SMU SciTech Law Review

Published twice a year, the SMU Science & Technology Law Review is a journal produced by the Southern Methodist University Dedman School of Law's Science and Technology Law Review Association. Each issue includes articles authored by leading scholars and practitioners that address key legal, economic, and political developments and issues within science and technology, including the legal use and limits of hardware and software, and patent, copyright, and intellectual property law.

Perkins Coie

Perkins Coie is a leading international law firm that is known for providing high value, strategic solutions and extraordinary client service on matters vital to our clients' success. With more than 1,200 lawyers in offices across the United States and Asia, we provide a full array of corporate, commercial litigation, intellectual property and regulatory legal advice to a broad range of clients, including many of the world's most innovative companies and industry leaders as well as public and not-for-profit organizations.

Tsai Center for Law, Science and Innovation

The Tsai Center for Law, Science and Innovation explores how law and policy affect scientific research and discovery as well as the development and commercialization of new technologies. The Tsai Center also studies the converse—how scientific discoveries and new technologies affect ethics, society, private industry, and governmental institutions and agencies. The Tsai Center offers educational programming, facilitates academic research, and provides educational opportunities in these areas to benefit students, industry, policymakers, academics, and the public.
