About the Tsai Center for Law, Science and Innovation

The Tsai Center for Law, Science and Innovation explores how law and policy affects scientific research and discovery as well as the development and commercialization of new technologies. The Tsai Center also studies the converse—how scientific discoveries and new technologies affect ethics, society, private industry, and governmental institutions and agencies. The Tsai Center offers educational programming, facilitates academic research, and provides educational opportunities in these areas to benefit students, industry, policymakers, academics, and the public.
