that motivates the transition from today's telephone network to voice over IP and strategies being used by companies and individuals to implement VoIP. Covers the umbrella protocol Session Internet Protocol and its partner, Session Description Protocol. In addition to SIP and SDP, H.323, RSVP, RTP, DNS, TRIP, ISUP, and SS7 are covered. Issues include emergency services, security, mobility, and quality of service. On-campus students - and off-campus students with high-speed Internet access - have access to SIP lab equipment. Prerequisite: EETS 7301 or permission of instructor.

## **EETS 8315 - Advanced Topics in Wireless Communication**

*Credits: 3*

Focuses on third generation systems, wireless data, and emerging wireless systems and technologies. Covers the IMT2000 requirements, proposals, and evolution path for CDMA and TDMA technologies toward 3G. Detailed study of radio access network for the GPRS, EDGE, WCDMA, and CDMA2000, as well as core network evolution. Also, Mobile IP, WAP, and second-generation wireless data systems such as CDPD and SMS. May include LMDS, WILL, indoor systems, cordless phones, and WLAN.

## **EETS 8316 - Wireless Networks**

*Credits: 3*

Provides a comprehensive introduction to various transport layer protocols, especially focusing on wireless networks. The course begins with a study of various traffic scenarios in different elements of a wireless network, then looks at various applications using 3G, and finishes with a discussion of methods for performance monitoring and network testing. Prerequisite: EETS 7316 (formerly EETS 7306).

## **EETS 8317 - Switching and QoS Management in IP Networks**

*Credits: 3*

Comprehensive course on IP switching and QoS management technology, protocols, and applications. Prerequisite: EETS 7301 or consent of instructor.

## **EETS 8321 - Telecommunications Network Security**

*Credits: 3*

Graduate-level survey of the technologies underlying network security. The first part of the course covers the principles of private and public key cryptography and describes a number of example encryption algorithms, including DES and AES. Next, the use of encryption with hash functions for digital signatures and certificates, followed by perimeter

security, including firewalls, intrusion detection systems, viruses, and worms. The last part of the course encompasses a number of secure protocols, including secure email, secure HTTP, IPSec, and virtual private networks. Topics that are part of general security but peripheral to network security are not covered, e.g., physical tamper resistance, security policies, digital rights management, and biometrics.

### **EETS 8323 - Advanced Network Security with Lab**

*Credits: 3*

Builds on basic network security topics introduced in EETS 8321. Advanced network security topics are covered by investigating four primary categories: routers and switches, firewall technologies, intrusion detection and prevention systems (IDS/IPS), and Virtual Private Networks (VPNs). Methods of authentication and encryption are examined in detail. Web, email, BYOD, and application security are also discussed. Theoretical concepts applied in the laboratory using simulation software and actual network equipment. Case studies highlight current industry applications of network security methods. Prerequisites: EETS 8321, EETS 7304, and EETS 8303.

### **EETS 8331 - Network Analysis, Architecture, and Design**

*Credits: 3*

A focus on the systematic process of network design. The course explains the process of gathering network requirements and covers data flow analysis and the selection of network architectures. Also, addressing and routing, network management, network performance criteria, and security and privacy architecture selection methods. These techniques are merged to create a complete network design framework. Prerequisite: EETS 7304 or permission of instructor.

### **EETS 8332 - Advanced Network Design With Lab**

*Credits: 3*

Covers integration of network protocols including OSPF, EIGRP, BGP, MPLS, VLAN, VPN/DMVPN, IPsec and MACsec, STP and Trill, VoIP and methods of Quality of Service (QoS) in advanced networks. Concurrently, the requirements for an extensive and realistic network will be analyzed, designed, then simulated using software tools; and finally installed, operated, and tested using actual network equipment. Prerequisites: EETS 7304, EETS 8303, and EETS 8304.

### **EETS 8337 - Telecommunications Network Management**

*Credits: 3*

Comprehensive course in the important issues in telecommunications network management. Overview of the underlying principles - operation, administration, maintenance, and provisioning - that are often the most expensive and labor-intensive aspects of telecommunications. Includes different paradigms for network management such as the Internet Simple Network Management Protocol (SNMP, SNMPv2) and the Open System Interconnection Common Management information protocol. Covers the object-oriented modeling approach such as the ITU-T Telecommunications Management Network and Bellcore's Information Networking Architecture. Also, implementation issues of architectural concepts into network products and systems such as the translation from ISO Guidelines for the Definition of Managed Objects into C++. Network simulation, configuration, fault, security, accounting, performance management, and the quality of service concepts. Addresses drivers for network management and its traditional practice, as well as future needs, and includes case studies in Intelligent Network and Synchronous Optical Network. Prerequisites: EETS 8305 or permission of the instructor, plus knowledge of one high-level programming language, preferably Pascal, C, or C++.

### **EETS 8341 - Optical and DWDM Networks**

*Credits: 3*

Discusses the operation of the following network types: Synchronous Optical Network, Synchronous Digital Hierarchy, and Optical Transport Network. Also, optical core and access network configurations. Introduction to WDM network elements, and control and management of optical networks, plus an overview of network survivability using optical technologies. Covers future optical technologies, including photonic packet switching. Students use simulation software in laboratory experiments to analyze the performance and operation of optical networks. Prerequisite: EETS 7304 or permission of instructor.

### **EETS 8353 - Network Automation and Programmability**

*Credits: 3*

Reviews software applications used in the automation and programmability of modern networks. Network automation protocols such as NETCONF and OpenFlow as well as platforms such as Openstack are examined. Various scripting methods including Python, awk, Bash, and tcl as well as software automation tools like Chef, Ansible, and Puppet are demonstrated. The software development life cycle along with relevant software versioning tools, such as Git and Subversion, are also covered. The application of network automation to Software Defined Networks (SDN) is explained. The effects of network automation on operational and financial efficiency are discussed. Current vendor applications are reviewed. Hands-on labs confirm and enhance learning of course topics. Prerequisites: EETS 7304, EETS 8303.

### **EETS 8355 - Data Center Network Engineering with Lab**

*Credits: 3*

Focuses on the advanced analysis of data center cloud computing and virtualization including the design and implementation of a private cloud environment and integration with public cloud providers. This includes implementation using industry leading software applications. Examines the internal and external data center networks design and implementation. MSTP, MPLS, and DMVPN as well as advanced routing protocol topics of BGP, OSPF, and IS-IS applications to data center networks are examined in detail. In addition, network automation methods and software packages are introduced and data center network security is reviewed. Students demonstrate mastery of classroom material by written examinations and by satisfactorily performing numerous laboratory exercises using actual software and hardware discussed in class. Prerequisites: EETS 7304 and EETS 7353.

### **EETS 8390 - Special Topics**

*Credits: 3*

### **EETS 8391 - Special Topics**

*Credits: 3*

### **EETS 8392 - Special Topics**

*Credits: 3*

### **EETS 8393 - Special Topics**

*Credits: 3*

### **EETS 8395 - Special Topic with Lab**

*Credits: 3*

Students may need to register in several special topics courses with a lab component to obtain the desired number of credit hours, with a limit of no more than 6 credit hours in a single term and no more than 4 credit hours in the summer terms.

# Engineering Management, Information and Systems

**Professor** Sila Çetinkaya, **Chair**

**Professors:** Sila Çetinkaya, Halit Üster

**Associate Professors:** Richard S. Barr, Eli V. Olinick, Aurelie Thiele

**Assistant Professors:** Miju Ahn, Harsha Gangammanavar, Michael Hahsler, Alba Rojas-Cordova

**Lecturers:** Rachel P. Goodman

**Adjunct Faculty:** Karl J. Arunski, Charles W. Beall, Robert L. Bell, William D. Bell, Andrew F. Bouma, Hakki Cankaya, Jagadeesh Chandramohan, George W. Chollar, Randall Clendening, Gretchen H. Coleman, Steven C. Currall, Matthew L. Durchholz, John R. Graham, III, Michael E. Hopper, Robert H. Jones, John I. Lipp, James K. McCloud, William P. Nanry, Oscar K. Pickels, Mark E. Sampson, Thomas F. Siems, Nandlal M. Singh, Stephen C. Skinner, Gheorghe M. Spiride, Xinyu (Edward) Wang, Timothy D. Woods

## Graduate Programs

Leaders need more than technical knowledge in today's complex working world. EMIS programs develop leadership, engineering and management skills for success in technology-based organizations. The same systems-oriented, mathematical model-based approach to design – which has been the cornerstone of engineering for decades – has powerful application within technology-based organizations.

The EMIS department offers five programs and eight degrees to prepare graduates for leadership in their chosen career:

- **Engineering Management** develops expertise in applying engineering principles to managing technology-based projects and people in technical roles.
- **Operations Research** applies advanced quantitative methods to help organizations make better decisions and generate insight for practical implementation. By using data-driven, analytical and computational techniques such as mathematical modeling to analyze complex situations, operations research gives organizational leaders the power to make effective and insightful decisions and build productive systems in the age of Big Data.
- **Systems Engineering** develops expertise for the creation and management of a complex system by viewing it as a whole, over its life cycle, using systems-engineering principles, methods and practices.
- **Information Engineering and Management** provides the graduate with the tools to effectively engineer, manage, and utilize the data collection and information flow of an organization by developing technical and management skills required in the age of Big Data via a unique curriculum combining software, networking, hardware, technology, and management along with data-driven modeling and computational skills.
- **Engineering Entrepreneurship** develops engineers who look at the role of new technology in society with a business perspective. These graduates have the ability to apply that knowledge to bring new technology to the marketplace.

The unifying theme of these efforts is the application of engineering principles and techniques to enhance organizational performance. Faculty specializations include optimization, data mining, advanced analytics, telecommunications network design and management, supply-chain systems, systems engineering, logistics engineering, quality control, reliability engineering, information engineering, benchmarking, operations planning and management, network optimization and mathematical programming. Whether the graduate will be in a technology firm, the military or a not-for-profit organization, he or she will develop the essential technical and leadership skills in the Engineering Management, Information and Systems Department.

**Graduate Degrees.** The Department of Engineering Management, Information and Systems offers the following graduate degrees:

Operations Research	M.S.	Ph.D.
Systems Engineering	M.S.	Ph.D.
Engineering Management	M.S.E.M.	D.E.

Information Engineering and Management  
Engineering Entrepreneurship

M.S.I.E.M.  
M.S.E.N.

Courses for these programs are offered both on-campus and off-campus via several remote-delivery systems. Master's degrees may be completed through distance education via online video, as may most of the coursework for doctoral degrees. More information on distance education delivery systems is in the Off-campus Distance Education section of this catalog.

The Department of Engineering Management, Information and Systems also offers the following, which are described in this section:

- Weekend versions of selected master's degrees in the Dallas-Fort Worth area.
- Fast multiple master's options, which can reduce coursework requirements when pursuing multiple graduate degrees.

The most up-to-date information on programs and activities is available on the departmental website at [www.smu.edu/Lyle/Departments/EMIS](http://www.smu.edu/Lyle/Departments/EMIS).

## Multiple Master's Degrees

SMU's Lyle School of Engineering permits its graduate students to take advantage of degree-requirement overlaps to acquire a second master's degree by taking as few as six courses (18 credit hours). This option is available for prospective and current graduate students, as well as alumni who have already received an M.S. from SMU. The following guidelines must be followed by students wishing to receive two M.S. degrees:

1. The student must apply to and be admitted to both programs.
2. All requirements of both degrees must be met.
3. For the new (or second) master's degree, a minimum of 18 credit hours of graduate coursework must be taken, and it must be coursework that will not or has not been applied toward another SMU Lyle graduate degree.
4. For students who are currently enrolled in an SMU Lyle graduate program and who are seeking a new master's degree, the degree will not be awarded until a minimum of 30 credit hours of graduate coursework has been completed at SMU.

With careful planning, a student can develop an advanced education strategy leading to multiple degrees, including combinations with a Master of Science in Engineering Management; a Master of Science in Information, Engineering and Management; an M.S. with a major in systems engineering; or an M.S. with a major in operations research. Students apply and file degree plans for both degrees, and then complete the coursework. Additional information and examples of programs of study for obtaining two master's degrees from the EMIS department are available at [www.smu.edu/Lyle/Departments/EMIS](http://www.smu.edu/Lyle/Departments/EMIS).

**Administrative Process.** Students pursuing dual degrees must be admitted into each degree program separately. A separate application form and statement of purpose must be submitted for each, as follows:

- To apply for both degrees simultaneously, the student must include a note indicating that he or she is "applying for a second master's," and a single application fee and set of transcripts will be required.
- If the student is already enrolled in one program, he or she must submit an application form and statement of purpose for the second degree, along with a note indicating that he or she is applying for (not a requesting a transfer to) a "second master's program."

## Weekend Master's Programs

The Lyle School of Engineering's weekend master's degrees are two-year programs developed for rising and prospective technical managers who have technical undergraduate degrees and are moving up to higher management positions or starting their own company. It is a cohort weekend program that is restricted to a highly motivated group of area professionals and designed to impart essential knowledge for today's and tomorrow's technology-driven organizations.

The fast-track engineering management program develops expertise in applying engineering principles to managing technology-based projects and people in technical roles. This well-rounded approach prepares individuals for success in the new world of the technology-driven enterprise with its challenges and opportunities.

The systems engineering program develops expertise for the creation and management of complex systems (products and services) that satisfy customer requirements in considering engineering, technology, environmental, management, risk and economic factors by viewing the system as a whole during its life cycle, using systems-engineering principles, methods and practices.

The information engineering and management program provides the graduate with the tools to effectively engineer and manage the information flow within an organization. The curriculum is comprised of 10 courses, ranging from software, networking and hardware courses to courses in information handling, management and system-level considerations.

As a tool for recruitment and retention, each of these degrees can be an ideal reward or incentive device to help companies attract and keep top talent. Best of all, the program is extremely cost-efficient, priced below other comparable programs. For more information on all of the EMIS weekend master's programs, students should see the department website at [www.smu.edu/Lyle/Departments/EMIS](http://www.smu.edu/Lyle/Departments/EMIS).

## **Engineering Management, D.E.**

This degree is designed to provide students with preparation to meet doctoral standards in an applied science or engineering practice. Applied science as a focus for the doctoral degree refers to the study of advanced theory and its application to a practical problem in order to test and verify performance limitations. The degree requires a high level of expertise in the theoretical aspects of relevant scientific principles and experience with details of the implementation of theory on realistic problems. Engineering practice as a focus for the degree is the study of different aspects that play a role in the transfer of technology, from its inception in research to the intended engineering environment, as well as relevant economic issues. (For information on general degree requirements, students should see the separate Doctor of Engineering Degree.)

## **Admission Requirements**

Applicants are required to satisfy these requirements:

1. A master's degree in a technical area from a U.S. college or university accredited by a regional accrediting association or completion of an international degree that is equivalent to a U.S. master's degree from a college or university of recognized standing.
2. Excellent academic performance in all completed coursework, with a minimum GPA of 3.400 on a 4.000 scale.
3. Submission of a complete application, including a statement of purpose, official transcripts for all previous undergraduate and graduate studies and payment of appropriate application fee.
4. Official GRE graduate school admission test results with a minimum 80th percentile quantitative score.
5. Three letters of recommendation from individuals who can judge the applicant's potential success as a doctoral student.
6. Graduates from foreign countries are required to submit a notarized financial certification form. All international students whose native language is not English and who have not graduated from an American university must submit a minimum TOEFL English language proficiency score before being considered for admission as follows:
  - 550 – paper-based examination.
  - 213 – computer-based examination.
  - 80 – Internet-based examination.
7. Approval by the director of the engineering management graduate program.

## **Degree Requirements**

In addition to meeting the Lyle School of Engineering requirements for the D.Engr. degree, candidates are required to satisfy the following:

1. **Twenty-four credit hours of engineering management.** These credit hours must come from graduate-level courses in quantitative and qualitative aspects of managing in a modern technical environment. Courses in the areas of engineering management, management science, operations research, operations management, production management and other related fields may qualify.
2. **Eighteen credit hours in a technical specialty.** These credit hours must be taken in an engineering or other technical area consistent with anticipated doctoral work demands.
3. **Nine credit hours of business/economics.** These credit hours must come from courses in a graduate program. They should expand the student's understanding of the economic issues and problems relating to the transfer and management of technology.
4. **Fifteen credit hours of electives.** All elective credit hours must come from graduate-level courses and must be approved by the advisory committee. These courses should, in some way, complement and strengthen the student's degree plan.
5. **Twelve credit hours of praxis.** These credit hours must be taken in residence. The student enrolls for these credit hours in the course of preparing the praxis project.
6. **Satisfactory completion of the preliminary counseling examination.** An oral exam covering degree fundamentals. The exam should be scheduled after the student has taken courses in production systems engineering, engineering management, engineering economics, and decision analysis and operations research models, but before 24 credit hours have been completed. Questions are drawn predominantly from the graduate courses EMIS 7362, EMIS 8360 and EMIS 8361. If the student fails the exam, he or she may retake it once. Since the goal of the exam is to detect weaknesses in the student's background, the examiners may grant a conditional or partial pass. Such a pass indicates that the student's weaknesses can be overcome by taking specific courses. In this situation, the student need not retake the exam but will be required to take one or more courses and achieve a grade of B or better.
7. **Satisfactory completion of the doctoral qualifying examination.**
8. **Satisfactory completion and defense of the doctoral praxis.**

A course may not be counted toward more than one category. The minor requirements may be satisfied by transfer credit.

The following courses, or their equivalents, are included in the degree plan:

### **Engineering Management**

- EMIS 7362 - Production Systems Engineering
- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8362 - Engineering Accounting
- EMIS 8363 - Engineering Finance
- EMIS 8364 - Engineering Management

### **Operations Research**

- EMIS 8360 - Operations Research Models
- EMIS 8378 - Optimization Models for Decision Support

One of the following:

- EMIS 8371 - Linear Programming
- EMIS 8373 - Integer Programming
- EMIS 8374 - Network Flows

### **Statistics**

- EMIS 7370 - Probability and Statistics for Scientists and Engineers
- EMIS 7377 - Statistical Design and Analysis of Experiments

# Operations Research, Ph.D.

## Admission Requirements

1. A master's degree in engineering, mathematics, computer science, economics or a related technical field from a U.S. college or university accredited by a regional accrediting association or completion of an international degree that is equivalent to a U.S. master's degree from a college or university of recognized standing.
2. Excellent academic performance in all completed coursework, with a minimum GPA of 3.400 on a 4.000 scale.
3. Previous coursework that includes satisfactory completion of at least nine credit hours of calculus, three credit hours of linear algebra and three credit hours of computer programming in a high-level language. (Typically, a Bachelor of Business Administration does not provide sufficient background.)
4. Submission of a complete application, including a statement of purpose, official transcripts for all previous undergraduate and graduate studies and payment of appropriate application fee.
5. Official GRE graduate school admission test results with a minimum 80th-percentile quantitative score.
6. Three letters of recommendation from individuals who can judge the applicant's potential success as a doctoral student.
7. Graduates from foreign countries are required to submit a notarized financial certification form. All international students whose native language is not English and who have not graduated from an American university must submit a minimum TOEFL English language proficiency score before being considered for admission as follows:
  - 550 – paper-based examination.
  - 213 – computer-based examination.
  - 80 – Internet-based examination.

## Degree Requirements

In addition to the Lyle School of Engineering requirements for the Ph.D. degree, candidates are required to satisfy the following. (For a Ph.D. degree, the Lyle School of Engineering requires a minimum academic credit of 54 credit hours earned in coursework beyond the baccalaureate degree or 24 credit hours earned in coursework beyond a master's degree. In addition, a minimum of 24 research credit hours are required in dissertation work.)

1. The successful completion of at least 8 graduate courses (at least 24 credit hours) beyond the master's degree.
2. In their first year of the doctoral study, the students are required to complete 18 credit hours of coursework (6 courses) including two core course requirements.
3. At the end of the spring semester of the first year, the student is required to take the **Preliminary Counseling Exam (PCE)** to demonstrate competence in operations research fundamentals. This exam has two parts:
  - a. The first part is composed of two written exams on the topics of EMIS 8370 and EMIS 8371 (i.e., the core requirement courses). If a student already secured an A grade in both of the core requirement courses, this part can be waived completely. However, if the student received an A- or less in at least one of the two core courses, this part is required in its totality. The exam is graded based on Pass/Fail grading scheme.
  - b. The second part is composed of two research paper presentations and cannot be waived. From a list of papers provided by the faculty, the student chooses two papers. Once the choices are confirmed, the student reads them following a guide provided and prepares a 45-minute presentation on each paper (given at separate times) for an oral exam on the in-depth understanding of the subject. The student also prepares written reports on the papers and submits them before the oral exams. An examination committee, formed by the PhD program director, will conduct the exam. This part of the exam can also include a computational study based on one of the papers chosen. Written exams and/or performance in the first year courses and paper reports, presentations, and, the student's responses to the examination committee's questions will be used to grade the overall performance as well as the future success potential of the student in the doctoral program. Each part of the exam can be retaken at most once in a way that a decision on the status of the student in the PhD program can be made by the end of the summer semester of the first year. The student is responsible to submit the **Preliminary Exam Initiation** form to the department within a week after the detailed information on the second part of the exam is announced.

4. If the student has a suitable background in a core course, that course can be waived. In this case, the student must take the PCE exam at the time that it is offered, without any exception regardless of his/her previous grade on the waived core requirement course. If the exam is passed successfully, then the course credit can be honored towards total minimum credit requirement (24 hours). In this specific situation, the student is still required to complete 18 credits of coursework (6 courses without including independent study or research credit related courses) in the first two semesters in the program.
5. The student, although not required if no funding is available, can choose to spend the summer semester of the first year by:
  - a. engaging in independent research study with faculty (in which case the summer funding would be provided by the faculty),
  - b. taking background enhancement courses (e.g., from the third group above) or skill set courses (e.g., programming, writing, presenting, GIS, etc.) in consultation with the OR program director (can also be in addition to independent study),
  - c. taking an internship approved by the OR program director (summer funding provided by the company), or
  - d. enrolling in research credit course if already funded by a faculty member out of a grant.
6. Having passed the PCE and completed at least 6 courses (18 credit hours) in the program, in the second year, the student will complete at least two additional courses (to fulfill minimum 24 credit hours requirement) from the second group above and one independent research study course (if not completed in the preceding summer). Depending on how this requirement is planned to be satisfied and on the student's commitment to a research project with an academic advisor, additional credit requirements to ensure full-time student requirements (9 credit hours per semester) can be fulfilled in alternative ways. In coursework selection, care must be taken to ensure that the student accumulates both breadth of knowledge in OR and depth of knowledge in the specific area of interest. If the student is not yet committed to work with an advisor by the end of the fall semester, he/she needs to consult with the OR program director and the faculty who offered the independent research study to decide on additional complementing courses to take in the spring.
7. Regardless of what path was taken in the second year of study, the student must form his/her **Dissertation Supervisory Committee** by the end of the spring semester of the second year latest. However, this is preferred to happen earlier, by the end of the fall semester, as the committee can also make suggestions for the additional coursework to be completed in the spring semester of the second year. This completes the **degree plan formation** and the student concentrates on the research in the summer semester of the second year and the following fall semester. It may also be possible to spend the same summer at an internship, preferably related to the area of research, by the approval of the student's supervisory committee. At this point, completion of the forms **Recommendation and Certification of Appointment of Supervisory Committee** and **Doctoral Degree Plan** need to be submitted to the graduate office.
8. The student is expected to complete the **Qualifying Examination** administered by his/her supervisory committee in the spring or summer semester of the third year in the program. The exam will typically include a series of take-home exams individually given by the supervisory committee members and completion of a dissertation research proposal that includes some preliminary results and a clear articulation and plan of the research proposed. This will be followed by a meeting with the committee where the student will present his/her research proposal, lead a discussion to receive feedback from the committee, and address any other questions regarding the take-home exams and related advanced topics. Upon passing this exam, the student will be admitted to candidacy. At this point, the student should complete and submit the **Admission to Candidacy** form to the graduate office.
9. The student will complete his/her research and the **Dissertation**. The **Dissertation Defense** is expected to take place by the end of the fourth year in the program. At the completion of the exam, the form **Report on Thesis or Dissertation and/or Final Examination** is submitted to the graduate office.
10. During their PhD program, students are required to give at least one departmental seminar on their research and attend to all research seminars announced in the EMIS Department.
11. Starting in the second year, students are required to submit annual reviews following the template provided at the end of the spring semester.

## Core Courses

- EMIS 8370 - Stochastic Models
- EMIS 8371 - Linear Programming

## Additional Course Options

- EMIS 7331 - Data Mining
- EMIS 7350 - Algorithm Engineering
- EMIS 7351 - Enterprise Fundamentals
- EMIS 7361 - Computer Simulation Techniques
- EMIS 7373 - Supply Chain Operation and Control
- EMIS 7377 - Statistical Design and Analysis of Experiments
- EMIS 8331 - Advanced Data Mining
- EMIS 8372 - Queueing Theory
- EMIS 8373 - Integer Programming
- EMIS 8374 - Network Flows
- EMIS 8378 - Optimization Models for Decision Support
- EMIS 8381 - Nonlinear Programming
- EMIS 8383 - Advanced Logistics Networks
- MATH 6370 - Parallel Scientific Computing
- Other EMIS 8000 level courses offered as Special Topics

## Recommended Courses

- MATH 3304 - Linear Algebra
- MATH 4338 - Analysis
- PHIL 1300 - Introduction to Critical Thinking
- STAT 6312 - Mathematical Statistics II (or STAT 6327/6328- Mathematical Statistics)

### Note:

In the first two semesters (typically, fall and spring), the student is required to complete two core requirement courses with a 3.500 or better average. The other four courses can be selected from the second group or the third group above. The student must consult with his/her academic advisor while determining the course selection. The courses in the third group and the prerequisites of any course not on the above lists do not typically count towards satisfying minimum 24 hours credit requirement. Doctoral students must maintain at least a 3.000 GPA every term and at least a 3.400 overall (cumulative) GPA during their course of study.

## Systems Engineering, Ph.D.

In addition to the five steps below, process details and other requirements for the Ph.D. degree may be found elsewhere in the SMU Lyle School of Engineering Graduate Catalog. The steps for completion of the doctoral program are

1. **Basic Coursework:** Upon entry into the Ph.D. program, a student is assigned an academic adviser. The adviser will examine the student's prior background and current state of knowledge and then recommend courses to be taken in preparation for Step 2.
2. **Preliminary Counseling Exam and Program of Study:** To be eligible for advanced study, a student must demonstrate competence in systems engineering fundamentals by passing the preliminary counseling examination. This exam is oral and is administered by three faculty members. Particular emphasis will be given to the material covered in the following courses: EMIS 7301, EMIS 7303, EMIS 7305 and EMIS 7307.
3. **Appointment of Supervisory Committee and Advanced Coursework:** Upon completion of the preliminary counseling exam, the student develops a proposed program of study that meets the degree requirements in Section II and includes the planned advanced coursework. Based upon the proposed program of study, a supervisory committee is formed. The supervisory committee makes any needed adjustments to

the program of study. Changes in the program of study are subject to approval by the supervisory committee. Step 3 requires completion of the forms Recommendation and Certification of Appointment of Supervisory Committee and Doctoral Degree Plan. (All forms are available for downloading at [www.smu.edu/Lyle/Departments/EMIS](http://www.smu.edu/Lyle/Departments/EMIS).)

4. **Qualifying Examination:** At or near the completion of the coursework, the supervisory committee conducts the qualifying examination. This exam ordinarily involves a series of take-home exams, but the format is left to the discretion of the supervisory committee. The qualifying examination is concluded by an oral exam at which time the student is expected to present a proposal for the dissertation. A written proposal must be given to the supervisory committee prior to the oral exam. Upon passing this exam, the student is admitted to doctoral candidacy. Step 4 requires completion of the form Admission to Candidacy.
5. **Dissertation Defense:** The most distinguishing characteristic of a program leading to the Ph.D. degree is the requirement that the candidate write a dissertation embodying the results of a significant and original investigation. The dissertation must make a significant contribution to the systems engineering discipline, and it is expected to be a mature and competent piece of writing. The defense, which is conducted orally, must enable the supervisory committee to satisfy itself that the dissertation is an original piece of research work that it has been carried out in keeping with the highest standards of investigation and reporting and that it makes a contribution to knowledge that is of value to the scientific community. Satisfactory performance on this defense constitutes the last academic requirement to be met for the Ph.D. degree. Step 5 requires completion of the form Report on Thesis or Dissertation and/or Final Examination.

## Admission Requirements

Applicants must satisfy these requirements:

1. A master's degree in systems engineering or a related field including aerospace engineering, computer science, electrical engineering, engineering management, environmental engineering, civil engineering, industrial engineering, mechanical engineering, mathematics, operations research, statistics or physics from a U.S. college or university accredited by a regional accrediting association or completion of an international degree that is equivalent to a U.S. master's degree from a college or university of recognized standing.
2. Excellent academic performance in all completed coursework, with a minimum GPA of 3.400 on a 4.000 scale.
3. A completed application, including a statement of research intent, official transcripts for all previous undergraduate and graduate studies and payment of the application fee.
4. Official GRE graduate school admission test results with a minimum 80th-percentile quantitative score.
5. A minimum of two years of college-level mathematics, including at least one year of calculus.
6. A minimum of three years of engineering experience in industry and/or government.
7. Three letters of recommendation from individuals who can judge the applicant's potential success as a doctoral student.
8. Graduates from foreign countries are required to submit a notarized financial certification form. All international students whose native language is not English and who have not graduated from an American university must submit a minimum TOEFL English language proficiency score before being considered for admission as follows:
  - 550 – paper-based examination.
  - 213 – computer-based examination.
  - 80 – Internet-based examination.

## Degree Requirements

In addition to meeting the Lyle School of Engineering requirements for the Ph.D. degree, candidates are required to satisfy the following minimum credit requirements:

1. Thirty credit hours of core systems engineering courses. These credit hours must come from required graduate-level courses in systems, as specified in this section.
2. Fifteen credit hours in an approved major that is related to a specific systems engineering focus area and consistent with anticipated doctoral research. No more than six credit hours can be independent study.

3. Nine credit hours in an approved minor supporting the chosen research area. These credit hours can come from graduate-level courses in EMIS or other departments. The minor requirement may also be satisfied by transfer credit subject to SMU's Transfer of Credit Policy.
4. Twenty-four credit hours for the dissertation. These credit hours must be taken in residence. The student enrolls for these credit hours in the course of writing the dissertation.

In addition, at least 18 credit hours of the 54 credit hour coursework minimum must be at the 8000 level. There must be a minimum of 24 credit hours of graduate coursework and a minimum of 24 credit hours of dissertation work, none of which have been nor can be applied to any other degree.

## **Core Courses**

The 10 required courses are

- EMIS 7301 - Systems Engineering Process
- EMIS 7303 - Integrated Risk Management
- EMIS 7305 - Systems Reliability and Availability Analysis
- EMIS 7307 - Systems Integration and Test
- EMIS 7317 - Systems Engineering Leadership
- EMIS 7319 - Systems Architecture Development
- EMIS 7370 - Probability and Statistics for Scientists and Engineers
- EMIS 7377 - Statistical Design and Analysis of Experiments
- EMIS 8360 - Operations Research Models

## **Focus Areas**

### **Systems Design and Development**

- CS 7316 - Software Requirements
- CS 7319 - Software Architecture and Design
- CS 7347 - XML and the Enterprise
- CS 8314 - Software Metrics and Quality Engineering
- CS 8317 - Software Reliability and Safety
- CS 8340 - Advanced Topics in Software Engineering
- EMIS 7309 - Systems Reliability Engineering
- EMIS 7311 - Systems Engineering Design
- EMIS 7323 - Systems Life Cycle Cost and Affordability Analysis
- EMIS 7325 - Systems Engineering Software Tools

### **Leadership and Management**

- CS 7315 - Software Project Planning and Management
- EMIS 7321 - Systems Engineering Planning and Management
- EMIS 7365 - Program and Project Management
- EMIS 8364 - Engineering Management
- EMIS 8368 - Enterprise Leadership
- ME 7303 - Organizational Leadership
- ME 7369 - Innovation Management

### **Logistics and Supply Systems**

- CEE 7371 - Facility Financial and Asset Management
- CEE 8379 - Analysis of Transportation Systems
- EMIS 7313 - Integrated Logistics Support

- EMIS 7362 - Production Systems Engineering
- EMIS 8361 - Engineering Economics and Decision Analysis

### Systems Analysis and Optimization

- EMIS 7361 - Computer Simulation Techniques
- EMIS 7362 - Production Systems Engineering
- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8371 - Linear Programming
- EMIS 8372 - Queueing Theory
- EMIS 8374 - Network Flows
- EMIS 8373 - Integer Programming
- EMIS 8378 - Optimization Models for Decision Support
- EMIS 8380 - Mathematics for Optimization

## Engineering Entrepreneurship, M.S.

### Overview

The Master of Science in Engineering Entrepreneurship is a two-semester (31 semester credit hours) cohort based program in the EMIS Department of the Lyle School of Engineering offered in concert with Lyle (19 SCH) and the Cox School of Business (12 SCH). Incoming students should have an engineering undergraduate degree (or equivalent).

A graduate of the SMU M.S. in engineering entrepreneurship will be an engineer who looks at the role of new technology in society with a business perspective. That graduate will have the ability to apply that knowledge to bring new technology to the marketplace. The program thus fills the growing regional and national need for exceptionally trained engineering managers and entrepreneurs to start and to lead new technology ventures.

Rigorous, formal, successful courses with proven impact will be offered by the Cox School in entrepreneurship knowledge and practice. Management in an engineering context will be taught in well-established courses in Lyle's EMIS department. A third anchor for the M.S. in engineering entrepreneurship will be a new course offering that will be unique to SMU. The two-semester Technology Commercialization Studio will:

- Focus on the management of products with high technology content;
- Encourage the incubation of novel technology from students, and from SMU's research laboratories;
- Include C-level mentors from successful small and medium sized engineering firms and venture capital firms; and,
- Feature lectures from experts in intellectual property, legal aspects of businesses, ethics, financing, fundraising, sales and other subject matter vital to the practice of engineering entrepreneurship.

Students in the program will also have the ability to add to their engineering expertise, particularly in topics relevant to their entrepreneurial aspirations.

### Admission Requirements

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy the following additional requirement: a B.S. in engineering or another technical discipline.

### Core Courses

- CISB 6222 - Starting a Business
- CISB 6226 - Evaluating Entrepreneurial Opportunity
- EMIS 7501 - Technology Commercialization Studio I
- EMIS 7503 - Technology Commercialization Studio II
- STRA 6224 - Entrepreneurial Strategy

- Satisfactory completion of one three hour course from any Lyle graduate program, approved by the adviser

**Three from the following:**

- BAEX 6237 - Global Explorations in Entrepreneurship
- CISB 6210 - Essential Law for the Entrepreneur
- CISB 6211 - Enhancing Operational Performance for Entrepreneurial Companies
- CISB 6212 - International Entrepreneurship
- CISB 6214 - Law of Financial Transactions for Entrepreneurs
- CISB 6218 - Managing the Family-Owned and Closely Held Business
- CISB 6220 - Social Media for Entrepreneurs
- CISB 6224 - Venture Financing
- CISB 6225 - Entrepreneurial Exit Strategies: LPO, Sale, IPO, Recapitalization, and Liquidation
- CISB 6228 - Corporate Entrepreneurship: Intrapreneuring

**Two from the following:**

- CEE 7306 - Sustainable Urban Development and Design
- EMIS 7351 - Enterprise Fundamentals
- EMIS 7365 - Program and Project Management
- EMIS 7366 - Marketing Engineering
- EMIS 8358 - Technical Entrepreneurship
- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8364 - Engineering Management

## **Engineering Management, M.S.E.M.**

The M.S.E.M. was developed for individuals who have an undergraduate technical degree and are or will be rising through management or starting their own company. The engineering management degree is designed to impart essential knowledge for today and tomorrow's technology-driven business.

The M.S.E.M. program develops expertise in the traditional graduate business areas – finance and accounting – along with pace-setting, innovative expertise in information engineering, global perspectives, leadership and entrepreneurship. This well-rounded approach prepares individuals for success in the new world of techno-business with its challenges and opportunities.

A special feature of the engineering management program is its interaction with allied areas such as operations research, mathematics, science, engineering, computer science and statistics. Excellent faculty members from these areas participate in the department's activities, and students take courses from several areas depending upon their interests.

### **Admission Requirements**

In addition to meeting the Lyle School of Engineering admission requirements for an M.S. degree, applicants are required to satisfy the following additional requirement: a B.S. in engineering or another technical discipline.

### **Degree Requirements**

In addition to meeting the Lyle School of Engineering degree requirements for an M.S. degree, candidates are required to satisfy the following additional requirements:

#### **Core Courses**

Satisfactory completion of five core courses:

- EMIS 7301 - Systems Engineering Process
- EMIS 7362 - Production Systems Engineering

- EMIS 7370 - Probability and Statistics for Scientists and Engineers
- EMIS 7300 - Systems Analysis Methods  
or
- EMIS 7357 - Analytics for Decision Support  
or
- EMIS 8360 - Operations Research Models
- EMIS 8364 - Engineering Management

### **Economic/Financial Courses**

Satisfactory completion of two economic/financial courses from the following:

- EMIS 8361 - Engineering Economics and Decision Analysis
- EMIS 8362 - Engineering Accounting
- EMIS 8363 - Engineering Finance

### **Concentration Courses**

- Satisfactory completion of a coherent nine credit hour concentration approved by the adviser.

## **Information Engineering and Management, M.S.I.E.M.**
