

LOOKING FOR A COURSE THAT MAKES A DIFFERENCE?

CREATING GLOBAL AND PUBLIC HEALTH IMPACT

Dr. Eric G. Bing's innovative *Creating Global and Public Health Impact* course gives you the tools to analyze and develop solutions for complex public health challenges and adapt those solutions to new, real-world contexts. No health background or expertise in all these areas is required.

Through a series of real-world case studies, guest speakers, discussions, and debates, this course will help you understand the many reasons why some global and public initiatives succeed in improving health while others fail. The course culminates in the Battle to Save Lives, a public case competition in which students advocate for solutions to a real-world problem faced by a local organization.

Fulfills the following Proficiencies and Experiences in the Common Curriculum:

- Community Engagement (CE)
- Global Perspectives (GPS)
- Human Diversity (HD)
