

**SMU's Simmons School of Education and Human Development continues its steady rise in *U.S. News & World Report* national rankings of graduate schools of education.** After only 16 years since its founding, SMU Simmons is one of the newer schools of education in the nation. Currently ranked 11th in the country among private colleges of education, and in the top 18% of public and private schools in the USN&WR rankings, Simmons strives to continue its rise as one of the top graduate education schools in the United States.

The addition of stellar new faculty is a recent example of SMU's continued investment in education research. Simmons researchers work together to find ways to improve teaching and learning through the use of innovative instructional technology and methods. New and continued collaborations in interdisciplinary research are underway in the areas of STEM, AI, Augmented Reality, and Virtual Reality to investigate ways to improve literacy and math learning, applied physiology, and education policy. Simmons also offers outstanding education leadership graduate degrees, and a highly ranked sport management program.

Simmons graduate and undergraduate students are enriched by research and methodology while experiencing one of the most beautiful campuses in the country and a dynamic, cosmopolitan city. They move forward with the best tools to ensure their success as leaders in the fields of education and human development. Simmons faculty members pursue evidence-based solutions that profoundly change lives in the world today.
