--------------------	-------------------	---	-------------------------------

**Some departments are not scheduling formal programming, but will be available to meet with students. Please connect with your department to schedule an individual appointment.**

*Note:* The Biology department has a scheduling conflict and will not be available on this day. However, we encourage admitted students to still attend our event if they'd like to learn more about what resources are available at the university level and would like to meet current and newly admitted SMU doctoral students. If you have questions specifically about the Biology program, please contact Dr. Robert Harrod ([rharrod@smu.edu](mailto:rharrod@smu.edu)).
